[5] The summit level between Round Lake and Little Long Lake is but a few feet above the water. In wet seasons water runs both ways, and 25 mi. of slackwater navigation might be made at comparatively small expense. Round Lake flows into the S. branch of the Sacondaga, and Little Long Lake into the W. branch, so that, after running 25 and 35 mi. respectively, their waters again unite.

[6] Named from Mrs. James E. De Kay, by Dr. Emmons, while making the geological survey of the 2d district. She was the daughter of Henry Eckford, the celebrated shipbuilder, from whom the chain of lakes was named.

[7] It was for several years known as "*Lake Pleasant*," until changed through the agency of Hezekiah Sage, of Chattanooga, who built a large hotel and attempted to establish an extensive business there. Efforts have been made to procure a change of the present name, but without success.

[8] A few years since, Abraham R. Lawrence, of New York City, built a large hotel here and named it at the head of Lake Pleasant. As a speculation it proved a failure.

[9] Benj. Macomber, John Barnes, Joseph Davis, Joshua and Jonathan Rich, Jesse Calkin, Caleb Nichols, Geo. Wright, Ephraim Page, Daniel Fish, Henry Burton, Lemuel Holmes, and B. Satterlee settled in town before 1800. The first birth was that of Olivia Spier, in 1806; and the second, that of Eleanor Macomber, who died a missionary in Burmah. Geo. Wright kept the first inn, in 1806, and Wm. B. Peck the first store, in 1817. A sawmill was built by —— Foster, in 1795, and a gristmill, by Joseph Spier, in 1797.

[10] David Keller, James Sargent, Owen Skinner, Zenas Parker Joel Plumley, and John Cunningham were first settlers. The first death occurred in 1858. A school was first taught in 1859 by Lucina Bissell. There are now 3 schools in town. A Congregational church was formed in 1842, by Rev. John Todd, of Pittsfield, Mass., and placed under the charge of Rev. M. Parker. This is the most secluded town in the State. It is usually reached from Essex co., to which the settlers resort for their mails and trade. **Schroon River** p. o., Essex co., is the nearest and most convenient office for receiving mails.

[11] Named from the first settler.

Its surface is hilly and mountainous. In the several valleys which extend across the town are numerous lakes. Jerseyfield Lake, upon the s. border, is the principal lake in the s. part. The 5th, 6th, 7th, and 8th lakes of the Fulton chain, in the N. part, discharge their waters into Moose River. Jones, Deer, Goose, and several other lakes flow into West Canada Creek. **Morehouseville,** in the s. part, is a p.o. The Arthurboro Patent was mostly within the limits of this town. The tract of 50,000 acres purchased by Jonathan Lawrence was also partly in this town.[1] The first settlement was commenced, under the agency of Andrew K. Morehouse, in 1833.[2]

WELLS[illegible] was formed from Mayfield and Northampton, Fulton co., May 28, 1805. Hope was taken off in 1818, a part of Long Lake in 1837, and Gilman in 1839. A part of Mayfield was annexed June 19, 1812; parts of Mayfield and Northampton in 1816; and parts of Gilman and Lake Pleasant in 1858. It lies along the E. border of the co. and forms a part of the hunting grounds of Northern N. Y. Its s. part is inhabited by a few families on Indian Lake. It is intersected by mountain ranges separated by deep, narrow valleys. The highest peaks are 2,000 to 2,500 feet high and are covered by masses of naked rock. The three branches of the Sacondaga unite in the s. part, forming a large stream. Jessup and Cedar Rivers, in the N., are large streams. Indian Lake is a sheet of water about 6 mi. long; and further N. is a cluster of small lakes flowing into the Hudson. There are numerous other small lakes in other parts, known only to hunters. The soil is light and sandy. Calciferous sandstone appears *in situ* above Wells Village. **Wells** p.v. contains a large tannery, gristmill, sawmill, and 15 dwellings; **Pickleville,** one-half mi. above, contains 2 churches and 15 dwellings. Settlement began in 1798.[4]

[1] The Arthurboro Patent included 3[illegible] townships, one 10 and the others each 9 miles square. It was granted to Arthur N. Helme, Dec. 17, 1787, for 1 shilling per acre. He endeavored to effect the settlement of the tract [illegible] but failed. The tract to Mr. Lawrence was granted for 4[illegible] shillings per acre.

[2] Mr. Morehouse bought a tract of land, built a sawmill, store, and dwelling, and came with his family early in Aug. 1833. He became the village magnate of Morehouseville, called [illegible], but the project failed. Deacon and Henry Tucker, Theodore Marnche, Ezra Combs, Jonathan Tift, Christian Weaver, Louis Rickard, J. B. Rielly, and E. Bennett were early settlers. The first birth was that of a son of Wm. Baker; the first marriage, that of David Bushnell and Miss Squires; and the first death, that [illegible] of Conrad Weaver, by falling tree. A gristmill was first built in 1843, by John Cummings; and the first tannery, in 1844, by Henry [illegible] Larkin.

HERKIMER COUNTY.

THIS county was formed from Montgomery, Feb. 16, 1791.[1] Onondaga was taken off in 1794, Oneida and a part of Chenango in 1798; the present territory of Hamilton co. was taken off and annexed to Montgomery in 1797; parts of Montgomery co. were annexed April 7, 1817; and parts of Richfield and Plainfield, Otsego co., were annexed in forming Winfield in 1816. It is centrally distant 80 mi. from Albany, and contains 1,745 sq. mi. Its surface is a hilly upland, with a series of ridges extending in a general N. and S. direction. Mohawk River flows E. through the co. in a deep valley which cuts the ridges at right angles and separates the highland into two distinct parts. A broad ridge extends from the S. border to the Mohawk, and thence N. of that river along the W. bank of East Canada Creek to the N. line of the co. The Hasenclever Mts., another broad ridge, lie along the W. border of the co., N. of the Mohawk. From the Mohawk the highlands rise toward the S. in a series of hills, the declivities of which are steep and their summits 500 to 1,000 ft. high. North of the river the surface gradually rises to a height of 1,000 to 1,500 ft., where it spreads out into a rocky and broken plateau region, the highest summits being 2,500 to 3,000 ft. above tide.

Mohawk River breaks through a mountain ridge at Little Falls, the valley forming a natural channel of communication between Lake Ontario and Hudson River. At this place the mountains on each side of the river are masses of naked rock rising nearly perpendicular to a height of 500 to 600 ft. An intervale, with an average width of 2 mi., extends along the river W. of the pass, and from it the land rises on each side in gradual slopes. East of this point the Mohawk flows for some distance through a valley bordered by steep and nearly perpendicular hills. The river receives from the N., Sterling, West Canada, Cathatachua, and East Canada Creeks; and from the S. Furnace, Brwns Hollow, and Nowadaga Creeks. East Canada Creek[2] forms a portion of the E. boundary of the co., and receives as tributaries Trammel, Spruce, and several other small creeks. West Canada Creek flows S. W. through Wilmurt, Ohio, and Russia, thence S. E. along the W. border of Russia, thence S. through Newport, Fairport, and Herkimer, to the Mohawk. It receives from the E. Black, White, and North Creeks, and from the W. several small brooks. Several small streams take their rise in the S. part of the co. and form branches of the Unadilla. The N. part of the co. is yet an unbroken wilderness. It is a wild, mountainous region, with very little land susceptible of cultivation. The streams, usually flowing in deep, rocky ravines, form headwaters of Black, Moose, Beaver, and Oswegatchie Rivers.

The portion of the co. lying N. of a line extending W. of Brocketts Bridge, on East Canada Creek, is covered with primary rocks.[3] This same formation also outcrops at Little Falls on the Mohawk. Rising successively above the primary are the Trenton limestone, appearing in Norway and Russia; the Utica slate, appearing upon the summits of all the hills immediately N. of the Mohawk; the Frankfort slate, appearing immediately S. of the river; the Oneida conglomerate and Clinton group, extending in a belt through near the center of the S. half of the co.; the Onondaga salt group, waterlime, Onondaga and cauliferous limestones, appearing in thin layers near S.; and the Marcellus shales and limestones of the Helderbergh Range, covering the summits of the S. hills. These rocks yield an abundance of lime, waterlime, and building material in nearly every part of the co.; and for these purposes they are extensively quarried. Drift is found in deep deposits in many parts of the co. The useful minerals are few in number.[4]

Agriculture forms the leading pursuit. The hilly character of the surface particularly adapts this co. to pasturage; and dairying has long been the leading branch of industry.[5] Hops are

[1] This name was originally "Herkimer," and it has been variously written in Records, Hercimer, Herkimar, Herkimere, Herkimir, Herkimor, Herkimur, Herkimyr, and Herkimyre. Herkimer is now universally used.

[2] West Canada Creek was called by the Indians Teuchtehdaneh, and the East Canada Creek Ostoya.

[3] The rocks produced in the region are granite, gneiss, limestone, and hornblende. Crystals and rock in beautiful association with gneiss at Little Falls.

[4] Gypsum is found in small quantities; and this co. is said to be the most easterly point in the state where it has been found. The discovery of small particles of copper, lead, and silver, and traces of gold, has led to [illegible] but [illegible] to warrant the opinion that coal could be obtained [illegible] Among the other minerals found are crystals of quartz, [illegible] specimens of sand, iron and copper pyrites, [illegible] heavy spar, graphite, alum, and alum slate.

R., both extending along the valley of the Mohawk.

Four weekly newspapers are now published in the co.[3]

The lands of this co. adjacent to the river were granted mostly in the first half of the last century, and the greater portion now settled was conveyed before the Revolution. The N. [illegible] and small tracts in other sections remained in possession of the State Government until conveyed to Macomb and others.[4]

The first settlements were made upon the river intervales above Little Falls, about 1722, by a colony of Palatinates. Accessions were made to their number from time to time, and up to the close of the Revolution they constituted almost the sole inhabitants of the co. During the French War of 1755, this colony was twice invaded, and numbers of the people were killed or carried away prisoners.[1] During the Revolution also it was repeatedly invaded: the buildings and crops were destroyed; and at last the inhabitants were obliged to abandon their homes and seek protection in the lower part of the valley. The German Flats were invaded by a body of 300 tories and 152 Indians, under Brant, in Sept. 1778. This party burned 63 dwellings, 57 barns, 3 gristmills, 2 sawmills, and killed or took off 235 horses, 229 horned cattle, 269 sheep, and 93 oxen. Only 2 persons lost their lives; and the forts were not attacked. A party of militia pursued them on their retreat, but without effecting any thing. Andrustown, in Warren, was burned in July of the same year. A stockade fort was built at the German Flats, and another at Danube, a short time previous to the commencement of the French War. In 1776 another fort was built at Herkimer, N. of the Mohawk; and strong blockhouses were erected in several other parts of the co.[2]

This co. shared in the loss of men at the battle of Oriskany. Gen. Arnold came as far as German Flats in the summer of 1777, on his way to relieve Fort Schuyler; and from this place was sent the tory Han Yost Schuyler, to spread alarm among the savages in St. Leger's camp and hasten the abandonment of the siege.

After the war the settlements rapidly spread, and within 15 years over 10,000 persons from New England and the eastern cos. of the State located in the central and s. portions of the co. From that time its progress has been gradual and continually prosperous.

COLUMBIA[3]—was formed from Warren, June 8, 1812. It lies on the s. border of the co., w. of the center. Its surface is rolling and moderately hilly, with an average elevation of 500 to 600 ft. above the Mohawk. The streams are small brooks, a portion of them flowing N. to the Mohawk and the remainder flowing S. to the Unadilla. The soil is a clayey loam and generally fertile. **Columbia Center** (Columbia p. o.) contains 98 inhabitants; **Cedarville,** (p. v.,) on the line of Litchfield, 2 churches, a tannery, and 145 inhabitants. **South Columbia,** in the S. E. part, is a p. o. The first settlement was commenced before the Revolution, by families from the Mohawk;[4] but their improvements were abandoned during the war. The first religious services (Ref. Prot. D.) were held at an early period. Abram Rosegrantz was the first preacher.[5]

[2] Fort Herkimer was built in the French War, and Fort Dayton, not before the Revolution. The former stood in and the latter a few rods from the site of the present court house, in Herkimer Village. At the time of the Revolution there were but about 50 dwellings in these forts; but there was a large population for the number of dwellings in the country around.

[3] This town contains Staats's Second Tract, except 12 lots of 100 acres in the S. E. corner, and part of lot 9 in the N. E. corner of Hendricson's Patent, and all of the patent to Conrad Frank and others, except 7 lots on the E.

[4] Among the early settlers were Conrad Orendorf, Conrad Evans, Conrad Fulman, Frederick Christian, Timothy Evans, Nicholas Lighthall, Joseph Mowry, and Henry Leach. The settlement was named "*Connecticut*" at an early day. *Benton's History, p.* 20.

Philip Ausman taught the first school, in German, in 1776. Joel Phelps an English school, in 1790. The first store was kept by David W. Gridley and Beal Max, in 1796. The first gristmill was built in 1791–92, by Andrew Miller and Geo. Beal, at Millers Mills.

There are 2 churches in town: Ref. Prot. D. and F. W. Bap.

off in 1828. It lies on the E. border of the co., s. of the center. Its surface is hilly in the west, rising 400 ft. 800 ft. above the Mohawk; and it is broken by ravines [illegible] the hilling of the creeks. Five flats extend along the Mohawk in the N. border. The principal stream is Nowadaga Creek, which flows N. E. through the town near the center. The soil is gravelly [illegible] loam in the s. In the N. are two sulphur springs. **Newville** (p. v.) contains [illegible] 29 houses, and **Indian Castle** Dominie p. o., a landing, 1 church. Settlements are supposed to have commenced as early as 1720, but no records have been preserved. During the [illegible] the settlements were broken up, and did not commence again until about 1780.[3] The first patents are dated 1730–31.[4] A mission church was established here by Sir William Johnson in 1768. This church had a bell, which the Indians attempted to carry off in the war, and for that purpose secreted it. Search was made in vain. After sufficient time had elapsed the thieves, on returning by night to bear away the coveted treasure, had their presence and business betrayed by the unruly member which they [illegible] to muffle. As it was [illegible] brought the Germans to its rescue with such weapons as they in their haste could snatch, and the bell was recovered. The present church occupying the site of the old Mission Church is known as the "Indian Castle Church." There are 2 union churches in town. This town was the residence of King Hendrick[5] and Joseph Brant,[6] the celebrated Mohawk chiefs, and of Gen. Nicholas Herkimer.[7] King Hendrick sustained a high character for sagacity and integrity, was warmly attached to the English, and especially to Sir Wm. Johnson, whom he accompanied to Lake George in the summer of 1755, where he was killed. He was recognized as a chief as early as 1697.

FAIRFIELD[8] was formed from Norway, Feb. 19, 1796. A part of Newport was taken off in 1806, and a part of Little Falls in 1829. It lies in the interior of the co., near the center. Its surface is a hilly upland, the center rising into a ridge 800 to 1,000 ft. above West Canada Creek.[9] The streams are small. West Canada Creek flows s. on the w. border. The soil on the uplands is mostly clay, and in the valleys it is gravelly, with local drift deposits of sand. Several fine quarries of limestone are found in different parts.[10] **Fairfield**, p. v., near the center, contains 5 churches, an academy,[11] a cheese box factory, and 60 houses; **Middleville**, p. v., on the line of Newport, 1 church, a woolen factory, tannery,[12] chair factory, grist and saw mill. Pop. 295. Settlements were first made in 1770, by a German families named Maltanner, Goodbrot, and Shaffer, who located upon the Royal Grant.[13] The first preacher was Rev. —— Fields, (Presb.,) in 1791.[14]

FRANKFORT[1]—was formed from German Flats, Feb. 5, 1796. It was divided in the formation of Oneida co. in 1798, and a part annexed to Deerfield. It lies on the w. border of the co., s. of the Mohawk. Its surface is a broad intervale, rising into hills of moderate elevation on the s.w. border, the highest points being about 500 ft. above the river. The Mohawk flows s.e. on the N. border. The streams are small brooks and creeks. The soil on the uplands is a clayey and slaty loam, and on the flats an alluvial loam. Limestone ledges are found in the s.w. The most important of these is called Horsebone Ledge. The stone is whitish and makes excellent lime. Slate and calciferous sandstone are also found in some places. **Frankfort,** (p.v.,) in the N.E., near the Mohawk, contains 4 churches, 1 bank, a grist and saw mill, woolen factory, and distillery. Pop. 1,150. **New Graefenberg** (p.o.) is the seat of a water cure, 4½ mi. from Utica. **Howards Bush** (Frankfort Hill p.o.) is W. of the center. Jacob Folts made the first settlement, on Lot 3, Burnetsfield Patent, before the Revolution.[2] The census reports 7 churches in town.[3]

GERMAN FLATS[4]—was formed, as a district of "*Tryon co.*," March 24, 1772. Its name was exchanged with the Kingsland District, March 8, 1773. It was recognized as a town March 7, 1788. Frankfort, Litchfield, and Warren were taken off in 1796, and a part of Little Falls in 1829. It lies upon the S. bank of the Mohawk, S. of the center of the co. A fine intervale extends along the river, and from it the surface gradually rises to a height of 300 to 400 ft. and spreads out into an undulating upland. The valley of Fulmer Creek divides this upland into two nearly equal parts. The other streams are small brooks. The soil is a clay and slaty loam upon the hills, and a gravelly loam and alluvium in the valleys. **Mohawk,** (p.v.,) a canal village, in the N.W. part of the town, was incorp. April 16, 1844. It contains 3 churches, a bank, and newspaper office. Pop. 1,355. **Ilion** (p.v.) is a canal village, 1½ mi. W. of Mohawk. It contains 2 churches, a bank, and Remmington's rifle factory. Pop. 813. **Fort Herkimer,** near the Mohawk, in the E. part, contains 2 churches and 20 houses. **Dennisons Corners** (Dennison p.o.) and **Pains Hollow** are hamlets. The first settlements were made in 1722, by a colony of Palatinates who had previously located upon the Hudson.[5] The population rapidly increased until 1756, when the whole settlement was laid waste by a party of Canadians, French, and Indians.[6] A council was held with the Indians at this place, June 28, 1775, at which the Oneidas and Tuscaroras agreed to remain neutral.[7] During the Revolution the Indians committed many murders in town; and in July, 1782, they destroyed nearly the whole settlement.[8] The German inhabitants early espoused the Patriot cause; and the first liberty-pole in the Mohawk Valley, erected here, was cut down by Sheriff White and a body of militia, who came up from Johnstown for the purpose, in the spring of 1775. At the close of the war the settlements progressed with great rapidity. A treaty was held with the Indians at Fort Herkimer, June 28, 1785, at which time the Oneidas and Tuscaroras ceded to the State the territory lying between Unadilla and Chenango Rivers. The first church was built of logs, in 1725; it was superseded by one built of stone, in 1767. The building is still standing, and is the most ancient structure in the co. It was commenced under a permit granted in 1746, but from apprehension of Indian troubles it was delayed, and a new permit was granted Oct. 6, 1751. It was not fully completed for use until 1767. On the 24th of Sept. 1730, Nicholas Wolever deeded Lot 50 of Burnetsfield Patent for church and school purposes. A society was formed soon after, and the conveyance was perfected April 26, 1733. Lots 45, 46, and 47 in German Flats were conveyed Sept. 18, 1755, by Hans Dedrick Stelly, and others, to Peter Remsen, for the support of the Ref. Prot. D. church at this place. The first preacher was Rev. A. Rosegrantz.[9]

[1] Named from Lawrence Frank, an early settler. A large part of Cosby's Manor, 1, Burnetsfield Patent, 4 lots in Burnetsfield Patent, ½ of 1 lot in Frankfort, 1 lot in Stuart's and a part of Colden's Patent, are in this town. *Beatty's Herkimer co. p.* 400.

[2] Among the other early settlers were Conrad Folts, Andrew Paper, David Dederick, Aaron Jones, —— Morgan, Evan Evans, Joseph Harris, John Morris, John Myers, and Adam Weber. Several Welsh families settled about 1800. The first inn was kept by John Myers in 17—; the first sawmill was built by John Hudson in 1794, and the first gristmill by Adam J. Campbell, in 1808.

[5] Among the early settlers were families named Dillenbaugh, Herkimer, Fox, Feller, Edwards, Starring, Wolever, and Helmer,—names still common in the co.

[6] This attack was made Nov. 11, 1757. The settlers were totally unprepared, and the greater part were massacred or captured. Fort Herkimer was burned. The French account states that a mill, 60 houses, and a large number of barns, were destroyed, 40 persons were killed, and 140 taken prisoners. These numbers were doubtless much overestimated. A small fort, called Fort Kouse, was garrisoned at this time, and afforded shelter for a portion of the inhabitants. On the 19th of April, 1758, the French and Indians made another attack upon the settlers and killed or destroyed their cattle.

[7] On the 16th and 17th of Sept. 177— another treaty was held here by Lieut. Francis Saltar and Valcart P. Bruyas, Commissioners for the Northern Department, to induce the Indians to go to Albany to hold a great council. The Oneidas and Tuscaroras soon after, but sullenly refused to take up the hatchet offered to detach them from the royal cause.

[8] In July, 1782, a party of 600 Indians and Tories attacked the settlement, and were discovered by Peter Wolever, who, with Andrew and Hess, lived about 2 miles E. on the flats. The families escaped to the fort, except Hess, who was killed at the picket gate. Valentine Starring was tortured within hearing of the fort, which was too full to attempt a rescue. *Hist. Herkimer co. p.* 106.

[9] There are now 7 churches in town: 2 Ref. Prot. D., Bap., Ev. Luth., M. W. Bap., Univ., and Union.

HERKIMER[1]—was formed from Kingsland District, March 7, 1788. A part of Palatine (Montgomery co.) was annexed in 1791. Norway and Schuyler were taken off in 1802. Newport in 1806, and a part of Little Falls in 1829. A part was annexed to Schuyler in 1843; restored in 1811. It lies on the N. bank of the Mohawk, near the center of the E. line of the co. A wide intervale extends along the river, and from it the surface rises to the N. line of the town. West Canada Creek flows S. through near the center, dividing the uplands into two distinct ridges. The Hasenclever Mts., W. of the creek, are 600 to 800 ft. above the river. The soil upon the hills is a gravelly loam, and in the valleys a deep, fertile alluvium. **Herkimer** (p. v.) upon the Mohawk, W. of the mouth of West Canada Creek, was incorporated April 6, 1807. It contains the co. buildings, 3 churches, a bank, newspaper office, paper mill,[2] and gristmill. Pop. 1,371. It is a station upon the N. Y. C. R. R. **Eatonville** (p. o.) is a hamlet, in the N. E. corner, on the line of Fairfield and Little Falls. The early history of the town is blended with that of German Flats, of which it formed a part until its organization as a town. The first settlements were made by Palatinates, under the patronage of Gov. Hunter, in 1722.[4] It had its share of suffering during the Revolution; and all the patriot families that remained during the war were those sheltered by Fort Dayton. This fortress stood upon a point of the stone ridge about 30 rods above the present site of the courthouse. After the destruction of Fort Schuyler by flood and fire, in May, 1781, Forts Dayton and Herkimer became the frontier defenses of the Mohawk Valley.[5] After the war, many of the Indians and tories who had been actively engaged in hostilities returned to the settlements; but they were received by the settlers in a way little calculated to inspire sentiments of friendship, and the greater part emigrated to more congenial places.[6] The first church (Ref. Prot. D.) was formed at an early period, by Rev. A. Rosegrantz; but the precise date has been lost.[7]

LITCHFIELD—was formed from German Flats, Feb. 5, 1796. A part of Winfield was taken off in 1816. It lies on the W. border of the co., S. of the Mohawk. Its surface is elevated and moderately hilly, its mean elevation being about 500 feet above the river. A series of ridges in the W. and S. are known as the "Dry Lots,"[9] no water being found upon them. The streams are small; some flow S. into the Unadilla and others N. into the Mohawk. In the E. part is a sulphur spring.[10] **Litchfield** (p. v.) contains 1 church and about 15 houses; **Cedar Lake** (p. o.) 1 church and 9 houses; **Jerusalem**, a hamlet near the center, 2 churches and 15 houses. The first settlement was commenced about 1789, by Jabez Snow, on Snow Hill.[11] The first religious services were held in 1794; Rev. —— Spaulding was the first preacher.[12]

LITTLE FALLS—was formed from Fairfield, Herkimer, and German Flats, Feb. 16, 1829. It lies in the interior of the co., S. of the center. Its surface is a broken upland, divided by the

deep, narrow gorge of the Mohawk. A range of hills extend N. and S. from the village. They are rocky and precipitous near the river, but less rugged on the N. and S. borders.[1] The Mohawk flows N. E. through near the center of the town in a series of cascades and rapids. Its banks are rocky and in places precipitous. The soil is a sandy, gravelly loam. **Little Falls,** (p. v.,) in the E. part, on the line of Manheim and Danube, was incorp. March 30, 1811. Its name was changed to "*Rockton*," April 16, 1850, and again changed to Little Falls, April 16, 1852. It is an important station on the N. Y. C. R. R. It contains 9 churches, a bank, 2 printing offices, the Little Falls Academy, a union school, and a large number of manufactories.[2] Pop. 3,984. **Jacksonburgh,** in the W., on the canal, has 206 inhabitants; and **Bethel,** in the S., 1 church and 15 houses. **Paines Hollow** is a P. O. Lots 12 and 13 of Burnetsfield Patent, embracing all the water-power N. of the river, were owned before the Revolution by —— Petrie. This town also embraces portions of several other patents issued at an early period.[3] The first settlements were made by a colony of Palatinates, in 1722.[4] The settlers suffered much during the war, and most of them were driven off.[5] The first settler at the village after the war was John Proteus, in 1790.[6] A great impulse was given to the business and population of the place by the construction of the locks of the Western Navigation Co. in 1796.[7] The first church was built about 1815. It was octagonal, with a steep roof, and surmounted by a cupola. The census reports 10 churches in town.[8]

MANHEIM[9]—was formed from Palatine, (Montgomery co.,) April 7, 1817. It lies on the N. bank of the Mohawk, upon the E. border of the co. Its surface gradually rises from the intervales along the Mohawk to the N. border, where it attains an elevation of 500 ft. above the river. East Canada Creek forms its E. boundary.[10] Cathatachua Creek flows S. through near the center, and Bennett Brook flows S. E. through the N. E. corner. Upon East Canada Creek, 1 mi. above its mouth, is a series of cascades, where the water descends 180 ft. in three-fourths of a mi. The soil is a gravelly loam upon the upland, and a fine, fertile alluvium in the valleys. **Brocketts Bridge,** (p. v.,) upon East Canada Creek, in the N. part, contains 2 churches, a large tannery,[11] gristmill, and 50 houses; and **Inghams Mills,** upon East Canada Creek, 3 mi. below Brocketts Bridge, a church and 25 houses. **East Creek** (p. o.) is a hamlet and station upon the N. Y. C. R. R., near the mouth of East Canada Creek. **Manheim Center** is a P. O. The first settlements were made by Germans, probably in about the year 1730.[12] During the Revolution they were frequently attacked by the Indians and were mostly destroyed. On the 30th of April, 1780, a party of 60 tories and Indians fell upon the settlements at Rheimen Snyder's Bush, burned a gristmill, and carried 19 persons away into captivity.[13] The first church, built in 1774 or '75, was burned during the war, and was rebuilt soon after. The census reports 5 churches; 2 M.E., 2 Union, and Ref. Prot. D.

[1] The rocks at Little Falls are chiefly hydrous thenard gneiss, overlaid in various localities on the S. side of the river. Fox Hill, S. of the village, is 181 ft. above the canal, and Rall Wall, N. of the village, is 300 ft. high. In the immediate vicinity of the village are quarries of limestone, from which lime is manufactured extensively. Small caves and pot-holes are numerous along the cliffs near the river. One of the latter is 25 feet in diameter and 50 feet deep. Caves through the mountains at this place were explored by Prof. Mather in the autumn of 1842. The rocks in the vicinity belong to the Trenton group. A part of the town is covered with Utica slate, and the rocks of the Hudson River and Clinton groups.

[2] Value of manufactures annually: 4 paper mills, turning out $1,000,000 worth of paper; 2 woolen factories, producing about $100,000 worth of goods annually; 2 cotton factories, the amount of sales not stated; 1 grist mill, producing 30,000 barrels of flour annually, worth $150,000; 3 flouring mills

NEWPORT[1] —was formed from Herkimer, Fairfield, Norway, and Schuyler, April 17, 1[illegible]. It lies on the w. border of the co., near the center. Its surface is broken by [illegible] which rise 400 to 500 ft. each side of the narrow intervals of West Canada Creek. The [illegible] flows s. E. through the town, near the center. White Creek flows s. through the E. part. The soil is a clayey loam, with some gravel on the hills. It is chiefly underlaid by limestone, which is quarried in some localities. **Newport,** (p. v.,) near the center, incorp. March 20, 18[illegible], contains 3 churches, 1 bank, a gristmill, cotton factory,[2] and 671 inhabitants. Settlement was commenced in 1791, by Christopher Hawkins, from R. I.;[3] Rev. David Haskell (Bapt.) held the first meeting in 1796.[4]

NORWAY[5] —was formed from Herkimer, April 10, 1792. Fairfield was taken off in 17[illegible], Russia, as "*Union*," and a part of Newport, in 1806, and Ohio in 1823. It lies in the interior of the co., N. of the Mohawk. Its surface is elevated and rolling. It is drained by several small streams, tributaries of West Canada Creek. The soil is sandy in the N. W., and loam and gravelly in the E. and S. Limestone is quarried in several places; and fossils have been found near White Creek. There is a sulphur spring 1 mi. N. of the village. **Norway,** (p. v.,) near the center, contains 3 churches, a cheese box factory, tannery, and 30 houses; **Graysville,**[6] (p. v.,) on the line of Ohio, contains an extensive tannery and 30 houses.[7] The first settlement was made by —— Whipple and Christopher Hawkins, from R. I., in 1786; but it was soon abandoned.[8] The first religious meetings were held by Rev. —— Robertson, in 1792.[9]

OHIO[10] —was formed from Norway, as "*West Brunswick*," April 11, 1823. Its name was changed May 3, 1836. A part of Wilmurt was taken off in 1836. It lies in the interior, on the N. border of the settlements. Its surface is moderately hilly, with an elevation of 700 to 900 ft. above the Mohawk. A range of high, steep hills extends through the N. part. It is drained by West Canada and Black Creeks and their tributaries. The soil is a sandy loam, with some clay. A large portion of the town is still a wilderness. **Graysville,** (p. v.,) on the line of Norway, contains 1 church, a tannery, and 30 houses. **Ohio City,** (Ohio p. o.,) in the W. part, contains 10 houses. A few scattering settlements were begun before the Revolution, but were broken up during the war.[11] Religious services were first held at Ohio City, in 1808.[12]

RUSSIA[13] —was formed from Norway, as "*Union*," April 7, 1806. Its name was changed April 6, 1808. A part of Wilmurt was taken off in 1836. It lies on the W. border of the co., N. of the Mohawk, its N. part extending into the border of the great northern wilderness. Its surface is rolling and moderately hilly, and on the W. descends abruptly to the valley of West Canada Creek. The hills are 800 to 1,000 ft. above the Mohawk. West Canada and Black Creeks flow W. through the N. W. part, the former forming a part of the W. boundary. On it are some extensive lumber works.[14] Trenton Falls, upon West Canada Creek, is on the W. border. The soil is sandy

[1] Named from Newport, R. I., the former residence of many of the early settlers.

[2] A cotton factory was built in 1808 by Benj. Bowen. The Herkimer Manufacturing Co. was incorporated with a capital of $50,000. In 1810 Wm. Kinyon [illegible] operated by [illegible] and power was applied to [illegible] cotton. [illegible] were manufactured.

[3] Among the early settlers were Benj. Bowen, John C. Graham, Wm. Cook, and Geo. Cook, all from R. I. Dr. Wm. Hall, Nathaniel Worcester, Isaac Case, Joseph Bromley, A. M. Daniels, Geo. Cook, and Wm. Whipple were also early settlers. The first bath was built of stone by Christopher Hawkins upon Anthony's Island, and was the first in the town. Wm. Worcester built a saw-mill in 1794, and Geo. Cook the first grist-mill. Benj. Bowen built the first saw-mill in 1793, and the second mill in 1794. The first frame dwelling was built by Wm. Whipple, and painted from the scraps of his carpenter.

[4] The census reports 7 churches in town; Bap., M. E., Cal. Meth., Presb., Epis., Univ., and R. C.

[5] Named from Norway in Europe. This town is included in the Military Tract, and was settled by soldiers of the Revolutionary war.

[6] Named from Gray, who settled the place.

[7] The Graysville Manufacturing Co. was established in 1851, with a capital of $[illegible]. They manufacture [illegible] per annum, employing [illegible] hands. The works are driven by a steam engine of [illegible] h. p.

[8] Joseph Potter and his son, Elisha Potter, came in with the first settlers, in 1788. Their wheat was destroyed previous to harvest, although the first winter was supported by potatoes and some salt. For meat they depended upon hunting. Thos. Morris settled in 1789. John Andrews and Stephen Case, Capt. Henderson, Geo. Case, John and David Case, N. Harmon, David Underhill, [illegible] Bronson, Ansell Underhill, and Philip Potter, Edward Henderson, Uri H. Cook, Henri Tillinghart, Abijah Tombling, and Westel Willoughby, were early settlers.

[9] The first bath was that of a child in Geo. Cook's family. The first death was that of the wife of Benj. Bowen. The first child born was Caroline Hawkins, in 1792. The first inn was kept by Thaddeus Scribner & Bro., the first store, in 1793; Capt. Hawkins built the first saw-mill in 1794, Geo. Cook the first grist-mill, the second was built by Wm. Worcester, and [illegible] Hawkins, in 1795.

E., a saw set factory, cheese box factory, gristmill, and 218 inhabitants; **Booth,** (p. o.,) on Black Creek, a church, grist and saw mill, tannery, and 10 houses. **Prospect** is a hamlet, and contains — sawmills. The first settlement was commenced in 1792, by Stoddard Squires, from Conn.[1] The first religious meetings (F. W. Bap.) were held by Rev. Benajah Corp.[2]

SALISBURY[3]—was formed from Palatine, (Montgomery co.,) March 3, 1797, and annexed from Montgomery co., April 7, 1817. It lies on the E. border of the co., and extends N. into the great wilderness. Only about one-fourth of its surface is cultivated. It is a broken and mountainous upland in the N. and hilly in the S. The principal streams are East Canada Creek, which forms a part of the E. boundary, and Spruce Creek, which flows through the S. W. and S. parts. The soil is a sandy and clayey loam. A bed of iron ore has been worked to some extent on Lot 105, Fourth allotment of the Royal Grant. **Salisbury Center,** (p. v.,) in the S. part, contains 2 churches, a tannery, and 319 inhabitants; **Salisbury Corners,** (Salisbury p. o.,) in the S. W., 2 churches and 30 houses; **Diamond Hill,** 25 houses; **Devereaux,** 15 houses. **Whitesburgh,** (p. o.,) on the line of Fulton co., is a hamlet. Settlement was begun before the Revolution, by tenants of Sir Wm. Johnson, who followed his lead during the war, and shared his fate at the hands of the Commissioners of Forfeiture.[4] The census reports 4 churches in town.[5]

SCHUYLER[6]—was formed from Herkimer, April 10, 1792. Trenton was taken off in 1797, Deerfield (Oneida co.) in 1798, and a part of Newport in 1806. A part was annexed from Herkimer in 1808, and re-annexed to Herkimer in 1811. It lies on the W. border of the co., N. of the Mohawk. Its surface is hilly. The Ha[illegible]clever Mts. extend through the center, attaining in this town an elevation of 1,000 to 1,200 ft. above tide. A wide intervale extends along the Mohawk, which forms the S. boundary. Its streams are tributaries of the Mohawk and generally flow through narrow ravines. The flats bordering the river are annually overflowed. The soil upon the hills is slaty and gravelly. **East Schuyler,** (p. v.,) in the S. E., contains 25 houses; and **West Schuyler,** (p. v.,) in the S. W., a church and 25 houses. Settlement was commenced previous to 1775, by several German families.[7] There was a good carriage road in 1757, on the bank of the river, from the crossing, where Utica now stands," to the Palatine village, German Flats. There are 2 churches in town; M. E. and Meth. Prot.

STARK[8]—was formed from Danube, March 18, 1828. It is the S. E. corner town of the co. Its surface is hilly and broken, with a mean elevation of 500 feet above the Mohawk. The principal streams are Otsquago and Nowadaga Creeks. Otsquago Creek flows through a narrow valley, bordered by steep banks 150 to 200 ft. high. The soil is generally a sandy loam in the valleys, and sandy and gravelly on the hills. **Starkville,** (p. v.,) in the N. E. part, contains 2 churches, a gristmill, and 190 inhabitants; **Van Hornesville,** (p. v.,) in the S. part, 1 church, a cotton factory, (not in operation,) a grist and saw mill, and 228 inhabitants. **Smiths Corners** is a

The first inn was kept by Joshua Cooper, [illegible] the first store by Smith Dunn, at Col. Bellows, in 1797. The first mill was built in 1797 and the second by Benj. Hinman, the same year. A cotton factory was built at Poland some years since.

2 The census reports 4 churches in town; M. E., Presb., Union and Luth.

3 Named from Salisbury, Conn., where many of the early settlers came. This town includes part of the Jerseyfield Patent, and parts of the first, second and fourth allotments of the Royal Grant. Several of the Indian chieftains of Sir Wm. Johnson had tracts of land here granted to them, part of the Royal Grant, viz.: Wolf, 1,000 acres; Bear, 1,000 acres; Squaw, 500; Sun, 200; Mary, 200; Gen. Tom, 200; Mrs. Montour, [illegible] —— and Elizabeth —— of these Indians the last three were converted Indians, according to the records. But no record of conviction existing against the others, acts were passed by the Legislature, Feb. 23, 1795, and March 29, 1798, authorizing John Robinson, George Pearson, and James Cochran, purchasers under the Commissioners of Forfeiture, to receive from the treasury the part of the purchase money which they had paid and convey back the lands.

4 John Deville and Cornelius Lamberson settled about 1778, near Burrills Corners; Asa Sheldon and Abijah Ford about 1793. Abial Pratt, Stephen Todd, Jabez Ayers, Jonathan Cole, —— Bidwell, Ira Bartholomew, Atwater Cook, Amos Ives, Moses De Witt, —— Low, Jonathan Hallet, and others, were early settlers. John Ford was the first child born: Elizabeth Rice taught the first school; Aaron Hackley kept the first inn and store, at Burrill's Corners.

5 2 M. E., Bap., and Union.

6 This town contains the whole of Kast's Patent and parts of Cosby's Manor and Bassett, Lyn's and Walton's Patents.

7 Among the early settlers were families named Kasts. Starrings, Widvig, Rymour, Lintz, and Brideubecker. Judge Henri Starring, who is said to have planted the [illegible] Yankee race, came to reside in this town. A store was kept on Cosby's Manor in 1766.

8 In 1757 M. De Bellestre with a body of French and Indians, traversed the [illegible] and burnt forty houses up and within the town. *Gen. Herkimer, p. 14.*

9 Named from Gen. John Stark, of the Revolution. Parts of Hall's, J. Hammond's, Vaughan's, McNeil's, Freeman's, C. Colden's, Livingston's, and Lansing's Patents are in this town. *Beauchamp's Herkimer, p. 65.*

hamlet. Small settlements were commenced before 1775, but were broken up during the Revolution.[3] The census reports 4 churches in town.[4]

WARREN[1]—was formed from German Flats, Feb. 5, 1796. Columbia was taken off in 1812. It lies centrally on the s. border of the co. Its surface is hilly, the highest points being 500 to 800 feet above the Mohawk. The principal stream is Fish Creek, which flows s., and is bordered by steep banks 100 to 200 ft. high. Mud Lake, in the E., and Weavers and Youngs Lakes, in the S., are small bodies of water. The soil is a sandy and clay loam. There are 2 small sulphur springs in town. **Jordanville** (p. v.) contains 2 churches and [illegible] inhabitants; **Warrens Corners** (p. v.) a gristmill, sawmill, and 82 inhabitants; **Little Lakes**,[2] [illegible] in the s. part, 1 church and 117 inhabitants. **Crains Corners** is a hamlet. Some settlements were commenced before the Revolution, by Germans from the Upper Valley.[5] Elder Phineas Holcomb was the first settled minister in town, about 1793.[6]

WILMURT[7]—was formed from Russia and [illegible] (now Otsego Co.), May 5, 1843. This is the largest town in the State, and is one of the least populous. It includes the whole N. part of the co., extending nearly 50 mi. in length, by about 16 mi. in breadth, entirely within the wild primeval forests of Northern New York. Its surface is rocky and mountainous, and the greater part is unfit for cultivation. In the deep valleys among the mountains are numerous beautiful, picturesque lakes, forming one of the finest features of the landscape.[8] The soil is a sandy loam. The hills are usually covered with a thin growth of forest trees; but in the valleys only is found soil fit for profitable pasturage. The settlements are confined to the s. part. There is no p. o., village, store, church, or gristmill in town. The lumber cut in this region is mostly floated down West Canada Creek, and manufactured at Prospect in the town of Russia. An attempt was made to settle the town in 1790, by Arthur Noble, the patentee, and a sawmill was built at that time; but the project failed. It was again tried in 1793, with no better success. Toward the close of the last century, John Brown, a wealthy capitalist of Providence, R. I., who owned a large tract in this town, made an attempt at settlement; but his project failed. In 1812 his son-in-law, Chas. T. Harrisoff, made another attempt to settle upon this tract. He built a forge and sawmill, and cleared 2,000 acres; but, the outlay bringing no return, and his supply of money from the E. being cut off, the project was abandoned, and the colonists returned to their respective homes.[9]

WINFIELD[10]—was formed from Litchfield, Richfield, (Otsego Co.), and Plainfield, (Otsego Co.,) April 17, 1816. The bounds of the co. were enlarged upon the formation of this town. It is the S. W. corner town of the co. Its surface is moderately hilly, and forms the dividing upland between the Mohawk and Unadilla Valleys, the general elevation being about 500 feet above the Mohawk. A range of hills in the S. E. rises about 200 ft. higher. The E. branch of the Unadilla flows S. through a deep valley in the W. part. Browns Hollow Creek, a branch of the Mohawk, rises on the N. border. Near East Winfield is a sulphur spring; and several limestone quarries are found in different parts of the town. **East Winfield** (Winfield p. o.) contains 30 [illegible]; **West Winfield** (p. v.) 2 churches, the West Winfield Academy, a bank, 2 grist mills, 2 saw-

Josiah Harwood taught the first school in 1794; Charles Evans kept the first inn, in 1794; John Dillingham the first store in 1796. Joseph Walker built the first saw and grist mill soon after the settlement. Benj Harrison built the first clothing works at West Winfield, about 1800.

JEFFERSON COUNTY.

This county was formed from Oneida, March 2, 1805, and named in honor of Thomas Jefferson. Its territory was changed by setting off a portion of it to Lewis co. in 1806, and by annexing a portion of Lewis co. to Watertown in 1814. It lies in the angle formed by the St. Lawrence River and Lake Ontario, is distant 145 mi. from Albany, and contains 1808 sq. mi. The s. w. part is marshy, but at a short distance from the lake it rises in gentle undulations, and, farther inland, by abrupt terraces, to the highest point, in the town of Worth. A plateau, about 1000 feet above the lake, spreads out from the summit, and extends into Oswego and Lewis cos. An ancient lake beach, 390 feet above the present level of the lake, may be traced through Ellisburgh, Adams, Watertown, and Rutland. North of the Black River the surface is generally flat or slightly undulating: in the extreme N. E. corner it is broken by low ridges parallel to the St. Lawrence. With the exception of a few isolated hills, no part of this region is as high as the ancient lake ridge mentioned above.[1]

The rocks of the co. belong to the primary formation and the lower strata of the N. Y. system. Gneiss is the underlying rock of the E. border in Wilna and Antwerp, of the Thousand Islands and the shore at Alexandria Bay, and of two strips of land extending from the E. border, one toward Theresa Falls, and the other toward Evans Mills. Next above this is a thick deposit of Potsdam sandstone, extending through Wilna, Antwerp, Philadelphia, Theresa, Alexandria, Orleans, and Clayton, the margin of which may be traced along its entire extent by a low mural precipice. The soil upon this rock is thin, and principally derived from drift deposits. The rock itself is almost indestructible, and preserves diluvial scratches and marks with great distinctness. Above this is a thin deposit of calciferous sandstone, extending through parts of Cape Vincent, Lyme, Clayton, Orleans, and Le Ray. The soil upon this rock is deeper than that upon the Potsdam sandstone, and is derived principally from disintegration. The Black River limestone overlies this, and forms the surface rock in most of the remaining parts of the co. N. of the river, and in a part of Champion and Rutland, S. Above this is the Trenton limestone, appearing on the lake shore at Cape Vincent and extending in a S. E. direction through Lyme, Brownsville, Watertown, Rutland, and Champion. This rock is of great thickness, and at times the principal declivities of the plateau in the S. part of the co. About midway in this strata is found the ancient lake ridge before noticed. The caves near Watertown are in the lower strata of this rock. Next above come the Utica slate and Lorraine shales, forming the summit of the irregular table land which covers the S. "peak" of Champion, the S. border of Rutland, the greater part of Redman, a corner of Adams, the E. part of Ellisburgh, and the whole of Lorraine and Worth. These shales are easily decomposed, and produce a deep, rich soil. Along the streams that flow from this formation the water has worn deep and often highly picturesque ravines, sometimes miles in length, and almost through the soft and yielding strata. The rounded outlines of the slate hills, the abrupt terraces of the limestone, and the sharp, wall-like precipices of the sandstone, all add characteristic features to the country underlaid by these several formations. Alluvial deposits uniformly occur where the streams from the slate flow out upon the limestone; and drift deposits are scattered promiscuously over the whole co. The most remarkable of these is the "Pine Plains," a sand barren several miles in extent in Wilna and Le Ray. The lake shore in Ellisburgh consists of drifting sand, behind which are marshes. From Stony Point to Cape Vincent the shore is bordered by the level edges of the Trenton limestone; the latter below the river it presents that alternation of rounded ridges of rocks, intervals, and gravelly [illegible] to the primary formation. The highest point in Worth is about 1200 feet above the lake. The streams are Black,[2] Indian, and Perch Rivers, the two Sandy Creeks,[3] Stony Creek, Kent, French, Pleasant, and Black Creeks, and their tributaries. Hungry Bay,[4] Henderson,

Black River, and Chaumont Bays) has a coast line of great length; and the Thousand Islands present many attractions from their romantic scenery and historical associations. Several small lakes, filling deep gorges, in Antwerp, Theresa and Alexandria,—one in Rutland, two in Henderson, Perch Lake in Pamelia and Orleans, and Pleasant Lake in Champion, constitute the other waters of the co. Iron ore abounds in Antwerp. Traces of lead and copper are found in the primary region; limestone, capable of a great variety of uses, water limestone and barytes are also abundant. The Black River enters the co. at Carthage, where commence a series of cascades and rapids which continue almost to the lake, with a total fall of 480 feet. Indian River affords water power at half a dozen places, and most of the streams s. of Black River are available for the same purpose.

The flat country along the St. Lawrence at times is affected by drouth, which is never felt on the uplands; while the latter are somewhat noted for the great depth of their snows. The mirage has been frequently seen on the lake, bringing into view places beyond the horizon. One form of this refraction, in which a line of clear sky appears along the shore, is almost a constant attendant upon clear, pleasant days in summer. Waterspouts, attended with dark clouds and a roaring noise, have been seen upon the lake and its bays. In the primary regions the intervales are remarkably fertile, while the ridges are often naked rock. The soil over a part of the sandstone is too thin for cultivation, but the barren region is comparatively limited. The limestone and slate districts are exceedingly fertile, and particularly adapted to dairying and the raising of spring grains. Of these, barley, within a few years, has become the most important. Winter wheat is raised less than formerly: oats, corn, rye, and peas are staple products. For many years manufactures have received much attention and employed a large amount of capital. They consist of iron from the ore, castings, machinery, cotton and woolen fabrics, paper, leather, and flour, and have been chiefly carried on along the line of the Black River, and in Antwerp, Theresa, Philadelphia, Adams, and Ellisburgh. Rafting, shipbuilding, and lake commerce form prominent pursuits at several points along the St. Lawrence.

Upon the erection of the co., in 1805, Watertown was selected for the co. seat.[1] A combined courthouse and jail was erected in 1807 and burned in 1821. Soon after, separate buildings, of stone, were erected, which are still in use. In 1816 a fireproof clerk's office was built, and occupied until 1831, when the present one was erected. The jail having become unfit for use, and having been officially complained of, a writ was issued, Dec. 1, 1848, by the Supreme Court, ordering its immediate improvement.[2] This led to the erection of an additional building, with excellent arrangements for both the security and convenience of prisoners. The first poorhouse was erected on the Dudley Farm, in Le Ray, about 5 mi. N. of Watertown, in 1825; and it was used until 1833, when the present spacious buildings were erected in Pamelia, 1 mi. below Watertown. In 1852 a special act was passed for the supervision of the poor in this co.

The first newspaper in the co., called the "*American Eagle*," was established at Watertown, in 1814, by Henry Coffeen. Its name was soon after changed to the "*American Advocate*."[3]

This co. is all embraced in the Macomb purchase of 1791, except the islands in the lake and river, a small reservation at Tibbetts Point near Cape Vincent, and a tract 10 rd. square, with one corner extending to the St. Lawrence at French Creek, reserved by the Oneida Indians in the treaty of 1788 for Peter Penet, and called "Penets Square." That part N. of a line connecting L. Ft. Chaumont Bay, in the line of the s. bounds of Diana, was known as Great Tract No. IV., and was sold to the "Antwerp Company," of Holland. Gouverneur Morris became the first agent, and afterward Jas. D. Le Ray de Chaumont became extensively interested in the title, and under him much of it was settled. The land between No. IV. and Black River (23,000 acres) was purchased by Peter Chassanis, of Paris, for a company of capitalists; a considerable portion of the organization was formed, and settlement began at its southern point, near the High Falls, in Lewis co. A few years after, the emigrants returned to France. Ellisburgh was mostly purchased by Marvel Ellis, of Troy, in March, 1797, but it afterward reverted to Constable. A tract known as the "Eleven Towns" was purchased in 1795 by Nicholas Low, Wm. Henderson, Richard Harrison, and Josiah Ogden Hoffman; it was divided by them and sold by their agents. Penets Square was mostly settled by squatters, with whom the owners afterward had much difficulty. With the exception of Carlton Island, the first settlement in the co. was made in Ellisburgh, in 1797, and within 10 years nearly the whole of this town and of the "Eleven Towns" was taken up by actual settlers. Settlement commenced under Le Ray in Wilna, Antwerp, Le Ray, and Philadelphia, about 1806, and in the N. part of the co., along the St. Lawrence, after the war of 1812-15. But a small part is now owned by the original purchasers or their heirs, much the greater portion having long been owned in fee by actual settlers.[2]

The embargo and non-intercourse laws were quite unpopular along the N. frontier, and met with open hostility or secret evasion in many cases. The declaration of war filled the co. with alarm, and some families hastily prepared to leave. Ft. Carlton,[3] within the American boundary, had been held until this time by the British, and was immediately captured by a small volunteer party and the buildings burned. A regiment of drafted militia, under Col. C. P. Bellinger, was stationed at Sackets Harbor in May. A fleet of 5 sail of the enemy was repulsed from that place July 19, with loss. On the 30th Capt. Forsyth was stationed there with a fine company

[3] On Carlton or Buck Island. It was built by the French, and during the scalping parties of both

of riflemen, and, Sept. 20, made a descent upon Gananoqui, Canada, and destroyed a large quantity of provisions. The details of the operations upon the N. frontier belong to general history. Sackets Harbor became the principal seat of military and naval preparations, and from this post were fitted out the armaments that captured Little York and Ft. George, and the disgraceful expedition, under Gen. Wilkinson, that descended the St. Lawrence late in the fall of 1813.[1] Large bodies of troops were stationed here during most of the war; and a fleet of frigates of the largest class was fitted out at this point, to cope with one, equally formidable, built at Kingston. The enemy were repulsed in an attack upon Sackets Harbor, May 29, 1813, and were subsequently defeated at Cranberry Creek and Sandy Creek and in several minor engagements. After the war the costly navy was left to rot, or was sold for commercial purposes; and, in accordance with the provisions of the convention of April, 1817, but one armed vessel was left afloat upon the lake. Extensive barracks were built in 1816–19 at Sackets Harbor. A considerable body of regular troops was stationed here until withdrawn for service in the Indian wars of the Northwest and of Florida. In the abortive scheme known as the "Patriot War," in 1837–40, this co. became the scene of intense excitement, and the seat of many grave as well as ludicrous events. "Hunter Lodges" were formed in every village to promote the Patriot cause, and large sums raised for the same purpose found their way into the pockets of the leaders, most of whom evinced a cowardice as little creditable to their honor as was their financial management to their honesty.

The earliest market of this co. was down the St. Lawrence, which has ever been the route of the lumber trade. Several State roads were built through the co. before the war, and a military road was laid out and partly worked from Sackets Harbor to Plattsburgh. Soon after the introduction of canals and railroads many projects of internal improvement were formed, and surveys were made in this co., without result. The Watertown and Rome R. R. extends from Cape Vincent S. through Lyme, Brownville, Pamelia, Watertown, Adams, and Ellisburgh, connecting with the N. Y. Central at Rome. The Sackets Harbor and Ellisburgh R. R., a branch of the preceding, extends from Sackets Harbor through Henderson to Pierrepont Manor. The Potsdam and Watertown R. R. extends N. E. from Watertown through Pamelia, Le Ray, Philadelphia, and Antwerp, forming a connection with the Ogdensburgh R. R. in Potsdam. In 1848–51 about 170 mi. of plank road were built within the co., by over 20 companies; but most of the lines have been surrendered to the towns in which the roads were laid. Steam navigation commenced upon Lake Ontario in 1816, and commodious lines have since been run, touching at Sackets Harbor, Cape Vincent, Clayton, and Alexandria Bay, within this co.

ADAMS[1]—was formed from Mexico, April 1, 1802, and named in honor of John Adams, Ex-President. Redman was taken off in 1804. It is an interior town, lying [illegible]. Its surface is rolling, and generally inclined toward the lake, and, with the exception of the E. border, is underlaid by Trenton limestone. Several remarkable [illegible] along its N. and W. borders, and a bold terrace extends into Watertown and Rutland. It is well watered by the N. Sandy and Stony Creeks. The soil is a clayey loam, with occasional sand and gravel, especially along the ancient lake ridge, which may be traced through this town. It is very productive, and equally adapted to dairying and the cultivation of grains. Manufactures are carried on to some extent. **Adams,** (p. v., situated on North Sandy Creek and the W. & R. R. R.) contains 4 churches, a bank, a seminary, printing office, and several small [illegible]. Pop. The town was mostly settled under the [illegible], agent of Nicholas Low, the proprietor.[2] The first sermon was preached in 1802, by Rev. Mr. Woodward, a missionary.[3] A private academy—now called the Philadelphian Institute—has existed at Adams Village for many years. The remains of several ancient fortifications [illegible].

ALEXANDRIA—was formed from Brownville and Le Ray, April 3, 1821, and named from Alexander Le Ray, a son of the proprietor. Theresa was taken off in 1841. It lies on the St. Lawrence, in the N. extremity of the co., and embraces the E. part of Wells Island and a considerable portion of the Thousand Islands. The surface underlaid by gneiss is rough and rocky, but that portion underlaid by sandstone is level, with a thin, clayey and sandy soil. A vein of lead has been discovered near Redwood, and examined to the depth of 40 feet. **Alexandria Bay** (Alexandria p. o.) contains 24 houses. **Plessis**[4] (p. v.) 52, and **Redwood** (p. v.) 62 inhabitants. Settlement commenced in 1811, under Le Ray. An engagement took place within the limits of this town during the war of 1812.[5] An elegant Ref. Prot. D. church was erected at Alexandria Bay in 1848–51.[6]

ANTWERP—was formed from Le Ray, April 5, 1810, and named from the Antwerp Company.[7] It is the extreme E. town in the co. The N. and E. portions are broken by low rocky ridges parallel to the river. The S. W. part is more level. The soil in the valleys is a clayey loam, and is very fertile.[8] The ridges are made up of masses of gneiss,[9] white crystalline limestone,[10] and sandstone.[11] Between the gneiss and sandstone in this town are several of the richest iron mines in the State. The "Sterling Mine"[12] lies about 3 mi. N. of Antwerp Village; another, of less extent, 1 mi. N.; a third, known as the "Keene Mine,"[13] on the borders of St. Lawrence co.; and a fourth, known as the "Parish Mine,"[14] immediately adjacent. In this same range are found the mines of Rossie and Gouverneur, which have furnished most of the ore used at the furnaces in this region. Bog iron ore is found near Ox Bow.[15] One or two sulphur springs are found in town. **Antwerp,** (p. v.,) on the P. and W. R. R., was incorp. July, 1865. It contains

Pop. 240. **Sterlingburgh,**[3] 1 mi. above Antwerp, and **Sprague Corners,** on the line of St. Lawrence co., are hamlets. The first improvements were made in 1803, at the Ox Bow, under the direction of Lewis R. Morris, the original proprietor.[4] In 1808, Morris sold 29,033 acres to George and David Parish, under whose agents the greater part of the settlements were made. A party of militia was stationed here in 1808, to enforce the embargo, and a blockhouse was built at the village in 1812. The first church was built, in 1816, by Parish.[5]

BROWNVILLE—was formed from Leyden, April 1, 1802, and was named from Gen. Jacob Brown, its founder. Le Ray was taken off in 1806; Lyme, in 1818; Pamelia, in 1849; and Orleans, and a part of Alexandria, in 1821. It is situated on the N. side of Black River and Black River Bay. Its surface is level or gently undulating. The soil is a sandy and clayey loam. Sulphate of barytes is found on Pillar Point, and the vein has been worked to some extent for lithic paint. Upon the W. bank of Perch River, a few rods below Limerick, is a cave extending 150 yards into the bank and 30 feet below the surface. Manufactures receive considerable attention. **Brownville,** (p. v.) on Black River, 4 mi. below Watertown, was incorp. April 5, 1828. It has a valuable water power, and contains 3 churches, a cotton factory, and several foundries and machine shops. Pop. 621. **Dexter**[6] (p. v.) is situated at the head of navigation on Black River. It is the seat of an extensive woolen factory built in 1836.[7] Pop. 429. **Limerick** (p. o.) and **Moffatville,** (Perch River p. o.) contain a dozen houses each. **Pillar Point** (p. o.) is situated across the bay from Sackets Harbor. Pop. 50. Gen. Jacob Brown began the settlement of the town in 1799, as proprietor and agent.[8] During the war Brownville village became the seat of a hospital; and on different occasions large bodies of troops were posted in the vicinity. For several years it was the residence and headquarters of Maj. Gen. Brown, commander in chief of the N. department, and afterward of Col. Edward Kirby,[9] his son-in-law. There are 10 churches in town.[10]

CAPE VINCENT—was formed from Lyme, April 10, 1849, and named from Vincent Le Ray, son of the proprietor. It is the N. W. corner town of the co., and embraces Carleton, Grenadier, and Fox Islands in the St. Lawrence. The surface is level, or slightly undulating, and the soil is a clayey loam. Kent Creek is the principal stream. There are 2 or 3 sulphur springs in town. Considerable attention is paid to ship building. **Cape Vincent,**[11] (p. v.) the terminus of the W. and R. R. R., near the head of the St. Lawrence River, is a thriving commercial village. Pop. 1026. **Saint Lawrence** and **Millens Bay** are p. offices and hamlets. The first settlement in the town and co. was made upon Carlton Island,[12] at about the time of the Revolution. A regular fortification, known as "Fort Carlton,"[13] was erected upon the island, and a tract of 30 acres was cleared and cultivated, and long known as the "*Kings Garden*." The first settlement upon the mainland was commenced in 1801 at Port Putnam, 2 mi. below Cape Vincent, by Capt. Abijah Putnam.[14] Count Real, Chief of Police under Napoleon, and other French families of note, resided in this town for some time. A custom house was established in 1819. Upon the shores of Grenadier Island,[15]

[2] This name is derived from a former old bend in the Oswegatchie River, upon which the village is situated. The village was settled by Scotch emigrants.

[3] Sterlingburgh, 1 mi. above Antwerp Village, is the seat of an iron furnace built by Jas. Sterling in 1846. A forge was built here by Duvel Parish in 1817.

[4] The first settler was Wm. Lee. Mills were built at Antwerp Village in 1806-07, by Morris, by John Jermain. The first school was taught in the Eckler Settlement, by Betsy Cook.

[5] This church was the second in the co., and for many years was used by all the denominations in town. It is now in possession of the R. C. There are in town 8 churches, 2 Bap., M. E., Wes. Meth., Presb., Asso. Ref. Presb., R. C., Union.

[6] Named from S. Newton Dexter, of Whitehall, one of the proprietors. It was formerly known as "*Ox's Corners*." During the war the mills at this place furnished lumber for the public works at Sackets Harbor. The steamer "Brownville," built in 1827, and designed to run between this place and the Lake ports, was burned upon her first trip. The Black River Nav. Co., incorp. in 1826, built locks here, which were little used. Piers for the improvement of navigation were built at the mouth of the river by the Gen. Government; but they have resulted in a nuisance.

[7] The factory is of stone and cost $140,000. It is fitted for 10 sets of machinery, and employs 75 hands.

[8] In 1800 Gen. Brown built a sawmill, and in 1801 a small grist mill, at the mouth of Philomel Creek. A bridge was built in 1802, and a dam across the river in 1806. In 1828, Henry Evans was hung near Watertown for murder committed in this town, the only execution by civil authority that ever took place in the co.

[11] Called "*Connolly's Point*" by many of the old inhabitants. It was first settled in 1809, laid out as a village in 1817, and incorp. in 1855. A light-house was built at Tibbets Point, 2 mi. distant, in 1826. The U. S. company have built here a wharf 2000 feet long, 2 monster freight houses, a grain elevator, &c. The Ontario Line of Steamers touch at this point, and ferry boats run regularly to Kingston. A few years since, a canal was sunk across Wolf or Grant Island, to afford a more direct route to the ferry. This place received several visits from the enemy during the war.

[12] This island contains 1,274 acres. A military class right see page 40 of 400 acres was located here in 1796. For several years after 1822 it was a thriving lumber station, where rafts were made up for the Quebec market.

CHAMPION[3]—was formed from Mexico, March 14, 1809. A part of Harrisburgh was taken off in 1853. It is the central town on the S. E. border of the co. The surface is broken and hilly. The most elevated portions are the slate hills in the S. angle, known as the "Peak," which are about 1700 feet above tide. From their summits the land descends in a series of broken and irregular terraces to the river. The N. part is more level. The soil is generally a clay loam, but near the river in some places it is sandy. **Champion** (p.v.) contains 20 houses. **Great Bend** (p.v.) and **West Carthage**[4] about 50 each. **Champion South Roads** (p.o.). The first settlement was begun in 1798, by Noadiah Hubbard, as agent for Storrs. The first settlers came by water down the river as far as the Long Falls, and the town was settled with great rapidity.[5] The first church (Cong.) was formed in 1805.[6]

CLAYTON—was formed from Orleans and Lyme, April 27, 1833, and named in honor of John M. Clayton, U. S. Senator from Del. It is centrally situated on the N. W. border of the co. It embraces two-fifths of Penets Square, a gore W. and another N. of that tract, and Grindstone and several smaller islands in the St. Lawrence. The surface is level, or slightly rolling. Water lime has been manufactured in considerable quantities. **Clayton,**[7] (p.v.) situated at the mouth of French Creek,[8] is largely engaged in the lumber trade and in ship building.[9] Pop. 856. **Depauville**[10] (p.v.) is situated at the head of navigation on Claumont (Sharmon River, or Catfish Creek,) 6 mi. from the bay. Pop. 386. **Clayton Center** is a p. o. Settlement commenced in 1803, but progressed slowly until after the war. For many years the titles to the portions included in Penets Square and the islands became the subject of much controversy and litigation. In early times the shores of the St. Lawrence in this and adjoining towns became the scene of many lawless adventures in the prosecution of smuggling.[11] In 1813, the enemy attacked the advanced guard of Wilkinson's expedition, commanded by Gen. Brown, at Bartlets Point, but were repulsed. The census reports 7 churches in town.[12]

ELLISBURGH[13]—was formed from Mexico, Feb. 22, 1803. Henderson was set off in 1806. It is situated in the S. W. corner of the co., upon the shore of Lake Ontario. The surface is rolling and inclined toward the lake. A range of low sand hills extend along the shore, and these are succeeded by a wide marshy region, producing wild grasses that in dry seasons may be mown. North and South Sandy Creeks are the principal streams. The soil is sandy on the W., clayey through the center, and a slaty loam in the E. There is a sulphur spring in town. This is the wealthiest agricultural town in the co., and is surpassed by but few in the State. **Ellis Village.**[14] (Ellisburgh p. o.) situated on S. Sandy Creek, 4 mi. from its mouth, has a limited amount of manufactures. Pop. 250. **Belleville,**[15] (p.v.) is situated on N. Sandy Creek, 3 mi. from Ellis Village, and on the S. H. & E. R. R. Pop. 363. The Union Literary Society (academy) is located here. **Pierrepont Manor,**[16] (p.v.) at the junction of the W. & R. and S. H. & E. R. R., contains 255 inhabitants. **Woodville,**[17] (p.v.) is situated on N. Sandy Creek. Pop. 180. **Mannsville,**[18] (p.v.) on Skinners Creek and the W. & R. R. R., has a population

of 315. **Rural Hill**[1] (p. o.) and **Wardwell** (p. o.) are hamlets. Lyman Ellis and a large number of others made the first settlement, in 1797.[2] A tract of 3000 acres in the s. w. corner of the town was sold by Wm. Constable, in 1796, to Brown and Eddy, and was settled by squatters. Upon the advent of the first settlers, near Ellis Village, on Sandy Creek, were found numerous traces of an early occupation by civilized races.[3] During the war an engagement took place near the mouth of S. Sandy Creek, between a party of 150 American regulars and a few militia and Indians, under Maj. Appling, and a party of 200 British, who were pursuing a flotilla of boats, commanded by Lieut. Woolsey, laden with stores for Sackets Harbor. The British were defeated, and nearly the whole party were killed or taken prisoners.[4] The census reports 11 churches in town.[5]

HENDERSON[6]—was formed from Ellisburgh, Feb. 17, 1806. It lies on Lake Ontario, s. w. of the center of the co. The surface is rolling; and it is deeply indented with Henderson Bay, formed by a long rocky point known as Six-Town Point.[7] There are in town two small lakes and several marshes. Stony and Little Stony Creeks are the principal streams. The soil is clay and loam. **Henderson**[8] (p. v.) is situated near the center, on Stony Creek. Pop. 404. **Henderson Harbor**[9] contains 12 houses; and **Smithville**[10] (p. o.) 40. **Roberts Corners** (p. o.) is a hamlet. Settlement was begun in 1802, under Asher Miller, agent for the proprietor.[11] At the head of Henderson Bay is a curved embankment or bar of stone, 100 rods long, and a little above the water, known as "Indian Wharf;" and from this point to Stony Creek there was an Indian trail or portage. The census reports 5 churches in town.[12]

HOUNSFIELD[13]—was formed from Watertown, Feb. 17, 1806. It is situated on Black River Bay, on the w. border of the co. Its surface is very level, and the soil is a clayey and sandy loam. Ship building and manufactures have received considerable attention. **Sackets Harbor**[14] (p. v.) is the principal village. Pop. 994. This was the principal military and naval station on the northern frontier during the last war with Great Britain, and millions of dollars were spent in fortifications and in building vessels. **East Hounsfield** (p. o.) and **Stowells Corners** (p. o.) are hamlets. Amasa Fox was the first settler. In 1802 there were 30 families in town.[15] In 1805 several English families came in.[16] During the war this town was the center of important military events. Several expeditions were here fitted out against Canada: and, in turn, the town was invaded on several occasions.[17] Large bodies of troops were frequently quartered here, and the citizens became familiar with the lights and shades of military life.[18] After the war most of the troops were withdrawn, leaving only enough to keep the

1 Formerly called "*Buck Hill*."

2 Among the first settlers were Caleb Ellis, Robert Fulton, Elijah Richardson, Hez. Pierce, Chauncey Smith, Wm. Root, Val. Salisbury, Isaac Waddle, and Abram Wilcox. The early settlers suffered much from sickness. The first child born was Ontario Pierce, and the first death, that of Caleb Ellis. Lyman Ellis built the first sawmill in 1797, and the first grist mill, in 1803.

3 It is probable that the French expedition, under De La Barre, against the Onondagas in 1684, met with their terrible disasters from famine and sickness within the limits of this town.

4 The stores were taken by land from this point to the "Harbor." Among them was a cable weighing 2400 lbs., which was too heavy for loading upon any wagon that could be obtained. It was accordingly placed on the shoulders of 250 men and carried to its place of destination. As the bearers approached the Harbor, the sailors met them with loud cheers, relieved them of their burden, and marched triumphantly into the village.

6 Named for the "Eleven Towns." Named from Wm. Henderson, the proprietor. It embraces the adjacent islands in the lake.

7 Upon this point are the remains of a small 4-sided fortification, evidently built during the French or Revolutionary War.

8 Formerly called "*Salisbury Mills*," from Lodowyk Salisbury, an early merchant and mill owner.

9 The bay upon which this place is situated was called the "*Bay of Naples*" by Henderson, the proprietor.

10 Named from Jesse Smith, who from a common laborer, became one of the most extensive lumber dealers in the county, and a man of influence.

11 Among the first settlers were Anthony Sprague, Levi Scofield, Jedediah M. Cooley, Samuel Hubbard, Moses Barrett, Wm. Petty and Daniel Spencer. Willis Fell was kept the first inn and built the first sawmill and grist mills. The first child born was Betsy Scofield, and the first death, that of a child of Hosea Heath. Elisha Stone taught the first school. A wood-turning factory was erected in 1814. A Scotch settlement was made in 1805-07, on the bay. A lighthouse was erected on Stony Point in 1837.

12 5 M. E., Ev. Luth., Univ., and Union.

13 The town embraces No. 1, or "Hessé," of the "Eleven Towns," and was named from Ezra Hounsfield, one of the early proprietors. In the division it fell to the share of Harrison and Hoffman; and by them the w. half was sold to Champion and Storrs, and the remainder to Peter Kemble and E. Hounsfield. It was called "*Newport*" in early documents. Gull, Snake, Great and Little Galloo, and Stony Islands belong to this town. Upon Galloo Island a lighthouse was erected in 1820.

14 Named from Augustus Sacket, the first settler. Called by the Indians Ga-hú-a-go-je-twa-da-á-lote, fort at the mouth of Great River. Incorp. April 15, 1814. A collection district was formed in 1805. Madison Barracks, built in 1816-19 at a cost of $80,000, are the principal military works. Upon a point in the harbor is the hull of the frigate New Orleans, sheltered by a house built over it. It was commenced during the war, but has never been finished. It measured 3200 tons, and was pierced for 110 guns. The frigate Chippewa, of like dimensions, built further up the bay, has been taken down.

15 Among these were John and Wm. Evans, Squire Reed, Amasa H. Elliot, and Charles Baird.

16 Among these were Saml. Luff, his sons Edmund, Saml., Jr., Joseph, and Jesse, David Merritt, William Ashby, John Roots, Henry Metcalf, and Geo. Slowman. Dr. Wm. Baker, who settled in 1805, was the first physician; Ambrose Pease and Step. Simmons were early innkeepers, and Loren Buss and Hezekiah Doolittle, early merchants. In 1808 Samuel F. Hooker brought in a stock of goods worth $20,000. Meetings were first held by Edmund Luff, who built a church, and preached many years without fee or reward. Elisha Camp settled in 1804, as a lawyer and a saint, and has since been more prominently concerned in the affairs of the town than any other person. Samuel Luff built the first grist mill, Augustus Sacket, the first sawmill, and Solon Stone, the first cotton factory, on Mill Creek. The first child born in town was Wealthy Robison. At an early period, John Jacob Astor and other capitalists invested large sums here in the manufacture of potash, that article commanding $200 to $300 per ton in the Montreal market.

17 See page 364.

18 About a dozen military executions took place here during the war. A duel was fought with muskets, June 14, 1818, between two soldiers, one of whom was killed. During the command of Col. Brady at this station, the remains of Gens. Zebulon M. Pike and Leonard Covington, Col. John Tuttle, Lieut.

works in repair. In 1872 a canal, for hydraulic purposes, was completed from Huntington Mills, above Watertown, to Sackets Harbor; but in about 10 years it was abandoned. [illegible] Guthrie, one of the discoverers of chloroform, and inventor of the percussion compound for firearms, which has superseded flints, resided at Sackets Harbor. A Union school was established in the village in 1840. There are 5 churches in town.[2]

LE RAY—was formed from Brownville, Feb. 17, 1806. Antwerp was taken off in 1810; a part of Wilna in 1813, and a part of Philadelphia and Alexandria in 1821. It is an interior town E. of the center of the co. The surface is level, or gently rolling, and the soil is principally a clayey loam. A strip of barren sand, once covered with pine, but now almost a desert, extends along Black River. The streams are Black and Indian Rivers, Pleasant Creek, and several small brooks. **Le Raysville**[1] (p. v.) contains 22 houses. **Evans Mills** (p. v.) is situated on Pleasant Creek and the P. & W. R. R. Pop. 410. **Sandfords Corners**, (p. v.) on the P. & W. R. R., contains a dozen houses. **Black River**,[6] a village of 50 houses, is partly in this town. The first settlement was made in 1802, by a party under Benj. Brown, agent for Le Ray.[7] Le Ray removed to this place in 1808, and began a liberal system of settlement, by opening roads and building bridges and mills. The census reports 6 churches.[8]

LORRAINE[9]—was formed from Mexico, March 24, 1804, as "*Malta*." Its name was changed April 6, 1808. Worth was taken off in 1848. It is the central town on the S. border of the co. The town is elevated, and is underlaid by slate and traversed by immense gulfs. The surface is rolling, and the soil is a clay and loam. It is mostly drained by Sandy and Skinners Creeks. **Lorraine**, (p. v.,) the only village, contains about 30 houses. Settlement was begun in 1802, by James McKee and Elijah Fox.[10] The State Road from Rome to Sackets Harbor was laid through this town in 1804. A sulphur spring is found on the farm of —— Totman. The town has 2 churches, Bap. and M. E.

LYME[11]—was formed from Brownville, March 6, 1818. A part of Clayton was taken off in 1833, and Cape Vincent in 1849. It lies upon Chaumont Bay, in the W. part of the co. The surface is very level. The W. border is deeply indented by Chaumont Bay[12] and its branches. The soil is principally clay. There are several sulphur springs in town. Near Chaumont are extensive and valuable limestone quarries.[13] **Chaumont** (p. v.) is situated upon the bay at the mouth of Chaumont River. Pop. 706. **Three Mile Bay**[14] (p. v.) lies upon a bay of the same name. Pop. 295. **Point Peninsula** (p. o.) is a scattered settlement containing 25 houses. The first settlement was begun under Jonas Smith and Henry A. Delamater, agents for Le Ray, in 1801.[15] The first location was 2½ mi. above Chaumont; but in 1805 the settlers removed to the site of the present village. During several years much sickness prevailed; but this gradually disappeared as the co. became more settled. In 1812 the inhabitants, numbering about a dozen families, built a blockhouse, which was taken and destroyed by the enemy. The first church (Bap.) was organized in 1816.[16]

ORLEANS—was formed from Brownville, April 3, 1821. A portion was annexed to Pamelia, April 1, 1829. Clayton was taken off in 1833. The boundary between it and Alexandria has twice been changed. It lies on the N. border of the co., and embraces the W. part of Wells and

Cole, Jacobus Bowles, Timothy Pitcher, and Julius Mills. Maj. Jacob Jennings, Curtis Ames, Jesse Spencer, Jr., and Joseph Nason settled at Mannsville. Among the others who had been here before the war were Collector Ives, Lieut. Hale, and Capt. Gross. A monument of granite now marks the spot where was erected the first house in Ellisburgh. But it soon fell into decay, and its site is now so obscure that the place of their interment will be forgotten.

1 This road was 20 feet wide at the top, 12 at the bottom, and 14 feet deep.

2 M. E., Prot. E., Presb., Christian, and Seventh Day Bap.

3 Named in honor of Le Ray's daughter, the proprietor.

4 The first house built here, and the land in the co. N. and E. of the river was located here until 1835, when it was removed to Watertown. For several years it was the county seat.

5 Named from Peter Evans, who built the first mill in 1804.

6 This village is locally known as "Lockport." A trace of an old canal-lock here was found by the first settlers, and from it Lyme, N. Y., and another near Sandfords Corners.

7 Among the first settlers were David Cotton, Dyer Rhodes, Gershom Bush, John Mattison, Joseph Cook, Asa Sims, Thomas Ward, William Cooper, and Benj. Kirkbride. The first child born was Asa Brown. The first marriage was that of Lucas Allen and Sarah Dyer. The first death was that of Uncle Ball. Miss Margaret Comstock taught the first school.

9 This town embraces "Atticus," or No. 1, of the Boylston Tract.

10 In the following year, Capt. Stephen Foster, Seth Cutler, John Alger, and others, came in. McKee and Fox kept the first inn. Mr. Frost built the first sawmill, and Mr. Cutler the first grist-mill. The first birth was that of A. M. Child, in 1804. The first death was [illegible]

several smaller islands in the St. Lawrence. The surface is level, or slightly rolling. The principal streams are Perch River, Catfish and Mullet Creeks. Perch Lake lies upon the s. boundary. The soil is clay and loam. **La Fargeville,**[1] (p. v.,) on Chaumont River, near the center of the town, is the seat of Orleans Academy. Pop. 295. **Omar,**[2] (p. o.,) on Mullet Creek, and **Stone Mills,**[3] (p. o.,) are small villages. **Orleans 4 Corners,** (p. o.,) **Port Orleans,** and **Collins Landing** are hamlets. Penets Square, which embraced most of this town, was settled by squatters.[4] The first settlements commenced about 1806.[5] In 1824, John La Farge, a large owner in these lands, came into town to assert his claim. After a great deal of difficulty and some resistance, he succeeded in establishing his title. In 1838 the mansion and farm of La Farge, 1 mi. s. of the village, was purchased by Bishop Dubois as the site for a Catholic seminary. This institution, named "*St. Vincent de Paul*," combining a theological seminary and classical boarding school, was soon after opened; but in two or three years it was removed to Fordham, Westchester co., and was afterward incorp. as St. Johns College. Rock Island Lighthouse was built in 1853. The British steamer Sir Robert Peel was plundered and burned on the night of May 29, 1838, while taking in wood at Wells Island, in this town, by a party of 22 self-styled patriots, led by Bill Johnston.[6] The census reports 8 churches.[7]

PAMELIA—was formed from Brownville, April 12, 1819. In 1824 its name was changed to "*Leander;*" but soon after the former name was restored. A portion of Orleans was annexed April 1, 1829. It is the central town of the co. The surface is level, or gently undulating, and the soil is clay and sand. Near the cascade opposite Watertown are several caves in the limestone rock.[9] In the vicinity of Perch Lake have been found several barrows, or sepulchral mounds. **Pamelia Village** and **Juhelville**[10]—the former opposite the lower part and the latter the upper part of Watertown Village—are places of considerable manufactures,[11] and have each 200 to 300 inhabitants. **Pamelia Four Corners** (p. v.) contains about 30 houses. The first settlement began in 1799.[12] The census reports 2 churches.[13]

PHILADELPHIA—was formed from Le Ray, April 3, 1821. It is an interior town, E. of the center of the co. Its surface is level in the E., but rocky and broken in the W. The soil is generally a clayey loam. Indian River and Black Creek are the principal streams. Iron ore is found in considerable quantities. The principal bed that is worked is known as the Shurtliff mine. In Sterlingville is a large chalybeate spring. **Philadelphia,**[14] (p. v.,) upon Indian River, has 55 houses, and **Sterlingville,**[15] (p. v.,) upon Black Creek, 40. At the latter place are a large blast furnace[16] and a forge.[17] The first settlement was commenced in 1804, by Friends from Penn. and N. J.[18] In 1810 the Friends erected a building which for 17 years was used for a school and meeting house.[19]

[4] The improvident waste of timber and the slovenly clearings made by this lawless set promised little in the way of civilization; and their appearance, as they emerged from the swamps with an ox harnessed to a cart-bed piece of wood, laden with a trough, full of "black salts," as they returned in like manner, with a sack of meal and a jug of whiskey, was little calculated to inspire hope of speedy improvement. They had a kind of law among themselves in relation to land, and were accustomed to run "possession" lines by lopping down bushes. "Claims" were often sold and resold by quit claim deeds.

[5] Among the first settlers were Roberts C. Frazer, Peter Pratt, Dr Reuben Andrus, Samuel and Daniel Ellis, and Messrs. Alvah Goodman kept the first inn; Lemuel George, the first store; Collins & Platt erected the first grist mill, and Dr. Andrus, the first sawmill, in 1819.

[6] After driving the passengers ashore and plundering the boat, the brigands cast her off from the shore and set her on fire. Large rewards were offered for their apprehension, and several persons were arrested, but none convicted. In 1850, Johnston was appointed keeper of the Rock Island Light, which shines in the spot where the Peel was burned.

[9] These caves have been traced nearly 200 feet. Just below and partly under the village of Juhelville, the open mouths of several caves appear in the river bank, opening at both ends in the cliff. The passages are lined with calcareous deposits, in the form of agate material, stalactites, and tufa. These caves are evidently all formed by currents of water flowing through the natural seams in the rock and gradually wearing away the soluble and yielding limestone. In the rear of the principal cavern a large area of land has sunk to a considerable depth as through a portion has fallen in.

[10] Named from Madame Juhel, a relative of the Le Ray family.

[11] These manufactures consist of lumber, spirits, leather, cotton yarn, and portable steam engines.

[12] The first settlers were Wm. Cooper and Wm. Watkins. Anson Sigourney taught the first school; Samuel Mack kept the first inn; Jabez Foster, the first store; and Tuttle and Bailey built the first mill.

[13] M. E. and Univ.

[14] Often called "Quicker Settlement" by the old inhabitants.

[15] Named from James Sterling, the owner of the iron works. Formerly called "*De Lannoy's Mill*," from the builder of the first mill, in 1807.

[16] Built in 1857, by James Sterling. The ore is principally obtained from the Sterling mine of Antwerp, and the Shurtliff mine of this town, near the line of Theresa, the ore from the latter being used principally as a flux.

[17] Built by Caleb Essington, in 1860.

[18] These settlers purchased 16 lots of 440 acres each, lying in the corners of a square containing 25 lots, of which the central range each way was reserved by Le Ray. The center lot, No. 241, embracing the site of the present village, was conveyed to trustees "for the promotion of religion and learning" under the care of the Quakers. This trust afterward occasioned much contention, and led to a miniature anti-rent war. The center was finally settled in 1844. Caldwallader Child, Micajah Taylor, and Samuel Evans came in the first year. Jedediah Comfort kept the first inn, Saml. Case, the first store, and Thos. and John Townsend built the first mill. Anna Comfort kept the first school. The first child born was John Townsend, and the first death was a daughter of Robt. Comfort, in 1807.

RODMAN[1]—was formed from Adams, March 24, 1804, under the name of "H[illegible]" It name was changed April 6, 1808. A part of Pinckney (Lewis co.) was taken off in 1808. It lies upon the borders of Lewis, in the s. part of the co. The surface is hilly, and traversed by deep ravines of Sandy Creek and its branches. The soil is generally a [illegible] loam. There are 3 sulphur springs in town. **Rodman** (p. v.) has 15 houses. **Zoar** and **Whitesville**[2] (E. Rodman p. o.) each about 20. Settlement began in 1801, and from 1805 to 1810 it progressed with great rapidity.[3] In 1813 an epidemic prevailed, causing 60 deaths in a few months. The census reports 3 churches.[4]

RUTLAND[5]—was formed from Watertown, April 1, 1802. It lies upon the s. border of Black River, E. of the center of the co. Its surface consists of the narrow river valley on the N., a terraced plateau in the center, and a hilly region in the S. The central plateau, embracing the greater part of the town, is 300 to 400 feet above the flat country farther N., and it is connected by a succession of steep declivities to the level of the river. It is underlaid by Trenton limestone. Upon the S. the surface gradually rises to the summits of the slate hills which occupy the S. part of the co. A remarkable valley, known as "Rutland Hollow," extends through the town, upon the lower terrace of the plateau, parallel to the river. It is deeply excavated in the limestone, and appears like the bed of an ancient river. Another smaller and deeper valley extends in the same direction across the summit of the plateau, and forms the bed of a deep, [illegible] lake. Pleasant Lake, in Champion, is situated in the continuation of this latter valley. These valleys and terraces seem the result of abrasion rather than of upheaval. Upon the edge of the terrace, 100 feet below the summit, may be seen the ancient lake ridge before described. There are 2 or 3 sulphur springs in town. The soil is a very fertile loam upon the plateau, and a sandy loam upon the river. **Felts Mills,**[6] (p. v.) on Black River, contains 50 houses; **Black River,**[7] (p. v.) on the river, partly in this town and partly in Le Ray, 40; **Tylerville,**[8] (South Rutland p. o.) in the narrow valley of Sandy Creek, 50; and **Rutland Center,**[9] (Rutland p. o.) 40. This town fell to the share of Wm. Henderson, and settlement was begun in 1799, under Asher Miller, his agent. The greater part of the land was sold[10] to New England farmers, who came in within 3 years after the first settlement.[11] An old Indian fort is to be seen on the farm of Geo. Wilson; and a bone pit was found near the line of Watertown. The census reports 5 churches.[12]

THERESA—was formed from Alexandria, April 15, 1841, and named from a daughter of Le Ray. It is the central town upon the N. W. border of the co. The surface along Indian River is broken, and traversed by ridges of gneiss rock, with fertile intervales. A part of the town, underlaid by sandstone, is level or undulating. In the primary regions are a number of romantic lakes; and some of these have highly interesting mineral localities upon their shores and islands.[13] **Theresa,** (p. v.) upon the High Falls[14] of the Indian River, was early selected by Le Ray as a favorable point for settlement, and about 1810 he caused several "jobs" to be cleared and a sawmill to be built.[15] **West Theresa** is a p. o. A furnace, built near Mill Creek in 1847, was in part supplied with ores from the vicinity. A private academy has been [illegible] several years. The census reports 3 churches.[16]

1 It was first named "Orpheus," of the "Eleven Towns." Its present name was given by Richard Harrison, of N. Y. city, proprietor; and its present one from Daniel Rodman, of Hudson, Clerk of the Assembly, in 1808-09.

2 Named from Thos. White, subagent and early settler.

3 Among those settlers who came in this year were Asa Smith and Phineas Manly, Noah, Jonathan, and Aaron Davis, Bela Thomas, Wm. Eddy, and Stephen Hoyt. Miss M. Noble taught the first school in Asa Manly's barn, in 1805. Wm. and Silas Knox kept the first store, and Wm. Knox built the first sawmill, in 1804, and gristmill, in 1806. The first child born was Walter Hoyt, in Manly's, and the first death, that of the same child, 3 years after. His father moved to Lowville in Mr. Harrison's employ. Timothy Greenly moved into the s. w. corner of the town in 1803.

5 Named from "Mount Independence," of the "Eleven Towns." Named from Rutland, Vt., the former home of an early settler.

6 Named from John Felt, who purchased the site in 1813, and still resides here. Formerly the seat of an extensive lumber manufacturing business, changed to a tannery.

7 Formerly known as "Lockport." See p. 340.

8 Named from Josiah and Frederick Tyler, early settlers.

9 Originally called Brookville, from Carlos G. Brooks, a former resident. It is never known by this name in town.

10 17 deeds were executed in Utica within 2 months, for 3,768 acres.

11 Among the settlers who came in during the first and second years were Levi Mann, Perley and Wm. Keyes, David and Chas. Smith Colburn, Amos Stevens, Rufus L. Porter, Lyndal Wright, Jonathan and Chas. Ives, Jos. Kellum, Chas. Kelsey, Josiah [illegible] King, John Dole, C. Cummings, [illegible] Wm. Lovett, and Jesse C[illegible] Mrs. A. WATERTOWN[1]—was formed from Mexico, March 14, 1800. Rutland was taken off in 1802, and Hounsfield in 1806. It lies upon Black River, s. w. of the center of the co. The surface in the s. e. part is broken by the irregular terraces of the Trenton limestone, and in the N. it is level or rolling. The river bank is rocky throughout its whole extent; and in the village, about 3 mi. below, are several extensive caves. It is an important agricultural town; but it is chiefly distinguished for the extent of its trade and manufactures. In amount of business it is unsurpassed by any town in Northern N. Y. **Watertown,**[2] (p.v.,) the co. seat, pleasantly situated upon the s. bank of Black River, was incorp. April 5, 1816. Pop. 5874. It contains an academy,[3] 3 newspaper offices, 5 banks, and 9 churches. Black River here flows, for the space of a mile, in a succession of rapids over the limestone terraces, affording an abundance of water power, which is largely improved, making the village one of the most important manufacturing places in the State.[4] Three road and 2 R. R. bridges cross the river within the limits of the village: one of the former is a wire suspension bridge. An ice cave, near Whittleseys Point,[5] extends under a part of the village. By an act passed March 22, 1853, a board of water commissioners was created, with power to borrow $50,000 for the construction of water works for the village. The work was finished during the following summer. The water is taken from the river, near the upper part of the village, and thrown by water power into a reservoir 200 feet above the village, and about 1 mi. distant; and from the reservoir it is distributed through the streets. A beautiful fountain is constructed in the center of the principal square.[6] At an early day, two rectangular pieces of land were given by the owners of the adjacent lots for public use;[7] and these now constitute beautiful public squares.[8] **Burrs Mills**[9] (p. o.) is a hamlet, on Sandy Creek, in the E. part of the town. **Watertown Center** and **Fields Settlement** are hamlets. Henry Coffeen and Zachariah Butterfield were the pioneer settlers, in 1800; they located upon the present site of the village.[10] An arsenal was built at Watertown in 1809, and a building for an academy in 1811; the latter was used as a hospital during the war. The census reports 10 churches.[11]

WILNA[12]—was formed from Le Ray, and Leyden (Lewis co.) April 2, 1813. It lies upon Black River, in the extreme E. part of the co. Its surface is somewhat broken. It is chiefly underlaid by the primary rock, which rises into low, naked ridges, and by calciferous sandstone. Black River forms its W. boundary; and upon it are a series of rapids, forming an abundance of water power.[13] The Indian River, in the N. part, also affords water power at several places. At Natural Bridge this stream flows beneath the surface through passages worn in the coarse white limestone which here forms the surface rock. Several interesting minerals are found at this place.

[1] Its present limits embrace No. 2, or "Leghlin," of the "Eleven Towns." It first contained Nos. 1, 2 and 3.

[2] First settled in 1800, and became the co. seat in 1805. In 1849 the business portion was almost destroyed by fire, but it was rebuilt in the course of 2 years.

[3] The Watertown Acad. was incorp. May 2, 1811, and a large stone brick building was erected in a grove in the N. E. part of the village. It was soon after noticed in the Black River Literary and Religious Institute, found. under the joint auspices of the Watertown, Presbyterian and R. D. Cong. Societies in 1847. In May, 1851, the name was changed to the Jefferson County Institute.

[4] During the war a factory was built at the site of the present Paddock's mammoth pile of cotton and woolen mills. In 1827, Levi Beebe purchased Gwans Island and erected upon it an immense stone cotton factory. It had just been put in operation when, July 7, 1828, it was burned, under suspicious circumstances. The loss was $25,000, and the site has since remained a ruin. The manufactures of cotton and woolen goods, flour, paper, iron castings, machinery, leather, carriages, agricultural implements, lead pipe, sash and blinds, and furniture, are extensively carried on.

[5] Named from the wife of Samuel Whittlesey, who in 1815 threw a rock from this point into the river, and was in which Mrs. Whittlesey, a lawyer and postmaster in the village, was drowned in N. Y. the sum of $50,000, as bail, and while returning to Watertown was secretly killed and robbed by his wife. He was greatly alarmed, but was persuaded by her to keep quiet as it would be difficult to convince the people that she could do such a horrible deed, and as they must have to serve a long term of hard labor for a year, they might as well keep the secret. Her plan succeeded upon the world, and she lived, and died in peace, having by means she had obtained planned to be confirmed and executed. He started with his pocket-book for Ogdensburg, leaving appointments along the road for preaching, but reaching Trenton he failed to be heard from. He arrived at Trenton he failed to be heard from. The news of the robbery spread quickly over the country, but the most active inquiry and very liberal rewards failed to bring the thief to justice. On his return home he met his family with great joy, but there was an unusual sadness in his face, and upon a seat being made for him, he suddenly with his two boarders, Perley Keyes and Jason Barbarick, the latter were convinced that there was fraud. By an ingenious contrivance of inquiry and cross-questioning they were not only confirmed in the belief, but assured that the family secret intended to conceal, and that immediately means must be employed to recover the money. The same evening invited Wells to take a walk, which led as if by accident to a lonely spot near the village, previously prepared, where they suddenly charged him with the robbery and the stated instant drowning, unless he discussed. He was twice submerged and life nearly extinguished, when he confessed and was liberated. The money was found sewed into a pair of drawers fitted to be worn by either husband or wife. Mrs. W. immediately after slipped away from the crowd unobserved, rushed down to the river, and was drowned.—*Hough's Hist. Jeff. Co.*, p. 235.

[6] An Artesian well was bored 127 feet deep upon Factory Square in 1829, and a copious supply of water was obtained, slightly impregnated with sulphur and iron.

[7] These lots are respectively 12 by 28 and 9 by 32 rods.

[8] The principal business of the village is located around the Square and upon Court St.

[9] Named from John Burr & Sons, who settled here in 1804. Hart Massey built a saw and grist mill here, in 1801, for Low, the proprietor.

[10] Oliver Bartlett came to the same year, 1801, and in 1802 about 50 families arrived. Jeremiah Brown built the first grist mill in 1802, and Dr. Isaiah Massey opened the first inn the same year. In 1806 a bridge was built near the present court-house. In 1807, Wm. Smith and Jedey Burbank opened the first store, and a church was erected on Black River the same year. The first death was to Mrs. Levi Moses Brown, and the first birth that of ——. The latter was killed by a falling tree.

[12] Named from Wilna, in Russia, then fresh in memory from its battle.

[13] After effecting 12 miles of navigation, the river here commences a descent of 74 feet in 2 miles, exclusive of the falls, falling in all 48 feet. The Long Falls here descend 6 feet in a distance of 200 feet, and the Upper are about 20 small cataracts. The State Dam, built at this place, is 900 feet long, and the State Bridge 600

WORTH—was formed from Lorraine, April 12, 1848. It lies upon the Lit. slate, and shaly ridges in the s. part of the co. It is 1200 to 1500 feet above tide, and is the most elevated land in the co. It is subject to deep snows and early frosts. Wherever the surface is exposed to the action of running water, deep gulfs have been worn in the soft and yielding rock. There are several sulphur springs in town. The soil is principally derived from the disintegration of the underlying rocks, and is well adapted to grazing. About one half of the town is settled. **Worthville** is a hamlet, and is the only p. o. The first settlement was made in [illegible] by an association from Litchfield, Herkimer co., who bought the N. W. quarter, balloted for the lots, built rude mills, and began small improvements.[9] A part of the settlers left during the war, and during the succeeding cold seasons of 1816–17 the whole settlement was abandoned. Settlement was not recommenced until several years after. The census reports 1 church, (M. E.)

KINGS COUNTY.

THIS county was organized with its present limits, Nov. 1, 1683.[1] It lies upon the w. end of Long Island, adjacent to New York Harbor, and embraces several small islands adjacent to [illegible]. It is centrally distant 140 mi. from Albany, and contains 72 sq. mi. The surface is generally level or gently undulating. A broad range of drift hills, 50 to 300 feet above tide, extends [illegible] shore of the bay in the s.w. corner in a N.E. direction to the [illegible] co. From their summits the surface gradually declines [illegible] N. and S., and terminates upon the shores in extensive [illegible]. The portion lying N. of the hills is moderately uneven, [illegible] occasionally broken by low, isolated drift hills. The shore [illegible] indented by bays, which for the most part are shallow, and very irregular in outline. The principal of these are Hallets Cove, Newtown Creek,[2] Wallabout, Gowanus, and Gravesend Bays on the W., and Sheeps Head Bay on the S. Jamaica Bay, a large, shallow, landlocked bay upon the S. shore, is partially in this co. It incloses a large number of low, marshy islands separated by narrow and irregular tidal currents. Wide salt marshes extend along the shores of the bays, and far inland along the courses of the small creeks.[3] The soil is mostly a light, sandy loam. A strip immediately surrounding the marshes and embracing a large share of the W. extremity is fertile, and capable of producing almost any crop adapted to the climate. Its close proximity to New York, the great commercial center of the country, renders it favorably situated for the development of manufactures and commerce; and both of these pursuits are largely carried on at the centers of population. The agriculture of the co. is mostly confined to gardening for the N. Y. market. All of the business of the co.—manufacturing, commercial, and agricultural—are so intimately connected with the interests of New York that the co. may be considered as a suburb of the great city.[4]

The county seat is located at the city of Brooklyn.[5] The courts are accommodated at the City Hall, which belongs exclusively to the city. The jail, located upon Raymond St., is closely surrounded by other buildings, and its ventilation is very imperfect. The average number of inmates is 80, supported at a weekly cost of $2.10 each.[6] The Kings Co. Penitentiary is located upon a farm of 38 acres near the S. line of Brooklyn. The buildings, now nearly completed, are of stone, and sufficiently spacious for the accommodation and care of all the prisoners of the co. The main building is 490 feet long by 86 feet broad, with two wings of 50 feet each. The total cost up to January 1, 1857 was $190,414.35. The institution is designed to be self supporting. The county clerk's office is kept at the City Hall.[7] The Kings County Almshouse is located upon a farm of 70 acres in Flatbush, about three miles S. of the City Hall of Brooklyn. The institution consists of four large brick buildings,—the almshouse proper, hospital, nursery, and lunatic asylum. These buildings are spacious and well arranged, but poorly ventilated. A school is maintained through the year, and religious instruction is given upon the Sabbath.

5 The courts were originally held at Gravesend; but, by an act of the General Assembly, passed Nov. 7, 1685, they were removed to Flatbush, where a court-house was built there the succeeding year. This building was used until 1708, when a new court-house was built and used until 1785, when a new one was erected. By an act passed April 6, 1784, the sum of £2,200 was authorized to be raised to repair the damages which had been done to the court-house and jail by the British. The repairs were expended under the direction of Philip Wagel and Jeremyas Vanderbilt. Children are bound out at the age of 12 years. The average number of inmates is 1,800, supported at a weekly cost of about $2.00 each. The farm yields a revenue of $3,500.

The Brooklyn & Jamaica R. R. extends from the s. ferry of Brooklyn eastward through near the center of the co. The Flushing R. R. extends from Hunters Point, (Queens co.,) N. of Brooklyn, to the village of Flushing, a distance of 8 mi. In the city of Brooklyn are several local rail roads; and from the city lines of stages extend to every village in the co.

The Long Island Intelligencer, the first newspaper in the co., was published some time before 1807.

Four newspapers—three daily and one weekly—are now published in the co.[1]

The first settlements of this co. were made mostly by the Dutch, about 1625. In 1640, a colony of Mass. Quakers, in quest of religious freedom, settled at Gravesend under the protection of the Dutch Government. Long previous to the English conquest of 1664, settlements had been made, mills erected, and churches and schools established in every town in the co. The settlers were so exclusively Dutch that the Dutch language and customs prevailed until within a comparatively recent period. Bushwick, Brooklyn, Flatbush, Flatlands, and New Utrecht were known under the English Government as the "*Five Dutch Towns;*" and they were associated, for certain purposes, until 1690.[2] The Five Towns also formed an ecclesiastical society, and joined in the support of their minister until the final separation of the American church from the Classis of Holland, in 1772.

Few events of interest occurred within the limits of this co. during the colonial period. Its Revolutionary annals belong to the general history of the country. During its occupation by the British, from 1776 to 1782, the people were subjected to a series of disgraceful and oppressive acts.[3] Many of the inhabitants left the co. from fear of hostile visits during the War of 1812-15; and at times much alarm was felt,—although no hostile visit actually took place. It has shared in the growth of New York City, and is closely identified with it in business. This co. is included in the "Metropolitan Police District" created by act of April 15, 1857, and in the Board of Police Commissioners it is represented by the Mayor of Brooklyn and one other member. Vast schemes of speculation have from time to time arisen, most of which have resulted in loss, and several of them, devised upon a magnificent scale, have seriously retarded the progress of needful improvement.

From 1850 to 1853 about 40 building associations were organized in this co., ostensibly to enable those of humble means to acquire *a home*, but practically to form contributions to a fund which was loaned to those members who would allow the highest premium. The rates submitted to were often extremely ruinous, and the speculation had but a brief existence.

BROOKLYN[1]—was incorp. by patent, with the usual privileges of townships, under Gov. Lovelace, Oct. 12, 1667, and its rights were confirmed by Gov. Dongan, May 1, 1686. It was recognized as a town under the State Government March 7, 1788. The village of Brooklyn was incorp. by district April 2, 1801, and as a village April 12, 1816, and both town and village were incorp. as a city April 8, 1834. The city of Williamsburgh and town of Bushwick were annexed April 17, 1854.[2] The city extends along New York Bay and East River to Newtown Creek, occupying the N. part of the co. Its exterior line is 22 mi., and it contains an area of 16,000 acres. The S. and E. borders are occupied by a broad range of low hills, which extend E. into Queens co. Along the shore opposite the lower point of New York is an irregular bluff known as "Brooklyn Heights." A considerable portion of the S. part of the city is low and level. Newtown Creek, forming the N. boundary, is an irregular arm of the sea, receiving several small fresh water streams. Wallabout Bay is a deep indentation lying between the old cities of Williamsburgh and Brooklyn. Gowanus Bay extends into the S. part of the city.[3] The land that borders upon these bays is flat and marshy.

Within the limits of Brooklyn are several districts known by the names which they bore when they were distinct localities, before the city was incorporated. These will eventually all be lost in the growth and consolidation of the business of the city. **Brooklyn** (p. o.) includes the old settled parts of the city S. of Wallabout Bay. Upon East River, in this district, are several large manufactories. The water front is entirely occupied by wharves and warehouses. **Williamsburgh** (p. o.) includes the thickly settled portions N. of Wallabout Bay. It contains a large number of manufacturing establishments, and its entire water front is devoted to commercial purposes. **Green Point,** (p. o.) comprising the 17th ward, lies between Bushwick and Newtown Creeks, and occupies the extreme N. W. part of the city. It contains extensive shipyards, and manufactories of porcelain, coal oil, lifeboats, and many other articles. **Wallabout** (sometimes called East Brooklyn) lies E. of Wallabout Bay. **Bedford** and **New Brooklyn** are localities on the R. R., in the E. part of the city. **Bushwick Cross Roads** and **Bushwick Green** are villages E. of Williamsburgh. **Gowanus** is a village near the head of Gowanus Bay. **South Brooklyn** comprises the portion of the city lying S. of Atlantic St. It has an extensive water front; and along the shore immense works have been constructed to facilitate commerce.[4] It contains extensive wood, coal, stone, and lumber yards, and numerous planing mills, distilleries, breweries, plaster mills, founderies, and machine shops. The city is connected with New York by 11 steam ferries, all supplied with excellent boats, which perform regular and frequent trips.[5] From the Atlantic St. Ferry the Brooklyn & Jamaica R. R. extends E. to the E. bounds of the co.[6]

From the principal ferries lines of city railroads extend through the principal avenues and radiate to nearly every part of the city, affording easy, rapid, and cheap means of communication.[7] The commerce of Brooklyn is extensive, though it scarce has an independent existence, from its intimate relations with that of New York. The docks and piers at South Brooklyn are among the most extensive and commodious in the country. Ship and boat building and repairing are extensively carried on at Williamsburgh and Green Point. The whole water front of the city is occupied by ferries, piers, slips, and boat and ship yards; and the aggregate amount of business

[1] The name is derived from the Dutch "*Breuckelandt*," broken land. The patent for the township was issued to Jan Evertse, Jan Dyckman, Albert Cornelisen Paulus Vanderveek, Michael Hainen, Elias Lambertse Tonnis Gisbert and Barent and Joris Jacobsen. The annual quitrent under this patent was 30 bush. of wheat.

[2] Bushwick—signifying wood town—was invested with certain powers of government March 14, 1661. Another patent was granted Oct. 25, 1667; but it remained connected with other towns until Aug. 12, 1708. Williamsburgh Village, in this town, was incorp. April 14, 1827, and the town of Williamsburgh was formed March 14, 1840. The village and town were created and incorp. in the City of Williamsburgh April 7, 1851, and the city and town of Bushwick were annexed to Brooklyn April 17, 1854. Bushwick now constitutes the 17th and 18th wards, and Williamsburgh the 13th, 14th, 15th, 16th, and a part of the 19th wards.

The U. S. Navy Yard is located upon Wallabout Bay.[2] The premises connected with it occupy an area of 45 acres, and are inclosed on the land side by a high wall. Within the inclosure are various mechanic shops necessary in building and repairing vessels, a large and costly dry dock,[3] two large buildings to cover ships of war while in process of building, extensive lumber warehouses, several marine railways, and a large amount of balls, cannon, and other munitions of war. The Naval Lyceum is filled with curiosities sent home by naval officers. Upon a gentle rise, a little E. of the Navy Yard, is a U. S. Marine Hospital[4] for the care of sick and infirm seamen belonging to the navy. Near it is an extensive laboratory for the manufacture of medicines for the navy.[5] The grounds belonging to these establishments occupy an area of 35 acres. A little S. of the Navy Yard, upon Park Avenue, are extensive Marine Barracks.

It is brought 7¾ mi. in an open canal and 1 mi. in a brick conduit, thence pumped into a reservoir on Cypress Hill, 170 ft. above tide, and thence distributed to points 11 mi. from the city. The conduit has a capacity of 40,000,000 gallons per day, and the pumps can raise 10,000,000 gal. per day. The reservoir is 20 feet deep, and has a capacity of 167,000,000 gals. The whole cost of the work is estimated at $4,200,000.[1] The Fire Departments of the Eastern and Western Districts are separately organized under special acts.[2] The city is supplied with gas by 3 companies.

The *City Park*, between Park and Flushing Avenues and Navy and Pack Sts., contains 7 acres. *Washington Park*, between Myrtle and De Kalb Avenues and Cumberland and Carlton Sts., contains 33 acres. It occupies the site of Fort Green of the Revolution. In the newly surveyed sections several sites for parks have been reserved by the city.

The *City Armory*, at the corner of Henry and Cranberry Sts., was erected in 1858, at a cost of $14,000. A *State Arsenal*, on Clinton St., was built in 1856, at a cost of $40,000.

The *City Hall*, situated at the junction of Fulton and Court Sts., is a fine building, faced with white marble. Besides these, there are in the city 9 banks of discount, 5 savings' banks, and 10 stock fire insurance companies.

The *Public Schools* are under the charge of a board of education, consisting of 45 members. The city contains 32 school districts; and in 1857 there were employed 320 teachers — 27 males and 293 females. The whole number of children between 4 and 21 years of age is 46,000, of whom 35,817, or 78 per cent., attended school during some portion of the year. The total expenses of the schools for 1857 was $261,474.01. A normal school for the professional instruction of teachers has been established.

The *Packer Collegiate Institute*, for girls, occupies an elegant building upon Joralemon St., w. of the City Hall. It was incorp. May 8, 1845, as the "*Brooklyn Female Academy.*" Its name was changed March 19, 1853, in honor of Mrs. Wm. S. Packer, who endowed the institution with $65,000. An astronomical observatory is connected with it.

The *Brooklyn Collegiate and Polytechnic Institute*, for boys, on Livingston St., was incorp. April 7, 1854. It was established by a stock company, with a capital of $75,000, and has accommodations for 150 pupils. Besides these, there are in the city 100 private schools and seminaries, several of which are large institutions, with corps of professors and with permanent investments. The aggregate number of pupils in attendance at the schools is 2,600.

The *Brooklyn Institute* was incorp. Nov. 20, 1824. It occupies a commodious building on Washington St., the gift of Augustus Graham. It has a free library, provides free lectures and lessons in drawing and painting for apprentices, and its rooms are depositories for books, maps, models, and drawing apparatus.

The *Brooklyn Athenæum and Reading Room*, on the corner of Atlantic and Clinton Sts., was incorp. Jan. 28, 1852. It occupies a large three story edifice, erected at a cost of $60,000. The first story is used for mercantile purposes, the second for a library and reading room, and the third for public lectures.

The *Law Library* in Brooklyn, incorp. Jan. 8, 1850, is located at 341 Fulton St.

The *Naval Lyceum*, within the Navy Yard, was established in 1833 by officers of the navy. It has a fine library and museum.

The *Kings County Lodge Library Association*, at Williamsburgh, was incorp. Feb. 7, 1847.

Among the societies for intellectual improvement are the *Hamilton Library Association*, founded in 1830; the *Franklin Debating Association*, in 1852; the *Young Men's Association*, in 1853; the *St. Charles Institute*, in 1854; the *Eccleston Literary Association*, in 1854; and the *Columbia Literary Association*, in 1855. The *Great Northwestern Zephyr Association*, designed to encourage native talent in music, painting, and sculpture, was organized in 1858. The *Brooklyn Society*

It is supported by private contributions. The *Brooklyn Central Dispensary*, 473 Fulton St., was incorp. Dec. 11, 1855. The *Brooklyn German General Dispensary* is located at 145 Court St. The *Brooklyn Eye and Ear Infirmary*, 109 Pineapple St., was incorp. March 27, 1851.

The *Orphan Asylum Society* was incorp. May 6, 1834. The institution is situated upon a fine site on Cumberland St. near Myrtle Avenue.

The *Roman Catholic Orphan Asylum* of Brooklyn was incorp. May 6, 1834. The asylum for boys is located at the corner of Clinton and Congress Sts., and the asylum for girls upon Congress St. near Clinton. The former has 120 inmates, and the latter 250. The girls are under the charge of the Sisters of Charity. The support of these institutions is principally derived from the income of a large property bequeathed by Cornelius Heeney and under the charge of the Brooklyn Benevolent Society.[1]

The *Brooklyn Association for Improving the Condition of the Poor* was formed March 26, 1844. It numbers about 180 visitors, whose duty it is to investigate the condition of the poor in every part of the city, afford such temporary relief in the way of food and clothing as the cases may warrant, and to refer the needy to the appropriate sources for permanent relief. This association distributes $6,000 to $7,000 per year. The *Brooklyn Benevolent Society*, founded upon a bequest of Cornelius Heeney, was incorp. in May, 1845. It is managed by 11 trustees, of whom the Archbishop of N. Y. and the Mayor of Brooklyn are *ex officio* members. Its funds are principally devoted to the support of various Catholic charities. The *Brooklyn Society for the Relief of Respectable and Indigent Females*, incorp. in 1851, was founded by John B. Graham, who erected a fine edifice, corner of Washington and De Kalb Sts., as a home for the unfortunates named in the title. It derives its support from private subscriptions. The *Children's Aid Society* was organized in Feb. 1854, as an industrial school. The *Brooklyn Industrial School Association*, under the management of ladies of the several churches, was incorp. April 4, 1854. It has established schools in different parts of the city for girls who do not attend the public schools, and who are entirely deprived of moral training. The *Brooklyn Female Employment Society*, an association of ladies to furnish employment to respectable females who may be reduced to want, was incorp. April 19, 1854. Its office and salesroom is at 65 Court St. The *Church Charity Association* for the relief of the aged, sick, and indigent was incorp. in March, 1851. It is under the patronage of the Prot. E. Church.

The churches of Brooklyn are justly celebrated for their general elegance and beauty of architectural design. Large numbers of people doing business in New York reside in Brooklyn: and this has led to the erection of so great a number of churches that the city has been denominated the "city of churches." In 1858 there were 139 churches in the city.[2] Connected with these churches are various religious and charitable societies.[3] The Freemasons, Odd Fellows, and Sons of Tem-

[1] The other benevolent Catholic societies in the city are as follows: *St. Joseph's Asylum*, July St., with 100 pupils, under the Brothers of Christian Schools, and 150 pupils under the Sisters of Mercy; *St. Paul's Female School*, with 150 pupils, under the Sisters of Charity; *St. Peter's and Paul's Asylum*, with 300 girls, under the Sisters of St. Joseph; *St. Mary Star of the Sea*, with 300 girls, under the Sisters of Charity; *General and Female School* attached to the Church of the Holy Trinity, *Convent and Boarding Establishment* of the Sisters of St. Joseph, *Convent and Academy of the Visitation*, *St. Francis de Sales's Convent of Sisters of Mercy*, and *Nuns of the Order of St. Dominic*. The *R. C. Episcopal Society of St. Peter's and St. Paul's Church* was incorp. June 15, 1858, to constitute a Sunday school and library, and support the sick and bury the dead. *Free schools* are connected with all the church except that of St Charles.

Greenwood Cemetery, upon the S. line, is mostly within the limits of the city. It is owned by a joint stock company, incorp. April 18, 1838. It comprises an area of 400 acres, beautifully located upon the elevated and broken ground E. of Gowanus Bay. The grounds were purchased, and opened for burial in 1842; and up to Aug. 1858, 64,000 burials had been made. It is one of the oldest and most beautiful of the rural cemeteries connected with the great cities in this country. The grounds are laid out with taste; and many of the sculptured monuments are costly and beautiful specimens of art.

The *Cemetery of the Evergreens*, upon the E. line, is partly in Queens co. It is beautifully located upon a [illegible] was opened for interment in 1849.

The *Friends' Cemetery* lies near the city line, N. of Greenwood. It has a fine location; but, in accordance with the principles of the sect, no ornamental monuments are allowed to be erected in it.

The *Citizens' Union Cemetery*, incorp. in 1851, contains an area of 29 acres. The trustees allow the burial of persons of [illegible] the ground.

The first settlements were made under the Dutch Government, in 1625, by several families of French Protestants from near the river Waal, in Netherlands, who located near Wallabout Bay. They named their settlement "*Walloons*," and the bay "*Walloons Boght*," from which is derived its present name Wallabout.[2] Little progress was made in settlement for many years; and no [illegible] century the population was principally confined to several little hamlets scattered over the territory now embraced in the city. Since 1840 the increase of population and the growth of the city [illegible] part of the city of New York. In the summer of 1776, New York and vicinity became the theater [illegible] diately to New York, believing that the enemy would make this the next point of attack. Every effort was made to construct and strengthen the military defenses of the place. Strong works were erected in Brooklyn and other points upon Long Island, and large bodies of troops were [illegible] July 8; and on the 22d of Aug. they passed over to Long Island, to the number of 10,000 strong. They landed in New Utrecht, whence three roads led over the hills to where the Americans were [illegible] far to the right by the route of Flatlands. It was the design of Gen. Putnam, who commanded the American [illegible] troops early on the morning of the 27th on the middle road led to the belief that the main attack was to be made at that point. While intent upon this movement, it was found that the main army [illegible] of being surrounded by them. Attacked in front and rear, the Americans fought with bravery; but a part only succeeded in gaining their entrenchments. The loss of the Americans was more than 3,000 in killed, wounded, and prisoners; and of the enemy, less than 400. Gens. Sullivan, [illegible] after his surrender. The Americans withdrew to New York early on the 30th, under the personal direction of Gen. FLATBUSH[2]—was chartered by Gov. Stuyvesant in 1652, and its rights were confirmed by Gov. Nicoll, Oct. 11, 1667, and by Gov. Dongan, Nov. 20, 1685.[3] It was recognized by the State Government March 7, 1788. New Lots was taken off in 1852. It is the central town in the co., lying immediately s. of Brooklyn. A low, broad range of hills extends along the N. border, occupying nearly one-fourth of its surface. The remainder of the town is level. The soil is light and sandy, but productive. **Flatbush** (p. v.) is a long, scattered village, extending through the center of the town. It contains 4 churches,[4] the Erasmus Hall Academy,[5] and many elegant dwellings. **Greenfield** is a thinly settled village plat in the S. W. corner of the town. A part of Greenwood Cemetery lies in the N. W. corner. Galilee Cemetery lies E. of the village. The first settlement was made by the Dutch at an early period.

FLATLANDS[6]—was incorp. by patent under Gov. Nicoll, Oct. 4, 1667, confirmed by Gov. Dongan, March 11, 1685,[7] and recognized by the State Government March 7, 1788. It is the S. E. town in the co. The surface is very flat, as indicated by the name; and a considerable portion consists of salt marshes bordering upon Jamaica Bay.[8] Several small, marshy islands belong to the town.[9] **Flatlands** (p. o.) is a farming settlement. **Canarsie**[10] (p. o.) is a hamlet, upon the road leading to the bay. The first settlement was made by the Dutch, in 1636. Ex-Gov. Wouter Van Twiller had a tobacco farm in this town while it was under Dutch rule. There are 3 churches in town; 2 M. E. and Ref. Prot. D.

GRAVESEND[11]—was granted to English settlers, by patent under Gov. Keift, Dec. 19, 1645, and confirmed by Gov. Nicoll, Aug. 13, 1667, and by Gov. Dongan, Sept. 10, 1686.[12] It was recognized as a town March 7, 1788. It is the most southerly town in the co. The surface is generally very level. A beach and ridge of sand hills extend along the coast, and in the rear of these are extensive salt meadows. Coney Island is separated from the mainland by a narrow tidal current flowing through the marshes.[13] **Gravesend,** (p. v.,) near the center, is compactly built, and was formerly fortified with palisades. It was the county seat prior to 1686.[14] **Unionville** is a small settlement on the bay, near the W. line. **The Cove** is a settlement on Sheeps Head Bay. This town was settled before 1640, by English Quakers, from Mass. Lady Deborah Moody —a woman of rank, education, and wealth—was a prominent person in this enterprise. The liberal terms of their first grant were not fully regarded by the Dutch; but the prudence and firmness of Lady Moody eventually secured a good degree of respect and a more indulgent policy toward them. In 1655 the settlement was saved from destruction by North River Indians by a guard from the city. In 1656 the people petitioned for and obtained 3 big guns for their protection. In 1659 the town agreed to give Henry Brazier 500 gilders for building a mill, and

[1] The first prison ship was the Whitby; but this and another were burned, and, in April, 1778, the Jersey became the receiving ship for prisoners. The Hope and the Falmouth, anchored near by, were the hospital ships; and upon these most of the deaths occurred. It is reported that 11,500 prisoners died upon these ships during the war. The persistent barbarity and cold-hearted inhumanity practiced by the British toward these prisoners finds no parallel in the history of civilized nations; and the horrible sufferings of the prisoners in their foul dungeons, reeking with filth, disease, and the air of the charnel house carried through months and years, completely cast into the shade the lesser horrors of the Middle Passage, or of the Black Hole of Calcutta. The graves of these martyrs of freedom were uncovered while grading for the Navy Yard, in 1808. Twenty hogsheads of bones were collected, deposited in 13 coffins,—representing the 13 original States,—and, May 26, 1808, they were buried upon Hudson Avenue, near the Navy Yard, under the auspices of the Tammany Society. The land upon which they were interred was given for that purpose by John Jackson. Several years since, Benj. Romaine inclosed the remains in a vault, and, April 11, 1851, an association was incorp. for collecting funds to build a monument.

[3] In the first patent, Jan Snedicor, Arent Van Hatten, Johannes Megapolensis, and others, were named as commissioners, and in the second, Rev. J. Megapolensis, Cornelius Van Ruyven, J. P. Adrien Hegeman, Jan Snedicor, Jan Stryker, Frans Barents, overseer, Jacob Stryker, and Cornelius Janse Bongart were patentees.—*Patents*, IV. 48, 51.

[5] This institution, incorp. Nov. 17, 1787, was the first one chartered by the regents.

[6] Called "*New Amesfort*" by the Dutch, from a place in Holland.

[7] The patentees named in the first instrument were Elbert Elberts, Govert Lockermans, Roelofle Martens, Pieter Claes, Wm. Garrits, Thos. Hillebrants, Stephen Coertsen, and Coert Stevens; and those in the second were E. Elberts, R. Martens, Pieter Classen, Wm. Garretsen, Coert Stevens, Lucas Stevenson, and John Teunissen. The annual quitrent was 14 bushels of wheat.

[8] These marshes and flat lands produce large quantities of hay.

[9] The principal of these are Bergen Island, on the bay, and Barren Island, upon the coast. Upon the latter island is a large bone boiling establishment, to which place are removed all the dead animals from New York. The business is very extensive, and large quantities of hides, fat, bones, hair, and manure are annually produced.

[11] Named from the English town of this name, or from the deep sounds on the shore.—*Thompson's Hist.*, II. 169.

[12] The grantees named in the first patent were Lady Deborah Moody, Sir Henry Moody, Bart., Ensign Geo. Baxter, and Lieut. James Hubbard, those in the second were Thos. Delavall, Jas. Hubbard, Wm. Bound, sr., Wm. Goulding, and John Tilton: and those in the third were James Hubbard, John Tilton jr., Wm. Goulder, Nicholas Stillwell, and Jotham Gubbick. The quitrent was 6 bushels of wheat.

every man a day's work, with a team, or 2 days without, in building a dam. The first church (Ref. Prot. D.) was formed in 1655. Besides this, there are in town 2 M. E. churches.

NEW LOTS[1]—was formed from Flatbush, Feb. 12, 1852. It lies in the extreme e. part of the co. Its surface is generally level, the s. half being occupied by extensive salt meadows. **East New York** (p. v.) is a prospective city of "magnificent distances" near the N. line.[2] It contains a newspaper office, 4 churches, a manufacture of dyestuffs and colors, several shoe manufactories, and 1,000 inhabitants. **Cypress Hills** is a newly surveyed village near the N. E. corner. The Cypress Hills Cemetery, Cemetery of the Evergreens, and Cemetery of the Congregation of Emanuel (Jewish) are partly in this town. The first settlement was made by about 20 families from Holland and a few Palatinates, in 1654. In 1660 the portions of lands previously held in common were divided into lots and assigned to individuals. During the same year a horse-mill was erected. For many years the deacons of the church were chosen overseers of the poor, and from 1799 to 1812 the schools were under the direction of church officers. A detachment of 1,200 militia was stationed here in the War of 1812, in anticipation of an attack from the British. There are 5 churches in town.[3]

NEW UTRECHT—was incorp. by Gov. Stuyvesant in 1662, by Gov. Nicoll, Aug. 17, 1668, and by Gov. Dongan, May 13, 1686.[4] It was recognized as a town March 7, 1788. It lies upon the Narrows, in the w. part of the co. A range of low hills extends across the N. border, and the remaining part of the surface is level. The soil is a light, sandy loam, but for the most part is highly cultivated. **New Utrecht,** (p. v.,) in the s. part, is a small, compact village. In ancient times it was inclosed by a palisade as a defense against Indians and pirates. **Fort Hamilton,** (p. v.,) near the U. S. grounds, is a fine village, chiefly inhabited by persons doing business in New York. **Bath** is a place of summer resort on Gravesend Bay. **Bay Ridge** is a suburban village adjoining Brooklyn. Fort Hamilton is a U. S. fortification upon the bluff commanding the passage of the Narrows.[5] Fort La Fayette is a strong water battery built upon Hendricks Reef, 200 yards from the shore.[6] There are 6 churches in town.[7]

LEWIS COUNTY.

This county was formed from Oneida, March 28, 1805, and named in honor of Gov. Morgan Lewis. Slight changes were made in the boundary on the erection of Pinckney, in 1808, and of Wilna, in 1813. It lies mostly within the valley of Black River, N. of the center of the State. It is centrally distant 116 mi. from Albany, and contains 1,288 sq. mi. Its surface consists of the broad intervales which extend along the course of Black River, and uplands which rise upon the E. and W. The eastern half rises gradually to the E. border of the co., where it attains an elevation of about 1400 feet above tide. This part of the co. forms a portion of the great wilderness of Northern N. Y. The surface in many places is broken by low ridges or isolated masses of naked gneiss. The streams generally flow over rocky beds, and in places through wild ravines. The soil is a light, yellow, sandy loam and unprofitable for cultivation. In the eastern forests are great numbers of picturesque lakes, many of which are scarcely known except to hunters and fishermen. The streams flowing from the plateau are generally rapid, furnishing an abundance of water power.[1] Magnetic iron ore has been found interstratified with gneiss and red specular ore on the N. E. border of the co., and along the margins of the streams is an abundance of iron sand. At the junction of the gneiss and white limestone in Diana are a great number of interesting minerals.[2]

The W. side rises from the valley of Black River by a series of terraces to near the center of the W. half of the co., whence it spreads out toward Lake Ontario. These terraces are occasionally broken by oblique valleys from the N. W. The summit is 1500 to 1700 feet above tide. The intervale along the river, and the banks which immediately border upon it, are underlaid by Black River limestone. Next above this, in an irregular terrace, rises the Trenton limestone, 300 feet thick in the N. part of the co. and gradually diminishing toward the S. This limestone is very compact and strongly resists the action of the elements. In many places it presents the face of steep declivities approaching the perpendicular, and the streams from the W. plateau generally flow over this formation in a single perpendicular fall. This rock underlies an extremely fertile and nearly level tract of 1 to 3 mi. wide. Above it, on the W., the strata of the Utica slate and Lorraine shales rise about 500 feet higher, and from the summit the surface spreads out into a nearly level region, with its waters flowing both toward the E. and W.[3] This range in Lewis co. is known as Tug Hill. The soil in the limestone region is sometimes thin, but is everywhere productive. Near the foot of Tug Hill is a strip of stiff clay a few rods wide, extending the whole length of the co., and marked by a line of springs and swamps. The soil upon the slate is deep and well adapted to grazing, but, from its great elevation, it is liable to late and early frosts. Upon the summit of the slate table lands are extensive swamps, which give rise to streams flowing into Black River, Lake Ontario, Oneida Lake, and the Mohawk. Drift deposits are scattered promiscuously, and sometimes lie at a great depth, more particularly upon the northerly sides of the oblique valleys before mentioned.

The streams which rise on the summit of Tug Hill in many places flow through ancient beaver meadows, and upon the brow of the hill they have invariably worn deep ravines into the slates and shales, in some instances 3 or 4 mi. in length and 100 to 300 feet deep. Chimney Point and Whetstone Gulf, in Martinsburgh, are localities of this kind. There are but few ravines in the limestone terraces, though the Deer River Falls, near Copenhagen, are in a gorge worn in this rock. A thin layer of Potsdam sandstone rests immediately upon the gneiss in Martinsburgh. Waterlime of excellent quality has been made from the lower strata of Black River limestone, and veins of lead ore have been worked in the upper part of the Trenton limestone in Martinsburgh and Lowville.[4] The outline of the hills readily indicates the character of the underlying rocks.[5]

[2] [illegible] specular, [illegible] spar, pyroxene, [illegible] [illegible] [illegible]

The s.w. part of the co. is drained by Fish Creek and its branches, and the headwaters of the Mohawk. Salmon River rises upon the w. border, and the Oswegatchie and Indian[1] Rivers have their rise in the N.E. The principal tributaries of Black River are Moose[2] and Beaver, Deer, Otter,[3] Independence, and Fish Creeks, and Fall Brook, on the E.; and Sugar River, Mill, Hawkins, and Whetstone Creeks, Roaring Brook, Lowville Creek, and Deer River upon the W. Several mineral springs are found within the co.[4] Spring grains are readily cultivated, but the soil is particularly adapted to pasturage, dairying forming the principal pursuit of the people. Droughts seldom occur; but the uplands are noted for their deep snows. Within a few years, several extensive establishments have been erected upon Black, Moose, Beaver, and Deer Rivers, for the manufacture of leather, paper, lumber, and articles of wood. Two furnaces for the manufacture of iron from the ore are located near the N. border.

The county seat is located at Martinsburgh. A wooden courthouse and jail were built here in 1810–11, upon a site given by Gen. Martin.[7] The present clerk's office was erected by citizens of Martinsburgh in 1847. Active efforts were made at an early day, and renewed in 1852, to obtain the removal of the co. seat to Lowville, and a fine edifice was built at that place for the courts, in the hope of securing their removal. The co. poorhouse is located upon a farm of 59 acres 1 mi. W. of Lowville. The average number of inmates is about 90. The institution is well managed in regard to economy, neatness, and the health of the inmates. The only internal improvement in the co. is the Black River Canal, connecting Black River below Lyons Falls with the Erie Canal at Rome.[8] From Lyons Falls the river is navigated to Carthage, a distance of 42½ mi., by small steamers. Three newspapers are now published in the co.[9]

This co. is entirely within Macomb's Purchase, and includes a part of Great Tract No. IV.,[10] most of the Chassanis Purchase,[11] Watson's West Tract,[12] the Brantingham Tract,[13] and a small part of John Brown's Tract,[14] on the E. side of the river: and 4 of the "Eleven Towns,"[15] 5 of the Thirteen Towns of the Boylston Tract,[16] Constable's Five Towns,[17] and Inman's Triangle[18] on the W.

The first settlers came from New England and settled at Leyden in 1794. The fame of the

"Black River country" spread through Mass. and Conn., and within the next ten years the country between Tug Hill and the river rapidly filled up with a laborious, intelligent, and enterprising population. A romantic project of settlement formed by refugees of the French Revolution, in which Arcadian dreams of rural felicity were to be realized, was abandoned after a short experience of the real hardships of pioneer life. Except an expensive but ineffectual attempt by Brown to settle his tract, toward the close of the last century, little improvement was made E. of the river until about 1820; and this section has at present less than one-fourth of the population, and a still less proportion of the wealth, of the co. A systematic effort at settlement of the extreme W. part was first made in 1840–46, under Seymour Green and Diadate Pease, agents of the Pierrepont estate. Much of this region is still a wilderness.

CROGHAN[1]—was formed from Watson and Diana, April 5, 1841, and a part of New Bremen was taken off in 1848. It lies E. of Black River, in the N. part of the co. The surface has an inclination toward the W. and N., and in the central and E. parts it is broken and hilly. Oswegatchie and Indian Rivers rise in the town and flow northerly into Diana; and Beaver River forms a portion of its S. boundary. In the E. part of the town are several lakes. The soil is light and sandy, and along the river intervales it is moderately fertile. The town is thinly settled along Black and Beaver Rivers, but in the N. and E. it is still a wilderness. **Croghan,** (p. o.,) on Beaver River, and **Naumburg,**[2] (p. o.,) in the W. part of the town, are small villages. **Indian River,** (p. o.,) N. of the center of the town, and **Belfort,** on Beaver River, are hamlets. Settlement commenced before 1830, under P. S. Stewart, agent for Le Ray. Many of the settlers are French and Germans. There are 5 churches in town.[3]

DENMARK[4]—was formed from Harrisburgh, April 3, 1807. It lies W. of Black River, on the N. border of the co. Its surface descends to Black River on the E. by a succession of irregular terraces. Deer River flows through the town, and upon its course are several falls, affording an abundant water power. The High Falls, one mi. below Copenhagen, descend 160 feet, at an angle of about 80°, and are celebrated for their picturesque beauty. Kings Fall, 2 mi. below, has a descent of about 40 feet. The E. part of the town is covered with deep deposits of drift. Near the mouth of Deer River are extensive flats; and Black River is bordered by a cedar swamp. The soil is very fertile. **Copenhagen,**[5] (p. v.,) on Deer River, in the W. part, contains 3 churches and several manufactories.[6] Pop. 505. **Denmark,** (p. v.,) in the E. part, contains about 50 houses; and **Deer River,** (p. v.,) on the river of the same name, 2 mi. from its mouth, 35.[7] The first settlement was made in 1800, by Jesse Blodget.[8] The census reports 6 churches in town.[9]

DIANA—was formed from Watson, April 16, 1830, and a part of Croghan was taken off in 1841. This is the extreme N. E. town in the co. Its surface is level, or gently rolling. In the E. part are 2 isolated hills, 300 to 500 feet above the surrounding surface. The principal streams are Oswegatchie and Indian Rivers and their branches. Bonaparte[10] and Indian Lakes, in the S. part, and Cranberry, Legiers, and Sweets Lakes, in the E., are the principal bodies of water. The greater part of this town is yet a wilderness. The soil is light and sandy. Iron ore is found in the N. and E. parts, and coarse, crystalline marble, of a sky-blue tint, on the banks of Indian River, near Natural Bridge. **Sterlingbush,**[11] (p. v.,) in the W. part, contains 15 houses; and **Harrisville** 12. **Blanchards Settlement** (Diana Center p. o.) is in the S. part. **Diana** is a p. o., and **Alpina**[12] is a hamlet. There are 2 churches in town, (Bap. and M. E.,) but no church edifice.

GREIG[13]—was formed from Watson, April 5, 1828, as "*Brantingham.*" Its name was changed Feb. 20, 1832. It is the S. E. corner town of the co. Its surface is rolling in the W., but it is broken, rocky, and in some places hilly, in the E. The principal streams, all tributaries of Black River, are Moose River, Otter, Stony, and Fish Creeks, and Cole and Fall Brooks. The scenery

[1] Named in honor of Col. Geo. Croghan. It is locally pronounced "*Crō'gan.*" Its proper pronunciation is "*Crawn.*"

[2] Locally known as the "*Dutch on Schmeel.*"

[4] This town embraces Township No. 5, or Mantua, of the Eleven Towns.

[5] Originally called "*Manager Mills,*" from Nathan Manger, one of the early settlers.

[6] About 1820 the manufacture of cordage was introduced here on an extensive scale. But it has recently been abandoned.

[7] Abel Leach was the first settler at this place and it was originally known as "*Leachville.*"

[8] Among the early settlers were Freedom Wright, Major J. Crary, Robert Howe, Asa Pierce, Ichabod Loomis, Lewis Graves, Jonathan Bartlett, J. Finch, and Andrew M.

[9] Bap. organized in 1810. Cong., M. E., Univ., and 2 Union.

[10] Bonaparte Lake was so called in honor of Joseph Bonaparte, who built a log house upon its banks for the accommodation of himself and friends while upon hunting and fishing excursions, during his stay at his summer residence at Natural Bridge.

[11] Formerly called "*Lewisburg.*" It owes its present name to a furnace built here in 18—.

[12] An iron furnace was built here in 1847 by Stebbins & Barraclough, Swiss capitalists, and the place has grown up around it.

along Moose River is celebrated for its wildness and beauty. The greater part of the [illegible] a wilderness. In the E. part are several small lakes, which constitute some of the [illegible] of fishermen. The soil is principally a light, sandy loam. Iron ore and [illegible] Brantingham Lake is a sulphur spring. Lumber, leather, and paper are made, and on Otter Creek is an extensive match box factory. **Lyonsdale,**[1] on Moose River, [illegible] **Greig** and **Brantingham,** near Black River, are p. offices. In 1792 the French [illegible] Rodolph Tillier, settled on the Chassanis Tract, near Black River, below the High Falls. The only church in town (Presb.) was formed in 1807.

HARRISBURGH[2]—was formed from Lowville, Champion, (Jefferson co.) and Mexico, (Oswego co.) Feb. 22, 1803. Denmark was taken off in 1807, and a part of Pinckney in 1808. It lies upon the slate hills and limestone terraces N. W. of the center of the co. Its general inclination is toward the N. E., its S. W. corner being 300 to 500 feet above Black River. Its surface is generally rolling, but in the S. W. it is moderately hilly. Deer River and its tributaries are the principal streams. The soil is generally a rich loam largely intermixed with disintegrated limestone and slate. **Harrisburgh,** in the N. E. part, and **South Harrisburgh,** in the S., are p. offices. Settlement commenced a short time previous to the War of 1812.[3] The first religious services were conducted by Elder Amasa Dodge, a Free Will Baptist minister. There are 4 churches in town.[3]

HIGH MARKET[6]—was formed from West Turin, Nov. 11, 1852. It lies upon the elevated slate region W. of Black River, a little S. of the center of the co. Its general inclination is toward the S. E. Its surface is rolling in the S., but broken and moderately hilly in the N. and W. Its streams are Fish Creek and its branches, the principal of which are Big and Little Alder Creeks. The soil is a loam mixed with disintegrated slate, and is best adapted to pasturage. **High Market** (p. o.) is in the S. E. part of the town. Most of the town is still unsettled. Among the first settlers were Alfred Hovey, L. Fairchild, John Felshaw, Sol. Wells, and Benj. Martin.[7] A large proportion of the people are of Irish nativity.[8] There are no churches in town.

LEWIS[9]—was formed from West Turin and Leyden, Nov. 11, 1852. It lies upon the elevated plateau in the S. angle of the co. Its surface is generally rolling, but in the W. part it is broken and hilly. Its entire surface is 700 to 1200 feet above the valley of Black River. The principal streams are Fish Creek, the W. branch of the Mohawk, and the W. branch of Salmon River. Most of the town is yet an uninhabited wilderness. The soil is generally a sandy loam, moderately fertile and best adapted to grazing. Owing to the elevation of the town, spring is late, autumn early, and snows deep. **West Leyden,** (p. v.) situated on the headwaters of the Mohawk, in the E. part of the town, contains about 20 houses. Settlement was commenced about 1800; but the present inhabitants of the town are mostly new comers, of German nativity.[10] The first church (Presb.) was organized in 1826. There are now 4 churches in town.[11]

LEYDEN[12]—was formed from Steuben, (Oneida co.) March 10, 1797. Brownville (Jefferson co.) was taken off in 1802, Boonville (Oneida co.) in 1805, a part of Wilna (Jefferson co.) in 1812, Watson in 1821, and a part of Lewis in 1852. It lies on the W. bank of Black River, upon the S. border of the co. Its inclination is toward the E., the W. border being about 500 feet above the river. Its surface is undulating. Its principal streams are Sugar River and Moose Creek.[13] The soil is a fertile loam mixed with disintegrated slate and limestone. **Port Leyden,** p. v., on Black River, has a population of 192; **Talcottville,** (Leyden p. o.) in the center of the town, of 50; and **Leyden Hill,** in the N. part, of 40. Settlement began in 1794,[14] under the owners

of the Triangle. A Cong. church was formed at a very early period, by Rev. —— Ely, and a Bap. church in 1798. There are now 6 churches in town.[1]

LOWVILLE[2]—was formed from Mexico, (Oswego co.,) March 14, 1800, and a part of Harrisburgh was taken off in 1803. It lies upon the w. bank of Black River, a little s. of the center of the co. Its w. border is about 400 feet above the river. Its surface is gently rolling. A wide intervale, the s. part of which is swampy, extends along the course of the river. The soil is a deep, fertile loam intermixed with disintegrated limestone.[3] A mineral spring is found near the s. border of the town. **Lowville,** (p. v.,) incorp. under the act of 1847,[4] is situated near the s. border of the town. It contains 5 churches, an academy,[5] 2 printing offices, and a bank. Pop. 908. **West Lowville,** (p. o.,) in the w. part of the town, **Stows Square,** about 3 mi. s. of Lowville, and **Smiths Landing,** on Black River, are hamlets. Settlement was commenced about 1797, under Silas Stow, agent for N. Low, and the town was rapidly filled with immigrants from New England.[6] The first church (M. E.) was founded in 1804. There are now 6 churches in town.[7]

MARTINSBURGH[8]—was formed from Turin, Feb. 22, 1803, and a part of Turin was annexed in 1823. It lies upon the w. bank of Black River, near the center of the co. It has an easterly inclination, its w. border being nearly 1000 feet above the river valley. Its surface is rolling, with a wide, level intervale bordering upon the river. The principal streams are Martins and Whetstone Creeks.[9] The soil is a deep, fertile loam, except along the river, where it is sandy. Near the head of Whetstone Gulf is a sulphur spring. **Martinsburgh** (p. v.) is situated on Martins Creek, near the center of the town. It contains the co. buildings, 3 churches, and a newspaper office. Pop. 210. **West Martinsburgh,** (p. v.,) in the s. part of the town, has a pop. of 164. **Glensdale,** (p. o.,) in the s. e. part, is a hamlet of about 12 dwellings. Settlement was begun by Gen. Walter Martin, at Martinsburgh, in 1801.[10] The first church (Presb.) was organized in 1804, by Rev. —— Norton. There are 7 churches in town.[11]

MONTAGUE[12] (Mon-ta-gu′)—was formed from West Turin, Nov. 14, 1850. It lies near the center of the w. border of the co. Its inclination is toward the s. w., and its elevation is 1200 to 1600 ft. above tide. Its surface is generally rolling, but in some places it is broken and hilly. It is watered by numerous small streams, flowing into Deer River. The s. branch of Salmon River flows through the s. w. corner. Upon lot 22, in the s. w. part, is a sulphur spring. The soil is a moderately fertile, sandy and gravelly loam. **Gardners Corners** (Montague p. o.) is in the s. part of the town. Settlement commenced in 1846, under the agency of Diadate Pease, agent of the Pierrepont estate. There are 2 churches in town; M. E. and Bap.

NEW BREMEN was formed from Watson and Croghan, March 31, 1848. It lies upon the e. bank of Black River, s. of the center of the co. Its surface is level in the w., but rolling, broken, and rocky in the e. It is watered by several tributaries of Black River, the largest of which is Beaver River, on the s. boundary. The e. part is sparsely settled. The soil is a light, sandy loam. **Dayansville**[13] (New Bremen p. o.) is in the w. part of the town. Pop. 200. Settlement was commenced in 1798, by Samuel Illingsworth and some French families.[14] In the w. part is a settlement of Germans, and in the s. one of French. There are 4 churches in town.[15]

2 This town embraces No. 11 of the Eleven Towns. It was named from Nicholas Low, of N. Y., the early proprietor.

3 In the Transactions of the Albany Institute, the sculptured remains of lead and bone implements were described and figured.

4 The bank was chartered Feb. 27, 1852. Extensive efforts were made to secure the location of the county seat in this village, and a court house, 2 stories high, now used as a town hall, was erected for that purpose in 1812.

5 The Lowville Academy has for many years occupied a high rank. Its 50th anniversary was celebrated July 25, 1855.

6 Among the early settlers were Jonathan Rogers, Ebud Stephens, Moses Waters, A. Wilcox, B. Hillihan, Daniel Kelley, Isaac Perry, J. H. and S. Leonard, John Schull, Wm. Darrow, Jas. Bailey, John Bush, A. F. and J. Snell, David and Benj. Rice, and Ebenezer Rose. The first child was that of Ebud Stephens. The first inn was kept by Capt. Rogers, and the first store by Fortunatus Eager. The first mill was built by D. Kelley.

7 Bap. Cong. Episcopal, M. E. and Presb.

8 The town embraces lots 1 to 4, of Great Lot 1 of the Boylston Tract, and Porcia and a part of Lucretia, of Constable's Towns.

9 Martins Creek was formerly called "*Roaring Brook.*" At Chimney Point, near the center of the town, this stream has worn a channel through the slate and limestone, to the depth of 200 to 250 feet. This remarkable chasm above the falls is narrow, with precipitous sides, and in many places is so dark that the stream can be seen only between the ledges. Whetstone Gulf, upon Whetstone Creek, in the s. part of the town, is a similar chasm.

10 Among the first settlers were Ebud Baldwin, Mrs. Richard Arthur, and Silas Beebee. Luther and Seth N. Cheney, Eli Rogers, Ebud Stephens, Gains Alexander, Stephen Sterns, Joseph Skinner, Charles Doty, A. Cheney, D. Ashley, S. Gurney, and D. Stanhope, and Orrin Miller. W. Morton built the first mills, and in 1807 a paper mill.

PINCKNEY[1] was formed from Harrisburgh and "*Harrison*," [illegible] Feb. 12, 1808. It lies upon the highlands in the N. W. corner of the co., and has an average elevation of 1300 ft. above tide. It forms the watershed between Deer River and Sandy Creek, the head branches of which constitute the principal streams. A series of swamps extend along the E. border. In the town are several mineral springs, one of which has acquired considerable local notoriety for its medicinal qualities. The soil is a light, slaty loam upon the hills, and a deep, black loam in the valleys. **Pinckney, New Boston, Barnes Corners,** [illegible] **Cronks Corners** are p. offices. Settlement was commenced in 1804, under Abel [illegible] M. Henderson.[2] The first church (Bap.) was formed in 1810. There are now 4 churches in town.[3]

TURIN was formed from Mexico, Oswego co., March 14, 1810. [illegible] off in 1803, another portion was annexed to Martinsburgh in 1823, and West Turin was taken off in 1830. It lies upon the W. bank of Black River, S. of the center of the co. Its W. boundary is 800 to 1000 ft. above the river, giving to the town an easterly inclination. The surface is level, except near the W. border, where it ascends to the slate hills, and in the E., where it descends to the river intervale. The soil is generally a deep, fertile loam mixed with disintegrated slate and limestone. **Turin,** (p. v.,) situated in the S. part, contains 3 churches and several manufactories.[4] Pop. 438. **Houseville,**[5] (p. v.,) in the N part, has a pop. of 90. The first settlement was made about 1798, by Nathaniel Shaler, of Middletown, agent of Wm. Constable and part owner, and the town was rapidly settled by immigrants from New England.[6] The first church (Presb.) was organized Sept. 19, 1802, by Rev. John Taylor. There are 6 churches in town.

WATSON[8]—was formed from Leyden, March 30, 1821. "*Brantingham*" (now Greig) was taken off in 1828, Diana in 1830, a part of Croghan in 1841, and a part of New Bremen in 1848. It lies upon the E. bank of Black River, and extends from near the center of the co. to its E. border. Its surface is level or gently rolling in the W. part, but in the central and E. parts it is more hilly and broken. It is watered by Beaver River, Independence Creek, and several smaller branches of Black River. The central and E. parts are yet covered with unbroken forests; and a large tract upon the extreme E. border, constitutes a portion of the far famed "John Brown's Tract." In the recesses of these forests are numerous beautiful lakes that are scarcely known except to hunters. Chases Lake, on the S. border, is noted for its beautiful scenery and is much visited by tourists. The soil is light and sandy. **Watson,**" (p. o.,) situated on Black River, in the W. part of the town, is a hamlet. The early settlers located along the river, and settlements were not made in the interior until about 1815.[10] The first church (M. E.) was organized in 1820. There are 3 churches and 1 church edifice (M. E.) in town.[11]

WEST TURIN was formed from Turin, March 25, 1830. Osceola was [illegible] 2d, 1844, Montague in 1850, and High Market and a part of Lewis in 1852. It lies upon the W. bank of Black River, S. of the center of the co. Its inclination is toward the E., its surface rising by successive terraces from the intervale of Black River to the hills 800 feet above. Its streams are Sugar River, which flows easterly through near the center of the town, and numerous smaller creeks and brooks. Lyons Falls, upon Black River, plunge over a ledge of gneiss rock 63 feet in height, at an angle of about 60°.[12] These falls form an excellent water power but little used.

LIVINGSTON COUNTY.

This county was formed from Genesee and Ontario, Feb. 23, 1821. A portion of Allegany was annexed in 1846, and another portion in 1856. It occupies a nearly central position in the w. half of the State. It is centrally distant 205 mi. from Albany, and contains 655 sq. mi. Its surface is an upland, rolling in the N. and hilly in the S. The hills upon the S. border are 1,000 to 1,200 ft. above the valleys and 2,000 to 2,200 ft. above tide. From their summits the surface declines toward the N., the extreme N. border being 500 to to 800 ft. above tide. The slopes are usually smooth and gradual, except along the banks of the streams; and nearly every acre of land in the co. is arable.

The streams generally flow in deep ravines. They are usually bordered by steep, and sometimes precipitous, hillsides. The principal stream is Genesee River, flowing N. E. through the W. part of the co. In the S. its course is between steep and often precipitous banks, but further N. it is bordered by broad and beautiful intervales.[1] Its tributaries are Conesus Creek, Fall Brook, and Canaseraga Creek, from the E., and Beards, White, and several other small creeks, from the W. Coshaqua Creek is a tributary of the Canaseraga. Hemlock and Honeoye Outlets flow along the E. border, and a few tributaries of the Susquehanna take their rise in the S. part. Conesus Lake, near the center, and Hemlock Lake, along the E. border, occupying long, narrow valleys, are the only considerable bodies of water.

The underlying rocks, commencing upon the N. border, are the waterlime of the Onondaga salt group, the Onondaga and corniferous limestones, Marcellus and Hamilton shales, Genesee slate, and Portage shales and sandstones. The limestones of the N. are extensively quarried for lime and building stone; and the sandstones of the Portage group furnish excellent building stone and flagging. The soil, derived from the disintegration of these rocks, in all the elements of fertility has no superior in the State. Until the commencement of the ravages of the midge, wheat was the staple production; but it has been principally superseded by the spring grains. Broomcorn is largely cultivated along the Genesee Flats; and considerable attention is paid to cattle and sheep growing and dairying in the S. part.

The county seat is located at the village of Geneseo. The courthouse is beautifully situated upon a fine lot in the N. part of the village.[2] The jail, in the rear of the courthouse, is an old building, without means of ventilation, and it is impossible properly to classify the prisoners. The clerk's office is a small fireproof building upon the courthouse lot. The co. poorhouse is located upon a farm of 118 acres about 1 mi. E. of Geneseo. Its average number of inmates is 107, supported at a weekly expense of 75 cts. each. The farm yields a revenue of $2,000. A school is taught 9 or 10 months in the year. The house is well constructed and is very well kept.

The Genesee Valley Canal extends along the valley of the Genesee from the N. bounds of the co. to Mt. Morris; thence it turns S. E. to Coshaqua Creek and up the valley of that stream to Nunda, and thence S. W. to the Genesee at Portage, where it crosses the river upon a wood aqueduct supported by stone piers. The Dansville Branch Canal extends from Mt. Morris S. E. to Dansville.[3] The Canandaigua & Niagara Bridge Branch of the N. Y. Central R. R. extends through Caledonia. The Buffalo & N. Y. City R. R. extends S. E. through Portage and Nunda. The Buffalo, New York & Erie R. R. extends S. E. through Caledonia, Avon, Livonia, Conesus, and Springwater. The Genesee Valley R. R. extends S. through Avon, Geneseo, and Groveland to Mt. Morris.

Five newspapers—one daily, three weekly, and one monthly—are now published in the co.[4]

[4] *The Moscow Advertiser and Genesee Farmer*, the first paper published in the co., was commenced at Moscow in 1817 by Hezekiah Ripley. About 1821 it passed into the hands of James Dean, who removed it to Geneseo and changed the name to *The Livingston Republican*. In 1830 Asahel M. Work and Allen Warner became proprietors; and it was successively published by Warner, Benjamin Porter, Hugh Work, H. Kenyon, and Richard M. Mott. In 1846 Work became sole proprietor. He was succeeded in 1847 by D. S. Curtiss. In 1857 the publication was suspended. It was soon after revived, and published for a short time by Hugh Harkness. He was succeeded by John Kenyon, who published it until 1870, when it was discontinued.

The Livingston Journal was commenced at Geneseo in 1822 by Chauncey Morse. Asahel Harvey was subsequently

Before the advent of the whites, this co. was the seat of several of the principal villages of the Seneca Nation. Considerable advances had been made in the arts of civilization, and a large quantity of land had been cleared and was cultivated. Corn, apples, and peaches were extensively produced. The orchards were destroyed, and the whole region was laid waste, by Gen. Sullivan, in 1779. The co. was included in the Phelps and Gorham Purchase, and in the Morris Reserve.[1] The latter tract was subdivided into several tracts, generally distinguished as separate patents.

In Sept. 1797, a treaty was held with the Indians at Geneseo, at which they ceded all their lands in this co. to the whites, except several small reservations.[2] The first settlements were made about 1790, previous to the extinguishment of the Indian title. The most prominent of the early settlers were James and Wm. Wadsworth, from Durham, Conn., who located at Geneseo, June 10, 1790. They were large landowners, and by a wise and liberal policy they greatly facilitated the settlement of the surrounding region. The greater part of the early settlers were immigrants from New England. York and Caledonia were settled principally by a colony of Scotch.

AVON—was formed, as "*Hartford*," in Jan. 1789. Its name was changed in 1808. Rush was taken off in 1818. It is the center town upon the N. border of the co. Its surface is a rolling and moderately hilly upland, terminating in flats on Genesee River. Deming Hill, on Lot 192, is the highest point in town. The principal stream is Conesus Creek, or Outlet, a tributary of Genesee River. The soil upon the uplands is a sandy and gravelly loam intermixed with clay, and on the flats, a deep, rich alluvium. **Avon,** (p. v.,) in the W. part, a station on the G. V., and B., N. Y. & E. R. R's., celebrated for its medicinal springs,[3] was incorp. June 13, 1853. It contains 3 churches, 5 large hotels, and 879 inhabitants. **East Avon,** (p. v.,) near the center, contains 2 churches and about 35 houses. **South Avon,** (p. o.,) in the S. part, contains 9 houses. **Littleville,** 1½ mi. S. of Avon, contains a church, gristmill, furnace, and 23 houses. The first

associated with him. In 1829 Levi Hovey became proprietor, and it was successively published by Benj Dennison, H. F. Evans, Evans & Woodruff, and Wm. J. Tolknet. Its publication was suspended in 1834 or '35. In the fall of 1835 the establishment was purchased by David Mitchell and W. H. Kelsey, who revived the paper under the name of

The Livingston Democrat. It was continued until 1837, when its publication was suspended. In the fall of that year S. P. Allen became proprietor of the press, and revived the paper under the name of

The Livingston Republican. In Sept. 1846, it passed into the hands of John M. Campbell; and was successively published by Joseph Kershner and Chas. E. Bronson. In 1849 James T. Norton became proprietor and is its present publisher.

The Dansville Chronicle was commenced in 1850 by David Mitchell and Benj Dennison. Dennison soon retired, and its name was changed to

The Village Pearl; it was soon after discontinued.

The Western New Yorker was published at Dansville a short time in 18— by A. Stevens & Son. It was succeeded by

The Dansville Whig, published by Geo. W. Stevens. Chas. W. Dibble was the publisher about 1 year, when it again passed into the hands of Stevens, who in 1848 changed the name to

The Dansville Courier. In 1849 or '50 it passed into the hands of H. D. Smead, who changed it to

The Dansville Democrat. It subsequently passed into the hands of Geo. A. Sanders, who removed it to Geneseo and changed the name to

The Genesee Democrat. In Oct. 1857, it was returned to Dansville and published as

The Livingston Sentinel by H. C. Page, the present publisher.

The Living Gen Courier was commenced at Geneseo in 1834 by C. Dennison. In 18-2 it passed into the hands of Henry F. Evans, and was discontinued in 1837 or '38.

The Lo—ville Courier was published at Geneseo in 1832 by A. Bennett.

The Mount Morris Spectator was commenced in 1834 by Hugh Harding. In 1848 he united it with The Livingston County Whig, and changed its name to

The Livingston Union, under which title it is still published by Hugh Harding.

The Dansville Times was published in 1855 by D. C. Mitchell.

The Avon Gazette was started in 1841 by Isaac G. Wisner. It was continued about 1 year, when it was removed to Mount Morris and its name changed to

The Genesee Valley Recorder. It was discontinued about 1843.

The Livingston Republican was published in 1842 by David Lunchild.

The Livingston County Whig was started at Mount Morris in 1843, by Geo. B. Phelps. It subsequently passed into the hands of James T. Norton, at Lima 1848 was sold to Hugh Harding, who united it with The Mount Morris Spectator.

The Geneseo Democrat was started at Geneseo in 1843 by Gilbert F. Shankland. It was removed to Nunda in 1847, and in 1848 to Ellicottville, Cattaraugus co.

The Livingston Expositor, pro. mo., was published at Mount Morris in 1843 by J. G. Wisner.

The Mount Morris Daily Whig was issued from the office of The Livingston County Whig in June, 1846, and discontinued in August following.

The Cuylerville Liberator was started at Cuylerville in 1847 by Franklin Cowdery. In 1848 it passed into the hands of Peter Lawrence, who soon after removed it.

The Dansville Chronicle was started in June, 1848, by Richardson & Co., and was discontinued in 1851.

The Nunda Democrat was started at Nunda in 1848 by Milo D. Chamberlain. It was soon discontinued.

The Freeman, pro., was started at Dansville in 1849 by J. R. Trembly, and continued about 2 years.

The Dansville Herald was published in 1849 by H. L. & L. H. Rann. In 1857 it was merged in The Livingston Sentinel.

The Nunda Telescope was started in 1850 by Chas. Atwood. It was continued about 1 year.

The Nunda Times was started in Jan. 1852, by N. T. Hackstaff. In July following the office was burned and the paper discontinued.

The Lima Weekly Leader was started at Lima in 1853 by A. H. Tilton and M. C. Miller. It was subsequently published by Raymond & Graham and by S. M. Raymond, who changed its name to

The Genesee Valley Gazette. It was discontinued about 1856.

The New Era was commenced at Hunts Hollow in 1854 by David B. and Merritt Galley, boys, respectively 15 and 17 years of age. In 1855 it was removed to Nunda and its name changed to

The Nunda Advertiser. It was discontinued in about 1 year.

The Letter Box, pro., started at Glen Haven, Cayuga co., in 1857, by J. M. Jackson and Miss H. N. Austin, was removed to Dansville in 1858, and is now published by M. W. Simons.

The Dansville Daily Times was commenced in May, 1859, by W. J. Lance, publisher. In June of the same year its title was changed to

The Dansville Daily Register; and it is still published by Lance & H. C. Page, editor.

[1] The W. boundary of the Phelps and Gorham Purchase was a line extending due N. from the Penn. line to the junction of Genesee River and Canaseraga Creek, and thence northerly along Genesee River to the N. bounds of the co.

[2] The Indian Reservations within the limits of the co. were: Canawagus, containing 2 sq. mi. on the W. bank of Genesee River, W. of Avon. Little Beards Town, 1 Pg. Tract, containing 1 sq. mi. on the W. bank of the Genesee, opposite Geneseo. Squakie Hill, containing 284 acres on the W. bank of the Genesee, N. of Mt. Morris. Big Tree, or Gardeau Reservation, of 28[illegible] sq. mi., lying one half in the co. S. of Mt. Morris. See p. 741. The Indian title to these lands have all since been extinguished.

[3] These springs, two in number, are about one fourth of a mile apart, and are located about 1 mi. S.W. of the village. The lower spring discharges about 54 gallons of water per minute.

settlement was made in 1785.[1] The first church (Presb.) was organized in 1795; Rev. Daniel Thatcher was the first preacher. There are 6 churches in town.[2]

CALEDONIA—was formed, as "*Southampton*," March 30, 1802. Its name was changed April 4, 1806. A part of York was taken off in 1819. It is the N. W. corner town of the co. The surface is level or gently undulating, and a considerable portion of it is stony. Genesee River forms the E. boundary. Caledonia Spring, in the N. part, covers an area of about 2 acres; and the outlet forms a good water-power, a few rods N. of the spring. The soil is a clay loam, underlaid by limestone.[3] In the S. part is a valuable quarry of limestone, yielding excellent lime and a fine quality of building stone. **Caledonia,** (p. v.,) in the N. part, a station on the B., N. Y. & E. R. R. and C. & N. B. Branch of the N. Y. C. R. R., contains 3 churches, a grist and saw mill, a brewery, and 623 inhabitants. The first settlement was made about 1797, by —— Peterson, a Dane, and —— Brooks, an Englishman.[4] The first church (Presb.) was organized in 1805; and the first settled preacher, Rev. Alexander Denoon, was installed Aug. 17, 1808.[5]

CONESUS—was formed from Livonia and Groveland, as "*Freeport*," April 12, 1819. Its name was changed to "*Browersville*," March 26, 1825, and to Conesus, April 15, 1825. It is the central town upon the E. border of the co. Hemlock Lake forms the E. and Conesus Lake a part of the W. boundary. Its surface is hilly. The Marrowback Hills in the E. part, W. of Hemlock Lake, rise to about 1,200 feet above it. A deep valley extends S. E. from near the center into Springwater, through which the B., N. Y., & E. R. R. passes. The principal stream is Mill Creek. The soil is generally a clay loam. **Conesus Center** (p. v.) contains 2 churches, a grist and saw mill, and about 40 houses. **Conesus** (p. o.) is a R. R. station. **Foots Corners** and **Union Corners** are hamlets. Settlement was commenced at the head of Conesus Lake, in 1794 or '95, by James Henderson, from Penn.[6] The first church (Meth.) was organized in 1814.[7]

GENESEO—was formed in Jan. 1789. It is an interior town, lying N. of the center of the co. Its surface is undulating, with an abrupt declivity of 200 to 300 feet toward the river, on the W. Genesee River, forming its W. boundary, is bordered by fertile flats of an average width of about half a mi. The other principal streams are Fall Creek, and several small brooks that flow W. into the river and E. into Conesus Lake. On Fall Creek, S. of the village, is a perpendicular fall of 70 feet. The soil is clay and clay loam. **Geneseo,**[8] (p. v.,) a station on the G. V. R. R., was incorp. April 21, 1832; it contains the co. buildings, 5 churches, the Geneseo Academy,[9] 2 banks, a library, gristmill, furnace, and machine shop, and about 2,000 inhabitants. MADISON COUNTY.

THIS county was formed from Chenango, March 21, 1806, and named in honor of President Madison. That part of Stockbridge E. of Oneida Creek was annexed from Oneida in 1836. It is situated in the central part of the State, is centrally distant 98 mi. from Albany, and contains an area of 670 sq. mi. The extreme N. part is low, level, and swampy; but the central and S. parts are hilly, and constitute a portion of the general system of highlands which occupy Central New York. The hills generally have rounded outlines and steep declivities, their highest summits being 500 to 800 ft. above the valleys and 900 to 1,200 ft. above tide. The highlands are divided into separate ridges by a series of valleys extending N. and S., and they form the watershed between Susquehanna River and Oneida Lake. The principal streams upon the N. slope are Chittenango[1] Creek, forming a part of the W. boundary of the co., Oneida Creek, forming a part of the E. boundary, and the Canaseraga,[2] Canastota,[3] and Cowaselon Creeks; and the principal flowing S. are Unadilla River, upon the E. border, Beaver Creek, Chenango River and its branches, Otselic[4] Creek, and Tioughnioga River. The principal bodies of water are Oneida Lake, forming the N. boundary, and Owahgena or Cazenovia Lake, near the center of the W. border. The latter, a beautiful sheet of water, 4 mi. long, is 900 ft. above tide, and is completely surrounded by gradually sloping hillsides. The lowest rocks of the co., outcropping along Oneida Lake, belong to the Clinton group. The red iron ore peculiar to this group is found to a limited extent, but not in sufficient quantities to render mining profitable. Next above this successively appear the Niagara and Onondaga groups, underlying the whole swampy region.[5] The red shales form the surface rock S. of the swamp, and beds of gypsum extend along the base of the hills. These beds are extensively quarried in some sections, and furnish an excellent quality of plaster. Upon the N. declivities of the hills successively appear the water limestone, Pentameros limestone, Oriskany sandstone, and Onondaga limestone. From these groups are obtained an abundance of waterlime, quicklime, and building stone, all of excellent quality. Next above appear the Marcellus and Hamilton shales, covering more than one-half of the entire surface of the co. The Tully limestone, Genesee slate, and Ithaca groups are found to a limited extent covering the tops of the southern hills. A large share of the co. is covered deep with drift deposits. The soil upon the flat lands of the N. is generally a red clay, with great quantities of muck and marl in the swampy regions. Upon the northern declivities of the hills the soil is a gravelly loam intermixed with lime and plaster, and is very productive. Farther S. the soil upon the hills is a clayey, gravelly, and shaly loam, best adapted to pasturage, and in the valleys a gravelly loam and alluvium. The people are principally engaged in stock raising and dairying. Hops are largely cultivated. Manufactures are principally confined to two or three villages.

The co. seat is located at Morrisville. The courthouse is a two story wooden building, pleasantly situated on a small park, fronting on a main street. It was built in 1849, and contains the court[6] and jury rooms.[7] The clerk's office is a small, brick, fire-proof building adjoining the courthouse. The jail was burned in the winter of 1858. The poorhouse is located upon a farm of 155 acres near Eaton village, 5 mi. S. E. of Morrisville. The average number of inmates is 130, supported at a cost of 56 cts. per week each. A school is taught during the whole year. The farm yields a revenue of $1,500.[8] The principal public works in the co. are the Erie Canal and the N. Y. Central

[1] Meaning "waters divide and run N." Seaver, in "*The Life of Mary Jemison*," says it is a corruption of the Oneida word "Chuc-le-nang," signifying "where the sun shines out."

[2] Meaning "Big Eskehorn." Seaver gives it as "Ka-na-so-wa-ga," signifying "several strings of beads with a string lying across."

[3] "Ka-nes-to-ta," signifying "pine tree standing alone."

[4] Meaning "Captull."

[5] In the marsh near Canastota a brine spring is found. A boring of 190 ft. was made here; but the water obtained was not sufficiently strong to warrant the further prosecution of the work.

[6] The first courts were held alternately at "the schoolhouse, near David Barnard's, in Sullivan, [now Lenox,] and at the schoolhouse in the village of Hamilton." The first officers were Peter Smith, *First Judge*; Sylvanus Smalley, Edward Green, Elisha Payne, and David Cook, *Associate Judges*; Asahel Sayer, *Co. Clerk*; Jeremiah Wheeler, *Sheriff*; and Theo. H. Hunt, *Surrogate*. In 1810, Cazenovia was selected as the site of the co. buildings and Col. John Lincklaen and Capt. Jedediah Peck were appointed to superintend the building of a courthouse. A brick building was erected, and the first court was held therein in June, 1812. In 1817 the co. seat was removed to Morrisville, and the first court was held there Oct. 7, 1817.

[7] Ellis Moss, Sam'l White, and Oliver Pool were appointed to superintend the erection of the courthouse.

[8] This institution consists of three two story stone buildings; the poorhouse proper, a lunatic asylum, and a hospital.

R. R., extending through Lenox and Sullivan. Among the hills are several large artificial reservoirs, used as feeders for the canal. Cazenovia Lake is used for the same purpose.

There are seven weekly newspapers published in the co.[1]

Nearly all the s. half of this co. belonged to the tract known as the "Cazenovia Tract." A strip lying between this tract and the Military Tract, including De Ruyter and part of Cazenovia, was embraced in the Lincklaen Purchase. The Oneida Indian Reservation, originally embracing all the N. part of the co., was subsequently divided into several large tracts. The "New Petersburgh Tract," or purchase of Peter Smith, includes nearly all of Smithfield and Fenner, the N. part of Cazenovia, and a strip a mile wide across the s. part of Stockbridge. The remainder of Stockbridge was included in the reservation of the Stockbridge Indians. Lenox and Sullivan constituted the N. W. portion of the Oneida Indian Reservation. The first settlements were made by squatters upon the Oneida Reservation, in 1790.[2] The permanent settlements were commenced about 1795, and the co. rapidly filled up with immigrants, principally from New England.

BROOKFIELD—was formed from Paris, (Oneida co.) March 5, 1795; and Columbus (Chenango co.) was taken off in 1805. It is the S. E. corner town of the co. Its surface is a hilly upland, broken by the valleys of Unadilla River and Beaver Creek. Unadilla River forms the E. boundary. Beaver Creek flows through near the center, and the E. branch of the Chenango through the N. W. part. Several smaller streams take their rise in the town. The soil is a gravelly loam. **Clarkville,**[1] (Brookfield p. o.,) incorp. April 5, 1834, contains 2 churches, the Brookfield Academy, a hoe and fork manufactory, gristmill, and tannery. Pop. 578. **Leonardsville** (p. v.) contains 1 church, a bank, and several manufactories.[2] Pop. 366. **North Brookfield** (p. v.) has 275 inhabitants. **South Brookfield** (p. o.) is a hamlet, and **De Lancy**[3] a p. o. The first settlement was made by Daniel Brown, in 1791.[4] The census reports 6 churches in town.[5]

CAZENOVIA[6]—was formed from Paris and Whitestown, (Oneida co.) March 5, 1795. De Ruyter was taken off in 1798, Sullivan in 1803, Smithfield and Nelson in 1807, and a part of Fenner in 1823. It is the central town upon the W. border of the co. Its surface is a rolling upland, broken by the valleys of Chittenango and Limestone Creeks. The summits of the hills are 300 to 500 feet above the valleys. Owahgena or Cazenovia Lake, in the N. part of the town, is a beautiful sheet of water about 4 mi. long. Its outlet—Chittenango Creek—forms a part of the boundary between this town and Fenner. In its course it has a fall of several hundred feet, affording a great number of valuable mill sites. At the Chittenango Fall the water plunges in a beautiful cascade perpendicularly over a ledge of limestone rock 136 feet in height. Limestone Creek flows across the S. part of the town. Hydraulic and common limestone are quarried near Chittenango Falls. The soil in the N. and central parts is a gravelly loam, and in the S. a clayey loam underlaid by hardpan. **Cazenovia,** (p. v.,) incorp. Feb. 7, 1810, is beautifully situated on Chittenango Creek, at the foot of Cazenovia Lake. It contains 7 churches, an academy,[7] a bank, and several manufactories.[8] Pop. 1177. **New Woodstock** (p. v.) contains 2 churches and 273 inhabitants. **Chittenango Falls** is a p. o. Settlement was commenced in 1793, by John Lincklaen, from Amsterdam, Holland.[9] The first church (Presb.) was organized May 17, 1799, with 5 members; and the Rev. Joshua Leonard was the first pastor. The census reports 9 churches in town.[10]

DE RUYTER[11]—was formed from Cazenovia, March 15, 1798. Georgetown was taken off in 1815, and German (Chenango co.) in 1806. It is the S. W. corner town of the co. Its surface consists of hilly upland, broken by the valley of Tioughnioga River. The summits of the hills are 400 to 500 ft. above the valleys. The principal streams are Tioughnioga River and its tributaries. The soil is a gravelly and sandy loam on the hills and alluvium in the valleys. **De Ruyter,** (p. v.,) incorp. April 15, 1833, contains 3 churches, an academy,[12] and several manufactories.[13] Pop. 727. **Sheds Corners** is a p. o. The first settlers were Elijah and Elias Benjamin and Eli Colgrove, in 1793.[14] The first church (Bap.) was formed by Elder Joel Butler, Nov. 5, 1799.[15]

EATON[16]—was formed from Hamilton, Feb. 6, 1807. It is an interior town, situated near the center of the co. The surface is a rolling upland, broken by the valley of Chenango River into two ridges, whose summits are 400 to 600 ft. in height. The Chenango flows S. through the center. The outlet of the Eaton Reservoir flows through a deep, narrow ravine, and affords a large number of valuable mill sites. Hatchs Lake and Bradley Brook Reservoir, and several smaller reservoirs, are in this town. The soil is a gravelly loam, intermixed with clay in the valleys. **Morrisville,**[17] (p. v.,) situated on Chenango River, was incorp. April 13, 1819. It contains 3

1 Gypsum is said to have been quarried here in 1809.

2 Limestone is found in beds of workable thickness in the N. part of the town. The material was first quarried and burned for plaster here by Samuel Young in the year 1800. But it was found that it would not bind. Experiments were then made, and the material was discovered to be hydraulic lime.

4 These settlers were James and Joseph Pickard, Jacob Dygert, [illegible] Schuyler, Jacob Secor, Garrett and Cornelius Vanderbrooks, John Paisley, and John Freemyer. They settled on the Indian Reservation near Canaseraga. The Indians complained to the Governor of their intrusion, and they were ordered to remove. They refused to do so, and in 1791, Col. Cornelius Smith, the sheriff of Montgomery co., was sent with a posse of 60 men to dislodge them. They still refused, and their movables were taken from their dwellings and their houses burned. They then removed to the reservation of Cornplanter, and settled on lands that the State had lately acquired of the Indians. John G. Myer, John Wemple, Capt. Isaac Paris, Benjamin Severson, Joseph and David Burke, Col. Zerubbabel Beardsley, John Matthews, Hiram Pickard, Nathaniel Pickard, Neal Wood, Peter Dygert, John Parker, John Sweet, Wm. Myer, David Hamilton, Timothy Freeman, and Peter Crysler settled in the town shortly after. The first birth was that of Polly Schuyler in 1791, and the first death that of Daniel Freeman. John G. Myer built the first saw and grist-mill, and Jacob Schuyler kept the first inn.

MONROE COUNTY.

This county was formed from Ontario [illegible]. It lies on Lake Ontario, N. W. of the [illegible] by the Central R. R. [illegible] 202 mi. from Albany [illegible]. The surface is generally level or slightly undulating, [illegible] inclination toward the lake. The [illegible] 10 to 12 in height, and from its [illegible] slopes upward to the lake ridge, a distance [illegible] lake. The summit of this ridge is [illegible] it the surface declines a few feet to the S., and then rises to the summit of the Mountain Ridge, a distance of 1 to 3 mi., and 310 ft. above the lake. South of this point the surface is gently rolling, the ridges extending N. and S. The summits of the ridges along the S. border are about 400 ft. above the lake and 600 to 650 ft. above tide. The principal stream is Genesee River, which flows a little E. of N. through the center of the co. Its valley is ½ mi. to 2 mi. wide, bordered by ridges 30 to 60 ft. high. At Rochester the river flows over the solid limestone which forms the Mountain Ridge a distance of 96 ft., forming the Upper Genesee Falls, and 2½ mi. below it again descends 105 ft., to near the level of the lake, forming the Lower Genesee Falls.

The principal tributaries of the Genesee are Oatka and Black Creeks from the W., and [illegible] Creek from the E. The other principal streams of the co. are Sandy, Little Salmon, Salmon, Buttonwood, and Long Pond Creeks, W. of the Genesee, and Irondequoit and Four Mile Creeks, E. of that river, all flowing into Lake Ontario or some of its bays. In their passage from the central part of the co. to the lake, these streams nearly all flow over the limestone ridge in a succession of falls, forming an abundance of water-power. The principal bodies of water are Lake Ontario, which forms its N. boundary, Irondequoit and Braddocks Bays, and Buck, Long, and Cranberry Ponds, all indentations from Lake Ontario and connected with it by narrow and shallow straits.[1]

The lowest rock in the co. is the Medina sandstone, extending in a broad belt along the lake shore. Next above this is a thin stratum of the Clinton group, almost disappearing upon the W. border of the co.; and next above is the Niagara group, forming the abrupt terrace of the Mountain Ridge. This rock forms an excellent building material, and is extensively quarried. It also yields weak brine springs in several localities. The underlying rocks in the S. part of the co. belong to the Onondaga salt group. Lime is extensively manufactured from the Niagara limestone; and the rocks in the S. part yield gypsum and waterlime. A large part of the co. is covered with drift deposits, which mostly assume the character of ridges and rounded hills, many of them rising 50 to 100 ft. above the general surface. Tufa and marl are found in several localities, forming elements of fertility to the soil almost invaluable. A small quantity of iron is found associated with the Clinton group.

The soil is generally very fertile. Along the lake shore it consists of a red, argillaceous loam, principally derived from the disintegration of the Medina sandstone. This is succeeded by a clay derived from the disintegration of the Clinton and Niagara shales. The soil in the S. part is impregnated with lime and gypsum,—two of the most important elements of wheat lands. Agriculture forms the leading pursuit. Until within a few years past, wheat has been the great staple; but since the commencement of the ravages of the wheat midge, barley, corn, and oats have become the staple productions. Most parts of the co. are well adapted to the culture of fruit, and apples and peaches are largely produced. Wool growing is extensively carried on, and stock growing and dairying are beginning to receive considerable attention. The manufactures are extensive, though mostly confined to Rochester and vicinity. They consist chiefly of flour, machinery, edge tools, cars, and almost every variety of articles of iron. Rochester is the business center of the co.; and from it a large trade is carried on with the surrounding rich agricultural regions. The canals and railroads centering at this place give it facilities for an extensive inland trade and commerce. A limited amount of commerce is carried on upon Lake Ontario.

[illegible]

The co. seat is located at the city of Rochester.[1] The courthouse, situated upon Buffalo St., near the center of the city, is a commodious brick edifice, with an Ionic portico supported by four massive pillars. The building is surmounted by a dome, the summit of which is 150 ft. high. It contains the usual offices and rooms for the court and co. officers, the co. clerk's office, and rooms for the city officers.[2] The jail is an old stone building, situated upon the bank of the Genesee, in the s. part of the city. The poorhouse establishment is located upon a farm of 134 acres in Brighton, just s. of the city line of Rochester. It consists of three large buildings, one of which is used for an insane asylum. The average number of inmates is 360, supported at a weekly cost of 68 cts. each. A school is taught throughout the year. The farm yields a revenue of $3,500.

Four daily, 2 tri-weekly, 8 weekly, 1 semi-monthly, and 3 monthly papers are published in the co.[3]

[1] The first co. officers were Elisha B. Strong, *First Judge*; Timothy Fitzhugh, *Judge*; Josiah Spencer, *Second Judge*; James Seymour, *Sheriff*; Nathaniel Rochester, *Clerk*; and Elisha Ely, *Surrogate*.

[2] The first courthouse was built in 1821, soon after the organization of the co. It was removed to give place to the present structure in 1842. The present jail was built at a cost of $25,000 in the year 1817. It is now [illegible]

[3] *The Rochester Gazette*, the first paper published in Monroe co., was established in 1811 by Ashbel Kellogg & Co. Daniel Dewey Barnard and Orsamus Loomis subsequently assumed control of the latter, and in 1812 the paper passed into the hands of Everard Peck & Co. It was published with Patrick Sibley as editor, and its name was changed to

The Monroe Gazette. In 1817 Wilder & Mumford became proprietors. In July, 1827, it was purchased by Luther Tucker, who changed its name to

The Rochester Republican, and commenced its publication in connection with the *Rochester Daily Advertiser* until 1836, when the establishment passed into the hands of Thomas H. Hewitt. After passing through several hands, it is now published by Curtis, Butts & Co., Isaac Butts, editor.

The Rochester Telegraph was commenced July 7, 1818, by Everard Peck & Co. In 1819 Theodore Wood became its editor, and in 1825 he and Daniel Martin purchased the establishment. In 1827 they commenced

The Semi-Weekly Telegraph, which in a short time was changed to

The Rochester Daily Telegraph. In 1828 Wood retired, and the papers, daily and weekly, were continued by Martin Os. the 1st of Jan. 1829 the daily was united with the Rochester Daily Advertiser, and in 1830 the weekly was merged in the Rochester Republican.

The Temperance Recorder, a paper published a short time about 1824 by Wm. A. Wallace, N. Goodsell, editor.

The Rochester Observer was established in Oct. 1820, by Marshall, Speed, Brace & Hunt. In 1827 it was united with the Telegraph.

The Rochester Daily Advertiser, the first daily paper west of Albany, was established Oct. 25, 1827, by Luther Tucker and Henry C. Sibley, under the firm of Tucker & Co. In 1828 the partnership was dissolved, and the publication was continued by Tucker. On the 1st of Jan. 1829, the paper was united with the Rochester Daily Telegraph, and issued as

The Rochester Daily Telegraph and Advertiser, by Tucker & Martin. In 1829 Martin retired, and in 1830 Tucker dropped the sub-title of Telegraph. Henry C. Sibley, H. L. Stevens, W. Hyde, and Hiram Humphrey were successively connected with Tucker in its publication, which continued until May 1836, when the establishment was transferred to Thomas H. Hewitt, who issued the paper for a short time as the Rochester Daily Union. Sept. 1, 1836, and it is now published as

The Rochester Daily Union and Advertiser.

The Rochester Mercury was commenced in July, 1827, by Luther Tucker & Co. It was issued semi-weekly, and in connection with the Daily Advertiser, was merged in the Rochester Republican, which paper passed into the hands of the Daily Advertiser.

The Rochester Morning Courier was published in 1830 by E. J. Roberts.

The Genesee Farmer was commenced in Rochester in Jan. 1831, by Tucker & Stevens, with N. Goodsell as nominal editor. It was continued by Tucker until the close of 1839, when it was united with the Cultivator, at Albany.

The National Republican was commenced at Rochester in the spring of 1831 by Sidney Smith. In 1833 a daily edition, entitled

The Morning Advertiser, was issued from the same office. It was soon after changed to

The Evening Advertiser, and in 1834 Smith sold the establishment to Shepard & Strong, who united the Republican with the Inquirer and changed the name to

The Monroe Democrat, and the name of the daily to

The Rochester Daily Democrat. In 1836 George Dawson became interested in the establishment, and acted as editor until 1839. In 1846, Alva Strong, Samuel P. Allen, and Henry Cook were editors and proprietors. In Dec. 1847, the papers were united with the Daily and Weekly American, and the weekly is now issued as

The Daily Democrat and American, and the weekly as

The Monroe Democrat, by Strong, Allen & Huntington, proprietors, and S. P. Allen, editor.

The School Visitor [illegible]

The first settler was Ebenezer Allen, a tory, who located upon the Genesee, near the present site of Rochester, in 1788. He soon after removed to Canada. The first permanent settlements were made in 1789, in Wheatland and near the head of Irondequoit Bay. During the next five years settlements sprung up in various parts of the co., though the general growth was greatly retarded by the difficulty of access, the dense forests, and the unhealthiness of the climate when the lands were first cleared. The unsettled condition of Indian affairs also had the effect to retard settlement; and the War of 1812 almost put an end to improvement. At the close of the war, settlers came in more rapidly, and a great business began to develop itself at Rochester. The construction of the Erie Canal gave an impetus to business, and speedily pushed settlements into every portion of the co. From that time the progress of the co. has been rapid and continuous. The co. was contained in the Phelps and Gorham Purchase. The three western towns belonged to the Triangle Tract, and the remainder of the co. w. of the Genesee constitutes a portion of the celebrated "Mill Yard Tract."[1]

BRIGHTON[2]—was formed from "*Smallwood*,"[3] March 25, 1814. A part of Rochester was taken off in 1834, and Irondequoit in 1839. It is an interior town, lying upon the E. bank of the Genesee, a little S. E. of the center of the co. Its surface is gently rolling, with a slight inclination toward the N. The deep valley of Irondequoit Bay is on the E. border. Its streams are small brooks, tributaries of the Genesee and Irondequoit. The soil is a sandy loam in the E. and a clay loam upon the river. Near the center are gypsum beds, formerly extensively worked. The people are largely engaged in raising vegetables for the Rochester market. There are several extensive nurseries in town. **Brighton,** (p. v.,) in the N. E. part, contains a church and about 30 dwellings. It is a canal village and a station upon the N. Y. C. R. R., where the two branches from the E. unite. A large brick and tile manufactory is located about 2 mi. S. of the village; and the Genesee Model School[4] is situated upon a beautiful site 2 mi. S. E. **West Brighton,** (p. v.,) near the Genesee, S. of the line of Rochester, contains about 15 dwellings. In its immediate vicinity are the co. workhouse, poorhouse, and insane hospital, the Mount Hope Rural Cemetery, the Monroe co. almshouses, an extensive glue factory, and several other manufactories. The first settlement was made in 1790, by John Lusk and Oran Stone, who located about 4 mi. E. of the river.[5] Rev. Solomon Allen, from Northampton, Mass., preached the first sermon and was the first settled minister. There is but one church (Cong.) in town.

CHILI—was formed from Riga, Feb. 22, 1822. It is an interior town, lying S. W. of the center of the co. Its surface is level or gently rolling, with a slight inclination to the E. Genesee River forms the E. boundary; and Black Creek, a sluggish stream, flows E. through near the center. The soil is a clay loam, mixed with sand. South of Black Creek are several peculiar gravelly knolls, the principal of which is Dumpling Hill, near the river. **Chili,** (p. v.,) in the N. part, contains a church and 15 houses; **North Chili,** (p. v.,) a R. R. station in the N. W. corner, contains a church and 25 houses; **Clifton,** (p. v.,) in the S. W. part, contains 1 church, a saw and grist mill, plaster mill, furnace, and 201 inhabitants; **South Chili** is a hamlet. The first settlement was made in the E. part, by Joseph Morgan, in 1792.[6] There are 5 churches in town.[7]

CLARKSON[8]—was formed from Murray, (Orleans co.,) April 2, 1819. Union was taken off in 1852. It lies on the W. border of the co., N. of the center. Its surface is level, with slight un-

[1] In his treaty with the Indians, Mr. Phelps wished to obtain a tract W. of the Genesee; but the Indians were only willing to cede the lands E. of that river. A compromise was finally effected by which a tract 24 mi. long by 12 mi. wide was granted to Phelps and Gorham for a mill yard. It is said that the Indians were much astonished when they came to see the mill and knew how much land was really required for a yard. The Mill Yard Tract was bounded E. by the Genesee R., a line parallel to and 12 mi. W. of it, and it extended 24 mi. S. from Lake Ontario.

[2] This town embraces Township 3 of Range 7 of the Phelps and Gorham Purchase. It was originally purchased by Gen. Hyde, Prospect Polly, Enos Stone, Col. Gilbert, and Joseph Chaplin, from Lebbeus, Mass.

[3] The original town, "*Brighton*," was organized April 6, 1806, and embraced the six N. towns E. of the river. Penfield was taken off in 1810 and Perinton in 1812. Some time in 1812 or '13 the name was changed to "*Smallwood*;" and March 25, 1814, it was divided into two parts, one taking the name of Brighton and the other of Pittsford.

[4] The institution was widely known as the "Clover Street Seminary" under the care of Mrs. Brewster, the author of Bless's Ancient History.

[5] John Lusk owned 1,500 acres at the head of Irondequoit Bay. Among the other early settlers were Joel Scudder, Chauncey and Calvin Hyde, Samuel Shaffer, Enos Blossom, Timothy Allyn, and Oliver Culver,—the last named from Orwell, Vt. In 1800 most of the business upon the lake was done at Irondequoit Landing. In 1798, Judge John Tryon laid out a village 3 mi. above the head of the bay, and built a large warehouse. The place was called "*Tryons Town*." Asa Dayton kept an inn at this place, in 1801. A tannery and distillery were afterward built, and the place became quite a lively little village; but it is now entirely deserted. —— Turner taught the first school; Ira West kept the first store; and Solomon Hatch and Oliver Culver built the first mill, on Allyns Creek, in 1806.

[6] Among the early settlers were Andrew Wortman, in 1794; Stephen Peabody, Col. Josiah Fish and his son Libbeus, from Vt., who located at the mouth of Black Creek, in 1795. —— Widener and his sons Jacob, Abraham, William, and Peter; —— Sottle and family, Joseph Cary, Lemuel and Joseph Wood, Samuel Scott, Joshua Howell, Ezra Bowen, John Kimball, —— Ingham. —— Franklin and family all settled previous to 1800. The first birth was that of a child of Joseph Morgan. James Chapman kept the first store, in 1807; and Joseph Cary built the first mill.

dulations in the s. It is drained to the N. E. by the head branches of Salmon and Little Salmon Creeks. The soil is a sandy loam, mixed with clay. **Clarkson.** (p. v.,) in the s. part, contains 2 churches, a brewery, and 325 inhabitants. It is the residence of Ex-Lieut. Gov. Henry R. Selden. Salt was manufactured to a limited extent by the early settlers. **East Clarkson.** (p. v.,) in the S. E. corner, contains a church and 20 houses; **West Clarkson,** in the W. part, 30 houses. The first settlement commenced in 1809, by James Sayres, Moody Truman, and Elijah Blodgett[1]. There are 3 churches in town; 2 M. E. and Cong.

GATES[2] was formed March 30, 1802, as "*Northampton.*" Its name was changed June 10, 1812. Parma and Riga were taken off in 1808, and Greece in 1822. It is near the geographical center of the co. Its surface is undulating, with a gentle inclination toward the N. Genesee River forms a small portion of the E. boundary on the S. E. corner. It is drained by small streams. The soil is a fine quality of calcareous loam, intermixed with clay. The people are largely engaged in raising vegetables for the Rochester market. **Gates** (p. o.) is 1 mi. N. of Gates Center. **Gates Center** and **West Gates** are hamlets; and **Coldwater** is a station upon the Buffalo Branch of the N. Y. C. R. R. The first settlement was made in 1809, by Isaac Dean, from Vt.[3] The census reports 2 churches in town; M. E. and Presb.

GREECE—was formed from Gates, March 22, 1822. It lies near the center, on the N. border of the co. Genesee River and Lake Ontario form its E. and N. boundaries. Its surface is rolling, with a general inclination toward the lake. It is drained by several streams that flow into the small bays that indent the lake shore. These bays, six in number, beginning at the W., are respectively Braddocks Bay and Cranberry, Long, Buck, Round, and Little Ponds. The shifting sand bars at their mouths destroy their commercial utility. The soil is a clay loam, with large tracts of drift sand along the lake shore. **Charlotte,**[4] (p. v.,) in the N. E. corner, near the mouth of Genesee River, is a U. S. port of entry in the Genesee District, and the lake port for Rochester, 7 mi. above. It contains 2 churches, a lighthouse, 3 shipyards, a steam sawmill, 2 grain elevators, planing mill, and lumber yard. Pop. 400. Six schooners are owned in the place; and the lake steamers touch here daily during navigation. **West Greece,** (p. v.,) on the line of Parma, contains 2 churches and 30 houses; **North Greece** (p. v.) a church and 20 houses; **South Greece,** (p. v.,) in the S. W. corner, 25 houses; and **Greece** (p. v.) a church and 20 houses. **Hanfords Landing,** (p. v.,) in the S. E. corner, at the head of navigation on Genesee River from the lake, contains 20 houses. **Greece Center** and **Reads Corners** are hamlets. The first settlement was made at the mouth of the Genesee, in 1792,[5] by Wm. Hencher and family. The census reports 7 churches in town.[6]

HENRIETTA[7]—was formed from Pittsford, March 27, 1818. It is an interior town, lying S. of the center of the co. Its surface is rolling, Genesee River forming its W. boundary. The streams are small, and usually dry in summer. The soil is a fertile, argillaceous loam. **East Henrietta,** (Henrietta p. o.,) E. of the center, contains 2 churches, the Monroe Academy, and 181 inhabitants. **West Henrietta,** (p. v.,) S. W. of the center, contains a church, a steam mill, furnace, extensive carriage shops, and 40 houses. The first settlement was commenced by Jesse Pangburn, in 1806.[8] The first church (Bap.) was organized in 1811.[9]

ROCHESTER[1]—was taken from Brighton and Gates, and incorp. as a village, by the name of "*Rochesterville*," March 21, 1817. Its name was changed April 12, 1822, and it was enlarged and incorporated as a city April 28, 1834.[2] It is located N. of the center of the co., upon Genesee River, 7 mi. from its mouth; and it contains an area of about 8 sq. mi. The surface is level or gently undulating. The N. Y. C. R. R. track is 280 ft. above Lake Ontario; and Mt. Hope Ridge, the highest point upon the s. border, is 160 ft. higher. The city has a solid foundation of Niagara limestone, cropping out along the course of the river, but in other parts of the city usually covered with drift deposits. The Genesee flows N., dividing the city into two nearly equal parts. Its course through the city is mostly a succession of rapids and falls, affording an extensive and valuable water-power, which is fully improved for manufacturing purposes.[3]

The city is quite regularly laid out, most of the streets crossing each other at right angles. The N. and S. streets are parallel to the river, and upon the principal E. and W. streets bridges are built across the river.[4] The streets are usually well paved and bordered by commodious sidewalks. The city is divided into 12 wards.

The immense water-power furnished by Genesee River gives to the city great advantages for manufacturing.[5] Mills were erected at an early period; and gradually other machinery was added, until the present great amount and variety have been attained. The staple manufacture of the city is flour. There are now in operation 24 mills and an aggregate of 125 runs of stone. The mills have a capacity for grinding 800,000 bbls. of flour per annum; and the aggregate capital invested is $700,000. Since the failure of the wheat crop in Western New York, a considerable portion of the water-power has been directed to other manufacturing purposes.[6]

The culture of fruit and ornamental trees has for many years formed an important business of the city; and now the nurseries are among the most extensive in the country.[7]

The commerce of the city is large, though of much less importance than the manufactures. It

[1] Named from Col. Nath'l Rochester, one of the original projectors.

[2] At the first village meeting, held May 13, 1828 under charter, Francis Brown was elected President, and Wm. Cobb, Everard Peck, Dan Mack, and Jehiel Barnard, Trustees. The village corporation embraced 750 acres. The first city officers—elected in June, 1834—were Jonathan Child, *Mayor*, Louis Brooks, Thos. Kempshall, Elijah F. Smith, Fred'k F. Backus, and A. W. Ripley, *Aldermen*; John C. Nash, *Clerk*; and E. E. Marshall, *Treasurer*.

[3] The whole fall of Genesee River within the city is 280 ft., of which 96 are below the S. line of the city. The falls evidently all once formed a single cascade; but the different degrees of hardness of the several rocks over which the river flows have caused an unequal retrograde movement of the falls, until they have assumed their present position. The surface shales have worn away gradually to a uniform slope, over which the water flows in a series of rapids. At the Upper Falls the stream falls a distance of 96 feet over the perpendicular edge of the Niagara limestone underlaid by shale. Below the Upper Falls the river flows in a deep, straight ravine bounded by nearly perpendicular sides, to the Middle Falls, where it has a descent of 25 ft. One hundred rods below, it descends 84 ft. over a ledge of Medina sandstone to the level of Lake Ontario. Several sulphur springs flow out of the rocks below the Middle Falls.

[4] The river is crossed by 4 bridges, respectively at Buffalo, Court, Andrew, and Clarissa Sts. The Court and Andrew St. Bridges are of iron, and the others of wood. The first bridge was built upon the site of the present Buffalo St. Bridge, in 1812, under a special act. The cost—$12,000—was raised by tax in Ontario and Genesee cos. The Court St. Bridge was first built in 1826, by individuals. It was replaced by the present structure in 1858, at the city expense. The Central R. R. Bridge crosses the river a few rods above the Upper Falls. The canal is crossed by 4 substantial stone bridges, built by the State. Other bridges are built across the canal feeder and the various millraces extending through the city.

[5] The situation of this water-power is very favorable for the growth of manufactures. Vessels from Lake Ontario can come up the river to the foot of the Lower Falls, 2 mi. below the center of the city; and above the rapids the river is navigable to Mount Morris, a distance of 35 mi. The first mill was built by Ebenezer Allen in 1788–89. He soon after sold out to Col. Fish and removed to Canada. This mill and one other were the only ones at this place until 1814, when Elisha and Henry Ely and Joseph Bissell built another at the Upper Falls. During this year a few hundred bbls. of flour were sent to the Niagara frontier, the first flour ever exported from Rochester. The Ely and Mills mills were built in 1818, since that time the number has largely increased, until now Rochester is one of the largest flour manufacturing places in the country. It is called the "Flour City."

[6] *Flour Barrels* form an important item in the manufacturing interests of the city. There are now engaged in this business 41 firms, producing in the aggregate 250,000 bbls. annually, and giving employment to 400 men.

Axes and Edge Tools are manufactured by 3 firms, with an aggregate capital of $180,000, and employing 2— men.

Machine Shops, 9 in number, have an aggregate capital of $300,000, turn out goods to the amount of $— per annum, and employ 7— men.

Furnaces, 8 in number, employ 170 men, and have a capital of $72,000.

Fire Brick and Forsyth Safe and Scale Manufacturing Co. was incorp. in Dec. 1854, with a capital of $100,000. It gives employment to 250 men, and produces goods to the amount of $250,000 per annum.

Clothing Factories, 2 in number, give employment to 26 men, and produce $230,000 worth of goods annually.

Breweries, 17 in number, have an aggregate capital of $130,000, and produce $250,000 worth of ale and lager beer annually.

Leather Goods, 15 in number, have a capital of $70,000, and manufacture $375,000 worth of boots annually.

Coach and Carriage factories, 8 in number, turn out $150,000 worth of carriages annually.

Boot and Shoe factories, 6 in number, give employment to 900 hands, and turn out goods annually to the amount of $500,000.

Cabinet Shops, 8 in number, employ 625 men, and turn out work to the amount of $500,000 annually.

Chair Factories, 2 in number, employ 250 men, and turn out chairs to the amount of $200,000 per annum.

Among the other articles annually manufactured are woolen cloths to the amount of $50,000, soap and candles to the amount of $— 000, carpets, paper hangings, oil cloth, paint, brushes, rules, &c. A carpet manufactory was started in 18—, and in 1838 there were 2 in successful operation,—one at the Lower and one at the Middle Falls. The first paper mill was built at the Upper Falls, in 1819. A large paper mill below the Lower Falls now produces paper to the amount of $1,000,000 annually. It is chiefly engaged in the manufacture of printing paper. There are several sawmills, planing mills, and tanneries in the city. Besides these, there are many minor manufactories in the aggregate giving employment to a large number of men and requiring a great amount of capital. The city ranks among the first manufacturing towns in the State.

[7] Ellwanger & Barry's Mount Hope Nursery, occupying 500 acres, is probably the most extensive nursery in the world. Samuel Mathews's Old Rochester Nursery occupies 350 acres; Alonzo Ernst & Co.'s, Genesee Valley Nursery, about 200; and Hooker & Bissell's East Avenue Nursery, about 200. J. O. Brees & Co., Chas. Monfort, — Burtis, Matthews & Co., Wm. King, and Wm. Bryan & Co.'s nurseries occupy 40 to 100 acres each.

is carried on by means of the canals, railroads, and Lake Ontario.[1] The exports consist of the products of the Genesee Valley and of the manufactured goods of the city. Pop. 45,877.

Besides the co. buildings, the city contains several fine public edifices.

The City Hall, combined with the co. courthouse, has already been described.

Corinthian Hall contains the reading room and library of the Atheneum and Mechanics' Association, and is one of the finest public halls in the country.

The Arcade, fronting Buffalo St., is a commodious building, containing the p. o., telegraph offices, and a variety of other offices, stores, &c. It has a broad promenade extending through the center, from which the various rooms open on either side. The roof is built mostly of glass, and the public walk is open to the roof. The rooms of the upper stories open upon galleries, which extend the entire length of the building on either side above the main walk or promenade.

The Central R. R. Depot is one of the finest buildings of the kind in the State. It contains ample accommodations for the various R. R. offices, passenger rooms, and for the cars which arrive on the various roads that center there. Its roof is supported by iron; and the whole structure presents a fine and imposing appearance. Several of the mercantile blocks, the banks, and private residences, are beautiful structures and worthy of becoming architectural models.

The Public Schools of the city are under the control of a Board of Education, consisting of 2 members from each ward and a Superintendent. The schools are graded, and the course of instruction embraces all studies, from the primary through the higher branches taught in academies. The school buildings are 16 in number. The number of teachers employed is 104; 13 are males and 91 females. The number of children between the ages of 4 and 21 is 16,108, of whom 6,320, or 38 per cent., attend school during some portion of the year. The total expenses for 1857 were $58,945.55. Number of volumes in school libraries, 7000.

The University of the City of Rochester was incorp. in Jan. 1850, and is under the patronage of the Baptist denomination. This school has an optional classical and scientific course. The present number of pupils is 140.[2]

The Baptist Theological Seminary,[3] connected with the University, was established Nov. 4, 1850. Its present number of students is 31.

The Rochester Collegiate Institute, corner of Atwater and Oregon Sts., was established in 1854, and is at present a flourishing institution.

The Rochester Female Academy, on Fitzhugh St., was incorp. in 1837.

The Allen Female Seminary and *The Tracy Female Institute* are flourishing private seminaries.

There are 8 parish schools connected with the R. C. churches of the city.

The Rochester Atheneum and Mechanics' Association was founded in 1849. It has an extensive reading room and a library of 8,000 volumes. It sustains an annual course of lectures.

The Female Charitable Society was organized in 1826, to furnish clothing and other articles of necessity to the destitute.

The Home for the Friendless was organized April 11, 1849, to provide work for the needy who cannot obtain employment.

The House for Ill and Vagrant Children was opened June 2, 1854. It is connected with the school department of the city; and to it are sent all vagrant children that are wandering about the streets.

The Rochester Orphan Asylum was established in 1836 and incorp. in 18.. It is a fine brick edifice, situated in the s. w. part of the city, upon a lot donated by the Hon. John Greig. Its average number of inmates is 84, supported by State and county appropriations and private subscription.

The Roman Catholic Orphan Asylum was opened in July, 1842. It is under the charge of the Sisters of Charity. It is situated in the rear of St. Patrick's Church.

The Cartmen's Mutual Benevolent Society was incorp. in July, 1849.

The St. Andrew's Benevolent Society for extending aid to indigent Scotchmen was formed in 1850.

The St. George's Society was formed in March, 1849, by the English residents of the city.

The other societies in the city are the *Monroe Co. Bible Society*, organized in 1821; *The Rochester*

[1] The principal landing for the port of Rochester is at Charlotte, at the mouth of Genesee River, 7 miles below the city. The amount of imports at this port for the year 18.. was $..,242; exports, $126,197. The principal imports are wheat, flour, fish, lumber, horses, hides and skins, peas, and wool; and exports, castings, fruit, fruit-trees, furniture, cheese, potatoes, and machinery.

The lighthouse is 72 ft. high, and stands 65 ft. above the level of the lake. It was built in 1822, at a cost of $5,000. The pier is 1,000 ft. long, built of wood and stone, and on the end is a beacon light-house.

The Western House of Refuge for Juvenile Delinquents, a State institution, established in 1844, is located upon a farm of 42 acres 1½ mi. N. of the courthouse. The buildings consist of a large and imposing main edifice, with wings containing offices, cells, a chapel, &c. and a variety of workshops. They occupy a site of 4½ acres, surrounded by a high wall. The average number of inmates is nearly 400.[1]

The first religious services held in the co. were connected with the French missions in the 17th century. The first church at Rochester (Presb.) was formed in 1815, and the church edifice was erected in 1817; Rev. Comfort Williams was the first settled minister, in 1816. Several of the city churches are among the finest church edifices in the State. There are now 46 churches in the city.[2]

Mount Hope Cemetery is located in Brighton, near the S. line of the city. It embraces a lot of 70 acres located upon Mount Hope, the highest point of land in the vicinity, and one completely overlooking the city. It is laid out in excellent taste, and is one of the finest rural cemeteries in the country.

St. Patrick's Cemetery contains 15 acres, and *St. Joseph's Cemetery* (German) 9 acres.

The territory about the mouth of the Genesee first became known to the whites in the early exploring expeditions of the French. A map of the region, prepared by Baron La Hontan, was published at London in 1703. Views of the Upper and Lower Genesee Falls had been published as early as 1768.[3] Many other adventurers visited the place and gave descriptions of it long previous to the Revolution. The country remained in the peaceable possession of the Indians until after the war, when immigration began to set in toward Western N. Y. The first settler who located at the falls was Ebenezer Allen, the notorious tory.[4] He built a mill in 1788 or '90, but soon after sold out his improvements to the Pulteney Estate. The mill went to decay; and there were no other white settlers for several years.[5] Among the earliest settlers were Jeremiah Olmstead, who located a short distance S. of the present site of the House of Refuge, in 1798–99; Wm. Cole, who established a ferry, in 1805; and Enos Stone, who built a mill, in 1808. In 1802, Nath'l Rochester, Wm. Fitzhugh, and Charles H. Carroll, from Md., purchased a tract of 300 acres at the Upper Falls; and in 1812 they caused their land to be laid out for settlement. In the same year Francis and Matthew Brown, from Mass., and Thomas Mumford, laid out a tract of 200 acres adjoining the former, and commenced the erection of mills, &c.[6]

The war with Great Britain broke out at the time when the first efforts were made to build up Rochester, and seriously retarded the progress of settlement. The fear of Indian hostilities and of hostile invasion from Canada caused many of the pioneer settlers to abandon their new homes and emigrate to the more populous sections of the country. At the close of the war, settlements commenced throughout Western N. Y. with increased rapidity; and Rochester immediately felt the new impulse. A large number of settlers came in, mills were built, and the place immediately became the commercial and manufacturing center of the fertile Genesee country. The finishing of the Erie Canal gave a new impetus to the business of the place and served to greatly extend its manufacturing interests. Since that time the city has steadily and rapidly increased both in population[7] and business, until it has arrived at a front rank among the inland cities of the State.

RUSH—was formed from Avon, (Livingston co.,) March 13, 1818. It lies near the center of the S. border of the co. Its surface is rolling, with a W. inclination. Genesee River forms its W. boundary; and Honeoye Creek flows W. through the town and enters the river near the center of the W. border. In the W. part, along the river, are extensive flats. The soil is a sandy, calcareous

[1] The central building is 80 by 200 ft., and 3 stories high. The wings are each 148 by 52 ft.,—making the entire length of the building 382 feet. Juvenile delinquents are sentenced to this institution from the central, northern, and western parts of the State; those from the eastern part being sent to a similar institution in Wards Island, New York City. The inmates spend a portion of each day in study and a portion in learning some useful employment. The principal business carried on is the manufacture of shoes and brushes. A library of 6,000 volumes is connected with the institution. The yearly cost is about $80,000, and the earnings of the inmates $12,000. See p. 42.

[3] Upon these early maps the Genesee was called "Casconchiagon," or Lattre Schenectady River. The water power was not immediately improved, because every creek in the vicinity afforded sufficient power for the wants of the people.

[4] Aaron Burr visited the place in 1799 and made a minute and critical survey of the Falls. In 1797 Louis Philippe and his two brothers, then in exile, accompanied by Robert Morris, visited the place.

[5] See p. 388.

[6] Charles Harford built a small mill in 1807,—the first near the river that of Ebenezer Allen. The Brewers built a mill in 1812, and started a store. The same year Samuel J. Andrews and Vincent Atwater laid out a tract of land for settlement. Among the settlers who came in about this time were Rev. Abelard Reynolds, Dr. Josiah Brown, the first physician; Abraham Cross, John Matlick, (the first lawyer,) Henry Skinner, Israel Scranton, Luerian Knapp, Hezekiah Noble, Joseph Hughes, Hezekiah Kelly, Ira West, Elisha and Henry Ely, Porter P. Peck, Joseph Bissell, jr., Michael Cully, Harvey Montgomery, Charles D. Furman, and Geo. G. Sill. The first child born was a son of Enos Stone, May 4, 1810. Hamlet Scranton built the first framed dwelling, in 1812, on the present site of the Eagle Tavern.

[7] The following table shows the progress of population since 1810:

1810	9,207	1845	26,065

1840	20,191	1855	43,877

loam on the uplands, and a rich alluvium on the flats. **East Rush** (p. v.) contains a church, a saw and grist mill, a carriage factory, and about 250 inhabitants; **West Rush,** (p. v.) in the w. part, a station on the C. & N. F. Branch of the N. Y. C. R. R., contains a saw and grist mill and 30 houses; **North Rush,** (p. v.) in the N. W. part, about 1 mi. E. of Scottsville station, contains a church, and 16 houses. **Genesee Valley R. R. Junction** is 1 mi. W. of West Rush. The first settlement was commenced in 1789, by Maj. Wm. Markham and Ransom Smith, from N. H.[1] The first settled minister was Elder Goff, (Bap.)[2]

SWEDEN—was formed from Murray, (Orleans co.,) April 2, 1815. It lies on the W. border of the co., near the center. Its surface is level and gently rolling. A high ridge passes E. and W. through the town, N. of the center. Salmon Creek rises in the S. W. part and flows in an E. and N. E. course through the town. The soil is clay and clay loam. **Brockport,**[3] (p. v.,) in the N. part, a canal village and R. R. station, was incorp. April 26, 1829, contains 6 churches, the Brockport Collegiate Institute,[4] a bank, 2 newspaper offices, 4 foundries, a planing mill, a manufactory of mowers and reapers, an extensive carriage manufactory, and a rotary pump manufactory. Pop. 2,144. **Sweden Center,** (Sweden p. o.,) near the center, contains 2 churches and 120 houses; and **West Sweden,** near the S. W. corner, 2 churches and 15 houses. The first settlement was commenced in 1807,[5] by Nathaniel Poole and Walter Palmer. There are 10 churches in town.[6]

UNION—was formed from Clarkson, Oct. 11, 1852. It is the N. W. corner town of the co. Lake Ontario forms its N. boundary. Its surface is slightly rolling and inclines toward the lake. It is drained by a number of small streams, the principal of which is Sandy Creek. The soil is a sandy, clayey, and gravelly loam. Salt was manufactured to a limited extent by the early settlers. **Clarkson Center,** (p. v.,) in the S. part, contains 35 houses; **North Clarkson,** (p. o.,) in the E. part, 8 houses; **Kendalls Mills,** near the S. W. corner, partly in Kendall, (Orleans co.,) is a hamlet. The first settlement was commenced in 1810, by Aretus Haskell.[7] There are 5 churches in town.[8] A Fourierite community was organized and located at the mouth of Sandy Creek, in 1845, under Dr. Theller, a Canadian Patriot War notoriety. The bubble soon burst.

WEBSTER—was formed from Penfield, Feb. 6, 1840. It lies on Lake Ontario, in the N. E. corner of the co. Irondequoit Bay forms the W. boundary. Its surface from the ridge in the S. part has a gentle inclination to the lake. The shore rises in places 50 ft., and in the W., on Irondequoit Bay, 80 to 100 ft. The streams are small and flow N. into the lake. The soil is a sandy loam N. of the ridge, and clay and clay loam in the S. Salt was manufactured to some extent by the early settlers. **Webster,** (p. v.,) in the S. part, on the ridge, contains 4 churches, the Webster Academy, and 310 inhabitants; **West Webster,** (p. v.,) in the S. W. part, contains 40 houses. The first settlement was commenced in 1805, under the agency of Caleb Lyon.[9] The first church (M. E.) was formed in 1812, by Rev. Solomon Pierce.[10]

WHEATLAND—was formed from Caledonia, (Livingston co.,) as "*Inverness*," Feb. 23, 1821. Its name was changed April 3, 1821. It lies upon the S. border, in the S. W. part of the co. Genesee River flows S. on the E. border. Its surface is rolling. Oatka (or Allens) Creek flows E. through near the center of the town. It is joined at Mumford by the Outlet of Caledonia Springs, forming an excellent water-power. The soil is loam, mixed with clay in the interior, and with sand and gravel in some localities, the whole underlaid by limestone. Gypsum is found in large quantities. **Scottsville,**[11] (p. v.,) in the E. part, contains 4 churches, a union school, extensive flouring mills,

[1] Among the early settlers were Joseph Morgan, from the W. side of the river, and a number of families from the Middle States. Philip Barton, David Thomas, James Smith, and John Bell came in 1807. Mr. Bell was killed by the falling of a tree. Mr. Joseph Smith and Henry Smith, from Rensselaer Co., N. Y., 1808. Elkanah Avery and Phineas Doty in 1809. The first death was that of Mr. Morgan, in 1789. The first child born was Mr. Morgan's, in 1790. John White kept the first inn. Benj. Gates built the first store; and John White, the first grist mill.

[1] Mr Shaeffer and his sons Peter and Jacob came in Dec. 1789. They found a settlement commenced by Ebenezer Allen and his brother-in-law Christopher Dugan, near the mouth of Allens Creek, a short distance below Scottsville. Allen had a considerable log house and about 60 acres improvement. The Shaeffers became the purchasers of his farm, paying $2.50 per acre. After the sale Allen left with his family for Mount Morris. The valley of the river below Shaeffer's was slow in settling. Joseph Morgan came in 1792. Andrew Wortman in 1794 or '95. Caleb Aspinwall, Peter Conkle, Frederick and Nicholas Hetteller were early settlers in the Shaeffer neighborhood. Reuben Heath came from Vt in 1799. The s. w. part was early settled and the auspices of Charles Williamson by Scotch farmers, whose were John McNaughton and family, near Mumford. Isaac Scott settled at Scottsville about 1790, and Donald McVean soon after. Zachariah Garbutt and family settled at what is now Garbuttsville, in 1803; and Powell Carpenter, near Scottsville, in 1804. The first marriage was that of Peter Shaeffer, jr., and a daughter of Jacob Schoonover, in 1790. (Ebenezer Allen had previously added another inmate to his harem by a pretended marriage with Lucy Chapman. See p. 711.) The first death was that of Peter Shaeffer, sen. Jacob Scott kept the first inn. Philip Garbutt and Abram Hanford the first store: and Peter Shaeffer, jr., built the first sawmill, in 1810, and the first gristmill, in 1811. John and Robert McKay built the first gristmill at Mumford, in 1805, and Donald McKenzie erected the first clothdressing works w. of Genesee River.

MONTGOMERY COUNTY.

THIS county was formed from Albany, March 12, 1772, under the name of "*Tryon Co.*"[1] Its name was changed April 2, 1784. Ontario was taken off in 1789, Herkimer, Otsego, and Tioga in 1791, Hamilton in 1816,[2] and Fulton in 1838. It lies in both sides of the Mohawk, centrally distant 30 miles from Albany, and contains 405 sq. mi. The general system of highlands which forms the connecting link between the northern spurs of the Alleghany Mts. on the s. and the Adirondacks on the N. extends through this co. in a N. E. and S. W. direction. Mohawk River cuts through the upland, and forms a valley 1 to 2 mi. wide, and 200 to 500 ft. below the summits of the hills. The valleys of several of the tributaries of the Mohawk extend several miles into the highland district at nearly right angles to the river valley. The hills bordering upon the river generally rise in gradual slopes, and from their summits the country spreads out into an undulating upland, with a general inclination toward the river, into which every part of the surface of the co. is drained. The principal tributaries of the Mohawk are the East Canada, Garoga, Cayadutta, Chuctenunda Creeks, and Evas Kill, on the N., and Cowilliga, Chuctenunda, Schoharie, Auries, Flat, Canajoharie, and Otsquaga Creeks, on the S. The highest point in the co. is Bean Hill, in Florida, and is estimated to be 700 ft. above tide, and the lowest point is the bed of the Mohawk, on the E. line of the co., 260 ft. above tide.

Gneiss, the only primary rock in the co., is found in patches, the principal locality being at "*The Noses,*" on the Mohawk.[3] Resting directly upon this are heavy masses of calciferous sandstone, appearing mostly on the N. bank of the river and extending into Fulton co.[4] Next above this are the Black River and Trenton limestone, not important as surface rocks, but furnishing valuable quarries of building stone. The slates and shales of the Hudson River group extend along the S. border of the co. and are found in a few places N. of the river. Drift and boulders abound in various places. The soil along the river consists of alluvial deposits and a deep, rich, vegetable mold, and upon the uplands it is mostly a highly productive sandy and gravelly loam. The productions are principally grass and spring grains. The uplands are finely adapted to pasturage, and dairying forms the leading pursuit. Upon the Mohawk Flats immense quantities of broom-corn are raised. There are several important manufactories in the co., consisting chiefly of woolen goods, carpets, paper, agricultural implements, sash and blinds, and castings. Quarrying is extensively carried on.[5]

The principal public works are the Erie Canal, extending along the S. side of the Mohawk, and the N. Y. Central R. R.,[6] on the N. bank. A wire suspension bridge crosses the Mohawk at Fort Hunter, and wooden bridges at Amsterdam, Fonda, Canajoharie, Fort Plain, and St. Johnsville. An iron bridge was built at Fort Plain, in 1858.

The county seat is located at Fonda, a pleasant village on the Mohawk, built on the site of the ancient Dutch settlement of "*Caughnawaga.*"[7] The courthouse is a fine brick edifice, containing the usual co. offices.[8] The jail is a stone building, adjacent to the courthouse.[9] The co. poorhouse is located upon a farm of 150 acres situated in Glen, about 3 mi. E. of Fonda. The building is old and poor, and has few arrangements for the health, comfort, or convenience of its inmates. The average number of inmates is 125. The farm yields a revenue of $1,000.

The first newspaper in the co. was established at Fort Plain, in 1827.[10]

[1] Named in Wm. Tryon, Colonial Governor. Present name given in honor of Gen. Richard Montgomery, of the Revolution. At first formed, this county included all the State west of Delaware co. and a line extending N. through Schoharie and along the E. lines of the present cos. of Montgomery, Fulton, and Herkimer, and continuing in a straight line to Canada.

[2] Part of it with Herkimer in 1791, and restored to Montgomery in March, 1797.

[3] Hornblende, hornblende schist, and colored granites.

[4] Potsdam sandstone, in places with siliceous quartz and nodules of anthracite coal, which has led to foolish expenditures of large sums in mining for coal. Near Sprakers Basin traces of lead have been found.

[5] Stone from these quarries were used in the construction of canal locks and dams, and in other works.

[6] Formerly "*Schenectady & Utica R. R.*" The Catskill & Canajoharie R. R., incorp. in 1830, was opened to Cooksburgh from Catskill in [illegible]. In 1842 it was [illegible], the track sold for $11,000 and taken up.

[7] Caughnawaga was [illegible] now included within the incorporation of the village of Fonda. The [illegible] tions of the removal were that a subscription of $4500 should be raised, and a site of not less than 3 acres donated to the co. This removal occasioned great dissatisfaction, and led to the division of the co. in 1838.

[8] By an act passed [illegible] Tryon co. was erected, [illegible] which practice appears to have been continued for some time.

[9] The jail is so constructed as not to answer the requirements of the law in the classification of prisoners. The courthouse and jail were erected at a cost of $30,000.

[10] *The Watch Tower* was [illegible] in 1827 by S. M.

The early history of this co. is full of incident and interest. At the time of the first advent of the whites it was the principal seat of the Mohawks, one of the most powerful tribes of the Five Nations. The policy adopted by the early Dutch settlers of the colony, and continued by their English successors, strongly attached a majority of these savages to their interests: and the unprovoked attack of Champlain, in 1609, made them hate the French in Canada with intense bitterness. In the wars that ensued, the Five Nations proved faithful allies to the English, and on many occasions shielded them from hostile attacks. In 1665–66 a French expedition, consisting of 600 men, under De Courcelles and De Tracy, was sent against the Indians, and proceeded as far as Schenectady: but, after much suffering and the loss of many men, the army returned to Canada without affecting any thing. Within the next few years several French expeditions were sent against the western tribes of the Five Nations, and in return the Indians made a descent upon Montreal in 1689, laid waste whole plantations, and destroyed many lives.[1] In retaliation, Count Frontenac sent several expeditions against the Indians and English, one of which destroyed Schenectady in 1690.[2] In the winter of 1692–93 the French again invaded the Mohawk country, surprised and destroyed two of their three castles,[3] and took about 300 prisoners. In the engagement at the third castle they lost 30 of their number; and in their retreat they were pursued by Maj. Peter Schuyler at the head of 200 regulars and militia, who succeeded in killing 33 and wounding 26 of their number and in rescuing 50 prisoners. Favored by the severe cold, the remainder escaped and fled to Canada through the great northern wilderness. Their sufferings on this journey were intense. As early as 1642–43, a French Jesuit visited the Mohawk settlements; and between that date and 1678, 10 missionaries of this order labored to bring over the Indians of this region to the French interests and the Catholic religion. Though attended with great hardships, and in one or two instances with death, these labors were in some measure successful, and in 1671 a large number of Indians removed from Caughnawaga to Canada.[4]

A military post, known as Fort Hunter, was established near the mouth of Schoharie Creek in 1711. About the same time a large number of German Palatinates, sent over by Queen Anne, settled upon the Hudson, and shortly after removed to Schoharie and the Mohawk Valley and settled upon lands given them by Government. At about the same period a considerable number of Holland Dutch, from Schenectady and vicinity, found their way into the co. and extended their improvements up the valley. In 1730 the first mill N. of the Mohawk was built on the site of "Cranes" Village by two or three brothers named Great; and this for a time served the settlements at German Flats, 50 mi beyond.[5]

The land grants in this co. were made in comparatively small tracts. The first were issued as early as 1703. On the 19th of Oct. 1723, a patent of 12,000 acres, called "*Stone Arabia*," N. of the

Mohawk, was granted to John Christian Garlock and others for the [illegible]. The principal grants were made between 1730 and 1740; and in 1762 these [illegible] patented land in the co.

About the year 1735, the British Admiral, Sir Peter Warren, acquired the title to a large tract of land known as "*Warrensbush*," mostly in the present town of Florida, and sent [illegible] Wm. Johnson, then but 21 years of age, as his agent. Johnson first located at the mouth of Schoharie Creek; afterward he removed to 4 mi. above Amsterdam, and finally to Johnstown. Through the influence of his uncle he received the appointment of Agent of Indian Affairs, which gave him great facilities for intercourse and traffic with the natives. Applying himself assiduously to the study of the character and language of the Indians, and adopting their habits and customs whenever it suited his convenience, he gained an ascendency and influence over them never before enjoyed by any white person. His easy and obliging manners made him equally a favorite with the border settlers; and until his death, which took place on the 24th of June, 1774, the events of his life are intimately interwoven with the history of the co.[1] His title and estates descended to his son, Sir John Johnson; but his commanding personal influence could not be inherited. Guy Johnson, son-in-law of Sir William,[2] Col. Daniel Claus, and Col. John Butler, were attached to the interests of the Johnson family, possessed large estates, and lived in what were then considered sumptuous residences in the Mohawk Valley. They had considerable influence with both whites and Indians. In the controversy between the colonists and the mother country which resulted in the Revolution, the Johnsons and their adherents strongly espoused the cause of the King, from whom they had received so many favors.

As a class, the German Palatinates sided with the colonies, and a majority of the other settlers entertained similar sentiments; but for a long time they were overawed, and their efforts at organization were thwarted by the zeal and activity of the tory leaders. In the spring of 1775, while the court was in session at Johnstown, through the influence of the tories the signatures of most of the grand jurors and magistrates were procured to a document opposing the measures of the Continental Congress.[3] This proceeding, coupled with others of a more aggressive and personal character, tended greatly to organize the opposition forces, to separate the friends and enemies of freedom, and to kindle feelings of bitter and vindictive hatred, which naturally led to all the horrors of civil war.

"*Tryon co*" was divided into 6 districts;[4] and, for the purpose of a more thorough organization, delegates were appointed in each by the Patriots to form a committee of public safety. Upon a meeting of these delegates a significant remonstrance was addressed to Col. Guy Johnson, Indian Agent, for his aggressive and partisan acts; he withdrew in June, 1775, to Cosbys Manor, above German Flats, under pretense of holding a council with the Indians in the w. part of the co.; and in a short time he fled to Montreal, by the way of Oswego, accompanied by a large number of dependents and followers. He continued to act as Indian Agent during the war, and by liberal rewards and still more liberal promises he greatly stimulated the natural ferocity of the Indians, and incited them to more active hostility. He was joined in Canada by Joseph Brant, a distinguished and educated Mohawk chief, and John and Walter N. Butler, 2 tories who afterward gained an infamous notoriety. At the head of marauding parties of tories and Indians, they afterward returned and committed the most inhuman atrocities upon their old friends and neighbors. Sir John Johnson remained at "Johnson Hall," but continued active in his intrigues, and kept up a correspondence with Col. Guy Johnson in Canada. His preparations to fortify "Johnson Hall" excited alarm; and in Jan. 1776, a committee, consisting of Gen. Philip Schuyler, Gen. Ten Broeck, and Col. Varick, was despatched from Albany to consult with the local committee of safety and satisfactorily arrange matters. Gen. Herkimer called out the militia; and the affair was finally settled by the surrender of Sir John as prisoner, and an agreement that his Scotch tenants should be disarmed. He was sent to Fishkill, but, being released on parole, he soon returned to Johnstown and resumed his intrigues. In May, Col. Dayton was sent with a regiment to arrest him; but, being warned of their approach, Sir John and his followers fled to the woods, and finally reached Canada by the way of Sacondaga and Racket Rivers, after 19 days' hiding and suffering.[5] Sir John received a commission as colonel in the British service, raised a regiment of tories known

[1] For his services while in command of the expedition which resulted in the defeat of the French under Dieskau, at the head of Lake George, he received the title of Baronet and a gift of £5000 from Parliament. From this time until his death he lived in ease and opulence, devoting his time to the management of public affairs and the improvement of his estate.

In the summer and fall of 1777, this co., in common with the whole northern and western frontier, was the scene of great alarm and of stirring military events, produced by the expedition of Burgoyne. Gen. St. Leger, at the head of a large body of tories and Indians, was dispatched by the way of Oswego to reduce the rebel posts and settlements on the Mohawk and join the main army at Albany. On the 3d of Aug. they laid siege to Fort Schuyler, upon the site of the present village of Rome. The militia of Montgomery co. were called out, and, under Gen. Herkimer, marched to the relief of the fort. On the way the bloody battle of Oriskany was fought, in which 200 of the brave patriots of the co. were killed and as many more carried into Indian captivity.[4] In the latter part of the same month, Genls. Arnold and Learned, at the head of 900 troops, marched up the river, and St. Leger hastily abandoned the siege and fled.[5] The destruction of the valley was thus averted, and for several months the inhabitants were allowed to remain undisturbed, save by small scalping parties, that hung round the unprotected frontiers and cut off the defenseless inhabitants.

In the spring of 1778, Gen. La Fayette, accompanied by Gen. Schuyler and Col. Duane, went to Johnstown and held a conference with a body of Indians, which resulted in a treaty of considerable subsequent benefit to the settlers. In the following summer the horrible butcheries at Wyoming, Harpersfield, German Flats, and Cherry Valley were perpetrated; and in the summer of 1779 the army of Gen. Clinton marched from this co. to join Gen. Sullivan's expedition against the chief villages and farming grounds of the Onondagas, Cayugas, and Senecas. On the 21st of May, 1780, Sir John Johnson, at the head of 500 Indians and tories, suddenly made his appearance at Johnson Hall. He arrived about sunset on Sunday, and, dividing his force into two parties, at daylight the next morning he made a simultaneous attack upon Tribes Hill and Caughnawaga. Several persons were killed and others taken prisoners, and every building upon the route, except those belonging to tories, was burned. The militia began to collect in considerable numbers, and toward night Sir John hastily retreated, and safely reached Canada by the way of the wilderness w. of the Adirondack Mts.[6] Near the last of the July succeeding, the militia of the co. were employed to convey a provision train sent to the relief of Fort Schuyler; and on the 2d of Aug., while they were absent, Brant, at the head of 500 Indians and tories, made an attack upon the settlements in the neighborhood of Fort Plain. Fifty-three dwellings were burned, 16 persons slain, and 60 women and children carried into captivity. Upon the approach of the militia from Johnstown and Schenectady, the party retreated. On the 15th of the following Oct. a large party of tories, Indians, and Canadians, under Sir John Johnson, Brant, and Cornplanter, made their appearance in the Mohawk Valley, at the mouth of Schoharie Creek, after having laid waste the Schoharie settlements above. From this point they marched up the valley, burning the houses, destroying the property, and murdering or taking prisoners all that they met. The militia under Gen. Robert Van Rensselaer hastily came together and marched to attack the invaders. On the 18th of Oct., Col. Brown, who commanded a small stockade fort at Stone Arabia, acting under the order of Van Rensselaer, marched out with 150 men to attack the enemy; but, receiving no support from the main army, the little detachment was soon routed, with the loss of the commander and 30 to 40 men killed. Sir John halted at Fox's Mills, about 8 mi. above Fort Hunter, in the town of St. Johnsville, and erected a temporary breastwork. At a late hour in the day he was attacked by a detachment under Col. Dubois, and the Indians under his command were defeated.[7] The Americans, under Van Rensselaer, fell back 3 mi. and encamped; and the next morning, upon marching forward to renew the attack, they found that the enemy had fled.[8] Sir John finally succeeded in making his escape,

[3] The Americans made several efforts to attach the Six Nations to their interests, or at least to induce them to remain neutral. In the winter of 1776-77, Col. Harper was sent to ascertain the object of the assembling of a large body of Indians at Oquago, on the Susquehanna. In the succeeding June, Brant, with a party of Indians, made a levy upon the settlers of the Unadilla; and many fled to a place of safety. Gen. Herkimer, at the head of 380 militia, marched to meet him; and on the 27th of June, 1777, a conference was held between the general and the chief, but without producing any definite results. All efforts to propitiate the Six Nations were then abandoned, and all conferences ceased until the close of the war, when the Indians were called upon, as vanquished enemies, to confirm the surrender of most of their lands as an atonement for their hostility.

[4] There was scarcely a hamlet in the valley that did not lose one or more of its inhabitants.

[5] For further particulars concerning these transactions, see page 316.

[6] The principal object of this incursion was to obtain the silver plate which had been buried by Sir John on his last hasty flight from Johnson Hall. The plate was recovered and carried to Canada in the knapsacks of 60 men.

[7] This engagement is known as the battle of "*Klocks Field*."

[8] Du Bois had nearly gained the victory, when Van Rensselaer came up and gave orders not to renew the battle until the signal should be given from headquarters. The forces of the former were under arms all night, momentarily expecting the promised

though his force was greatly reduced by hunger, fatigue, and the continual, harassing attacks of the militia, which hung upon their rear.

The prospects of the Mohawk Valley were now gloomy in the extreme. Nearly every [illegible] had been desolated, and nearly every family had lost some of its members.[1] In the spring of 1781, Col. Willett assumed the command of the American forces on the Mohawk, and, by his [illegible] skill, daring, and knowledge of Indian warfare, he not only successfully repelled all attacks made upon the Mohawk settlements, but carried the war into the enemy's own country.

On the 9th of July, 1781, 300 Indians, under a tory named Doxtader, made a sudden attack upon the settlement of Currytown, (in the town of Root.) After burning the buildings and collecting a large amount of booty, they retreated. Col. Willett, at the head of 150 militia, immediately pursued and overtook them at "*Durlah,*" (Dorlach,) a few mi. over the line of Schoharie co. A severe skirmish ensued, when the Indians fled, leaving 40 of their number dead on the field.[2] The final incursion into the Mohawk Valley was made Oct. 24, 1781, by a party of 600 British and Indians, under Maj. Ross and Walter N. Butler, and made their first appearance in the neighborhood of Warrens bush. They marched to the vicinity of Johnson Hall and commenced the usual work of plunder and murder, but were arrested by a sudden attack by forces under Cols. Willett, Rowley, and Harper. A severe engagement ensued, resulting in the retreat of the enemy. Col. Willett pursued, and, coming up with the rear guard at West Canada Creek, another skirmish took place, in which the infamous Walter N. Butler was killed.[3] The shattered remnant of the British forces escaped by way of Oswego. This affair practically ended the war in Tryon co., and the remaining citizens, stripped of almost every thing except the soil, were allowed to resume in peace their accustomed employments.[4] In a few years the ravages of the war were completely obliterated, and the fertile regions of Central and Western N. Y., which had become known through the military expeditions that had traversed them, soon began to fill up with a New England population. The splendid domains of the Johnsons and other royalists were confiscated, and the feudal tenants of the colonial period were replaced by enterprising freeholders under the new government.[5]

AMSTERDAM[6]—was formed from "*Caughnawaga,*"[7] March 12, 1793. Perth (Fulton co.) was taken off in 1838. It lies on the N. bank of the Mohawk, in the N. E. corner of the co. Its surface consists of the intervale along the river, and a rolling upland gradually rising for the space of 2 mi. and attaining an elevation of 300 to 500 feet. The principal streams are the Kayaderosseras, 3 mi. W. of Amsterdam Village, Chuctenunda,[8] at the village, and Evas Kil,[9] near the E. border. The soil in the valley is a deep, rich alluvium, and upon the hills it is a fertile, gravelly loam. Near Tribes Hill are extensive stone quarries. A considerable amount of manufactures is carried on in town, consisting of mill machinery, agricultural implements, carriages, car springs, and carpets, at Amsterdam Village, and of woolen goods at Hagemans Mills. **Amsterdam,**[10] (p. v.,) incorp. April 20, 1830, contains 4 churches, the Amsterdam Female Seminary, a bank, printing

signal, and they had the inexpressible mortification and chagrin to see the beaten foe slipping through the net in which they had been caught, without the possibility of preventing their escape. Had it not been for the interposition of cowardice of Gen. Van Rensselaer, the whole party might have been taken. At the time, he was openly charged with cowardice or treachery by the Oneida chief, and he entirely lost public confidence.

[1] Some idea of the extent of these ravages may be formed from a statement prepared by the supervisors of "*Tryon co.,*" dated Dec. 20, 1780, and addressed to the legislature. They therein stated that 740 buildings had been burned within the co.; that 354 families had abandoned their habitations and removed; 613 persons had deserted to the enemy, 197 had been killed, 121 taken prisoners, and 1200 farms lay uncultivated by reason of the enemy. This statement did not include Cherry Valley, Newtown-Martin, Middlefield, Springfield, Harpersfield, and Old England District, which had been totally deserted and abandoned. The population of the co. at the beginning of the war was about 10,000. While the sufferings of the colonists were thus great, the Indian loss was much greater. Their whole country had been ravaged, their homes and crops destroyed, and a large portion of their number had died in battle or by starvation. At the close of the war the miserable remnant of the once powerful nations humbly sued for peace, and were content to accept terms that deprived them of almost their entire country.

[2] By stratagem Col. Willett succeeded in drawing the Indians into an ambuscade. They fled so hastily that all their baggage and plunder was captured. On their retreat they murdered a number of prisoners to prevent their escape.

[3] Walter N. Butler was one of the most inhuman wretches that ever disgraced humanity. Ferocious, bloodthirsty, and cruel, he seemed to revel in perfect delight at the spectacle of human suffering. He surpassed the savages in barbarity, and many a victim was saved from his clutches by the interposition of the Indian chief Brant.

[4] Several acts were passed in 1780-'81, and '82, directing the commissioners of sequestration to relet certain confiscated farms. Rev. Daniel Gros, of Canajoharie, acted as one of the commissioners, and his acts are preserved among the public papers of the State.

[5] For several years after the war, ghosts were reported as frequently seen stalking about the old homesteads of the royalists. The appearances which gave rise to the report were likely to be the tories themselves, returned in disguise to obtain valuables which had been secreted upon their precipitate flight. The settlers, who had suffered so much, were slow to forget the injuries they had received, and for many years after, no other Indians or tories, who had been engaged in the war, could show themselves in the settlement with safety.

"*Caughnawaga*" was formed as a town May 7, 1788. It embraced all that part of Montgomery co. N. of the Mohawk and E. of a line extending from the Noses to the [illegible]. This town was divided in 1792 into Amsterdam, Mayfield, Broadalbin, and Johnstown.

Pop. 2044. **Hagamans Mills** (p. v.) has 124 inhabitants, **Cranesville**[1] (p. v.) 92, and **Mannys Corners** 8 houses. **Tribes Hill,**[2] (p. o.,) on the line of Mohawk, is a hamlet. A wire suspension bridge here crosses the Mohawk to Florida.[3] The first settlement was commenced about 1710, by Dutch and Palatinates. About 1740, Sir Wm. Johnson built a large stone mansion upon the w. side of the Kayaderosseras, 3 mi. w. of Amsterdam Village.[4] This building was fortified and named "Fort Johnson." Col. Daniel Claus and Guy Johnson, sons-in-law to Sir William, occupied fine mansions respectively 1 and 2 mi. below Fort Johnson,[5] previous to the Revolution. The first settlers at Amsterdam Village were Albert Veeder, E. E. De Graff, Nicholas Wilcox, and Wm. Kline. The first church (Ref. Prot. D.) was formed in 1792.[6] The first settled minister was Rev. Conrad Ten Eyck, in 1799. There had been preaching in town at a much earlier period.

CANAJOHARIE[7]—was formed as a district March 24, 1772, and as a town March 7, 1788. Minden was taken off in 1798, a part of Root in 1823, and a part of Minden in 1849. It lies on the s. border of the co., w. of the center. The surface consists of the intervale of Canajoharie or Bowmans Creek,[8] and undulating uplands 200 to 600 feet above the valley. The soil is a gravelly loam, derived from the disintegration of the underlying slate, in some places intermixed with clay. The cultivation of hops receives some attention. A small woolen factory is located on Bowmans Creek. **Canajoharie,** (p. v.,) incorp. April 30, 1829, contains 5 churches, the Canajoharie Academy, and a bank; pop. 1500. A bridge crosses the Mohawk at this place, connecting it with the village and R. R. station of Palatine Bridge. **Ames,**[9] (p. v.,) in the s. part of the town, contains an academy and 204 inhabitants, and **Buel,**[10] (p. v.,) in the s. w. part, 25 houses. **Sprout Brook,** (p. o.,) **Mapleton,** and **Marshville** are hamlets. The first settlement in town was commenced in early colonial times; but the precise date is not known.[11] During the Revolution the people warmly espoused the American cause, and were afterward among the greatest sufferers in the Mohawk Valley.[12] Gov. Clinton, while marching to join Sullivan in 1779, made this place his headquarters for some weeks.[13] In Aug. 1780, Brant made an incursion into the valley and destroyed nearly the whole settlement.[14] During the war several other incursions were made; and the people were often driven to the utmost extremity. Several small forts were built in the town, which afforded some protection to the people.[15] In 1795, Archibald and James Kane established themselves as merchants at this place, and commenced a business which soon grew to be one of the largest in the interior of the State.[16] In 1823, the "Central Asylum for the Instruction of the Deaf and Dumb" was located near Buel, in this town; but in 1836 it was united with the one previously established in New York City.[17] The first church (Free Will Bap.) was organized at Ames, in 1796–97, by Rev. George Elliott.[18]

CHARLESTON—was formed from Mohawk, March 12, 1793.[19] Glen and a part of Root were taken off in 1823. It is the most southerly town in the co., and the only one not bordering upon the Mohawk. It lies upon the high plateau region immediately w. of Schoharie Creek; and the

[4] This edifice was richly ornamented with carvings of oak and mahogany, and at the time of its erection it was one of the finest mansions in the colony. It is still standing, and is the property of Algernon Young, Esq. Sir William lived here for many years surrounded by numerous dependants, and was frequently visited by great numbers of Indians, by whom he was highly esteemed. He built a mill upon the Kayaderosseras, near his mansion.

[5] The former of these was burned, and its site is now occupied by the hotel of Chas. Christ. The latter, known as "Guy Park," is still standing, between the R. R. and river 1 mi. w. of Amsterdam. It is now owned by Jas. Stewart. A tract 1 m. square was originally attached to each of these residences, but the whole was confiscated and sold with the estates of the owners.

[15] A fort was built here at an early period as one of the chain of fortifications to Oswego. It was 100 ft. square, 14 ft. high, with bastions at the angles and was armed with several small cannon. In 1781 the house of Philip Van Alstyne was palisaded and named Fort Van Rensselaer. It is still standing. Fort Ehle stood 1 mi. E. of Canajoharie. An Indian burial ground occupied the hillside just w. of the village, and several skeletons have been found, in a sitting posture, facing the E.

greater part of the surface is an undulating upland. On the E. it descends in steep declivities to the valley of the creek, which is here a narrow ravine. Its streams are small. The soil is generally loam intermixed with clay, and is particularly adapted to spring grains and dairying. The town has a limited amount of manufactures, consisting principally of such articles as [illegible] goods, and flour. **Burtonsville,**[1] (p. v.,) on Schoharie Creek, in the S.E. corner of the co., contains 32 houses; **Charleston Four Corners,** (p. v.,) in the S.W. corner, 30; and **Charleston,** (p. v.,) near the N. border, 20. **Carytown** and **Oak Ridge** are hamlets. A portion of this town was included in the patent of 24,500 acres granted to Wm. Corry in 1637; and others were portions of the "*Stone Heap Patent,*" granted to John Bowen and others in 1770, and Thomas Machin's Patent of 1787. The first settlements were probably made previous to the Revolution.[2] The census reports 5 churches in town.[3]

FLORIDA—was formed from Mohawk, March 12, 1793. It embraces that part of the co. lying S. of the Mohawk, and E. of Schoharie Creek. The greater part of the surface is a rolling upland, 600 ft. above the valley. Bean Hill, in the S.W. part, is the highest land in the co. The declivities bordering upon the streams are usually steep. The two principal streams within its borders are Chuctenunda and Cowilliga[4] Creeks. The soil and productions are similar to those of neighboring towns. Several sulphur springs are found in town, the most noted of which is near Scotch Bush. The Erie Canal crosses the Schoharie Creek between this town and Glen, on a costly aqueduct. Broomcorn is one of the principal agricultural products, and brooms are extensively manufactured. **Port Jackson** (p. v.,) is a canal village on the Mohawk, opposite Amsterdam. Pop. 369. **Minaville,** (p. v.,) on Chuctenunda Creek, near the center, contains 50 inhabitants. **Fort Hunter,**[5] (p. o.,) at the mouth of Schoharie Creek, and **Scotch Bush,** (p. o.,) near the S. border, are hamlets. One of the 3 Mohawk castles was situated at the mouth of Schoharie Creek at the first advent of the whites. The first white settlement in this co. is supposed to have been made in this town. Fort Hunter[6] was built here by the whites in 1711. Queen Anne's Chapel was soon after erected, and was furnished with a valuable set of communion plate by Queen Anne.[7] The fort was garrisoned until after the French War, when it was abandoned. During the Revolution the chapel was enclosed with palisades, and converted into a strong fortress defended by cannon. In Oct. 1780, several houses were burned on the opposite side of the creek by the forces under Sir John Johnson, but the fort was not molested. Before the close of the war several newly arrived German emigrants settled in town, and they were followed soon after by Scotch and Irish families.[8] The first preacher after the war was Rev. Thos. Romeyn, (Ref. Prot. D.,) in 1784. The census reports 5 churches in town.[9]

GLEN[10]—was formed from Charleston, April 10, 1823. It lies in the S.W. angle formed by the junction of Schoharie Creek and the Mohawk. Its surface consists principally of uplands about 600 feet high, descending by abrupt declivities to the narrow intervales along the streams. The principal streams are Auries[11] Creek, a tributary of the Mohawk, and Irish Creek, a branch of the Schoharie.[12] The soil is generally a clayey loam. One mi. E. of Voorheesville is a chalybeate spring.[13] **Fultonville**[14] (p. v.,) is situated on the Mohawk and the Erie Canal. Pop. 560. **Voorheesville,** Glen p. v., near the center of the town, contains 40 houses, and **Auriesville,** (p. v.,) a canal village near the mouth of Auries Creek, 170 inhabitants. The land bordering upon the river was granted in 10 patents to different persons in 1722 to 1726, and the greater part of the remainder to James De Lancey in 1737. Peter Quackenboss settled on Scott's Patent, near Auries Creek.

soon after it was secured, and was probably the first white inhabitant of the town. About 1740, 16 Irish families, under the patronage of Sir Wm. Johnson, settled on Corry's Patent, a few mi. s.w. of Fort Hunter. After making considerable improvements, they abandoned their location and returned to Ireland in consequence of threatened Indian disturbances.[1] The first church (Ref. Prot. D.) was formed at Glen; Rev. Henry V. Wyckoff was the first pastor.[2] This town was the scene of many interesting incidents connected with the war. It furnished its full proportion of victims at the battle of Oriskany, and sustained an equal share in the losses and sufferings from Indian incursions.[3] The last council within the co. previous to the Revolution was held between the Indians and Americans Oct. 13, 1775, on the farm now owned by John S. Quackenboss, on the Mohawk Flats, 2 mi. E. of Fultonville.

MINDEN—was formed from Canajoharie, March 2, 1798. Danube (Herkimer co) was taken off in 1817. It lies upon the s. bank of the Mohawk, in the extreme w. part of the co. Its surface is principally an undulating upland, with steep declivities bordering upon the streams. The principal streams are the Otsquaga[4] and its tributary the Otsquene. Prospect Hill, called by the Indians "*Ta-ra-jo-rhies*,"[5] lies upon the Otsquaga opposite Fort Plain. The soil is a fine quality of gravelly and clayey loam, and is particularly adapted to grazing.[6] **Fort Plain,** (p. v.,) incorp. In this town are found the remains of one of those ancient fortifications which are so common in Central and Western New York and throughout the Western States, showing that the co. was inhabited long prior to the advent of the Indians.[10] During the French War, Fort Plain was erected on the summit of the hill, half a mi. N. W. of the village.[11] During the Revolution, several other forts were built to protect the people from the sudden attacks of the Indians.[12] The first settlements in this town were among the first in the co. The early settlers were Germans, among whom were the Devendorf, Waggoner, and Gros families, Andrew Keller, and Henry H. Smith.[13] John Abeel, an Indian trader, settled here in 1748.[14] In common with the other valley towns, these settlements were ravaged by Brant and Johnson in 1780. At the time of Brant's incursion the men were mostly absent, and the women were shut up in the forts for safety. Upon the

Near the house of the Van Eps a small blockhouse was erected toward the close of the Revolution. —— Hazard taught the first school, at the house of J. S. Quackenboss; Wm. Isaac Quackenboss kept a store on the Mohawk, at Fultonville. Peter and Simon Mabie built the first sawmill and carding machine, in 1797, and Peter Quackenboss a gristmill, on Auries Creek, soon after.

[3] In the fall of 1779 George Cuck, a noted tory, who had often led scalping parties of Indians to the homes of his old neighbors, was seen lurking about, and at one time was fired upon and narrowly escaped. It was supposed that he had returned to Canada; but toward spring it became known that he was concealed at the house of John Van Zuyler, a kinsman and brother tory. A party surrounded the house, dragged Cuck from his hiding place and shot him, and arrested Van Zuyler and sent him prisoner to Albany. In the fall of 1780 the whole settlement was ravaged, and many of the people were murdered. One day Isaac Quackenboss, while out hunting, discovered three hostile Indians sitting upon a log. He fired, and killed two, and mortally wounded the third.

Across the tongue, at its narrowest part, is a curved line of breastworks 240 ft. in length, inclosing an area of about 7 acres. A gigantic pine, 6 ft. in diameter, stands upon one end of the embankment, showing that the work must have been of great antiquity.—*Smithsonian Contributions, Vol. II Art. 6.*

[11] This fort was built by a French engineer for the Government, and was the finest fortification in the valley. It was octagonal, 3 stories high, each story projecting beyond the one below. In the lower story was a cannon, which was fired in cases of alarm to notify the people of danger.

[12] Fort Plank was situated about 2 mi. N. W. of Fort Plain, on the farm now occupied by C. House. Fort Clyde was situated 2 mi. S. W. of Fort Plain, near the residence of Peter Devendorf, at Freysbush. Fort Willett was W. of Fort Plank.

[13] Henry Hayse, a German, taught the first school; Isaac Countryman built the first gristmill, soon after the war, and Isaac Paris kept the first store, about the same time. A large stone dwelling was erected here for the sons of Guy Clark in 1738, but was soon abandoned. It obtained the reputation of being haunted, and was given away, 50 years ago, on condition that it should be demolished.

[14] In his previous intercourse with the Indians, Abeel had married the daughter of a Seneca chief, after the Indian fashion. A child of this marriage was the famous chief Cornplanter. Abeel subsequently married a white woman, and at the commencement of the war was living upon his farm. During the incursion of Oct. 1780, Abeel was taken prisoner by a party of Indians, and, while momentarily expecting death, Cornplanter addressed him as father and assured him of his safety. He was given his choice either to accompany the Indians under the protection of his son, or to return to his white family. He chose the latter; and after the war Cornplanter visited him, and was received by his Fort Plain relatives with the civilities due his rank and manly bearing. The chief died at his residence in Penn., March 7, 1836. Stone, in his Life of Brant, says that Cornplanter was more than 100 years old at the time of his death. Mr. Webster, of Fort Plain, a descendent of John Abeel, states that Abeel did not make his appearance in the Indian country until 1748, and that Cornplanter was born about 1750. This would make his age about 30 when he accompanied the expedition that took his father prisoner, and but 80 when he died.

approach of the enemy the women showed themselves dressed in men's clothes, and the Indians thereupon kept at a respectful distance. The first church (Ref. Prot. D.) was organized at Fort Plain, long before the war. The census reports 9 churches in town.[1]

MOHAWK—was formed from Johnstown, April 4, 1857.[2] It lies upon the N. bank of Mohawk River and near the center of the co. The surface is uneven, and gradually rises from the river to the N. line, where it attains an elevation of about 400 ft. above the valley. Its principal streams are Cayadutta and Da-de-nosse-a-ra[3] Creeks. The soil is generally a good quality of gravelly loam. **Fonda,**[4] (p. v.,) pleasantly situated upon the Mohawk, is the co. seat. Besides the co. buildings, it contains 2 churches, a bank, printing offices, and several manufactories. Pop. 687. **Tribes Hill,** (p. v.,) on the border of Amsterdam, contains 227 inhabitants. The site of the present village of Fonda was called "*Caughnawaga*"[5] by the Indians, and was one of the favorite resorts of the Mohawks. It was the scene of some of the earliest labors of the French Jesuits among the Five Nations, two of whom lost their lives here in 1646. The names of the first actual white settlers are not known. Nicholas Hausen[6] settled at Tribes Hill before 1725, and others, by the names of Fonda, Vanderworker, Doxtader, and Fisher, at an early day.[7] Among the other residents of the town before the Revolution were Col. John Butler and his son Walter N., who afterward attained an infamous notoriety for their inhuman atrocities and for the vindictive hate which they seemed to cherish against their old whig neighbors.[8] The principal weight of the incursion of Sir John in May, 1780, fell upon the two settlements of Tribes Hill and Caughnawaga.[9] In the autumn of the same year the second incursion of Sir John swept over the town, destroying the greater part of the property that escaped the first. A stone church (Ref. Prot. D.) erected in 1763 is still standing.[10] Rev. Thos. Romeyn was the first pastor. In 1795 he was succeeded by Rev. Abraham Van Horne.[11] The census reports 3 churches in town: Ref. Prot. D., True D., M. E.

[2] Can. should be taken not to confound this town with one of the same name S. of the river, abolished in 1796. See Note 1 to Charleston.

[3] Signifying "trees having excrescences."

[4] Named from Douw Fonda, who removed from Schenectady and settled here in 1771. At the time of the Revolution he was living on the flats, between the present turnpike and the river, a few rods E. of the road leading to the bridge, at which place he was murdered by the Indians under Sir John, May 22, 1780. At the time of his death he was 84 years old. In former years he had greatly befriended the Johnson family; but the ruthless savages led by Sir John spared neither friend nor foe. His three sons, John, Jellis, and Adam, were stanch whigs, residing in the neighborhood. Indian name, Ga-ne-wa-ta, "on the rapids."

[5] Meaning "a town in the water," or "at the rapids."

[6] Patents of 1000 acres each, on the Mohawk, were granted to Nicholas Hausen and his brother Henrick, July 12, 1715.

[7] The first birth N. of the river, of which there is any record, was that of Henry Hausen. —— Collins taught a school in 1774. Jellis Gilbs Fonda is said to have been the first merchant west of Schenectady. He carried on an extensive trade with the native tribes, and with the whites at Lotts Schuyler and Stanwix and the forts at Oswego, Niagara and Schlosser. His sales consisted chiefly of blankets, trinkets, ammunition, and rum, and his purchases of peltries, ginseng, and potash. At one time before the Revolution his ledger showed an indebtedness of over $10,000 in the Indian country. John Chaley was an early settler at Tribes Hill. He was in the war, and found his own brother arrayed against him.

[8] Alexander White, Colonial Sheriff of Tryon co., resided on the present school house. He was a zealous tory, and [illegible] to flee to Canada. He was succeeded by John Frey, appointed by the Provincial Congress.

The settlement against Tribes Hill was led by Henry and Wm. Bowen, who had lived in the vicinity. Passing the tory settlement of Albany Bush (in Johnstown) without molestation, they proceeded to the house of Col. Putnam, a stanch whig at Tribes Hill, and there by mistake murdered two tories, who had hired the place a short time before. From this place they went up the river, plundering the houses and murdering their old friends and neighbors. Every building was burned except the church and parsonage, and several slaves and white men prisoners were carried to Canada. The women were not particularly molested on this occasion. At the house of Col. Fred. Fisher they were warmly received by the Col.'s family, consisting of himself, his mother, and his two brothers John and Harmon. The Col.'s wife and children had been sent to Schenectady for safety; and his two sisters and an old negro, on the first alarm, fled to the woods and escaped. The Indians made a desperate attack upon the house, and a constant firing was kept up by the men; but their ammunition was exhausted. They then all retreated to the chamber except John, who stood in the stairway and defended it with a hatchet until he had killed 7 Indians. He then retreated above and, slipping upon some peas which lay upon the floor, he fell, and was dispatched with a tomahawk. Harmon jumped out of the window to put out the fire that had been applied to the roof, and while standing on the fence he was shot to death. [illegible] The negro was knocked down with the butt end of a musket and left for dead. The Col. was also knocked down by a tomahawk, dragged down stairs by his hair, and thrown upon the ground, when an Indian jumped upon his back, drew a knife across his throat, as was supposed, cutting it from ear to ear, then, cutting round the scalp, seized it by his teeth and tore it from his head, and finally gave him a blow in the shoulder with his hatchet and fled. The Col. had not lost his senses through all this mangling, and his throat, being protected by a leather belt worn inside of his cravat, was only slightly wounded. As soon as the Indians disappeared, he arose, went up stairs and brought down his mother, placed her in a chair and leaned her up against the fence; returned, and brought down the body of his brother John and laid it on the grass; then, becoming exhausted from loss of blood and the effect of the scalping [illegible] of lying that [illegible] down. [illegible] The negro and girls soon returned and found the [illegible] down and the dead and wounded as described. By signs the Col. made known to the negro that he wanted water, who immediately [illegible] and [illegible] drank and also bathed his wounds. [illegible] A tory named Clement passing by, the negro asked what he should do: the reply, given in German, was, "Let the d—d rebel die." According to the directions of the Col., the negro caught the colts, which had never been broken, harnessed them to the wagon, and took him to the house of Putnam, at Tribes Hill. From there he, together with his mother, sisters, and the bodies of his brothers, was conveyed across the river [illegible] down, and he had his wounds dressed for the first time. After five years' suffering, he nearly recovered from the effects of his wounds. He built a new house [illegible] lived 20 years after he was wounded,—for several years holding the office of First Judge of the co. His mother also recovered from her wounds, and lived with him. After the war the Indian who scalped him returned to the settlements, and stopped at a tavern kept by a tory at Tribes Hill. He was [illegible] lord, who was a whig, sent word immediately to the house of Col. Fisher that the Indian was there and would soon call at his house. The family, knowing that the Col. had sworn revenge, and wishing [illegible] the news from him. As they were all in the front room, about the time the Indian was expected they overset a pot of lye upon the hearth, and put out the fire. [illegible] down until they could escape. When the Indian came to the door [illegible] addressed him in the Indian tongue, told him her son's intentions, and pointed [illegible] in readiness for him. The Indian listened, gave a grunt, and ran away with all speed.

[9] In 1848 a [illegible] was [illegible] was [illegible] was [illegible] discontinued.

[10] He died in 1810 [illegible] During his ministry he married 1,000 [illegible] Stone's N. Y. City.

PALATINE—was formed as a district, by the name of "*Stone Arabia*," March 24, 1772, and its name was changed March 8, 1773. It was formed as a town March 7, 1788, embracing all the territory between "Little Falls and The Noses," and extending from the Mohawk to Canada. Salisbury (Herkimer co.) was taken off in 1797, Stratford (Fulton co.) in 1805, Oppenheim (Fulton co.) in 1808, and Ephrata (Fulton co.) in 1827. It lies along the N. bank of the Mohawk, W. of the center of the co. Its surface is mostly an upland, 200 to 500 ft. above the valley, much broken by deep, narrow ravines, and descending irregularly toward the river. The principal streams are the Kau-a-da-rauk,[1] in the E. part of the town, and the Garoga, in the W. The soil is fertile, and well adapted to grazing.[2] **Stone Arabia,** (p. v.,) near the center of the town, contains about 50 houses, and **Palatine Bridge,** (p. v.,) on the Mohawk opposite Canajoharie, 40. **Palatine Church,** (Palatine p. o.,) on the W. border, is a hamlet. The first settlement was made in town in 1713, by German Palatinates, who came over in 1710. The larger part of the Stone Arabia Patent was within the limits of this town.[3] Wm. Fox settled near Palatine Church, and Peter Waggoner a little below, on the Mohawk, in 1715. The early records of the settlement are lost.[4] A stockade called Fort Paris, the ruins of which are still visible, was built at Stone Arabia, and another, called Fort Keyser, 1 mi. N. The disastrous engagement resulting in the death of Col. Brown was fought within this town, between Stone Arabia and the river.[5] The Ref. Prot. D. church at Stone Arabia is one of the oldest in the valley.[6] The stone church (Luth.) at Palatine Church was built in 1770.[7] The census reports 3 churches in town; 2 Ev. Luth., Ref. Prot. D.

ROOT[8]—was formed from Canajoharie and Charleston, Jan. 27, 1823. It lies upon the S. bank of the Mohawk, near the center of the co. The hills which border upon the river rise abruptly to a height of 630 feet,[9] and from their summits the country spreads out into an undulating upland. The high hills just below Sprakers, on opposite banks of the river, are called "The Noses." The high ridge near the E. border is known as "Stone Ridge." The principal streams are Platte Kil, and Lashers and Flat Creeks. Mitchells Cave,[10] in the vicinity of The Noses, consists of several apartments, with the roof hung with stalactites. The soil is a fine, gravelly loam. **Leatherville** (Root p. o.) contains 15 houses, and **Currytown,**[11] **Sprakers Basin,** (p. o.,) **Flat Creek,** (p. o.,) and **Browns Hollow,** about a dozen each. **Yatesville** is a hamlet on the canal. The first settlers were Jacob Devendorf, at Currytown, Rudolph Keller, David and Fred. Luce, and Jacob Lainner.[12] The first church (Ref. Prot. D.) was formed at Currytown. Rev. Peter Van Buren became its pastor in 1806.[13] The principal incursions into this town during the war were those made in the summer and fall of 1781. The weight of the first of these, led by the tory Doxtader, July 9, 1781, fell upon the settlements in and near Currytown.[14] In Oct. of the same year Ross and Butler passed through the town, but committed no depredations, except capturing part of a funeral procession, and taking a few prisoners at Stone Ridge.

ST. JOHNSVILLE[15]—was formed from Oppenheim, (Fulton co.,) April 18, 1838. It lies upon the N. bank of the Mohawk, in the W. part of the co. Its surface consists of a broad river intervale and a broken upland gradually rising N. of it. Its streams are East Canada, Crum, Fox, Zimmermans, Caldwell, and Mother Creeks. Upon East Canada Creek, 1½ mi. from its mouth, are a succession of falls and rapids descending 75 feet in a distance of 80 rods. The soil is a fine quality of gravelly loam. **St. Johnsville,** (p. v.,) on the Mohawk, was incorp. in 1857. It contains a woolen and pitchfork factory, and is an important station on the Central R. R. Pop. 648. The first settlement at the village was made by Jacob Zimmerman, in 1776.[16] During the Revolution

2 More [illegible] is made in this town than in any other in the co. The aggregate is more than 400,000 lbs.

3 This purchase extended along East Canada Creek, in the rear of Hans Hs and Van Slyck's patents.

4 The German was the language taught in the first schools. — Rebecca taught an English school in 1782, and Alexander Ewing in 1784. Chris. Fox built a gristmill in 17[illegible], who it was built. [illegible] 1750. 6 See page 110.

6 The records of this church commence in 1739, when it had but 10 members. The present edifice was erected in 1785, and the church was reorganized in 1790. A Lutheran church built at Stone Arabia in 1770 was burned in 1780.

7 The subscriptions for this church were mostly furnished by the Nellis families, who became tories, and in consequence the church was not burned. Several shots were fired into it by the party under Sir John Johnson, one of the shot holes being still visible.

11 Named from Wm Curry, the patentee

12 The first schools were German — Glavcher taught an English school at The Noses, in 1784. Albert Vanderworker kept the first inn, at an early day.

13 The census reports 3 churches in town; Christian, M. E., Ref. Prot. D.

14 Upon the alarm being given, the settlers hastened to a picketed blockhouse near the dwelling of Henry Lewis, closely pursued by the enemy. Every house in the village except one was set on fire; but the flames were extinguished by the vanguard of Col. Willett's forces, under Capt. Robert Kean. Frederick, son of Jacob Devendorf, was scalped, but he recovered. Jacob, jr., another son, was taken prisoner, and was scalped on the request of the Indians. He also recovered, and lived to the age of 85 years. He died in 1854, one of the wealthiest farmers in the valley. Mary Miller, a little girl, was scalped and found alive, but died soon after. Several other prisoners were murdered. Most of the cattle driven away were abandoned, and found their way back to the settlement.

15 Named from St. John's Church, built in the village at an early day.

16 The first settlers of the town came in long prior to this,

the house of Christian Klock, three-fourths of a mi. w. of Palatine Church, was stockaded and named "Fort House."[1] The house of Jacob Zimmerman was also stockaded. These forts were both attacked, but never taken. Fort Hill, situated on an eminence E. of East Creek, was erected during the French War. It was repaired and used during the Revolution. The battle between the forces of Sir John and the advanced guard of Van Rensselaer's army, under Col. Dubois, was fought at "*Klocks Field*," near "*Fort House*," Oct. 18, 1780. The enemy forded the river, and retreated up the valley during the night following. The Indians, in small parties, continued to prowl about the settlement during the war, and shot and captured several of the inhabitants.[2] A church was built by Christian Klock in 1756; the Rev. Mr. Rosekrantz was the first preacher, and John Henry Disland the second. The census reports 2 churches; Ref. Prot. D. and Union.

but the precise date is unknown. They were Germans, and among them were families named Hellebralt, Waters, Getman, Van Rip[illegible], Walrath, and Klock. A German school was taught by Henry Hayes at an early day. The first English school was taught by Lot Ryan, an Irishman, in 1792. Chris. Nellis kept an inn in 1783, and a store in 1801. Jacob Zimmerman built the first gristmill, during the Revolution, and Geo. Klock the second, in 1801.

NEW YORK COUNTY.

The city of New York[1] was incorp. by Gov. Stuyvesant in 1652, and its municipal powers were confirmed and enlarged by Gov. Dongan, April 22, 1686, and by Gov. Montgomerie, April 19, 1708. An act was passed Oct. 14, 1732, confirming its rights: and subsequent enactments were embodied in one act in the revised laws of 1813 and in the revised statutes of 1828. Numerous changes in the details of the municipal government have been made from time to time.[2]

The co., from the beginning, has embraced Manhattan, Governors, Bedloes, Ellis's, Blackwells, Wards, and Randalls Islands, and the lands under water to low water mark on the shores opposite, in Westchester, Queens, and Kings cos., and in New Jersey.[3] Manhattan Island is 13½ mi. long, by 2½ mi. wide at the broadest part. It is centrally distant 130 mi. from Albany, and contains an area of 22,000 acres.[4] It is separated from Westchester co. by a strait known as Spuyten Duyvil Creek,[5] and Harlem River. The surface of the island was originally quite broken by ridges of gneiss and hornblendic slate, especially in the N. part: and immense masses of rock and earth have been removed in grading.[6] A deep valley extended across the island on the line of Canal St.;[7] another near Carmansville;[8] a third at Manhattanville; and a fourth at Tubby Hook, near the N. extremity. The S. part of the island was covered with drift and boulders, presenting conical hills, some of which were 80 ft. above the present grade of the streets. Fresh water was readily obtained by wells sunk to the surface of the rock; and the porous nature of the soil has greatly favored the construction of deep foundations and vaults without annoyance from water.[9]

Along the E. shore, from 94th St. northward, and around Harlem, the surface is very level, and to some extent covered with salt marshes. On the W. side, toward the N., the valleys are often deep and the hills precipitous. The highest point, at Fort Washington, is 238 ft. above tide.

Both sides of the island afford ample facilities for commerce; and the noble harbor embraced within the shores of New-Jersey, Staten Island, Long Island, and the city has scarcely an equal for extent, safety, and facility of access, and for the amount of its commercial transactions.[10]

The preservation of this harbor from injurious encroachments has been a subject of solicitude; and investigations which these have occasioned have developed many interesting facts connected with its interests.[11]

[1] Named from the Duke of York, afterward James II. By the Dutch named "*New Amsterdam*," and by the Indians "*Manhattan*."

[2] Important acts were passed in 1830, 1849, 1851, 1853, and 1857, the first-mentioned embracing all the essential features of the city government.

[3] The question of jurisdiction upon the river was long a subject of dispute with New Jersey. A summary of the controversy is given in our account of the Boundaries of the State, pp. 17, 18.

[4] The widest part of the island is at 88th St., where it is 12,500 feet across.

[5] The creek flows from Hudson to Harlem River, at Kingsbridge.

[6] White limestone of coarse quality appeared at the surface on the line of Canal St. between 5th and 6th Sts., and on the W. from 29th to 31st Sts. The strata of gneiss are nearly vertical, often bent and contorted, and in places they contain interesting minerals.

[7] A body of water known as the Collect Pond (from Kalch, a pit) lay in a marsh, extending from near Pearl to Franklin St., and from Elm to Orange St. It was 40 feet deep, and was connected with the Hudson by a narrow inlet nearly on the present line of Canal St. It was a favorite resort for skating in winter, and here experiments in steam navigation were made by John Stevens in 1796–'97 and '98, and by John Fitch in 1796 and '97. The Halls of Justice, the Tombs, and the "Five Points" district, now occupy the site of the ancient pond; and a large sewer under Canal St. represents the position of the outlet.

[8] Known as the Clendening Valley. The Croton Aqueduct crosses this on a magnificent series of arches and piers of solid masonry.

[9] Until 1842 the city was entirely dependent upon wells for its supply of fresh water. See p. 424.

[10] The strait known as Harlem River and Spuyten Duyvil Creek is too shallow and crooked to be available for commerce. Various plans have been proposed to improve it; but none have been carried into effect. Harlem River is about 800 ft. wide, and mostly bordered by narrow, marshy flats, behind which the banks rise into hills. At Kingsbridge the bank is 180 ft. high, and nearly perpendicular. The Hudson River R. R. and the Harlem R. R. cross these waters, and also the High Bridge, used only for the Croton Aqueduct (not for passengers) and the Harlem Bridge, at the head of 3d Avenue. The latter was a toll bridge until the expiration of the charter in the spring of 1858. Macomb's Bridge, formerly at the head of 7th Avenue, was much used, but it is now down. A dam was constructed at this place for using the water, but, being found to impede navigation, it was removed. In 1827 a company formed to build a canal across the upper end of the island, and in 1836 a similar plan was proposed and a canal was partly built, traces of which may be seen on the north side of the island, at 145th St. One of the objects of this canal was to gain access to a marble quarry; but the stone was found to be of inferior quality, and the project was abandoned. The capacity of the harbor of New York is limited only by the depth of water on the bars at its entrance near Sandy Hook. Vessels drawing 24 ft. draft can pass at high tide. The approaches by way of Long Island Sound have no practical limitation of this kind; and vessels of 60 ft. draft could approach the upper part of the island and land on the Westchester shores opposite without difficulty.

[11] The Colony and State have at various times granted to the city lands under water adjacent to its shores, the riparian owners being usually secured the right of pre-emption. The purchase of these grants have been as follows:

1686.—All vacant lands on Manhattan Island to low water mark, with trivial exceptions, and ferries, were secured by the charter granted by Gov. Dongan.

Although the city forms but a single organization, it has localities known by distinct names as villages or neighborhoods; but the number of these is gradually becoming obliterated as population increases: and most of them will soon be known only to the students of history.[1]

Of the several islands, other than Manhattan, comprised in New York City and Co., those in the harbor are owned by the General Government and occupied as military posts, and those in the East River are chiefly owned by the city and devoted to charitable and penal institutions.[2]

1708.—All vacant lands on Long Island, Staten Island, Manhattan Island and Governors Island, between the Navy Yard and the Battery, were granted.

1730.—Land under water 400 ft. wide between junction of Chambers and Warren Sts. and Van Dyke St. on the Hudson and from Whitehall St. to Coenties Slip, East River, was granted to the City with the proviso that the Mayor, Aldermen and Commonalty should not erect any buildings thereon.

1807.—Land under water, 400 ft. wide, extending northward to original high water mark on the Hudson and Harlem on the East River, was granted.

1820.—The town of Yorkville was separated from Harlem.

1821.—Land under water in front of the Battery was added.

1857.—Lands under water on the west of 10th Avenue, etc., were secured.

1862.—Land under Hudson R. from such extent of line as the Commissioners of Pilots shall deem necessary, and extensions were authorized in 1868, 1870, 1871, 1873, 1874.

By 1807 the commissioners were directed by the Legislature to proceed in laying out the city into streets; but changes of their plan and the extension of streets laid out, as well as the opening of new streets, have been numerous. Adjacent towns and villages have been annexed, and the area of the city has thus been greatly increased. In 1857 the Legislature provided for the appointment of a Commission of Engineers and Surveyors, with power to examine, survey and lay out streets, avenues, roads, squares, parks, etc., in the territory then within the limits of the city, and also in the territory which might be annexed thereto. The harbor and shores were surveyed and sounded, the effects of tides and currents examined, maps constructed, and lines for the bulkheads and piers established. The Commissioners were appointed by Governor Myron H. Clark, and entered upon the discharge of their duties on the 1st of May, 1857. Their maps were approved by Governor Clark, Dec. 31, 1857, and by the Legislature, April 1, 1858. The city is divided into 22 Wards, which are again subdivided into 149 Election Districts, and such other civil divisions as the election of State, city and co. officers, the administration of justice, and the regulation of municipal ordinances require.[1]

The Board of Supervisors in New York co. is composed of 12 persons, who are so classified that 2 are elected or appointed annually. A ballot can have but one name; and it is the duty of the canvassers to declare that the two persons having the highest number of votes are elected.[2] Their general powers and duties—which chiefly concern taxes and assessment—are the same as those of Supervisors in other cos.

The Legislative Power of the city government is vested in the Common Council, consisting of 2 co-ordinate branches,—a board of 17 Aldermen and a board of 24 Councilmen.[3] The former are elected by single districts for 2 years, and the latter are elected annually, 6 to each Senatorial district.[4] Ordinances must be passed by both bodies the same year, and receive the assent of the Mayor, to become valid.

The regular sessions of the Board of Councilmen commence at 5 o'clock P. M. on the first Monday in each month, and continue on each Monday and Tuesday until the business of the month is concluded. Each house elects a presiding officer, clerk, and other officers; and the journals of each are published.

The Executive Power is vested in a Mayor,[5] elected for 2 years, and in 7 Executive Departments, viz., those of Police, Finance, Streets, Croton Aqueduct, Almshouse, Law, and City Inspector,—most of which are subdivided into bureaus, each having specific duties to perform. The Mayor is charged with the general administration of the city, nominates for the approval of the Aldermen certain officers, and may suspend or remove officers within limits fixed by statute. He communicates annually and from time to time to the Common Council such messages as he deems proper.

The Police Department has general charge of police regulation in New York City, Kings, Richmond, and Westchester cos. By act of April 15, 1857, it was placed under the Commissioners of the Metropolitan Police District,[6] of whom the Mayors of New York and Brooklyn are *ex officio* members.

bought by Van Twiller in 1637, confiscated in 1664, and granted to Thos. Delavel. The Wards bought it in 1806; and in Dec. 1847, a part was leased by the Commissioners of Emigration for an Emigrant Refuge and Hospital. The Commissioners have since purchased 10 acres; and a portion of the remainder is used as a Potter's Field. The cost of buildings and improvements up to 1858 was $260,000. The structures erected before 1858 were eight barracks and shanties, but these built since are chiefly of brick. The island is supplied with Croton water; and a ferry connects it with 106th St.

Randalls Island, named from Jonathan Randall, who purchased it in 1784 and owned it for nearly 20 years, lies N. of Wards Island, near the Westchester shore. It was formerly known as "*Little Barn*" Island. It was patented under the Dutch Government, but was confiscated in 1664 and granted to Thos. Delavel. It was subsequently named "*Hellerick*," "*Ballard's Island*," and "*Montresor's Island*." The city purchased it in 1835 for $50,000. It is now occupied by nursery schools and by the establishment of the Society for the Reformation of Juvenile Delinquents. A ferry connects it with 125th St.

Sunken Meadow Island lies adjacent to Randalls Island.

[1] The city was divided Dec. 8, 1683, into 6 wards, known as South, East, North, West, Dock, and Out Wards. They were designated by *numbers*, and a new ward was created by act of Feb. 23, 1791, to take effect Sept. 28, 1792. Those subsequently erected have been as follows:—

8th, 1803.		16th, 1836, from 12th.	
9th, 1803.		17th, 1837,	" 11th.

[2] This arrangement is made so as to place the Board of Supervisors above the reach of party politics.

[3] The Aldermanic Districts, identical with the Assembly Districts, are as follows:—

1. South of Chambers, Duane, Frankfort, Pearl and Dover Sts.
2. S. by 1st, within Broadway, from Chambers, through Franklin, Baxter, Bayard, Bowery, Center, and Catharine Sts. to East River.
3. S. by 1st, within Broadway, from Chambers, through Spring St. to Hudson River.
4. S. by 2d within Broadway, from Franklin, through Grand and Clinton Sts. to East River.
5. S. by 3d within Broadway, from Spring, through 4th and Christopher Sts. to Hudson River.
6. Within Broadway, Houston, Clinton, and Grand Sts.
7. S. by 5th, within Broadway, from 4th, through 14th St. to Hudson River.
8. S. and E. by East River; W. and S. by Clinton and Houston Sts. to East River.
9. S. by 7th, within 6th Avenue, from 14th St., through 26th St. to Hudson River.
10. Within Broadway and 14th St., Avenue A, and Houston St.
11. S. by 9th within 6th Avenue, from 26th St., through 40th to Hudson River.
12. Within Houston St., Avenue A, 14th St. and East River. 22d Ward.
13. 22d Ward.
14. Within 14th St., from East River, 6th Avenue, 26th St. and East River.
15. S. by 14th, within 6th Avenue, from 26th St., through 40th St. to East River.
16. 19th Ward.
17. 12th Ward.

[4] The election of city officers takes place annually on the first Tuesday of Dec., and that of co. officers on the day of the general State election, which is on the Tuesday after the first Monday of Nov. The Clerks of the courts, the Recorder, City Judge, and other Judges of the courts, District Attorney, and his assistants, Sheriff and his Deputies, Constables, Coroners, County Clerk, Register, Treasurer, Assessors, Tax Commissioners, Receiver of Taxes, Commissioner of Jurors, Commissioners of Deeds, and Supervisors.

The Recorder is presiding judge of the criminal courts and a magistrate. Several of the co. officers are *ex officio* charged with duties more properly belonging to the city government; and the line of distinction between the two sets of officers is not well defined.

[5] The Mayor was originally appointed by the Governor and Council, and from 1777 to 1822 by the Council of Appointment. Since 1822 the Mayor has been elected.

[6] This District includes New York, Kings, Richmond, and Westchester cos. The Governor and Senate appoint 3 commissioners from the city of N. Y., 1 from Kings and 1 from Westchester or Richmond co. The city is divided into 11 Surgical Districts, each with 1 Surgeon; and into 25 Police Precincts, under a General and Deputy Superintendent. According to the Council Manual for 1858, the number of employees in the police was 1,004, of whom 11 were surgeons, 7 were attached to the office of the Commissioners, 5 were employed in the office of the General Department, 24 in that of the Deputy Superintendent, 21 as Detectives, 79 in attendance at public offices and courts, 26 as harbor police, and 841 on police stations. The number is at times largely increased, and is annually becoming permanently greater.

The Department of Finance is under a Comptroller, elected by separate ballot for a term of 4 years. This officer has charge of the fiscal concerns of the city, and reports the condition of its finances annually to the Common Council. The Department is divided into the Auditing Bureau, a Bureau of Arrears, a Bureau of Taxes, a Bureau of City Revenue, and a Bureau of Deposits and Disbursements, the officers of which are appointed by the Comptroller.[1]

[1] Previous to 1849 the Comptroller was elected annually by the Common Council. Since 1849 he has been elected by the people. Before 1849 the Comptroller was also Treasurer of the city, but since that year the two offices have been separated.

The Street Department is under the charge of the Street Commissioner, who is appointed for 2 years by the Mayor with the advice and consent of the Board of Aldermen. He has the general direction of opening, altering, regulating, grading, guttering, and lighting streets, roads, places, and avenues, of building, repairing, and lighting wharves and piers, and of the construction and repair of public roads and the filling up of sunken lots, under the ordinances of the Common Council. The paving of streets is not under his charge. The department has a Bureau of Street Improvements, of Repairs and Supplies, of Lands and Places, of the Chief Engineer of Fire Department, of Collection of Assessments, of Wharves, of Roads, and of Lamps and Gas. Of each of these bureaus there is a superintendent, or chief, and several clerks, numbering in the several offices of the Department nearly sixty persons.[1]

The property, both real and personal, in New York, is of immense value, and is increasing at a very rapid ratio. The taxes are unusually heavy, and much higher than the average taxes of the other portions of the State. The following tables show a summary of the

1 Most of the streets in the lower part of the city are winding and irregular, but above the old Dutch portion they are very regular. An act passed April 3, 1807, appointed Simeon De Witt, Gouverneur Morris, and John Rutherfurd to lay out and survey the whole island of Manhattan, Bowery and St. Greenwich Lane, Greenwich Avenue, and 1st Street, Waverly Place to the Bowery Road, and down the same to North St., Chatham St., and Division to the East River. The powers of these commissioners were more amply specified in an act passed March 26, 1811, and Canal St. was by law ordered to be made a general passage for the waste waters of the vicinity. The labors of the commissioners ended within the time specified, and their maps were filed in the secretary's office March 11, 1811. The surveys under this plan were executed by John Randel, jr., with great accuracy and fidelity completed in 1821. To the commissioners' arrangement of these portions of the city we are indebted for the symmetry and regularity of its up town streets and avenues.

The Numbering of the perpendicular streets in this survey generally extend from the Battery to the East River, first and second known by their numbers the full length of the line. A first survey had been previously made by Mr. [illegible] Above 14th St. these streets are known only by their numbers as if the lots upon them were situated on the 5th Ave. The Avenues are 100 feet wide, except 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22d, 23d, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st, 32d, 33d, 34th, 35th, 36th, 37th, The blocks between them vary from 184 to 212 feet, being generally about 200 feet, or about 20 Chains to the mile.

The Avenues run nearly N. and S., and are numbered from E. to W., beginning upon the East River. Several short avenues on the East Side of the city are designated by letters as A, B, C, D, beginning at the one next to First Avenue. These avenues are each 100 feet wide, except 2d Av. where Avenues A and C are 80. Leonard Avenue 80 feet. North 2d St. Fourth Avenue is 140 feet wide. The blocks between the avenues are 920 to 950 feet, being generally 800 feet.

The Lands and Docks belonging to the city date their title from Dongan's charter, by which all waste and unappropriated lands on Manhattan Island to low water mark, and all docks, bays, and waters adjoining, were confirmed to the corporation. The real estate now belonging to the Corporation, exclusive of wharves, is mostly in use for Watering-places, Parade-grounds, Public-houses, School, or Market purposes, or as public parks. The Croton Aqueduct Department is under a board styled the Croton Aqueduct Board, consisting of a President, Commissioner, Chief Engineer, and Assistant, appointed by the Mayor and Aldermen for five years. It has charge of all structures and property connected with the supply of Croton water and the collection of water rents, of the underground drainage of the city, of public sewers, of permits for street vaults, of paving and repairing streets, and of digging and constructing wells. It has a Bureau of Water Rents, and one of Pipes, Sewers, and Pavements. The department was organized in July, 1849, under an act passed April 11 of that year. Previous to this the Water Commissioners were appointed by the Governor and Senate.[2]

70 men, the second of 60, and the third of 50. The hook and ladder companies have each 50 men, and the hose companies each 30. The number of fires in the year, ending Feb 17, 1859, was 261, and of alarms, 160. The loss by fire on buildings was $393,647, and on stock $514,999,—of which the Crystal Palace, burned in Oct. 1858, formed a large item. During the last year two large steam fire engines have been obtained; but, except in extraordinary cases they are not used. The city owns about 80,000 feet of hose. The Department elects one Fire Commissioner annually for a term of 5 years from among exempt firemen. These commissioners form a Board to decide upon the formation of new volunteer companies, to investigate applications for admission to companies, to examine into charges against members, and for cause to suspend or remove them. The Fire Department possesses a fund derived from special trusts, donations, festivals, concerts, fines for violation of fire laws, and other sources, the income of which is applied in aid of the families of deceased and disabled firemen. The report of 1857 showed an expenditure of $30,567.91 by the trustees of this fund. Among the items of this expense were 1,978 pairs of shoes and 500 tons of coal. The invested fund amounts to $95,250. Two scholarships for educating the sons of firemen in the University of New York have been endowed by Myndert Van Schaick.

[1] The city gas lights are furnished by three general companies, as follows:—

The New York Gas Light Company was incorp. March 26, 1823, with a capital of $1,000,000. It has works on 21st and 22d Sts., from 1st Avenue to East River, and has 6 large gas-holders at that station and 7 others at different parts of the city. It supplies the lamps s. of Grand St., and has about 130 miles of mains under the streets.

Manhattan Gas Light Company was incorp. Feb. 26, 1830, with a capital of $4,000,000. It has 2 manufactories of gas,—one on the Hudson, at the foot of 18th St., capable of making daily 2,000,000 ft., and one on East River, at the foot of 14th St., making 400,000 ft., and when completed will be capable of making 3,000,000 ft. daily. It supplies the city N. of Grand St., and has about 200 miles of street mains. It lights 8,000 street lamps and supplies 22,000 stores and dwellings. In 1857 it made 600,000,000 feet of gas.

Harlem Gas Light Company was incorp. Feb 8, 1855, with a capital of $250,000. Its works are situated upon Harlem River, at the N. extremity of 1st Avenue. There are also several minor gas works for furnishing light to hotels and private establishments.

[2] The Croton Aqueduct is the most extensive and costly work in America for supplying a city with water; and its magnitude justifies a somewhat minute account of its origin and subsequent history.

In 1741 the General Assembly passed a law (which was continued by repeated enactments) for mending and keeping in repair the public wells and pumps of the city. In 1774 Christopher Colles contracted to erect a reservoir on Broadway, between Pearl and White Sts.; and the plan was partially carried into effect before the Revolution. In 1798 schemes were again agitated, which led to surveys and examinations; and in 1799 the Manhattan Company was formed, ostensibly to supply the city with water, but really as a banking institution, with a perpetual charter and large privileges. Its principal well was at the corner of Duane and Cross Sts., whence the water was raised by steam and distributed in pipes; but the supply was limited in amount and was of very impure quality. During the next thirty years various schemes were proposed for constructing common and artesian wells, and open canals from the Bronx and other streams in Westchester co. and Conn., and several companies were formed; but no practical steps were taken to secure the result. An act was passed May 2, 1834, which authorized the city to supply itself with "pure and wholesome water" and to issue its stock to defray the cost. The Governor and Senate appointed Stephen Allen, R. M. Brown, Charles Ducenberry, Saul Alley, T. T. Woodruff, and William W. Fox Commissioners, under whom accurate surveys were made and various plans and estimates considered, which resulted in recommending that the water of the Croton be taken near its mouth and brought in an aqueduct to a reservoir on Murray Hill, 114 ft. above tide. This plan was approved, March 11, by the Mayor, and in April, 1835, by the people, by a vote of 11,367 to 2,963. David B. Douglass was appointed Chief Engineer, but in Oct. 1836, he was superseded by John B. Jervis. The work was begun in the spring of 1837, and so far completed as to allow the admission of water into the distributing reservoir, July 4, 1842. Its completion was commemorated by a grand civic celebration Oct. 14 of the same year.

This aqueduct is a covered canal, of solid stone and brick masonry, arched above and below, 8 ft. 5½ in. high, 7 ft. 5 in. wide at the widest part, and 40¾ mi. in length from the dam to the distributing reservoir. It has a descent of 47.9 ft., or 13 in. to a mi., and a capacity of supplying 60,000,000 gallons of water per day. At intervals of 1 mi. are openings through small towers for ventilation. The flow of water is generally 2 to 3 ft. in depth, or 27,000,000 gallons a day. It is covered below the reach of frosts, and the surface works are carefully guarded by fences from injury by cattle. It passes through 16 tunnels in rock varying from 160 to 1,263 ft., with a total of 6,841 ft. In Westchester co. it crosses 25 streams 12 to 70 ft. below the line of grade, besides numerous small brooks furnished with culverts. Harlem River is crossed upon High Bridge in two 48 inch mains, 12 ft. below the level of the grade of the aqueduct, and furnished with gate chambers at each end. This bridge is of granite, 1,450 ft. long, 21 ft. wide between the parapets, 100 ft. above the surface of high tide to the crown of the arch, and 114 ft. to the top of the parapets. It rests upon 15 arches, 8 of which are of 80 ft. span and 7 of 50 ft. Upon one of the piers is inscribed the following record of the construction of the bridge:—

AQUEDUCT BRIDGE. BEGUN 1839: FINISHED 1848.		JOHN B. JERVIS, *Chief* H. ALLEN, *Princ. Assist.* P. HASTIE, *Resident* C. H. TRACY, *Assistant*
STEPHEN ALLEN, SAUL ALLEY, C. DUSENBERRY, W. W. FOX, T. T. WOODRUFF,	WATER COMMISSIONERS.	GEORGE LAW, SAMUEL ROBERTS, ARNOLD MASON.

The aqueduct of masonry is continued from the bridge 2 mi. to the Manhattan Valley, a depression which is 4,171 ft. wide and 102 ft. deep. This is crossed by an inverted siphon of iron pipes 4,180 ft. in length, with a gate chamber at each end. The masonry is then resumed, and the aqueduct is carried $2\frac{173}{1000}$ mi. to the receiving reservoir in the Central Park, crossing in this distance the Clendening Valley, 1,900 ft. across and 50 ft. deep, on an aqueduct, with archways for three streets, each of which has 50 ft. span for carriage way and 10 ft. span on each side for foot passengers.

The receiving reservoir in the Central Park, is 1,826 ft. long, 836 ft. wide, covers an area of 3,505 acres, and has a capacity of 150,000,000 gallons. The banks are of earth, 18 ft. wide at top, and rise 9 ft. above the level of the water. The pipes pass through brick vaults. A new reservoir is now under construction of the former ones, and also upon Central Park. It will cover an area of 106 acres, and will be surrounded by an earth bank of irregular outline, which will constitute a broad promenade. The distributing reservoir at Murray Hill, between 40th and 42d Sts. and 5th and 6th Avenues, is a stone structure in 2 divisions, described to contain 36 ft. or 20,000,000 gallons. Its surface is 115 ft. above mean tide.

The cost of the work was $8,575,000 including water rights and land, besides $1,800,000 for distributing pipes. The expenses came within 6 per cent. of the estimate of Mr. Jervis, the Engineer. The annual interest, amounting to $665,000, is paid by direct water taxes and by some indirect taxes; and a sinking fund is provided for the final liquidation of the debt. The construction of this work has lowered the annual rates of fire insurance about 40 cts on every $100 insured. Sing Sing Prison is supplied from the aqueduct as it passes near that place.

The amount of pipe laid in different years has been as follows, up to 1859:—

The Almshouse Department is under the charge of a Board of Ten Governors of the Almshouse, generally known as the "Ten Governors."[1] The department was created under an act of April 6, 1849, and was modified the succeeding year. This board has charge of the Almshouse, of the Relief and Support of the Poor, of the County Lunatic Asylum, of the Nurseries for Poor and Destitute Children, the Penitentiary, and all the city prisons and houses of detention, except the sheriff's jail in Elbridge Street and the House of Refuge. All ordinary appropriations for this department must be submitted to a board consisting of the Presidents of the Boards of Aldermen and Councilmen, the Mayor and Comptroller.[2] If this board approves, it reports to the

view of ascertaining its topography minutely, the better to decide upon future reservoirs or other structures as they may be found necessary. The ridge line or watershed inclosing the valley above the dam is 101 mi. in length. The stream is 39 mi. in length, and its tributaries 150 mi. The total area of the valley is 352 square mi.; and within it are 31 natural lakes and ponds, many of which are available as reservoirs, and 16 of which have been minutely surveyed and estimated.

The revenues from water rents from Oct. 5, 1842, to Dec. 31, 1858, have amounted to $6,725,947.98; and the amount has increased from year to year,—except in 1851 and 1856, when it fell off.

The public sewers connected with this department, since Feb. 6, 1846, have cost an expenditure of $163,527.13; and the amount of $248,572.00 has been collected from permits to connect premises with the public sewers. The length of sewers constructed by this department since its organization in 1849 has been 92 mi. 1,340 ft.

[1] The Governors of the Almshouse are elected by single ballot, one being voted for and two elected. This places the board above the control of party politics.

[2] Public measures for the relief of the poor are among the first necessities of a civilized government; and one of the earliest statutes of the General Assembly in 1683 was for this object. In 1699 a law was passed for the relief of the poor at their homes; and about 1714 the first almshouse was built, on the present site of the City Hall. In 1795 a lottery of £10,000 was granted for a new almshouse, and the large brick building on the Park near Chambers St. (burned in 1858) was erected. In 1811 a tract on the East River, at the foot of 26th St., was bought; and the first stone was laid Aug. 1, 1811. The present main edifice at Bellevue Hospital was opened April 22 1816, as a hospital, penitentiary, and almshouse, at a cost of $421,109. The management was for many years intrusted to five commissioners appointed by the Common Council. In 1822 the average number of paupers was 1,547; and the cost of the establishment for several years was as follows:—

In 1817	$90,886	In 1820	$84,420
" 1818	107,000	" 1821	85,000
" 1819	105,509	" 1822	82,000

The law then required paupers to be returned to the town where they had gained residence; but this was often difficult, and vessels then, as since, often landed paupers in or near the city from distant places. In 1822 two vessels put about 100 paupers on shore a few miles from the city, and brought on their baggage. Efforts were made to remedy these abuses, but it was found difficult in a large population to distinguish those coming into the city liable to public charge, until they applied for relief in the early winter months. *Sun, Dec. No. 26, 1824.*

Meanwhile the affairs of the institutions at Bellevue became very corrupt and mercenary: but a malignant fever, which broke out in 1825 and committed frightful ravages in the filthy wards and loathsome cells, forced the question of reform upon the public. In 1845 the Almshouse was placed under the care of a single commissioner, and in 1849 the present system of supervision went into operation.

Blackwells Island was bought in 1828, and Randalls Island in 1835. In 1848 the Almshouse was completed on the former; and the whole of both islands is now devoted to objects of charity and reform, Randalls Island being in part under the care of the Governors of the Almshouse and in part under the Trustees of the House of Refuge.

Upon Blackwells Island, commencing at the s. end, are located respectively the Small Pox Hospital, the Penitentiary, Island Hospital, female and male Almshouses, Workhouse, and Lunatic Asylum. Upon Wards Island is the Potters' Field, under the charge of the Ten Governors; and upon Randalls Island are the extensive nurseries and hospitals for poor children. Bellevue Hospital, the largest in the city, remains under the charge of the Governors as a fever, surgical, and general hospital. The Colored Orphan Asylum, Colored Home, four city prisons, and the out-door poor, are also under the care of this department. A short sketch of these several charges is essential to a full knowledge of the city.

Bellevue Hospital is 350 ft. long, the center portion 5 stories high and the wings 4 stories. Upon each story are verandas and outside stairways of iron. Its arrangements throughout are ample and judicious, and it can accommodate 1,350 patients. It has a clinical theater fitted up for the accomodation of large classes of students. In 1858 the number of prescriptions was 145,593; and the number of births is about 650 annually.

The results of its operation during 10 years have been as follows:—

The Small Pox Hospital, Blackwells Island, was commenced April 1, 1854, and was finished in the same year. It is built, in the English gothic style, of stone quarried on the island. It is 104 ft. by 44, 3 stories high, and cost $50,000. It is designed for the treatment of paupers only, but is fitted up with express reference to receiving patients who will pay for their treatment, and where, so that they are isolated, they might impart their disease, they may receive every attention that science and the most attentive nursing can bestow. It is the only hospital of the kind in the city. It takes the place of some old wooden buildings previously erected on the island.

Its statistics have been as follows:—

The Penitentiary, opposite Sixth St., is built of brown stone and rubble masonry. It consists of a central building 50 by 70 ft., and two wings, each 50 by 200 ft., making the whole length of the building 465 ft. A new wing was finished in 1858, and another is needed for the accommodation of the inmates. The total number of cells is 1,736. The convicts are employed as occasion requires in quarrying and dressing stone for buildings upon the island, and as hostlers, teamsters, tailors, shoemakers, weavers, coopers, painters, wheelwrights, &c. The establishment was finished in 1848, since which time there have been admitted and discharged the following numbers:—

time of the fire it contained 600 inmates; but they were all removed without loss of life. In Feb. 1858, a most humane regulation was adopted by which the suffering poor are relieved without being committed as vagrants. The building now in the process of erection to supply the place of the former is 5 stories high, includes 14 wards and accommodations for 744 patients. As on other buildings on the island, convict and work-house labor is largely employed in the erection. The statistics of the hospital have been as follows:—

Almshouses.—Of these there are two separate and similar structures, 650 ft. apart, entirely distinct in their arrangements, and each devoted to one sex only. They are each composed of a central building 50 ft. square, 57 ft. high to the roof, and 87 ft. to the top of the cupola, and two wings, each 60 by 90 ft. and 40 ft. to the roof. They are devoted to the care of the aged and infirm, and present the following result of operations:

Less than one-fourth of the whole number thus thrown upon the charities of the city are of native birth; and more than one-half are females. The present almshouses have been in use since 1848.

Workhouse.—This establishment was authorized by act of April 11, 1849, and grew out of a recommendation of the Prison Association of New York, in which the Society for Improving the Condition of the Poor concurred. A plan for buildings was adopted the succeeding season, and work was begun Oct. 3, 1849. The N. wing is three high lofty rooms, opening upon galleries around a common central hall, and capable of lodging 600 persons. At the N. end is a cross arm 4 stories high, containing workshops. A central building contains the residence of the Superintendent, the kitchen, storerooms, offices, chapels; and a S. wing, for females, is constructed upon the plan and of the size of the N. wing. This establishment was designed for those able to work and who, not finding means of support, were willing to be committed, as well as such paupers, vagrants, and others as might be deemed fit subjects for employment. The males are usually kept employed as circumstances permit, in quarrying and grading, and as carpenters, coopers, wheelwrights, painters, cartmakers, blacksmiths, tinsmiths, shoemakers, and tailors. The females are employed in knitting, sewing, and other light occupations. This institution has scarcely resulted in the benefits anticipated, and of all the charities under the care of the Governors is perhaps the only one that might possibly be dispensed with. It is found impracticable to keep all hard-persisted employed, and the name of "workhouse" loses its terrors when coupled with the idea of leisure hours, comfortable quarters, and sufficient food.

Its statistics have been as follows:—

The number discharged does not include those escaped or sent to other institutions.

The Lunatic Asylum, near the N. end of Blackwells Island, consists of an octagonal building 80 ft. in diameter and 50 ft. high, with a cupola and two wings at right angles to each other, each 245 ft. long. One wing is devoted to either sex; and the arrangement of the wards admits of classification. Apart from this, on the E. side of the island, is a building of stone, 59 by 90 ft. and 43 ft. high, with a veranda on each side, which is exclusively devoted to the noisy and violent class, where they cannot disturb the more quiet. This structure is named "The Lodge," and, for obvious reasons, is not usually open to visitors. The Lunatic Asylum proper was begun in the spring of 1835, and, after some months of suspension, the work was resumed in 1837, and the W. wing was finished June 10, 1839. The S. wing was built in 1847; and this, with "The Lodge," was finished in 1848. The statistics during 10 years have been as follows:—

Years.	*Admitted.*	*Discharged.*	*Remaining.*	*Died.*
1849	459	283	401	212
1850	391	251	464	77

This institution is admirably managed; but the proportion of recoveries is necessarily less than in those asylums in which only recent cases are admitted and the patients discharged when there is no longer a hope of recovery. This is, in one sense, an asylum of the incurable.

The Potters' Field, on Randalls Island, was placed under the charge of the Governors of the Almshouse June 19, 1850; but its location and quality of soil were made a subject of complaint, and it was repeatedly presented by grand juries. A tract of 69 acres was purchased on Wards Island, and brought into use in June, 1852, since which time the former field has not been used. About 2,500 interments are made annually at the public charge.

The Nurseries and *Nursery Hospitals* on Randalls Island consist of about a dozen detached buildings, not arranged on any systematic plan. The grounds are inclosed and of ample extent; and a farm is connected with the institution, which goes far toward furnishing it with culinary vegetables. The institution is provided with ample schools and playgrounds. The numbers remaining here at the beginning of 1859 were 88 men, 96 women, 833 boys, and 333 girls. The children are indentured, given for adoption, or returned to friends, as circumstances warrant.

The Colored Orphan Asylum was begun in the fall of 1836, and was incorp. April 16, 1838. It is situated on 5th Avenue, between 43d and 44th Sts., and is under the immediate charge of lady managers, who report to and receive funds from the Governors of the Almshouse Department. The numbers remaining at the close of the several years since, under this arrangement, have been as follows:—

1849	156	1854	237
1850	176	1855	233
1851	201	1856	234
1852	207	1857	225
1853	219	1858	219

In 22 years it has received in the aggregate 970 colored orphans. This institution is partially supported by benevolent contributions and partially by occasional appropriations from the State.

The Colored Home, on 1st Avenue, between 64th and 65th Sts., has 44 lots of ground, on which substantial buildings are erected. It was originally intended as a House of Industry. In Oct. 1858, the foundations of a new building were laid 90 ft. by 40, with a corridor from 6 to 12 ft. wide on the S. side, extending from each wing of the present building nearly 120 ft., so that access may be had from all parts of the house without exposure to the weather. It contains departments for male and female hospitals, home for the aged and infirm, school, and lying-in and nursery accommodations. This is also under the immediate care of lady managers, and is sustained by contributions, bequests, and grants from the State. In point of order and neatness it equals any hospital in the city. The male hospital usually has about 30 inmates, the female hospital 7; the lying-in department 10, and the home of the aged 150. The average number of births is about 90 annually.

The City Prisons, seven in number, under charge of the Governors, are situated as follows:—

The Halls of Justice, or "Tombs," is situated on Center St. between Leonard and Franklin. A portion is occupied by court-rooms and prisons for persons awaiting sentence. The house

The Commissioners of Emigration were incorp. by act of May 7, 18[illegible]. They consist of 6 commissioners appointed by the Governor of the State, and of the Mayors of New York and Brooklyn, and the Presidents of the German Society and the Irish Emigrant Society. They have charge of the Marine Hospital at Quarantine, the Emigrant Depot at Castle Garden, and numerous buildings on Wards Island for the accommodation of the sick.[1]

The Law Department is under a chief officer called the "Counsel to the Corporation," elected for three years. He has charge of all the law business in which the city is interested, when so ordered by the corporation, and institutes all legal proceedings necessary for the opening and widening of streets. He draws all leases, deeds, and other papers connected with the finances of the city. This department has a Bureau of Corporation Attorney, and another of Public Administrator.

The City Inspector's Department is under a chief officer styled the City Inspector, who has cognizance of all matters affecting the public health, pursuant to the ordinances of the Common Council and the lawful requirements of the Commissioners of Health and of the Board of Health. It has a Bureau of Sanitary Inspection and Street Cleaning, of Records and Statistics, and of Superintendent of Markets. Coroners report to this department all inquests made by them. The Inspector is required to report all births, marriages, and deaths within the city. He also appoints 2 Inspectors and Sealers of Weights and Measures, who hold office upon the same terms as Chiefs of Bureaus. One Street Inspector is appointed to each of the 22 wards, 1 clerk to each of the 11 markets,[2] and a keeper and assistant to each of the corporation yards.

The Judiciary Department comprises the First Judicial District of the Supreme Court

Castle Garden, formerly "Castle Clinton," at the lower point of the Battery on the Hudson, was ceded by the corporation of the city to the United States in May, 1807, for the purpose of erecting a fortification. The present structure was finished in 1811, but the land is now [illegible] and still partly stands for heavy ordnance, and the site was removed to the corporation under an act of Congress passed March 16, 1822. The building was subsequently used for the public reception of distinguished strangers, and for concerts, balls, public meetings, the annual fairs of the American Institute, and similar purposes, until leased in 1855 to the Commissioners of Emigration, in which it has since been used, having been remodelled.

The Emigrant Depot at the [illegible], upon Ward's Island, consists of several large buildings for the reception of emigrants and other purposes, erected upon a portion of the [illegible] hereafter [illegible] emigrants who have arrived in the port of New York since 1846 has been [illegible], distributed as follows:—

The greater number of these proceed to their destination without expense to the Commissioners.

The Marine Hospital is noticed under Richmond County. See page [illegible].

The Markets of New York are owned by the city and leased in small portions to occupants. They are as follows:—

Centre—Catharine St., East River.
Gouverneur—Grand and Duane Sts.
Clinton—Washington and Canal Sts.
Essex—Grand and Ludlow Sts.
Jefferson—Oldslip, East River.
Fulton—Fulton St., East River.

Essex—Second and Hudson Sts.
Washington—Fulton St., Hudson River.

The principal market for wholesale is the Washington Market, and thither most of the [illegible] making country resort for the sale of produce. The principal fish market is adjacent to Fulton Market, where facilities are provided for unloading fishing vessels. The enormous supply of animal food required by the population of New York has led to enormous investments of capital for the production, and corresponding arrangements for the [illegible] of the articles of provisions. Cattle are now [illegible] to market by rail. Illinois is the greatest beef producing State in the Union, and its market cattle are brought [illegible] with the way only 3 or 4 times to rest and feed. About $12,000,000 are annually expended by New Yorkers in meats [illegible]. The measures taken for supplying the city with fish, oysters, and game are correspondingly [illegible]. The Fulton Market and [illegible] departments [illegible] prepared with great [illegible] to meet the demand.

The criminal courts consist of a Court of Oyer and Terminer, held by a justice of the Supreme Court, a Court of General Sessions, held by the Recorder or city judge, Courts of Special Sessions, held by the police justices, 4 Police Courts, and 6 Justices' or District Courts.

The Burials from the city are regulated by law; and none can take place without a certificate from the Inspector's Department, and a record of the time, cause, and circumstances of the death, as far as can be ascertained.[1]

The Board of Health consists of the Mayor and Common Council. The Mayor is President. The Mayor, the Presidents of the two branches of the Common Council, the Health Officer, the Resident Physician, the Health Commissioner, and the City Inspectors, are constituted a Board of Commissioners, who render advice to the Board of Health. The Health Officer is appointed by the Governor and Senate. The Mayor, with the advice of the Board of Aldermen, appoints an Inspector of Vessels. It is the duty of the Board of Health to watch over the health of the city and port, and conduct and attend to the business of the Quarantine establishment.[2]

Ferries are established from New York to Brooklyn, Jersey City, the islands, and to numerous points around the harbor. Up to 1810 the ferry boats were propelled by horse and man power; but during that year steam was introduced, and now it is exclusively used on all important routes. A few of the islands are reached only by row boats.[3]

The facilities for passing from one point to another in the city are numerous, cheap, and con-

The number of animals sold during 5 years at the New York live stock markets has been as follows:—

The number of bullocks from the several States sending to this market, in 1858, was as follows:—

	No.	Weekly Average.		No.	Weekly Average.
New York	30,980	595	Virginia	895	17
Pennsylvania	1,004	45	Connecticut	590	11
Ohio	4,389	84	Texas	1,214	23

Illinois	5,818	1,045	Iowa	2,724	52
Kentucky	9,400	181	Michigan	1,682	52

The modes of reaching market was as follows:—

Bullocks, by Harlem R. R.	10,558
" Hudson River R. R.	50,916
" New York & Erie R. R.	93,829
" on foot	2,867
Swine, by New York & Erie R. R.	501,471

The above statistics do not include barreled beef and pork, and animals slaughtered elsewhere and sent thither for sale. In some seasons over 5,000 sheep are slaughtered per week at Albany, for the New York market, and the amount from other places is very large.

[1] *The Burial Places* of New York were originally around the churches; and in 1822 there were 22 places of interments of the City Hall. The practice was found to be obnoxious to the senses and prejudicial to the public health, and was accordingly prohibited in the older parts of the city. The plan of marble cemeteries within the city was proposed, and two were constructed between 2d and 3d Sts. and the Bowery and 2d Av. These contained 234 and 156 vaults respectively, were built entirely of stone, and intended to receive each a large number of bodies. The plan was found unsuccessful, and soon after was superseded by that of rural cemeteries. This appropriate custom, introduced at Greenwood in 1842, has led to the laying out of many similar grounds, each rivaling the other in beauty of location and in plans for the adornment of the resting places of the dead. The principal of these are Greenwood, Cypress Hills, Lafayette, Mount Olivet, Calvary, Citizens' Union, Friends, Sharrath Israel, and Washington, on Long Island; Trinity, on New York Island; Beechwood, at New Rochelle, Dobbs, at Sing Sing; Oak Hill, at Nyack; and Machpelah, in Westchester co.; and New York Bay and others, in New Jersey. The Potters' Field belonging to the city is on Wards Island. By an ordinance of Feb. 3, 1851, no burials are allowed s. of 86th St.; and Trinity Church Cemetery, embracing $23\frac{94}{100}$ acres between the Hudson and 10th Av. and 153d and 155th Sts., is the principal one now in use on the island. It was purchased in 1842.

[2] Pestilence has on several occasions committed frightful ravages among the population of the city. Among these visitations the following are worthy of record:—

1702.—A pestilence, probably yellow fever, was brought from St. Thomas, of which 500 died up to Sept., and 70 more during the first week of that month, out of a population of 6,000 to 7,000.

1732.—In autumn an infectious fever prevailed, of which 70 died in a few weeks.

1743.—A "bilious plague" broke out, of which 217 died in one season. It was confined to swampy ground. This is the first official report on mortality to the Mayor.

1745.—Malignant yellow fever prevailed.

1747.—The bilious plague re-appeared.

1791.—The yellow fever prevailed, of which 200 died.

1794.—Yellow fever again appeared, occasioning much alarm,—though only 20 to 30 died.

1795.—The yellow fever prevailed, carrying off 730, of whom 500 were foreigners recently arrived.

1796.—A malignant fever prevailed, from filling in of docks, of which 70 died.

1797.—The yellow fever occasioned 45 deaths.

1798.—Memorable for its pestilence,—probably yellow fever,—which appeared in New York in the first week in August, and proved fatal to 2,086 persons, of whom 1,110 were men, 589 women, and 885 children.

1799.—Yellow fever again prevailed but much less aggravated.

1801.—About 160 died of yellow fever.

1803.—From 600 to 700 died in New York of yellow fever. Since this year regular statistics of mortality for the city are preserved for each year, from which it appears that yellow fever in 1805 destroyed 270, and in 1822, 166; and that cholera destroyed 3,513 in 1832; 971 in 1834; 5,071 in 1849; and 374 in 1852. The mortuary tables show during the 50 years ending with 1853 a total of 364,698 deaths.

[3] The ferries running to and from New York are under the exclusive jurisdiction of the corporation, and derive their authority by lease, usually for a term of years. The following is a summary of those now running:—

Staten Island Ferry, from Whitehall St. to Quarantine, Clifton, and Stapleton. Also extends to New Brighton, Factory Village, and Port Richmond. It is leased to the Staten Island & New York Ferry Co. until 1865 at an annual rent of $30,000.

Hamilton Avenue Ferry, from Whitehall St. to Hamilton Av., Brooklyn, 1,765 yards in length, is leased to the Union Ferry Co. until 1861.

South Ferry, from Whitehall St. to Atlantic St., and Long Island Rail Road, Brooklyn, 1,476 yards in length, is leased to the Union Ferry Co.

Wall Street Ferry, from Wall St. to Montague Place, Brooklyn, 1,150 yards in length, belongs to the Union Ferry Co., and is leased until 1862, at an annual rent of $7,000.

Fulton Street Ferry, from Fulton St. to Fulton St., Brooklyn, 730 yards, belongs to the Fulton & Union Ferry Co., and, including the South and Hamilton Avenue Ferries, rents for $35,000. It is leased until 1861.

Peck Slip Ferry, from Peck Slip, foot of Ferry Street, to South 5th Street, Williamsburgh, 2,800 yds., is leased to J. V. Merserole & Co. until 1869, at an annual rent of $21,000.

venient, and the establishment of all of them is so recent as to be within the memory of every adult citizen. They consist of 5 city rail roads and 29 lines of omnibuses.[1] Since the introduction of rail roads and the multiplication of steam ferries and steamboat routes, a large number of persons transacting business in the city have been enabled to provide residences in the country or suburbs, where they can enjoy the comforts and luxuries of a rural home without a sacrifice of business interests. A large proportion of the inhabitants of Brooklyn, and great numbers from within 30 mi. of the city, on Long Island and Staten Island and in the adjacent parts of Westchester county and New Jersey, are in this manner closely identified with the business of the city, and might in one sense be included in its population. New York and its immediate suburbs are thus so united in interests that they virtually constitute one great metropolis, and would probably at this time number, within a radius of 10 mi. from the City Hall, about a million and a quarter of inhabitants.[2]

The institutions of New York designed to meet the intellectual and social wants of the people in extent and variety have no equals in America; and many of them surpass all similar institutions in the world. These institutions, noticed under special heads, are devoted to education, both general and special, to benevolent objects in various forms, to religion and morality, to intellectual culture, and to the promotion of the useful and fine arts. They do not strictly all belong to the city, nor do they adequately represent the wants of the city population. Many of the schools and other institutions, from their peculiarities and excellence, attract great numbers from abroad; and, on the other hand, a great number of educational institutions in the adjoining counties depend for support almost entirely upon city patronage. A reciprocity of interests between city and country is thus kept up in intellectual as well as in business affairs.

The Public School System of New York now constitutes one of the most important interests of the city, both in regard to its effect upon the social position of the people and in the amount of its annual expenditures. There were reported, at the close of 1858, a free academy[3] for the complete collegiate educations of boys, 4 normal schools for the instruction of teachers, 57 ward schools, including 51 grammar schools for boys, 48 grammar schools for girls, and 75 primary departments for both sexes; 35 primary schools, 42 evening schools, of which 23 are for males and

Hoboken City is also a place of considerable importance from its proximity to the city. It had in 1855 [illegible] inhabitants. Hudson City, in the rear of these, had 3,322 inhabitants; and numerous other places on the Hudson in N. Jersey are receiving attention as desirable places of residence.

The Public Schools are managed by a Board of Education, consisting of two commissioners from each ward. The local affairs of each ward are managed by local Boards of Trustees. The present system was organized under an act of 1842; but it has been modified by various acts since. In 1853 the Public School Society was dissolved and the schools under its control were merged in the ward schools of the city. The Board of Education distributes its duties among committees, and appoints a City Superintendent to exercise a general supervision over the schools.[2]

Academies and Colleges. There are in the city 3 academic institutions, 2 colleges, 4 medical colleges, 2 theological schools, and a great number of schools for perfecting students in special branches of education.[3] In addition to the schools sharing in the distribution of the school fund, there are a great number of mission, charity, parish, denominational, and private schools, of

1 000 pupils. The cost of the grounds, buildings, furniture, apparatus, and library was $100 sol 48; and the cost of maintenance to Jan. 1, 1859, was $33,238.17. The students and the graduates in each year have been as follows:—

	1849.	1850.	1851.	1852.	1853.
Students.....	201	285	383	498	536
Graduates...	....	....	....	.....	17

Students	567	688	875	805	885
Graduates....	20	32	20	21	25

Applicants for admission to this school must reside in the city, be 14 years of age, and must have been students in the common schools 12 months, and must sustain an examination in the ordinary English studies. The school has a 5 years' course of study, and its graduates receive the degree of A.B. Several medals and money prizes have been endowed, and societies of students and alumni have been formed.

[1] The number of pupils in 1858 was as follows:—

Free Academy.....	885	Normal schools.....	850
Boys' grammar school..	29,300	Corporate schools.....	10,697
Girls' " " ..	26,004		
Primary department....	59,276	General aggregate.....	171,768
Primary schools.....	23,750	Average attendance.....	51,450
Evening schools, about.	20,000		

[2] The "Free School Society," afterward the "Public School Society," was founded in June, 1805, and its first school was opened May 17, 1806. During its long career this honored society disbursed millions of dollars of public money, afforded education to 100,000 children, and fitted 1,200 teachers at its normal schools. It twice tendered its property to the city authorities to satisfy a popular objection that so much property should not be managed by a corporation, but in both instances the tender was declined. After the society was dissolved, its books and papers were deposited with the New York Historical Society. Its real estate used for school purposes consisted of 15 public school-houses, a trustees' hall on Grand Street, and a workshop on Crosby Street.—*Dissolution of Pub. School Soc. and Rep. of Com.*, p. 7.

The 11 corporate schools share in the public money, but are in no sense under the care of the Board. The expenses of the public schools in 1858 were as follows:

Salaries of teachers and janitors	$ 556,445.93
New school-houses, repairs, purchase of new sites.	228,810.13
Fuel	29,217.08
Rents, stationery, and apparatus	105,328.31
Salaries of superintendents, clerks, and officers of the Board	23,398.51
Support of Free Academy, including repairs.	44,884.73
Evening schools	64,515.03
Normal schools	11,240.22
Contingent expenses.....	46,457.05
Total expenses of public schools	$1,109,296.99

Columbia College was chartered as "Kings College" Oct. 31, 1754, on ground the Colonial Government was ceded by a lottery, grants of lands, and liberal private donations from England. A plot of ground between Murray, Barclay, Church, and Chapel Streets was given by Trinity Church for the college site, and the corner stone was laid July 23, 1756. The building was finished in 1760, and during the Revolution it was used for a hospital. In 1792 the trustees established a medical school, and sustained it until 1813. The college remained in its first location until the premises were greatly enhanced in value by the growth of the city and the spread of commercial establishments around and beyond it. An act was passed March 19, 1857, authorizing the purchase of another site for college purposes, in accordance with which the grounds at the foot of Park Place were sold for $500,000, the college still retaining many lots on Barclay Street, Park Place, Murray Street, and College Place, which are rented for long periods, and whose prospective value it is impossible to estimate. The premises lately owned by the Trustees of the Deaf and Dumb Asylum on 44th Street, near 4th Avenue, were purchased, with 4 other lots, for $75,306.10, and fitted up at a total cost of $114,336.01. This change is understood to be only a temporary one, the ultimate intention being to locate on the premises of the Botanical Garden, between 47th and 51st Streets, on 5th Avenue. This garden, originally embracing about 20 acres, was laid out by Dr. David Hosack, early in the present century, for the introduction of exotic plants, experiments in agriculture and horticulture, and the promotion of science. The Governor, in his message of 1806, commended the object as worthy of public aid. In 1810 a memorial from the corporation of New York, the County and State Medical Society, and the Governors of the New York Hospital was addressed to the Legislature, in pursuance of which the Garden was purchased for $73,000, upon the appraisal of 3 commissioners, and placed in charge of the Regents of the University. The latter placed it in the hands of the Trustees of the College of Physicians and Surgeons, April 1, 1811. In 1814 it was granted by the Legislature to Columbia College, upon the condition that within 12 years the College should be removed thither; but in 1819 this condition was rescinded, and $10,000 was given to the College to aid in extending the premises upon the original location. These grounds have also increased greatly in value, and the College is at this moment perhaps the wealthiest in the Union, with this important feature: that its wealth is not coupled with inhuman conditions and provisions, but left free to the discretion of its trustees. A grammar school has been many years connected with the College.

The University of the City of New York, located on the E. side of Washington Square, occupies a fine marble building in the English collegiate style of architecture. It is 100 by 200 ft. on the ground; and besides the portion occupied by the College, it contains rooms leased to societies, artists, and professional persons. This College grew out of a discussion with regard to a University on a more extended plan than any in the Union. A convention of literary and scientific gentlemen was held in the fall of 1830, and in that year a subscription was opened to raise $100,000 for the establishment of a University. An unhappy controversy arising directly upon the appointment of a chancellor, the institution did not attain the pre-eminence to which it aspired. Its course of study is essentially the same as that of other American colleges.

The College of Physicians and Surgeons is located on 23d St. and 4th Avenue. The site and grounds are leased with privilege of purchase, and funds derived from the proceeds of the sale of the building on Crosby St., formerly owned by it, have been raised to effect the purchase. The edifice now used is 75 by 100 ft., and is valued at $80,000. The first story is leased for stores. The College was incorp. by the Regents in 1807, by virtue of an act passed March 21, 1791. Lectures were first held in 1807–08. The Medical Department of Columbia College was merged in this Nov. 1, 1813. The College has 2 courses of lectures annually, and a library of 1,200 volumes.

The University Medical College, formed under an act of Feb. 11, 1837, as a branch of the University of New York, is located on 14th St. between Irving Place and 3d Avenue. The building is 80 by 103 ft., 4 stories in front and 5 in rear, and is valued at $50,000. Its charter provides that 5 students of the Free Academy shall be admitted free of charge except the matriculation fee. Its library numbers 5,000 volumes, and its museum is valued at $25,000. Two courses of lectures are delivered annually.

The New York Medical College, located on E. 13th St., was incorp. in 1850. The college building is 60 by 120 ft., and is valued at $70,000. It has a 5 months' course of lectures annually. Ten students are admitted upon payment of $20 and matriculation fee.

The Metropolitan Medical College, located at 68 E. Broadway,

which no reports are made collectively to the public. Many of these have special courses of study, or are limited to objects not embraced in a general plan of education. Several of these are numerously attended; and in some the extent of the course of study is equal to that in our colleges.[1]

About 250 periodicals, embracing daily, tri-weekly, semi-weekly, weekly, semi-monthly, monthly, and quarterly, are issued in the city of New York, counting under one title the several editions issued from the same press, unless bearing different names.[2]

The New York Obstetrical Society was formed July 12, 1860, and now numbers [illegible] members.

The Pathological Society for improvement in medical practice meets semi-monthly.

The American Medical Association was formed in 1847, and met in 1851. It meets monthly at the University, and sends 5 representatives to the State Medical Society. There are several other medical and surgical societies in various parts of the city.

The General Theological Seminary of the Protestant Episcopal Church in the U. S. was established at New Haven, Conn., in 1817, and removed to this city in 1822. It was incorp. April 5, 1822, and is well endowed. Its library numbers over 12,000 volumes. It occupies 2 handsome stone buildings, each 50 by 110 ft. on 20th St., between 9th and 10th Avenues. Its trustees consist of the Bishops of the U. S. and others appointed in proportion to moneys granted to the seminary.

The Union Theological Seminary [illegible] was founded in 1836, and [illegible] Mar. 27, 1839. It [illegible] Waverly Place, cor. 5th St., and near Washington Square. It has a library of [illegible] volumes. Its Board of Directors are clergymen and laymen, an equal number of each, elected for 4 years.

Commercial colleges, writing schools, and studios for instruction in the fine arts, are numerous in the city. The *School of Design* at the Cooper Union is eminent among these for the extent of its facilities and the numbers that avail themselves of them. Music, drawing, and painting are carefully taught in many of the city schools; and the facilities at the Free Academy for these studies are superior to those in most other institutions.

The Protestant Episcopal Public School was founded in 1710, and has continued until the present time. At some future time it will be [illegible] added by a [illegible] dated Sept. 23, 1709, by Dr. John Baker, who [illegible] his country seat near 80th St., on the East River, embracing 46 acres, for a charity school. With a prudent forecast, the testator preserved the property from sale until after the death of 9 persons then living; and the dense part of the city has already approached the premises. An act passed April 16, 1859, authorized the sale of portions, but no benefit has hitherto been received. In April, 1859, 3 of the 9 lives were existing.

The following are the principal of the Roman Catholic schools:

The College of St. Francis Xavier, 39 W. 15th St., is an institution under the care of 10 Jesuit priests.

[illegible] Most Holy Redeemer, 2nd St., is under the care of 7 priests of the Order of Redemptorists.

St. [illegible] Academy, 44 2d St., is under the care of the Brothers of the Christian Schools.

Academy of the Holy Infancy, in Manhattanville, and the *[illegible] of the Sacred Heart* in Manhattanville, are under the charge of the Ladies of the Sacred Heart; the latter has 180 pupils. An institution of the same name at 49 W. 17th St., under similar direction, has 86 pupils.

[illegible] and Academy of St. Vincent, on 66th St., upon the premises of the Central Park, has 180 pupils.

St. [illegible] School, at 229 East Broadway, is under the charge of Sisters of Charity, and has 108 pupils.

St. Peter's School, at 16 Barclay St., is under the charge of Sisters of Charity, and has 80 pupils.

St. Joseph's School, on 6th Avenue, is under the charge of Sisters of Charity.

St. Lawrence School, Yorkville, is under the charge of Sisters of Charity, and has 40 pupils.

St. [illegible] School

St. [illegible] School has [illegible] and 70 girls; and 60 girls in the preparatory department.

Free Catholic Schools.—There are 25 schools of this class reported in the city: at which 4,920 boys and 5,530 girls are taught. Most of the schools have male and female departments; and of these 7 are taught by Brothers of the Christian Schools, 9 by Sisters of Charity, 2 by Ladies of the Sacred Heart, 2 by Sisters of Notre Dame, 1 by Sisters of Mercy, and 1 by lay teachers. Of several the teachers are not specified. These schools are named St. Patrick's, St. Mary's, St. Joseph's, St. James's, St Francis Xavier's, Manhattanville, St. Bridget's, Transfiguration, Mount St. Vincent, St. [illegible], [illegible], St. Catharine's, Most Holy Redeemer's, St. Alphonsus's, St. Vincent de Paul's, Nativity, St. Columba, Holy Cross, St. Stephen's, St [illegible], [illegible], St. [illegible], [illegible], St. [illegible].

This paper opposed the administration of Governor Crosby and supported the interest of Rip Van Dam, who had previously conducted the administration. The ballads, serious charges, and, above all, the home truths in his democratic journal irritated Crosby and his Council to madness. Zenger was confined several months by order of the Governor and Council for printing and publishing seditious libels, treated with unwarrantable severity, deprived of pen, ink, and paper, and denied the visits of his friends. The popular feeling, however, was strongly against these proceedings. The Assembly, notwithstanding the application of the Governor, refused to concur with him and his Council. The grand jury manifested equal contumacy, [illegible] attorney general was then directed to file *an information*. The judges refused to hear and allow the exceptions taken by Zenger's counsel, and excluded them from the bar; but he was ably defended by other counsel, and especially by Andrew Hamilton, then a barrister [illegible] Zenger [illegible] counsel admitted the printing and publishing of the papers, and offered to give their truth in evidence. He then quoted from the Acts of the Apostles and from one of the Epistles of Peter, to show that it was a very great offense to speak evil of dignities, and insisted upon the criminality by the laws of God and man of reviling those in authority, and consequently that Mr. Zenger had offended in a most notorious and gross manner in [illegible] the counsel, "is the king's immediate representative, and supreme magistrate of this province." Mr. Hamilton remarked in his reply, that we are charged with printing a certain *false*, malicious, seditious, and scandalous libel. The word *false* must have some meaning; or else how came it there? and he put the case, whether if the information had been for printing a certain *true* libel, would that be the same thing. "And to show the [illegible] that if he can prove the facts charged upon us to be *false*, I will own them to be scandalous, seditious, and a libel." He [illegible] prosecution the trouble of proving the papers to be false, the defendant would prove them to be true. To this Chief Justice De Lancey objected, "You cannot be admitted to give the truth of a libel in evidence: the law is clear that you cannot justify a libel." Mr. Hamilton maintained that leaving the court to determine whether the words were libelous or not rendered [illegible] in [illegible] terrible court of Star Chamber many worthy and brave men suffered for so doing; and yet even in that court [illegible] what I hope will not be taken amiss in me to say in this place, to wit:—"The practice of information for [illegible] arrant coward to cut down and destroy the innocent.

The Benevolent Institutions of New York are numerous, and comprehend measures for the relief of nearly every variety of human suffering. Those under the direct charge of the city have already been noticed. The greater part of other institutions of like character are under the management of companies incorporated for limited and special objects. Prominent among these are the hospitals and dispensaries, affording relief to every class of the sick and distressed. Up to 1857, at these various institutions, 179,377 persons had been vaccinated; 1,666,559 patients had been treated; and $297,761.60 had been expended. The Legislature usually appropriates money to several of these institutions.[1] Several of the more important of the benevolent institutions are supported wholly, or in part, by the State, among which are the Deaf and Dumb Asylum,[2] the Institution for the Blind, and the Society for the Reformation of Juvenile Delinquents.

The one cannot, because of his high station, and the other dare not, because of his want of courage, defend himself in another manner." The jury, after a short consultation, returned a verdict of not guilty, to the great mortification of the court and of Zenger's persecutors, but with great satisfaction to the people. Such was the struggle which the press had to maintain only one hundred years ago, and only forty years before the Revolution gave to its freedom the sanction of Government and the majesty of authority.—*Introduction to the Nat. History of the State by Wm. H. Seward.*

The New York Evening Post was commenced in 1746, but was soon discontinued.

The New York Mercury was commenced by Hugh Gaine, and continued by him 31 years. It was discontinued at the close of the Revolutionary War.

The New York Gazette was commenced in 1759 by Wm. Wyman. It continued irregularly until 1767, when it was discontinued.

The American Chronicle was commenced by S. Farley in 1761, and was discontinued the next year.

The New York Packet was commenced in 1763. It had only a brief existence.

The New York Journal and General Advertiser was commenced in 1766 by John Holt.

The New York Chronicle was commenced in 1768 by Alexander and James Robertson, and continued until 1772.

Rivington's New York Gazetteer; or, The Connecticut, New Jersey, Hudson's River, and Quebec Weekly Advertiser, was commenced in 1773 by James Rivington. This paper appeared during the Revolution as

The Royal Gazette, semi-w., published by "James Rivington, printer to the king's most excellent majesty."

New York Packet and American Advertiser was commenced in 1776 by Samuel Loudon. No other papers appeared in New York until the close of the war.

For list of papers since the Revolution, see p. 442.

[1] *The New York Hospital*, founded in 1770, was incorp. June 13, 1771, and is under the care of 26 governors. It has two very extensive establishments,—the hospital proper, upon Broadway, between Worth and Duane Sts., and the Bloomingdale Lunatic Asylum, on 117th St. near 10th Avenue. The first hospital, built in 1775-7, was burned. A new one was soon after begun, and while still unfinished was occupied by British and Hessian troops for barracks, and it was not finally opened for patients until Jan. 3, 1791. On the 14th of March, 1806, the Legislature enacted that $12,500 should be given to the hospital annually for 50 years, on condition that apartments for various forms and degrees of insanity should be prepared, and that an annual report be made to the Legislature. The sum thus appropriated was to be chargeable upon duties on auction sales. In 1811 a lying-in ward was opened, and continued 20 years. In 1821 the lunatic department was organized, and one of the buildings of the present hospital was erected, but in 1841 a change of site was authorized. A library was founded in 1796, and a pathological cabinet in 1840; but a suitable building was not provided for the latter until 1856. In 1853 a new and spacious building, S. of the main hospital, was erected, upon a plan the most perfect that experience could devise. It was finished in 1855, at a cost of $140,000[2]. Clinical instruction, both medical and surgical, has long been given; and two operating theatres have been provided for this purpose. The hospital on Broadway is now limited to the receiving of cases of sudden injuries from accident, and non-contagious diseases in which there is prospect of improvement; and it is not intended for the support of the incurable, or to supply in any sense the place of a poorhouse. Those received are either supported gratuitously, or pay at a rate barely sufficient to defray cost of support. The former constitute about 40 per cent. of the entire number treated. Seamen are received and their expenses are paid wholly or in part from the hospital money paid by the U. S. Government. From Feb. 1, 1792, to 1856, 100,111 patients had been received, of whom 77,390 had been cured and 4,768 relieved. Of the 10,963 who died, many were brought in from the street in a dying condition. Nearly 4,000 now receive the benefits of the hospital yearly.

The Lunatic Asylum, in 1818, was located at Bloomingdale. A building was commenced May 7, 1818, and was opened to patients in June 1821. The plan comprehends a center building 211 by 60 feet, with 2 detached wings. A wing for the violent insane male patients was built in 1830, and another for the like class of females in 1837, making the whole cost, up to 1839, $200,000. In 1854 two spacious 2 story brick buildings were erected, at a cost of $52,000. From May, 1821, to Jan. 1856, 4,182 patients were received here, of whom 1,911 were cured, 501 improved, and 471 died. The grounds have an extent of about 40 acres, and are finely adapted to outdoor exercise in fine weather. The annual expense of both institutions is about $146,000.

St. Vincent's Hospital, at 102 and 104 E. 13th St., was established by, and is under the care of, Sisters of Charity.

St. Luke's Hospital is located at the corner of 5th Avenue and 54th St. The building was erected in 1854, and is designed to accommodate 250 patients.

Jews' Hospital is on W. 28th St., between 7th and 8th Avenues. The society was formed and a building erected in 1854. The hospital has received a bequest of $20,000 from the late Mr. Touro, of New Orleans.

Woman's Hospital, on Madison Avenue, was established in Feb. 1855, by Dr. J. Marion Sims, and incorp. April 18, 1857, under 27 governors.

New York Eye and Ear Infirmary, at the corner of 2d Avenue and 13th St., was incorp. March 29, 1822. The present building was completed in 1856, at a cost of $41,252.39, including the lot. It has usually received appropriations from the city and State. Previous to 1856, 51,580 persons had received treatment in the institution.

New York Opthalmic Hospital, on Stuyvesant St., was incorp. April 21, 1852, and opened May 25 following. A course of lectures upon diseases of the eye is delivered annually.

The Children's Hospital, on E. 51st St., near Lexington Avenue, was established for the cure of poor children otherwise destitute of aid. It is under the care of an association of ladies.

New Asylum for Lying-in Women, at 85 Marion St., is under the care of lady managers.

The New York Dispensary, on White, corner of Center St., was established in 1790, and incorp. April 8, 1795. It supplies the district S. of a line passing through Spring, Broadway, 14th, 1st Avenue, Allen, and Pike Sts.

The Eastern Dispensary, at 74 Ludlow St., was incorp. April 25, 1832. It supplies the district E. of the latter and S. of 14th St.

The Northern Dispensary, on Christopher, corner of 6th St., was incorp. Nov. 28, 1828, and opened in 1829. Its district lies W. of Broadway, between Spring and 23d Sts.

The Dean't Dispensary, on the corner of 23d St. and 2d Avenue, was incorp. May 7, 1851. It was founded upon the bequest of Miss Demilt, and cost about $30,000. Its district is E. of 5th Avenue, between 14th and 34th Sts.

North Western Dispensary, at 511 8th Avenue, was incorp. May 29, 1852. Its district is W. of 6th Avenue, between 23d and 60th Sts.

The German Dispensary, at 132 New Canal St., was organized in Jan. 1857. Professors of the College of Physicians serve gratuitously, and have distributed the labor into divisions.

The Homœopathic Dispensary, at 49 Bond St., was established in 1853 by Dr. Otto Fuligraff, and is supported entirely by private subscription.

[2] *The New York Institution for the Deaf and Dumb* was incorp. April 15, 1817, and opened May 12, 1818. It was located in the "New City Hall" until 1829, when it was removed to E. 50th St., corner of 4th Avenue,—the premises now occupied by Columbia College. It there remained until the wants of the institution required more ample accommodations and the growth of the city suggested a retreat from the approaching pressure of business. A fine tract of nearly 40 acres at Fanwood, on the Hudson, on 14th St., was accordingly purchased, and the erection of buildings was commenced in 1853. They are in the aggregate 650 feet in length, and cover 2 acres. The institution has accommodations for 450 pupils. The work was sufficiently advanced to justify removal toward the close of 1856. The cost greatly exceeded the estimate; and under an act of April, 1857, the institution was assumed by the State, with all the property connected therewith. Pupils are received from every co. of the State, and to a limited extent from New Jersey. It is strictly an educational institution, and is designed to impart a useful amount of literary instruction, and the knowledge of some mechanical operation by which to gain support. Dr. Harvey P. Peet has been for many years President of the Institution.

The New York Institution for the Blind, incorp. April 21, 1831, was opened March 15, 1832, principally through the influence of Dr. Samuel Akerly, Samuel Wood, and Dr. John D. Russ. A

NEW YORK AND BROOKLYN.

The city of New York has a large number of charitable corporations chiefly dependent upon private subscriptions for support; and their management is highly creditable to those who have bestowed their time and money for the relief of the suffering and friendless. Several of these have received aid from the State and the city in their organization and support.[1]

school with 6 pupils was opened May 19, 1852, at 47 Mercer St., under Dr. Ruggles. By the aid of the city and donations from individuals and the city, a piece of ground and buildings on 5th Avenue were obtained of James Boorman, at a nominal rent, with a covenant to sell. An instructor in the mechanic arts was appointed, and Dec. 2, 1853, the first public exhibition was held at the City Hall. The success of teaching from raised letters, in which the pupils excelled in reading, geography, arithmetic, and especially in music, and the skill of their workmanship in mats, mattresses, and baskets, excited great interest. The present site, between 50th and 51st Sts., Avenues and 2d and 3d Sts., was purchased of Mr. Boorman at a reduction of more than $50,000 below what it could have been sold for; and in the month of April 1856, $12,000 was given by the State, conditioned to the raising of $8000 more by the managers. In 1854 $50,000 was given for new buildings. Annual reports are made to the State Legislature. State pupils have been received since 1834; and for many years the institution has received pupils from New Jersey. The site, originally beyond the improved portion of the city, is now in the midst of a densely settled quarter, and the square which it occupies is valued at $400,000. The managers are endeavoring to obtain leave to sell and erect new buildings on the upper part of the island. The proceeds of the sale would, it is believed, procure new and superior premises without other aid. The institution now has 200 pupils, and employs 11 blind instructors and assistants. The manual trades taught are broom, mat, bandbox, and mattress making and needle work. Musical instruction is received with great facility by the blind; and with those that evince decided talent it often becomes a means of support. These pupils are instructed in the common and higher branches of English education; and the number of books with raised characters now prepared for the blind is quite extensive, including the entire Bible, and volumes upon almost every branch of useful learning.

The New York Juvenile Asylum is intended to secure the maintenance and promote the welfare of children under 14 years of age who may be in destitute circumstances. This asylum was incorp. June 30, 1851. Its office is located at 23 W. 13th St., and its temporary asylum is at the foot of E. 50th St. A permanent asylum, erected on 175th St., near High Bridge, was opened April 2, 1856. This society takes children between 7 and 14 intrusted to it by parents, guardians, or other competent authority, and affords them the means of a moral and industrial education. A fund originally of $50,000, and afterward of $20,000 in addition, was raised by subscription; and to this $40,000 was added by the city. The total number sent to the house of reception up to Jan. 1859, was 4,893. Several companies of children are sent annually to the Western States, to be indentured to farmers and others, under the direction of a judicious person. Children are also bound out in the city and vicinity as occasion offers. An act of March 25, 1856, directed a sum not exceeding $75 per annum to be levied by tax and paid to this asylum for each child committed by the city and supported by the society, and gave $2,000 toward the erection of a new house of reception on 13th St. The edifice is now nearly completed.

The Society for the Prevention of Pauperism, formed Dec. 16, 1817, after promoting the establishment of the first Savings Bank and other institutions of public utility, resolved itself into

The Society for the Reformation of Juvenile Delinquents, Dec. 19, 1823, and measures were taken to carry the purpose implied by the name into effect. An act of incorporation was obtained March 29, 1824; and, having in that year raised $17,000 and obtained possession of the U. S. Arsenal near Madison Square, the establishment was opened Jan. 1, 1825, with 9 inmates. This place was burned in 1839, and the location changed to a building on the East River at the foot of 23d St., erected for a fever hospital. In 1851 the society exchanged a parcel of land it possessed on Wards Island for about 36 acres on the s. end of Randalls Island, where the corner stone of a new building was laid Nov. 24, 1852, by the Mayor. The buildings were opened Nov. 24, 1854. The male department will consist of a central building and 4 wings, of which 2 are parallel to the front of the center building, and form together with it a front of 590 ft. upon the river. The other two wings are to radiate from the center of the rear at angles of 60°; they have not yet been erected. The arrangement admits of the necessary classification and embraces every modern improvement. A workshop 3 stories high and 30 by 100 ft. is erected in the rear of each of the front wings. The female department, when completed, will be on a plan similar to the other, of 250 ft. front, and otherwise proportionally smaller. With the refuse stone obtained in excavation and grading, a sea wall was built out to low water mark; and some seven acres were thus added to the grounds. The entire cost, including the fitting up, to Nov. 1854, was $310,441.15, of which $14,199.39 had been for the Female Department. The whole number of inmates from its first opening to 1859 was 7,650; and at the beginning of that year it contained 463 boys and 77 girls. A female department is now in course of building, and when ready will [illegible] as follows:—

Of 2,641 received in 8 years, 2,039 were white boys, 439 white girls, 138 black boys, and 25 black girls; as to nativity, 1,548 were Irish, 445 American, 218 German, 150 English, 53 Scotch, 30 French, 10 Italian, 4 Swedes, and 1 each Spanish, Polish, Russian, Prussian, Dane, Dutch, Welsh, and Belgian.

The Prison Association of New York, incorp. in 1844, for the relief and encouragement of discharged convicts, is elsewhere more fully noticed. It has a female department, organized in 1844, to provide employment for discharged female prisoners.

The Orphan Asylum Society of New York was incorp. April 7, 1807. It was located on the banks of the Hudson, near 80th St., in 1840. It has 9 acres of grounds and a building 120 by 60 ft., pleasantly situated. About 200 orphans are supported in the institution.

The Society for the Relief of Half-Orphan and Destitute Children was established Dec. 16, 1835, and incorp. April 18, 1837. It is located at No. 7 10th St., and is usually known as the "Protestant Half-Orphan Asylum." It has received donations of $20,000 from John Hosburgh and of $5,000 each from James Boorman, John Jacob Astor, Peter G. Stuyvesant, and the daughters of John Mason. The whole number of inmates received up to 1859 was 1,884, and the number then remaining was 156 boys and 161 girls. *Common Council Manual*, 1859, p. 330.

The Roman Catholic Orphan Asylum, on Prince St., was incorp. April 29, 1836. It is under the charge of Sisters of Charity, and has 300 inmates,—all females.

St. Patrick's Orphan Asylum has a male and female department. The male department, on 51st St., has 400 inmates, and the female department, on Prince St., corner of Mott St., 300. They are both under the same trustees, and are managed by Sisters of Charity.

The Orphan Home of the Protestant Episcopal Church at 74 Hammond St., was incorp. April 16, 1838.

Leake and Watts Orphan House is located at Manhattanville, between 9th and 10th Avenues and 111th and 112th Sts. This noble charity was founded by the bequest of J. A. Leake, and enhanced by the liberality of Mr. Watts, who waived a claim he had upon the legacy. It is incorp. under the general law.

St. John's Home for Indigent Convalescents is at 455 Hudson St.

House and School of Industry at 143 W. 14th St., is for the gratuitous instruction of poor females in needle work.

Association for the Relief of Respectable Aged Indigent Females is located at 20th St., between 2d and 3d Avenues.

Nursery and Child's Hospital, Free Home, at 52 4th Avenue, is under lady managers.

Magdalen Benevolent Retreat, on Lexington Avenue, between 88th and 89th Sts. and 4th and 5th Avenues, is under the care of lady managers, has 40 inmates, and is designed to encourage reform in abandoned females.

American Female Guardian Society and Home for the Friendless, on E. 30th St., between 4th and Madison Avenues, was formed in 1834. It received by donations in 1857 and '58 $49,719.79. The home school had 108 girls and 112 boys, industrial school No. 1 340 girls, and No. 2 165 girls. It is managed and chiefly supported by ladies.

St. Vincent's Convalescent Home of Protestant Sisters, Houston St., corner of Murray St., is under the charge of Sisters of Charity.

New York Ladies' Home Missionary Society of the Methodist Episcopal Church, on the site of the "Old Brewery," 61 Park St., was incorp. March 20, 1856.

St. Joseph's Asylum was incorp. April 14, 1851. It is designed to support and educate in some useful employment poor orphan, half-orphan, homeless, and neglected children, especially of German origin. It has 16 managers.

The Fourth House of Industry is located on North St., Nos. 155, 157, 159.

Numerous institutions of beneficence are established upon the principle of mutual support, all of which derive their means from fixed contributions of members. The number of these is very great, including many which are limited to particular nationalities and to certain mechanical or other occupations.[1] The city has a large number of religious associations and societies for the promotion of morality,—some national or cosmopolitan in their field of operation, and others local in their range. While some of these oppose vice and wrong in their widest sense, others restrict their efforts to narrower limits of labor and concentrate upon a single object the united efforts of their members. There are at present about 290 churches in the city of New York.[2]

Children's Aid Society, office No. 11 Clinton Hall, Astor Place, was formed in 1853. It has for its object to provide homes and employment for destitute children, and, to a limited extent, for adults of both sexes. Up to 1858 it had provided homes for 3,576. In 1857 it sent 468 boys, 200 girls, 28 men, and 57 women to other States. It had opened 6 industrial schools, with a total of 968 pupils, maintained a lodginghouse for newsboys and peddlers, at a low charge, and an other one for girls, and had under its direction several boys' meetings and libraries. Its annual expenses are about $15,000, not including a large amount of gratuitous services.

New York Association for Improving the Condition of the Poor was formed in 1843, and incorp. Dec. 6, 1848. Its object is to afford temporary relief to such as do not come within the sphere of other existing charities, and to elevate the physical and moral condition of the indigent. To discountenance indiscriminate almsgiving and street begging, it inquires through its visitors into the merits of applications, and for this end has a supervisory council of 5 to each ward, and as many visitors as may be needed. It is supported by annual donations and collections, and in the year ending Oct. 14, 1857, expended $41,480.88.

The American Bible Society, formed May, 1816, as a national institution, claims notice in this place from the spacious and elegant edifice which it has erected. This structure occupies three-fourths of an acre, and is nearly triangular, extending 198 ft. on 4th Avenue, 202 ft. on 8th st., 96 ft. on 3d Avenue, and 232 ft. on 9th St., with a court within. It cost nearly $300,000, and contains the offices of numerous religious and denominational societies. Its manufactory of Bibles and Testaments, when in full operation, employs 600 persons. A City Bible Society was formed several years before the one above noticed; and numerous kindred associations have been formed at different periods.

[1] Of this class are Masonic, Odd Fellows, and other secret societies who possess funds for the relief of the sick, the support of widows and orphans, and the burial of the dead. Others, limited to particular occupations, some of which have been discontinued, have been chiefly as follows:—

The Marine Society of New York was created by patent April 12, 1770. It has for its principal object to collect moneys, by admission fees and yearly dues of members, for the relief of the widows and orphans of seamen. Up to 1826 it had distributed $88,100 for these objects. Its meetings are held at the United States Hotel, corner of Pearl and Fulton Sts.; and its chief importance now arises from the circumstance that its president is one of the trustees of the Sailors' Snug Harbor, on Staten Island. The importance of that noble trust will serve to perpetuate this society.

The New York Nautical Society was established in 1820, for charitable purposes and the promotion of useful improvements. Its members were those who had been shipmasters or commanders of vessels.

The New York Watermen's Society was formed in 1825, for benevolent purposes and the promotion of useful improvements in navigation. It is supposed to have been discontinued.

The Pilots' Charitable Society was formed in 1817, for benevolent and charitable purposes.

The Humane Society was formed in 1787.

The Association for the Relief of Disabled Firemen is a charity devoted to the objects expressed in its title.

General Society of Mechanics and Tradesmen was incorp. March 14, 1792.

The Mutual Benefit Society and the

Mutual Aid Society of the City of New York are now extinct.

The House Carpenters' Society, the

New York Society of Journeymen Shipwrights; the

Provident Society; and the

Benevolent Society are charitable associations, from which we have no returns.

Manhattan Provident Society of the City of New York was formed Nov. 17, 1708.

Friendly Society of the Town of Harlem was formed Feb. 10, 1809.

New York Masonic Society was formed Feb. 20, 1807.

Saint David's Benevolent Society (Welsh) was formed in 1800. It was soon discontinued.

Albion Benevolent Society was formed about 1800. It was soon discontinued.

Ancient Britons' Benefit Society was formed about 1805, from the two latter, and incorp. Feb. 27, 1807. It continued until 1835, when the

Saint David's Benefit & Benevolent Society was formed. It divided 3 years after, and in Jan. 1841,

Saint David's Benefit Society and

The Welsh Society were formed. These were merged in the *Saint David's Benefit Society*, which is still continued.

Saint Patrick's Society and the

Hibernia Provident Society of the City of New York were formed in April, 1807.

Saint Andrew's Society (Scotch) was formed in 1756. Its anniversary is Nov. 30.

Caledonia Society of the City of New York was formed April 6, 1807.

Saint George's Society is a society of English.

Saint Nicholas Society (Dutch) is chiefly composed of the descendants of the old Dutch colonists.

New England Society holds its anniversary Dec. 22.

Besides these, there are and have been a great number of societies and unions, particularly among the German, Irish, Italian, and other foreign classes, and among the Jews and other denominations, concerning which it is difficult to procure full statistics, or even the names. The "George Clinton Society," "Washington Benevolent Society," "Tammany Society," or "Columbian Order," (the latter founded in 1805, and still existing,) are among those memorable for their political influence; the "Society of Cincinnati," for its Revolutionary associations, and the "Wilberforce Philanthropic Society," "Manumission Society" of 1785, "Society for the Relief of Imprisoned Debtors," and a great variety of others, for their labors in the field of charities, but which have disappeared with the abuses they combated, and their elements re-organized under other names, for new labors which the misfortunes, vices, and crimes of mankind are constantly providing.

The dates of first churches in the several denominations are given upon the authority of Greenleaf's *History of the Churches of New York*. The lists given by that author include several societies not owning church edifices, on which account the numbers are larger than those of the census:—

The Literary and Library Societies of the city exert an important influence upon the intellectual condition of the people. Many of the libraries are extensive and are provided with ample accommodations for the preservation and care of the books and for the convenience of students.[1]

The population of New York has increased with great rapidity since the commencement of the

The first church edifice was erected near the Fort, in 1633, and in 1642 was superseded by one built [illegible] within the Fort. The Reformed Dutch Church retained the ascendency until 1664, when the chapel in the Fort was devoted to the English service. Trinity, formed in 1697, received grants of property from the Government, which by the subsequent growth of the city have become enhanced in value beyond parallel in America, if not in the world. Its [illegible] [illegible] [illegible]

present century.[1] The completion of the Erie Canal gave an impetus to its growth and greatly increased its business transactions. The commerce of the city, without a parallel on the Western continent, has already been noticed in the general article upon the commerce of the State. The financial institutions are of a number and magnitude commensurate with its wants as the great center of commercial wealth in the nation.[2]

The manufactures of the city form one of the most important branches of the industry of the inhabitants. They embrace nearly every variety of article produced in the civilized world, and the aggregate capital employed is very great. The last State census reported 2,424 manufacturing establishments. In single instances the capital invested exceeds a million of dollars, and the number of persons dependent upon these large establishments for employment extends to several hundred. The above estimate does not profess to include the minor trades, in which little is invested beyond an industrial education and a small stock of implements and materials, but which in the aggregate amount to considerable sums. A large number of manufacturing establishments legitimately belonging to the city are located in the several suburban places for economy of rent and for room; and if these were added to those located in the city the aggregate would probably be nearly equal to that of the most noted manufacturing cities of Europe.

The Public Buildings of New York are many of them elegant and substantial structures, combining strength and durability with architectural beauty. Among the most noted of these is the U. S. Custom House, the Merchants' Exchange, and the City Hall.[3]

The Clearing House Association was formed Oct. 1, 1853, for the purpose of facilitating the settlements of banks with each other. Its office is in Wall, corner of William St. The arrangements are so perfected that the entire daily exchanges of all the banks in the principal commercial cities of the world are made in six minutes. The whole amount of bank funds which passed through this institution up to Aug. 1, 1858, was $200,...,...,...; and during that period so perfect has been the system and balances that the error of one cent has never been made.

Life Insurance Companies, to the number of 7..., with an aggregate capital of $17,...,..., are located in the city. Besides these, a large number of agencies for companies in other States are in the city, and others are established in the city. The amount of capital invested in bonds, etc., and other investments of companies not known, as to general reports are published. A list of these companies is elsewhere given. There are also several trust companies, with large capital, and a very great number of companies, associations, and individuals doing in the business of banking and exchange, of which no statistics are attainable.

The Chamber of Commerce was instituted in 1768, and incorporated March 13, 1770. It primarily owes its origin to the necessity felt toward the close of the colonial period for some organization to protect the interests of trade against the usurpations of the British Government. Its rights were confirmed April 17, 1784, and it has since continued to exercise a powerful and beneficial influence. Its charter gives it the right to establish rules and regulations for trade, and to decide upon points submitted to the promotion of such trade and commerce as the commercial interest requires. Within a short time it has commenced the formation of a library of statistical and commercial works, and opened rooms sufficiently ample and convenient for the wants of the associated. Its first report was published in 1857.

The Custom House, located on Wall St., on the site of the old Federal Hall, is a marble structure in the Greek style of architecture, with a Doric portico at each end. It has a marble base, and is fireproof throughout. It was commenced in May 1834, and finished in May 1841 at a cost of $...,...

The City Hall, on the Park, is 216 by 105 ft., with two stories and a high basement. It is built in the Italian style, and is faced with marble except on the north side. It was begun Sept. 26, 1...., and finished in 18..., at a cost of over ... hundred dollars. The upper story and cupola were burned Aug. 1..., 18..., and have not been rebuilt. It is occupied by the Common Council, County Clerk, and various city and county offices. The first City Hall, built in 1...., stood on the present site of the Custom House, at the head of Wall St.

The Hall of Records, on the Park, is chiefly interesting from its historical associations. It was formerly the Jail, or Prison, and in the Revolution it was the prison and watch-house where prisoners were marshaled, and from which they were taken to execution. In 1832 it was a cholera hospital. The pillars upon the ends are of modern origin.

The Lafayette, on the Park, was built by John Vanderbilt in 1858, for the exhibition of panoramic views, and is now one of the Minstrel halls. It reverted to the city at the expiration of a ten years' lease.

The Hall of Justice, or "*The Tombs*," on Center St., is a massive structure built of Maine granite, in the Egyptian style. Dimensions: It is a double square, 2... by 2... ft., with a large court-yard in the center. It was erected in 18..... Executions take place in the open air within its walls.

The New Armory, or *Depot*, 7... Avenue, corner of White and Elm Sts., is 1... by 84 ft. and 2 stories high. It is built of stone, and is supplied with metal windows for safety against mobs. It is used as a receptacle for a part of the artillery of the 1st Division N. Y. State Militia, and as a drill room.

The Commercial Buildings and Private Residences of New York are many of them on a scale of great magnificence. The first of these are built of marble or a beautiful kind of brownstone; and in the upper part of the city are numerous streets which for miles present unbroken lines of palatial residences. Within the past few years a great improvement has taken place in the character of the commercial buildings erected, and many of them now in size and elegance have no superiors in the world.[1]

The Bay of New York was first discovered by Henry Hudson, then in the employ of the Dutch East India Co., Sept. 12, 1609. A settlement was made upon Manhattan Island by a company of Dutch traders, under the auspices of the West India Co., in 1612; but no permanent agricultural occupation began until 1623. During this year 30 families of Walloons from the Flemish frontiers, and a number of domestic animals, were sent over to form the nucleus for the permanent occupation of the country. Sarah Rapelje, a child of one of these families, born soon after their arrival, was the first white child born in New York. In 1626, Peter Minuet, the first Dutch Governor of the colony, purchased Manhattan Island of the natives for $24, and during the same year he caused a fort surrounded by cedar palisades to be erected. A new fort was begun in 1633 and was finished 2 years after.[2] The Colony of New Netherlands increased slowly; but in 1652 a feud arose between the company and settlers, which continued during the entire period of the Dutch occupation. The interest of the company was solely to make money by their operations; and they pursued their object by the exercise of an arbitrary power and without any regard to the prosperity of the settlers. This controversy tended greatly to develop democratic sentiments in the hearts of the people, and prepared them for the events which subsequently happened. In 1664 the colony fell into the hands of the English, and a new immigration took place, which materially changed the character of the population. A city charter, granted in 1652 and confirmed in 1686, secured many of the privileges since uninterruptedly enjoyed by the people, and formed the basis of all subsequent enactments. From the English conquest to the Revolution the history of the city is merged in that of the State and has no features of special interest.

Trade and commerce have been from the first the leading elements of the industry and wealth of the city, and in colonial times every measure of Government tending to embarrass trade occa-

now within the Central Park, and which has recently been sold for $7,500,000. It was assessed at very low rates, and was heavily mortgaged before it began to fall down. From a part of the proceeds of this property a new street was built, in 1858, west of 7th Avenue and 59th St. But, before it was finished, the road-bed, resting on wet peat, fell in by its own weight, on the morning of Nov. 19, 1859.

The Post Office occupies the old stone edifice of the Middle Dutch Church, on Nassau Place and Liberty St. It is small and inconvenient, and poorly adapted for the purposes of a post office. In the Rev. Dutch on the pews of the church were broken up for fuel, and the building was used as a prison, and at one time as a riding school. The present building for a post office on or near the Park has been agitated; but there is at present no arrangement tending to that result.

The Custom House occupies an imposing marble building adjacent to the Custom House directly on the bank of the United States Bank. Its operations are elsewhere noticed, see p. 122.

Under the first rude efforts of the style of architecture were an Act copy of their native Holland, and the city of New York was built for the merchants who planned, added to, and built with a view to trade. After the English occupation, the Dutch style was introduced. Of the streets the most important is Broadway, which, with the old street of Bowery, and nearly a west of the 3d, runs to the mains. One of the most interesting relics of the infancy of New York is the ancient tree which stood at the corner of Broadway and Wall St., and is known as "The Stuyvesant Pear Tree."

The first fort was built on the east of Trinity Church, on the river, and portions were built in 1747. Some work was in progress through a long time. The most old fashioned part of the city is the region around the old fort, looking the bay and adjacent country. A threatened invasion by the Indians caused the building of a fort on the line of the embankment and ditch across the then N. line of the city. This fortification, which stood upon the present line of Wall St., and from it that street derives its name, had been well built, and consisted of a line of earthworks, with bastions at the corners, and a ditch. The fort was known as "The Stuyvesant Pear Tree."

of the island. A stone fort, with 4 bastions, afterward built at the same place, and the Government House, which stood on the site of the present Custom House, was built in 1699. It remained until the Revolution. In 1775, when the city was occupied by the British, the fort was called Fort George, and the Battery, of 21 guns, was built on a little hill near the North River, and above it and near the Bowling Green. Many of the batteries of the shipyards: Badlam's Battery, of 8 guns, on Rutgers Hill, near Chambers' Island ground; Thompson's Battery, on Harlem's Hook and the Independent Battery, on Mount corner of Grand and Center Streets. Fortifications were erected in several places in the city and harbor. Fort was erected on Governor's Island, Public Hook, and Brooklyn Heights and Red Hook. During the War of great apprehension prevailed at several times, and the first year bodies of militia were stationed in New Utrecht and on Staten Island to repel any attempt on the part of the enemy to land. Subscriptions were raised in the city, and in Brooklyn volunteer companies were formed, and citizens generally became interested in the defense of the city. In June, 1814, a line of fortifications was built from the Battery to Harlem, and the Brooklyn Heights and Red Hook. During the War of 1812 the city was patriotism, and numerous volunteer associations pressed their

sioned great uneasiness. This city was among the first to feel the effects of the arbitrary measures of Great Britain, and was among the earliest to resist their tendencies.[1] The aristocratic element was probably stronger in this city than in any other part of America; and this was arrayed in favor of the British measures and against the "Sons of Liberty." Many prominent citizens, who had warmly sympathized with the popular movement in the hope of gaining redress of grievances, at length yielded their opposition when there appeared no alternative but war, and continued active or quiet friends of the Royal Government while it lasted. Several members of the first Provincial and Continental Congress afterward became friends of the king. The British forces took possession of the city immediately after the battle upon Long Island, Aug. 26, 1776, and remained until Nov. 25, 1783. The anniversary of this last event, known as "Evacuation Day," is still held in grateful remembrance, and is usually celebrated by military parade or other ceremonies.

In 1785 the first Congress of the United States after the war met in this city and held its sessions in the City Hall, corner of Wall and Nassau Streets. In the gallery of this building, facing Broad St., Gen. Washington was inaugurated first President, April 30, 1789. The New York Legislature returned to this city in 1784 and continued its sessions with intervals until finally removed to Albany with the State offices in 1797. The Port of New York was made a port of entry soon after the peace. Its revenues were collected under the State Government till 1789, but have since formed a most important source of income to the Federal Government. The receipts from customs at this port considerably exceed those of all the other commercial cities of the Union together, and defray nearly one-half the expenses of the General Government. In the midst of its general prosperity the city has had seasons of adversity.[2] At different times destructive fires have occurred, which have for a time seriously retarded business.

[1] The principal events which occurred in the city during the troubles leading to the Revolution are briefly as follows:—

1765, "Sons of Liberty" were organized to oppose the Stamp Act.

1765, Oct. 31.—A committee of correspondence with other colonies was appointed.

1765, Nov. 1.—The Stamp Act took effect, and popular excitement became extreme. The Lieut. Governor was burned in effigy before the fort.

1765, Dec. 26.—The ship Minerva was boarded by the Sons of Liberty in search of stamp paper. The paper was traced to a brig soon after, and ten packages were seized and burned.

1766, June 29.—The Assembly petitioned for a bronze statue of Pitt to be erected.

1766, Oct. 18-22.—The liberty pole on the Common (Park) was repeatedly destroyed, and there was imminent danger of a collision between the populace and the troops.

1770, Jan. 13.—New attempts were made to destroy the liberty pole, and the soldiers became riotous.

" Jan. 17.—At a meeting of 5,000 citizens, resolutions were passed not to submit to the acts of oppression.

" Jan. 18.—A collision took place between the soldiers and citizens at Golden Hill.

" Jan. 30.—The Corporation forbade the erection of a new liberty pole, and the people soon after planted one on their own land, inscribed "Liberty and Property."

" March 29.—Another attack was made upon the pole, which excited great indignation, and led to its being nightly guarded, until May 3.

" May.—A committee of 100 was formed to resist the importation of goods under the obnoxious laws; but they receded from their purpose July 9, and agreed to import everything but tea.

" Aug. 21.—A leaden equestrian statue of George III. was erected in Bowling Green. This statue was thrown down by the populace on the receipt of the Declaration of Independence, July 10, 1776. It was subsequently melted up into bullets in the family of Gov. Wolcott, of Connecticut. It is said that 42,000 bullets were made from the metal and then used service against 400 British soldiers afterward sent into Conn. by Gov. Tryon.

" Sept. 7.—A marble statue of Pitt was placed in Wall Street, in gratitude for his services in the repeal of the Stamp Act. In consequence of the course of Pitt after he became Lord Chatham, this statue was mutilated by a mob May 21, 1772, and, having become an unsightly, headless trunk, it was removed, under an act of March 7, 1788. It is now preserved in the Fifth Ward Hotel, West Broadway.

1773, Nov. 5.—The Committee of Vigilance denounced the importation of tea and agreed to resist its landing.

1774, April 21.—A vessel laden with tea arrived at Sandy Hook, but was not permitted to land; and in a few days it was sent back to London. About the same time 18 chests of tea privately brought into port were destroyed.

" May 19.—A great meeting was held in the "Fields," at which strong revolutionary resolutions were passed. A committee of 61 were appointed; but the next day a majority of them receded from their position, and the Whigs requested them names to be struck off.

1775, April 3.—The Colonial General Assembly finally adjourned.

" July 25.—Delegates were elected to the Continental Congress.

" Aug. 23.—Capt. Lamb was ordered by Provincial Congress to remove the cannon from the battery in the city for the forts in the Highlands. Resistance was offered from the Asia man-of-war, stationed off the battery; but 21 pieces—all that were mounted—were safely carried away.

[2] Two dreadful fires occurred while the city was in possession of the enemy. On the 21st of Sept. 1776, a fire spread from Whitehall Slip w. of Broadway, s. of Barclay Street, burning 492 houses, or one-eighth of the entire city. Another broke out on Cruger's Wharf, Aug. 7, 1778, which burned 300 houses in Great and Little Dock and the adjacent streets. Commissioners were appointed May 4, 1784, to settle claims to the soil and lay out streets in these burned districts. Destructive fires have since occurred, as follows:—

1811, May 19.—Upon Chatham Street 80 to 100 buildings were burned.

1828, $600,000 worth of property was burned.

1835, Dec. 16.—A fire broke out in the lower part of the city, which was not arrested until 40 acres, mostly covered by large stores, were burned over, and $18,000,000 worth of property was destroyed. It was the most disastrous fire that ever occurred in the city.

1845, July 19.—A fire broke out near Wall Street, and extended to Stone Street, ravaging the entire district between Broadway and the E. side of Broad Street. Five to eight million dollars' worth of property was destroyed.

1858, Oct. 5.—The Crystal Palace was burned.

Theaters in New York have been burned as follows:—Park, 1820, 1848; Bowery, 1828, 1836, 1838, 1845; Mount Pitt Circus, 1828; La Fayette, 1829; National, 1839, 1841; Niblo's, 1846, and Franklin, 1849.

Papers and Periodicals discontinued since the Revolution.

Since the Revolution, the following papers have appeared and been discontinued. The list is very imperfect; as, among the constant changes that are going on, it is impossible to ascertain precise data. It is possible that a few in this list may be still issued, and very probable that others may continue to exist under a different name.

The Great International RAILWAY SUSPENSION BRIDGE, Over the Niagara River

NIAGARA COUNTY.

This county was formed from Genesee, March 11, 1808. Erie was taken off April 2, 1821. It lies upon the w. border of the State, in the angle formed by the junction of Niagara River and Lake Ontario. It is centrally distant 255 mi. from Albany, and contains 558 sq. mi. The surface is generally level or gently undulating. It is divided into 2 distinct parts or terraces by a ridge extending E. and W. The lake shore is a bluff 10 to 30 feet high, and from its summit the lower terrace slopes gradually upward to the foot of an elevation known as the mountain ridge, where it attains an elevation of 100 to 150 feet above the lake. This ridge extends E. and W. through the N. part of Royalton and Lockport, and near the center of Cambria and Lewiston, and forms the N. declivity of the S. terrace. At its W. extremity it has an elevation of 250 feet above the lower terrace, and is nearly perpendicular. This height gradually declines toward the E., and upon the E. line of the co. it has an elevation of 80 to 100 feet. Through the central part of the co. the ridge is divided into two declivities, separated by a plateau from a few rods to a half mi. in width. The upper ridge is limestone, and for many mi. presents the face of a perpendicular cliff. Throughout the co. the ridge is too steep for cultivation. The S. half of the co., extending S. from the summit of this ridge, is very level. It has a slight inclination toward the S., and terminates in the Tonawanda Swamp. The whole inclination of the slope within the limits of the co., however, does not exceed 50 feet. The lake ridge—supposed to have been the ancient shore of the lake—extends W. from Orleans co. through Hartland and Newfane, thence turns S. W., and appears to terminate near Lockport Village. It appears again farther W., and at Cambria it is divided into two parts, the N. extending N. W. about 3 mi. and gradually declining to a level of the general surface, and the S. extending S. W. and uniting with the mountain ridge 4 mi. E. of Lewiston.[1] This ridge is composed of sand and gravel and the usual debris thrown up by a large body of water, and in character is essentially different from the surrounding surface. It varies from 5 to 25 feet in height, and is 20 to 150 feet in width. The N. descent is generally slightly longer and steeper than the S. The lowest rock in the co. is the Medina sandstone, which crops out in the ravines along the shore of the lake. It is the underlying rock of the W. half of the co., and extends to the foot of the mountain ridge. This ridge is composed of the sandstones and limestones belonging to the Niagara and Clinton groups, the heavy masses of compact limestone appearing at the top. The Onondaga salt group occupies a narrow strip along the S. border of the co. Nearly the entire surface is covered with deep deposits of drift, the rocks only appearing on the declivities of the mountain ridge and in the ravines of the streams.

Springs of weak brine are found in the ravines throughout the N. half of the co. They exude from the Medina sandstone; but none of them are sufficiently strong to be profitably worked. The Medina sandstone which lies at the foot of the mountain ridge has been quarried at several places for paving and flagging. Above the sandstone is a layer of impure limestone, about 4 feet thick, from which water cement is manufactured. The Niagara limestone furnishes an excellent building material and a good quality of lime. The principal quarries are situated in the vicinity of Lockport, and from them were obtained the stone for the construction of the canal locks at that place.[2] A vein of this stone filled with fossils admits of a high polish, and is used for ornamental purposes, presenting a beautiful variegated appearance.

Niagara River forms the W. and a part of the S. boundary of the co. It flows almost due W. from the E. extremity of Grand Island to the Falls, and thence nearly due N. to Lake Ontario. It contains several small islands belonging to this co., the principal of which are Tonawanda, Cayuga, Buckhorn, and Goat Islands. In its passage from Lake Erie to Lake Ontario, a distance of about

[1] This deflection in the course of the lake ridge must have been caused by a large bay that extended S. toward Lockport, and the N. end of the ridge which terminates so abruptly in Canal Basin was an island or a bar extending into the lake. Two large streams formerly discharged their waters into this bay, one through the ravine in which the Erie Canal is located, and the other through a deep ravine about 2 mi. W. of Lockport. At the head of the latter ravine is a fine perpendicular precipice, at which point must have been a waterfall.

[2] This stone is found along the whole course of the mountain ridge, and can be quarried in every town. The deep cut in the canal W. of Lockport is through this strata, and the perpendicular ledges of rock in each side present the most favorable location in the co. for quarrying.

30 mi., the river descends 334 feet, the difference of level between the two lakes. Above Schlosser and below Lewiston the current of the river is not very rapid, and the descent is trifling, so that nearly the whole fall is condensed into a space of about 8 mi. The plateau in which the basin of Lake Erie is situated extends to the mountain ridge at Lewiston, the summit of the ridge being 34 feet higher than Lake Erie. The river originally must have flowed over the face of this precipice, at which time Niagara Falls were 7 mi. below their present position. By the wearing away of the rocks the falls have gradually receded, becoming lower at each period of their progress, and leaving a deep, rocky channel, with ragged and precipitous banks 200 feet high, to mark their course and attest their power.[1] At the present time the falls are at the abrupt angle where the river changes from a W. to a N. course, and the water is precipitated in part over the front or extremity of the chasm and in part over the side, the two parts of the fall being at nearly right angles to each other. Goat Island, having an area of about 70 acres, lies between the two falls, its W. edge being a continuation of the precipice over which the water flows.[2] The principal fall at the head of the chasm on the W. side is known as the Canadian or Horse Shoe Fall,[3] and the fall E. of Goat Island as the American Fall. The Canadian Fall is 2000 feet wide and 154 feet high, and the American Fall 900 feet wide and 163 feet high: and it is estimated that 100 million tons of water flow over the two falls every hour. A mi. above the edge of the falls a series of rapids commences, the water descending 60 feet before taking the final plunge.[4] From the foot of the cataract the river flows about 2 mi. in a comparatively still current, but from that point to Lewiston it is compressed within narrow banks, and flows through the tortuous, rocky channel in a perfectly tumultuous and resistless torrent. The immense body of water in Niagara gives to the falls, and to the rapids both above and below, a grandeur scarcely equaled by any other of nature's works. Here one of the largest rivers in the world, forming the outlet of the great internal fresh water seas of North America, plunges down the shelving rapids and leaps into the profound chasm below, and then whirls and struggles with an apparently almost irresistible force in its rocky channel for 7 mi., and at last emerges from its mountain barrier and spreads out into the calm and peaceful waters of Ontario. Scenes of surpassing sublimity and grandeur open upon the view at every point, and pilgrims from every part of the world flock hither to offer their devotions at one of the great shrines of universal nature.

Tonawanda Creek forms the greater part of the S. boundary of the co. Along its course are a series of extensive marshes known as the Tonawanda Swamp.[5] The other principal streams are

---

[1] The precipice over which the water flows is composed of solid, compact limestone, with shale above and below. The wearing away of the shale above has formed the rapids, and the disintegration of that below has left the limestone in overhanging masses until they break off with their own weight. The dip of the rock is toward the S.; and as the falls recede the surface of the limestone will come nearer and nearer the present bottom of the fall, until, at a distance of 4 mi. further back, it will entirely disappear, and, the soft shales wearing away irregularly, the river will at some distant period of the future fall in a series of rapids.

[2] Luna Island lies upon the precipice N. of Goat Island, and is separated from it by [illegible] feet wide, which forms a distinct fall. Beneath the shelving rock over which this small cataract flows is a recess of 100 feet, known as the Cave of the Winds. Three small islands lying near the head of Goat Island are called the Three Sisters. Bath Island lies between Goat Island and the American shore, about 50 rods above the falls. A bridge extends from the American shore to Bath Island, and another thence to Goat Island. The first bridge was built in 1817, but the next spring it was swept away by the ice. The one built in 1818, and rebuilt in 1829, was replaced by the present new bridge in 1856. The cribs were sunk in the rapids from the end of a long platform projecting from the shore and heavily loaded with stone to keep it firm. As one crib was sunk and filled with stone, the platform was pushed forward and another sunk at its extremity, and so on to the island. Before the bridge was built, access to the island was attended with great peril, and very few persons had attempted it. It was done by stretching a rope in boats from above, a strong rope being fastened to the shore, by which the boat in returning was swung back. It is related that the first white person who visited the island was Israel Putnam, in 1755, while on a campaign against Fort Niagara (*Douglas's Journal*, II. 88). The Indians appear to have crossed occasionally, and traces of their graves are still seen. On the 25th of Feb. 1811, Augustus Porter applied for the purchase of the island upon which to keep sheep, and alleged in his petition that the wolves that infested the settlement rendered this business next to impossible without some asylum like this for their preservation. It was afterward bought by the Porters.

[3] This name was given from the semicircular shape of the edge of the fall over which the water flowed. The shape now is nearly that of a right angle.

[4] Numerous improvements have been made to afford facilities to visitors. A stairway constructed at the N. extremity of the American Fall, some years since, was burnt and rebuilt in 1858; another, upon Goat Island, was built in 1829 and called the Biddle Staircase, and another near Table Rock, upon the Canada shore, by which visitors can descend to the foot of the precipice. A new boat ferry crosses the river from the foot of the American Staircase, and a carriage road extends up the bank on the Canadian side. A little W. of Goat Island, in the midst of the rapids near the edge of the precipice, a stone tower 45 ft. high was constructed, in 1833, to afford a more extensive view of the falls. The "*Maid of the Mist*," a small steamer, makes trips upon the river from her dock, a little above Suspension Bridge, into the foam and mist just below the Canadian Fall. The awful majesty of this cataract is seen to great advantage in the winter season, when the spray settling upon all objects in the vicinity covers them with a glittering crust of ice. The rocks below become loaded with immense masses; and in extremely cold winters the river below gets blocked in so as to form a natural bridge, over which people venture from the Canada shore and even up to the island. In the winter of 1841-42 the river was passable for several months, and a small house was built near the center for the sale of refreshments. The ice was estimated to be 100 ft. thick. A year seldom passes without several fatal accidents happening at these falls, and an enumeration of those who have been drawn into the rapids, or who have slipped from the precipice and been dashed upon the rocks below, would form a long and mournful catalogue. In 1827 the Michigan, a condemned schooner, was sent over the falls, with several animals on board, in the presence of 10,000 spectators. She [illegible] weight to press in the [illegible]. In 1829 the schooner Superior, and in 1841 the ship Detroit, were towed into the rapids, but the former had several masts, and the latter was permanently grounded upon the rocks in the rapids.

[5] This swamp could be drained if the State dam at the mouth of Tonawanda Creek was removed; and this only is needed to convert the tract into the most productive region in the [illegible]. As the land is cleared, it becomes sufficiently dry for agricultural purposes. The muck and marl which abound in the swamp, and the limestone and gypsum which underlie it, are all sources of great agricultural wealth.

Four Mile, Six Mile, Twelve Mile, and Eighteen Mile Creeks,—named from their respective distances from the mouth of Niagara River,—Fish and Golden Hill Creeks, all emptying into Lake Ontario; Mud Creek and East Branch, tributaries of Tonawanda Creek, and Cayuga and Gill Creeks, tributaries of Niagara River. The streams that flow N. have all worn deep ravines in the drift deposits; and they are frequently interrupted by falls, furnishing abundance of water power.

A strip of land extending from the summit of the mountain ridge about 2 mi. S. is covered with a sandy loam, and the remainder of the upper terrace is clayey, largely intermixed with muck along the S. border. The soil between the mountain and lake ridges is a clayey loam, and along the lake ridge and N. of it it is a sandy and gravelly loam. The people are principally engaged in grain raising, for which the co. is most admirably adapted; barley, oats, corn, and potatoes are the staple agricultural products.[1] The manufacture of flour and other articles is largely carried on at Lockport, and the manufacturing interests at Niagara Falls are on the increase. The vast water power that can be made available at the falls will continually attract the attention of practical men, until eventually an immense manufacturing interest will be built up.

The co. seat is located at the village of Lockport.[2] The courthouse is a stone building erected upon a fine lot in the W. part of the village.[3] The jail, situated upon the same lot, is a well constructed stone building, but destitute of means of ventilation. The average number of inmates is 27. The co. clerk's office is a stone fireproof building contiguous to the courthouse.[4] The poorhouse is located upon a farm of 130 acres 3 mi. N. W. of the courthouse. The average number of inmates is 95, supported at a weekly cost of 50 cts. each. The farm yields a revenue of $1000. A teacher is constantly employed to teach the children and to exercise a constant supervision over them. The insane are properly provided for, and are uniformly treated kindly.[5]

The Erie Canal enters the co. near the N. line of Royalton, and extends S. W. to Lockport, thence nearly due S. to Tonawanda Creek, and thence along that creek to its mouth. The heaviest and most extensive work upon the canal is at Lockport, where the passage of the mountain ridge is effected. A series of combined double locks, 5 in number, overcomes an elevation of 56 ft., and from the summit a deep cut through the solid limestone extends several miles westward.[6] The Rochester, Lockport, & Niagara Falls Division of the N. Y. Central R. R. extends through Royalton, Lockport, Cambria, and Niagara, and a corner of Lewiston and Wheatfield, terminating at Suspension Bridge upon Niagara River. The Buffalo & Lockport Branch R. R. extends S. W. from Lockport through Cambria, Pendleton, and Wheatfield. The Buffalo & Niagara Falls R. R. extends along Niagara River through Niagara and Wheatfield, and a N. branch is extended to Lewiston. The Canandaigua & Niagara Falls Branch R. R. unites with the B. & N. F. R. R. at Tonawanda.[7]

Three daily and five weekly newspapers are published in the co.[8]

[1] Wheat formed the great staple of the co. until about 1840, when the midge commenced its ravages.

[2] When the co. was first erected, the co. seat was fixed at Buffalo. The buildings were given up to Erie co. upon the erection of the latter county.

[3] This building was erected in 1824. The first co. officers were, Augustus Porter, *Judge*; Louis S. Le Couteulx, *Co. Clerk*; Asa Ransom, *Sheriff*; and Archibald S. Clarke, *Surrogate*.

[4] Built in 1854, at a cost of $14,000.

[5] "A Senate Committee in 1856 concluded the report upon that institution as follows:—'It is well kept, and by its economical management it is proved that as a question of economy merely, it is less expensive to maintain a good poorhouse than it is a poor one.'"

[6] The project of building a ship canal around Niagara Falls has from time to time excited much attention, and several surveys have been made, but thus far without result. The earliest incorporation for this object was in 1798.

[7] In 1858 a railroad was built from Lewiston, 3 mi., to connect with the Lockport & Niagara Falls R. R.; but the track has been taken up by the Central R. R. Co. The Niagara & Lewiston R. R., extending from Niagara Falls to Youngstown, has been built, but it is not yet in operation.

[8] *The Niagara Democrat*, the first paper published in the co., was started at Lewiston in 1824 by Benjamin Ferguson. In the following year it was removed to Lockport, and soon after changed to

The Lockport Observatory. In Aug. 1822, it passed into the hands of Orsamus Turner, and in 1828 it was united with the Niagara Sentinel and issued as

The Sentinel and Observatory. In 1828 Peter Besançon, jr., became the proprietor, and changed it to

The Lockport Journal. In 1829 it was purchased by Asa Story and changed to

The Lockport Balance. In 1834 it was united with The Gazette, under the name of

The Balance and Gazette. It was soon afterward changed again to *The Lockport Balance*. It was successively published by Isaac C. Colton and T. H. Hyatt until 1837, when it was sold to Turner & Lyon and merged in the Niagara Democrat.

The Lockport Sentinel was started at Lewiston in 1824 by James O. Daily. It soon after passed into the hands of Orsamus Turner, who removed it to Lockport and issued it as

The Niagara Sentinel. In 1828 it was united with The Lockport Observatory.

The Gazette was started at Lockport in 1829 by P. Baker. In 1834 it was united with The Balance.

The Niagara Democrat was started at Lockport in 1831 by Turner & Lyon. In 1837 it was united with The Balance and issued as

The Niagara Democrat and Lockport Balance. The latter part of the title was soon dropped. In 1839 it passed into the hands of T. P. Scott, and in 1840 of Turner & McCarthy. It was published by the latter publishers until 1845, when it was sold to The Lockport Advertiser. The whole was united and issued as

The Niagara Democrat, by John Campbell.

The Lockport Daily Democrat was started in Feb. 1844 by A. S. Prentice. June 1, 1845, it was united with The Democrat as

The Lockport Daily Advertiser and Democrat, under which title it still exists.

The Niagara Courier was started at Lockport March 1, 1827, by M. Crawford. It was successively conducted by Geo. Reese, T. C. Flagler, Crandall & Bingham, C. L. Skeels, and S. S. Perrin.

The Lockport Daily Courier was commenced by Perrin & Lee in 1847, and continued until 1850, when both the daily and weekly were united with The Journal, the daily as

The Journal and Courier, and the weekly by the name of

This co. was a portion of the domain of the Seneca Nation, though none of its principal villages were located within its limits. The first European visitant of whom there is any record was La Salle, a French adventurer, who, accompanied by Tonti and Father Hennepin, conducted an expedition up the lakes for the double purpose of traffic with the Indians and of extending the French influence among the native tribes. In the fall of 1678 he established a trading post on the present site of Fort Niagara, at the mouth of Niagara River, and soon after laid the keel of a small vessel of 60 tons, at the mouth of Cayuga Creek, above the falls. This vessel was launched in the commencement of the following summer, and christened the Griffin; and on the 7th of Aug. the party set sail upon Lake Erie.[1] The first work at Fort Niagara was a simple palisade; but in 1687 De Nonville, the French commander, constructed there a fort with four bastions. This was soon after besieged by the Senecas; and, a fatal sickness having destroyed most of the garrison, it was soon after abandoned. Joncaire, another French adventurer, built a house on the present site of Lewiston in 1721; and about 4 years after another defensive work was erected on the old site of the palisade of La Salle. This fortress was afterward enlarged, and became one of the most important French posts w. of Montreal. In the summer of 1759, Gen. Prideaux, at the head of a large force of regulars and provincial troops, was sent to reduce the place. The fort was besieged about the 1st of July; and on the 25th it was surrendered to Sir Wm. Johnson, upon whom the command of the expedition had devolved upon the death of Gen. Prideaux.[2]

The fortress was repaired and garrisoned by the English; and during the Revolution it became the headquarters of the marauding parties of tories and Indians that desolated the frontier settlements along the Mohawk, Susquehanna, and Delaware.[3] Fort Niagara continued in possession of the British until 1796.[4] The portion of the Tuscarora Indians who were allies of the English during the Revolution removed to the neighborhood of Fort Niagara after the destructive campaign of Sullivan, in 1779, to obtain means of preventing absolute starvation. The Senecas donated them a square mi. of land, and subsequently the Holland Land Co. 2 sq. mi. In 1804 they purchased an additional tract of 4329 acres, for $13,722. On the 19th of Dec. 1813, Fort Niagara, then in possession of an American garrison, was surprised and taken by the British; and it continued in their possession until the close of the war. The villages at Lewiston and Niagara Falls were burnt about the same time. In 1826, Fort Niagara was the scene of Morgan's imprisonment previous to his final disappearance.[5] The land in this co. was all included in the Holland Purchase, except the small reservations of the Tonawanda and Tuscarora Indians, and a strip of a mile in width along Niagara River, reserved by the State for the purposes of a portage road around Niagara Falls. The first settlements were commenced about the beginning of the present century, and the growth of the co., in common with the whole territory of the Holland Purchase, was rapid. The great impetus to growth, however, was given by the completion of the Erie Canal in 1825 and the subsequent construction of railroads. In 1837 the co. became the seat of great excitement connected with the so-called Patriot War. Most of the Patriot forces that rendezvoused upon Navy Island—within British territory, and just above the rapids of the falls—were transported from Schlosser, upon the

The Intelligencer, both of which are now issued by Richardson & Freeman.

Priestcraft Exposed was published from 1828 to 1830 at Lockport by L. A. Spaulding.

The Lockport Journal was started in July, 1851, by M. C. Richardson; and in 1852

The Lockport Daily Journal was commenced, and both editions were continued until 1859, when they were united with the daily and weekly Courier, as already noticed.

The Frontier Sentinel was published at Lockport in 1847, during the "Patriot War" excitement, by T. P. Scoville.

The Lockport Chronicle was started at Lockport April 9, 1859, by S. S. Pomroy & Co.

The Lewiston Telegraph was started at Lewiston in 1836 by John A. Harrison & Co., and was continued about 3 years

The Niagara Falls Journal was published a short time in 1837 by Francis & Ward.

The Niagara Chronicle was published at Niagara Falls in 1858 by J. Simpson.

The Niagara Cataract was started in 1846 at Niagara Falls by Stephens & Humphreys, and continued a short time

The Iris was commenced at Niagara Falls in 1846 by George H. Hackstaff, and was continued until 1854

The Niagara Times was published at Niagara Falls from Oct. 1855 to Oct. 1857, by W. E. Tuttle

The Niagara Falls Gazette was started May 17, 1854, by Ford & Sleeper, by whom it is still issued

The Niagara City Herald was started at Suspension Bridge in Oct. 1856, by G. H. Hackstaff, and in the following year it passed into the hands of N. T. Hackstaff, by whom it is now published.

[1] The vessel sailed through Lakes Erie and Huron to Green Bay, where it cast anchor and remained some time. After being freighted with a rich cargo of furs, it started on its return voyage, but from that time no tidings ever came of the vessel or crew. La Salle and Father Hennepin left the vessel on its upward voyage at Detroit, and afterward penetrated the western wilderness to the Mississippi River.

[2] While Sir Wm. Johnson remained at this place he made a contract with Wm. Stedman to construct a road for a portage from Lewiston to Schlosser above the Falls. This road was finished in 1763; and on the 20th of June of that year the contractor started with 25 loaded wagons from Lewiston, under the convoy of 50 soldiers. As the party were passing a steep hill upon the very edge of the cliff known as the Devil's Hole, they were assailed by a large force of Senecas who were lying in wait for them, and the whole party except one were driven off the precipice, which here has a perpendicular height of 180 ft. Wm. Stedman escaped by having his horse through the midst of the Indians, and one soldier—a drummer—was saved by his belt catching in the top of a tree below and so breaking the force of his fall.

[3] The prisoners taken upon the war-paths were generally conducted to this place, where they were often obliged to submit to the terrible ordeal of the gauntlet. A premium was also here given for scalps, stimulating the Indians to murder. The tories who rendezvoused here were usually more inhuman than the Indians.

[4] Col. Smith, who commanded this post at the time of its surrender, was the commanding officer of the British at the battle of Lexington. As Niagara was one of the very last posts surrendered, Col. Smith may with propriety be said to have participated in both the opening and closing acts of the American Revolution.

American shore; and great excitement prevailed in consequence. The steamer Caroline, engaged in furnishing re-inforcements and supplies to the insurgents, was cut from her moorings on the night of Dec. 29, by a British force, set on fire, and sent over the falls. This event was the occasion of a long diplomatic controversy between the Governments of the United States and Great Britain, and at one time war seemed almost inevitable. Since that time no event has occurred to disturb the peaceful progress of improvement.

CAMBRIA—was formed from "*Willink*," (now Aurora, Erie co.,) March 11, 1808. Hartland, Niagara, and Porter were taken off in 1812, Lewiston in 1818, and a part of Lockport in 1824. It is an interior town, W. of the center of the co. The mountain ridge[1] crosses through the center of the town and divides it into two nearly equal portions. In the N. and S. the surface is level or undulating. The lake ridge crosses the N. part of the town. The principal stream is Twelve Mile Creek. The soil consists of alternations of sandy and clayey loam. **Pekin** (p. v.) lies partly in Lewiston, but principally in this town. It contains 2 churches and about 60 dwellings. **North Ridge** and **Cambria,** in the N. part of the town, are p. offices. The first settlement was made in 1800, by Philip Beach, from Le Roy.[2] There are 2 churches in town, Cong. and M. E.

HARTLAND[3]—was formed from Cambria, June 1, 1812. Royalton was taken off in 1817, Somerset in 1823, and a part of Newfane in 1824. It is the central town upon the E. border of the co. The surface is level or gently undulating, the greatest inequality being along the lake ridge, which crosses the S. part of the town. The principal streams are Eighteen Mile and Johnsons Creeks. The soil S. of the ridge is a clayey loam, and N. it is a sandy and gravelly loam. **Johnsons Creek,** (p. v.,) located on the creek of the same name where it crosses the lake ridge, contains 1 church and has a population of 114. **Hartland Corners,** (Hartland p. o.,) on the ridge in the W. part of the town, contains about 18 dwellings. **Middleport**[4] is partly in this town. The first settlement was made in 1803, by John and David Morrison.[5] The first church (Bap.) was organized at Johnsons Creek in 1817. There are 5 churches in town.[6]

LEWISTON[7]—was formed from Cambria, Feb. 27, 1818. It is the central town upon the W. border of the co. The mountain ridge extends through the town, dividing it into two nearly equal portions. Along the base of this ridge the surface is broken or rolling, but elsewhere it is level. Gill and Six Mile Creeks, and several smaller streams, take their rise in this town, and Niagara River forms its W. boundary. The soil is a sandy loam. The Devil's Hole—a dark chasm, 150 ft. deep, upon the high bank of the Niagara, in the extreme S. part of the town—was the scene of a sanguinary battle during the Old French War.[8] Five mi. above Ft. Niagara, bordering upon the river, is a flat of several acres, about 65 ft. lower than the surrounding country. It is called Five Mile Meadow; it was here that the British forces landed the night before the capture of Fort Niagara, in Dec. 1814.[9] **Lewiston,**[10] (p. v.,) incorp. April 17, 1822, was reserved by the State and patented by single lots. It is situated on Niagara River, at the base of the mountain ridge. It is the terminus of the Lewiston & N. F. R. R., and the head of navigation from Lake Ontario. It contains 4 churches, and has a pop. of 1,014. The Lewistown Suspension Bridge across the Niagara River was erected in 1850 and '51.[11] **Dickersonville** (p. o.) is a hamlet. **South Pekin** is a p. o. in the S. E. part. **Pekin** lies partly in this town. Fort Gray, a temporary fortification erected during the War of 1812, occupied the verge of the mountain ridge just above the village of Lewiston. The Seminary of our Lady of Angels, a Catholic institution, is situated on

2 John Forsyth and Walter Neal settled in the town in 1804, and Chapman Hawley, Daniel Howell, Joseph Hewett, James Prentice, and Amariah Stoughton soon afterward. The first birth was that of Philip Beach, Jr., and the first death that of Nancy Neal, who was murdered in 1799. Philip Beach opened the first inn, in 1800, and Joshua Shepperd the first store, in 1810. Joseph Howell built the first sawmill, in 1809, and Christian Howder the first gristmill, in 1815. The first school was taught by Mrs. Neal, in 1808.

the river bank in the s. w. part of the town.[1] The site of the village of Lewiston was occupied by the French at different times previous to and during the Old French War; but the first permanent settlements were made about the year 1800.[2] The first church is said to have been founded by Brant, at the Mohawk settlement, a little E. of Lewiston.[3] There are now 8 churches in town.[4]

LOCKPORT—was taken from Cambria and Royalton, Feb. 2, 1824. It extends from the central part to the southern bounds of the co. The surface in the northern part of the town, through which the mountain ridge extends, is broken and hilly; in the central and southern parts it is level. Eighteen Mile and Mud Creeks are the principal streams. The soil is a clayey loam intermixed with marl, and in the N. it is stony. The Niagara limestone crops out along the mountain ridge, and extensive quarries have been opened in and near the village of Lockport.[5] Underlying this is a stratum of hydraulic limestone, from which waterlime is made; and sandstone belonging to the Medina formation is also quarried N. of the ridge.[6] The manufactures of the town are extensive, and consist principally of flour, lumber, leather, and machinery. **Lockport,**[7] (p. v.,) the co. seat, was incorp. March 26, 1829. It is situated on the Erie Canal and the declivities of the mountain ridge. It is an important station on the Niagara Falls R. R., and is the terminus of the branch road to Buffalo. The water-power created by the canal locks at this place has given rise to numerous and extensive manufacturing establishments.[8] The village contains 15 churches, a high school,[9] 3 newspaper offices, 3 banks of issue, and 1 savings' bank. Pop. 8,939. **Wrights Corners,** (p. o.,) in the N. part of the town, and **Rapids,** (p. o.,) in the S. part, are hamlets. **Hickory Corners,** in the W., is a p. o. The first settlement was made at Cold Spring, about 1 mi. E. of Lockport Village, by Charles Wilbur, in 1805.[10] There are 21 churches in town.[11] Ex-Gov. Washington Hunt is a resident of this town.

NEWFANE—was formed from Hartland, Somerset, and Wilson, March 20, 1824. It extends from near the center of the co. to the lake shore. The surface is level. Eighteen Mile Creek crosses the town, dividing it into two unequal portions. The soil is generally a sandy loam; but in some parts it is clayey. **Olcott,** (p. v.,) on the lake shore, at the mouth of Eighteen Mile Creek, contains 3 churches and about 30 dwellings. **Charlotte,** (Newfane p. o.,) on Eighteen Mile Creek, near the center of the town, contains 2 churches and about 25 dwellings. **Hess Road,** in the E., and **Coomer,** in the W. part, are p. offices. The first settlement was made in 1807, by Wm. Chambers[12] and John Brewer, from Canada.[13] The first religious services were conducted in 1811, by a colored Methodist minister from Canada. There are 5 churches in town.[14]

NIAGARA—was formed from Cambria, June 1, 1812, as "*Schlosser;*" its name was changed Feb. 14, 1816. Pendleton was taken off in 1827, and Wheatfield in 1836. It is the S. W. corner town of the co., occupying the angle made by the abrupt northerly bend of Niagara River. Its

[2] Among the settlers who were in the town in 1800 were Jos. and John Howell, —— Middaugh, Henry Haugh, Henry Mills, —— McBride, Thos. Hustler, Wm. Gambol, and Fred'k Woodman. Geo. Howell was the first child born in the town and in the co., in 1799. Middaugh kept tavern in 1788, and McBride built a tannery about 1799. The first sawmill was built by Jos. Howell, in 1808, and the first gristmill by John Gray, in 1815. The Tuscarora Reservation is in this town.

[3] This was probably some time during the Revolutionary War. Brant was an Episcopalian; and the services were usually conducted by some one attached to the British garrison at Ft. Niagara. The church was built of logs and had no belfry. The bell was hung upon a crossbar resting in the crotch of a tree near by.

[5] The principal of these quarries are along the canal, in the S. part of Lockport Village. There are also quarries about a mile E. of the village, and others a little further W. This limestone is a very excellent building material, and large quantities are shipped to distant places. The locks at this place, and numerous culverts on the canal are built of it. A cave of small extent exists under the village of Lockport.

[6] The principal quarries from which sandstone is obtained are at Rattlesnake Hill, S. W. of the village. This stone is used principally for flagging and paving.

[7] So named from there being a greater number of locks here than at any other place on the canal; and to these the village owes its origin.

[8] Five flouring mills, with an aggregate of 30 run of stone, 7 sawmills, 6 stave and shingle factories, 1 sash, door, and blind factory, 1 planing mill, 2 tanneries, a woolen factory, 2 machine shops and foundries, a plow factory, a distillery, and a plaster-mill. A hydraulic canal three-fourths of a mile long has been constructed upon the declivity of the ridge, from which the water is distributed to various manufactories. The water is taken from the upper level of the canal and returned to the lower. A considerable proportion of the water-power is obtained from the water taken from the lower level.

[9] The "*Lockport Union School*" was incorp. March 31, 1847. Connected with it is an academic department, under the supervision of the regents. The number of pupils in attendance in 1856 was 742.

[10] Jedediah Darling settled in the town in 1808. —— Gregory in 1809, Thomas Miles, Silliman Wakeman, David Curtis, and Geo. Miller in 1810, and Alex. Freeman and John Dye in 1811. The first inn was opened by Chas. William in 1810. The first sawmill was built by Alex. Freeman in 1811, and the first gristmill by Otis Hathaway, on Eighteen Mile Creek. This was a small mill, which was built in 20 days. L. A. Spaulding was then building and soon after finished a stone mill of 4 stories in height. Simeon Ford erected a wooden factory in 1825. The first school was taught by Orinda Morse, in the summer of 1816.

[13] —— Cotton settled in the town the same year. Barnabas Kemp, and Peter Hopkins in 1808, and Wm. and James Walker in 1810. Levi Ellis built the first saw and grist mills in 1811, for James Van Horn. Asa Douglas opened a store at Olcott, in 1812. The first school was taught by Bezaleel Smith, in 1815.

surface is level. Cayuga and Gill Creeks are the principal streams. The soil is a heavy clay. Goat Island and the American part of Niagara Falls belong to this town. At Suspension Bridge, on the river bank, is a sulphur spring, which has been fitted up for the accommodation of visitors. **Niagara Falls,** (p. v.,) incorp. July 7, 1848, is situated on Niagara River, at the cataract. It is the terminus of the Rochester & N. F. R. R., of the N. F. & Lewiston R. R., of the Buffalo & N. F. R. R., and of the Canandaigua & N. F. R. R. It contains 5 churches, 1 newspaper office, 11 hotels, and several manufacturing establishments.[1] Pop. 2,976. The village owes its existence to its proximity to the great cataract. Thousands of visitors, from every part of the U. S. and from almost every country in the world, annually visit this, one of nature's greatest wonders. Nearly all the business of the community is connected with this periodical visitation, and consists of hotel keeping, livery business, and matters of a kindred nature. A large and by no means unimportant business has grown out of the sale of spar ornaments and fancy articles made by the Indians. **Niagara City,** (*Suspension* Bridge p. o.,) incorp. June 8, 1854, is situated on Niagara River, 2 mi. below the falls. The Rochester & N. F. R. R. connects at this place with the Lewiston & N. F. R. R., and with the Great Western Railway across the Suspension Bridge.[2] The village contains 6 churches, a newspaper office, 15 hotels, and a charitable institution known as the De Veaux College for Destitute Orphans and Children.[3] Pop. 1,365. This place participates with Niagara Falls in the business made by the annual influx of visitors to the cataract. No place of equal size on the Continent has a greater amount of hotel accommodations than these. **La Salle** is a p. o. at the mouth of Cayuga Creek. In the fall of 1678 the French *voyageurs* La Salle, Tonti, and Father Hennepin, with their companions, established themselves at the mouth of Cayuga Creek and remained until the "*Griffin*" was launched the following season.[4] Other places along the river were temporarily occupied by the French at different times; but the first permanent settlement was made at Schlosser in 1759, by John Stedman, accompanied by his brothers Wm. and Philip.[5] The first religious services were conducted by Father Hennepin, at the time of the French sojourn at Cayuga Creek.[6] There are now 12 churches in town.[7]

PENDLETON[8]—was formed from Niagara, April 16, 1827. It is the central town on the s. border of the co. The surface is level or gently undulating. Tonawanda Creek forms the s. bounds of the town, and Sawyers Creek crosses the w. part. The soil is generally a clayey loam. **Pendleton,** (p. o.,) on Tonawanda Creek, contains 1 church and 16 dwellings. **Pendleton Center, Beach Ridge,** and **Mapleton** are p. offices. The first settlement was made in 1805, by Jacob Christman.[9] There are 5 churches in town.[10]

PORTER[11]—was formed from Cambria, June 1, 1812. Wilson was taken off in 1818. It is the most westerly town on the lake shore. Its surface is level. Four Mile and Six Mile Creeks, and the w. branch of Twelve Mile Creek, cross the town in a northerly direction, and Niagara River forms its w. boundary. The soil along the lake shore is composed principally of a marly clay; in the central and southern parts it is a sandy and gravelly loam. Besides the crops which

[1] A hydraulic canal has recently been constructed from a point on Niagara River about ¾ mi. above the rapids, over mills across the point of land upon which the village is situated to a point in the river bank ½ mi. below the falls. Along the bank is a long flume in which the canal terminates and from which the water is discharged through a great number of races into the river below. This canal is 4 feet and 7 in. wide, and 10 ft. deep, and will maintain a flowing stream equal in quantity to 24 cubic ft. per second. The company by whom the canal has been built was organized March 22, 1853, with a capital of $500,000. One of the largest paper mills in the U. S. on Bath Island was burned during the past year, (1858.)

[2] The Niagara Suspension Bridge, which crosses the river at this place was commenced in 1852 and finished in 1855. It is 821 ft. in length from center to center of the towers, and 247 ft. above the water. It has 2 floors, the lower for a carriage way, and the upper for a rail way, upon which 4 rails are so laid as to make tracks of 3 different gauges. The cost of the structure was about $400,000, and the stock of the company $500,000. The first line was got across the river at this place by the aid of a kite. With this a larger cord was drawn over; and finally a rope, upon which pulleys could be run, bearing the wires of which the bridge is composed. The chief engineer was John A. Roebling.

De Veaux College was established according to the provisions of the will of Samuel De Veaux, who bequeathed for that purpose personal property to the amount of $154,472 and real estate valued at $36,213, besides 330 acres of inalienable land. The building was erected in 1855–56. It is built of stone, has 2 stories and an attic above the ground story, and a front of 100 ft., with a depth of 50 ft. The inmates of the school are supported by the institution with food, clothing, and books. By the provisions of the will of Mr. De Veaux, the president of the college must always be a clergyman of the Protestant Episcopal church, and must reside within the [illegible] of Western New York. Aug. 22, 1854, is situated on Niagara River, about one mi. from its mouth. It contains 3 churches and has a pop. of 768. **Ransomville,**[2] (p. v.,) in the s. E. part of the town, contains 2 churches. Pop. 195. **East Porter** is a p. o. **Fort Niagara**[3] is situated on the lake shore, at the mouth of Niagara River. Transient settlements were made at very early periods by the French at Ft. Niagara: but no permanent settlement was made until the early part of the present century.[4] There are 7 churches in town.[5]

ROYALTON[6]—was formed from Hartland, April 5, 1817, and a part of Lockport was taken off in 1824. It is the s. E. corner town of the co. The surface is generally level or undulating, except in the N. part, where the mountain ridge crosses the town. Johnsons, Eighteen Mile, and Mud Creeks take their rise in this town, and the Tonawanda forms its S. boundary. The soil is a clayey loam. **Middleport**[7] (p. v.) incorporated in 1858, lies partly in Hartland, but principally in the N. E. part of this town. It is situated upon the Erie Canal, and is a station on the R. & N. F. R. R. It contains 5 churches and has a pop. of 689. (586 in Royalton, 103 in Hartland.) **Gasport,**[8] (p. v.,) situated on the canal near Eighteen Mile Creek, is a station on the R. & N. F. R. R. It contains 1 church and an academy.[9] Pop. 273. **Orangeport,** (p. v.,) on the canal, in the N. W. part of the town, has a pop. of 224; **Royalton,** (p. v.,) in the central part, of 168; and **Reynales Basin,** (p. v.,) on the canal, of 132. **Locust Tree** and **South Royalton** are p. offices. **McNalls Corners** is a hamlet in the W. part. The first settlement was made in 1803, by Thos. Slayton and Gad Warner.[10] The first religious services were held in 1806; the first religious society (Christian) was organized in 1817, and the first church edifice was built the same year.[11] There are 12 churches in town.[12]

SOMERSET—was formed from Hartland, Feb. 8, 1823, and a part of Newfane was taken off in 1824. It is the most eastern town upon the lake shore. The surface is level. Golden Hill and Fish Creeks cross the town in a N. E. direction. The soil is generally a sandy loam; but in some places it is clayey. Near the mouth of Fish Creek is a small salt spring, from which salt was formerly made. **Somerset,** (p. v.,) N. of the center of the town, contains 3 churches and about 30 dwellings. **County Line,** on the line of Orleans co., and **Lake Road** and **West Somerset,** are p. offices. The first settlement was made in 1810, by Jacob Fitts and Zacharias Patterson.[13] The first religious services were conducted by Daniel Shepardson, in 1816, and the first church (Bap.) was organized in 1820. There are 5 churches in town.[14]

WHEATFIELD—was formed from Niagara, May 12, 1836. It is the most southerly town in the co., and lies partly on Niagara River and partly on Tonawanda Creek. The surface is level or gently undulating. Cayuga and Sawyers Creeks cross the town, the former in the western part and the latter in the eastern. The soil is generally a hard, clayey loam, difficult to cultivate. About a mi. E. of Tonawanda is a sour spring, and about 2 mi. N. a sulphur spring. A considerable part of the town is yet unimproved. The greater proportion of the population consists of immigrants from Prussia and other parts of Germany.[15] **Bergholtz,**[16] (p. v.,) near the center of the town, contains 1 church and about 80 houses: **Martinsville,** (p. v.,) in the S. E. part, 1 church

15 They nearly all cultivate the soil, but their farms are usually very small, consisting generally of not more than 5 to 10 acres. They retain in a great measure their own manners, customs, and nationality. They have their own churches and schools, their pastors and schoolmasters came from Germany with them, and German is the language of the pulpit and the schoolroom. Their houses are nearly all one story, rough framed buildings, unclapboarded, and filled in with unburned bricks. Several of them are built of hewn logs, the crevices filled with clay, and some are clapboarded on the gable ends down as far as the level of the eaves.

ONEIDA COUNTY.

THIS county was formed from Herkimer, March 15, 1798. Lewis and Jefferson were taken off in 1805, and a part of Oswego in 1816. Portions were annexed to Clinton in 1801 and to Madison in 1836. A portion of Chenango was annexed in 1804.[1] It lies near the center of the State, 100 mi. from Albany, and contains 1,215 sq. mi. A broad valley, nearly level, extends E. and W. through the center of the co., and from it, both N. and S., the surface rises into a broken and hilly region. The highlands which occupy the S. part are arranged in ridges extending N. and S., the highest summits, on the S. border, being 600 to 1,000 ft. above the valley of the Mohawk. North of the central valley the surface rises abruptly to a height of 800 to 1,200 ft., and spreads out into a nearly level plateau, broken by the ravines of the streams. The E. part of the central valley is drained by the Mohawk, flowing E., and the W. part by Wood Creek, flowing W. This valley affords a natural road from the Hudson to the great lakes, and is the lowest pass through the Appalachian Mt. system. The Mohawk rises upon the N. border of the co., and flows in a southerly direction to Rome, and thence S. E. to the E. border of the co. Its principal tributaries from the N. are Nine Mile Creek and Lansing Kil, and from the S. Sauquoit and Oriskany Creeks. Black River flows across the N. E. corner of the co. East Canada Creek forms a portion of the E. boundary; the head branches of the Unadilla and Chenango drain the S. border, and Oneida, Wood, and Fish Creeks drain the W. part. Oneida Lake, extending several mi. along the W. border, is the only large body of water in the co. In the extreme N. E. corner are several small lakes and ponds.

The rocks of this co. include nearly the whole series lying between the gneiss, which covers the N. E. part, and the Hamilton group, which outcrops on the S. hills. The Trenton limestone, Utica slate, Oneida conglomerate, and Clinton group have received their names from being so distinctly developed in this co. Of useful minerals the co. has the lenticular clay iron ore of the Clinton group, bog ore in the swamps near Oneida Lake, and, probably, magnetic ore in the N. E. part. Marl and peat have been found in some places. Waterlime and gypsum quarries have been wrought to some extent. Building stone in great variety and of superior quality has been extensively quarried. Mineral springs are found in several places. The soil in the N. E., derived from the disintegration of the primitive rocks, is light and sandy, and is capable of producing only a scanty vegetation. This region is sparsely settled, and is not capable of supporting many inhabitants. The central valley is one of the most fertile portions of the State. The soil is a fine quality of sandy and gravelly loam and alluvium, finely tempered with lime and gypsum. The highland region S. of the river has a soil composed of clay and sandy and gravelly loam, and is best adapted to pasturage. The richness and diversity of the soil make this co. one of the best agricultural regions of the State. The people are chiefly engaged in agriculture, the principal branches of which are grain raising in the valleys and dairying and stock raising upon the hills. Hops are largely cultivated in the S. towns. The manufactures of the co. are extensive, though principally confined to Utica and the villages along Oriskany and Sauquoit Creeks.

The county is a half-shire, the co. buildings being respectively located at Utica and Rome.[2] The courthouses and jails at both places are well built and conveniently arranged. The clerk's

1 Madison, Herkimer, and Oneida counties originally extended N. from the Mohawk to the St. Lawrence. In 1801, Lisbon, Hopkinton, and Canton, then town upon the N. border, was annexed to Oneida co. It is not certain whether Lots No. 1, 2, and 3 of Macomb's Purchase were intended by this arrangement to belong to Oneida co. In 1805 they were annexed to St. Lawrence co., and were named from the Oneida Indians, who inhabited that and some adjoining counties. The word Oneida signifies "the people of the stone." The Indians had a tradition handed down concerning a certain stone, which followed their tribe in their wanderings and finally rested on the summit of one of the highest hills in the co., from which their head chief was to receive a great distance, and sign which they were to prepare for war. A bunch of grass was identified as this pellitory of the Oneidas. A few years since was taken from the farm of James H. Greene, in the town of Stockbridge, and placed in a prominent position near the entrance of the Utica Cemetery, on the Brig water Plank Road, about a mi. S. of Utica.—*Jones's Oneida*, p. 586. *Rules and Regulations of the Utica Cemetery*, Utica, 1849, p. 23. *Senate Doc.*, 1846, No. 24, p. 46; *School rafts Hist. Condition and Prospects of Indian Tribes*, I, p. 150.

2 The co. seat of Herkimer co. was originally located at Whitestown; and upon the division of the co. the records were retained by Oneida. The act erecting Oneida co. directed the first courts to be held at the schoolhouse near Fort Schuyler, and required the courthouse to be built within 1 mi. of the fort. By an act of April 6, 1801, Thomas Jenkins and Hez L. Hosmer of Rutland, John Thompson of Stillwater, and Dirck Lane, of Troy, were appointed to locate the courthouse and jail of Oneida co. These buildings were completed several years afterward, and the courts were held here and at Whitesboro' during many years. The courthouse and jail at Rome were burned about 1848, and rebuilt within 3 years after. The clerk's office was removed to Utica in 1810, and the academy at

office is a fireproof building, located at Utica. The poorhouse is situated upon a farm of [illegible] acres about 2 mi. s. w. of Rome. It has an average of 222 inmates, supported at a cost of $1 per week each. Separate buildings have been provided for lunatics and for a poorhouse.[1]

The Erie Canal extends through Utica, Whitestown, Rome, and Vernon. The Chenango Canal extends s. from Utica, up the valley of Oriskany Creek, through New Hartford, Kirkland, Marshall, and a corner of Augusta, connecting with the Susquehanna River at Binghamton. The Black River Canal extends N. from Rome along the valleys of the Mohawk and [illegible] Rivers through Western and Boonville, connecting with Black River above Lyons, in Lewis co. The Oneida Lake Canal extends W. from Rome to Wood Creek and along that stream to Oneida Lake. The N. Y. Central R. R. extends through Utica, Whitestown, Rome, and Vernon. The Black River & Utica R. R. extends from Utica N. through Marcy, Trenton, Remsen, and Steuben to Boonville.[2] The Watertown & Rome R. R. extends from Rome N. W. through Annsville and Camden. A large number of plank roads have been built in the co.; but they are mostly abandoned.

Four daily, 9 weekly, 1 semi-monthly, 1 quarterly, and 4 monthly newspapers are now published in the co.[3]

the wonderful natural channel of navigation that extended through this co., and which, with a short and easy portage, connected the Mohawk with the great lakes and the fertile regions of the West. About the commencement of the last century, plans were proposed for improving this route and for fortifying the most important points upon it. The portage at Rome, from the Mohawk to Wood Creek, became a point of the first importance, and it was occupied as early as 1725; and a fortification known as Fort Bull was built upon Wood Creek soon after. On the 27th of March, 1756, this fort was surprised by a party of French and Indians, under M. De Lery, who had penetrated through an interior route from La Presentation, on the St. Lawrence, by an exhausting march of 15 days. The garrison were unprepared; yet they made a spirited but ineffectual, resistance, and nearly every person perished. Alarm was carried to Fort Williams, on the Mohawk, 4 mi. distant, and a force was hastily sent to relieve Fort Bull, but arrived to late too render assistance. The enemy, after wasting the stores and provisions, retired with their prisoners and plunder

toward Black River. Oswego was besieged by the French during the summer, and was surrendered on the 14th of Aug. Alarmed at the success of the French, and greatly in fear for his personal safety, Col. Webb, then commanding on the Mohawk, destroyed Forts Williams and Craven, and hastily retreated down the valley to Albany, leaving the frontiers to the mercy of the savages; and the sequel is written in blood in the annals of the Upper Mohawk Valley.

Fort Stanwix was erected in the summer of 1758, on the site of the present village of Rome. It was heavily armed; but the war ended without furnishing occasion for its use, and upon the peace it was allowed to fall into ruin. In June, 1776, Col. Dayton was sent by the Continental authorities to rebuild this fort, which was from this time named Fort Schuyler. Col. Peter Gansevoort was ordered hither in April, 1777, with the 3d Regiment, and while still unfinished the fort was besieged by the tories and Indians under St. Leger. This movement formed part of a plan of operations against the colonies which contemplated the reduction of this fort and the ultimate meeting at Albany of the three British armies from Lake Champlain, the Mohawk, and New York. To relieve this post, Gen. Herkimer was sent with a detachment of troops chiefly raised in "*Tryon*" co. This army fell into an ambuscade at Oriskany, where the memorable battle, elsewhere noticed, was fought on the 5th of Aug. 1777. While most of the savages were absent from their camp, a well conducted sortie from Fort Schuyler, by a party under Colonel Willett, attacked the camp of the enemy and took a large quantity of baggage and stores, 5 British standards, and the papers of most of the officers. The discontent which this incident occasioned among the Indians was increased to insubordination by the mysterious reports brought in by the emissaries of the Americans; and on the 22d of Aug. the siege was raised, and the enemy retreated by the way of Oswego to Montreal. Portions of these troops subsequently joined Gen. Burgoyne and shared the fortunes of that officer. The fort was destroyed by fire and flood in May, 1781. Through the influence of Rev. S. Kirkland and others, the Oneidas were induced to remain neutral or join the American cause, and were rewarded by liberal concessions at subsequent treaties.[1]

Settlement had extended into the borders of the co. before the Revolution; but every vestige of improvement was swept away during the war. Civilization re-appeared with peace; and before the beginning of the present century the hardy pioneers of New England had pressed into nearly every town. The completion of the Western Inland Navigation Co.'s improvement in 1796, and of the Seneca turnpike and other early thoroughfares for emigration, and the construction of the Erie Canal and the 3 lateral canals which here join it, and of the railroads which cross it, have formed marked eras in the improvement and prosperity of the co. In wealth, population, and enterprise it now ranks among the first cos. in the State.

ANNSVILLE[2]—was formed from Lee, Florence, Camden, and Vienna, April 12, 1823. It lies on the N. border of the co., W. of the center. Its surface is broken with ridges or swells, running E. and W., gradually increasing in height toward the N. There appear to have been at some period three small lakes in the town, two of which have broken through their barriers and left fine, fertile valleys. The E. branch of Fish Creek[3] forms a part of the E. boundary, and flows through the S. E. part; and the W. branch of the same stream forms a part of the S. boundary. Several small streams are tributaries of the E. branch, the principal of which are Furnace and Fall Creeks. On the latter, near its mouth, are three falls, of 14, 20, and 60 ft. respectively. The soil is clayey in the S., and sandy, gravelly, and stony in the other parts. **Glenmore,** (p. v.,) near the center, contains 2 sawmills, 1 gristmill, and 15 houses. **Taberg,**[4] (p. v.,) in the S. part, contains 2 churches, 3

AUGUSTA[3]—was formed from Whitestown, March 15, 1798. A part of Vernon was taken off in 1802, and a part of Stockbridge (Madison co.) in 1836. It lies on the w. border of the co., s. of the center. Its surface is a rolling upland. Two ranges of hills extend N. and S. through the town on opposite sides of Skanandoa Creek, affording limestone of excellent quality for lime and building purposes. Oriskany Creek flows through the extreme S. E. corner, and Skanandoa Creek flows N. through near the center. The soil is a fertile, clayey and sandy loam. **Augusta,** (p. v.,) near the center, contains 2 churches and 100 inhabitants. **Knox Corners,** (p. v.,) N. W. of the center, contains a church and 200 inhabitants. **Oriskany Falls,** (p. v.,) in the S. E. corner, contains a church, a saw and grist mill, machine shop, distillery, and 711 inhabitants. The first settlement was made by —— Gunn, in 1793.[4] The first religious services were held at the house of —— Fairbanks, in 1794.[5]

AVA[6]—was formed from Boonville, May 12, 1846. It is the central town on the N. border of the co. Its surface is a moderately uneven upland, 700 to 1,000 ft. above the Rome level. It is drained by Fish Creek, the E. and W. branches of the Mohawk, Point Rock, and Blue Brooks. Several small sulphur springs have been found in town. The soil is a gravelly loam. **Ava Corners,** (Ava p. o.,) W. of the center, contains 20 houses. The first settlement was commenced by Ebenezer Harper, in 1798.[7] A Friends meeting house is the only place of worship in town.

BOONVILLE[8]—was formed from Leyden, (Lewis co.,) March 28, 1805. Ava was taken off in 1846. It lies on the N. border of the co., E. of the center. Its surface is a hilly, broken upland, 800 to 1,000 ft. above the canal at Rome. Black River flows through the N. E. part, and Lansing Kil rises near the center and flows S. to the Mohawk. Its soil is clayey loam, in many places thickly covered with boulders and often inclining to sand. Near the village are immense deposits of drift. Its E. border extends into the great forest, and presents the meager, sandy soil and naked rocks peculiar to that region. There is a gas spring 1½ mi. W. of the village, and a sulphur spring 1½ mi. S. The latter has acquired some local celebrity. **Boonville,** (p. v.,) in the N. W. part, was incorp. in 1855. It contains 3 churches, a printing office, several manufactories, and 1,000 inhabitants. It is the present N. terminus of the Black River & Utica R. R. It is on the summit level of the Black River Canal, and has a large trade with the country N., W., and E. **Alder Creek,** (p. v.,) in the S. E. part, contains a church and 20 houses. **Forest Port,** (p. v.,) near the S. E. corner, on the line of Remsen, contains 20 houses. **Hawkinsville,** (p. v.,) N. W. of the center, contains a saw and grist mill, chair factory, carding mill, and 339 inhabitants. **Hurlbutville** is a p. o. The first settlement commenced in 1795.[9] The first church was formed in 1805.[10]

BRIDGEWATER[11]—was formed from Sangerfield, March 24, 1797. It is the S. E. corner town of the co. Its surface is uneven. The valley of the W. branch of the Unadilla and its tributaries, locally known as "Bridgewater Flats," in the N., is about a mi. wide, but decreases to about

Oil and Iron Manufacturing Co. began operations here in 1864. In 1811 a blast furnace was erected. Formerly hollow ware was exclusively made; but at present pig iron is the chief product.

[1] The first settlement was made at Taberg. Among the early settlers were Elias Brewster, Adam P. Campbell, Nicholas Armstrong, and Squire Fairservice.

[3] This town is included in the S. part of the tract leased from the Oneidas in 1794 to Peter Smith. The lease is said to have been for 999 years. The tract was divided into 4 allotments, the first of which lies wholly within this town. The lease was assumed by the State in 1795–97, and patents were granted to settlers, Smith retaining 6 lots in the town as part payment for his lease. The first settlers took their lands as tenants under Smith. Part of the Oneida Reservation, purchased in 1795 and 1797 at auction in 1797, is included in the N. part of the town.

[4] Among the early settlers were Benjamin Warren, David Morton, John Alden, Ichabod Stafford, Joseph and Abraham Forbes, Isaac and Benjamin Allen, Amos Parker, Thos. Cassaty, Ozias and Lemuel Hart, James Reynolds, Abel Prior, Thomas ——, and Isaac, Sextus, Abel Lindsley, and Ebenezer Doolittle. The first birth was that of Peter Smith Gunn; the first marriage, that of Daniel Hart and Catharine Putnam; and the first death, that of Eleazer Putnam, in 1795. T. Cassaty built the first sawmill in 1796 at Oriskany Falls. A gristmill was built the next year.

[5] The census reports 5 churches in town: 2 Cong., M. E., Bap., and Union.

[6] Named from a city in Palestine.

[7] Zephaniah and Almer Wood settled in town about 1800. Messrs. Barnard, Fanning Adams, Mitchell, Beck, and Tinney were early settlers. Salmon Bates kept the first inn, in 1800. Benj. Jones built the first sawmill, in 1801, at which time there were only 9 other inhabitants in town. The road cut through from East Steuben to the French settlement on Black River, toward the close of the last century, led through this town; and traces of it may still be seen. Several tributaries of Black River take their rise in swamps in the N. E. part of the town.

[8] Named from Gerrit Boon, agent of the Holland Land Co., who made the first settlement. In early times it was called "Boon's Upper Settlement."

[9] Andrew Edmonds came on in 1795 as an agent of the Holland Land Co., with several men, built a sawmill, and commenced a gristmill, which was finished the next year. Jacob Fisher and son, Phineas, Martin, and Silas Southwell, Asahel and Ezekiel Porter, Aaron Willard, Jacob Springer, Jephtha King, and Hezekiah Jones came in 1796. Lemuel Hough and Daniel Pitcher were early settlers. The first birth was that of a daughter of Jacob Springer; and the first marriage, that of Henry Evansmal Elizabeth Edmonds. The first store and inn were opened by the agents of the company.

[10] Rev. Daniel Smith was the first minister. There are now 5 churches in town; Presb., M. E., Bap., Union, and R. C.

The first settlement was commenced in 1788,[3] by Joseph Farwell. There are 3 churches in town; Cong., Bap., and Univ.

CAMDEN—was formed from Mexico, (Oswego co.,) March 15, 17[illegible] in 1805, Vienna in 1807, and a part of Annsville in 1823. It lies upon the W. border of the co., near the N. W. corner. Its surface is rolling, gradually rising toward the N., where it is broken by hills whose summits are several hundred feet above Oneida Lake. The W. branch of Fish Creek flows diagonally through the town toward the S. E. Mad River from the N. unites with it near Camden Village; and Little River, a tributary, forms part of the S. boundary. The soil is a sandy loam, in some places gravelly and stony, but generally well adapted to [illegible]. **Camden,** (p. v.,) in the E. part, was incorp. in 1834. It contains 3 churches, saw and grist mills, a sash and blind manufactory, pump factory, 2 tanneries, a cloth manufactory, and 862 inhabitants. **West Camden,** (p. v.,) near the N. W. corner, contains 20 houses. **Hillsborough,** in the S. part, is a hamlet. The first settlement commenced near the close of the last century.[4] The first religious society was formed Feb. 19, 1798, by Rev. Eliphalet Steele.[5] The church received from the heirs of John Murray an endowment in lands yielding a revenue of $112.

DEERFIELD—was formed from Schuyler, Herkimer co., March 15, 17[illegible] Mo[illegible] taken off in 1832. It lies near the center of the E. border of the co. Its surface is mostly a high plateau, 600 to 1,000 ft. above the Mohawk, forming the N. continuation of the H[illegible] M[illegible] of Herkimer co. A broad intervale, partly overflowed in high water, extends along the Mohawk opposite Utica; and on the N. E. the surface descends abruptly to the creek. The Mohawk flows along the S. W. border of the town, and West Canada Creek along the N. E. border. The soil on the flats is a deep, rich, alluvial loam, and on the hills a slaty and gravelly [illegible]. **Deerfield Corners,** (Deerfield p. o.,) in the S. part, contains 2 churches, a carriage shop, [illegible] A thickly settled suburb of Utica extends toward the village. **North Gage,** [illegible] N. part, is a hamlet. The first settlement was commenced in 177[illegible].[6] The first [illegible] was held in 1798, by Rev. —— Eddy. There are 4 churches in town.[7]

FLORENCE—was formed from Camden, Feb. 16, 1805. A part of Am[illegible] in 1823. It is the N. W. corner town of the co. Its surface is rolling, and 250 to 300 ft. above the Rome level. Mad River flows S. E. through the town. The soil is stony and light, and is underlaid by the Hudson River shales. A portion of the town is still covered by forests, which extend N. to near Jefferson co. **Florence,** (p. v.,) N. of the center, contains 3 churches, 3 sawmills, a gristmill, tannery, and 40 houses. **Empeyville,** in the E. part, contains a [illegible] **East Florence** (p. o.) and **Florence Hill** are hamlets. of the S. E. part. The soil is of good quality and well adapted to grain and grass. **Floyd Corners** (Floyd p. o.) contains a church and 20 houses. The first settlement commenced about 1790, by Capt. Benjamin Pike.[1] There are 4 churches in town; Cong., Welsh Meth., Union,[2] and R. C.

KIRKLAND[3]—was formed from Paris, April 13, 1827. Marshall was taken off in 1829, a part was annexed to New Hartford in 1834, and a part of Paris was annexed in 1839. It lies in the interior, S. of the center of the co. Its surface is a hilly upland, divided into two general ridges by the valley of Oriskany Creek. The hills are 200 to 500 ft. high, and the declivities are generally steep. Oriskany Creek flows N. E. through near the center. The soil is a rich, calcareous loam. Near Clinton Village are quarries of good building stone. Iron ore is found; and several thousand tons are annually shipped by the Chenango Canal, to Constantia, Taberg, and Penn. Great attention is paid to fruit growing, and this town excels every other town in the co. in the amount of fruit raised. The town derives its greatest interest from its extensive educational institutions, which entitle it to the appellation of the Literary Emporium of Oneida co. **Clinton** (p. v.) was incorp. April 12, 1843. Hamilton College[4] is located upon a hill overlooking the Oriskany Valley. Its buildings consist of Dexter Hall, or North College; Kirkland Hall, or Middle College; Hamilton Hall, or South College; a chapel, laboratory, and an observatory. The course of study embraces a collegiate and a law department. A grammar school, under a separate board of trustees, is connected as a preparatory department. The college libraries contain about 10,000 volumes, and the cabinet of natural history contains about as many specimens. The village also contains 5 churches, 2 newspaper offices, the Clinton Liberal Institute,[5] a grammar, a boarding, and a high school, and a few manufactories. Pop. 1,174. **Manchester,** (Kirkland p. o.,) a manufacturing village,[6] in the N. part, contains 30 houses. **Franklin,** near the center, contains the Franklin Iron Works[7] and 35 houses. **Clarks Mills,**[8] in the N. corner, is a manufacturing village, and contains a cotton factory, grist and saw mill, and 40 houses. The first settlement commenced in 1787, by 8 families.[9] Religious services were first held in the cabin of Capt. Foot.[10]

[1] Among the early settlers were Stephen Moulton, Wm. and Nathaniel Allen, James Chase, Elisha Lake, —— Howard, Hope Smith, David Bacon, Samuel Dearborn, James Bartlett, —— Putney, Jarvis Pike, Capt. Nathan Townsend, and Thomas Bacon—mostly from Conn. The first death was that of —— Foster; the second, that of Nathan Thompson, who was killed by a falling tree.

[2] The plan of township of the union church is peculiar. The seats are owned and transferred by purchase, and the owners meet on the first Monday in each year and vote what denomination shall occupy the house the ensuing year.

[3] Named from the Rev. Samuel Kirkland, an early missionary among the Oneida Indians, who settled in the county in 1792. He was the principal founder of an academy since merged in Hamilton College. He died in 1808; and a monument was erected to his memory by the Northern Missionary Society.

[4] Hamilton Oneida Academy was incorp. by the Regents, Jan. 31, 1793, mostly through the exertions of the Rev. Samuel Kirkland. In 1794 a commodious building was erected, the corner stone of which was laid with much ceremony by Baron Steuben. The school was opened the same year under the Rev. John Niles, whose successors were Rev. Robert Porter, Seth Norton, and Rev. James Robbins. The success of this academy was highly gratifying to its friends; and the rapid development of Central New York suggested the necessity of more ample facilities for instruction and an extension of its course of study. Clinton and Fairfield became active competitors for the honors of a college, and charters of similar object and conditions were granted to each, under the names of Hamilton and Clinton Colleges respectively. By a compromise between the friends of the rival locations, the latter institution was never organized. Clinton went on with its literary college, and employed the most active person in the Fairfield enterprise as its agent, while Fairfield organized a medical college. Hamilton College was chartered May 26, 1812, and went into operation soon after, under the presidency of the Rev. Azel Backus. His successors have been Henry Davis, in 1817; Sereno E. Dwight, in 1833; Joseph Penny, in 1836; Simeon North, in 1839; and Samuel Ware Fisher, in 1848. The college is chiefly under the influence of the New School Presbyterian and Congregational Churches. From 1819 to 1849, a period of 30 years, no difference between the Trustees and President seriously retarded the prosperity of the institution, and during the same period peace and harmony among the students was of frequent occurrence. From 1838 to 1850 the college received $2,000 annually from the State; but the present Constitution cut it off from the receipt of a balance previously appropriated, and the grant has not been since continued. The Trustees many years since established the custom of admitting students to study to pay tuition fees, and this unfortunate extension to the usage became an abuse that showed itself upon the treasurer's books. The receipts from tuition became only a quarter as great as previously, while the catalogue included in its numbers an increase prosperity. It was found quite difficult to abandon this practice when it had been developed, and it is still continued to a great extent as the means of the institution will justify. These causes have embarrassed the finances of the college; but efforts are about being made to relieve it from debt. The sum of $50,000 was granted by the State, June 19, 1812, to aid in founding the college. Wm. H. Maynard, of Utica, in 1832 gave $20,000 to endow a professorship of law; and S. Newton Dexter, of Whitesboro, in 1839, gave his personal obligation for $15,000 to endow a professorship of the Greek and Latin languages. The observatory was built in 1854, at a cost of $3,000 exclusive of the instruments, which have cost more than twice that sum.

[5] The Clinton Liberal Institute was founded in 1832; it is under the patronage of the Universalist denomination, and has a male and a female department. The building for the former is of stone, 96 by 52 feet, 4 stories above the basement, and has accommodations for 140 students. The female department is an elegant structure, 113 by 60 ft., 2 stories high above the basement, and has an average attendance of 50 pupils. A small monthly paper, named the "Leaf End," "Summer Leaves," "Autumn Leaves," or "Wintergreen," according to the season, is published at this institution. Home Cottage Seminary is a private institution, established in 1854 as a ladies' seminary, by Miss L. M. Barker. The edifice is 60 by 112 ft., and cost—including 8 acres of land—$20,000. It has been united with another ladies' school under Miss A. Chipman, and is very prosperous. An issue styled the "Home Cottage Quarterly" is published by the pupils. This seminary forms the female department of the grammar school. The Clinton High School, for males only, was established May, 1858, by Rev. B. W. Dwight and D. A. Holbrook. It is located 1 m. from the village, cost $18,000, and has accommodations for 80 students.

[6] The Manchester Manufacturing Co., incorp. in 1815, gave employment to 100 hands, and manufactured cotton cloths to the amount of $100,000 per year, until Aug. 19, 1850, when it was burned.

[7] The Franklin Iron Works manufactures 4,000 tons of pig iron annually, from ore obtained in the immediate vicinity. It gives employment to 100 men, and turns out work to the amount of $300,000 annually.

[8] Clark's Mills manufacture brown sheeting, and are furnished with 128 looms. The proprietors also have a manufactory of cotton cord, rope, and batting, and a grist and sawmill.

[9] Moses Foot, his three sons, Putnam, Luther, and Ira, and his son-in-law, Barnes, as Pond was one of this number. Levi Sherman, Solomon Hovey, Lucius Bellard, Timothy Tuttle, Samuel Hollard, Parshall Lewis, Conrad Storrs, John Bullen, and Capt. Cassey were early settlers. Mrs. S. Hovey was the first white woman who moved into the town. The first child born was Clint'n Foot, the first marriage was that of Roger Leverett and Lucy Beth Chesebrough; and the first death was that of Mrs. Merab Tuttle. Skenandoah, an Oneida chief, died in this town, March 11, 1816, aged 110 years. Capt. Cassey built the first gristmill, in 1787, and a sawmill the next year. The village was early named Iron (ore Clinton; and the vicinity was known by the Indians as Kaloosa's day.

[10] There are 5 churches in town: 2 Cong., Bap., R. C., and Union.

LEE[1]—was formed from Western, April 3, 1811. A part of Annsville was taken off in 1823. It lies in the interior, N. of the center of the co. Its surface is rolling or moderately hilly, gradually rising from the lowlands in the S. to an elevation of 500 to 800 ft. above the canal at Rome. The W. branch of the Mohawk flows through the N. E. corner, and Fish Creek forms a part of the W. boundary. The soil is a clayey, sandy, and gravelly loam, and in some localities very stony. **Lee Center** (p. v.) contains a church, saw and grist mill, tannery, and 40 houses. **Lee,** (p. v.) in the S. W. corner, contains a church and 20 houses. **Delta,** (p. v.) in the S. E. corner, on the line of Western, contains a foundery, tannery, and 228 inhabitants. **West Branch,** p. v., in the N. E. corner, contains a saw and grist mill and 20 houses. **Stokes** (p. o.) is a hamlet. The first settlement commenced in 1790, at Delta, by Stephen and Reuben Sheldon.[2] The first religious society (Cong.) was formed in 1797, under Rev. James Southworth.[4]

MARCY[5]—was formed from Deerfield, March 30, 1832. It lies on the N. bank of the Mohawk, E. of the center of the co. Its surface is rolling; a wide intervale borders upon the river, from which rises an irregular table-land 300 to 500 ft. above the valley. Nine Mile Creek flows through the W. corner. The soil on the upland is a rich, sandy and gravelly loam, and on the flats an alluvial deposit, which is annually increased by the spring floods. **Stittsville,** (p. v.) on the line of Trenton, contains a church, saw and grist mill, cotton factory, and 40 houses. **Marcy** is a p. o. The first settlement commenced in 1793,[6] by John Wilson. The census reports 6 churches in town.[7]

MARSHALL—was formed from Kirkland, Feb. 21, 1829. It lies in the S. part of the co., the S. W. corner bordering on Madison co. The surface is a hilly upland, the hills rising 200 to 300 ft. above the valleys. Oriskany Creek flows N. E. through the W. part. The soil is a fertile, sandy loam. **Deansville,**[8] (p. v.) on the N. border, contains 2 churches, an academy, and 185 inhabitants. **Hanover,** (Marshall p. o.) near the center, contains a church and 15 houses. **Forge Hollow** contains a church, a forge, and 35 houses. The first white settlement was commenced in 1793,[9] by David Barton. The first church (Cong.) was formed in 1797.[10]

NEW HARTFORD—was formed from Whitestown, April 12, 1827. A part of Kirkland was annexed in 1834. It lies upon the E. border of the co., S. of the center. Its surface is level or gently undulating, except in the extreme E. part, where is a low range of hills. Sauquoit Creek flows N. through near the center. The soil is a rich, calcareous loam. **New Hartford** (p. v.) contains 4 churches, 2 cotton factories, a batting factory,[11] a flouring mill, tannery, and 892 inhabitants. **Washington Mills** (p. v.) contains the Washington Steam Mills, Oneida Woolen Mills, and 50 houses. **New York Upper Mills,** (New York Mills p. o.) on the N. border, contains a church, a cotton factory, dye house, steam mills, and 40 houses. **Willow Vale,** in the S. part, contains a factory for making cotton machinery,[12] a foundery, and 40 houses. The first settlement was commenced by Jedediah Sanger, in 1788.[13] The first church (Presb.) was formed in 1791, by Rev. Jonathan Edwards; and the first settled minister was Rev. Dan'l. Bradley. The census reports 6 churches in town.[14]

PARIS[15]—was formed from Whitestown, April 10, 1792. Brookfield, Hamilton, and a part of

8 2 Cong., 2 Bap., M. E., and Univ. Meth.

9 Named after Thos. Dean, being an agent of the Brothertown Indians.

10 The Brothertown Indians were settled previous to the Revolution on a reservation in this town and Kirkland given them by the Oneidas. They were remnants of New England, Hudson River, and Long Island Indians, who were collected toward the close of the Colonial period, and numbered, when first removed hither, about 400 souls. Consisting as they did of many different stocks, they adopted the English language and some of the arts of civilized life. They were mostly scattered during the war, but [illegible] returned [illegible] thrifty farmers; but the greater part acquired the vices of the whites, and a part of them sold out and went to Green Bay. In 18[illegible] the [illegible] removed [illegible] West. Among the early white settlers were Warren Williams, Hezekiah Eastman, Capt. Simeon Hubbard, and Levi Baker. The first birth was that of Col. Lester Baker.

11 It was called the Hanover Society; and their edifice, after standing 40 years, was [illegible] 1851. [illegible] churches in town, 2 [illegible] M. E. and Univ.

12 The "Utica Cotton Mills" have a capital of $100,000, run [illegible],000 spindles and [illegible] looms, and [illegible] cut [illegible] yards of cloth annually. [illegible] machine shop, and gas works.

13 This establishment has a capital invested of $40,000, and employs 80 hands.

14 Among the early settlers were [illegible] Bush, [illegible] Ives, Solomon Blodget, Salmon Butler, Joel Blair, Agift Hill, —— Wyman, Stephen Bushnell, Oliver Collins, Joseph Jennings, Joseph Higles, Nathan Seward, John French, —— Kellogg, —— Risley, —— Olmsted, [illegible] Burt, [illegible] Hall, —— Kilborn, and —— Montague. Jedediah Sanger built the first mill.

15 Presb., M. E., Prot. E., Bap., Union, and Friends.

16 Named by the inhabitants in acknowledgment of the kindness of Isaac Paris, a merchant of Fort Plain, who, in the year

Cazenovia, (Madison co.,) Sherburne, (Chenango co.,) and Sangerfield, were taken off in 1795, and Kirkland in 1827. A part of Kirkland was annexed in 1839. It lies on the E. border, near the S. E. corner of the co. Its surface is a hilly upland, broken by the valley of Sauquoit Creek. The hills bordering the valley are 200 to 400 ft. high, and their declivities are generally steep. Sauquoit Creek flows N. through the town, E. of the center. The soil is a sandy, calcareous loam. **East Sauquoit** and **West Sauquoit,** (Sauquoit p. o.,) contiguous villages on opposite sides of Sauquoit Creek, contain 2 churches, extensive cotton factories,[1] 2 paper mills in the immediate vicinity,[2] 2 sawmills, a gristmill, a tannery, and 690 inhabitants. **Clayville,** (p. v.,) near the center, contains a church, 2 furnaces, an agricultural implement manufactory,[3] extensive woolen mills,[4] and 817 inhabitants. **Cassville,** (p. v.,) near the S. border, contains a church, gristmill, tub factory, and 40 houses; **Paris Hill,** (Paris p. o.,) in the W. part, a church and 30 houses; **Holman City,** in the E. part, a furnace, a whiffletree iron manufactory, and 12 houses. The first settlement commenced in 1789.[5] The first church (Cong.) was formed in 1791, by Rev. Jonathan Edwards; Rev. Eliphalet Steele was the first pastor. There are now 8 churches in town.[6]

REMSEN[7]—was formed from Norway, (Herkimer co.,) March 15, 1798. A part of Steuben was annexed in 1809. It is the N. E. corner town of the co. Its surface is an elevated upland, broken by hills and ridges and with a mean elevation of 1,200 to 2,000 ft. above tide. Black River and its tributaries drain the central and N. parts; and West Canada Creek forms a small part of the S. E. boundary. Otter, Long, and White Lakes are in the N. part. The soil is generally a light, sandy loam. A large part of the town is still covered by the primitive forests forming a portion of the great Northern Wilderness. **Remsen,** (p. v.,) a station on the B. R. & U. R. R., in the S. W. corner, contains a church, furnace, steam mill, and 510 inhabitants. **Forest Port,** (p. v.,) on the line of Boonville, contains 20 houses. **Port Woodhull** is a hamlet. The first settlement commenced in 1792, by Barnabas Mitchell.[8] There are 12 churches in town.[9]

ROME—was formed from Steuben, March 4, 1796. It lies upon the Mohawk, a little W. of the center of the co. Its surface is level, and some portion of the W. part is low and marshy. The Mohawk flows S. E. through the E. part, and Wood Creek flows W. through the N. W. part.[10] Fish Creek forms the N. W. boundary. The soil is generally a highly productive, gravelly loam. **Rome,** (p. v.,) upon the Mohawk, S. E. of the center of the town, was incorp. March 26, 1819. It is a half-shire of the co., and it contains the co. buildings, 12 churches, 4 banks, 2 newspaper offices, the Rome Academy, and several manufactories.[11] It is the S. terminus of the W. R. & C. V. R. R. and of the Black River Canal, and is an important station upon the Central R. R. and the Erie Canal. Pop. 7,083. **West Rome** is a thickly settled suburb just W. of the limits of Rome. **Stanwix,** (p. v.,) a canal village, contains about 15 houses. **Greens Corners** is a station on the Central R. R., near the S. W. corner. **Ridge Mills,** near the center, contains 15 dwellings; and **North Rome** is a hamlet. The first settlement was made at the "Carrying Place," before the [12]French

of scarcity, 1789, supplied them with Virginia corn on a liberal credit and finally accepted payment in such produce as they were enabled to supply.

[1] The "Quaker Woolen Factory," established in 1812. In 1827 it commenced the manufacture of cotton, and now employs 100 hands, runs 1100 looms, and can make 2,000 yards per day. The same Co. have another mill that employs 50 hands and runs 60 looms.

[2] The mills employ 30 hands, and make about 1½ tons of printing paper daily.

[3] The manufacture of scythes was commenced in 1834. The business has since been largely increased, and at present about $200,000 is invested in the works. Scythes, hoes, forks, and other farming tools are extensively manufactured.

[4] The woolen mills were started in 1843. They manufacture broadcloths and blankets, and employ 80 hands.

[5] The first settlement was made by Capt. Rice. Among the early settlers were Benj'n Barnes and his son Benjamin, John Hunnewell, Stephen Barnet, Aaron Adams, Ariel Simmons, Phineas Kellogg, John and Sylvester Butler, Asa Shepard, Kirkland Griffin, and Benjamin Merrill. The first death was that of Wm. Swain in 1790. Abner Bacon kept the first inn, and James Orr the first store, in 1792.

[6] 2 M. E., 2 Presb. E., 2 Cong., Bap. and Presb.

[7] Named from Henry Remsen, Patentee of Remsenburgh. The town embraces most of Remsenburgh Patent and portions of Fort Wm. Woodhull's, Servis's, and other tracts.

[8] Among the early settlers were John Butler, Nathl. Rockwell, Betts, Le Clerc, Perez Farr, and Jonah Pratt, in 1792. In 1808, David Mount, John Davis, Griffith L. Jones, John Owens, and Hugh Hughes, Welsh emigrants, arrived and were soon followed by a large immigration of their countrymen. The town contains more natives of Wales than any other town in the State; and, including their children of American birth, the Welsh number more than half the population. The first birth was that of Polly Mitchell, and the first death that of Capt. Peck. Broughton White kept the first store, in 18[illegible].

[9] 5 Calv. Meth., 3 Cong., 2 M. E. and 2 Bap.

[10] Between the Mohawk and Wood Creek was a portage of about 1 mi. in length over level ground. Early in the last century propositions were made to build a road across this portage, and in 1796 the Western Inland Navigation Co. constructed a canal between the two streams, and the route speedily became a great thoroughfare of travel. This canal was most of the way on the line of the present Erie Canal, through the village. The Indians called the place De-o-wain-sta, "a carrying place for canoes." Wood Creek was called Ka-ne-go-hock. The canal was constructed under the superintendence of Peter Colt.

[11] The principal manufactories are a plow factory, two cutlery, planing mill, several sawmills, and the repair shops of the W. R. & C. V. R. R.

[12] The first settlers came in at an early period, but their names are unknown. John Reed and [illegible] Brodock were engaged in the carrying trade at this place in 1760. The former was a blacksmith and innkeeper. Jedediah Phelps, John Barnard, Gen. Jas. and Henry Huntington, Joshua Hathaway, Dr. Stephen White, Roswell Bellows, Matthew Brown, sen. and jun., Seth Emmons, David Brown, Ebenezer, David W., and Thomas Wright, Thomas Selden, Solomon and John Williams, Peter Colt, Wm. Colton, Alpheus and Clark Putnam, Caleb Reynolds, Rufus Hayes, Thos. Gilbert, Moses Fish, Stephen Longman, Jeremiah Stow, and John Niles were early settlers.—*Jones' Hist. pp. 72.* The first birth was in the family of John Roof, Aug. 28, 1769. The first sawmill was erected in 1788, and the first gristmill in 1790. A State Arsenal was erected here in 1808, on the grounds of St. Peter's Church. The U. S. erected an arsenal and workshop a

War of 1755. The subsequent history of the place is full of incidents of general interest.[1] The first church (Cong.) was formed Sept. 5, 1800.[2]

SANGERFIELD—was formed from Paris, March 5, 1795. Bridgewater was taken off in 1797. It was transferred from Chenango to Oneida co. April 4, 1804. It is the W. town on the S. line of the co. Its surface is a moderately hilly upland, 700 to 800 ft above the Mohawk at Utica. The streams are small, and flow N. to the Mohawk and S. to Chenango River. The soil in the valleys is a rich alluvium, and on the hills a gravelly loam. **Waterville,**[1] (p. v.), near the N. border, contains 3 churches, a bank, an academy, a newspaper office, a saw and grist mill, distillery, and 1,100 inhabitants. **Sangerfield Center** (Sangerfield p.o.) contains a church and 30 houses; and **Stockwell Settlement,** in the S. part, about 20 houses. The first settlement was commenced by Zerah Phelps, from Mass., in 1791.[2] There are now 7 churches in town.[3]

STEUBEN[4] was formed from Whitestown, April 10, 1792. A part of Mexico (Oswego co.) was annexed, and Floyd and Rome were taken off, in 1796; and Leyden (Lewis co.) and Western in 1797. Parts of Steuben's Tract in Western and Remsen were annexed in 1803; and a part was annexed to Remsen in 1809. It lies in the interior, N. E. of the center of the co. Its surface is a hilly, broken upland, rising 800 to 1,200 feet above the Mohawk.[8] The streams are small. Cincinnati Creek rises in the interior, and forms part of the E. boundary. The soil is a gravelly loam; and boulders are numerous. Quarries are worked, from which a good quality of building stone is obtained. **Steuben Corners** (Steuben p.o.) is a hamlet, in the S. part. **Steuben Station,** on the B. R. & U. R. R., is on the line of Boonville. The first settlement was commenced in 1789,[9] under Baron Steuben. The census reports 7 churches in town.[10]

TRENTON—was formed from Schuyler, (Herkimer co.,) March 24, 1797. It lies upon the W. bank of West Canada Creek, near the center of the E. border of the co. The surface rises from the creek to the height of 400 to 600 feet; and from the summits it spreads out into an upland broken by ridges of drift. Cincinnati Creek flows through the N. part, and Nine Mile Creek through the S. part. The soil is a sandy and clayey loam, best adapted to grazing. The celebrated Trenton Falls, upon West Canada Creek, are within the limits of this town.[11] **Trenton,**[1] (p. v., on Cincinnati Creek, at the mouth of Steuben Creek, contains 3 churches and 50 houses. **Trenton Falls,** (p. v.,) a short distance below the Falls, contains a church, gristmill, sawmill, and 20 houses. **South Trenton,** (p. v.,) upon the old Utica turnpike, contains 2 churches and 40 houses. **Holland Patent,**[1] (p. v.,) in the W. part of the town, is a station upon the B. little W. of the village in 1814, under the direction of Maj. Jacob Brown. It is still owned by the General Government, but is not in use. In 1784 Gen. Washington and Gov. Clinton, traveling together, dined in the old block-house, which was a part of Cookingham and Orchard Townships in the town of Whitestown.

Fort Williams, on the Mohawk, and Fort Bull on West Canada Creek, were built in the fall of 1755, by Maj. Eyre Massey, of Albany, and Col. William Williams, of Connecticut, and were the first English settlements in the county. Fort Williams, which was situated on the south bank of the Mohawk, a little W. of the village of Whitesboro, was destroyed by the French, March 27, 1756. Fort Bull was built by Maj. Eyre Massey, and was destroyed by the French, March 27, 1756. Fort Williams was rebuilt in 1758, by Gen. Abercrombie, and named after Gen. Stanwix, who was then in command of the British forces in America. It was a square work with bastions at the corners, and was situated on the present site of the village of Rome, with which it has given name to the locality. In June, 1758, Col. Bradstreet passed up the Mohawk with a force of 3,000 men, and encamped at Fort Stanwix. It was burned in 1776, by Sir John Johnson, and was rebuilt during the Revolutionary War. It was finally demolished in 1781. Fort Schuyler was built in 1758, by Gen. John Stanwix, of the British army. It was a square work with bastions at the corners, and was situated on the present site of the village of Utica

U. R. R. It contains 6 churches, the Holland Patent Academy, and 353 inhabitants. **Prospect,** (p. v.,) on West Canada Creek, above the Falls, contains 2 churches, Prospect Academy, an extensive sawmill, a tannery, and 60 houses. **Stittsville,** (p. v.,) on the line of Marcy, in the s. w. corner of the town, contains a church, cotton factory, sawmill, tannery, and about 40 houses. It is a station upon the B. R. & U. R. R. Settlement was commenced in 1793, by Gerrit Boon, from Holland.[1] The first church (Presb.) was formed soon after; Rev. —— Fish was the first pastor.[2]

UTICA[3]—was incorp. as a village April 3, 1798. It was formed as a city from Whitestown, April 7, 1817, and was incorp. as a city Feb. 13, 1832. It lies upon the s. bank of the Mohawk, on the E. border of the co. A wide intervale extends along the river; and from it the surface rises in gradual slopes toward the S. W. It lies upon the Erie Canal, and is the N. terminus of the Chenango Canal. It is an important station upon the N. Y. C. R. R., and the s. terminus of the B. R. & U. R. R. It is the center of one of the best agricultural sections of the State; and its trade is extensive. It is largely engaged in manufactures, among which are cotton and woolen goods, millstones, screws, musical instruments, telegraphic apparatus, and a great variety of other articles.[4]

The City Hall is a fine, large, brick building on Genesee St., s. of the canal. It contains a large public hall, common council room, and rooms for the several city officers.

The Public Schools are under the charge of a Superintendent and Board of Education. They are graded, and include all departments from the primary to a thorough academic course. They employ 45 teachers,—6 males and 39 females. The whole number of children between the ages of 4 and 21 is 8,000, of which 3,226, or 40 per cent., attend school during some portion of the year. The total expenses of the schools for 1858 were $15,546.82. The number of volumes in the district libraries is 3,018.

The Utica Academy, long an independent school, now constitutes the High School of the public school system of the city.

The Utica Female Academy is a flourishing institution, situated between Washington St. and Broadway, near Genesee St. It was founded in 1837, and its property is valued at $25,000.

The Academy of the Assumption is under the care of the Brothers of the Christian Schools.

The State Lunatic Asylum is located upon a large lot on an eminence near the W. line of the city. It receives insane persons subject to co. charge, where there is a reasonable prospect of relief, and such others as its accommodations will admit. Until recently it has received insane convicts; but this class will hereafter be sent to the asylum built for that purpose at Auburn. The average number of inmates during the last 16 years has been 381 annually.[5]

[1] Boon was an enterprising pioneer and agent of the Holland Land Company, the same that purchased in Western New York. Above, or with Le Roy, Bayard, McEvers, and Bustle he purchased in trust for that company 10,955 acres of Onohoudits Patent, 6,026 of Stephen's Patent, 1,200 of Machin's Patent, and 23,000 of Services Patent. The last named, lying mostly in this town, was granted in 1768 to Peter Servis and 24 others for the benefit of Sir Wm Johnson. This tract was conveyed by the trustees above named to the Holland Company in 1801. Among the other early settlers were Col Adam G. Mappa, Dr. Fr. A. Vanderkemp, Judge John Sterns, Col Robert Hicks, Peter Schuyler, John P. Little, Cheney and John Garnett, Wm Rollo, Col. Thos Hicks, Edward Hughes, and Hugh Thomas. Boon returned to Holland, where he died many years after. The first child born was Adam Parker, in 1790; the first marriage, that of Jacob Joyce and Widow Peck; and the first death, that of —— Nelson, in 1790.

[2] The census reports 15 churches: 4 M. E., 3 Bap., 2 Presb., (0 S. Bap. Cong. Cath. Meth., Prot. E., Union and Univ.)

[3] The Indians called the locality Yanunhedesis, or Unundaga-ges, "around the hill." After an old stockade, built in early times, was razed, it was called Tevedahdodeyage, "ruin of fort."

[4] *The Eagle Mills* give employment to 120 hands, and produce 1,500,000 yards of cotton cloth annually.

The Utica Steam Cotton Mills employ 250 hands, and produce 1,100 yds of cotton cloth daily.

The Utica Woolen Mills employ 180 hands, and use 300,000 lbs of wool in the manufacture of cassimeres annually.

The Utica Steam Woolen Co. gives employment to 200 hands, and uses 1,800 lbs of wool per day.

The Utica Screw Manufacturing Co. employs 50 hands, and turns out goods to the amount of $90,000 annually.

The Utica Millstone Manufactory and Plaster Mill's give employment to 50 men, and turn out $60,000 worth of products annually.

The city also contains extensive manufactories of starch, flour, clothing, organs, pianos, castings, machinery, stone ware, fire brick, carpets, oil cloths, leather, lumber, beer, and cars.

[5] An asylum of this kind was recommended by the Governor in 1839, and was annually urged by its friends, until an act was passed, March 30, 1836, appointing 5 commissioners to purchase a site not exceeding $10,000 in value, and to contract for building. N. Dayton, C. McVean, and R. Wilkes were appointed; and in 1837 a farm of 120 acres was bought at the point opposite of the State and the citizens of Utica. $50,000 was appropriated in that year. Wm Clarke, Francis E. Spencer, and Elias Hasbrouck were appointed commissioners to erect buildings. The first plan, prepared by Clarke, embraced 4 buildings each 100 feet long, facing outward, connected by open verandas, and inclosing a court of about 13 acres. The main building was erected and the foundations were laid, when the plan was reduced and attention given to finishing the main building. By act of April 7, 1842 the asylum was put in charge of 9 managers, appointed for a term of 3 years each by the Gov. and Senate, a majority of whom must reside within 5 miles of the asylum. Dr. Amariah Brigham was chosen Superintendent, and upon his death, Sept. 8, 1849, Dr. Nathan D. Benedict succeeded. The present Superintendent is Dr. John P. Gray, who was appointed in 1853.

The building was partially destroyed by a fire set by one of the inmates July 14, 1857. The walls remained standing, and the premises have been refitted without interruption of operations, and with improvements far exceeding in safety and convenience those that were destroyed. The sum of $98,742 was granted in 1858 to rebuild the premises, and the labor is now

Besides the foregoing institutions, there are in the city 10 private schools, 5 banks, and 24 churches.[1]

The site of the city is included in the colonial grant of 1734, styled Cosby's Manor. Settlement began soon after the Revolution; and in 1787 there were 3 log huts at this place.[2] The construction of the Seneca Turnpike and of a bridge gave the first impulse to its growth, and the Erie Canal in a few years doubled its business and population. Although the city has experienced disasters, its general growth in wealth and numbers has been steadily forward, and its geographical position, lines of communication, and natural advantages are guarantees of its future increase.[3]

VERNON—was formed from Westmoreland and Augusta, Feb. 17, 1802. A part of Stockbridge (Madison co.) was taken off in 1836. It lies on the w. border of the co., s. of the center.[4] Its surface is rolling, the mean elevation being about 200 ft. above the Mohawk. The principal streams are Oneida Creek, forming the w. boundary, and Skaneateles Creek,[5] flowing through the E. part. The soil is a fine quality of gravelly and clay loam, underlaid by limestone, waterlime, and gypsum. Very few towns in the State surpass this in all the elements of fertility. A mineral spring is found a mi. N. W. of Vernon Center. **Vernon,** (p. v.,) upon Skaneateles Creek, N. of the center, was incorp. April 6, 1827. It contains 2 churches, the Vernon Academy, a private seminary, bank, newspaper office, and tannery. Pop. 330. **Vernon Center** (p. v.) contains 2 churches and 30 dwellings. **Oneida Castle,** (p. v.,) on the W. line, contains a church, academy, and 337 inhabitants, of whom 275 are in this town. **Turkey Street** is a

Of the 5,516 patients received up to Dec. 1, 1858, 4,806 were discharged, [illegible] were improved, and 1,041 were [illegible]. Great success attends the treatment in most cases when received at an early stage; but when the disease has existed many years the chances of recovery rapidly diminish, and in a few years cease altogether. The asylum is not designed as a hospital for incurables, [illegible] cease, it is its general customs to return patients to their friends or to local institutions of support.

Of the [illegible] in the asylum Nov. 30, 1858, 172 were males and [illegible] females; [illegible] between 20 and 30; [illegible] between 30 and 40; [illegible] between 40 and 50; [illegible] between 50 and 60; [illegible] between 60 and 70; [illegible] between 70 and 80; [illegible] between 80 and 90; [illegible] between 90 and 100; [illegible] between 100 and 110. 87 females were married; 76 males and 64 females were single; [illegible] were widowed; [illegible] were divorced. [illegible] 12 could read but not write; and 11 were entirely without education. 226 had been engaged in [illegible] professional and literary, employments; 8 were in trade, and 4 had no occupation. 210 were natives of New York, 14 of Ireland, [illegible] of Germany, 4 each of Canada, Scotland, [illegible], Vermont, Massachusetts, and New Hampshire, [illegible] each of New Jersey and Maine, and 1 each of Rhode Island, [illegible]. [2] Fort Schuyler at this place was built in 1758, and named from Col. Peter, an uncle of Gen. Philip Schuyler. It was a stockaded work, and stood between Main and Mohawk Streets [illegible] close of the Revolution on the site of the present depot. Among the early settlers were Uriah Alverson, Philip Morey, Francis Foster, Stephen Potter, Joseph Ballou, Jason Parker, John Cunningham, Jacob Chrestman, and Matthew Hubbell. The first store and inn were kept by John Post, in 1790, on the N. corner of Genesee and Whitesboro' streets. Post had been a dealer among the Indians, and purchased large quantities of [illegible] grant of the sole right of running a stage to Canandaigua twice every week between May and October. Mails were extended from Canajoharie to this place in 1793, the inhabitants along the route paying the expense. Bryan Johnson, in 1797, [illegible] The latter soon removed to Utica; and the spirited rivalry of [illegible] Shearman, John Bissell, and Daniel Thomas were also early merchants. Nathan Williams, Erastus Clark, Francis A. Bloodgood, and Joseph Kirkland were early lawyers.

thickly populated farming neighborhood. The first settlements were made in 1794–97.[1] The first religious services were held in 1801.[2]

VERONA—was formed from Westmoreland, Feb. 17, 1802. It lies on the w. border of the co., near the center. Its surface is generally level, slightly rolling in the E., and marshy in the W. Oneida Lake and Creek form the w. boundary, and Wood Creek[3] the N. boundary. Several small streams in the town are tributaries to these. The soil is a deep, rich, alluvial loam. There is a mineral spring in the E. part of the town.[4] **Verona** (p. v.) contains 2 churches, a tannery, and 30 houses. **Durhamville,** (p. v.,) on the w. border, partly in Madison co., contains 2 churches, a glass factory, foundery, tannery, and 1,034 inhabitants. **Verona Depot,** (p. o.) a station on the N. Y. C. R. R., contains 10 houses. **State Bridge** (p. v.) contains 20 houses; **Higginsville** (p. v.) 25 houses; **New London,** (p. v.,) in the N. part, 30 houses; **Sconondoa,** (p. v.,) in the S. part, on the line of Vernon, 20 houses; **Verona Mills** (p. v.) 20 houses; **Dunbarton** a glass factory and 20 houses; and **Staceys Basin** 10 houses. Settlement was commenced in 1792, by Geo. A. Smith;[5] Rev. Joseph Avery preached the first sermon. There are now 10 churches in town.[6]

VIENNA[7]—was formed from Camden, April 3, 1807, as "*Orange*." Its name was changed to "*Bengal*," April 6, 1808, and to Vienna, April 12, 1816. A part of Annsville was taken off in 1823. It lies on the w. border of the co., N. of the center. Its surface, rising from Oneida Lake on the S. border to an elevation of about 100 ft., spreads out into a rolling plateau. The N. W. part is hilly. Wood Creek and Oneida Lake form the S. boundary. Fish Creek forms most of the E. boundary, and unites with Wood Creek before it enters Oneida Lake. The W. branch of Fish Creek forms a part of the N. boundary. The soil is a light, sandy loam, underlaid by clay: in the S. W., along Fish Creek, it is alluvium. Good building stone is quarried in the E. part, and large quantities of bog ore have been raised from the marshes near the lake. **Vienna,** (p. v.,) in the E. part, contains a church and 110 inhabitants. **North Bay,** (p. v.,) in the S. part, near the lake, contains 2 churches, 3 sawmills, a shingle mill, and 25 houses. **McConnellsville,** (p. v.,) in the N. part, on the line of Annsville, contains 20 houses; **Elpis,** a church and 8 houses. **Fish Creek Landing** contains 20 houses; **West Vienna,** (p. v.,) on the lake, 20 houses. **Pine** is a hamlet, in the E. part. The first settlement was commenced near the close of the last century.[8] There are now 6 churches in town[9].

WESTERN—was formed from Steuben, March 10, 1797. Lee was taken off in 1811. It lies in the interior, N. of the center of the co. Its surface is a hilly upland, broken by numerous gulleys worn in the slate by the streams. Mohawk River and Lansing Kill Creek meet near the center and flow S. and S. W. into Rome. The soil in the valleys is alluvium. Stone quarries are worked which have furnished large quantities of stone for the Black River Canal. **Westernville** (p. v.) contains a church, a tannery, and 287 inhabitants. **North Western** (p. v.) con-

[1] The first settler was Joseph Bushnell, in 1794. Upon the relinquishment of the Indian title, in 1797, a large number of families from Mass. and Conn. came in, and within 2 years every farm in town was taken up. Among the early settlers were Isaac Bushnell, Hall, Bronson, Wetmore, Holmes, Storey, Gridley, Smith, Bissell, Foot, Gridley, Fowler, Hinsdale, De Witt, Austin, Stannard, Gorham, Alvord, Thrall, Wilcox, Church, Spencer, Carter, Marshall, Butler, Bush, Mc Owen, Wilcox, &c., and Welsh, Bigelow, Rev. Chester Lockwood, D. D., and Vernon Gaylord. Rev. John Sayre, Rev. and Lemuel Corbin, Marvin, and M. Ewen, on Sayre's Patent. The water resembles in many respects that of the Harrowgate Springs in England.

[5] Smith was 8 days working his way through snow, swamps, and thickets from Westmoreland. Among the early settlers were Asahel Jackson in 1795, near the Oriskanys, La Warren de Wardenon, at Oak Orchard, on Wood Creek, in 1796 or 97. Among the early settlers in the S. part in 1798 were Brooks, Langdon, Avery, Lathes, Bosworth, Pomeroy, Day, Ellis, Fisher, Phelps, Benedict, Loomis, Warren, Tarlton, Reid, Shattuck, Bachman, Whelan, Robbins, Clark, Bishop, and Brown. The first birth was that of Eva Smith, in 1795, and the first death was that of a child of Wardenon, in 1797, who was buried in its cradle for want of a coffin. *Jones's Oneida Co., p. 671.* Asahel Jackson kept the first inn, in 1796. The first saw and grist mills were built for the Indians.

The first settlement commenced in 1789, by Asa Beckwith and his sons Asa, Reuben, Wolcott and Lemuel, and Henry Wager.[1] The first church (Bapt.) was formed in 1798, Rev. Stephen Parker presided occasionally. There are now 6 churches in town.[2]

WESTMORELAND was formed from Whitestown, April 10, 1792. A part of Westmoreland was annexed March 15, 1798. Verona and part of Vernon were taken off in 1802. It is an interior town, lying S. of the center of the co. Its surface is a rolling upland, with a mean elevation of 150 to 250 ft. above the Mohawk. The streams are mostly small brooks. Iron ore has been obtained in large quantities for the Westmoreland, Lenox, Onondaga, and Paris furnaces. Several quarries of fine building stone have been wrought; and from some of these grindstones were formerly manufactured. The soil is principally a gravelly and clayey loam, adapted to grain raising and pasturage. **Hampton,** (Westmoreland p. o.,) in the E. part of the town, contains 3 churches, several manufactories,[3] and 400 inhabitants. **Lowell,** (p. v.,) in the N. W. part, contains a church and 25 houses. **Hecla Works,** (p. v.,) S. W. of the center, contains a blast furnace[4] and 16 houses. **Lairdsville,**[5] (p. v.,) in the S. part, contains a church and 15 houses. **Spencer Settlement,** on the N. line, and **Eureka,** 2 mi. S., each contains about 15 houses. The first settlement was made by James Dean, upon a patent granted to him under an act of May 5, 1786.[6] The first church (Cong.) was formed Sept. 20, 1792.[7]

WHITESTOWN was formed March 7, 1788, and originally included an indefinite amount of territory extending westward, at the present time forming several counties. Steuben, Mexico, Paris, and Westmoreland were taken off in 1792; Augusta in 1798; Utica in 1817; and New Hartford in 1827. It lies upon the S. bank of the Mohawk, a little S. E. of the center of the co. A broad, flat intervale extends along the Mohawk; and from it the surface rises in gentle slopes about 100 ft. and from the summits spreads out into a rolling upland. Oriskany Creek[9] flows N. E. through near the center, and Sauquoit Creek through the E. part. The soil is mostly a fine quality of gravelly loam and alluvium, well adapted to grain raising. **Whitesboro',**[10] (Whitestown p. o.,) in the Mohawk Valley, in the S. E. part of the town, was incorp. March 26, 1813. It contains 4 churches, the Whitestown Seminary, a bank, and several small manufactories. It is a canal and R. R. station. Pop. 953. **Oriskany,** (p. v.,) near the mouth of Oriskany Creek, is a canal village and R. R. station. It contains 5 churches and several extensive manufactories.[11] Pop. 711. **Yorkville** and **New York Mills,** in the S. part, are manufacturing villages upon Sauquoit Creek, the former containing about 50 houses and the latter 3 churches and 60 houses.[12] **Waterville,** (p. o.,) **Colemans Mills,** and **Pleasant Valley** are hamlets or thickly settled farming neighborhoods. The first settlement was made by Judge Hugh White and his 5 sons, Daniel C., Joseph, Hugh, jr., Ansel, and Philo, in May, 1784.[13] This was the first settlement in the co., and became the nucleus of civilization for Central N. Y. The first church (Presb.) was formed Aug. 20, 1794; the first settled pastor was Rev. Bethuel Dodd.[14]

ONONDAGA COUNTY.

THIS county was formed from Herkimer, March 5, 1794, and included the original Military Tract. Cayuga was taken off March 8, 1799; Cortland, April 8, 1808; and a part of Oswego, March 1, 1816. It was named from the Onondaga tribe of Indians, whose principal residence was within its border. It lies near the center of the State, centrally distant 127 mi. from Albany, and contains 812 sq. mi.

Its surface is naturally divided into two nearly equal parts by an E. and W. line, the N. half being nearly level, and the S. broken by ridges of hills and gradually sloping upward to a height of about 1,000 feet on the S. border. These highlands constitute a portion of the most northerly spurs of the Central Allegany Mountains, where they sink down to a level with the lowlands which surround Lake Ontario. They are divided into five distinct ridges, all having a general N. and S. direction and separated by narrow and deep valleys. The most eastern of these ridges enters the town of Manlius from the E., and extends northward to the immediate vicinity of the Erie Canal, the valley of Limestone Creek forming its W. boundary. Its highest point is 600 to 800 ft. above the valley. The second ridge lies between the valleys of Limestone and Butternut Creeks and embraces the highlands of Fabius and Pompey, the W. part of Manlius, and the E. part of La Fayette and De Witt. In Pompey this range attains an elevation of 1,743 ft. above tide. The lower or N. part of this ridge is subdivided by the deep valley of the W. branch of Limestone Creek. The third range, between the valleys of Butternut and Onondaga Creeks, comprises the highlands of the central part of La Fayette, the W. part of De Witt, and the E. portions of Tully, Onondaga, and Syracuse. Its highest point, in La Fayette, is several hundred ft. lower than the hills of Pompey. The fourth range, between Onondaga and Nine Mile Creeks, comprises the highlands of Otisco, the W. portions of Tully, La Fayette, Onondaga, and Geddes, and the E. portions of Marcellus and Camillus. The highest point of this range, in Otisco, is but a few ft. lower than the highest point of Pompey. The fifth range, lying between Nine Mile Creek and Skaneateles Lake and Outlet, comprises the highlands of Spafford, the W. parts of Marcellus and Camillus, and the E. parts of Skaneateles and Elbridge. Its highest point, Ripley Hill, in Spafford, is 1,081 ft. above tide. The axis of this whole system of highlands, extending through Pompey, Fabius, and Tully, forms a part of the watershed between Susquehanna River and Lake Ontario. The declivities of these hills are generally steep, but their summits are rolling and crowned with forests or cultivated fields.

The geological formation of the co. consists of alternate strata of shale and limestone, overlying each other in nearly horizontal layers. The lowest of these, cropping out on the shores of Onondaga Lake, is the Clinton group of shale, and successively above these, toward the S., the Niagara limestone, the red and green shales and gypsum belonging to the Onondaga salt group, the waterlime group, Oriskany sandstone, Onondaga limestone, corniferous limestone, Seneca limestone, Marcellus shales, Hamilton shales, Tully limestone, Genesee slate, and Ithaca shales. The last four mentioned are found upon the summits of the southern hills. The salt group occupies the very base of the hills; and the limestones crop out along their declivities in an E. and W. line extending through the center of the co. The celebrated Onondaga Salt Springs are at the head of the bay on which Onondaga Lake is situated, and the salt water is found above or within the strata of red shale. The salt wells are 200 to 400 feet deep. The green shales, embracing the lower calciferous strata, the magnesian or vermicular lime, and large quantities of gypsum in isolated masses, lie immediately above the red shales, and form the first declivities of the ranges of hills. The gypsum is extensively quarried, and is one of the most important minerals in the State.[1] Next above these shales is the waterlime stone,—another important and valuable mineral.[2] The Onondaga limestone

[1] Throughout the gypsum region are found numerous tunnel shaped cavities at the surface of the ground 5 to 6 ft. deep and about the same in circumference. These are supposed to be caused by the underlying rocks being slowly dissolved by the rains, and the earth above falling into the cavity so formed. From year to year new cavities are continually forming.

[2] This stone is [illegible] It [illegible] the Western States [illegible] valued by experts of the [illegible]

furnishes a beautiful and valuable building stone; and nearly all of the limestone strata furnish quicklime of a superior quality.

In variety, strength, and fertility, and in all the elements of perpetual productiveness, the soil of this co. is not surpassed by that of any other co. in the State. It is extensively derived from the decomposition of the underlying rocks.[1] But the northern towns are nearly all covered with drift, and their soil is generally a light, sandy loam, alternating with heavy clay. The vast deposits of lime upon the hills go far toward enriching the soil of the valleys.[2] In the central and N. portions the marshes are covered many feet thick with peat and muck formation, formed by the decaying vegetation of centuries, and furnishing the elements of almost boundless future fertility.[3] More than one-half the entire tobacco crop of the State is raised in this co.

The streams of the co. nearly all flow in a northerly direction and discharge their waters through Oswego River into Lake Ontario. In their course from the highlands they often flow over perpendicular ledges and through narrow ravines, forming a great number of beautiful cascades, the principal of which will be more particularly noticed in the description of the different towns. Oswego River, which forms a part of the E. boundary of Lysander, is formed by the junction of Seneca and Oneida Rivers. Seneca River[4] enters the N. part of the co. from the W. and pursues a winding course until it unites with Oneida River. It is a broad, deep stream, and has upon it one series of rapids, which has been converted into a valuable water-power. In the lower part of its course it contains a broad sweep or bend from a S. E. to a N. W. direction; and at its extreme S. point it receives the Onondaga Outlet from the S. Oneida River, the outlet of Oneida Lake, is a deep, sluggish, crooked stream, 18 mi. in length, and forms a link in the chain of internal navigable waters of the State. Limestone and Butternut Creeks, after flowing through narrow and deep parallel valleys among the hills, unite in the N. part of the town of Manlius, and flow into Chittenango Creek a few mi. above its entrance into Oneida Lake. Onondaga and Nine Mile Creeks—the latter being the outlet of Otisco Lake—both flow into Onondaga Lake. Otisco Inlet, a small stream entering the co. from the S., may be considered the head branch of Nine Mile Creek. Skaneateles Outlet discharges its waters into Seneca River just beyond the W. border of the co. Several small streams take their rise in the S. part of the co., and, flowing S., form the head branches of Tioughnioga River. The principal lakes in the co. are Oneida, Onondaga, and Cross Lakes, upon the level land of the N., and Skaneateles and Otisco Lakes, in deep valleys among the hills of the S. Oneida Lake, extending along the N. E. border of the co., is about 30 mi. in length; and it forms a portion of the chain of the internal navigable waters of the State.[5] Onondaga Lake, celebrated for the salt springs which are found in its immediate vicinity, is about 5 mi. long.[6] Cross Lake, upon the N. W. border of the co., is a shallow body of water, about 5 mi. long, and may be considered as simply an enlargement of Seneca River. Skaneateles Lake, 16 mi. long, occupies a deep and narrow valley among the hills, and is considered one of the finest sheets of water in the State. The banks along its S. part rise precipitously to a height of several hundred ft., and the scenery is singularly wild and rugged. Toward the N. the summits decline in height, and the land gradually and smoothly slopes down to the very edge of the water, forming a rich and exceedingly beautiful landscape. Otisco Lake is about 4 mi. long, and is nearly surrounded by steep hills, 400 to 800 ft. above its surface. In the region occupied by the waterlime and Onondaga limestone formations are many deep rents and fissures, from 50 to 200 ft. below the surface, some of which contain little sheets of water. These remarkable depressions are evidently the result of

This co. was the chief seat of the Onondaga Nation of Indians, the central of the Five Nations. Their name is said to signify "sons of the hills," or "men of the mountains." To this nation was intrusted the care of the sacred council fire; and upon their territory were held the great councils of the Iroquois, to decide upon peace, war, and matters of general policy. The Onondagas were regarded as particularly a sacred nation; and their chiefs were more influential than those of any other nation. The most authentic accounts of these Indians seem to indicate that they were originally a subordinate tribe, living upon the St. Lawrence near Montreal, and were held in subjection by the Adirondacks, then the most powerful nation of the North. Several hundred years before the discovery of America, they rose upon their oppressors, but were defeated. They then fled, and,

embarking in canoes, went up the St. Lawrence to Lake Ontario, coasted along the [illegible] the mouth of Oswego River, and went up that river and settled upon the Seneca, near Three Rivers Point. The nation finally divided into five tribes, and the central or Onondaga [illegible] valley and settled near Onondaga Lake. Upon first entering the [illegible] they found it occupied by the Alleghans, or "Mound Builders," a tribe supposed to be akin to the Aztecs [illegible] and one considerably acquainted with agriculture. The Iroquois gradually [illegible] took possession of their lands. The celebrated League of the Five Nations [illegible] made about 100 years before the first Dutch colony was planted at Manhattan. [illegible] many reasons for believing it was of a much older date. The principal villages [illegible] were along the shore of Onondaga Lake and Creek. The first visit ever made [illegible] to the Onondaga country of which any record has been preserved was that of Samuel Champlain in 1615.[1] In the summer of that year Champlain, with 10 Frenchmen, accompanied a party of Hurons in an attack upon the Iroquois. A battle was fought before the principal [illegible] Onondagas; but the invaders were repulsed with loss and were obliged to retreat.[2] The French at an early period saw the necessity of obtaining the friendship of the Five Nations, the most powerful of all the Indian tribes. To this end, Jesuit missions were established at an early period, and one of the principal stations was at the seat of the Onondagas. The first missionary that [illegible] the Onondaga country was Father Isaac Jogues, in 1642. He was afterward murdered by the Mohawks at Caughnawaga, Montgomery co. In the course of the next hundred years [illegible] 60 missionaries were sent to this region, and at different times many of them were murdered.[3] In 1655 a colony of 50 Frenchmen under the guidance of the priests, and with the consent of the Onondagas, made a settlement on the S. shore of Onondaga Lake, near the principal Indian village. For some time the colony flourished, and large numbers of the Indians were converted and baptized; but at length the Indians became jealous of their neighbors, and in March, 1658, they determined to exterminate them. A friendly Indian having exposed the plan, the whites managed to escape.[4]

[1] It is supposed that some of the French explorers who flocked to this country about the commencement of the sixteenth century may have penetrated to Central N. Y. In 1820 a number of pewter plates were found buried in the earth, upon which was drawn the rude form of a fleur-de-lis with a serpent twined about it, and the date 1530. It is reported, upon the authority of the missionaries, that the principal chief of the Onondagas invited the French to establish another colony among them, for the purpose of instructing the Indians in the arts of civilization. Accordingly, in 1665, a number of French families, under the guidance of the missionaries, came into the country and located near the Indian fort and village which stood in the vicinity of the present village of Jamesville. After living in peace for about 3 years, they were visited by a party of Spaniards who came in from the s., and the Indians became jealous of both and murdered them all.[1] It is supposed that several other attempts were made by the French to colonize the country, as numerous remains of French works are found in several places.[2] In the wars that ensued between the English and French the Onondagas bore their part, and were generally allies of the English. In 1695, Count Frontenac, the French Governor of Canada, invaded the Onondaga country; but he retired after burning a few villages and murdering one old man. During the Revolution the Onondagas espoused the English cause, and many of their warriors, under the leadership of Brant, were engaged in the various attacks upon the frontier settlements. On the 19th of April, 1779, Col. Van Schaick, at the head of 150 men, invaded the Onondaga country by the way of Oneida Lake. A skirmish was fought near the s. w. limits of the present city of Syracuse, in which the Indians were defeated.[3] In the fall of the same year, Col. Gansevoort, at the head of 100 men, was detached from Gen. Sullivan's army, at Geneva, and sent through the country of the Cayugas and Onondagas to complete the work of destruction which had been commenced. The villages of the Onondagas were burned, their corn was destroyed, and their sacred council fire was put out. In revenge, small bands of the Indians attacked the defenseless frontier settlements upon the Mohawk and committed the most horrible atrocities.

In 1788 a treaty was made with the Onondagas, in which they ceded to the State all their lands except the Onondaga Reservation.[4] The land thus obtained, and another tract lying w. of it, were set apart for bounty lands to Revolutionary soldiers, and became known as the Military Tract.[5] It included all the lands lying within the original limits of Onondaga co., and now constituting Onondaga, Cayuga, Cortland, and Seneca, and parts of Tompkins, Oswego, and Wayne cos.

[1] It is reported that 2 Spaniards came up the Mississippi, Ohio, and Allegany Rivers to Olean, and thence across the country to Onondaga, under the guidance of an Iroquois. They had been informed by the Indians that in the s. there was a lake the banks of which were covered with some thing, shining and white, which they understood to be silver. Their disappointment was great when they found that the Indians meant salt instead. A quarrel arose between the French and Spaniards, which resulted in the murder of both by the Indians.

[2] In many of the old Indian forts have been found the remains of French arms and ammunition, and a variety of relics evidently of much older date. The French doubtless found the fortifications partly built and took possession of them. In Pompey were found several of these, and at considerable amount of land cleared, and it is supposed that quite a flourishing French settlement was here, totally destroyed at a period not long subsequent to the Revolution.

[3] The official report makes the Indian loss 12 killed and 34 prisoners.

[4] The original Onondaga Reservation was a tract of land bounded on the n. by the Indian townships of Manlius and Pompey, e. by the townships of Pompey and Marcellus, w. by the townships of Marcellus and Camillus, s. by the townships of Camillus and Manlius and the public Reservation bordering upon Onondaga Lake. The s. e. corner was originally at the Limestone Creek Salt Springs. The Reservation was about 11 miles long n. and s. by 9 w. and included parts of the present towns of De Witt, Camillus, Geddes, De Witt, and the city of Syracuse. [illegible] Onondaga. In 1788 it was purchased of the Indians, reserving a tract in the s. [illegible] sq. mi. and s. by each by 1 and w. and subdivided into 221 lots mostly of [illegible] exclusive of the sq. mi. originally granted to Webster by the Indians in 1788. The [illegible] were made no account of, having been converted into a public Salt Reservation by [illegible]. The second purchase was made [illegible] 1817 [illegible] tract lying between the E. side of the tract reserved in the first purchase, and was subdivided [illegible] each. The third purchase was made [illegible] 1822, being a strip [illegible] wide from the s. end of last purchase [illegible] purchased 1817. It was subdivided [illegible] The present reservation is [illegible] by the lake from [illegible] miles, containing exclusive of 300 acres to the s. The [illegible] of the tribe has visibly decayed within the last few years, and they appear to be slowly learning the arts of civilization. The Onondaga Salt Springs Reservation was subdivided in 1821-24, by John Randall, jr.

[5] The Military Tract was laid out into 25 townships, each intended to contain, as nearly as possible, 60,000 acres, and each township was subdivided into lots. Three more townships were afterward added, making 28 in all. The following is a complete list of them:—

The State reserved for salt purposes the territory surrounding the lake and known as the Onondaga Salt Springs Reservation, embracing the [illegible] of Salina, now the towns of Salina and Geddes, and the city of Syracuse, all of which, except the land needed for the manufacturing establishments alone, has since been sold. In the treaty with the Indians, the salt springs were to be jointly used by the whites and Indians forever. The salt business immediately became important, and has since kept pace with the growth of the country. It is now one of the most important branches of business carried on in the State, and is constantly increasing.[1]

CAMILLUS—was formed from Marcellus, March 8, 1799. A part of Onondaga was annexed in 1834. It is an interior town, lying a little N. W. of the center of the co. The surface is generally rolling, the ridges extending in a N. and S. direction. Nine Mile Creek flows N. E. through near the center, and along the S. line it is bordered by steep banks 100 to 200 feet high. In the N. W. corner is a swamp covering an area of several hundred acres. The soil is a rich, clayey and

process of manufacture remains essentially the same as at first. Many experiments have been made to completely separate the impurities from the water before boiling,—but so far without complete success. The addition of alum to the water is found to harden the salt and to render the process of crystallization more perfect. The immense consumption of fuel at the boiling works has almost stripped the surrounding country of wood, and rising that article is scarce and high. Late experiments in the use of coal have been completely successful; and by the construction of the Binghamton & R. R. an avenue is opened directly to the Pennsylvania coal mines.

In 1797 the Surveyor General laid out a tract of 15,000 acres, surrounding the lake, known as the Onondaga Salt Springs Reservation, which was set apart for the location of salt works. It was supposed that this tract was more extensive than would ever be needed; and, pursuant to acts of the Legislature, all, except about 600 acres, was sold in 1822 and 1827. Since that time, however, the State has re-purchased several tracts, and large numbers of solar works have been erected upon private property. The amount of land at present owned by the State is about 700 acres.

The salt wells are all located in the low lands that surround the lake. Their existence is doubtless owing to the nature and position of the rocks forming the basin of the lake. The Niagara limestone—a solid and almost seamless rock, about 100 ft. thick—crops out 8 miles N. of the springs. In common with all the rocks in the vicinity, it has a dip to the S. of about 26 ft. to the mile. This would make it extend under the lake, forming a floor to the whole, and so completely impervious to water. Above this formation are the red shales of the Onondaga salt group, nearly 400 feet in thickness. Observation and experiment have shown that these shales have been removed, by some great force of nature, from the whole valley which extends from the N. extremity of the lake several miles up the valley of Onondaga Creek; and the excavation has been filled with drift deposits, consisting chiefly of alternate strata of sand, clay, and gravel. The salt water is found permeated through this drift in all parts of the valley, the strongest being found where the old valley is the deepest. The salt water is probably derived from the dissolving of particles of salt distributed through the whole mass of the green shales and plaster beds, which lie next above the red shales and which extend perhaps many miles under the hills. In evidence of the truth of this theory, it is shown that the green shales which have been exposed are full of small hopper-shaped cavities,—the precise shape assumed by crystals of salt when left to form by themselves, and one which no other crystal ever assumes. The water collects in this great basin, and is prevented from overflowing by the impervious floor of Niagara limestone. The waters of the lake are probably prevented from mingling with the salt water by strata of impervious clay and marl. About 50 different wells have been sunk for obtaining salt water, and a great number of experiments have been tried. The depth of the borings has been from 50 to 600 ft.; and in every case where the tubing has been sunk into the strata below the drift no brine has been obtained. Up to 1825 the water was obtained from square holes sunk in the marsh to the depth of about 30 ft. The first wells that were bored were 50 to 80 ft deep. Subsequent experiment showed that by boring farther out on the marsh the wells could be deeper and a better quality of water could be obtained. A tube sunk to the depth of 414 ft. penetrated a clay bed or the Niagara limestone, and destroyed the well, although at a depth of 392 to 397 ft a bountiful supply of excellent water was obtained. A boring upon the hills, to the depth of 600 ft., probably penetrated through the limestone and entered the Clinton group below. This last boring was made with the hope of finding rock salt; but not a single salt crystal has ever yet been found here in a natural state.

Wells have been sunk at 4 points, giving to the salt manufacture 4 distinct centers. These are situated respectively at Salina, (now First Ward of Syracuse,) Syracuse, Liverpool, and Geddes. The number of wells now in use upon the Salt Springs Reservation is 15, of which 6 (from 140 to 310 ft. deep—are at Salina, 6—from 275 to 340 ft. deep—are at Syracuse, and 3—from 80 to 160 ft deep—are at Liverpool. The Geddes wells have been abandoned, as the water was not sufficiently strong to make the manufacture profitable. The Geddes works are now supplied from the wells at Syracuse.

The strength of the water is tested by an instrument called a salometer, graduated so as to mark pure water 0 and water saturated with salt 100°. The water from the wells as now drawn ranges from 60° to 70°, averaging about 70°. An analysis of the various springs was made in 1857, by Dr. Beck, with the following result —

An analysis from a well yielding stronger water was afterward made, with the following result:—

Common salt	173.50
Sulphate of lime, &c.	8.50
Water	818.00
Total	1,000.00

The water at the present time does not essentially differ from that last given, a hundred pounds of brine yielding about 17½ lbs of common salt. A bushel of salt, weighing 56 lbs., is made from 35 gallons of water. The temperature of the water as it rises from the ground ranges from 50° to 52° Fahrenheit. An analysis of the manufactured salt shows that 99 to 99½ per cent is pure salt, and the remainder is principally sulphate of lime and water. About two thirds of the salt is made by boiling, and the remainder by solar evaporation. The water in the wells rises to the surface of the ground, where it is raised by combined suction and force pumps into high reservoirs, from which it is conducted by pumping logs to the various works. The machinery for pumping is propelled by water from the canals. The brine in each block is conducted to two parallel troughs, each of which is 2 feet wide and 1 foot deep. They are covered with a roof partially open to allow the passage of steam, and under the same covers are the troughs used for storing and pumping the salt. Each of these works is technically called a "block." A "cistern" is connected with each block, and from it a line of logs conducts the water into the top of the sheds, between the rows of kettles with a spout to each kettle. The greater part of the impurities are precipitated and fall to the bottom of the kettle before the water begins to boil. A shallow pan, called a bittern pan, is placed in each kettle when first filled, to receive these bitterns as they settle. The pan is removed before the water boils, and the salt is left nearly pure. The kettles usually have a capacity of about 100 gallons, and average in weight about 900 lbs. each. The fuel is applied at one end of the arch the chimney being situated at the other. Within the past few years several chimneys, ranging from 75 to 100 ft in height, have been erected, for the purpose of using coal. The blocks are all situated along the canals, or side cuts from them, for convenience in obtaining fuel and in shipping the salt. The number of blocks upon the Reservation reported in 1859 was 312, distributed as follows —

	No. of Blocks.	No. of Kettles.
Syracuse	52	2,998
Salina	102	8,042
Liverpool	62	3,504
Geddes	46	2,386
Total	312	16,930

The solar works consist of shallow vats, constructed of wood, and placed upon posts 2 to 3 ft above the ground. Each vat is 16 ft. square, or 16 by 18, and 9 in. hes deep. Movable roofs are so constructed that the vats can easily be covered in wet weather, and exposed in dry. An acre of ground contains about 60 vats and covers, and an evaporating surface of more

gravelly loam. Limestone and gypsum are both found in abundance.[1] A large sulphur spring is found in the N. W. corner. **Camillus,** (p. v.,) on Nine Mile Creek, near the center of the town, was incorp. in 1852; it contains 3 churches, 2 flouring mills, and 1 [illegible] inhabitants. **Amboy,** in the N. E. part, contains a church and 170 inhabitants. **Belle Isle,** (p. v.,) on the [illegible], 1 mi. E. of Amboy, contains 1 church and 140 inhabitants. **Fairmount** (p. p. o.) [illegible] E. border. The first settler was Capt. Isaac Lindsay, who located upon Lot 80 in 1790.[2] The first church (Presb.) was formed in 1817. There are 6 churches in town.[3]

CICERO—was formed from Lysander, Feb. 20, 1807. Clay was taken off in 1827. It lies upon Oneida Lake, in the N. E. corner of the co. Its surface is level or very slightly undulating. An extensive swamp in the S. E part occupies one-third of the entire surface,[4] and another considerable swamp extends along the lake shore W. of South Bay. The soil is a clayey and sandy loam. **Cicero Corners,** (p. v.) near the center of the W. line, contains 2 churches and 242 inhabitants. **Brewerton,** (p. v.,) on the outlet of Oneida Lake, contains 2 churches and 621 inhabitants, of wh. in 421 are in this town. South Bay and Frenchmans Island are places of resort for pleasure seekers. Fort Brewerton,[5] one of the line of English fortifications between Oswego and the Mohawk Valley, was situated in Oswego co., on the shore of Oneida Outlet, opposite the present village of Brewerton. The first settlement was made by [illegible] Bowyer, a blacksmith, who located on the river, opposite the fort, in 1790.[6] The first church (Presb.) was formed at Cicero Corners, in 1814; Rev. James Shepard was the first preacher. The census reports 6 churches in town.[8]

CLAY—was formed from Cicero, April 12, 1827. It is the central town upon the N. border of the co. Its surface is very flat, and but little elevated above the level of Oneida Lake. Seneca River forms the W. and Oneida River the N. boundary. These streams are sluggish; and along the latter is an extensive swampy region. The soil is in part clayey, and in part a light sandy loam. Fruit and onions are largely produced. **Belgium,** (p. v., upon Seneca River, contains a church and 100 inhabitants; **Euclid** (p. v.) 2 churches and 140 inhabitants; **Centerville,** Plank Road p. o.,) on the line of Cicero, 2 churches and 111 inhabitants. **Three River Point** (p. v.) lies at the junction of Oneida and Seneca Rivers, in the N. W. corner of the co., 9 m. from Syracuse, 9 m. from Oswego, and 9 m. from Baldwinsville. The first settler was Patrick McGee, who located at Three River Point, in 1790.[9] The first church (Evang. Luth.) was located in the N. E. part of the town. The census reports 4 churches in town.[7]

DEWITT[10]—was formed from Manlius, April 12, 1835. A portion of Syracuse was annexed in 1858. It is an interior town, lying N. E. of the center of the co. The N. half is level, and the S. broken and hilly. The declivities of the hills are usually steep, and their summits [illegible] 700 ft. above the valleys. Butternut Creek, flowing N., divides the highlands into two nearly parallel ridges. Upon this stream are several fine mill sites. In the S. W. corner, about 1 mi. N. W. of

Jamesville, is a small lake, occupying a deep chasm in the rocks. It is nearly circular in form, about 80 rods in diameter, and is almost surrounded by perpendicular banks 150 to 200 ft. high.[1] Another lake, of a similar character, lies 2 mi. N. E. of Jamesville.[2] Messina Spring, a strong sulphur spring, N. W. of the center of the town, has considerable local notoriety for medicinal qualities. Gypsum and waterlime are both extensively quarried along the banks of Butternut Creek. The soil is a sand and clay loam in the N., and a sandy and gravelly loam in the S. **Jamesville,**[3] in the S. part of the town, contains 3 churches and several manufactories.[4] Pop. 270. **Orville** (De Witt P. O.) contains 2 churches and 158 inhabitants. **Collamer,**[5] (P. O.,) in the N. part, is a hamlet. **Messina Springs** is near the W. line. The first settler was Benj. Morehouse, from Dutchess co., who came in April 26, 1789.[6] The census reports 7 churches in town.[7]

ELBRIDGE[8]—was formed from Camillus, March 26, 1829. It is the central town upon the W. border of the co. Its surface is level in the N. and rolling in the S. Seneca River and Cross Lake form a portion of the N. boundary. Skaneateles Outlet flows N. W. through the W. part. Upon the banks of the Outlet, near the center, are found the peculiar tunnel-shaped cavities in the earth, characteristic of regions abounding in gypsum. Several weak brine springs are found along Seneca River.[9] The soil is a rich, sandy and gravelly loam. **Elbridge,** (P. V.,) on Skaneateles Outlet, in the S. W. part of the town, was incorp. April 1, 1848; it contains the Munro Collegiate Institute,[10] 3 churches, a pail factory, and several mills. About 1 mi. down the stream is a mill for the manufacture of pearl barley. Pop. 630. **Jordan,** (P. V.,) upon the Outlet, 2 mi. below Elbridge, was incorp. May 2, 1835. It contains the Jordan Academy, 5 churches, 2 flouring mills, and a wheelbarrow factory. It is a station upon the direct branch of the N. Y. Central R. R., and an important canal village. A feeder from the Outlet connects with the canal at this place. Pop. 1,331. **Peru** (Jacks Reefs P. O.) is a hamlet, on the canal, near the N. E. corner. **Junction** (Hart Lot P. O.) is a R. R. station on the Auburn Branch of the N. Y. C. R. R. **Half Way** is a station on the same R. R. **California** is a hamlet, on the canal, 2 mi. E. of Jordan. The first settler was Josiah Buck,[11] who located on Lot 82, in 1793. The first church (Bap.) was formed Dec. 30, 1816; Elder Craw was the first preacher.[12]

FABIUS[13]—was formed from Pompey, March 9, 1798. Tully was taken off in 1803, and a part of Truxton (Cortland co.) in 1808. It is the S. E. corner town in the co. It has a general elevation of 1,000 to 1,200 ft. above the Erie Canal at Syracuse. The surface of the S. half is broken by a series of ridges extending in a N. and S. direction and separated by narrow valleys. Their declivities are generally steep, and the summits are 300 to 500 ft. above the valleys. South Hill, in the S. W. corner, is the principal elevation. The central and northern parts are level or moderately hilly. The streams from the center flow S. into the Tioughnioga, and those upon the

[1] Called by the Indians Kan-yah-K-oh, signifying "satisfied with to-day." Tradition says that an Indian woman once lost her child here in a misty locality, and that she was informed by a spirit that the child would be safe if she would annually cast a quantity of tobacco upon this pond. The custom continued until the advent of the whites; and hence the name. The water of the lake is pure upon the surface but strongly impregnated with sulphur below. The water is about 60 ft. deep.—*Clark's Onondaga.*

[2] In the vicinity of this latter lake two caves have been discovered and explored for several rods underground. The caves and sinks in which the lakes are situated are evidently formed by the dissolving of the underlying rocks by the action of water.

[3] Named from James De Witt, who started a forge here at an early day.

[4] The principal manufactures are waterlime and plaster. The Orville navigable feeder of the Erie Canal and the S. B. & N. Y. R. R. afford ample facilities for transportation.

[5] Locally known as "Butternut Settlement."

[6] Among other early settlers were Daniel Keeler, Dr. Hollenbeck, Jeremiah Jackson, Stephen Arch, Stephen Hungerford, John Young, Jeremiah and James Gould, William Bands, Roger Merrill, Caleb Northrup, and Benjamin Southwell, all of whom located in the town between 1790 and 1800. The first child born was Sarah Morehouse, Feb. 16, 1790, and the first death was that of Egbert De Witt, May 30, 1795. Polly Hilbert taught the first school, in 1796. Benjamin Morehouse kept the first inn, in 1799, and Asa Danforth built the first sawmill, in 1792, and the first gristmill in 1796.

[8] In the W. part of the town, at the time of the first settlement were found the remains of three distinct fortifications: one was square, one quadrangular, and one circular. When first discovered, the embankments were 5 feet high, and upon one of them stood an oak tree 4 ft. in diameter. These works were each situated near a living spring of water. The remains of various articles found here seem to indicate that these fortifications were known to the French.

[9] The channel of this river at Jacks Reefs has been deepened by the State, for the purpose of draining the Cayuga marshes. The work was commenced in 1854 and finished in 18—, under the superintendence of Hon. George Geddes. More than 200,000 yards of rock cutting were removed, and the marshes were drained as far west as Muspuito Point. The cost was $1—,000. — years previous to this work a deep channel was excavated for a distance of — mi., near Oswego River, at an expense of about $100,000.

[10] Founded in 1839, by Nathan Munro, who left it an endowment of $20,000. The building—among the finest in the State—is of brick, faced with brownstone, and has accommodations for 200 pupils. The school is well sustained.

[11] The old elm tree under which Mr. Buck and family took shelter before their house was built is still standing, a little W. of the house of Col. John Munro. Among the other early settlers were Robert Fulton, James Strong, Col. Chandler, Dr. Packard. —— Potter, Jas Wescott, Wm. Stevens, Dr. John Frisbie, Zenas and Aaron Wright, Martin Pickner, Reynolds Covey, Isaac Smith, Jonathan Rowley, Jonathan Babcock, Moses Carpenter, Simeon Munro, Peter and John Brackett, and Joseph and Aaron Coleman. John Healy taught the first school, in 1801; Josiah Buck kept the first inn, in 1793; Wm. Stevens kept the first store and built the first sawmill, in 1797; and Isaac Strong the first gristmill, in 1798.

[12] The census reports 8 churches in town: 3 M. E., 2 Bap., Cong., Presb., and Prot. E.

[13] The town at first embraced the military townships of Fabius and Tully, each four miles square. The S. half of the township of Fabius was erected into the town of Truxton, and now constitutes the N. part of Truxton and Cuyler.

E. and W. borders flow N. into Limestone and Butternut Creeks. A small lake, known as "Labrador Pond," lies at the W. foot of South Hill. The soil is generally a fine quality of gravelly loam, intermixed in places with clay and sand. Along the stream W. of Fabius Village is considerable swamp land. From its elevation, and the broken character of its surface, this town is best adapted to pasturage. Dairying is the principal occupation of the people; and in the amount of dairy products it is the first town in the co. and among the first in the State.[1] **Fabius**[2] (p. v.) is situated on a small stream, N. E. of the center of the town. Pop. 172. **Apulia** (p. v.) is a station of the S. B. & N. Y. R. R., in the W. part of the town. Pop. 140. **Gooseville** is a hamlet, in the N. E. corner. The first settlers were Josiah Moore and Timothy Jerome, from Stockbridge, Mass., who came in 1794.[3] The first church (Presb.) was formed at Apulia in 1804; and the first pastor was Rev. Mr. Osborne. The first church edifice erected was a Bap., at Fabius Village, in 1806.[4]

GEDDES[5]—was formed from Salina, March 18, 1848. It lies upon the W. bank of Onondaga Lake, a little N. of the center of the co. Its surface is level in the N. and rolling in the S. In the S. E. part are several isolated, rounded drift hills, or knolls. Seneca River forms the N. boundary, and Onondaga Creek a part of the E. Nine Mile Creek flows E. through near the center. The soil is a clayey and sandy loam. Near the S. W. extremity of the lake are several salt wells.[6] The New York State Asylum for Idiots is in the E. part, near the line of Syracuse; and the S. B. & N. Y. R. R. coal depot is on the canal. In the S. E. part are extensive stone quarries. **Geddes,** (p. v.,) in the S. E. part, was incorp. April 20, 1872. It contains 2 churches, a brewery and distillery, and a large number of salt works. Pop. 950. The first settlement was commenced by James Geddes, in 1794.[7] The census reports 2 churches; Prot. E. and M. E.

LA FAYETTE—was formed from Pompey and Onondaga, April 15, 1825. It is an interior town, lying S. E. of the center of the co. Its surface is hilly and broken. Butternut Creek flows N. through the E. part, and Onondaga Creek through the W. The high ridge between the valleys of these streams has steep declivities, and its summit is 300 to 600 ft. high. Conklings Brook, in the S. E. part, flows from the E., and within the space of 1 mile it descends 500 ft. The soil is generally a sandy and gravelly loam; and a portion is thickly covered with large, waterworn pebbles. About one-half of the Onondaga Indian Reservation lies in the N. W. corner of this town. **La Fayette,** (p. v.,) on the ridge near the center of the town, contains 1 church and 35 houses; and **Cardiff,** (p. v.,) on Onondaga Creek, a church and 25 houses. **Linn** is a p. o. in the S. E. part. The first settler was John Wilcox, who located upon Lot 14 in 1791.[8] The first church (Cong.) was formed in Oct. 1809; Rev. Benj. Bell was the first preacher. There are 2 churches in town; Cong. and M. E.

LYSANDER—was formed March 5, 1794. Hannibal (Oswego co.) was taken off in 1806, and Cicero in 1807. It is the N. W. corner town in the co. Its surface is level and somewhat swampy in the E., and gently rolling in the W. Seneca River forms its S. and E. boundaries. This stream takes the name of Oswego River, below the mouth of the outlet of Oneida Lake. In the S. W. part is a slight fall in the river, known as Jacks Rifts. At Baldwinsville is a fall of 7 ft., affording a valuable water-power. Mud Lake, a large pond S. W. of the center, covers an area of about 300 acres. The soil is a sandy and gravelly loam, with occasional patches of clay, formed by the disintegration of the red shales. **Baldwinsville,** (p. v.,) on Seneca River, was incorp. in 1848. It contains a union school, a scythe factory, ax factory, tannery, several extensive

Pop. 1,675,—of which 1,115 are in this town and 560 in Van Buren. **Betts Corners** (Lysander p. o.) contains 3 churches and 35 houses; **Little Utica,** 1 church and 30 houses; **Plainville** (p. v.) a church and 218 inhabitants; and **Jacksonville** (Polkville p. o.) a church and 25 houses. **Lamsons** (p. o) is a R. R. station. The first settler within the present limits of the town was Jonathan Palmer, a Revolutionary soldier, who drew Lot 36, and located upon it in 1793.[1] The first church (Presb.) was formed in 1813.[2]

MANLIUS—was formed March 5, 1794. A part of Onondaga was taken off in 1798, a part of Salina in 1809, and De Witt in 1835. It lies on the E. border of the co., N. of the center. The surface of the N. half is level, and that of the S. half rolling and hilly. Limestone Creek flows N. through near the center of the town, and at the northern extremity it receives Butternut Creek from the W., and the two united streams flow into Chittenango Creek, which latter stream forms the N. E. boundary of the town. A few rods S. of the canal, near the center, are two small lakes, similar in character to those already described in De Witt, but somewhat larger. They are known as the "Green Lakes." In the S. W. corner of the town is another small pond of the same kind.[3] The E. branch of Limestone Creek, near the S. border of the town, falls down a limestone precipice 100 ft., forming a beautiful cascade. Several sulphur and other mineral springs are found in town, but none of any considerable note.[4] In the W. part are extensive quarries, from which are obtained immense quantities of waterlime, quicklime and gypsum. The soil is a deep, fertile alluvium in the N., and a sandy and clayey loam in the S. **Manlius,** (p. v.,) on Limestone Creek, near the S. line of the town, was incorp. March 12, 1813. It contains the Manlius Academy, a union school, 4 churches, 2 carriage factories, 2 flouring mills, an ax factory, 2 foundries, and a paper mill. Pop. 934. **Fayetteville,** (p. v.,) on Limestone Creek, 2 mi. N. W. from Manlius, and 1 mi. from the Erie Canal, with which it is connected by a navigable feeder, was incorp. May 6, 1844. It is finely situated on a gentle elevation, and has a number of valuable water-privileges.[5] It contains 4 churches, a union school, a bank, 2 large flouring mills, 3 sawmills, 1 pearl barley mill, 1 paper mill, 1 sash blind and door factory, 3 lime and plaster mills, 1 tannery, 1 foundery and machine shop, 1 wheelbarrow factory and 1 cradle factory, 5 carriage factories, and several large establishments for the manufacture of lime, plaster, and waterlime.[6] Pop. in 1859, 1 376. **Manlius Center** (p. v.) is a canal village, containing 40 houses. **Manlius Station** (p. v., and **Kirkville** (p. v.) are small villages and stations upon the Central R. R. **High Bridge,** in the S. W. part, contains a church, 2 plaster and lime mills, a sawmill, gristmill, and 20 houses.[7] **Matthews Mills,** (North Manlius p. o.,) **Eagle Village,** and **Hartsville** are hamlets. The first settlers were David Tripp, who located 1 mi. N. W. of the present site of Manlius Village, and James Foster, who located on the present site of Eagle Village, in 1790.[8] The first church (Prot. E.) was formed in 1798; Rev. Mr. Nash was the first preacher.[9]

MARCELLUS—was formed March 5, 1794. A part of Onondaga was taken off in 1798; Camillus in 1799; a part of Otisco in 1806; and Skaneateles in 1830. A part of Sempronius

[1] Among the other settlers were Benj. De Puy, Reuben Smith, Adam Limerick, Elijah and Solomon Toll, Thomas Farrington, Elijah Mann, John McHarrie, Wm. Lindsay, Ebenezer Wells, James Cowan, Abner and Manly Vickery, Job Loms, and Dr. Jonas C. Baldwin. Dr Baldwin was the early proprietor and founder of Baldwinsville. He built the first saw and grist mills in 1807; and opened the first store, during the same year. By his energy, the place soon became an important manufacturing village. Daniel Ayers kept the first inn. The first child born was John Toll.

[2] The census reports 9 churches in town: 4 M. E., 2 Presb., Bap., Ref. Prot. D., and Christian.

[3] Among the hills are several other deep chasms, but they do not contain water. Some of them are filled with ice during the winter, and thus become natural icehouses during the greater part of the summer. The nature and origin of these remarkable depressions have given rise to many speculations and theories on the part of geologists and other men of science.

[4] Deep Spring, called by the Indians Teeu-ghse-at-ya-gh, is a spring 60 ft. in diameter, on the E. line of the town, near the old Seneca Turnpike.

[5] These are formed by the Ledyard Canal—which was built by the citizens at a cost of $50,000, and Bishop Brook. The Ledyard Canal is formed by diverting the waters of Limestone Creek 2 mi. S. of the village, and that, in connection with Bishop Brook, which runs parallel to it through the village, make 12 water powers, with an average fall of 20 ft. each.

[6] During the year ending Jan. 1, 1860, 1,594 tons of limestone for the manufacture of quicklime, 993 tons of building stone, 10,298 tons of stone plaster, 3,216 tons of ground plaster, 50,450 barrels of waterlime, and 50,410 bush. of quicklime were sold in the village of Fayetteville.

[7] An extensive water power is formed at this place by the construction of a hydraulic canal from Limestone Creek and another from a brook flowing from the E. This power is used in all the manufactories in the village, and but a small portion of it is occupied.

[8] Among the other early settlers were Joshua Knowlton and Orgen Eaton, on the site of Fayetteville, in 1791; Conrad Lem, Cyrus Kinne, and John A Shaeffer, in 1792; and Caleb Foster, Capt. Joseph Williams, Wm. Ward, Col. Elijah Phillips, Charles Mulholland, Charles Moseley, Dr. Stuyvesant, Alvan Marsh, and Dr. Ward, all of whom came previous to 1800. The first child born was Baron Steuben Shaeffer, in 1794. It is said that on the night of his birth Baron Steuben and a party of friends got up at Mr. Shaeffer's, who then kept an inn on the present site of Manlius. The Baron was much disturbed during the night, and in the morning severely reprimanded Mr. S. for allowing his guests to be so annoyed that they could not sleep. Upon seeing the inkand, he apologized for his conduct, in a comical manner, bestowed his own name upon the child, and gave him a deed of 250 acres of land. The first marriage was that of Nicholas Phillips and Katy Garbeck, Jan. 14, 1795, and the first death that of the father of David Tripp, in 1792. Samuel Edwards taught the first school, in James Foster's barn. James Foster kept the first inn, in 1790; Charles Moseley the first store, in 1793. Elijah Phillips and three others built the first sawmill, in 17 2 93, and Wm. Ward the first gristmill, in 17 4.

[9] The census reports 15 churches in town; 6 M. E., 2 Bap., 2 Prot. E., 2 Presb., Meth. Prot., Wes. Meth., R. C., and Union.

(Cayuga co.) was annexed in 1804, and a part of Spafford in 1849. It is an interior township, lying s. w. of the center of the co. Its surface is a rolling upland, broken by the deep valley of Nine Mile Creek, which extends N. and S. through the center. The declivities which border upon the creek are steep, and 200 to 500 ft. high. Upon the creek are several falls, furnishing a large amount of water-power. Lime and plaster both abound. The soil is generally a deep, black loam, formed by the decomposition of the Marcellus shales, intermixed to some extent with clay. Manufacturing is carried on to a limited extent along Nine Mile Creek. **Marcellus.** (p. v.) on the creek, near the center of the town, was incorp. April 29, 1853; it contains 4 churches, a woolen factory, and grist mill. Pop. 380. **Marcellus Falls** (p. v.) contains a grist-mill, saw-mill, and 2 paper mills. Pop. 200. **Marietta,** (p. v.) upon Nine Mile Creek, in the s. part, contains 30 houses. **Clintonville** is a hamlet. **Thorn Hill** (p. o.) is a hamlet in the s. w. part. The first settler was Wm. Cobb, who located on the E. hill in 1794.[1] The first church edifice (Union) was built in 1803; Rev. —— Atwater was the first preacher.[2]

ONONDAGA—was formed from Marcellus, Pompey, and Manlius, March 9, 1798. A part of Salina was taken off in 1809, and a part of Camillus in 1834. The surface is mostly a rolling and hilly upland, separated into two ridges by the valley of Onondaga Creek. The E. ridge is rocky and broken, and the W. is generally smooth and rolling. A fine, wide intervale extends along the creek, and is bordered by steep hillsides, the summits of which are 200 to 400 ft. high. A valley, forming a natural pass between Onondaga and Nine Mile Creeks, extends S. W. through the town. Along the N. line the highlands W. of the valley descend abruptly to the N., presenting in some places the face of a nearly perpendicular precipice 100 to 150 ft. high. This declivity is known as Split Rock. Upon these cliffs is an outcrop of Onondaga limestone, which is extensively quarried for building purposes.[3] The Split Rock stone quarry is near the N. W. corner. The soil in the valley is a sandy and gravelly loam, and on the uplands a gravelly and clayey loam. Lime and waterlime are both largely manufactured. About one-half of the Onondaga Indian Reservation lies in the S. E. part of this town. **Onondaga Hill,**[4] (Onondaga p. o.) on the hill W. of the creek, contains a church and 53 dwellings. **Onondaga Valley** (p. v.) contains 2 churches and the Onondaga Academy. Pop. 385. **South Onondaga** (p. v.) contains 2 churches, several mills, and a population of 290. **Navarino,** (p. v.) in the S. W. corner, near the Line of Marcellus, contains a church and 115 inhabitants. **Onondaga Castle** is a p. o. near the Indian Reservation. **Howlet Hill** is a p. o. in the N. W. corner; and **West Onondaga** a p. o. near the W. line. The first white man who lived in this town and vicinity was Ephraim Webster,[5] an Indian trader. The first permanent settlers were Asa Danforth,[6] his son Asa, from Mass., and Comfort Tyler, a young man who accompanied him, all of whom located upon a lot a little S. of Onondaga Hollow. This was the first settlement made in the co.[7] Rev. Samuel Kirkland, a

They were rapidly followed with settlers, principally from Mass. The first child born was Orlando, son of Wm. Cobb. Miss Asenath Lawrence taught the first school in the summer of 1795. Dea. Samuel Bloss kept the first inn, in 1796. Jonathan Bloss the first store, in 1796. Dan Bradley and Samuel Lee built the first sawmill in 1794-95, and May & Styles the first grist-mill in 1800.

OTISCO—was formed from Pompey, Marcellus, and Tully, March 21, 1806. It is an interior town, lying s. w. of the center of the co. Its surface is principally occupied by the high ridge between the valleys of Onondaga Creek and Otisco Lake. The declivities of the hills are generally steep and the summits rolling, and elevated 800 to 1,000 ft. above the valleys and 1,600 to 1,700 above tide. Otisco Lake is 772 ft. above tide. It lies upon the w. border of the town, in a valley 1,000 ft. below the summits of the hills. Bear Mountain,[2] in the N. W. part, overhanging the valley of Onondaga Creek, is one of the principal elevations. The soil is generally a sandy or gravelly loam, mixed with clay, and well adapted to grazing. **Otisco,** (p. v.,) situated upon the high ridge near the center of the town, contains 30 houses; and **Amber,** (p. v.,) at the foot of Otisco Lake, 25. **Maple Grove** is a p. o. in the N. E. corner. The first settler was Chauncey Rust, from Northampton, Mass., who moved his family from La Fayette in April, 1801. During this year and the following, a large number of settlers arrived, principally from Mass. and Conn. and the whole town filled up rapidly.[3] The first religious service was a prayer meeting, held in Sept. 1801, at the house of —— Rust. The first church (Cong.) was formed May 9, 1805, by Rev. Hugh Wallace. There are now two churches in town; Cong. and M. E. This town is noted for being the birthplace and residence of several persons of distinguished literary reputation.[4]

POMPEY[5] —was formed in Jan. 1789. Fabius and a part of Onondaga were taken off in 1798; and La Fayette in 1825. It lies upon the E. border of the co., S. of the center. Its surface is principally occupied by the high, rolling ridge which lies between the E. branch of Limestone Creek and Butternut Creek. The highest summit is 906 ft. above the surface of Butternut Creek, near the La Fayette R. R. station, 1,343 ft. above the canal at Syracuse and 1,743 ft. above tide. The general ridge is subdivided into 3 ridges by the valleys of the 2 W. branches of Limestone Creek. These valleys are 200 to 300 ft. below the summits and are bordered by steep hillsides. The streams that drain the S. part of the town flow in a southerly direction. Pratts Falls, upon the W. branch of Limestone Creek, are 137 ft. high; and within a few rods of them are several other fine cascades. Near the N. line, upon the same creek, is a cascade of 70 ft. Just E. of the co. line, near Delphi, on the E. branch of the same stream, are 2 other fine cascades. Carpenters Pond, in the S. E. part, covers an area of about 30 acres. The soil is a strong, clayey loam. **Pompey Hill,** (Pompey p. o.,) on the summit of the ridge,[6] contains 5 churches and the Pompey Academy. Pop. 270. **Delphi,** (p. v.,) upon Limestone Creek, in the S. E. corner, contains 3 churches and 219 inhabitants. **Watervale,** (p. v.,) upon Limestone Creek, N. of the center, contains a grist and saw mill and 20 houses. **Oran,** (p. v.,) in the N. E. corner, contains a church and 82 inhabitants. **Pompey Center**[7] (p. o.) is a hamlet. In the S. E. corner, above Delphi, are an edge tool factory, and a woolen mill not in operation. The first settler was Ebenezer Butler, who located on Lot 65 in 1792.[8] The first church (Presb.) was formed in 1794; the first preacher

wood, and in a short time died of grief. The first child born was Amanda Danforth, daughter of Asa Danforth, Jr., Oct. 14, 1789. Dr. Gordon Needham taught the first school, in 1795; Comfort Tyler kept the first inn; George Kibbe the first store; Gen. Danforth built the first gristmill, in 1794; and Turner Fenner the first sawmill, in 1793.

[1] The census reports 11 churches; 5 M. E., 2 Presb., Cong., Bap., Wes. Meth., and Union.

[2] Named from the great number of bears that infested it when the country was first settled.

[3] Among the first settlers were Jonathan B. Nichols, Charles and Benoni Merriman, Solomon Judd and Lemon Gaylord in 1801, Otis Baker, Noah Parsons, Nathaniel Loomis Ames and Jesse Cowles in 1802; and Benjamin Cowles, Josiah Clark, Daniel Bennett, Elias and Jared Thayer, Henry Pethupe, Samuel, Ebenezer and Luther French, Jared and Noah Parsons, and Rufus Clapp, soon after. Lucy Cowles (afterward wife of Rev. Geo. Colton), taught the first school, in 1802. The first child born was Timothy Rust, March 22, 1802; and the first death, that of Nathaniel Dady jr., killed by the fall of a tree, July 19, 1802. Daniel Bennett kept the first inn, in 1802, and Michael Johnson the first store, in 1808. Charles Merriman built the first gristmill, in 1806.

[4] Willis Gaylord, widely known as the editor of the Genesee Farmer and Albany Cultivator, and as a refined and graceful contributor to the light literature of the day, came into town with his father, from Bristol, Conn., in 1801. He was then 9 years old; and he resided here until a few years before his death, which occurred in 1844. Willis and Lewis Gaylord Clark, twin brothers, were born in this town in April, 1808. The former is known as a poet, the author of "Lillipod rum," and as the editor of the Philadelphia Gazette, and the latter has obtained a national reputation as the editor of the Knickerbocker Magazine, a position which he has held for the last 25 years. Willis died in 1841. Their father was Ebenezer Clark, an officer in the Revolution, and their mother was sister to Willis Gaylord. Rev. Geo. Colton, father of Owen Colton, author of a series of Greek text books, and of Geo. H. Colton, founder and editor of the American Review, was many years a resident of the town.

[5] Named by the Indians Otegegajacke, "a place of much grass, openness or prairies." Another name given to this locality, not often repeated, and about which there is much speculation, as to sense, is Otequehsadhecha, "the field of blood, or bloody ground, a place where many have been slain." It has been said that no Indian ever visits this neighborhood. They certainly dislike to converse much about it. — *Clark's Onondaga, Vol. II.*, p. 25.

[6] Water from one side of the roof of the hotel at this place finds its way into the St. Lawrence, and from the other into Chesapeake Bay.

[7] Locally known as "Greens Corners."

[8] Moses Blower and Moses Savage came in the same year. Among the early settlers upon the hills were Artemus Bishop, Josiah Hallenbeck, Timothy Sweet, John and Samuel Jerome, Joseph Smith, Jesse Butler, Dr. Deodatus Clarke, Jacob Hare, Jas. Olcott, Trueworthy Cook, Selah Cook, Noadiah and Ephraim Olcott, Dr. Samuel Beach, and family names of Hinsdale, Hibbard, Messenger, Western, and Daniel Allen. The first settlers in the hollow were Samuel Dupuy, James McUne, Wm. Cook, Ozias Burr, Elihu Babcock, John Lamb, Daniel Thomas, —— Savage, David Hubbard, Wm. Shankland, and David Sweet. The first child born was Sally Hoar, about 1794; the first male child born was Orange Butler, the first marriage was that of Zechariah Knapp and Diadema Barnes, and the first death, that of Mrs. Jas. Cravath. Samuel Clement taught the first school in the town and co., on Lot 28, in 1794. Ebenezer Butler kept the first inn, in 1792. Henry Seymour the first store;

was Rev. Mr. Robbins, a missionary from Conn.[1] Several eminent personages, distinguished in the fields of politics, literature, and art, were natives of this town, prominent among whom are Sarah J. Clarke, (now Mrs. Sara J. Lippincott, better known as "Grace Greenwood,") Ex-Gov. Horatio Seymour, Charles Mason, late Commissioner of Patents, and Erastus D. Palmer, the sculptor.

SALINA—was formed from Manlius and Onondaga, March 27, 1809. Syracuse and Geddes were taken off March 18, 1848. It lies upon the E. bank of Onondaga Lake, N. of the center of the co. Its surface is level or gently undulating. Mud Creek, in the S. E. part, and its tributary, Bear Trap Creek, are the only streams. Along their course is a considerable amount of swamp land. The soil is principally a sandy loam, with occasional intervales of tough clay. The people are largely engaged in the manufacture of salt. Tobacco is cultivated to some extent. **Liverpool,** (p. v.,) upon the E. bank of Onondaga Lake, on the W. line of the town, was incorp. April 20, 1830. It contains 4 churches, a union school, a steam saw and stave mill, and a large number of salt works. Pop. 1,305. The first settlement was made at Liverpool, in 1795, by John Danforth and 3 sons, from Worcester co., Mass.[2] There are 4 churches in town.[3]

SKANEATELES[4]—was formed from Marcellus, Feb. 26, 1830. A part of Spafford was annexed in 1840. It is the S. town on the W. line of the co. The surface is rolling or moderately hilly. Skaneateles Lake divides the S. half of the town into two nearly equal parts. From the lake the land slopes beautifully upward to a height of 200 to 500 ft. The highlands upon both borders overlooking the lake furnish a great number of sites for country residences, which, in beauty of situation, have no superiors in the State. Many of these are occupied by fine cottages and villas. Skaneateles Outlet, flowing N., is the principal stream. Upon it are numerous falls, furnishing an abundance of water-power.[5] The soil is principally a clay loam. **Skaneateles,**[6] (p. v.,) beautifully located at the foot of the lake, was incorp. April 19, 1833. It contains 6 churches, a union school, and 3 carriage manufactories. Pop. 1,200. **Mottville,** (p. v.,) on Skaneateles Outlet, contains 1 church, 2 machine shops, a foundery, chair factory, fork factory, and gristmill. Pop. 250. **Mandana,** (p. v.,) on the W. bank of the lake, in the S. part of the town, contains 15 dwellings. **Kelloggs Mills,** a hamlet 1½ mi. N. of Skaneateles, contains a woolen factory which employs 125 hands. The first settler was John Thompson, a Scotchman, who located upon Lot 18 in 1793.[7] The first church edifice (Cong.) was erected in 1807; Rev. Aaron Bascom was the first pastor.[8]

SPAFFORD[9]—was formed from Tully, April 8, 1841. Parts of Marcellus and Skaneateles were taken off in 1840. It lies upon the E. bank of Skaneateles Lake, and is the W. town on the S. line of the co. Its surface consists principally of a high ridge between Skaneateles and Otisco Lakes, abruptly descending to the valleys on each side and gradually declining toward the N. The highest summit, Ripley Hill, is 1,122 ft. above Skaneateles Lake and 1,982 ft. above tide. Otisco Inlet is a small stream flowing through the valley which extends S. from Otisco Lake. The soil is a sandy and gravelly loam. **Borodino,** (p. v.,) in the N. part of the town, contains a population of 202. **Spafford,** (p. v.,) near the center, contains 2 churches and 30 houses. **Spafford Hollow** is a p. o. The first settlers were Gilbert Palmer and his son John, who located on Lot 76 in 1794.[10] The first church (M. E.) was formed at an early day; Elder Harmon was the first preacher.[11]

Pratt & Smith built the first sawmill in 179-, and the first gristmill, in 1798. Dr. Hezekiah Clark was the first settled physician. He served 2 years as a surgeon in the Rev. John Mary Arnold's regiment of the Massachusetts Line in the war of 1[illegible]

1 The census reports 12 churches, 1 M. E., 3 Bap., Cong., Presb., Prot. E., Univ., and Disciples.

2 Asa Hascall, John Leger, and Patrick Bailey came in about the same time. The first marriage was that of Abram Shermerhorn and Betsey Danforth, in 1801. The first school was taught in a log house, about 1797, on a split block, which at that time contained 14 scholars, and the school was taught while the block was in operation. John Danforth kept the first inn, in 179-.

3 2 M. E., 2 Bap., 1 Cath., and 1 Presb.

4 Lake Skaneateles is said to signify "very long lake," and is a most appropriate and beautiful name. Its old Indian name was "Hanauttoo," or "Hanauto," meaning "water running through thick hemlocks."

5 A mile and a half above makes Skaneateles Lake 325 feet above tide. Between Skaneateles and Mottville are two large dams, between which are Mottville's woolen factory, a grist and saw mill, a paper mill, and a distillery.

6 The beautiful location of this village upon one of the finest lakes in the State, and near a favorite summer resort of people from the cities and from the South.

7 Among the other early settlers were —— Robinson, James Watson, Lovel Gates, Jonathan Hall, —— Wood, a Dr. [illegible], who came in 1796, Warren Hascall, James and Samuel Pratt, Dr. Matthias Ansley, Jonathan Andrews, John Leger, Moses [illegible], Briggs Nathan, Isaiah Nathan, Wm. J. Vandenburgh, Dr. Burchard, and families of the names of [illegible], who came in soon after. Elisha Cole, now living, (1859,) came in with his father in 1793. Capt. Wm. Thomas came in 1796; Hezekiah Earll and Samuel Greenman in 1797. The first child born was Richard P. Watson, June 1, 1796; and the first death, that of Nehemiah Earll, in 1808. James Porter kept the first inn; Richard Watson, Dr. [illegible], and James Porter built the first [illegible]. The first [illegible] Presb., Prot. E., and Univ.

8 Named from Horatio Gates Spafford, author of the first Gazetteer of New York.

9 Among the other early settlers were Jonathan Berry, Archibald Farr, Warren Knickerbocker, M. Harvey, Isaac Hall, Elisha Sabins, John Babcock, Peter Knapp, Samuel Smith, Otis and Moses Legg, Jethro Bailey, Elias Davis, Abel Amadon, Job Lewis, Daniel Tinkham, John Hullibut, Levi Foster, Benj. Horner, James and Cornelius Williamson, Benjamin Stanton, [illegible]. The first child born was Alvah Palmer; the first marriage, that of Elisha Freeman and Phebe Smith; and the first death, that of Benj. Chapman. Archibald Farr kept the first store, in 1809; Archibald [illegible] Josiah Walker built the first sawmill, in 1810.

SYRACUSE[1]—was incorp. as a village in the town of Salina, April 13, 1825, and as a city, Dec. 14, 1847. A portion was annexed to De Witt in 1858. It lies in a basin extending s. of the head of Onondaga Lake, and upon the ridges immediately E. A low portion, partly marshy, containing more than a square mi., lies upon the lake,[2] and is bordered by an abrupt declivity 10 to 30 ft. high. From the summit of this declivity the surface spreads out into an almost perfect flat, on which is built the greater part of the more thickly settled portions of the city. A ridge 100 to 200 ft. high extends through the E. part.[3] Upon the highlands that surround the city are some of the most beautiful sites for country residences to be found in the State. The city is located in the midst of a rich agricultural region, and near the center of the State.[4] The several canals and railroads that terminate at or pass through this city give to it important commercial advantages. Its local trade is very large. It is also largely engaged in manufactures, the principal of which are salt,[5] machinery, beer, and barrels.[6] A large trade is carried on with the surrounding country to supply the salt works with wood and barrels, and with Penn. to furnish them with coal. The city is supplied with water by the Syracuse Water Company, from springs and brooks which have their sources in the hills s. w. of the city.

The *City Hall* is a commodious edifice, on the s. side of the canal, fronting Washington St., and containing rooms for the officers of the city government.

The *Public Schools*, 13 in number, are under the charge of a Board of Education, consisting of 8 members, of whom 4 are elected annually. In 1858, 61 teachers were employed,—7 males and 54 females. The whole number of children, between the ages of 4 and 21, was 9,418, of whom 5,258, or 55 per cent., attended school during some portion of the year. The total expenses were $34,057.69. The number of volumes in the district libraries was 5,131.[7] The schools are graded, and have a classical department or High School. Few places have bestowed more attention upon common school education; and the schools now rank among the best in the State and country.

The *Onondaga County Orphan Asylum*, a city and county institution for the care of orphan and destitute children, is situated upon Fayette St., in the E. part of the city. It was incorp. April 10, 1845, and is supported by public appropriations and private donations. The children are well treated, and are amply provided with all the necessaries of life. A school is taught throughout the year. At a proper age the children are bound out in respectable families.

The *Syracuse Home Association*, incorp. in 1853, is an association of ladies for the purpose of systematically visiting the poor, and of furnishing a home for indigent and friendless females. It occupies a fine building upon E. Fayette St., and is in a flourishing condition.

The *New York State Asylum for Idiots* is located upon a beautiful site in Geddes, s. w. of the city, just outside of the city corporation. Its grounds contain 18 acres, lying upon an eminence overlooking the whole city. The building is a beautiful brick structure, in the Italian style of architecture, and is one of the best arranged and most convenient buildings of the kind ever constructed. It is under the superintendence of Dr. Hervey B. Wilbur. The average number of inmates is more than 100.[8]

[1] This city was known from 1806 to 1809 as "*Bogardus Corners*," from 1809 to 1812, as "*Milton*;" from 1812 to 1814, as "*South Salina*;" from 1814 to 1817, as "*Court Corners*;" from 1817 to 1820 as "*Corinth*," and from that time it has been known as Syracuse,—the name given it by John Wilkinson, the first postmaster. "*Salina*," now constituting the S. part of the city, was incorp. as a village March 12, 1824, and continued as an independent corporation until 1847, when it was merged in Syracuse. It was long familiarly known as "*Salt Point*." The eastern part of the city was formerly known as "*Lodi*."

[2] The salt springs are situated upon this marsh and its borders. Near the lake, upon the Liverpool road, is a very strong sulphur spring.

[3] This ridge is divided into two parts by the valley that in which the canal extends. Upon it, a short distance E. of the head of the lake, are large cavities in the earth commonly termed "salt holes." These holes are continually forming; and it not unfrequently happens that a tract of 20 ft. in diameter will suddenly fall to a depth of 10 to 30 ft. See p. 481.

[4] From its central location, the city is a favorite place for holding conventions, political, religious, civil, and miscellaneous. From this, it is often called "The City of Conventions," and sometimes "The City of Isms." It is also called "The Central City," and "The City of Salt."

[5] See pages 480, 481.

[6] Several founderies and machine shops give employment to about 200 hands. Greenway's Brewery manufactures annually 50,000 bbls. of beer, worth $350,000. There are 8 other breweries in the city, producing 500 to 5,000 bbls. each. Barrels for the salt trade are also manufactured in the city, giving employment to a large number of hands. The Central R. R. repair shops employ 150 hands, and about 150 more are engaged as engineers, brakemen, and track hands, belonging to this station. The city also contains large manufactories of agricultural implements, boots and shoes, furniture, stoves, hardware, silver ware, cigars, and a variety of other articles.

[7] The Central Library, kept in the City Hall is a well selected library for the use of the central schools of the city. It was founded in 1858, and contains 4,000 volumes.

[8] The building for this institution was erected in 1853-54, at a cost of about $70,000. The site and grounds were donated by inhabitants of Syracuse. The enterprise has been highly successful, and has fully demonstrated the utility and necessity of schools of this description. The institution has attained a wide reputation, and it now and probably ranks among the best of the kind in the world. The school was first established at Albany, in 1848, by its present supt., as a private institution. It was adopted by the State and was continued several years at Albany, but was removed to this place on completion of the buildings, in 1854.

The *Franklin Institute*, a literary association, was incorp. under the general law, [illegible], has a fine library and reading room in Wieting Block, S. Salina St., and [illegible] course of lectures during the winter. The number of volumes in the library is about 3,000.

Syracuse Post Office is situated near the center of the old village of Syracuse, at the [illegible] Canal. *Salina Post Office* is situated in the old village of Salina, near the Oswego Canal.

The *Library of the Court of Appeals* was formed by act of Legislature, April 9, 1849. It occupies rooms in the courthouse, and contains 4,500 volumes.

The *Office of the Superintendent of the Salt Springs*, on N. Salina St., is a fine building of stone.

The *State Armory* is a fine building, in Regimental Park, near Onondaga Creek. It was built in 1858, from a design by H. N. White.

The city also contains a Commercial College, 2 private seminaries, a classical school, a boarding school for boys, a large number of Masonic, Odd Fellows, and [illegible] Societies, a Bible Society, a Fugitive Aid Society, a Musical Institute, a German Turn[illegible], 11 banks of issue, 2 savings banks, 28 churches,[1] and a large number of beautiful and costly private residences. Its hotels and public halls rank among the best in the State.

The first settlement in the city and co. was made by Ephraim Webster, an Indian trader, who located near the mouth of Onondaga Creek in 1787. In 1788 or 1789 John Danforth, who came into the co. soon after his brother Asa, located at "*Salt Point*" and commenced the manufacture of salt.[2] The settlement at this place increased with great rapidity, in consequence of the prospective value of the salt springs. It took the name of "*Salina*," and speedily became the most important place in the co.,—a superiority which it maintained for many years. The first settlers within the limits of the old village of Syracuse, after Webster, the Indian trader, were —— Hopkins, in 1797, and —— Butler, in 1799. Calvin Jackson settled in 1800, and several others before 1805.[3] The ground being low and marshy, the settlement did not progress rapidly for many years. The first great impulse to its growth was given by the location of the canal in 1817 and its completion in 1825. In 1829, when the courthouse was removed from Onondaga Hill, Salina and Syracuse were nearly equal in population, and the courthouse was placed about midway between the two villages. Since that time, however, the growth of Syracuse has been rapid and nearly uniform. In 1847 it completely absorbed its old rival, Salina, the two villages and Lodi at that time being incorp. and forming the city of Syracuse. The business prosperity of the place has been based principally upon the salt interests and its commercial advantages. The most notable incidents of the later history of the city are the great gunpowder explosion of Aug. 2, 1841,[4] and the rescue of the slave Jerry from the custody of the U. S. Marshal, Oct. 1, 1851.[5]

TULLY—was formed from Fabius, April 4, 1803. A part of Otisco was taken off in 1806, and Spafford in 1811. It is the center town upon the s. line of the co. Its surface is an upland, level in the center, but hilly on the E. and W. borders. In the S. part of the central valley are several small lakes, known as the Tully Lakes. Two of these lakes lie but a few rods apart. The smaller, just 800 ft. above the canal at Syracuse, gives rise to Onondaga Creek, flowing N.; and the larger, 4 ft. lower, gives rise to Tioughnioga River, flowing S. In the immediate vicinity of these lakes is considerable swamp land. The soil is a sandy and clayey loam. **Tully**, (p. v.,) in the S. E. part of the town, contains 2 churches and 216 inhabitants; and **Vesper**, (p. v.,) on the line of Otisco, 2 churches and 25 houses. **Tully Valley** is a p. o. The first [illegible] Daniel

[2] In Aug. 1790 Col. Jeremiah Gould and family, consisting of a wife, three sons, and a daughter, moved to Salt Point, and found there Ebenezer and Nathaniel Loomis, Elizur Goodrich, Obadiah Danforth, Asa Danforth, jr., and Thomas Gosten. In 1791 two families moved to Wadsworth and Stanwix came in, and Messrs. Lord, Isaac Van Vleck, and Hardy. Among the other early settlers were Thomas Comstock, Simon Phelps, Derrick Brevoort, Wm. Gridley, James Platt, Aaron Bellows, Hiram Alvord, Richard Sweeting, and Dr. Gideon Alvord. The first child born was Abraham Van Vleck, in 1792; the first marriage was that of Hiram Gridley and Katherine Van Derwerker, in 1795; and the first death, that of an infant child of —— Thompson, in 1794. Dr. Burnet, the first physician, died the same year. The provisions for the first settlers were brought from Tioga, by way of Cayuga Lake, and from Herkimer, by way of Oneida Lake. In 1795, 30 of the 70 inhabitants of the village were sick,—the 3 well ones, with the help of the Indians, taking care of the sick for 2 months. In 1794, out of a population of 63 persons 27 died. The first regular merchant was Wm. Gilchrist, about 1795; though Isaac Van Vleck had for several years previous traded [illegible] last [illegible], in 179[illegible]. VAN BUREN—was formed from Camillus, March 26, 1829. It is an interior town, lying N. W. of the center of the co. Its surface is level or gently undulating. Seneca River forms its N. boundary; along its course is considerable swamp land. The soil is a clayey, sandy, and gravelly loam. **Canton,** (Canal p. o.,) on the Erie Canal, in the S. W. corner of the town, contains a church and 188 inhabitants; **Van Buren Center,** (p. v.; Warners Station on the N. Y. C. R. R.,) near the S. line, a church and 16 dwellings. **Van Buren** (p. o.) and **Ionia** are hamlets. **Baldwinsville**, (p. v.,) on Seneca River, is on the line of Lysander. The first settler was Joseph Wilson, who located in town in 1792.[3] The first church (Presb.) was formed in 1803; Rev. S. B. Barns was the first preacher.[4]

ONTARIO COUNTY.

This county was formed from Montgomery, Jan. 27, 1789. It was named from Lake Ontario, which originally formed its N. boundary. Steuben co. was taken off in 1796, Genesee in 1802, parts of Monroe and Livingston in 1821, and Yates and a part of Wayne in 1823. A strip was annexed from Montgomery co., W. of Seneca Lake, Feb. 16, 1791, and a small tract in the bed of Crooked Lake, from Steuben, Feb. 25, 1814. It is centrally distant 180. mi. from Albany, and contains an area of 640. sq. mi. It lies upon the extreme N. declivities of the central Alleghany Mt. Range, and has a northerly inclination, the summits of the S. hills being elevated about 1000 feet above the general level of the N. portions of the co. The S. portion, lying W. of Canandaigua Lake, is a hilly and broken region, divided into ridges with steep declivities and summits 1,600 to 1,700 feet above tide. The ridges all have a general N. and S. direction, declining toward the N., and terminating in a beautifully rolling region, which embraces all of the co. E. of Canandaigua Lake, and that portion lying W. of the lake and N. of the N. line of Bristol. The ridges in this section gradually rise to a height of 20 to 250 feet above the valleys, and give to the land sufficient inclination for thorough drainage. A terrace with declivities 100 to 250 feet high, descending toward the N., extends through the N. portions of East and West Bloomfield and the S. part of Victor, at right angles to the general range of the ridges. The extreme N. parts of the co. are occupied by drift ridges similar to those in Wayne and Seneca cos.

The geological formation of this co. is nearly the same as that of the cos. lying E. of it in the same latitude. The lowest rocks, occupying the N. parts of Phelps, Manchester, Farmington, and Victor, belong to the Onondaga salt group. The gypsum of this group crops out along the banks of the streams, and is extensively quarried along the Canandaigua Outlet, in Phelps and Manchester, and upon Mud Creek, in Victor. The water limestone, next above, crops out in Phelps, Manchester, and Victor, and is quarried for waterlime and building stone. The Onondaga and corniferous limestones next appear, and are quarried for building stone in Phelps. The Marcellus and Hamilton shales occupy all the central portions of the co. S. of the foot of Canandaigua Lake; and next above them successively appear the Tully limestone, Genesee slate, and the Portage group, the last occupying South Bristol, Canadice, and Naples. This last group furnishes a sandstone used for flagging and building. Except in the extreme S. parts of the co., the underlying rocks have little influence upon the soil, as nearly the whole surface is covered deeply with drift deposits, consisting of sand, clay, and gravel, intermixed with the disintegrated limestone and gypsum evidently deposited by some great torrent that once swept across the co. in a N. direction. The rocks are seen at some points along the banks of the lakes and the courses of the streams. In Bristol are several springs of carburetted hydrogen gas emanating from the strata of Genesee slate.[1]

The co. is drained by the Honeoye Outlet, a tributary of the Genesee River, and by the Canandaigua Outlet and Mud Creek, tributaries of the Clyde River. Honeoye Outlet receives as tributaries Egypt Brook and the outlets of Hemlock and Canadice Lakes;[2] Mud Creek receives Beaver, Fish, and Hog Hollow Creeks; and Canandaigua Outlet receives Fall and Flint Creeks. Besides these, Irondequoit Creek flows through the N. W. corner of the co. Keshong Creek and Buttermilk and Castle Brooks flow into Seneca Lake. Several of the beautiful lakes which form the most peculiar and interesting feature of the landscape for which Central New York is celebrated lie partly or wholly in this co. Seneca, forming a portion of the E. boundary, is described under Seneca co.[3] Canandaigua Lake lies almost wholly within the limits of the co. The shores are beautifully sloping down to the very edge of the water, except near the head of the lake, where they rise in steep bluffs to a height of 300 to 800 feet. Its surface is 668 feet above tide.

1 The principal of these gas springs are in Bristol Hill (W. part) and found on the outlet of the lakes, but the principal ones at Clifton.

2 Hemlock Outlet, called by the Indians Onea-a-quenyang, connecting both Lakes; Canandaigua Lake within 3 mi. of the village. Hemlock.

3 See p. 613.

Honeoye,[1] Canadice,[2] and Hemlock Lakes are smaller bodies of water, and are each surrounded by bluffs and hills rising to a height of 500 to 700 feet above them.

The soil for the most part consists of clayey, sandy, and gravelly loam, formed from the drift deposits. In the valleys and the rolling region which extends through the central and N. parts of the co. the loam is very deep and rich, forming one of the finest agricultural regions in the State. Upon the hills in the S. part of the co. the soil is made up principally of disintegrated shale and slate, forming a fine, fertile grazing region. Upon the drift hills in the W. are some small sections covered with a deep, light sand, moderately productive.

The geographical and geological features of this co. render it eminently adapted to the various branches of agriculture; and few cos. in the State excel this in the progress of scientific improvement as applied to agricultural operations. Wheat was for many years the staple crop; but of late more attention has been given to the production of the coarser grains, to stock growing, and the cultivation of fruits. Wool growing has also received considerable attention, and the fine Merino sheep were introduced at an early period. The manufactures are mainly of a domestic character, such as pertain to agricultural districts.

The county seat is located at Canandaigua, at the foot of Canandaigua Lake. A courthouse, jail, and co. clerk's office were erected here in 1793, soon after the organization of the co.[3] In 1825 a new courthouse was built; and in 1858 a splendid edifice was erected at the joint expense of the co. and of the U. S. Government, containing a U. S. and co. courtroom, jury and supervisors' rooms, U. S. district clerk's and co. clerk's offices, surrogate's office, and P. office. The building is of brick, with iron and tile floors, and is entirely fireproof. The poorhouse is located upon a farm of 212 acres in Hopewell, 4 mi. E. of Canandaigua. It is built of brick, and contains ample accommodations. The average number of inmates is 136, supported at a weekly cost of 57 cts. each. The farm yields a revenue of $4,000. A school is taught during the whole year.[4] The general management and sanitary arrangements of this establishment are creditable to the co.

The principal works of internal improvement in the co. are the Erie Canal, which enters the extreme N. E. corner of Manchester, the N. Y. C. R. R., extending through the N. and central portions of the co., the Canandaigua & Niagara Bridge R. R., a branch of the Central, extending W from Canandaigua to Tonawanda, and the Elmira, Jefferson & Canandaigua R. R., extending S. E. and connecting with the N. Y. & E. R. R. at Elmira. Besides these, there are several lines of plank road in the co.; but most of them have been abandoned.

Seven newspapers were published in the co. in 1855.[5]

[3] The first Circuit Court was held at the inn of Mr. Patterson, in Geneva, in June, 1793; and the first court of Common Pleas, at the house of Nathaniel Sanborn, in Canandaigua, in Nov. 1794. The first co. officers were Oliver Phelps, *First Judge*; Nathl Gorham, *Co. Clerk*; John Cooper, *Surrogate*; and Judah Colt, *Sheriff*. The first justices of peace appointed in Western N. Y. were Asa Ransom and Wm Rumsey, for Ontario co., in Dec. 1804. By an act passed April 3, 1798, deeds were required to be recorded in the clerk's office. This was many years before the general act for recording in clerks' offices.

[5] *The Ontario Gazette and Geneva Advertiser*, the first paper in the present co. of Ontario, was started at Geneva, April, 1797, by Lucius Carey, and removed to Canandaigua in 1799.

The Imperial American, or Seneca Museum, was published at Geneva in 1800, by Ebenezer Eaton.

The Expositor was started at Geneva, Nov. 19, 1806, by James Bogett, who in 1809 changed it to

The Geneva Gazette, and continued it until Dec. 4, 1816. In 1827 it bore the title of *The Gazette and General Advertiser*. It was published by John Greves and J. C. Merrill until 1837; by J. Taylor Bradt until 1839; and by Stone & Frazer a short time longer, when it was discontinued. It was revived in Jan. 1845 by Ira and S. H. Parker. Geo. M. Horton was at one time interested in its publication, and it is now published by S. H. Parker.

The Geneva Palladium was commenced in 1816 by Young & Crosby, and was published successively by S. P. Hull, John T. Wilson, and —— Connely, until 1828, when it was discontinued.

The Geneva Chronicle was started in 1828 by —— Jackson, and continued 2 years.

The Independent American was published by T. C. Strong in 1831.

The Geneva American was published by Franklin Cowdery in 1829.

The Geneva Courier was established by John C. Merrill in 1830, and continued until 1833. Its publication was continued by Snow & Williams, Ira Merrill, Howlett & Van Valkenburgh, Cleveland & Hosk, and Winthrop Atwell, successively, until Oct. 1854, when it passed into the hands of William Johnson, its present publisher. A daily paper was issued from this office about 6 months in 1845–46.

The Herald of Truth (Univ.) was started in 1834, at Geneva, by Prescott & Chase, and continued until 1837, when it was removed to Rochester.

The General Democrat was published during the campaign of 1840, by Stone & Frazer.

The District School Journal, mo., was started at Geneva in 1840 by Francis Dwight, and removed to Albany in 1841.

The Geneva Advertiser and Mechanics' Advocate was started in 1843 by S. Merrill & Co., semi-w., and continued 1 year.

The Geneva Budget was commenced in 1852, by Speed & Tanner, and continued 2 years.

The New York State Intelligencer was published in 1848.

The Ontario Whig, semi-w., was started at Geneva by Wm. C. Busted in 1850, and continued until 1852.

The Geneva Independent and Freeman's Gazette was established in 1851, by W. K. Fowle, and continued by him until 1855, and by H. G. Moore until June, 1857. Since then it has been published by W. K. Fowle as

The Geneva Ledger.

The Geneva Daily Union has been published since May 10, 1858, by W. K. Fowle.

The Ontario Gazette and Geneva Advertiser was brought from Geneva to Canandaigua in 1799, and published by Lucius Carey until 1802. John Keep Gould, who then became the publisher, changed its name to

The Western Repository and Geneva Advertiser; and in 1803 it was again changed to

The Western Repository. James D. Bemis became interested in its publication in 1804, and in 1808 he issued it as

The Ontario Repository, and continued it until 1828. It was published by Morse & Ward, Morse & Wilson, and Morse & Harvey, until 1835, and until 1840 by Clarissey Morse. The last named was succeeded by Geo. L. Whitney, who in Jan. 1850, sold it to H. G. Moore. The fol-

The territory lying within the limits of this co. was the chief seat of the Senecas, the most numerous and powerful tribe of the "Six Nations." Their chief village was at Kanadesaga, now and just w. of the present site of Geneva, at the foot of Seneca Lake. In all the wars of the Iroquois League the Senecas bore a conspicuous part; and especially did they incur the bitter enmity of the French occupants of Canada. In 1687, De Nonville, Governor of "New France," at the head of 1,600 French soldiers and 400 Indian allies, invaded the Seneca country by way of the St. Lawrence and Lake Ontario. At a defile near the site of the present village of Victor an engagement ensued, resulting in the defeat of the Indians, though with great loss to the French. De Nonville marched forward, burned the village of Gannagaro and several others, and returned.[1] In the succeeding year the Senecas and their allies in turn invaded the French settlements in Canada and took bloody revenge.[2]

In the progress of the wars that ensued, the Six Nations were sometimes neutral and sometimes allies of the English; but the country of the Senecas was never afterward invaded by the French. During the Revolution the Senecas espoused the English cause; and in 1779 Gen. Sullivan invaded their country from the s., burned their villages, destroyed their corn and orchards, and left the most beautiful region in the Indian domains a desolate waste. At the conclusion of peace, the force and spirit of the Indians were annihilated, and they quietly yielded to the encroachments of the whites, until the last acre of their hunting grounds within the limits of the co., and the very graves of their fathers, passed out of their possession.[3]

The National New Yorker and Ontario Repository, by H. D. Moore and D. E. Dox, at Canandaigua. In May, [illegible] was [illegible] and the name changed to the National New Yorker, by L. White. W. A. Smith was admitted as publisher.

The Ontario was established at Canandaigua, in July, 1826, by Isaac Thomas, Jr. In June it passed into the hands of Jesse A. Stevens, who, during the winter of [illegible], removed it to

The Ontario Messenger. It was successively published by Dox & Moore, D. E. Moore, B. W. Jones, and T. F. Hall. The latter was succeeded in Nov. 1846, by Jones & Matteson, the present publishers.

The Republican was started at Canandaigua by A. N. Phelps in 1824, and was afterward published a short time by T. M. Bergman.

The Ontario Repository was issued at Canandaigua in 1827, by W. W. Phelps. R. Royce became its publisher soon after, and changed its name to

The Freeman. In 1830 it was united with The Repository.

The Christian Repository, a religious paper, was published at Canandaigua in 1834.

The Seminary, a literary mo., was published at Canandaigua in 1841.

The Ontario Times was established Jan. 1, 1852, by N. J. Morse. It was sold in 1856 to Watson Moller, who changed it to

The Ontario Times. In Feb. 1856, the establishment was burned and the paper suspended. It was re-established in May following by Mr. Moller, and is still published by him as

The Ontario Republican Times.

The Ontario Repository was started at Canandaigua, in 1808, by Phelps, Lewis, and A. Kidney. In 1822 it was published by J. O. Balch and in 1826 changed to *The Phelps Gazette*; A. N. Phelps, publisher, and soon changed to *The Phelps Gazette and Western Repository*; in 1828 to

The Phelps Gazette and Register; in 1840 to

The Phelps Gazette; and in 1841 to

The Phelps Argus. In 1842 it was published by W. [illegible] Smith, Dox & A. Phelps, and W. W. Red[illegible]. In 1843 it was discontinued.

The Ontario Free Press.

The Naples Herald was established at Naples in 1832 by W. [illegible] & Chauncey, and published 2 years.

The Naples Visitor. It was started in 1840 by David Archibald. In [illegible] it was published by Phelps, who changed its title to *The Naples Visitor*. It was discontinued soon after.

The Naples Times was published at Naples in 1842.

The Naples [illegible] was published here in 1849 by E. Denton.

The Phelps New Democratic Star was started Sept. [illegible], by B. N. Phelps.

[1] The Cayugas and the Onondagas joined that body, but declined to march against the Senecas, because the latter had received De Herton into their tribe. The expedition was undertaken to destroy the Seneca villages, and the Indians knew that only a small detachment of the Senecas were engaged in the battle, and that the French retreated before the warriors could rally from the dispersion.

[2] In this campaign 1,200 French were killed and 26 prisoners taken, who were afterward burned at the stake.

By the terms of the charter of the colony of Mass., the region between its N. and S. boundaries, from the Atlantic to the Pacific, was embraced; and the title to this territory was claimed by Mass. after the Revolution. The subsequent charter of the State of New York intervened and conflicted with this claim,—from which difficulties arose, which were finally settled by commissioners at Hartford, Conn., on the 16th of December, 1786. It was there agreed that Mass. should cede to N. Y. the sovereignty of all the territory claimed by the former lying within the limits of the latter, and that N. Y. should cede to Mass. the property of the soil, or the right of the pre-emption of the soil from the Indians. This agreement covered all that part of the State lying W. of a line running N. from the "82d milestone," on the line between N. Y. and Penn., through Seneca Lake to Sodus Bay. This line is known as the "Old Pre-emption Line."[1] In 1787 Mass. sold the whole of this tract, containing 6,000,000 of acres, to Oliver Phelps and Nathaniel Gorham, for one million dollars. In the following spring Mr. Phelps left his home in Granville, Mass., with men and means to explore the country thus acquired. He collected the sachems, chiefs, and warriors of the Six Nations at Kanadesaga, and in July, 1788, concluded with them a treaty of purchase of a tract containing 2,250,000 acres, bounded E. by the pre-emption line, W. by a line 12 mi. W. of, and running parallel with, the Genesee River, S. by the Penn. line, and N. by Lake Ontario.[2]

The portion of the tract to which the Indian title had not been extinguished, constituting about two-thirds of the original purchase, was abandoned by Messrs. Phelps and Gorham and reverted to Mass. It was re-sold by that State to Robert Morris, in 1796, and subsequently formed what is known as the Holland Land Purchase. In 1789, Mr. Phelps, at Canandaigua, opened the first regular land office for the sale of land to settlers ever established in America. The system he adopted for the survey of his lands by townships and ranges, with slight modifications, was adopted by the Government for the survey of all the new lands in the U. S. When organized in 1789, Ontario was the first co. set off from Montgomery, and embraced all that part of the State lying W. of the E. line of Phelps and Gorhams Purchase, including what was called "The Genesee Country."

The first settlement was made on the site of the Indian village of Kanadesaga, (now Geneva,) in 1787. Soon after the land office at Canandaigua was opened, and several settlements were commenced in different parts of the co. From this period the progress of settlement was rapid, immigrants being attracted by the beautifully rolling character of the surface and the unsurpassed fertility of the soil. Few incidents of general interest have occurred to interrupt the steady and continued progress of peaceful industry. The most notable of its later historical events is its being the scene of the birth of Mormonism. Joe Smith resided for many years in Manchester; and his pretended discovery of the golden plates of the Book of Mormon was made on the 22d of September,

[1] The history of this Pre-emption Line is interesting. Of course, it was mere conjecture where the line would fall as far S. as Seneca Lake, and parties were interested to have the line fall W. of Geneva, leaving that place and a considerable tract of land between on the Military Tract and the Mass. lands. Seth Reed and Peter Ryckman, both of whom had been Indian traders, applied to the State of New York for a remuneration for services rendered in some previous negotiations with the eastern portion of the Six Nations, and proposed to take a patent for a tract the boundaries of which should begin at a tree on the bank of the Seneca Lake and running the bank of the lake to the S. mouth they should leave 10,000 acres between the lake and the E. bounds of the land ceded to Massachusetts. Their request was acceded to and a patent issued. Thus situated, they proposed to Messrs. Phelps and Gorham to join them in running the Pre-emption Line, each party furnishing a surveyor. The line was run which is known as the "Old Pre-emption Line." Messrs. Phelps and Gorham were much disappointed in the result,—suspected error or fraud, but made no movement for a resurvey before they had sold to the English Association. Their suspicions had at first been excited by an "ill favored countenance of the Lessee Company [as "all the lands they owned east of the line that had been run." They were so well assured of the fact that on their deed to Mr Morris they specified a tract in a curve between the line then run and the W. bounds of the Connecticut Military and Indian Reserves, to the contracting about the Military Tract. Being fully convinced of the inaccuracy of the first survey, Morris, in his sale to the English Company, agreed to run it anew. The new survey was performed under the superintendence of Mr. Hodges who employed Andrew Ellicott and Augustus Porter to perform the labor. A corps of axmen were employed, and every effort was used to expedite the transit to completion until the line had reached the head of Seneca Lake, when night scholars were employed to run down and over the lake. So much pains were taken to insure correctness that the survey was never disputed; and thus the "New Pre-emption Line" was established as the true starting line between the lands of the State of New York and those that had been ceded to Massachusetts. In examining the old survey, Major Hoops had discovered the precise points of deviation to the westward. It had commenced soon after leaving the Pennsylvania line, gradually bearing off until it crossed the outlet of the Crooked Lake, where an abrupt offset was made, and then on its location for a few miles almost in a N. W. course, when, as if fearful that it was running W. farther than was necessary to secure a given object, the line was made to incline to the E. until it passed the foot of Seneca Lake, when it was run nearly N. and S. to Lake Ontario. All this will be observed upon any of the old maps. It will at once be perceived that the site of Geneva—the 10,000 acres of Reed and Ryckman—had caused more than a usual variation of the surveyor's compass. Judge Porter's explanation is as follows:—"Geneva was then a small settlement, beautifully situated on the Seneca Lake, rendered quite attractive by its lying beside an old Indian settlement in which there was an orchard."

The Old Pre-emption Line terminated on Lake Ontario, 3 mi. W. of Sodus Bay, and the new line very nearly the center of the head of the bay. With the exception of the abrupt variations that have been noticed, the old line, parting from the true meridian about 5 mi. S. of the Chemung River, bears off gradually until it reaches the shore of Lake Ontario. The strip of land between the two lines was called "*The Gore*." In addition to the patent granted to Reed and Ryckman, the State had presumed the original survey to be correct, and made other grants, and allowed the location of military land warrants upon what had been made disputed territory. As an equivalent to the purchasers of this tract compensation lands were granted by the State in the present towns of Wolcott and Galen, Wayne co.

[2] The w. boundary of the tract was a line "beginning in the northern line of Penn. due south of the corner in point of land made by the confluence of the Genesee River and the Canaseraga Creek, thence north on said meridian line to the corner in point, at the confluence aforesaid; thence northwardly along the waters of the Genesee River to a point two miles north of Canawagus Village, thence running due west twelve miles; thence running northwardly, so as to be twelve miles distant from the western bounds of said river, to the shore of Lake Ontario."—*Turner's Phelps and Gorham Purchase.*

1827. Brigham Young was also a long time a resident of Canandaigua, and the first Mormon society was formed at Fayette, in the adjoining co. of Seneca, in 1830.

BRISTOL[1]—was formed in Jan. 1789. South Bristol was taken off in 18[illegible], and a part annexed to Richmond, March 23, 1848, and restored Feb. 25, 1852. It is on the [illegible] s. w. of the center of the co. Its surface consists of a series of ridges, gradually declining to the N. The highest points are about 500 feet above the valleys. These ridges are divided by the deep valleys of Mud Creek and Egypt Brook. The declivities that border upon these streams in the s. part are usually very steep. The soil is a rich alluvial upon the intervales and [illegible] and shale among the hills. **Bristol Center** (p. v.) contains [illegible]; **Baptist Hill**[2] (Bristol p. o.) 25; and **Muttonville**[3] 15. **Egypt** is a hamlet in the s. part. Gamaliel Wilder and Joseph Gilbert settled in 1788, at what was called the "Old [illegible]." The first religious services were performed by Rev. Zadock Hunn, in 1793. There are now [illegible] churches in town.[5]

CANADICE[6]—was formed from Richmond, April 15, 1829, and a part was annexed to Richmond in 1836. It is the s. w. corner town of the co. Its surface consists of a high, broken upland separated into two ridges by Canadice Lake. The w. ridge, known as Bald Hill, is bounded by steep declivities, and the E. by more gradual slopes. The highest summits are about 700 feet above Honeoye Lake. The principal streams are the Canadice Inlet and Outlet and the Hemlock Inlet. The soil in the valleys is a clayey loam; upon the declivities of the hills it is mostly disintegrated shale and slate, and upon the summits in the s. part it consists of gravelly loam and black muck. **Canadice Corners** (p. o.) is a hamlet, forming the business center of the town. The first settlement was made by —— Kimball, in 1807.[7] There are now 3 churches in town.[8]

CANANDAIGUA[9]—was formed Jan. 27, 1789, and a part annexed to Gorham, March 16, 1824. It is the central town of the co., lying upon the W. and N. shores of Canandaigua Lake. The surface is hilly in the s., but level or gently rolling in the N. The highest summits are about 600 feet above the lake. Canandaigua Outlet, Beaver Creek, and Stevens Brook are the principal streams. The soil is a clayey loam in the N. and a deep, gravelly loam in the s., and in fertility this town ranks among the first in the State. **Canandaigua,** (p. v.) situated at the head of Canandaigua Lake, is an important station on the N. Y. C. R. R., and a terminus of the N. F. & C. Branch and of the E. J. & C. R. R. A daily steamer connects it with Naples, at the head of the lake. It contains the co. buildings,[10] a State Arsenal,[11] 5 churches, an academy,[12] a female seminary,[13] a private lunatic asylum,[14] 3 newspaper offices, and a bank. It was incorp. April 18, 1815, and has a pop. of 4,154.[15] **Cheshire,** (p. v.) in the s. part, contains 2[illegible]. **Centerfield** (p. o.) is a hamlet, and **Academy,** near the s. line, is a p. o. EAST BLOOMFIELD—was formed Jan. 27, 1789, as "*Bloomfield.*" Mendon and Victor were taken off in 1812; its name was changed and West Bloomfield was taken off in 1833. It is an interior town, lying N. W. of the center of the co. Its surface is rolling, with a gentle inclination toward the N. The ridges are 50 to 600 feet above the valleys. The principal streams are the Mud, Fish, and Hog Hollow Creeks. The soil is a deep, fertile, gravelly loam, in places mixed with clay. **Griffiths Mills** in the E. and **Brag Village** in the S. E. part are hamlets. **East Bloomfield,** (p. v.,) ¾ of a mi. from East Bloomfield Station, on the N. Y. Central R. R., contains 3 churches, an academy,[2] manufactories of agricultural implements and carriages. Pop. 590. This township having been purchased of Phelps and Gorham by a company from Berkshire co., Mass., its settlement was commenced in the spring of 1789.[3] There are 4 churches in town;[4] the first (Cong.) was formed Sept. 8, and organized Nov. 15, 1795, by Rev. Zadock Hunn. The first church edifice in all Western N. Y. was erected in this town in 1801.

FARMINGTON[5]—was formed Jan. 27, 1789. It lies on the N. border of the co., W. of the center. Its surface is nearly level in the S., but in the N. it is broken by the drift ridges peculiar to this section of country, rising to a height of 50 to 100 feet above the general surface. The declivities of these ridges toward the N., E., and W. are generally steep, but toward the S. they become gradual slopes. The streams are Mud and Beaver Creeks and Black Brook. A strip of land across the S. part, embracing about 3 tiers of lots, has a clay soil. North of this is a marshy region; and farther N. the soil is a gravelly loam and very productive, with good proportions of arable, meadow, and grazing lands throughout the town. **New Salem,** (Farmington p. o.,) a village in the N. part, contains 206 inhabitants. **Brownville** (Nortons Mills p. o.) is a hamlet. **East Farmington** and **West Farmington** are p. offices. The settlement was commenced in 1789, by Friends from Berkshire, Mass., among whom were Nathan Comstock, his sons Otis and Darius, and Robert Hathaway.[6] The first house of worship was erected by the Friends, in 1804. There are now 2 churches in town; Friends and Wes. Meth.

GORHAM[7]—was formed Jan. 27, 1789, as "*Easton.*" Its name was changed to "*Lincoln,*" April 17, 1806, and to Gorham, April 6, 1807. Hopewell was taken off in 1822. A part of Canandaigua was annexed in 1824. It lies upon the E. shore of Canandaigua Lake, S. E. of the center of the co. Its surface is rolling, the ridges rising in gradual slopes to a height of 25 to 200 feet above the valleys. Flint Creek is the principal stream. The soil in the E. part is principally a gravelly loam, and in the W. it consists of clay, and is generally fertile and productive. **Gorham,**[8] (p. v.,) 3 mi. from the Gorham Station, on the C. & E. R. R., contains 3 churches and 310 inhabitants. **Reeds Corners** (p. v.) contains 3 churches and about 20 houses. The first settlement was made at Reeds Corners, in 1789, by James Wood.[9] There are now 6 churches in town.[10]

HOPEWELL—was formed from Gorham, March 29, 1822. It is an interior town, lying E. of the center of the co. The surface is level or gently undulating, with a northerly inclination. Canandaigua Outlet, Fall Creek, and Fall Brook are its principal streams. The soil is a sandy and gravelly loam in the W., and the same mixed with clay in the center and E. It is very fertile and highly cultivated. **Chapinville,** (p. v.,) a station on the N. Y. C. R. R., contains a church and about 30 dwellings; **Hopewell Center** (p. v.) contains 1 church and 16 dwellings.

Hopewell is a p.o. Settlements were made in 1789–90.[1] There are 5 churches in town;[2] the first church (Presb.) was formed in 1808.

MANCHESTER—was formed from Farmington, March 31, 1821, as "*Burt*," and its name was changed April 16, 1822. It lies upon the N. border of the co., E. of the center. Its surface is nearly level in the S., but is occupied by irregular sand and gravel ridges of the drift formation in the N. Canandaigua Outlet, Fall Creek, and Black Brook are the principal streams. The soil is a gravelly loam and is very productive. Hydraulic limestone is quarried on "the Outlet." There are 3 flouring mills in town. **Clifton Springs,** (p. v.,) incorporated in 1859, a station on the N. Y. C. R. R., is situated in the E. part of the town. Pop. 340. At this place are the celebrated Clifton Mineral Springs and an extensive water cure establishment.[3] **Manchester** (p. v.) contains 374 inhabitants; **Shortsville** (p. v.) contains 35 dwellings and a large distillery; and **Fort Gibson,** (p. v.,) on the Erie Canal, 50 dwellings; **Manchester Center** (p. v.) contains 18 dwellings. **Plainsville** (Gypsum p. o.) contains 12 houses. **Coonsville** contains a flouring mill, plaster mill, and 12 houses. The first settlement was made in 1793, by Stephen Jared, Joel Phelps, and Joab Gillett.[4] Rev. David Irish preached in Manchester in Jan. 1797, and in Feb. following a Bap. society was organized. There are now 8 churches in town.[5] Joe Smith, the Mormon prophet, resided in this town with his father; and Mormon Hill, the place where the gold Bible was found, is situated a little N. W. of the center of the town.[6]

NAPLES[7]—was formed Jan. 27, 1789, as "*Middletown.*" The name was changed April 6, 1808. Italy was taken off in 1815, and a part of Springwater in 1816. It is the extreme S. town of the co. The surface consists of a hilly and elevated upland, broken by the narrow and deep valleys of Canandaigua and Honeoye Inlets and Grindstone Creek. The summits of the hills are 600 to 1000 feet above the surface of the lake and 1300 to 1700 feet above tide. Their declivities bordering on the streams are generally very steep. High Point and Hatch Hill are the highest summits. The soil upon the hills consists of clay and gravel mixed with disintegrated slate and shale; and in the valleys it is a rich, gravelly loam mixed with alluvium. Fruit growing is receiving much attention. Peaches are produced in great abundance; and an experiment is being made in the cultivation of grapes, which promises to be successful. Over 500 acres are now devoted to this object, and very satisfactory results have been realized. **Naples,** p. v., on the Canandaigua Inlet, 4 mi. from the lake, contains 5 churches and 3 flouring mills. Pop. 700. The first settlement was commenced in 1790, by a company from Berkshire co., Mass., by whom the town was purchased from Phelps and Gorham.[8] The first sermon was preached by Rev. Zadock Hunn, in June, 1792.[9]

PHELPS[10]—was formed in 1796, under the act of Jan. 27, 1789. A part was annexed to Lyons, (Wayne co.,) April 11, 1823. It is the N. E. corner town of the co. Its surface is rolling, the ridges rising in gentle slopes 20 to 100 feet above the valleys. The highest point is 700 feet above Canandaigua Lake. The soil in the E. is a sandy loam with a clay subsoil, in the N. a mixed sandy and clayey loam, and in the W. a sandy and coarse gravelly loam, all highly productive. Canandaigua Outlet, the principal stream, flows E. and N. through the center. Along its course are extensive quarries of gypsum and water limestone. In the town are quarries of O[illegible]

[1] Among the first settlers were Daniel Gibbs, Daniel Warner, —— Sawyer, Ezra Platt, Samuel Day, Gershom and Israel Chapin, [illegible] Falconer, Benj. Wells, and Thomas Sawyer, mostly from Massachusetts; and William Wyckoff, from Penn. The first child, Benj. Wells, jr.—was born in Feb. 4, 1791. Calvin Bacon taught the first school in 1792. The first tavern was kept by Ezra Platt; and the first mill was built by Oliver Phelps and Israel Chapin, in 1789.

daga and corniferous limestone. **Phelps,**[1] (p. v.,) on Flint Creek, near its junction with the Canandaigua Outlet, was incorp. Jan. 2, 1855. It contains a union school, newspaper office, and 6 churches. Pop. 1,278. **Orleans** (p. v.) is situated on Flint Creek. Pop. 218. **Oaks Corners** (p. o.) contains 15 houses.[2] J. D. Robinson, from Claverack, Columbia co., settled at Phelps in 1789.[3] Rev. S. Goodale was the first resident preacher; he held services in schoolhouses and dwellings before any church edifice was erected. The first church (Presb.) was built in 1804.[4]

RICHMOND—was formed in 1796, under the act of Jan. 27, 1789, as "*Pittstown.*" Its name was changed to "*Honeoye*" April 6, 1808, and to Richmond April 11, 1815. A part of Canadice was annexed April 30, 1836, and parts of Bristol and South Bristol in 1848; but the latter were restored in 1852. It lies upon the w. border of the co., s. of the center. It consists of a nearly square portion of land lying near the foot of Honeoye Lake, and a narrow strip extending along the E. shore of that lake and its inlet to the s. border of the co.[5] A wide valley occupies the center, opening toward the N., and surrounded by hills from 50 to 200 feet high on the 3 remaining sides. The southern strip is very hilly, the summits rising 500 feet above the surface of the lake. Honeoye and Hemlock Outlets and Egypt Brook are the principal streams. The soil upon the lowlands is clay, upon the hills a sandy loam mixed with clay. Much attention is given to improving the breeds of cattle and sheep; and it is the largest wool growing town in the co., and second in the State. **Honeoye,** (p. v.,) at the foot of Honeoye Lake, is the business center of the town. Pop. 244. **Richmond Mills** (p. o.) and **Allens Hill**[6] (p. o.) are hamlets. This town was purchased of Phelps and Gorham by a company; and the first settlement was made by Capt. Peter Pitts and his sons William and Gideon, in 1789.[7] There are 5 churches in town.[8]

SENECA—was formed in 1793, under the act of Jan. 27, 1789. It is the S. E. corner town of the co., lying upon the w. shore of Seneca Lake. The surface is beautifully rolling, the ridges rising 20 to 200 feet above the valleys. The shores of the lake are bluffs about 100 feet above the surface of the water. The streams are Flint and Keshong Creeks and Burralls and Castle Brooks. The soil is a deep, rich loam, consisting of sand, gravel, and clay mixed together, the gravel predominating upon the ridges. The soil is admirably adapted to the production of fruit trees, and the business of the nursery has become one of the leading pursuits in the town. Two large nursery establishments are located within the limits of the village of Geneva. Commerce and manufactures receive considerable attention. **Geneva,**[9] (p. v.,) incorp. April 4, 1806, is beautifully situated at the foot of Seneca Lake. It contains a flourishing union school,[10] a large private boarding school,[11] 3 newspaper offices, and 9 churches. It is also the seat of Hobart Free College.[12] The Geneva Water Cure and Hygienic Institute is finely situated near the center of the village. A daily line of steamers connects this place with the upper ports upon Seneca Lake. Pop. 5,057. **Castleton,** (Seneca Castle p. o.,) on Flint Creek, in the N. W. part, contains 2 churches and 35 dwellings. **Flint Creek,** (p. o.,) **Halls Corners,** (p. o.,) and **Stanleys**

[2] The culture of raspberries has recently been introduced in this vicinity, and promises to be successful.

[3] N. Sanborn, —— Gould, —— Pierce, Philetus Swift, and Ithn Granger, from Conn., settled in town in 1789; Thaddeus Oaks, Seth Dean, Oliver and Charles Humphrey, John Salisbury, Nicholas Pullen, Walter Chase, and Elias Dickinson in 1791; John Patten and David Boyd in 1792; Jonathan Melvin in 1793; and John Sherman, Joseph and Lodowick Vandemark, and John and Patrick Burnett in 1794. Henry H. Robinson was the first child born in town; and the first marriage was that of Philetus Swift and Sally Dean, in 1793. Thaddeus Oaks opened the first tavern, in 1793; and the first saw and grist mills were built by Seth Dean.

[4] There are 10 churches in town: 4 Bap., 3 Presb., 2 M. E., and a Prot. Epis.

[5] This strip was added to the town in consequence of its position, high mountain ridges separating it from the business centers of both Canadice and South Bristol.

[6] Named in honor of Nathaniel Allen. Mr. Allen was among the first settlers, and established the first blacksmith's shop at Allens Hill. Subsequently he was sheriff of Ontario co.; in 1812 he was a member of the Assembly; during the War of 1812 he was army paymaster; and in 1819 he was elected member of Congress from the 21st district.

[7] In 1789, Lemuel and Cyrus Chipman, Philip Reed, Levi Blackmer, Nathaniel Harmon, Pierce Chamberlain, Asa Denison, and Isaac Adams, from Vermont, settled in town. Capt. Pitts opened the first tavern; and the first saw and grist mills were built by Thomas Morris, in 1795. Upon the division of the lands, Capt. Pitts secured 3,000 acres at the foot of Honeoye Lake, embracing the flats and a cleared field which had been the site of an Indian village destroyed by Sullivan's army. Louis Philippe, during his travels in this country, spent a night in the log house of Capt. Pitts; and subsequently the Duke de Liancourt and suite went from Canandaigua to make him a visit.

[9] This village is justly celebrated for the beauty of its situation; and perhaps no village in the co. in this respect has been so generally and enthusiastically praised by tourists. For many years it was one of the leading business places in Central N. Y.; but the completion of the R. R. lines has turned a large share of the business into other channels.

[10] This union school was one of the first established in the State, and for a long time was taken as a model in establishing others. It early contained an academic department that enjoyed an excellent reputation. The schools of the village are now graded, and embrace a complete common school and academic course.

[11] The Walnut Hill Seminary, for boys, is a flourishing institution of its kind.

[12] Formerly Geneva College. It was incorp. in 1825, and was established mainly through the influence of Bishop Hobart, whose name it bears. A medical department was organized in 1836. The trustees and members of the College Faculty are generally members of the Prot. Epis. church. From the beginning, however, the college has been equally open to all, and it is now *free to all*, no charge being made for tuition and room rent. It has now two large buildings for the use of students—one for libraries and lecture rooms, one for a chapel—and a spacious building for the use of the medical department. The college has a president, 4 professors, an assistant professor, and a resident fellow, who takes part in the business of instruction; and the medical department has a Faculty of 6 professors. In 1859 the number of students in the free classes was 85. The aggregate value of the college property is about $160,000. The college buildings are beautifully situated in the S. part of the village, on a bluff which overlooks Seneca Lake. The college grounds contain above 12 acres. In 1858 the whole number of graduates in arts was 246 and in medicine 520.

Corners[1] (p. o.) are hamlets. The first settlement was commenced in 1787, upon the site of the Indian village of Kanadesaga, by immigrants from New England.[2] This village was situated at the foot of Seneca Lake, where Geneva now is; and for several years after Geneva had become a place of considerable importance it was called "*Kanadesaga.*" An ancient fortification, known as Fort Hill, is located on lot 58. It was covered with large forest trees upon the first settlement of the town. Another beautiful ground, called the "Old Castle," is about 1¼ mi. S.W. of Geneva. It is covered by an Indian orchard, and the ground has never been plowed, because of a stipulation to that effect made with the Indians in the treaty of purchase.[3] It contains an Indian burial ground; and in one corner may be traced a trench of an ancient stockaded fortification. Here was the largest Indian settlement in Western New York, and it is still a place of much interest to the few remaining descendants of the once powerful Five Nations. Many relics—as stone hatchets, arrow heads, pipes, &c.—are found in the vicinity of "Old Castle." As early as 1765, the Rev. Samuel Kirkland came on a mission to the Indians at Kanadesaga.[4] The first church (Presb.) was organized in 1798; and the first settled minister was Rev. Jedediah Chapman.[5]

SOUTH BRISTOL—was formed from Bristol, March 8, 1838. It lies upon the W. shore of Canandaigua Lake, S.W. of the center of the co. The surface consists of an elevated upland, divided into 4 ranges by the valleys of Grindstone and Mud Creeks and Egypt Brook. The summits of the ridges are about 1000 feet above the lake, and the declivities are very steep. The bluffs upon the lake shore are 300 to 400 feet high. The soil is a mixture of clay and disintegrated slate. Although the soil is rich and productive, the hilly character of the town has tended to retard its settlement. **Cold Spring** (South Bristol p. o.) is a hamlet about a mi. from Canandaigua Lake. **Frost Hill** is a hamlet in the W. part. Gamaliel Wilder, from Mass., purchased this township from Phelps and Gorham, and settled at Wilburs Point, on Canandaigua Lake, in 1789.[6] An Indian orchard on the lake shore at this point induced him to settle here. Rev. Mr. Rolph was the first settled minister. There is now but 1 church (Presb.) in town.

VICTOR—was formed from Bloomfield, May 26, 1812. It is the N.W. corner town of the co. The N. part is occupied by the drift ridges, which rise 50 to 150 feet above the general surface. A ridge of 100 to 280 feet in height extends across the S. part in a general E. and W. direction. The principal streams are Irondequoit, Mud, Hog Hollow, and Fish Creeks, and Trout Brook. The soil in the center and N. is a light, sandy and gravelly loam, but in the S.E. it is principally clay. It is particularly adapted to the cultivation of potatoes and root crops. **Victor**,[7] (p. v.) near the center, contains about 75 dwellings. The Indian village of Gannagaro, which was destroyed by the Marquis de Nonville, was situated near this place.[8] **Fishers** (p. o.) is a station on the N. Y. C. R. R., in the W. part: and **East Victor** is a hamlet, on Mud Creek. The first settlement was commenced in 1789, by immigrants from Stockbridge, Mass. Among the first were Enos and Jared Boughton, and Jacob Lobdell.[9] Rev. Reuben Parmelee, from Goshen, the first settled minister, came to the town in 1798.[10]

WEST BLOOMFIELD—was formed from Bloomfield, Feb. 11, 1833. It lies upon the W. border of the co., N. of the center. A ridge 200 to 300 feet high, forming the declivity of a southern terrace, extends across the N. part. The surface is gently undulating. The soil is a deep, rich, gravelly loam mixed with clay. In the S. part there is a spring of inflammable or carbureted hydrogen gas. Tile and earthenware are manufactured to some extent in town. **West Bloomfield** (p. v.) is a village of 350 inhabitants,[11] situated 1¼ mi. S. of the W. Bloomfield Station, on

2 Among the first settlers were Hon. Isaac Jones, Asa Ransom, Lodk. Comstock, Dr. Benton, Peter Ryckman, Peter Beattie, Col. Seth Reed, and Dominick Delatteyle, an Indian trader. Jemima Wharmby, Jonathan Oaks, Benjamin Tuttle, Phineas Stone, and John Reed settled in 1788 and '89. Solomon and William Gates, Thomas Densmore, Solomon Weaver, and Oliver Whitmore in 1790, and Adam, Christian, Christopher, and George Fisher in 1791. Lark Jennings kept the first tavern, in 1788; the first gristmill was erected by Charles Roberts, and the first sawmill, by P. B. Wisner, in 1798. The first marriage was that of Dr. Joel Prescott and Miss Phebe Reed, and the first school was taught by Samuel Wheaton, in 1792.

3 For many years after this purchase the Indians came regularly at plowing time and watched this orchard, to see that the stipulation was not broken.

4 Subsequently Mr. Kirkland was commissioned by the State of Mass. to treat with the Indians, and he conducted the treaty of purchase between them and Phelps and Gorham, in 1788; and afterward he acted as Indian agent for 30 years at Canandaigua.

5 There are 12 churches in town: 2 Presb. (1 Presb., 2 Asso. Ref. Presb., 2 M. E., Bap., Ref. Prot. D., Univ., and R. C.

6 Among the other early settlers who came in soon after Mr. Wilder [illegible] were Allen, Joseph Gilbert, Jared Tuttle, Peter Gannard, Levi Austin, Nathaniel Hatch, and their families. Mr. Wilder built the first sawmill, the first gristmill, and distillery, at Wilburs Point, in 1795. He also erected the first public house, in 1808, which he [illegible] Dr. H[illegible] Forbes. 9 Levi Boughton and Rufus Dryer settled at Boughton Hill, in 1790. The first birth was that of Frederick Boughton, in June, 1791; and the first marriage, that of Zebulon Norton and Miss Boughton. The first tavern was opened at Boughton Hill, by Hezekiah Boughton, in 1792; and the first sawmill was built the same year, by Enos and Jared Boughton.

[1] Mr. Hall was from Guilford, Conn. He took the first census of Ontario co., in 1790; represented the co. in Assembly, in 1798; and was Major General of militia in the War of 1812.

[2] John P. Sears, Peregrine Gardner, Clark Peck, Jasper Marvin, Samuel Miller, John Algur, and S. Thayer settled in the town in 1789-90. Benjamin Gardner, with his sons John and Peregrine, are supposed to have been the first settlers. The first birth was that of Lucinda Gardner, in Sept. 1791. Jasper P. Sears kept the first inn, and Royal Hendee the first store. The first sawmill was built by Ebenezer Curtis; and the first gristmill, by Reuben Thayer.

[3] There are now 3 churches in town; Cong., M. E., and Chris.

ORANGE COUNTY.

This county was formed Nov. 1, 1683. Rockland was taken off in 1798, and a portion was annexed from Ulster the same year. It lies upon the W. bank of the Hudson, S. E. of the center of the State. It is centrally distant 90 miles from Albany, and contains 848 sq. mi. The surface is mountainous upon the S. E. and N. W. borders, and a rolling upland through the center. The Matteawan or South Mts. extend in several parallel ranges from the N. J. line N. E. to the Hudson, ending in the rocky and precipitous bluffs known as "The Highlands." The highest summits attain an elevation of 1,000 to 1,500 ft. above tide. The ranges and peaks of these mountains are known by several distinct names.[1] The whole region included between these ranges consists of steep and precipitous rocky peaks and narrow winding ravines, a small portion only being susceptible of cultivation. The Shawangunk Mt. Range extends from Delaware River N. E. through the N. W. corner of the co. It is a high, unbroken range, precipitous upon the W., but with more gradual slopes upon the E. The highest summits are 1,500 to 1,900 ft. above tide. The extreme N. W. corner of the co. is occupied by the series of highlands extending from the Delaware into Sullivan co. The central portion of the co., lying between the two mountain systems, is a rolling upland, broken in many places by abrupt and isolated hills and the deep valleys of streams. This whole region, comprising more than one-half of the entire surface of the co., is susceptible of cultivation, and forms a fine agricultural district.

Along the S. W. border, extending through several towns and into N. J., is a low, flat region, lying upon the streams, and known as the "Drowned Lands." This tract, consisting of about 17,000 acres, was originally covered with water and a dense growth of cedars; but a large portion of it has been drained and reclaimed; and it now forms one of the finest agricultural portions of the co.

Neversink River flows S. along the W. foot of the Shawangunk Mts. and forms a tributary of the Delaware. Shawangunk River flows N. along the E. foot of the same mountains and forms a tributary of the Hudson. Wall Kil flows N. through near the center of the co. and unites with the Shawangunk in Ulster co. Murderers Kil,[2] and its principal tributary, Otter Creek, flow E. through near the center of the co. and discharge their waters into the Hudson. Wawayanda Creek flows S. into N. J. and, re-entering the State as Potuck Creek, unites with the Wall Kil. Ramapo River rises in the S. part of the co. and flows S. into Rockland. In the S. are several small lakes, the principal of which are Greenwood Lake and Thompsons and Manhasha Ponds. The rocks of the southern highlands are principally granite, gneiss, and sienite, with occasional injected veins of trap. The rocks which compose the Shawangunk Mts. are the shales and sandstones of the Chemung group. The central portions of the co. are occupied by parallel strata of the Hamilton shales, Helderbergh limestones and grit, Medina sandstone, and the gray sandstones, all extending N. E. and S. W., respectively, from the E. foot of the Shawangunk Mts. An abundance of iron, consisting of magnetic ores and red and brown hematite, is found among the southern mountains; and several veins have been extensively worked.[3] The soil is as various as the surface. Among the primitive mountains it is light, sandy, and unproductive. In the N. W. part it is a tough clay, generally underlaid by hardpan. Through the center it is a clay, sandy, and gravelly loam upon the hills, and a fine quality of gravelly loam and alluvium in the valleys,—all very productive. The Drowned Lands are covered with alluvium and vegetable mold, and are among the most fertile lands in the State. The various branches of agriculture form the leading pursuit of the people. The most important interest is the sending of milk to the N. Y. market. Butter, spring grains, and fruits are also largely produced. Market gardening is a large and increasing source of public wealth. The manufacturing interests of the co. are considerable, though they are mostly confined to a few places. The manufacture [illegible]

sive business from an early period until within a few years; but at the present time only two furnaces are in operation in the co. The proximity to New York renders the lands of the co. exceedingly valuable; and, with proper care, almost any crop adapted to the climate can be successfully and profitably cultivated. Considerable commerce is carried on by means of the Hudson, the principal export being lumber brought from the West upon the R. R. and trans-shipped at Newburgh.

The county is a half-shire, the courts being held respectively at Goshen and Newburgh.[1] The courthouse at Goshen is a brick building, situated upon a fine lot in the E. part of the village. The jail is a stone building, in rear of the courthouse. The co. clerk's office is a fireproof brick building, upon the street opposite the courthouse. The courthouse at Newburgh is located upon the high land in the W. part of the village. It is a fine brick building, fronting S. upon Second St. The jail at Newburgh is connected with the police establishment of the village. The poorhouse is located upon a farm of 267 acres in Goshen, 3¼ mi. S. W. of the village. The average number of inmates is 200, supported at a weekly cost of $1.04 each. The building is of stone, and has accommodations for 300. A school is taught during the entire year. The accommodations are reported by the Senate Committee of 1857 as good, and the general management of the institution as much above the average. The income from the farm is about $2,000. The N. Y. & Erie R. R. extends through Monroe, Blooming Grove, Chester, Goshen, Wawayanda, Walkill, Mount Hope, and Deerpark. The Newburgh branch of this road extends S. W. from Newburgh, through New Windsor and Blooming Grove, to Chester.[2] The Delaware & Hudson Canal extends from the Delaware River N. along the valley of the Neversink, through Deerpark.[3] In the central part of the co. a wide ditch has been dug, for the purpose of draining the Drowned Lands, which has been of immense value to the county.

Thirteen newspapers—1 daily, 9 weekly, 2 semi-monthly, and 1 monthly—are published in this co.[4]

[1] The first courts were held at Tappantown, in the present town of Orangetown, Rockland co., March 8, 1702. Courts were first held at Goshen in 1727. The first co. officers under State authority were John Haring, *First Judge*; Thos. Moffat, *Co. Clerk*; Isaac Nicoll, *Sheriff*, and James Everett, *Surrogate*. Jesse Woodhull was appointed sheriff May 8, 1777, a few months previous to Nicoll, but was not commissioned. A courthouse was built at Goshen in 1773, by James Webster, a Scotch Highlander, who served under Wolfe at the battle before Quebec in 1759. This building was afterward converted into a jail, and a portion of it is now used as a public house.

[2] The immense quantities of lumber brought from the pine forests of Allegany, Cattaraugus, and Steuben, over the N. Y. & E. R. R., are principally carried to Newburgh and trans-shipped. Milk trains run daily upon this road for the purpose of carrying the immense quantities of milk produced here to the N. Y. market. The milk business is the most important of all the local business of the R. R.

[3] This canal extends through the valley lying at the W. foot of the Shawangunk Mts. to Port Jervis, and thence up the valley of the Delaware to the W. bounds of the co.

[4] *The Goshen Repository*, the first paper published in Orange co., was commenced at Goshen in 1788 by David Manderville. A few years after, it was issued by Manderville & Westcott, and in 1800 it was sold to G. Hurton and Gabriel Denton, who changed the name to

The Orange County Patriot. In 1801 or '02 it passed into the hands of Wm. A. Carpenter, who changed it to

The Friend of Truth. In 1804 Ward M. Gazley became proprietor, and changed its name to

The Orange Lion; and soon after the office was burned and the paper discontinued.

The Newburgh Packet was started at Newburgh in 1795 by Lucius Carey, and was continued a few years.

The Mercur was commenced at Newburgh Sept. 22, 1796, by Philip Van Ilrne. In 1803 it was merged in

The Recorder of the Times, published by Dennis Codes. In 1806 Ward M. Gazley became proprietor, and the name was changed to

The Political Index. In 1820 Charles M. Cushman became publisher, and the name was changed to

The Orange Telegraph. Within a few years it was changed again to

The Newburgh Telegraph, and has since been issued respectively by H. H. Van Dyck, Elias Pitts, and I. M. Ruttenber, until 1857, when it passed into the hands of Joseph Lawson, by whom it is now published.

The New Windsor Gazette was commenced at New Windsor in 1797 by Jacob Schultz. In 1799 it was removed to Newburgh, and its name was changed to

The Orange County Gazette. John W. Barber and David Denniston afterward became interested in its publication. About 1803 it was changed to

The Citizen, and soon after it was merged in

The Rights of Man, which was commenced at Newburgh in 1799 by Elias Winfield, and was continued until 1803 or '10.

The Orange County Gazette was commenced at Goshen in 1805 by John G. Hurton and Gabriel Denton. It was successively issued by Gabriel Denton, Elliott Hopkins, F. F. & A. O. Houghton, until 1815, when Luther Pratt became the proprietor, and changed it to the

Independent Republican, and removed it to Montgomery, where it was published some years. It afterward passed into the hands of James A. Cleaver, who removed it back to Goshen. In 1831 H. H. Van Dyck became proprietor. It was subsequently issued by V. M. Drake, Moses Sweezy, Clark and Montanye, James McNally, and Montanye & Green. It is now published by J. V. Montanye & Co.

The Orange County Republican was published at Wards Bridge in 1806.

The Orange County Patriot and Spirit of '76 was commenced at Goshen in 1808 by Gabriel Denton. In 1818 it was changed to

The Orange County Patriot, and was issued by Timothy B. Crowell. R. C. S. Hendries afterward became proprietor, and continued it until 1832, when it came into the hands of E. T. Parsons, who changed it to

The Goshen Democrat. It was soon after published by Mead & Webb; and in 1845 it was united with the Tru Whig, as

The Goshen Democrat and Whig. In a few years the name Whig was dropped, and the paper again appeared as

The Goshen Democrat, under which title it is now published by Charles Mead.

The Newburgh Gazette was commenced in 1822 by J. D. Spaulding. It was successively issued by Spaulding & Parmenter, Spaulding & Bisevois, Bisevois & Leslie, Wallace & Street, S. T. Callahan, and Wm. L. Allison, until 1856, when it passed into the hands of E. W. Gray, its present publisher.

The Evangelical Witness, mo., was published a short time at Newburgh in 1824 by Rev. Jas. R. Wilson.

The Orange County Farmer was commenced in 1826 at Goshen by Samuel Williams. It afterward passed into the hands of Luther Pratt, who removed it to Montgomery, where it was continued but a short time.

The Beacon was published a short time at Newburgh in 1828 by —— Beebe.

Journal of the American Association, mo., was published at West Point in 1830. It was the organ of an association of cadets for the promotion of science, literature, and the arts.

The Orange Herald was published at Slate Hill, in Wawayanda, by John G. Wallace in 1831.

The Republican Banner was commenced at Walden, in Montgomery, in June, 1831, and was continued several years.

The first settlements in the co. are supposed to have been made by the Dutch soon after the occupation of Manhattan Island. Traces of an early occupation were found near the [illegible] of the progenitors of the present race, among which was a road known as the Old Mine Road, extending from the s. line of the co. along the valley of the Shawangunk to Esopus, on the Hudson. These settlements were broken up; and no record is left of them. The next race of settlers came in about the commencement of the 18th century and located in various parts of the co. They were Dutch, French Huguenots, and English, nearly all seeking Liberty in the Wilderness. The first patent issued was the Minisink Patent, in 1697, embracing the greater part of the co. lying upon the Shawangunk Mts., and a considerable portion of Sullivan co. The remaining portions of the co. were embraced in Chesecock's Patent,[1] issued in 1702, embracing the S. E. part; the Wawayanda Patent,[2] issued in 1703, embracing the W. and N. parts; and the John Evans Patent,[3] the precise date of which is not known. The boundaries of these various patents were so vague that it was found impossible to locate them without conflicting with others; and serious difficulties arose between the different claimants.[4]

The policy of granting large patents was soon abandoned, and the remaining parts of the co. were patented in small tracts to actual settlers, from about 1718 to 1750. The settlements progressed but slowly, in consequence of the fear of Indian hostilities. During the French War of 1755 the frontier settlements were often attacked by small parties of hostile Indians and the defenseless inhabitants were murdered and carried into captivity. The principal weight of these attacks fell upon the settlements in the Neversink Valley. During the Revolution the [illegible] were again constantly in a state of alarm. In July, 1778, Brant, at the head of a large Indian force, laid waste the whole Minisink settlement; and on his retreat the disastrous battle of Minisink was fought, in which nearly the whole force of the Americans was destroyed.[5]

The eastern part of the co. was also the scene of stirring military events. The importance of the passes through the Highlands was early appreciated by Washington, and strong fortifications were thrown up at various points to protect them. Fort Montgomery was erected on the river, at the s. line of the co., and Fort Clinton on the opposite side of a small creek in Rockland co. Several

other forts were built both above and below these, and chains were stretched across the river and various impediments were sunk in the channel, to prevent the passage of vessels. Gen. Putnam was left in command of these positions in 1777, when Gen. Howe marched to attack Philadelphia, but with an entirely inadequate force. About the 1st of October, Sir Henry Clinton, in command at New York, sent a force up the river to aid Gen. Burgoyne, who was then hard pressed by the American army. This force first landed at Verplancks Point on the 5th, but in the night following re-embarked, landed on the opposite shore, and on the 6th surprised and captured both Forts Montgomery and Clinton.

The official reports make the loss of the British and Americans about equal; but, as the former were fully exposed to a galling fire while approaching the works, and the latter mostly escaped, it is supposed that the British loss was much greater. The other American works were abandoned, and Gen. Putnam retreated to Fishkill. The British spent some time in removing the various obstructions from the river, and advanced slowly northward, plundering and destroying on their way. They reached Esopus on the 15th, and at the same time Gen. Putnam, whose force had been augmented to 6,000 men by Conn., N. Y. and N. J. militia, sent a detachment of 2,000 to take possession of Peekskill. The British, afraid to go farther N. with such a force in their rear, remained at Esopus until they received news of the surrender of Burgoyne; and then they returned to New York.

The result of this expedition demonstrated the necessity of stronger fortifications among the Highlands, and during the following winter the site of West Point was fixed upon, as the strongest and most eligible on the river. Earthworks were thrown up early in the spring, and from time to time more formidable works were added, until, at the close of the war, it was the most strongly fortified of any place in the country.[1]

It was afterward the center of the American operations in the North. In the spring of 1780, Gen. Arnold, who had not entirely recovered from the effects of a wound received at Saratoga, solicited and received the command of this post. The instruction which gave him this command was dated Aug. 3, 1780. Arnold had been in correspondence with the British for more than a year; and he soon negotiated with Sir Henry Clinton to deliver up West Point, for the sum of £10,000 in gold and a commission of Maj. Gen. in the British army. The final consummation of the compact on the part of the British was intrusted to Maj. Andre, who crossed the American lines in disguise and held an interview with Arnold on the 22d of Sept. Upon his attempting to return to New York, he was arrested as a spy, and the whole scheme was discovered. Arnold escaped to New York, and Andre was subsequently executed.[2]

The headquarters of the American army of the North was for a long time at Newburgh; and it was at this place that Washington finally took leave of his army,[3] Aug. 18, 1783.

BLOOMING GROVE—was formed from Cornwall, March 23, 1799. A part of Hamptonburgh was taken off in 1830, and a part of Chester in 1845. It lies a little E. of the center of the co. Its surface is mountainous in the S. and E., and rolling and moderately hilly in the N. and W. Schunemunk Mts., upon the line of Monroe, are 1,300 to 1,500 ft. above tide. The other principal elevations are Lazy Hill, on the line of Chester, Toms Rocks, Peddlers, Rainer, Round, Musquito, and Woodcock Hills, and Red Ridge. These hills are generally too steep and rocky to be ever susceptible of cultivation. The hills in the N. have more gradual slopes, and are arable to their summits. Otter Kil flows E. through the N. part, and receives as tributaries Cromlin,[4] Slatterleys, and several smaller creeks. The extensive bog meadows along Cromlin Creek, in the S. part, have been drained, and are now the most valuable agricultural lands in the town. The soil is a sandy and clayey loam. **Washingtonville,** (Blooming Grove p. o.,) upon Otter Kil, in the N. part, contains 3 churches and 369 inhabitants; **Salisbury Mills,** (p. v.,) upon the line of Monroe, a church, paper mill, gristmill, and 241 inhabitants; and **Craigsville,** (p. v.,) in the W. part, a church, cotton factory, and 20 dwellings.[5] These places are all stations upon the Newburgh Branch of the N. Y. & E. R. R. **Blooming Grove,** near the center, contains 1

[1] The erection of these works was intrusted to Kosciusko, the Polish patriot, then serving as a volunteer in the American army in the capacity of a military engineer. The works consisted of a formidable battery upon the bluff immediately upon the shore, named Fort Clinton, a strong fort upon Mt. Independence in the rear, named Fort Putnam, and several redoubts and outposts.

[2] Andre was executed at Tappantown, Rockland co., Oct. 2, 1780.

[3] In the spring of 1782, while the army was stationed at Newburgh, a feeling of discontent arose among the officers and men, in consequence of the arrearages in their pay and the hardships they were called upon to endure. This was promptly checked by Washington, and a formidable conspiracy was broken up.

CHESTER—was formed from Goshen, Warwick, Blooming Grove, and Monroe, March 22, 1845. It is an interior town, lying a little s. w. of the center of the co. The surface is rolling in the N. They contain the Chester Academy, a bank, 2 churches, and about 1,500 inhabitants. **Sugar Loaf,** (p. v.) in the [illegible], contains a church and 36 dwellings. The first settlement was made in 1716, at Gray Court, in the N. E. corner of the town, by Daniel Cromline, from Long Island.[3] There are 3 churches in town; 2 M. E. and Presb.

CORNWALL—was formed March 7, 1788, as "*New Cornwall*." Its name was changed March 3, 1797. "*Chesecocks*," now Monroe, was taken off in 1799. It lies upon the Hudson, in the E. part of the co. The surface is principally occupied by rocky peaks and ridges of "The Highlands." Their declivities are usually very steep, and their summits are masses of rocks, in some [illegible] ered with a scanty growth of dwarfed forest trees. The highest peaks are Butter Hill, Crows Nest, and Bear Mountain,—respectively 1,529, 1,418, and 1,350 ft. above the river.[4] The valleys among the mountains are deep, narrow, and rocky. A small portion of the N. W. part of the town is rolling or moderately hilly. The principal streams are Murderers Creek and its principal tributary, Quassaick, flowing through broad, beautiful valleys in the N. part, and Bog Meadow Creek, emptying into the Hudson below West Point. Upon the latter, near its mouth, is a series of cascades, known as Buttermilk Falls. Cranberry, Long, Sutherlands, and Bog Meadow Ponds are small bodies of water among the mountains. The soil in the valleys is a sandy, clayey, and gravelly loam. The hills are too steep and rocky for cultivation. **Canterbury,** (Cornwall p. o.) in the N. E. part of the town, contains 4 churches, a woolen yarn factory, and tannery. Pop. 428. **Cornwall Landing,** on the Hudson, in the N. E. part, is the center of extensive brick manufactories. Pop. 615. **West Point,** (p. o.) on the Hudson, is the seat of the U. S. Military Academy. It contains extensive barracks for the cadets and soldiers, 20 officers' quarters, a philosophical building, containing the library, apparatus, and observatory, a laboratory for ordnance and ammunition, a chapel, hospital, riding hall, stable, equipment shed, Catholic church, and 150 dwellings for employees.[5] **Buttermilk Falls,** (p. v.) 2 mi. below West Point, contains [illegible] and 307 inhabitants. **Fort Montgomery,** (p. v.) in the S. E. part, contains [illegible] 16 dwellings; **Bethlehem,** in the N. W., a church and 12 dwellings. **Ketchamstown,** in the W., and **Townsville,** in the N., are hamlets. The first settlements are supposed to have been made about 1720.[6] The first church (Presb.) was formed in 1730, at Bethlehem; Rev. Mr. Chalker was the first pastor, and Rev. Enos Ayres the second.[7] Fort Putnam, of the Revolution, was situated immediately in the rear of West Point, and Fort Montgomery on the S. E. border of the town.[8] Idlewild, the residence of N. P. Willis, is near the Hudson, in the N. E. part of the town.

[1] Among the early settlers were the families of Strong, Prowster, Howell, Daines, Corwin, Moffatt, Seely, Gilbert, Woodhull, Tuthill, Goldsmith, Brooks, and Mathews.

[2] There are 8 churches in town, 4 M. E., 2 Cong., Presb., and Friends.

[3] In company with others, Mr. Cromline purchased the Wawayanda Patent of Philip Rockby and Hendrick Ten Eyck. He was accompanied by Wm. Bull, an Englishman, whom he had hired from an emigrant ship. During the first year of settlement he erected a house long afterward kept as a tavern and known as the "Cromline House." Its sign was the king's coat of arms; and as the colors became gray with age it was called the "Gray Coat," and in after years, a court being held in the house, its name was changed to the "Gray Court." The name of the stream, meadows, and hamlet was derived from this.

[4] The other principal elevations are Black Rock and Deer Hills, near the center; Ant Hill, Lawyers Hill, and Mount Rascal, in the S. W.; and Peat, Pine, Cold, and Round Hills, in the N. part.

CRAWFORD—was formed from Montgomery, March 4, 1823. It lies in the extreme N. angle of the co. Its surface is a hilly upland, broken by several high ridges extending N. E. and S. W. Collaberg and Comfort Hills, along the E. border, are 300 to 400 ft. above the valleys. The principal streams are the Shawangunk, forming the N. W. boundary, Dwaars Kil, Paugheaughnaughsink and Little Paugheaughnaughsink Creeks. These streams all flow in a general N. E. direction. Upon the Shawangunk is a large amount of water-power. The soil is a slaty and clayey loam upon the hills and a sandy and gravelly loam in the valleys. **Pine Bush,**[1] (p. v.,) on the Shawangunk, in the N. part, contains a sawmill, gristmill, and 120 inhabitants; **Searsville,** (p. v.,) on Dwaars Kil, near the center, a gristmill, 2 sawmills, and 16 dwellings; and **Bullville,** (p. v.,) in the S. part, 12 dwellings. **Hopewell** is a hamlet, in the S. W. **Collaburgh** is a p. o., 2 mi. E. of Bullville. The first church (Presb.) was formed at Hopewell, in 1779. The census reports 2 churches; Presb. and Asso. Ref. Presb.[2]

DEERPARK[3]—was formed from Mamakating, (Sullivan co.,) March 16, 1798. A part of Mount Hope was taken off in 1825. It lies in the extreme W. angle of the co. Its surface is a mountainous highland, broken by the valley of Neversink River and numerous deep, rocky ravines of small streams. The Shawangunk Mts. extend along the E. border, and form a high, rocky ridge 1,800 ft. above the valleys, with steep declivities on the W. The Neversink[4] River flows in a deep valley at the W. foot of the mountains. The central and W. parts are covered with a rocky and mountainous upland, ending in abrupt declivities on Delaware River in the S. The other principal streams are Mongaup River, forming the W. boundary, Bashes[5] Kil, Old Dam Fall Creek,[6] Shingle, and Grassy Swamp[7] Brooks. Big and Little Ponds are two small lakes in the interior. **Port Jervis,**[8] (p. v.,) upon the Delaware, near the mouth of the Neversink, was incorp. May 11, 1853. It is an important station upon the Erie R. R. and Delaware & Hudson Canal. It contains 5 churches, a saw factory, foundery, machine shop, planing mill, newspaper office, and bank. Pop. 3,023. **Honesville,** (Sparrow Bush p. o.,) upon the Delaware, 2 mi. W. of Port Jervis, contains a large tannery and 26 dwellings; **Huguenot,** (p. v.,) upon the canal, 4 mi. N. E. of Port Jervis, 25 dwellings; and **Cuddebackville,** (p. v.,) upon the canal, in the N. E. part, 1 church and 12 dwellings. **Carpenters Point** is a hamlet, at the mouth of the Neversink. The first settlements were made about 1690.[9] There are 7 churches in town.[10] De Witt Clinton was born at Fort De Witt, in this town, March 2, 1769, while his parents were on a visit at the residence of his mother's brother. Lead ore has recently been found in this town.

GOSHEN—was formed March 7, 1788. A part of Hamptonburgh was taken off in 1830, and a part of Chester in 1845. It is an interior town, lying a little S. E. of the center of the co. Its surface is rolling or moderately hilly. The hills are bordered by long and gradual slopes, and are arable to their summits. The S. W. corner is occupied by a portion of the "Drowned Lands," most of which have been reclaimed.[11] The principal streams are Wall Kil, forming the W., and Quaker Creek, the S. boundary, and Otter Kil, in the E. part. The soil is a sandy loam, underlaid by clay, slate, and limestone. **Goshen,** (p. v.,) N. E. of the center, was incorp. March 28, 1809. Besides the co. buildings, it contains 4 churches, a female seminary,[12] several classical schools, 2 newspaper offices, 2 banks, and about 1,800 inhabitants. It is the W. terminus of the Newburgh Branch of the N. Y. & E. R. R., and is an important freight and milk station upon the Erie R. R. The first settlements were made from 1703 to 1714. The first deeds of village lots in Goshen bear the date of 1714. The original Wawayanda Patent,[13] covering the greater part of this town, was granted by Queen

11 Some 2 years ago a ditch, of small size, was dug about 3 mi. in length across a portion of the Drowned Lands, for the purpose of draining them. The water upon the lands was then about 4 feet in depth, but it is said that in some places it was over Wall Kil and much difficulty is experienced in ditching, because of the quicksand.

12 The Goshen Female Seminary is a flourishing institution. Several smaller private schools are located in the village.

13 Christopher Denn, one of the proprietors of the Wawayanda Patent, located [illegible] in 1712. After visiting the place and deciding upon a location, he returned to his residence in Southold, Long Island, and employed carpenters his household goods, and his adopted daughter, Mary Wells, then 16 years of age, to his new home, under the guidance of 3 friendly Indians. The carpenters erected a cabin, and Denn and his wife came on the next day after the cabin was built. Mr. Bull, a young Englishman just arrived in an emigrant ship, [illegible] Among the other early settlers whose names appear as in 1721 were John Everitt, John Carpenter, John Gale, William Luddington, James Jessup, Isaac Finch, Michael Dowling, Solomon Carpenter, William Jackson, Samuel Seely, Samuel Wood, John Yelverton, Samuel Clowes, John Bradner, and John

The first settlements were probably made about 1742.[1] The Chesecocks Patent, granted in 1702, embraced a portion of the Ramapo Valley in this town. There are 5 churches in town.[2]

MONTGOMERY[3]—was formed March 7, 1788. Crawford was taken off in 1823, and a part of Hamptonburgh in 1830. It lies upon the N. border of the co., E. of the center. Its surface is generally a hilly upland. The Comfort Hills,[4] 600 to 800 ft. above tide, extend along the W. border Wall Kil flows N. E. through near the center; and its principal tributary, Tin Brook,[5] flows through the E. part. Upon Wall Kil, in the N. part, is a fall of 40 ft., affording an excellent water-power. Along the same stream, in the S. part, is considerable swamp land. The soil is a fine quality of gravelly loam. **Montgomery,** (p. v.,) upon Wall Kil, S. of the center, was incorp. Feb. 17, 1810. It contains 2 churches, the Montgomery Academy, 3 gristmills, and a sawmill. Pop. 760. **Walden,** (p. v.,) on Wall Kil, 3½ mi. N. of Montgomery, was incorp. April 9, 1855. It contains 3 churches, a shawl factory, satinet factory, and a manufactory of cutlery. Pop. 641. **St. Andrews**, (p. o.,) in the N. E. part, contains 10 dwellings. **Coldenham,**[6] near the E. line, is a hamlet. The earliest patent comprising land in this town was granted in 1709, to Henry Hileman. It was located at the mouth of Tin Brook, below Walden. It was settled by the proprietor and divided into lots in 1712. Lieut. Gov. Cadwallader Colden, the owner of a patent in this town, located at Coldenham in 1728.[7] The first church (Ref. Prot. D.) was formed at Montgomery Village in 1732.[8]

MOUNT HOPE—was formed from Walkill, Minisink, and Deerpark, as "*Calhoun,*" Feb. 15, 1825. Its name was changed March 14, 1833. It lies upon the N. border of the co., N. W. of the center. Its surface is a hilly and broken upland. The Shawangunk Mts. extend through the W. part; the highest summits are 1,400 to 1,800 ft. above tide. Shawangunk River flows N. E. through the center, and the Little Shawangunk along the E. border. The soil is a sandy and gravelly loam. **Otisville,** (p. v.,) near the W. border, contains 2 churches and 309 inhabitants. [1] A family of Smiths settled very early in the town, and from them the town was called "*Smiths Clove.*" Among the early settlers were families of Millers, Galloways, Carpenters, Bulls, Dolsons, Wygants, Wards, Coltons, Noble, Cunninghams, Slaughters, and Lamoreaux,—mostly English families from the Eastern States. The first iron works was that of Ward & Colton, erected in 1751 for the manufacture of anchors. It was situated in Wat works, just over the line from Monroe. In 1752 Abel Noble, from Penn., erected a forge in this town, near the Ward & Colton furnace. Here the first anchor was made in 1753. Steel was made in 1776; and during the Revolution one of the chains thrown across the Hudson was manufactured here. It weighed 180 tons. During the Revolution, Claudius Smith, a noted tory, resided in this town. He was hung at Goshen, Jan. 22, 1779.

[7] Johannes Miller settled on Wall Kil, 2 mi. S. of Montgomery, in 1727. Among the other early settlers were John Neely, Charles Booth, Wm. Eager, Fred. Smashaugh, and Johannes Youngblood,—all of whom settled between 1730 and 1741. The E. part of the town was originally settled by Irish, and the valley of Wall Kil by Hollanders. The first store was kept by Alexander Colden, in 1742; and the first gristmill was built at Walden, by James Kidd. In the fall of 1775 the people of Boston, by reason of the great scarcity of supplies and provisions, applied to this State for aid; and accordingly a public meeting was called, which convened in the town of "*Hanover,*" (now Montgomery.) In the mean time the friends of the mother country, always on the alert, had procured the services of a talented orator for the purpose of defeating the objects of the meeting. As no one could be found among the adherents of the cause of liberty who was able to speak in public, recourse was had to the Rev. Mr. Annan, of Neelytown, who at first declined, but at length consented. A multitude were assembled on the occasion to hear a discussion upon a subject which was then the absorbing topic of the day. The discussion was continued for some time with fairness and ability on either side, until at length, to check a strife of angry words and to test the disposition of the assembly, Mr. Annan suddenly said, "As many as are in favor of assisting the people of Boston and the cause of Liberty, follow me." The effect was electric. Immediately upon his leaving the house he beheld, to his utter astonishment, the whole multitude at his heels.—*Eager's Hist. Orange Co., p. 636.*

[8] There are 7 churches in town; 2 Ref. Prot. D., 2 M. E., Prot. E., Presb., and Covenanter. The Ref. Prot. D. church, near Montgomery, has connected with it a farm of 75 acres, valued at $5,000, and a parsonage.

manufacture. **Moodna**[1] (p. o.) contains a cotton factory, paper mill, and 10 dwellings. **Mortonville,** (p. o.,) in the S. E. part contains 1 church, a gristmill, and 6 dwellings. **Little Britain,** near the center, is a p. o. The first settlements were made in 1731, by several emigrants from Ireland, prominent among whom was Col. Charles Clinton, grandfather of De Witt Clinton.[2] The first church (Asso. Ref.) was formed at Little Britain, in 1760; Rev. Robert Annan was the first pastor.[3]

WALKILL—was formed March 7, 1788. A part of "*Calhoun,*" now Mount Hope, was taken off in 1825, and a part of Hamptonburgh in 1830. It lies upon the N. W. border of the co., N. E. of the center. Its surface is a hilly and broken upland. The principal streams are Shawangunk River, forming the N. W. boundary, and Wall Kil, forming a part of the S. E. boundary. Monhagan Creek and several other streams are tributaries of these two. The soil is a clayey and gravelly loam. **Middletown,** (p. v.,) in the S. part, was incorp. Feb. 10, 1848. Next to Newburgh, it is the largest village in the co. It contains 7 churches, the Walkill Academy, several private seminaries, 2 banks, 2 newspaper offices, and several manufacturing establishments.[4] It is an important freight and milk station upon the Erie R. R.[5] Pop. 1,873. **Circleville,** (p. v.,) 5 mi. N. of Middletown, contains 2 churches and 16 dwellings. **Scotch Town,** (p. v.,) 4 mi. N. E. of Middletown, contains 1 church and 20 dwellings. **Howells Depot,** (p. v.,) a station upon the R. R., 4 mi. N. W. of Middletown, contains a church and 15 dwellings. **Mechanic Town,** 2 mi. E. of Middletown, contains a woolen factory and 20 dwellings. **Philipsburgh** and **Rockville** are hamlets. The first settlement was made by Wm. and Thomas Bull, sons of Wm. Bull, of Goshen, who located upon Wall Kil in 1767.[6] There are 12 churches in town.[7]

WARWICK—was formed March 7, 1788. A part of Chester was taken off in 1845. It lies upon the line of N. J., in the extreme S. angle of the co. Its surface is mountainous in the S. and E. and broken and hilly in the N. and W. The principal mountain ranges are the Sterling, Rough, and Warwick Mts. in the S. E., and the Bellvale Mts. in the E.[8] They are high, steep, and rocky, and have all the characteristics peculiar to a wild, mountain region. In the extreme W. part is a nearly level region, occupied by the Drowned Lands.[9] Several eminences in the midst of these lands are denominated islands.[10] The principal streams are Wall Kil, forming the W. boundary, Quaker Creek, forming the N. W. boundary, and the Wawayanda, or Warwick, and Pochuck Creeks. Greenwood Lake, upon the S. line, extends about 4 mi. into this town. The other principal bodies of water are Sterling, Wickhams, and Thompsons Ponds, near the E. border. The soil is light and unproductive upon the hills, and a gravelly and sandy loam in the valleys. **Warwick,** (p. v.,) on Wawayanda Creek, near the center of the town, contains 3 churches, the Warwick Institute, and 358 inhabitants. **Florida,** (p. v.,) in the N. part, contains 3 churches, the S. S. Seward Seminary,[11] and 45 dwellings; **Amity,** (p. v.,) in the W. part, 1 church and 30 dwellings; **Edenville,** (p. v.,) 2 mi. N. E. of Amity, a church and 24 dwellings; **New Milford,** (p. v.,) in the S. part, a church and 26 dwellings; **Bellvale,** (p. v.,) in the E., a church and 192 inhabitants; and **Dutch Hollow,** 2 mi. S. E. of Bellvale, a church and 15 dwellings. **Sterling Works,** in the extreme S. part, is a hamlet.[12] The precise date of the first settlement is unknown. Daniel Burt, from Conn., came into town in 1746.[13] The first church (Presb.) was formed in 1764, and the second (Bap.) in 1766.[14] Hon. Wm. H. Seward was born at the village of Florida.

1 Name derived from Murderers Creek, and bestowed by N. P. Willis. Formerly known as Orangeville.

2 In 1732 or '33, families named Allen, Ellison, Chambers and Lawrence settled upon the present site of New Windsor Village. The belligerents of the American army were at this place at one time during the Revolution.

3 There are 6 churches in town: 3 M. E., Presb., Prot. E., and Asso. Ref.

4 The principal establishments are a carpet bag factory, file factory, grain cradle factory, hat factory, 2 sash and blind factories, and a foundery and machine shop. In the aggregate these factories employ about 300 hands, and manufacture goods to the amount of $400,000 annually.

5 2,000 gall. of milk are sent daily to N. Y. from the R. R. stations in this town.

6 Among the other early settlers were families named McCord, McNeal, Borland, Rogers, Butterfield, Wisner, Murray, M. Carter, McVey, M. Wherter, M. Dennis, McLaughlin, Campbell, Watkins, and Faulkner, the most of whom were Scotch emigrants.

7 4 Presb., 3 Bap., 2 Cong., 2 M. E., and 1 R. C.

8 The principal elevations in town are Hogback, Decker, Pine, and Bulls Hills, in the E.; Bill and Coxsinde Hills, in the center; Long, Cedar, Pond, and Bill Whites Hills, in the S.; Round, Rocky, and Chucks Hills, in the S.; Pochuck Mt. and Green and Adneys Hills, in the W.; and Mts. Adam and Eve, and Round Hill, in the N. W.

9 These lands have mostly been drained and converted into the most valuable meadows.

10 Among these eminences are Pine, Merritt, Gardners, Black Walnut, Cranberry, and Fox Islands.

11 This seminary was founded about 1845, by Judge S. S. Seward, father of Wm. H. Seward, who endowed it with a fund of $20,000.

12 Sterling Works receives its name from the iron works located upon the outlet of Sterling Pond. The manufacture of iron has been carried on at this place for 100 years or more. Gen. Wm. Alexander, Lord Sterling, is said to have been interested in them at one time; and hence their name. Anchors and steel were manufactured here during the Revolution. 12 to 15 tons of pig iron are now made here per day.

13 Among the other early settlers were Thos. Willing, Daniel Whitney, Benj. Burt, John Vance, and David McCauley. The first mill was built by David Burt, at Bellvale, in 1760. Many of the early settlers were Dutch, and others English, from Mass. and Conn.

14 There are 11 churches in town; 6 M. E., 3 Presb., Bap., and Ref. Prot. D.

WAWAYANDA[1]—was formed from Minisink, Nov. 15, 1849. It is an interior town, s. w. of the center of the co. Its surface is rolling and hilly. The highest summit is Bear Hill,[2] in the N. W. part. The Drowned Lands occupy a portion of the N. E. corner. The principal streams are Wall Kil, forming the S. E. boundary, Rutgers Creek, forming the S. W. boundary, Wawayanda Creek, in the W. part, and Monhagan Creek, in the N. E. corner. The soil is a clay and sandy loam, and is best adapted to pasturage.[3] **New Hampton,** (p. v.) on Wall Kil, in the N. E. corner, contains a gristmill, sawmill, and 25 dwellings: **Denton,** 1 mi. S. W. of New Hampton, 1 church and 25 dwellings; **Ridgebury,** (p. v.) near the center, 2 churches and 30 dwellings; **Slate Hill,** (p. v.) 1 mi. W. of Ridgebury, 1 church and 25 dwellings; **Centerville,** in the W. part, 1 church and 15 dwellings: **Millsburgh,** (Wells Corner p. o.) 1 mi. S. of Centerville, on the line of Minisink, a grist and saw mill and 15 dwellings; and **Gardnersville,** in the S. part, on the line of Minisink, a gristmill, sawmill, and 15 dwellings. The first settlements are supposed to have been made previous to 1700.[4] There are 5 churches in town; 3 Presb., M. E., and Bap.

ORLEANS COUNTY.

THIS county was formed from Genesee, Nov. 11, 1824; Shelby was annexed from Genesee April 5, 1825. It lies on Lake Ontario, between Monroe and Niagara cos., centrally distant 232 mi. from Albany, and contains 405 sq. mi. Its surface is level or undulating, and, except in the extreme s. part, it has a gradual inclination toward the lake. It is divided into three distinct plateaus by the lake and mountain ridges,[1] which extend E. and W. through the co. nearly parallel to the lake shore. The lower plateau slopes slightly and uniformly upward from the lake shore to the lake ridge, a distance of 6 to 8 mi., where it attains an elevation of about 165 feet. This ridge is composed of sand and gravel, and its seaward side is covered with coarse gravel and water-worn pebbles, resembling the present lake beach.[2] It is elevated 20 to 30 feet above the lower plateau, to which it descends with a gentle inclination uniform in its whole extent. There is generally a similar slope upon its inland side; but in many places the level of the country is nearly and sometimes quite as high as that of the ridge. The ridge is 100 to 300 feet wide at the top, and nearly level. From the earliest settlement of the co. its summit has been used for a road. The second plateau is gently undulating, and 4 to 6 mi. wide, attaining an altitude of about 300 feet at the base of the mountain ridge. This ridge, entering from Niagara co., runs nearly E. through the towns of Shelby and Barre, and S. and E. through Clarendon. It preserves the character of a steep declivity in Clarendon and Shelby, but in Barre its ascent is gradual. The upper plateau is undulating, and from the mountain ridge southerly it gently rises for about 2 mi. to the culminating ridge, which is the highest land in the co. and nearly 450 feet above the lake. For about 2 mi. further the surface is quite level; and thence it gradually descends to the Tonawanda Swamp, on the S. border of the co. The principal streams are Oak Orchard,[3] Johnsons,[4] and Sandy Creeks, which take their rise in or near the Tonawanda Swamp and flow N. and E. to the lake. Their channels are deeply excavated; and upon them are numerous waterfalls and rapids.

The underlying rock of the N. part is the Medina sandstone; while the upper plateau rests upon a base of Niagara limestone. Along the ridge in Clarendon and on the banks of Oak Orchard Creek in Shelby are outcrops of this limestone. Hydraulic limestone has been obtained from both these localities, and quicklime is burned at various places along the ridge. The upper layers of the Medina sandstone afford an excellent material for building and flagging purposes, and several quarries have been opened at Medina and other places on the line of the canal. Elsewhere in the co. this rock is friable, and readily disintegrates upon exposure to the atmosphere. It separates at first into small, angular fragments, and then decomposes into a dark red, loamy clay. Numerous salt springs originate in this formation, from which salt was manufactured until, by the completion of the Erie Canal, they were brought into competition with the salines of Onondaga.[5] The soil in the N. part of the co. is generally sandy; but it is everywhere modified by the underlying formation; and near the lake are several tracts in which clay predominates. In the S. it is a mixture of clay, sand, and lime, and the whole is well adapted to grain raising. The various branches of agriculture form the leading pursuits. Barley, oats, corn, beans, and potatoes are the principal crops,[6] and considerable quantities of apples and other fruits are raised. A limited amount of manufactures is carried on within the co.

The county seat is located at Albion,[7] on the Erie Canal, in the central part of the co. The

[1] The lake ridge has been at some time the lake shore; the mountain ridge was at the foot of the mountain ridge at Niagara co., and a bluff on the east side of the Niagara River.

[2] The present slope toward this slope has become somewhat obliterated by cultivation.

[3] So named from a fine grove of oaks formerly at its mouth.

[4] Named after Sir Wm. Johnson, who, with his troops, encamped at its mouth one night when on his way to Fort Niagara in 1759.

[5] Salt works were erected at a spring near Oak Orchard Creek, about 1 mi. S. of Medina, at Holley, and at Oak Orchard, and salt was made by the early settlers in nearly every town N. of the road. A boring of 110 feet at Oak Orchard resulted in slightly increasing the strength of the brine, but not its quantity; and at other places, by blasting and boring, the springs were destroyed.

[6] Wheat was formerly the principal crop of this co.; but of late the ravages of the midge have been so extensive that its cultivation has been nearly abandoned.

[7] Previous to the erection of the co. buildings at Albion, the courts were held at the house of Selah Bronson, in the village of Gaines. The commissioners appointed by the Legislature to locate the county seat were Philetus Swift, of Phelps, Ontario co., Victory Birdseye, of Onondaga co., and J. Hathaway, of Cortland co. The site of the co. buildings was deeded to the supervisors by Nathaniah Ingersoll; and the courthouse was built in 1827. Gilbert Howell, of Ridgeway, Elihu Mather, of Gaines, and Calvin Smith, of Barre, were the commissioners

town of Barre, 3 mi. s. of Albion. Its average number of inmates is 56, supported at a weekly cost of 80 cts. each. The farm yields a revenue of about $700.

The works of internal improvement in the co. are the Erie Canal, extending through near the center; the Tonawanda Swamp Feeder, conducting the waters of the swamp into Oak Orchard Creek; and the

Three weekly newspapers are now published in the co.[3]

Long before the advent of the whites this co. was the hunting ground and probable residence of the

distinct race.[4] The 3 eastern towns of the co. belonged to the Conn. Tract and the Pulteney Estate, and the remaining part of the co. to the Holland Purchase. There is a tradition that a Canadian, with his family, settled at the mouth of Oak Orchard Creek as early as 1792–93; but his stay was of short duration, and by some he is now regarded as a myth. The first permanent settlers were James and Wm. Walsworth, two brothers, who came from Canada by the way of the lake, and who located respectively at the mouths of Oak Orchard and Johnsons Creeks, in the present town of Carlton. A few settlers came in each year until 1809, when the great natural thoroughfare, the ridge road, was opened, inducing a much more rapid influx of settlers. Immi-

Upon the capture of Fort Niagara by the British, in 1813, many of the people fled from their homes, but soon returned.[5] After the return of peace, the tide of immigration again set in toward this region, and continued to flow steadily and uninterruptedly for several years. The settlers generally chose locations in the immediate vicinity of the ridge road, and continued to do so until the completion of the Erie Canal, when the regions further s. began rapidly to fill up.

(p. v.,) the county seat, was incorp. April 21, 1828. It is situated on the Erie Canal, in the N. part of the town, and is the principal station upon the N. Y. C. R. R. between Rochester and Lockport. It contains 5 churches, the Phipps Union Female Seminary,[1] the Albion Academy, a bank, 2 newspaper offices, and several manufactories.[2] Pop. 3,776. **Barre Center,** (p. o.,) 4 mi. S. of Albion, contains 30 dwellings. **Eagle Harbor** lies partly in this town. **South Barre** (p. o.) and **Jacksons Corners** (West Barre p. o.) are hamlets. **Rich's Corners** is in the N. E. part. Settlement was commenced by Wm. McAllister, in 1811.[3] The first church (Cong.) was organized Nov. 5, 1816, by Revs. Eleazur Fairbanks and Comfort Williams.[4]

CARLTON—was formed from Gaines and Ridgeway, April 13, 1822, as "*Oak Orchard.*" Its name was changed in 1825. It lies on the lake shore, between Kendall and Yates, and is crossed in a N. E. direction by Oak Orchard and Johnsons Creeks. The surface is level, and the soil generally sandy. Salt water has been discovered near West Carlton.[5] **Carlton,**[6] (p. o.,) **East Carlton,** (p. o.,) **West Carlton,** (p. o.,) **Waterport,** (p. o.,) **Kenyonville, Carlton Center,** and **Manilla** are hamlets. Settlement was commenced in 1803, by two brothers, James and William Walsworth,—the former at the mouth of Oak Orchard Creek, the latter on Johnsons Creek. Matthew Dunham and his sons Matthew, James, and Charles, from N. Y. City, settled near Johnsons Creek in the fall of 1803.[7] The first church (M. E.) was organized at West Carlton, about 1816.[8]

CLARENDON—was formed from Sweden, Monroe co., Feb. 23, 1821. It is the S. E. corner town of the co. The E. branch of Sandy Creek rises in the Tonawanda Swamp and flows N. Upon this stream are two waterfalls,—one at the village of Clarendon and the other in the N. part of the town. Along the line of the mountain ridge the surface is broken, and elsewhere it is gently rolling or level. The soil is a sandy loam; in the N. stony. Limestone for building purposes and hydraulic limestone have been obtained at Clarendon. **Clarendon**[9] (p. v.) contains 2 churches, a limited number of manufactories,[10] and about 30 dwellings. The first settlement was made in 1811, at the village of Clarendon, by Eldridge Farwell.[11] There are now 3 churches in town.[12]

GAINES[13]—was formed from Ridgeway, Feb. 14, 1816. Barre was taken off in 1818, and a part of Carlton in 1822. It is the central town in the co. It is crossed by Otter and Marsh Creeks, branches of the Oak Orchard, and by the W. branch of Sandy Creek. The lake ridge extends E. and W. through the center. The surface is level and the soil sandy. **Eagle Harbor,** (p. v.,) on the Erie Canal, contains 2 churches, 2 flouring mills, and a large stave factory and cooperage. Pop. 639,—509 in Gaines and 130 in Barre. **Gaines**[14] (p. v.) contains 2 churches and 342 inhabitants. **East Gaines** and **West Gaines** are p. offices; and **Fairhaven** and **Gaines Basin,** on the canal, are hamlets. The first settlement was made prior to 1809, by —— Gilbert. Noah Burgess, Samuel Crippen, —— Elliott, and Elijah Downer came in 1809.[15] The first church (Bap.) was organized in 1816.[16]

[1] The Phipps Union Female Seminary was established in 1833. The main building was erected in 1836, and additions have been since made, until the whole outlays have reached $20,000. The average number of pupils is about 250.

[2] Flouring mills, furnaces, a woolen factory, a tannery, a cabinet ware manufactory, and a planing mill.

[3] McAllister settled on the present site of the Phipps Female Seminary, near the courthouse. Among the earliest settlers were Joseph Stoddart, Reuben Clark, Joseph Hart, and Elijah Darrow, who located in the N. part of the town in 1812. The first death, that of Mrs. McAllister, occurred in Sept. 1811. The first sawmill was built by Wm. Whiteman 1816, on Sandy Creek, a little E. of Albion; the first gristmill, in 1819, by Wm. Bradner, near the same place; and the first tavern was kept by Abraham Mattison, in 1815, at Benjamin Corners about 2 mi. S. of Albion. The first school was taught by Mrs. Cyrus Benton.

[4] There are 7 churches in town; Presb., Bap., Prot. E., M. E., and R. C. at Albion, Cong. at Barre Center, and M. E. at Jacksons Corners.

[5] Lyman Fuller, in digging a well, bored through a stratum of rock, and obtained salt water of such strength that 2 gals. yielded a pint of salt. The hole through the rock was plugged up, and fresh water came in from above.

[6] Locally known as "Two Bridges."

[7] In 1804, Elijah Hunt, Henry Lovell, Moses Root, Elijah Brewer, and Job Shipman settled in this town. The first death in town, unless it was that of a member of the Canadian family mentioned on page ——, was that of a deserter from Fort Niagara, who was drowned in attempting to cross Johnsons Creek, about 1809. The first death of an actual settler was that of Elijah Brown, May 7, 1809. The first births were those of a pair of twins, children of James Walsworth, in 1806, and the first marriage that of Wm. Carter and Amy Hunt, in 1804. The first gristmill was built on Johnsons Creek, by Matthew Dunham, in 1806, and the first store was opened in 1816, at West Carlton, by Geo. Kuck. The first school was taught by Peleg Helms, in the winter of 1810–11.

[8] There are now 5 churches in town; Bap. and Presb. at Carlton, M. E. at West Carlton, Bap. at East Carlton, and M. E. at Kenyonville. The first religious services in town were conducted by "Old Mr. Steele," a M. E. preacher from Canada, some time prior to 1810.

[9] Formerly known as "*Farwells Mills.*"

[10] 2 sawmills, a gristmill, and a turnverce.

[11] Benj. Thomas, Benagah Worden, Elisha Huntly, John Cone, John Stephens, David Church, and Chauncey Robinson were among the earliest settlers. Eldridge Farwell built the first sawmill, on Sandy Creek, in 1811, and the first gristmill, in 1813. The first store was kept by Hiram Frisbee, in 1821; and the first school was taught by Mrs. Amanda Falls.

[12] M. E. and Univ. at Clarendon, and a Christian church about 1½ mi. W. of Clarendon.

[13] Named in honor of Gen. E. P. Gaines, through the instrumentality of Wm. J. Babbitt.

[14] Incorp. by the Legislature in 1832, but never organized under the act.

[15] Among the early settlers were Reuben Rowley, Harry Wilcox, Joseph and Aaron Adams, Robert and Cotton Lovell, Newbury Chidley, Dyer Sprague, Samuel Risser, Wm. Buckingame, Walter Tarbold, Lansing Bailey, John Proctor, and James Mather. The first death was that of —— Gilbert, who died in or before 1809. His wife and niece, Amy Scott, removed, and wintered a yoke of oxen and several cows upon browse cut by themselves. The first birth was that of Samuel Crippen, jr., in 1810; and the first marriage that of Cyrus Daniels and Elizabeth Freeman, July 4, 1812. The first inn was kept by Wm. Sidley, in 1811; and the first store, by Wm. Perry, in 1815. Orin Gleason taught the first school, in the winter of 1813–14. Henry Drake built the first sawmill, in 1813; and the first gristmill was built by Jonathan Gates, in 1822.

[16] There are 6 churches in town; M. E. and Wes. Meth. at

KENDALL[1] —was taken from Murray, April 7, 1837. It lies on the lake shore, in the w. part of the co., and is crossed by Bald Eagle Creek near the center and Sandy Creek, in the e. part. Its surface is level; and the soil, with the exception of a belt of clay across the s. part, a sandy loam. There are several small salt springs in the town. **Kendall** (p.v.) contains 4 churches and about 25 dwellings. **West Kendall** (p.o.) and **Kendall Mills** (p.o.) are hamlets. The first settlement was made in 1812, by Samuel Bates, from Chesterfield, Mass.[2] The first religious service, conducted by Elder Stephen Randall, was held in the spring of 1816.[3]

MURRAY —was formed from "*Northampton*," (now Gates, Monroe co.,) April 8, 1808. Sweden was taken off in 1813, Clarkson in 1819, and Kendall in 1837. It lies on the E. border of the co., between Clarendon and Kendall, and is crossed by Sandy Creek, the two branches of which unite at Murray, in the N. part of the town. This stream has worn a deep channel, at Holley it is about 75 feet below the level of the land. The embankment over which the N. Y. C. R. R. crosses the gulf is one of the largest on the line of that road. The surface is generally level, except in the S. W. part, where it is rolling. The soil is mostly a sandy loam; in some parts, however, it is clayey. Near Holley are two sulphur and several salt springs, at the latter of which salt was manufactured previous to the opening of the canal. The Medina sandstone approaches near the surface; and quarries have been opened in the neighborhood of Hulberton.[4] **Holley,** (p.v.) incorp. Sept. 3, 1850, a station on the N. Y. C. R. R., is situated in the S. part of the town, on the Erie Canal. It contains 2 churches, the Holley Academy, and several manufacturing establishments.[5] Pop. 614. **Hulberton** (p.v.) contains 278 inhabitants; and **Hindsburgh** (p.v.) 167. **Murray**[6] (p.o.) and **Brockville** are hamlets. **Murray Depot** is a R. R. station. The first settlement was made by Epaphras Mattison, prior to 1809.[7] The first church (Cong.) was formed Jan. 5, 1819, by Rev. John F. Bliss.[8]

RIDGEWAY[9] —was formed from Batavia, Genesee co., June 8, 1812. Gaines was taken off in 1816, Shelby in 1818, and Yates and a part of Carlton in 1822. It lies on the W. border of the co., between Shelby and Yates, and is crossed by Johnsons and Oak Orchard Creeks. Upon the latter, at Medina, is a waterfall about 30 feet high; and at Jeddo and Oak Orchard, where the streams cross the lake ridge, are low waterfalls. The surface is generally level, and the soil a sandy loam. Some of the most important of the salt springs of this co. are in this town.[10] Within and near the village of Medina are extensive quarries; and large quantities of building, flagging, and paving stone are sent to Rochester, Buffalo, and other places on the canal.[11] **Medina,** (p.v.,) incorp. March 30, 1832, lies on the Erie Canal, mostly within this town. It is an important station on the N. Y. C. R. R., and is connected with Ridgeway on the N. and Shelby Center on the S. by the Medina & Alabama Plank Road. It contains 5 churches, an academy,[12] a newspaper office, and several manufactories.[13] Pop. in 1855, 2,104.—in Ridgeway 1,915 in Shelby 189. **Knowlesville,**[14] (p.v.) a station on the N. Y. C. R. R., situated in the E. part of the town, on the Erie Canal, contains 3 churches and several manufactories.[15] Pop. 490. **Oak Orchard**[16] (p.v.) has a pop. of 170; **Jeddo** (p.v.) of 124; and **Ridgeway** (p.v.) of 64. **North Ridgeway** is a p.o. The first settlement was made by Ezra D. Barnes, from D. Rayter,

Eagle Harbor, Genesee co., and Peter J. Gates, Esq., at Tuttleville, and Rev. Will. Rapp at East Gaines.

[1] Named in honor of Amos Kendall, P. M. gen.

[2] Near the mouth of Bald Eagle Creek the Indians made large encampments upon the land, and where it is low there is signs of ashes.

[3] Among the early settlers were Asahel Rudd, David Jones, Benj. Morse, and Nathaniel Brown, who came in 1815. The first child born was that of Rudd. Mr. Morse in 1816. The first mill was that of James Avery, at Eagle Harbor. A Presbyterian church was built at Eagle Harbor in 1830. The first store was kept by Hiram Dewey, at Eagle Harbor, in 1824, by Leonard Spencer, in 1826, and the first tavern was kept by Asahel Avery. Asahel Avery & Deacon Barnes, Jr., were the first merchants, and Gordon Bidwell, in 1831.

[4] There are 3 churches at Hulberton, Union Hall, Presbyterian, M. E. at Hall, and M. E. at West Kendall.

[5] St. Paul's Church in Holley is a handsome stone building, and cost $12,000.

[6] Named in honor of Myron Holley, one of the first canal commissioners.

[7] Mr. Mattison, a Quaker, a farmer and pioneer settler, and a soldier of the war of 1812.

[8] Located on Sandy Creek.

[9] Among the early settlers were Daniel Watt, Joshua Rich, Wood and Peleg Sisson. The first child born in town was that of Betsey Mattison, in 1811; the first marriage, that of Zimri Partridge and Lucretia Stanard, Jan. 17, 1813; and the first death that of Mrs. Daniel Reed, in 1814. The first inn was kept by Epaphras Mattison, in 1809; the first store by Isaac Leach, in 1[illegible]; and the first grist mill was erected by Peter[illegible] Esq., in 1[illegible]. The first church was formed by Rev. [illegible] Bliss, in 1819, and the first school was taught by Miss Mary Dayton, in 1[illegible]. The first physician was Dr. Ezra Hall, who settled in Oak Orchard in 1[illegible]. The principal quarries are owned by Isaac Hall, Esq., and John Rowe. The latter employs 30 men.

[1] Eli Moore, Israel Douglas, Dyer Spencer, Otis Turner, Dr. Wm. White, David Hooker, and S. B. Murdock were among the first settlers. The first sawmill was built by the Holland Land Co. as early as 1808, to encourage settlement. The first grist mill was built by Otis Turner and Dr. White, in 1812, and the first tavern was opened in 1809, by Eli Moore. Lucy Judson taught the first school.

[2] There are now 7 churches in town, Prot. E., Bap., M. E., Presb., and R. Cath. Medina, Presb., M. E., and Bap. at Knowlesville and Unity at Holleway. [3] Named in honor of Gov. Shelby.

[4] Generally known as "Shelby Center," and at an early day called "*Barnard*."

[5] 2 flouring and grist mills, 1 paper mill, 1 tannery, 1 carding mill, and 2 sawmills.

[6] Eleazur Ferry, Henry and Robert Garter, David Demarest, Joseph Ellicott, and Wm. Bennett were among the earliest settlers. The first birth was that of Asa Coon, Feb. 14, 1811, and the first death that of Wm. Bennett, Oct. 4, 1[illegible]. The sawmill was built by Joseph Ellicott, on Oak Orchard, in 1812, and the first grist mill in 1813. The first tavern by David Timmerman, in 1810; and the first store by Grosvenor Ansell, in 1818. Cornelius Ashton taught the first school in 1815.

[7] There are 9 churches in town: 4 M. E., 1 Presb., 1 Christian, 1 Bap. and 1 F. W. Bap.

[8] Named in honor of Gov. Yates.

[9] The first marriage in town was that of Geo. Tappen and Sally Covert, in 1817, and the first death that of Henderson Scott, in Dec. 1815. The first inn was kept by Geo. Tappen, at Yates Center, in 1822; and the first store by A. Hough, in 1824. The first school was taught by Miss Tappen in 1819.

OSWEGO COUNTY.

This county was formed from Oneida and Onondaga, March 1, 1816.[1] It is situated upon the [illegible] centrally distant 145 mi. from Albany, and contains an area of 1,038 sq. mi. Its surface is generally level or gently undulating. A series of bluffs 20 to 40 feet high border immediately upon the lake; and from their tops the land stretches out in long and gradual slopes, occasionally broken by the valleys of the river courses. The general inclination is northerly, as indicated by the drainage, though the summits of the ridges within half a mi. of the lake have about the same altitude as those upon the s. border of the co. A low ridge extending in an easterly and westerly direction, from 3 to 5 mi. N. of Oneida Lake, forms the watershed between Lakes Ontario and Oneida. In the E. part of the co. this ridge turns northward and unites with the system of highlands which separates Lake Ontario and the valley of Black River. The highest point of this range, in the town of Redfield, is 1,200 to 1,500 feet above tide.

The rocks of this co. consist of the Lorraine shales, in the extreme N. part, on the lake; the gray sandstone, extending from the N.E. corner to near the center, its southern limit being marked by a line drawn due E. from Oswego River about 1 mi. from its mouth; the Medina or red sandstone, bordering on the last, and comprising more than one-third of the area of the co.; and the Clinton group of shales, slate, and sandstone, occupying the extreme s. border. These rocks are exposed only in the N. E. part and along the river courses, being generally covered with a thick mass of drift and alluvial deposits, consisting of sand, gravel, and clay. The gray sandstone is hard and compact, and is little affected by the action of the elements, hence the [illegible] is slight, and the soil upon it is thin and poor. The Lorraine shales are easily [illegible] the basis of the strongest and richest soils in the co. The red sandstone crops out on the banks of all the streams which flow through the region which it occupies. It is extensively quarried for building stone, though it is more easily acted upon by the elements than the gray sandstone. Weak brine springs are found associated with this red sandstone throughout the co. The Clinton group, occupying the entire s. border, consists of parallel layers or beds of shale and red and gray sandstone. This is the same geological formation in which is found the principal iron ore mines of Penn. and Oneida co.; and throughout the formation in this co. iron ore is found.

The drainage of the W. and S. parts of the co. is principally through Oswego River, and of the N. and E. portions through Salmon River and a great number of smaller streams that flow into the lake. Oswego River is formed by the junction of Seneca and Oneida Rivers at Three Rivers Point. It is 23 mi. in length, and falls 128 feet in its course, in several [illegible] falls, and furnishes an excellent water-power. Oneida River, forming the outlet of Oneida Lake, is 38 mi. in length, and falls about 12[illegible] feet in its course. Salmon River and other streams flowing into the E. extremity of the lake all have successions of rapids and cascades, which furnish a [illegible] part of the co. an abundance of water-power. The principal bodies of water are Lakes Ontario and Oneida. The former, constituting the N.W. boundary, presents an almost unbroken [illegible] of 40 mi. within the limits of the co. Little Sandy Pond, in the town of Sandy Creek, is the only [illegible] inland water. The mouth of Oswego River furnishes a valuable harbor, [illegible] in importance in the co. Oneida Lake, constituting a portion of the S. boundary, [illegible] Lake Ontario.[2] It is one link in the chain of the internal water communication of the State. A considerable portion of the land in its immediate vicinity is marshy. [illegible] sand, used in the manufacture of glass, are found in its N. shores. The [illegible] sandstone region has already been noticed. The hills and alluvial [illegible] portion of the co. furnish a great variety of soil. The sandy portions are [illegible] the clayey portions are hard, rough, and unyielding in many places. [illegible] soil is the result. Along the E. border of the co. are great quantities of limestone boulders, which essen-

tially modify the soil of that region. The marshes are generally composed of beds of black muck and other vegetable matter, and form the richest kind of natural meadow when drained and cultivated.

Agriculture, manufactures, and commerce about equally engage the attention of the people. Stock raising and dairying are the principal branches of agriculture; spring grains and wool are also extensively produced.[1] The commerce is mostly concentrated at Oswego City, and is carried on by means of the lake, the Oswego Canal, and the R. R. The manufactures consist of flour, lumber, barrels,[2] starch, and a variety of other articles. The amount of flour annually manufactured is greater than in any other co. in the State. The principal mills are at Oswego City, Fulton, and vicinity.

The Oswego Canal, connecting Lake Ontario with the Erie Canal at Syracuse, is 38 mi. long, and for most of the distance is formed by the slackwater navigation of Oswego River. Oneida Lake and River also form a part of the internal navigable waters of the State, connecting with the Oswego Canal at Three River Point and with the Erie Canal at Higginsville. The Oswego & Syracuse R. R. connects with the New York Central R. R. at Syracuse. The Watertown & Rome R. R. enters the co. in the N. E. corner, and passes through Williamstown, Albion, Richland, and Sandy Creek.

This co. is divided into two jury districts,[3] the courts being held respectively at Pulaski Village and Oswego City.[4] At the former place a brick building, including a courthouse and jail, was erected in 1820, and at the latter a wood courthouse about the same time.[5] A stone jail was erected in the city in 1850, and a fireproof co. clerk's office in 1851.[6] The co. poorhouse is located upon a farm of 60 acres in the town of Mexico. It is an old building, and is poorly adapted to its purpose. The average number of inmates is about 50. An asylum for insane paupers is in process of erection adjacent to the poorhouse. The Oswego Orphan Asylum, located at Oswego City, is in part a co. institution. All the children of the inmates of the poorhouse between the ages of 4 and 6 years are supported at the Orphan Asylum at the co. expense.[7]

Two daily and 6 weekly papers are published in the co.[8]

[1] The first settlers of the co. were principally engaged in the manufacture of lumber and potash. Wheat was one staple production; but since the commencement of the cultivation of the sandy ridge it has given place to the coarser grains.

[2] Barrels to the amount of 1,500,000 are annually manufactured for the Oswego flour mills and the Syracuse salt works.

[3] The eastern district comprises the towns of Albion, Amboy, Constantia, Hastings, Mexico, New Haven, Orwell, Parish, Pulaski, Richland, Sandy Creek, West Monroe, and Williamstown; and the western, the towns of Granby, Hannibal, Oswego, Palermo, Schroeppel, Scriba, Volney, and the city of Oswego.

[4] Patrick Keyes and Ethel Bronson, of Jefferson co., and Stephen Bates, of Ontario, were appointed commissioners to locate the county seats and select the sites for the county buildings. The first co. officers, appointed by the Governor and council, were Barnet Mooney, *First Judge*; Henry Williams, Smith Dunlap, Peter D. Hugunin, David Easton, and Daniel Hawks, jr., *Judges* and *Justices*; Edmund Hawks, *Judge*; Elias Brewster, *Surrogate*; James Adams, *Co. Clerk*; and John S. Davis, *Sheriff*. The first courts were held in schoolhouses from the first organization of the co. in 1816, to the completion of the courthouses, in 1820–21.

[5] The city soon outgrew the first courthouse, and the courts for many years were held in the city hall. They are now held in Meads Hall, on E. Bridge St. The old courthouse for several years was used as a schoolhouse, but recently it has been removed and converted into a Sunday school chapel for the Church of the Evangelists, which occupies it for religious instruction. At their last annual meeting the Board of Supervisors authorized the raising and appropriated $30 000 for the erection of a new courthouse in the city, on the E. public square; and the building is now being constructed of Onondaga limestone.

[6] Previous to this time the clerk's office was kept alternately in private houses at each of the shire towns for periods of 3 years, the books being carried back and forth at the end of each period.

[8] *The American Farmer*, the first newspaper of the co., was issued at Oswego some time before 1817.

The Oswego Gazette was started at Oswego in 1817 by A. Buckingham, and continued 2 years.

The Oswego Palladium was commenced by John H. Lord and Dorephus Abbey in 1819. It subsequently passed into the hands of Mr. Lord and was continued by him until 1820. John Carpenter then became the proprietor, and changed its name to

The Oswego Palladium and Republican Chronicle, and continued it until 1845, when it was sold to B. Brockway, who again changed it to

The Oswego Palladium. In 1851 he transferred it to a company, by whom it was sold in 1852 to Dudley Farling, the present editor, who sold his interest, in July, 1854, to T. P. Cuttaway, the present proprietor.

The Oswego Daily Palladium has been issued in connection with the weekly since 1850.

The Oswego Experiment was started March 27, 1828, by Wm. W. Wallace. In 1827 it passed into the hands of Samuel Osgood, and was issued a short time as

The Oswego Gazette and Advertiser. In 1828 it was sold to Wm. C. Sharpe, who published it as

The Oswego Advertiser until 1829. It then passed into the hands of the late Dr. Burdell, of Cunningham notoriety, who changed its name to

The Freemans' Herald and continued it 1 year. It was then suspended for 2 years, and revived in 1832 by John Q. Adams, by whom it was published as

The National Republican 1 year, and was then discontinued.

The Oswego Democratic Gazette was published a short time in 1830 by James Cochran.

The Oswego Free Press was published by Richard Oliphant from 1830 until 1834, and by Geo. G. Foster as

The Oswego Democrat until 1835, when it was discontinued.

The Oswego Observer was started in Feb. 1835, by Bailey & Hawks, and continued until the latter part of 1836.

The Commercial Herald was published at Oswego by Hull & Henry from 1837 to 1843.

The Oswego Patriot was published at Oswego during the Patriot War of 1838–39 by John Bunner and John Cochran, member of the 35th and 36th Congress from the 6th district. (City of New York.)

The Oswego County Whig was founded in 1838 by Richard Oliphant, and sold to Daniel Ayer in 1844. In 1847 C. D. Brigham became proprietor, and changed its name to

The Oswego Commercial Times. In Nov. 1848, James N. Brown became the publisher; and in Feb. 1854, he was succeeded by Winchester & Fergerson, by whom the Oswego Journal was purchased and united with it, and the combined paper was issued as

The Weekly Times and Journal. In 1857 it was changed to

The Oswego Times, under which name it is still published by J. Turbell.

The Oswego Daily Advertiser, the first daily in the co., was issued in 1845 in connection with The Whig, and was continued until 1847, when its name was changed to

The Oswego Daily Commercial Times. It was published in connection with The Commercial Times until 1854, when it was changed to

The Oswego Times and Journal. In 1857 it was changed again to

The Oswego Daily Times, and is still issued by J. Turbell.

The People's Journal was started at Oswego in March, 1849, by O'Leary & Dean, and the next year it was sold to L. A. Winchester. In 1851 it passed into the hands of Sumner & Poucher, who started

The Oswego Daily News in connection with it. The following year L. A. Winchester again became proprietor, and changed the name of the daily to

The Oswego Daily Journal. In 1854 the two papers were united with the Daily and Weekly Times.

The Pulaski Banner was commenced in April 1824 at Pulaski, and published by Nathan Randall until 1832; by A. A. Mathewson and G. G. Foster until 1835, and by James Gold until 1834, when it was suspended. In 1836 it again appeared, as

The portion of the co. of Oswego lying near the mouth of the river was [illegible] the French Jesuits, who established missions here for the conversion of the Iroquois. The French had previously explored the St. Lawrence; and in 1615 Champlain, in one of his expeditions against the Onondagas, passed through this part of the co. In 1700 the English [illegible] the Five Nations as far w. as Oswego; and in 1722 a trading house was [illegible] tion of the N. Y. colonial government. From that period [illegible] the English between Oswego and Albany through Oswego River, Oneida Lake and River, Wood Creek, and the Mohawk.[2] In 1727 the English built a fort on the w. bank of the river, near its mouth.[3] The French, claiming this whole territory, remonstrated against the action of the English, and several times planned expeditions to destroy the fortifications [illegible] into effect. Upon the commencement of the "Old French War" of 1753, Fort Ontario was erected on the e. bank of the river, and another fort was built upon the [illegible] In the summer of 1756, 5,000 French under Montcalm, with a heavy train of artillery, consisting of 30 guns of large caliber, crossed the lake from Fort Frontenac (now Kingston) and appeared before this place. The forts were invested Aug. 11, and, after 3 days' hard fighting, they were surrendered on the 14th.[5] The victors demolished the forts, burned the English vessels, and retired. In 1758, Gen. Bradstreet, with 3,450 men, crossed the lake from this place and [illegible] Frontenac. After destroying the fortifications and securing the military stores and vessels, he returned to Oswego and rebuilt the forts there. Fort Ontario was greatly enlarged, and built in the most substantial manner. In the summer of 1760, the powerful army of Lord Amherst embarked here on an expedition down the St. Lawrence. From this time Oswego became the most important military station on the western frontier. During the Revolution, it was strongly garrisoned, and became the head-quarters of many of the marauding parties that desolated the frontier settlements. It remained in possession of the British until 1796, when it was surrendered under the provisions of Jay's treaty.

In 1790, George Scriba, a merchant of N. Y. City, and a German by birth, purchased 500,000 acres of land lying between Lakes Oneida and Ontario, for the sum of $80,000.[6] This purchase, known as "Scriba's Patent," was bounded on the E. by Fish Creek and on the W. by Oswego River, and embraced 14 towns in Oswego co. and 4 in Oneida. In 1794, Mr. Scriba caused a settlement to be made and a sawmill built on the shore of Oneida Lake, to which he gave the name of "*Rotterdam*,"—now Constantia. In 1795 he built a gristmill—the first in the co.—and several other buildings at the same place. During the same year his patent was surveyed and divided into townships and subdivided into lots.[7] About the same time he commenced a settlement at the mouth of Little Salmon Creek, on the shore of Lake Ontario, 12 mi. N. E. of Oswego, which he called

the mouth of the river, within the limits of the city of Oswego, reservations were disposed of at public sale in 1827. At an River, were jointly purchased by Gen. Alexander Hamilton,

"*Vera Cruz*,"[1] (now Texas.) He here built a saw and grist mill, store, and other buildings, and commenced an active trade on the lake; and for some years the place bid fair to become a formidable rival of Oswego, and the most important commercial station upon the lake. A few other settlements were made at other points in the co., principally under the auspices of Mr. Scriba, previous to 1800; but immigration did not begin to flow in rapidly until a few years later. The lands of Mr. Scriba were divided and sold to a great number of different parties; and while his exertions and expenditures were of great service to the first settlers, they proved extremely unprofitable to himself.[2] In common with all the frontier settlements, the growth of this region was seriously retarded by the War of 1812. Oswego Village became the theater of stirring military events; and on the 5th of May, 1814, it was taken by the British.[3] At the return of peace, immigration again flowed in, and the subsequent history has been one of steady and continuous progress. The opening of the Erie and Oswego Canals, in this State, and of the Welland Canal, in Canada, greatly increased the commercial importance of the city and stimulated the manufacturing interests throughout the co.

ALBION—was taken from Richland, March 24, 1825. It is an interior town, lying E. of the center of the co. Its surface is level or gently undulating. The summits of the ridges are 50 to 100 feet above the valleys, and the highest point in town is 392 feet above Lake Ontario. The lowlands are wet and in some places marshy. Salmon River flows through the N. part.[4] In the N. E. part are 2 or 3 small ponds. The soil consists of deposits of sand and gravel, and is of medium quality. Drift deposits cover the whole surface, except along the river courses, where the underlying rocks crop out. Much of the S. part of the town is yet unsettled. Considerable manufacturing is carried on.[5] **Sand Bank,** (p. v.,) on Salmon River, is a station on the Watertown & Rome R. R., midway between the two places. It contains 1 church, a hotel, 4 stores, 2 tanneries, 5 sawmills, and a flouring mill. Pop. 313. **Pineville,** (Salmon River p. o.,) a station on the W. & R. R. R., situated on Salmon River, contains 1 church, an inn, a store, a sawmill, and a large tannery. Pop. 144. **New Centerville,** (p. o.,) a station on the W. & R. R. R., **Dug Way,** (p. o.,) and **South Albion** (p. o.) are hamlets. Settlement was commenced in 1812, by Cary Burdic, of Williamstown, on Lot 29, and Peter Henderson, at Sand Bank.[6] There are 4 churches in town.[7]

AMBOY—was formed from Williamstown, March 25, 1830. It lies upon the E. border of the co., S. of the center. The surface is rolling and has a general southerly inclination. Its highest point is about 450 feet above Lake Ontario. It is drained principally by Fish Creek and other small tributaries of Oneida Lake. In the S. and W. parts are numerous small lakes and ponds, the principal of which are Painter Lake, North and South Ponds. The N. half of the town is in the region of the gray sandstone, and the S. half in that of the red or Medina sandstone. The soil is principally a sandy or gravelly loam. **Amboy Center** (p. v.) contains 13 houses; **West**

10. Richland	Sandy Creek and Richland.
11. Longinius	Orwell.
12. Redfield	Redfield.

[1] Richland appears to be uncertain, or this name has been applied to two surveys.

[1] Vera Cruz was laid out into city lots by Mr. Wright, who was an agent of Scriba, and considerable improvements were made. A 4 rod highway was cut from Rotterdam to Vera Cruz, a distance of 20 mi., from lake to lake. In 1798 a schooner was built there by Mr. Scriba's agent, which was engaged in the trade between Vera Cruz and the Canadian port of Kingston. It is said that in 1804 more merchandise was sold there than at Oswego or Utica; and in the imagination of many persons Vera Cruz was destined to command the trade of Canada and the West. But, by a series of disasters on the lake, a large portion of the male residents were lost to the infant settlement; and the restrictive policy of Mr. Jefferson's administration, followed by the War of 1812, extinguished the flattering prospects of Vera Cruz. The events and the action of half a century have nearly obliterated all traces of the once promising city.

[2] At the time of the purchase Mr. Scriba's fortune was estimated at $1,500,000; but the whole of it became swallowed up in his efforts to promote the interests of the infant settlements; and he died Aug. 14, 1836, at the age of 84, a poor man.

[3] See page 525.

[4] Before the dams were built upon this river, great numbers of salmon were annually taken.

[5] Large quantities of lumber, leather, and barrels are manufactured, the latter for the Onondaga salt and Oswego flour markets. There are 38 sawmills, 3 tanneries, and 2 gristmills in town.

[6] In 1813 David, Luther, and Benj. Lilly and Allen McClarn settled in the town. The first birth was that of a son of Luther Lilly, in 1815; the first marriage that of Henry Baker and Lucy Burlick, in 1819; and the first death, that of a son of Luther Lilly, in 1816. The first inn was kept by Dr. Bruce at Sand Bank, in 1814; and the first store, by Ammi Hackley, in 1828. The Lilly brothers built the first sawmill, in 1814; and Lemuel Smith the first gristmill, in 1818. The first school was taught by Sylvia Breed, in the summer of 1817.

Amboy (p.v.) 20; and **Carterville** (p.v.) 12. Joseph Perkins, from Conn., was the first settler, in 1805.[1] There are 2 churches in town: M. E. and Bap.; both located at Amboy Center.

BOYLSTON—was formed from Orwell, Feb. 7, 1828. It lies upon the N. border of the co., E. of the center. Its surface is rolling in the center and E. and moderately hilly in the W. It has a westerly inclination, and its highest points are 700 to 800 feet above tide. The soil in the N. and W. parts is a productive, gravelly loam, the underlying rock being the Lorraine shale. The S. E. corner of the town extends into the gray limestone region, and the soil is light and thin. **Boylston** (p.o.) is in the N. W. part. The first settlement was made in 1810, on Lots 2 and 3, by John Wort and Michael Sweetman, both from Canajoharie.[2] Meetings for religious worship are held in the town by the Episcopal Methodists and the Wesleyan Methodists.

CONSTANTIA[3]—was formed from Mexico, April 8, 1808. Hastings was taken off in 1825, and West Monroe in 1829. It lies upon the N. shore of Oneida Lake, in the S. E. corner of the co. The surface is nearly level, and is slightly inclined toward the S. The principal streams are Scriba and Black Creeks, flowing into Oneida Lake. Iron ore is found in the Clinton group of rocks, which extend through the S. part. The soil consists of clay, gravel, sand, and vegetable mold, and in general is fertile. Most of the interior is yet unsettled. Frenchmans Island, in Oneida Lake, about 4 mi. from Constantia, belongs to this town; it contains about 28 acres.[5] Lumber, leather, glass, and iron are extensively manufactured.[6] **Cleveland,**[7] (p.v.) incorp. April 15, 1857, is located on Oneida Lake, in the E. part of the town. It contains 2 churches, 2 glass factories, and several other manufactories. Pop. 1,005. **Constantia,** (p.v.,) in the W. part, on Oneida Lake, contains 2 churches and has a pop. of 609. **Bernhards Bay,** (p.v.,) on the lake, contains 2 churches, a glass factory, and 360 inhabitants. **Constantia Center** is a p. o. Soon after the purchase of Scriba's Patent, in 1790, Mr. Scriba commenced the first settlement of his lands at Constantia, and established agents and laborers there in 1793.[8] There are 7 churches in town.[9]

GRANBY—was formed from Hannibal, April 20, 1818. A part of Oswego was taken off in 1826. It lies on the W. bank of Oswego River, in the S. W. part of the co. The surface is gently rolling, with a slight inclination to the N. E. Oswego River flows through a valley from 30 to 60 feet below the general level of the town; within this town it has a fall of 40 feet. Lake Nea-tah-wan-ta, near the center of the E. part, is about 1 mi. in diameter. It lies about 25 feet above the river at the head of the falls. The streams are Ox Creek, Six Mile Creek, and the outlet of Nea-tah-wan-ta Lake. The soil is generally a sandy or gravelly loam. Bradstreets[10] or Battle Island is in Oswego River, about 4 mi. below the Oswego Falls. Starch, leather, lumber, and the products of wood are extensively manufactured.[11] **Oswego Falls,** (p.v.,) incorp. Oct. 12, 1863, a station on the S. & O. R. R., is situated on Oswego River, opposite the village of Fulton. Pop. 703. **Granby Center** and **South Granby** are p. offices. The first settlement was made at the falls in 1792, by Lodowick Van Valkin, from Rensselaer co., N. Y.[12] There are now 2 churches in town.[13]

[13] The first school was taught by [illegible] J. Walrad, in 1807. The first sawmill was built by Schenck & Wilson, in 1814, and the first gristmill in 1822. Benj. Robinson [illegible] the first [illegible] in 1814. [illegible] Presb. [illegible] Meth.

HANNIBAL—was formed from Lysander, as a part of Onondaga co., Feb. 28, 1806, and embraced all that part of Oswego co. lying w. of the river. Oswego and Granby were taken off in 1818. It is the N. W. corner town of the co. Its surface is gently undulating, the ridges being 30 to 50 feet above the valleys. In the E. part are several swamps, one of which covers 500 acres. The soil is a rich, sandy and gravelly loam. A salt spring, from which salt has been manufactured, is E. and in the N. W. corner. Springs of brine, characteristic of the Medina sandstone strata, have been discovered in several other localities, but none of sufficient strength to render their working profitable. The principal manufacturing establishments are those of leather, lumber, and the products of wood.[1] **Hannibal,** (p. v.,) on Nine Mile Creek, a little W. of the center of the town, contains 3 churches and about 60 houses; **Hannibal Center** (p. v.) contains 20 houses; and **Hulls Corners** (South Hannibal p. o.) 18. **Wheelers Corners** is a hamlet in the N. part, and **Kinneys Four Corners** is a p. o. Settlement was commenced in 1802, by Thomas Sprague and his sons, from Milton, Saratoga co.[2] The first church (Bap.) was organized in 1815.[3]

HASTINGS was formed from Constantia, April 20, 1825. It lies upon the N. shore of Oneida River, in the S. part of the co. Its surface is level or gently undulating, its northern boundary being about 75 feet above Oneida Lake. The soil is clay, sand, and gravelly loam. In some parts of the town it is difficult to find fresh water by digging. Brine springs are found in several parts in the red Medina sandstone formation. In the N. E. part is a tamarack swamp, of about 5 acres, in the center of which is an immense spring 10 feet in diameter. This spring is on a level with the surrounding summit; and it is surrounded by a deep, loose muck which extends downward to an unknown depth. There are 18 sawmills, several gristmills, and 2 tanneries in town. **Central Square** (p. v.) contains about 50 houses; **Hastings,** (p. v.,) in the N. part, 30; **Caughdenoy,** (Coc-e-noy.) (p. v.,) on Oneida River, in the S. W. part, 30; and **Hastings Center** (p. v.) 15. **Smiths Mills** and **Fort Brewerton** are villages of about 20 houses each. The latter is situated at the foot of Oneida Lake, on the site of old Fort Brewerton.[4] The first settlement was made at Fort Brewerton, by Oliver Stevens, in 1789.[5] There are 4 churches in town.

MEXICO—was formed from Whitestown, April 10, 1792, as part of Herkimer co. Parts of Richland and New Haven were annexed May 9, 1836. It included the northerly towns of Oneida co., nearly all of Lewis and Jefferson cos. W. of Black River, and all of Oswego co. E. of Oswego River. Camden was taken off in 1799, Champion, Redfield, Turin, Watertown, and Lowville in 1800, Adams in 1802, Lorraine and Williamstown in 1804, Volney in 1806, Constantia in 1808, New Haven in 1813, and Parish in 1828. Its surface is gently rolling. It is well watered by numerous small streams, the principal of which are Little Salmon and Sage Creeks. There is scarcely a foot of waste or broken land in the town. The underlying rock is gray sandstone, covered deep with alluvial deposits. The soil consists of clay, sand, and gravelly loam, and is very productive. Considerable attention is given to stock raising and dairying; the manufacture of lumber, barrels, and leather is carried on to some extent.[6] **Mexico,** (p. v.,) near the center, was incorp. Jan. 15, 1851, and contains 3 churches, an academy,[7] 12 stores, 2 banks, 3 hotels, 3 flouring and grist mills, a sawmill, a furnace and machine shop, 3 coach factories, 4 carriage shops, and 3 cabinet shops. Pop. 948. **Colosse,** (p. v.,) in the S. E. part, contains 1 church, 2 inns, a store, 2 sawmills, and 2 gristmills. Pop. 119. **Texas,**[8] (p. v.,) located near the mouth of Little Salmon Creek, contains 30 houses; **Union Square,** p. o., in the E., is a hamlet. The names of the earliest settlers within the present limits of this town are lost. There were about 25 who had already located in 1798; Jonathan Parkhurst and Nathaniel Rood, from Oneida co., came that year.[9] By the upsetting of a boat upon the lake, in 1799, Capt. Geerman and 6 others were lost, and in 1804, by a similar disaster, 9 others,

[1] There are 18 sawmills, a stave factory, 2 gristmills, and 2 tanneries in town.

[2] William Earl, Samuel Baron, Joseph Wood, Sterling Morse, David Wilson, and Israel Messenger settled in Hannibal Center in 1801. The first birth was that of Carl Sprague, in 1805; the first marriage, that of Daniel Thomas and Prudence Sprague, in 1807; and the first death that of a daughter of Thomas Sprague, in 1806. The first gristmill was built by Earl & Colton, in 1805; and the first sawmill, by Silas Crandell, in 1811. The first inn was kept by Henry Jennings, in 1808; the first store by Benj. Phelps, in 1815; and the first school was taught in 1810.

[4] A little E. of the fort ground is a sandbank, in which bones are found belonging to men over 7 feet high. A mound at the E. extremity of the bank is full of human bones, indicating the place of sepulture for Onondagas.—*Clark's Onondaga*, 2 v., 182.

[5] Among the early settlers were Timothy Vickery, Chester Loomis, Solomon Allen, and Jacob Rice. The first birth was that of John L. Stevens, in 1802; the first marriage, that of Silas Bellows and Betsey Vickery, in 1808; and the first death, that of Hendrick Stevens, in 1792. Chester Loomis kept the first inn, in 1814, and Hastings Curtis, the first store, in 1820. The first school was taught by Patrick Vickery, at Caughdenoy.

[6] There are 19 sawmills, 5 gristmills, a fulling and cloth dressing mill, a woolen factory, and 3 tanneries.

[7] The Mexico Academy was organized in 1826, as the "*Rensselaer Oneida Academy*." Its name was changed May 19, 1845.

[9] Phineas Davis and Calvin Tiffany, from Conn., settled in 1799. John Merton and Asa Davis in 1801. Peleg Brown, Daniel Barnes, and Lemuel and Amos in 1804, and Solomon Peck in 1805. The first birth was that of Truman Rood, Aug. 10, 1799; and the first marriage, that of Richard Gifford and Mrs. Rood, widow of N. Rood. The first grist and saw mill were built by Mr. Stebbin's agent, and the first store was kept by Benj. Wright. The first school was taught by Sanford Douglass, at Colosse, in 1806.

leaving but 1 male adult inhabitant in the settlement.[1] There are [illegible] 19 church edifices in town.[2]

NEW HAVEN—was formed from Mexico, April 2, 1810. A part was annexed to [illegible] May 9, 1836. It lies upon the shore of Lake Ontario, w. of the center of the co. The surface is rolling and generally smooth. It is watered by Spring Brook, Catfish and Butterfly Creeks, small streams flowing into Lake Ontario. There is quite an extensive marsh near the mouth of Butterfly Creek, in the N. E. part of the town, and another in the S. W. part. The underlying rock is gray sandstone, and the soil is principally a sandy and gravelly loam. Stock raising receives more attention in this than in the other towns of the co., and a limited amount of manufacturing is done.[3] **New Haven,** (p. v.,) situated near the center of the town, on Catfish Creek, contains 2 churches, 2 inns, a store, a sawmill, a gristmill, and about 50 houses. **Butterfly** is a p. o. near the E. line of the town. The first settlement was made by —— Rood and —— Doolittle, at New Haven, in 1798.[4] The first church (Cong.) was organized at New Haven Village, in 1817, and Rev. William Williams was the first minister. There are now 2 churches in town: Cong. and M. E.

ORWELL—was formed from Richland, Feb. 28, 1817, and Boylston was taken from it in [illegible]. A part of Richland was annexed March 27, 1844. It is an interior town, lying N. E. of the center of the co. The surface has a S. W. inclination, its E. border being elevated 300 to 500 feet above its W. and 700 to 1,000 feet above Lake Ontario. It is moderately hilly, and is considerably broken in places by the deep ravines of the streams. Upon Salmon River is a fall worthy of note. The stream flows over a rocky bed in a series of rapids for 2 mi. and then falls over a precipice 110 feet perpendicular. The banks of the stream below the fall are 200 feet high. The soil is generally a gravelly loam. The E. half of the town is yet uncultivated. Lumber and other products of wood form the leading articles manufactured; and considerable attention is given to stock raising and dairying. **Orwell Corners,** (Orwell p. o.,) in the W. part, contains 1 church, 3 stores, an inn, a sawmill, a gristmill, a tannery, a steam cabinet factory, and about 40 houses. **Maline** is a hamlet in the S. part. The first settlers were Nathaniel Bennett and his son Nathaniel, from Rensselaer co., N. Y., on Lots 82 and 83, and Capt. Noyes, on Lot 29, in 1806.[6] There are 3 religious societies in town.[7]

OSWEGO CITY—formed from Oswego and Scriba, was incorp. as a village March 14, 1828, and was enlarged and organized as a city March 24, 1848.[8] It is situated on Lake Ontario, at the mouth of Oswego River,[9] that stream dividing the city into two nearly equal parts. The river is bordered upon each side by a ridge, which rises in gradual slopes to a height of about 100 feet, and ends in bluffs on the lake shore 40 to 60 feet high. The summits of these ridges are about 1 mi. apart, and descend from the river in the same gradual slopes as toward it. One mi. W. is a valley opening through the ridge into the river above the falls, through which the Oswego must have once flowed into the lake. The S. border of the city is skirted by a bluff or escarpment about 160 feet above the lake, indicating an ancient lake [illegible]. Here commences the deep ravine excavated by the river through strata of red sandstone of the Medina group and underlying shale. From this the geological induction is made that, at the last great physical change which elevated the country from the bed of an ancient ocean and brought the river into existence, it fell directly into Lake Ontario, at the escarpment, by a fall of moderate

The first sawmill was erected by Ira Foot, in 1805, and the first gristmill by [illegible]. Hezekiah Bacon built the first [illegible] in the summer of 1806. [5] The village contains [illegible] mills, a gristmill, and a tannery in town. [6] Among the first officers were Rev. Elijah Hedges, Joshua Holmes, Allen Gardner and Lucinda Leach. The first marriage was that of Lorenzo Wood and a daughter of Nathaniel Bennett, son, in 1807, and the [illegible] Balch, in 1810. The first school was taught by Jesse Aiken, in 1810. height, the upward movement being gradual and intermittent. The pauses by which it was interrupted are marked by ancient beach lines, ridges, and terraces found at different heights above the lakes. The Oswego Falls are now 11 feet high; and, as they have receded s. 12 mi., to the village of Fulton, with an ascending average grade of about 9 feet per mi. in the excavated bed of the river, they must have diminished in height and grandeur from age to age during the whole period of recession. This hypothesis is sustained by geographical and geological analogy with the Falls of the Genesee and the Niagara. The aggregate fall of the river within the 12 mi. is 110 feet, of which 34 feet are within the limits of the city; and the whole fall is so distributed by 6 successive dams, built by the State for canal and slackwater navigation, that the water of the river may be used by raceways nearly the whole distance, affording one of the finest water-powers in the world. The river forms the outlet to the 11 lakes which cluster in the basin of Central New York, and drains a wide extent of territory. These lakes form natural reservoirs which prevent floods or undue exhaustion, the extreme elevation and depression of the river not exceeding 3 feet, so that destructive freshets, so common to great water-power rivers, never occur. The mouth of the river admits vessels of the largest class navigating the lakes; and the erection of piers and a lighthouse by the U. S. Government renders it one of the safest and most accessible harbors on the lakes, susceptible of indefinite enlargement, and combining canal and R. R. transportation with the advantages of position as the nearest lake port to tidewater. A hydraulic canal extending along both sides of the river is studded with mills, elevating warehouses, and other manufacturing establishments.

The city is handsomely laid out, with streets 100 feet wide, intersecting each other at right angles. The E. and W. banks of the river are connected by two bridges, built by the city,—the lower one, an iron bridge with a draw for the passage of vessels, on Bridge St., the upper on Utica St., at the terminus of the Oswego & Syracuse R. R. The principal public buildings are an edifice recently erected by the U. S. Government, containing a custom house, post-office, and U. S. courtroom,[1] a city hall,[2] jail, orphan asylum, city hospital, city library, and 12 churches.[3]

The *Orphan Asylum* is situated upon the elevated ground in the southern part of the city, commanding a fine view of the city, harbor, and lake. It was founded in 1853, mainly through the influence of the ladies of Oswego, and continues to be principally supported by them. Orphans and children of destitute parents, from earliest infancy to 8 years of age, are admitted and cared for and afterward placed out in respectable families. A primary and Sabbath school are connected with the institution. The number of inmates ranges from 50 to 100.

The *City Library* was founded by a donation of $25,000 from Hon. Gerrett Smith. The edifice is finely located upon the E. side of the river; and the library at present contains 9,000 volumes.[4]

The *Public Schools* are graded and free; they are under the care of a Board of Education and Superintendent. The system embraces the primary, junior, senior, and high school departments; and pupils can receive instruction from the primary branches to an extended academic course. In 1857 there were in the city 23 school districts, in which were employed 47 teachers,—8 males and 39 females. The number of children between 4 and 21 was 5,516, of which 4,175, or 75 per cent., attended school during some portion of the year. The total receipts and expenses during the year was $26,341 14; the number of volumes in the district libraries, about 3,000.

The commerce of Oswego is very extensive, and is increasing much more rapidly than the population.[5] Being situated near the foot of lake navigation, and nearer to N. Y. than any other lake port, it has commercial facilities superior to those of most of the Western cities. A considerable share of the produce of the West flows through this port on its way to the seaboard markets; and it is the principal entrepôt of the agricultural products of Canada West. The salt of Onondaga is mostly distributed through the Great West from this place; and vast quantities of the manufactured goods of the East are sent through the same channel. The official report of the value of the lake and canal trade, derived from the Custom House and Canal Collector's Office, for 1845, was $7,951,409, and for 1856 was $50,612,603, showing an annual average increase of nearly 20 per cent. The amount of registered tonnage in 1846 was 15,513 tons, and in 1856 it was 46,467 tons.[6]

The manufacturing interests of the city have attained to considerable magnitude, although the vast water-power of Oswego River is occupied but to a limited extent. Flour made from the wheat

[6] The operation of the late Reciprocity Treaty with England has proved, as was anticipated, most favorable to Oswego. The importation of grain at the port in 1856 was 13,504,074 bushels; and the peculiar manufacturing and commercial advantages of the place have made it the great flour and grain market of Central New York and Northern New England.

Shipyards and 2 marine railways rank among the important manufacturing establishments of the city, and give large employment to labor. The Oswego Starch Factory, erected in 1848, upon the hydraulic canal, on the w. bank of the river, is one of the most prosperous and extensive establishments of the kind in the world.[2] Lumber is extensively dressed in the city for the Western markets, from Canadian sawed lumber entered free under the Reciprocity Treaty. The Oswego Cotton Mills is a well managed and productive establishment, operating 83 looms, 2,664 spindles, and giving employment to 65 operators. A little above, on the same canal, is an extensive tannery. The Ontario Foundery, Steam Engine and Machine Works, is one of the most extensive and prosperous establishments of the kind in the State. Many other branches of manufactures are carried on in the city.

The early history of Oswego has already been noticed in the general history of [illegible] Its distinctive and modern history dates from its surrender by the British in 1796. The withdrawal of the British garrison took away from the place all that had ever been established of civilized society, and left it as new as though man had never resided there. During the year following the evacuation, Neil McMullin, a merchant of Kingston, moved thither, bringing with him a house framed at Kingston.[4] In 1802 but 2 or 3 vessels were owned on the American side of the lake, trade being principally carried on by vessels belonging to the Northwest Fur Company. During this year Benajah Boyington built a warehouse on the w. side of the river, and Arch. Fairfield became a forwarding merchant. Salt from the Onondaga Springs was at that time the most important item in the commerce of Oswego. In 1803, Matthew McNair engaged in the forwarding business and purchased a schooner. In 1804 he built another, and, in connection with other gentlemen, purchased a number of Canadian vessels.[5] From this period shipbuilding was carried on briskly, and it formed a leading interest until the breaking out of the War of 1812.

The war put an end to commercial transactions; but the place became the scene of stirring military events. The fort was garrisoned and commanded by Col. Mitchell. On the 5th of May, 1814, the British fleet under Sir James Yeo appeared off the harbor and opened a heavy fire upon the place. The fire was returned by the 4 small guns which constituted the only armament of Fort Ontario, and by a small battery on the w. side of the river. The next morning the British took position still nearer the shore, and under the cover of a heavy fire 2 columns of the enemy effected a landing. After a gallant but vain defense, Col. Mitchell retreated, leaving the fort and town in possession of the enemy.[6] The principal object of the attack was to secure the naval stores destined for the new vessels building at Sackets Harbor; but a large share of these were at Oswego Falls, 12 mi. above, and were not taken. Several cannon and other heavy articles lying upon the wharf were sunk in the river, at the command of Col. Mitchell; these were afterward recovered. On the morning of the 7th the British retired, and the fleet proceeded n. to blockade Sackets Harbor. Lieut. Woolsey, who had charge of the stores, immediately dropped down the river, and, with 19 boats laden with stores, set out on the lake under cover of night, and supported by a body of riflemen and Indians, under Maj. Appling, on shore. The boats were pursued, and took refuge in Sandy Creek, where an action took place, resulting in the capture of the entire attacking party.[7]

Oswego recovered slowly from the effects of the war, and its commercial transactions were comparatively unimportant until the opening of the Oswego and Welland Canals.[8] In the mean time

shipbuilding became a leading pursuit of the people. In 1816, steam navigation was first introduced on Lake Ontario, and its great progress since has been of immense importance to Oswego. In 1829–30, Alvin Bronson and T. S. Morgan erected the first flouring mill. In 1828 the Oswego Canal was finished, and in 1830 the Welland Canal was opened, giving a new impulse to trade and opening to the place an almost boundless commerce in the future. With the advantages of natural position and the stimulus of the lines of internal improvement, both the commerce and manufactures of Oswego have increased in an almost unprecedented manner; and there is every reason to believe that this increase is to continue for many years to come.

OSWEGO town —was formed from Hannibal, April 20, 1818. A part of Granby was annexed May 20, 1836. It lies upon the shore of Lake Ontario, on the w. side of the river. Its surface is generally rolling, ending in a bluff shore upon the lake. The streams are the Eight Mile, Rice, Snake, and Minetto Creeks. A fall in Oswego River within the limits of this town affords an abundance of water-power. The underlying rock is principally red sandstone, and the soil a gravelly loam. Boulders and water-worn pebbles are scattered over the surface, making it very stony in places. **Minetto,**[1] p.v., situated on Oswego River, 4 mi. from the city, contains 150 inhabitants. **South West Oswego** is a p.o. The first settlement was made in 1797, by Asa Rice, from Conn. Reuben Pixley came in 1801, and Daniel Burt in 1802.[2] There are now in the town 2 churches; M. E. and Bap.

PALERMO—was formed from Volney, April 4, 1832. It is an interior town, lying just s. w. of the center of the co. Its surface is undulating. The large swamp in the E. part of the town is 57 feet above Oneida Lake, and the ridges are about 25 feet above the swamp. The streams are Scotts and Fish Creeks. The soil is generally a sandy loam. Lumber and the products of wood are the principal manufactured products of the town.[3] **Palermo,** (p.v.,) situated near the center of the town, and **Vermillion** p.v.,[3] each contains 1 church and about 15 dwellings. The first settlement was made in 1806, by David Jennings, Simeon Crandall, and Sylvanus Hopkins.[4] The first settled preacher was Rev. Asaph Graves. There are now 4 churches in town.[5]

PARISH[6]—was formed from Mexico, March 20, 1828. It is an interior town, a little S. E. of the center of the co. Its surface is undulating, but considerably broken by ravines, and in some parts rough and stony. The streams are Salmon Creek and its branches. The valley in the W. part is 246 feet above Lake Ontario, and the E. summits are 25 to 50 feet higher. The soil consists of clay, sand, and gravel, and is moderately fertile. Less than half of the town is under cultivation. There are 12 sawmills, 4 shingle factories, and other manufacturing establishments in town. **Parishville,** (Parish p.o.,) on Salmon Creek, in the W. part, contains 1 church and 34 houses. The first settlement was made in 1804, by Thomas Nutting, Eliada Orton, Jonathan Bedell, Amos Williams, and Rev. Gamaliel Barnes.[7] There are 2 churches in town; M. E. and Bap.

REDFIELD—was taken from Mexico, as part of Oneida co., March 14, 1800.[8] It is the N. E. corner town of the co. Its surface is hilly in the S., but in the N. it spreads out into a high, rolling plateau 800 to 1,000 feet above tide. A wide intervale extends along the course of Salmon River, which stream drains nearly the whole town. The underlying rock is gray limestone, and the soil upon it is generally a thin and moderately fertile gravelly loam. The soil of the intervale is a deep, sandy loam of good quality. The greater part of the town is still unsettled, and the uplands are frosty and forbidding regions. **Center Square,** (Redfield p.o.,) situated on Salmon River, in the S. part of the town, contains 2 churches and about 30 houses. **Greenborough** is a p.o. in the N. W. part. The settlement of the town was commenced in 1798, by immigrants mostly from Conn.[9] The first church (Cong.) was organized with 19 members in 1802, by Rev. Joshua Johnson. There are now 2 churches in the town; Cong. and M. E.

[illegible] The first son was named in 1816, by Stephen Bedell; and the first sawmill was built by Thomas Chapman, in 1812. The first school was taught by Harriet Eason, in the summer of 1812.

[4] Paul Allen settled in town in 1805. The first birth was that of Ransom Orton, in 1805; the first death, that of Jonathan Bedell, killed by the fall of a tree; and the first marriage, that of Nathan Parkhurst and the widow Bedell. John M. kept the first inn, in 1807; and Martin Way and Paul Allen built the first sawmill, in 1808. The first school was taught at Parishville, in the summer of 1807.

(p. v.,) near the center, 15. Settlement was commenced by Abram Paddock, in 1800.[1] The first church (M. E.) was organized in 1826. There are now 5 churches in town.[2]

SCRIBA[3]—was taken from "*Fredericksburgh*" (now Volney) as part of Oneida co., April 5, 1811. It lies upon the shore of Lake Ontario and the E. bank of Oswego River. Its surface is rolling, the ridges extending N. and S., and elevated 100 to 180 feet above the lake. It is drained by Black Creek, flowing S., and Nine Mile, Four Mile, and Wine Creeks, flowing N. Upon several of these streams are valuable mill privileges. The soil is a gravelly and sandy loam, stony in places, and only moderately fertile. **Scriba Corners,** (Scriba p. o.,) near the center of the town, contains 1 church and about 40 houses. **North Scriba** is a p. o. The first settlement was made by Henry Everts, in 1798.[4] There are 3 churches in town.[5]

VOLNEY[6]—was formed—by the name of "*Fredericksburgh*"—from Mexico as part of Oneida co., March 21, 1806. Its name was changed April 5, 1811. Scriba was taken off in 1811, and Schroeppel and Palermo in 1832. It lies upon the E. bank of Oswego River, S. W. of the center of the co. Its surface is undulating, with high, steep banks bordering upon the river. The ridges are 50 to 100 feet above the valleys and 100 to 200 feet above Oswego River. The red sandstone crops out on the bank of the river and is extensively quarried for building stone. The falls upon the river furnish an immense water-power.[7] The soil is a sandy and gravelly loam. **Fulton,**[8] (p. v.,) on Oswego River, at the Oswego Falls,[9] was incorp. April 29, 1835. It contains 6 churches, the Falley Seminary,[10] 2 newspaper offices, and a large number of manufacturing establishments. Pop. 3,192. **Seneca Hill,** (p. v.,) on Oswego River, in the N. W. corner of the town, contains 50 dwellings and the largest flouring establishment in the State.[11] **Volney Corners,** (Volney p. o.,) near the center, contains 18 houses. The present village of Fulton became the seat of a floating population in the early part of the eighteenth century; but permanent settlement was not commenced until 1793.[12] The first church (Presb.) was organized in 1814; and the Rev. Mr. Leavitt was the first settled minister. There are 9 churches in town.[13]

WEST MONROE—was formed from Constantia, March 21, 1839. It lies upon the N. shore of Oneida Lake, S. E. of the center of the co. The surface is level and marshy in the S., and rolling, broken, and stony in the N. A marsh on the bank of the lake covers an area of more than 1,000 acres, and a considerable portion of it produces cranberries. In the valleys between the ridges, in the N. part of the town, are several smaller marshes. Red sandstone, the underlying rock, crops out in this town and furnishes a plentiful supply of valuable building stone. Bog iron ore is found in the N. part; and it is said that traces of lead and silver have also been found. The soil is a medium quality of clay, sandy and gravelly loam. **West Monroe** and **Union Settlement** are p. offices. The first settlement was made in 1806, by Martin Owens, Abel and Joseph B. Ames, Ebenezer Loomis, and Sylvanus Allen.[14] The first church (Presb.) was organized in 1843.[15]

WILLIAMSTOWN—was formed from Mexico, as part of Oneida co., March 24, 1804. Richland was taken off in 1807, and Amboy in 1830. It lies near the center of the E. border of the co. The surface is undulating in the S., but broken and stony in the W., and moderately hilly in the E. It is drained by Fish Creek, flowing into Oneida Lake, and the head branches of Salmon

[1] Thomas Vickery and —— La Homme first settled in 1807; and Wm. Miles in 1808. The first birth was that of Joseph Vickery, Sept. 11, 1807, and the first marriage, that of John Lemon and Sally Winton. The first sawmill was erected by H. W. Schroeppel, in 1819; and the first gristmill, by A. & H. Gilbert the same year. The first store was kept by Andrus Gilbert in 1824; and the first inn, by Alex. Thomson, in 1828. Horatio Sweet taught the first school, at Three River Point, in 1813.

[2] 2 M. E., Cong., Bap., and F. W. Bap.

[3] Named in honor of General Scriba, the original proprietor of this and several of the adjoining towns.

[4] Ansel Bush and Samuel Tiffany settled in town in 1801, Wm. Burt and Hiel Stone in 1805; and Dr. Deodatus Clark in 1807. The first birth was that of Henry Everts, jr.; the first marriage that of John Masters and Eliza Baldwin, in 1806; and the first death, that of a child of Hiram Warner. The first inn was kept by Hiel Stone, in 1806; and the first store, by Orrin Stone and Aaron Pettibone, in 1809. Benj. Robinson, from Monroe, taught the first school, in 1804.

[5] Bap., M. E., and a Bethel Free and Union.

[6] Named in honor of Volney, the French author, who visited the town in 1795 while on a tour through the U. S.

[7] There are 7 flouring mills in town, having an aggregate of 42 run of stones; also a large number of sawmills and other manufacturing establishments.

[8] Named in honor of Robert Fulton. It was originally called "Oswego Falls."

[9] The portage at this place was the only interruption in the internal water communication between Schenectady and the ports upon Lake Ontario and the St. Lawrence River, after the construction of the canal connecting Wood Creek with the Mohawk River, by the Western Navigation Co., in 1796.

[10] The Fulton Female Seminary was incorp. in 1836, and in 1842 it was changed to the Fulton Academy. In 1845 it received a donation of $3,000 from Mrs. M. E. Falley and assumed the name of the Falley Seminary. At the same time it came under the charge of the Black River Conference of the M. E. Church. It is now a private institution.

[11] This flouring mill has 15 run of stone, with a separate wheel to each run, and a capacity of grinding and packing 1,200 barrels of flour per day.

[12] Daniel Masters settled at Oswego Falls in 1793; Lawrence Van Valkenburgh, bef. with his family in 1795; and John Van Buren in 1796. John Waterhouse settled in the town in 1797; and Ebenezer Wright in 1800. The first birth after the permanent settlement was in 1795; and the first death, that of John Waterhouse, in Aug. 1799. Daniel Masters kept the first inn, at the falls, in 1794; and he and —— Goodell erected the first sawmill, in 1796. Miss A. Waterhouse taught the first school, in 1800.

[13] 2 M. E., Presb., Prot. E., Cong., Bap., Prot. Meth., Wes. Meth., and Union.

[14] Deacon Smith, from Mass., settled in the town in 1808, and Hiram Nickerson in 1810. The first birth was that of Azariah Ames. The first inn was kept by Deacon Smith in 1812; and the first school was taught by Caroline Barnes, in 1810.

[15] The census reports 2 churches; Presb. and F. W. Bap.

OSWEGO HARBOR

River. The surface of Fish Creek at Williamstown Mills, in the S. E. part, is 354 ft. above Lake Ontario, and the hills in the N. E. are 200 to 500 feet higher. The greater part of the lands are unsettled. The soil is a moderately fertile sandy or gravelly loam. Lumber and leather are the principal manufactured products. **Williamstown,** (p.v.) on Fish Creek, includes a post-office, station on the W. & R. R. R. Pop. 240. **Kasoag,** (p.v.) a little W. of the centre of the county, on the W. & R. R. R. and contains about 25 houses. The first settlement was made in 1811, by Gilbert Taylor, Solomon Goodwin, Ichabod Comstock, Dennis Ortan, Henry Williams, and Henry Filkins.[1] The first church (Cong.) was founded in 1805, by Rev. Wm. Smith.

OTSEGO COUNTY.

This county was erected from Montgomery, Feb. 16, 1791, and embraced the 2 original towns of Otsego and Cherry Valley. A part of Schoharie was taken off in 1795, and a part of Delaware in 1797. It lies upon the highlands at the head of Susquehanna River, S. E. of the center of the State. It is centrally distant 66 miles from Albany, and contains 1,038 sq. mi. Its surface is a hilly upland, divided into several ridges separated by deep, broad valleys. The declivities are generally gradual; and the highest summits are 400 to 700 ft. above the valleys and 1,700 to 2,000 ft. above tide. The ridges have a general N. E. and S. W. direction. A high and rocky upland extends into the S. E. corner from Delaware, terminating upon Schenevas Creek in an abrupt and wall-like declivity 300 to 500 ft. high. The other ridges of the co. have a nearly uniform elevation, and generally terminate in steep declivities upon the valleys of the streams. The principal streams are Unadilla River, forming the W. boundary, Wharton and Butternut Creeks, Otego Creek, Susquehanna River, Cherry Valley and Schenevas Creeks. Charlotte River forms a small portion of the S. boundary. Besides these, there are a large number of smaller creeks and brooks, tributaries to the above. A few small streams rise in the N. E. corner and flow into the Mohawk. Otsego Lake, in the N. E. part, is a fine sheet of water 8 mi. long and about 1 mi. broad. It is 1,193 ft. above tide, and is surrounded by hills 400 to 500 ft. high. Its outlet forms the principal head branch of the Susquehanna. Schuyler Lake, N. W. of Otsego, is a similar sheet of water, 3½ mi. long. The other bodies of water in the co. are small ponds. The rocks in the N. E. corner consist of the limestones of the Helderbergh division. The hills in the S. part are composed of the shales of the Hamilton group and the shales and sandstones of the Portage and Chemung groups. The summits in the extreme S. part and S. E. corner are crowned by the red sandstone and shales of the Catskill group. Almost all the valuable quarries of the co. are found in the limestone region of the N. E. The soil in the N. E. is a good quality of gravelly and calcareous loam; but further south it is a clay and shaly loam upon the hills, and a gravelly loam and alluvium in the valleys. The uplands are best adapted to grazing; and the river intervales are well adapted to the cultivation of grain. The people are principally engaged in stock raising and dairying. More hops are raised in this co. than in any other in the State. The manufacturing interests are limited, though the available water-power is very great.

The county seat is located at Cooperstown, in the town of Otsego, at the foot of Otsego Lake.[1] The courthouse is a brick edifice in the W. part of the village.[2] The jail, near by, is built of stone, but has few of the modern improvements or conveniences. The average number of inmates is 8, supported at a weekly cost of $3.00 each. The clerk's office is a fireproof brick building, contiguous to the courthouse. The co. poorhouse is situated upon a farm of 153 acres in Middlefield, 4 mi. S. of Cooperstown. Its average number of inmates is 90. The children attend the district school. The farm yields a revenue of $1,400. The general arrangement and management of this institution are far better than the average. The only work of internal improvement in the co. is the Albany & Susquehanna R. R., now in process of construction. It extends along Susquehanna River and Schenevas Creek, through Unadilla Otego, Oneonta, Milford, Maryland, and Worcester.

Three weekly newspapers are published in the co.[3]

1 Thomas Farrington, of Tioga, Alvan Bronson, of Oswego, and Archibald Campbell, of Dutchess, were the commissioners appointed to locate the co. seat.

2 The first county officers were Wm. Cooper, *First Judge*; Jacob Morris, *County Clerk*; Richard B. Smith, *Sheriff*, and James Cannon, *Surrogate*.

3 *The Otsego Herald and Western Advertiser*, the first paper published in the co., and the second in the State W. of Albany, was commenced at Cooperstown, April 3, 1795, by Hoba Phinney, a native of Conn. Mr. Phinney continued its publication until 1803, when he died. It was then published by his sons, E. & H. Phinney, until 1821, when it was discontinued.

The Impartial Observer was established at Cooperstown in 1808 by William Andrews. It soon after passed to John H. Prentiss, who changed its name to *The Cooperstown Federalist* under which title it was published until 1828, when the name was again changed to

The Freeman's Journal. In 1830 it passed into the hands of Samuel M. Shaw, by whom it is now published.

The Otsego Republican was published at Cherry Valley in 1812 by Clark & Crandell.

The Whig Banner was established at Cherry Valley in 1813. In 1814 it was removed to Cooperstown, where it was published by Israel W. Clark until May, 1817, when Edward B. Crandall became proprietor, and continued the publication until 1831.

The first settlement in this co. was made at Cherry Valley, in 1740, by John Lindesay, who, with 3 others, held a patent for a tract of 8,000 acres, lying in that town.[1] Mr. Lindesay was a Scotch gentleman of some fortune and distinction, and, by his influence, induced a settlement of Scotch, of several families, comprising about 30 persons, originally from Scotland and Ireland. A few years later, small settlements were made in the present towns of Springfield, Middlefield, Laurens, Otego, and at other points in the valley of the Susquehanna. These settlements then formed the extreme outposts in the advance of civilization west. They increased very slowly, in consequence of the fear of Indian hostilities. In 1765, 25 years after the first settlement, but 10 families had located at Cherry Valley. At the commencement of the Revolution it was still a frontier settlement. On the 11th of Oct. 1778, it was attacked by the tories and Indians, under the lead of Butler and Brant, and a horrible massacre ensued. The family of Robert Wells, father of the late John Wells of New York, consisting of 12 persons, were brutally murdered; and one of the tories boasted that he killed Mr. Wells while at prayer. John Wells, the only member of the family who escaped, was at school in Schenectady at the time. The wife and daughter of Mr. Dunlop were murdered in cold blood, as were also the wife and 4 children of Mr. Mitchell. Thirty-two of the inhabitants, mostly women and children, and 16 Continental officers and soldiers, were killed; the residue of the inhabitants were taken prisoners and carried off, and all the buildings in the place were burned. All the frontier settlements were ravaged, and nearly every building, except those belonging to tories, was burned. These horrible outrages aroused the whole country, and in 1779 Gen. Sullivan, at the head of a large body of troops, was sent against the Western tribes. In Feb. Gen. Clinton, with a force of 1,200 men, marched up the Mohawk, and thence opened a road to Otsego Lake, a distance of 20 mi. At the foot of the lake he halted and built a dam across the outlet, and prepared boats to descend the stream. When the lake was sufficiently high, the boats were launched, the dam was broken down, and the army descended the river on the flood thus produced. The Indians upon the banks, witnessing the extraordinary rise of the river at midsummer without any apparent cause, were struck with superstitious dread, and in the very outset were disheartened at the apparent interposition of the Great Spirit in favor of their foes. Gen. Clinton's forces joined Sullivan on the Chemung. At the close of the war, settlements progressed with great rapidity; and much of the best land in the co. was taken up before the fertile lands in the western part of the State were opened to immigration. In late years the progress of the co. has not been so rapid as that of other sections of the State, from the fact that no great work of public improvement has yet been constructed within its limits, and hence it is comparatively isolated and difficult of access.

BURLINGTON—was formed from Otsego, April 10, 1792. Pittsfield was taken off in 1797, and Edmeston in 1808. It is an interior town, lying N. W. of the center of the co. Its surface is a hilly upland, divided into 3 general ridges extending N. and S. These ridges are about 400 ft. above the valleys, and are arable to their summits. The streams are Butternut Creek, flowing S. through the center, and Wharton Creek, flowing S. W. through the W. part. The soil upon the hills is a slaty loam, in many places underlaid by hardpan, and in the valleys a gravelly loam.

The Democrat was established at Cooperstown in June, 1840, by Dutton & Howe, and was published by them until 1842, when it was the last issue.

The Otsego Republican. It was started by Dutton & Hodges, and published by Hodges & Co. from [illegible] by Hodges & Clark for a year, by A. W. Clark for a year, by A. W. Clark & Co. for a year, by A. W. Clark & Son

Burlington Green, (Burlington p. o.,) on Butternut Creek, near the center, contains 3 churches and 118 inhabitants; **Burlington Flats,** (p. v.,) on Wharton Creek, N. W. of the center, 2 churches, a cotton factory, gristmill, sawmill, and about 30 dwellings; and **West Burlington,** (p. v.,) on Wharton Creek, 2 churches and 143 inhabitants. The first settlement was commenced near West Burlington, in 1790, by Robert Garrat, and Eber and Benj. Harrington.[1] The first church (Bap.) was formed at Burlington Green, in 1793; Rev. James Southworth was the first minister.[2]

BUTTERNUTS—was formed from Unadilla, Feb. 5, 1796. Morris was taken off in 1849, and a part of Unadilla was annexed in 1857. It lies upon the W. border of the co., S. W. of the center. Its surface is a hilly upland, divided into several ridges extending N. and S. Unadilla River, forming its W. boundary, is bordered by a narrow intervale, from which the highlands rise in a series of steep bluffs to a height of 500 to 600 ft. Butternut Creek flows S. W. in a deep valley through near the center of the town. A large number of smaller streams, tributaries to these, flow in deep valleys among the hills, dividing the ridges and giving to the region a peculiar broken character. The hills are arable to their summits, and the soil is a good quality of red shale and gravelly loam. **Gilbertsville,** (Butternuts p. o.,) near the center, contains 4 churches, the Gilbertsville Academy and Collegiate Institute, an oil mill, tannery, and various other manufacturing establishments. Pop. 442. Settlements were commenced about 1790, at Gilbertsville, by Gordon and Wyatt Chamberlin and Abijah Gilbert.[3] The first church (Cong.) was formed in 1795–96; Rev. John Stone was the first preacher.[4]

CHERRY VALLEY—was formed from Canajoharie, (Montgomery co.,) Feb. 16, 1791. Middlefield, Springfield, and Worcester were taken off in 1797, and Roseboom in 1854. It is the N. E. corner town in the co. Its surface is a hilly and mountainous upland; and much of it is too rough and rocky for cultivation. Mount Independence, S. E. of the center, is a rocky eminence 1,000 ft. above the valleys and 2,000 ft. above tide. It is the highest summit in the co. A range of highlands extends along the N. W. boundary. The central and S. parts of the town are drained by the head branches of the Susquehanna, and the N. part by tributaries of the Mohawk. The soil upon the uplands is a slaty and gravelly loam, and in the valleys a fine quality of calcareous loam. Upon a small creek in the N. part is the Te-ka-ha-ra-nea Falls, 160 feet in height. In the vicinity are several sulphur springs and quarries of limestone. In the N. E. corner are several springs of weak brine, from which salt was formerly manufactured. **Cherry Valley,**[5] (p. v.,) at the head of the valley of Cherry Valley Creek, was incorp. June 8, 1812. It contains 3 churches, the Cherry Valley Academy,[6] a bank, newspaper office, and gristmill. Pop. 933. **Salt Springsville**[7] (p. o.) is a hamlet in the N. E. corner. The first settlement was made on the present site of the village in 1739, by John Lindesay, an emigrant from the Londonderry Colony of Scotch-Irish in N. H.[8] The first religious services were held in 1743, by Rev. Samuel Dunlap, a native of Ireland.[9]

DECATUR[10]—was formed from Worcester, March 25, 1808. It lies upon the E. line of the co., S. of the center. The surface is hilly, and broken by the narrow valleys of several small

[1] Paul Gardner settled in 1792, and Benj. Card. Miles Potter, Caleb Gardner, Alexander Parker, Ira Johnson, John Johnson, Lemuel Hubbell, and Sam'l Hubbard about the same time or soon after, in the vicinity of Burlington Flats. The first school was taught by Jos. Wright, at Burlington Green. Paris Burgess and Willard Church kept the first inns, and Walbridge & Co. the first store, at Burlington Flats. Augustus and Adolphus Walbridge erected the first mill, at the same place.

[2] The census reports 8 churches; 3 Bap., 1 Presb., Cong., Prot. E., Friends, and F. W. Bap.

[3] John Marsh, Joseph Cox, John and Daniel Eastwood were among the first settlers in the W. part of the town, and Wm. Mason and Dr. John Burgess in the E. part. The first child born was Wm. Shaw, and he is supposed to have been the first one that died; the first marriage was that of Jos. Cox and Betsey Gilbert. The first school was taught by Levi H. Hibbert, at the house of Jos. Cox. Abijah Gilbert kept the first inn, and Wm. Mason the first store, near Gilbertsville. The first mill was erected by Jos. Shaw and Abijah Gilbert.

[4] The census reports 5 churches; Cong., Presb., Prot. E., Bap., and M. E.

[5] This place has been the residence of several of the distinguished political and professional men in the State among whom were John Mills, Esq., the distinguished lawyer of N. Y. City; Hon. Wm. W. Campbell, author of the "Annals of Tryon Co.;" Rev. Eliphalet Nott; Jabez D. Hammond, Esq., author of "Political History of New York;" Hon. Levi Beardsley, author of "Reminiscences of Otsego;" Alvin Stewart, Esq.; and James C. Morse, Esq.

[6] This institution was incorp. Feb. 8, 1796, and is the oldest academy W. of Schenectady. Its first principal was Rev. Solomon Spaulding, the reputed author of the Book of Mormon; his successor was Rev. Eliphalet Nott, the venerable President of Union College. The institution has maintained a high reputation for more than half a century, and is still in a flourishing condition.

[7] Named from the brine springs in the vicinity.

[8] Mr. Lindesay was one of the original proprietors of Cherry Valley, under a patent granted in 17—S. by George Clarke, then Lieut. Governor of New York to John Lindesay, Jacob Roseboom and others. David Paterson and James Campbell, from Londonderry, N. H., and Wm. Gill and Wm. Jackson, from the land, settled on the patent, in 1742, at and near the village. John Wells, from Ireland, settled at the village, in 1744. From the fear of Indian hostilities, the settlement of Cherry Valley proceeded slowly, there being in 1752, 12 years after the first settlement, but 8 families in the town; and at the breaking out of the Revolution, in 1775, the number of families did not exceed 60. James Ritchie kept the first store and inn, anterior to the war, and James Campbell erected the first gristmill, in 1743–44. John Wells erected the second gristmill. Rev. Samuel Dunlap taught a classical school at his own house, in 1743–44,—the first probably, of the kind W. of the Hudson. The whole settlement was destroyed by the Indians, and the greater part of the inhabitants were murdered and taken prisoners, on the evening of Nov. 11, 1778. See page 533.

streams. The hills generally have gradual slopes and rounded summits, and are elevated 250 to 300 ft. above the valleys. The town is drained s. by Oak and Parker Creeks, flowing into the Schenevas. The soil is a sandy and gravelly loam. **Decatur,** (p. v.,) near the s. w. corner, contains a church and 120 inhabitants. The first settlements were commenced in or about 1790, by Jacob Kinney, originally from New Milford, Conn., at or near the village of Decatur.[1] The first religious association (M. E.) was formed at an early period.[2]

EDMESTON—was formed from Burlington, April 1, 1808. It lies upon the w. border of the co., N. of the center. The surface is an elevated upland, broken by numerous irregular valleys. The highest elevations are 400 to 500 ft. above Unadilla River, which forms the w. boundary. Wharton Creek flows across the S. E. corner. Mill Creek and several other small streams take their rise in the town. Smiths Pond is a small sheet of water in the N. E. corner. The soil is a sandy and clayey loam. **Edmeston Center** (Edmeston p. o.) contains 3 churches, a grist and saw mill, and tannery. Pop. 275. **West Edmeston,** (p. v.,) on Unadilla River, and partly in Brookfield, (Madison co.,) contains a church and 35 houses. **South Edmeston** (p. v.) contains a church and 30 houses. **East Edmeston** is a p. o. Of the first settlement in town, and the data of the precise date are wanting. It was made, however, on Unadilla River, during the interval between the close of the French War, in 1763, and the commencement of that of the Revolution, in 1775, by Col. Edmeston, an officer of the French War, and Percifer Carr, a faithful soldier who had served under him.[3] The first church (Bap.) was formed at Taylor Hill, March 8, 1794; Rev. Stephen Taylor was the first preacher.[4]

EXETER—was formed from Richfield, March 25, 1799. It is an interior town, lying N. W. of the center of the co. The surface is hilly and broken, consisting mainly of elevated uplands. Angel Cliff and Town Cliff Hills, in the E. part of the town, are 400 to 500 ft. above the valleys. The town is drained E. by several small streams flowing into Schuyler Lake, and S. by Butternut and Wharton Creeks, both of which rise in this town. The soil is a clay and gravelly loam, well adapted to grazing. **Exeter Center** (Exeter p. o.) contains a church and 100 inhabitants. **Schuylers Lake,** (p. v.,) at the outlet of Schuyler Lake, on the E. border of the town, contains 2 churches and 280 inhabitants. **West Exeter** (p. v.) contains 1 church and 100 inhabitants. The first settlements were made by John Tunnicliff, near Schuyler Lake, and William Angel, on Angel Hill, in 1789.[5] The first religious association (Presb.) was formed at Exeter Center, in 1800; Rev. T. W. Duncan was the first regular preacher.[6]

HARTWICK[7]—was formed from Otsego, March 30, 1802. Its N. line was changed in 1[illegible]. It is the central town in the co. It is a hilly upland, the highest summits being 200 to 350 ft. above the valleys. Its E. part is drained by the Susquehanna, and its W. part by Otego Creek. The soil is chiefly a sandy and gravelly loam, with an occasional mixture of clay. **Hartwick,** (p. v.,) on Otego Creek, in the W. part, contains 4 churches, 2 iron foundries, several mills, and other manufacturing establishments. Pop. about 400. **Hartwick Seminary,** [illegible] the valley of the Susquehanna, contains the "Hartwick Theological and Classical Seminary,"[8] a church, and 20 dwellings. **South Hartwick** (p. v.) contains a church and 17 [illegible]. **Toddsville,** (p. v.,) upon the line of Otsego, in the N. E. corner of the town, contains the Clinton Cotton Factory[9] and about a dozen dwellings. **Clintonville,** a hamlet in the S. [illegible], is the seat of the Clinton Cotton Factory.[10] The Hartwick Patent, including the greater part of the area of this town, was granted April 22, 1761; and settlements were made in the town before the

3 At the close of the war, Col. Edmeston, for his military services, received the grant of a tract of land covering a large portion of the town on which he made the first settlement. At his death the lands fell to heirs and minor children residing in England, from whom no safe title could be obtained for many years—which greatly retarded the settlement of the town. During the Revolution, the hired men of Mr. Carr were killed while at work, his barn was burned, his property destroyed and himself and family were taken prisoners by the British and Indians and detained to the close of the war. Abel De Forest and Gideon [illegible] were [illegible] in the Unadilla. Aden Deming and James Kenada, at Edmeston; and Stephen Taylor, on Taylor Hill, where the first school was taught. Revolution.[1] The first church (Bap.) was formed Aug. 19, 1795; Rev. John Bostwick was the first settled preacher.[2]

LAURENS—was formed from Otsego, April 2, 1810. It is an interior town, lying s. w. of the center of the co. With the exception of the broad valley of Otego Creek, the surface is high and hilly. It is drained s. by Otego Creek and several tributaries, among which are Harrisons and Camps Creeks. The soil is a sandy and gravelly loam, in some parts slaty, and generally productive. One and a half mi. w. of Laurens is a sulphur spring. **Laurens,** (p. v.,) on Otego Creek, in the E. part, was incorp. April 22, 1834. It contains 3 churches, 2 flouring mills, the Otsego Cotton Mills,[3] an iron foundery, and a tannery. Pop. 726. **Jacksonville,** (Mount Vision p. o.,) in the N. E. corner, contains 2 churches, a grist and saw mill, and about 30 houses. **West Laurens** (p. v.) contains about 15 houses. Settlements were made in this town prior to the Revolution, by Joseph Marshall and Richard Smith, a little N. of Laurens Village; by John Sleeper, at the village; and by Wm. Ferguson, a little s. of it.[4] The first religious association was formed by the Friends, who erected a meetinghouse in 1800.[5]

MARYLAND—was formed from Worcester, March 25, 1808. It lies on the s. line of the co., E. of the center. Its surface is a hilly upland, broken by the deep ravines of the streams. Schenevus Creek flows s. w. through near the center and receives several tributaries from the N. South Hill, a steep, unbroken ridge 350 to 500 ft. above the valleys, extends along the s. bank of the creek through the town; and from its summit the surface spreads out into a rocky and broken upland, extending into the s. border. The soil is principally a sandy loam, and is best adapted to grazing. **Maryland,** (p. v.,) near the center of the town, contains a church and 20 houses; **Schenevus,** (p. v.,) near the E. border, a church, tannery, and 383 inhabitants. **Chaseville** is a p. o. The first settlement was made by Thomas Thompson and his son John, from Columbia co., in 1793.[6] The first religious association (Presb.) was formed at an early period; Rev. Mr Ralph was the first preacher.[7]

MIDDLEFIELD—was formed from Cherry Valley, March 3, 1797. It is an interior town, lying N. E. of the center of the co. The surface is a hilly upland, abruptly descending to Otsego Lake and Outlet, which form its w. boundary. The summits of the hills are 400 to 600 ft. above the valleys. Cherry Valley Creek flows s. w. through the E. part of the town. The soil is a gravelly and sandy loam. **Middlefield Center,** (p. v.,) in the N. part of the town, contains 15 dwellings. **Clarksville,**[8] (Middlefield p. o.,) on Cherry Valley Creek, contains 2 churches, a tannery, and 260 inhabitants. The first settlement was made about 1755, by emigrants originally from Ireland and Scotland.[9] The first religious association (Presb.) was formed by Rev. Andrew Oliver, in 1805; the first church edifice was erected in 1808.[10]

MILFORD—was formed from Unadilla, Feb. 5, 1796, as "*Suffrage*." Its name was changed April 8, 1800. It is an interior town, s. of the center of the co. Its surface is a hilly upland, divided into two distinct ridges by the Susquehanna, which flows s. w. through the town. The valley is deep and bordered by steep hillsides. Crumhorn Mt., on the E. border, is 500 to 600 ft. above the valleys; and the w. hills are 300 to 400 ft. high. Crumhorn Lake, a body of water 3 mi. in circumference, lies upon the summit of Crumhorn Mt. The soil is a sandy and gravelly loam. **Milford Center** (Milford p. o.) contains 1 church and 15 houses; **Colliersville** and

[1] Ed. Crosby and Stephen Skiff were among the first settlers at Hartwick Village, and Elijah and Rufus Hawkins and N. Lyon in the N. E. part of the town. Jam's Butterfield kept the first inn and Daniel Lawrence the first store, at what is called White House. The first mill was erected by Samu l Mudge at Hartwick Village.

[2] The census reports 6 churches; 2 Christian, Bap., Luth., Presb., and M. E.

[3] This factory was erected in 1840, by an investment of $40,000. It employs 40 persons, and makes sheetings exclusively, to the value of $60,000 per annum.

[4] Lyman Crafts kept the first inn, about 1812, and Erastus and Ezra Dean, the first store. John Sleeper erected the first gristmill, and Daniel Johnson the first factory.

[5] The census reports 6 churches; 2 M. E., Friends, Bap., Christian and Presb.

[6] In 1794, Joseph Chase, Col. J. Houghton, Ezekiel Rice and Caleb Byington, from Vt., and Daniel Houghton and Wilder Rice, settled near Schenevus. Daniel Shaver, from Mass., settled at Schenevus, and Joseph Howe on Elk Creek. The first gristmill was built by Israel Spencer, and the first sawmill by Jothan Houghton, in 1795, on Schenevus Creek. Joseph Chase kept the first inn, near Roseville; and Stephen G. Virgil the first fulling and cloth dressing mill. The first death was that of John Rice, killed by the fall of a tree.

[7] The census reports 4 churches; 3 M. E., and Bap.

[8] About 2 mi. N. of Clarksville is a rock called by the Indians Nis-ka-yu-na, probably meaning Council Rock; where various tribes from the s. were accustomed to meet the Mohawks in council. In former days the rock was covered with hieroglyphics, but from its shaly nature all are now obliterated.

[9] Among those who settled prior to the Revolutionary War were Wm. Cook, Daniel, Benjamin, and Reuben McCollum, Samuel and Andrew Wilson, Andrew Cochran, Andrew Cameron, and —— Hall, all in the N. part of the town. They came from the N. of Ireland, but were mostly of Scotch descent. Among those who settled near the close of and after the war were Benjamin Gilbert, in the N. part, in 1780; Reuben Beals, in the s. part, in 1786; Wm. Compton, Bernard Temple, —— Rice, Stephen and Thomas Pratt, Whitney Juvill, and Moses Rich, all from Mass., and Wm. Cook from England, in 1787; —— Dunham, Wm. Temple, and Daniel Moore, from New England, in the s. part of the town, soon after. Hannah Hubbell taught the first school, about 1790. Alexander McCollum and Andrew Cameron kept the first inns, and Benjamin Johnson the first store, in 1790. Mr. McCollum also built the first sawmill, before the war; and Moses Rich the first gristmill, in 1795.

[10] The census reports 4 churches in town; 2 Bap., Presb., and M. E.

Portlandville are p. offices. The first settlement was made in the S. part of the town, about 177- by a squatter named Carr. As the settlements made at that period [illegible] wars which followed, little or no progress was made until the close of the Revolution.[1] The first religious services (Cong.) were held near Millard Village, in 17[illegible] by Rev. [illegible] Kent, the first preacher. The census reports 6 churches.[2]

MORRIS—was formed from Butternuts, April 6, 1818. It lies on the w. [illegible] s. of the center. Its surface is a hilly upland, divided into two principal ridges by Butternut Creek, which flows s. w. through near the center. The w. ridge terminates in a series of steep bluffs bordering upon Unadilla River, which forms the w. boundary of the town. The soil upon the uplands is composed of clay, gravel, and disintegrated slate, and in the valleys of gravelly loam. **Louisville,** (Morris p. o.,) on Butternut Creek, contains 4 churches, 2 cotton factories, 3 tanneries, a gristmill, and several other manufacturing establishments.[3] Pop. about 400. **Maple Grove** is a p. o. The first settlement was made about 1770, by Andre Renouard, at Elm Grove, and Louis and Paschal Franchot, at Louisville, emigrants originally from France.[4] The first church (Bap.) was organized Aug. 28, 1793; Rev. John Lawton was the first preacher.[5]

NEW LISBON—was formed from Pittsfield, April 7, 1806, as "*Lisbon.*" Its name was changed April 6, 1808. It is an interior town, lying w. of the center of the co. Its surface is a hilly upland, divided into several ridges by the deep ravines of the streams. The highest summits are 300 to 500 ft. above the valleys. The principal streams are Butternut Creek, flowing s. through the w. part, and Otego Creek, in the E. Gilberts Lake is a small sheet of water on the s. border. The soil upon the uplands is a clay and slaty loam, and in the valleys a gravelly loam. **Garrattsville,** (p. v.,) on Butternut Creek, contains a church, gristmill, sawmill, distillery, and fork factory. Pop. 192. **Noblesville** (New Lisbon p. o.) contains a church, gristmill, and 25 dwellings. **New Lisbon Center** and **Stitsonville** are [illegible]. The first settlement was made in 1775, by William Lull and Increase Thurston.[6] The first church (Bap.) was formed at New Lisbon Center, in 1804, by Elder S. Gregory. A Cong. church was formed the same year by Rev. Wm. Stone.[7]

ONEONTA—was formed from Unadilla, Feb. 5, 1796, as "*Otego.*" Its name was changed April 17, 1830. It is the central town upon the s. border of the co. Its surface is a hilly upland, broken by the deep valley of the Susquehanna, which extends N. E. and S. W. through the s. part. Otego Creek and several small streams flow into the Susquehanna from the N. A range of hills 500 ft. high extends along the S. E. bank of the Susquehanna. The center and N. part are hilly, and broken by narrow and irregular valleys. The summits are 150 to 300 ft. above the valleys. The soil is gravel, slate, and clay on the uplands, and gravelly loam and alluvium upon the river bottoms. **Oneonta,** (p. v.,) on the Susquehanna, in the s. part of the town, was incorp. Oct. 14, 1848. It contains 3 churches, a woolen factory, an iron foundery, tannery, gristmill, sawmill, and distillery. Pop. 678. **West Oneonta** (p. v.) contains 15 dwellings. **Oneonta Plains,** 2 churches and a dozen houses. Henry Scramlin and —— Youngs settled in town previous to the Revolution.[8] The first religious association (Presb.) was formed at Oneonta Village, in 1786; Rev. Alexander Conkey was the first settled preacher, when the church was built in 1816.[9]

OTEGO—was formed from Franklin (Delaware co.) and Unadilla, April 12, 1822, as "*Huntsville*." A part of Milford was annexed and its name changed April 17, 1830. It lies on the s. border of the co., w. of the center. Its surface is a hilly upland, divided by the Susquehanna, which flows s. w. through the s. part. The N. part is separated into ridges 200 to 400 ft. high, all extending N. and s. The streams are Mill Creek, east and west branches of Otsdawa Creek, Flax Creek, and Center Brook. The soil is a clay and sandy loam. **Otego,** (p. v.,) on the Susquehanna, contains 4 churches and 331 inhabitants; **Otsdawa,** (p. v.,) on Otsdawa Creek, contains a church, tannery, mill, and 20 dwellings. **Center Brook** is a p. o. on the stream of the same name. Settlements were made in this town, along the Susquehanna, soon after the close of the Revolution; but the precise date of the first settlement is not known.[1] The first church (Presb.) was organized at Otego Village, Sept. 17, 1805; Rev. Abner Benedict was the first preacher.[2]

OTSEGO—was formed as a part of Montgomery co., March 7, 1788, and originally included the greater part of Otsego co. Burlington, Richfield, and Unadilla were taken off in 1792, Hartwick in 1802, and Laurens in 1810. It is an interior town, lying upon the w. bank of Otsego Lake, N. of the center of the co. Its surface is a hilly upland, lying between Otsego and Schuyler Lakes and descending abruptly towards each. The summits are 300 to 500 ft. above the water, the uplands being divided into two ridges by Fly Creek, which flows s. through the center. Oak Creek, the outlet of Schuyler Lake, flows s. through the w. part. The soil is clay, gravel, and sandy loam. **Cooperstown,** (p. v.,) at the foot of Otsego Lake, was incorp. April 3, 1807, by the name of "*Otsego*." Its name was changed to Cooperstown June 12, 1812. Besides the co. buildings, it contains 5 churches, a bank, 3 newspaper offices, an academy,[3] the buildings of the Cooperstown Seminary and Female Collegiate Institute,[4] a flouring mill, and various manufacturing establishments.[5] The location of the village is pleasant and attractive from its many elegant private residences and historic associations. Pop. about 1,500.[6] **Fly Creek,** (p. v.,) upon the stream of the same name, contains 3 churches, several manufactories,[7] and 30 houses. **Oaksville,** (p. v.,) s. of the center, contains a church, factory, and 15 houses. **Otsego Lake** is a p. o. **Toddsville** (p. v.) is on the line of Hartwick. Settlements were made at Cooperstown and Fly Creek, in 1784–85, by Judge Wm. Cooper, Wm. Jarvis, William Ellison, Israel Guild, John Howard, and Elisha Finney.[8] The first religious association (Presb. and Cong.) was formed Dec. 29, 1798; Rev. Isaac Lewis was the first preacher.[9]

PITTSFIELD—was formed from Burlington, March 24, 1797. New Lisbon was taken off in 1806. It is centrally situated upon the w. line of the co. Its surface is a hilly upland, terminating in abrupt declivities upon Unadilla River, which forms its w. boundary. Wharton Creek flows across the N. w. corner, and several small tributaries of Butternut Creek flow through the s. part. The soil is generally a slaty and gravelly loam. **Pittsfield,** (p. o.,) on the Unadilla, contains 10 houses. The first settlements were made in the valley of the Unadilla, about 1793, by Jacob Lull, Aaron Nobles, Hubbard Goodrich, and Matthew Bennett.[10] The first church (Bap.) was formed at an early period, in the s. E. part of the town. The only church (Union) now in town was organized in the E. part in 1849.

[1] Ransom Hunt, Abraham Blakesley, John Birdsall, Benjamin Cummings, Jacob Yates, Joseph Pierce, and Barnard Overhiser, were among the first settlers at Otego Village and along the river. Phineas Cook settled on the E. branch of the Otsdawa in 1800, and built there the first cloth dressing mill, in 1801. Ransom Hunt kept the first inn, and erected the first gristmill in town. Thaddeus R. Austin opened the first store.

[2] The census reports 6 churches: Presb., Prot. E., Bap., F. W. Bap., Christian, and M. E.

[3] The first academy was formed in 1795, and the building burned down March 31, 1809, and was subsequently rebuilt. It has been sustained, and has prospered for most of the time, for half a century.

[4] This institution was established and opened in 1854, and extensive and commodious buildings were erected at a cost of $50,000. It started with J. L. G. McKown as Principal, and with [illegible] of permanent prosperity; but it suspended operations in 1857.

[5] The Hope Cotton Factory, erected in 1813, with an aggregate capital of about $100,000, has through a long series of years given employment to 80 persons. After undergoing various changes in construction, machinery, and proprietorship, the establishment is still continued, with reduced operations.

[6] J. Fenimore Cooper, the novelist, resided here; and his mansion and grounds were among the finest in Central N. Y.

[7] At this place is a fork factory, with a capital of $[illegible],000, employing 30 men, a pail factory; a manufactory of agricultural implements and machinery, employing a capital of $25,000; and a foundery and machine shop, employing 25 men.

[8] John Miller, Widow Johnson, Wm. Abbott and —— Averell settled in 1786. The first child born was Wm. Jarvis, at Fly Creek, in 1787. The first deaths in town were the scalps of two defeating soldiers, who were shot by order of Gen. Clinton in 1779, [illegible] the Sullivan's were commenced. The first school was taught at Cooperstown, by Joshua Downs, in 1788. Wm. Ellison opened the first inn, in 1786; and Judge Wm. Cooper the first store, in 1789–90. The first mill was erected by Samuel Tubbs, at Toddsville, in 1790. In 1779, General Clinton, on his way to join Sullivan's expedition, built a dam across the outlet of the lake to raise the waters sufficiently to float down the Susquehanna the boat, containing his men and military stores. The remains of this dam are still visible. In 1784, Gen. Washington, on a journey of observation, visited the foot of Otsego Lake. In 1786, John Miller felled a large tree across the outlet to serve as a bridge. Judge Cooper removed his family from N. J. in 1790.

[9] The census reports 10 churches; 3 M. E., 2 Presbs., 2 Univ., Ps. E., Bap., and R. C.

[10] Seth Harrington and Benj. Eddy settled in the E. part of the town soon after the settlements on the Unadilla. The first school was taught by Benjamin Pendleton, at Pittsfield Post. Matthew Bennett kept the first inn, in 1797, and Henry Randall the first store, in 1810, at the P. O. Benj. Atwell built the first mill, and the Arkwright Manufacturing Company the first cotton factory, both on the Unadilla.

PLAINFIELD—was formed from Richfield, March 25, 1796. It is the N. W. corner town of the co. Its surface is a broken and hilly upland. Unadilla River, forming the W. boundary, is bordered by steep bluffs rising to the height of 400 to 600 ft. The soil is [illegible] **Unadilla Forks,** (p.v.,) at the junction of the E. and W. branches of Unadilla River, contains 2 churches, a box factory, flouring mill, sawmill, and machine shop. Pop. 270. **Plainfield Center** contains a church and 15 houses; **Spooners Corners** [illegible] **Leonardsville,** (p.v.,) on the Unadilla, in the S. part, is mostly in Madison co. The first settlement was made at and near Plainfield Center, in 1793, by Ruggles Spooner, Elias Wright, and John Kilbourne.[1] The first church (Bap.) was formed and the church erected in 1800; Rev. John Wait the first preacher.[2]

RICHFIELD—was formed from Otsego, April 10, 1792. Exeter and Fairfield were taken off in 1799. It is the extreme northern town of the co. Its surface is rolling and moderately hilly, with a mean elevation of 150 to 200 ft. above Schuyler Lake,—Pray and Nine Hills, on either side of the head of the lake, rising about 200 ft. higher. Schuyler Lake, in the S. E. corner, occupies a deep valley; and into it flow several small streams from the N. and W. The soil is of a diversified character, consisting of gravel, slate, clay, and sandy loam, well cultivated and productive. About 500,000 pounds of cheese are made in the town annually,—being more than double that made in any other town in the co. **Richfield Springs,** p.v., near the head of Schuyler Lake, in the N. E. corner of the town, contains 3 churches, a flouring mill, and 268 inhabitants.[3] **Monticello,** Richfield p.o., near the center, contains a church and 120 inhabitants. **Mayflower** is a p.o.: **Brighton** contains about 15 houses. Settlements were made prior to the Revolution; but they were broken up during the war. The first settlers after the war were John Kimball, Richard and Wm. Pray, John Beardsley, Joseph Coats, and Seth Allen, in 1787.[4] The first church (Prot. E.) was formed at Monticello, May 20, 1799; Rev. Daniel Nash was the first pastor.[5]

ROSEBOOM—was formed from Cherry Valley, Nov. 23, 1854. It lies upon the N. line of the co., N. of the center. The surface is a hilly upland, broken by the valleys of several streams. The hills are generally rounded, and their summits elevated 300 to 350 ft. above Schoharie Kil. The soil is a gravelly loam. **Roseboom,** (p.v.,) in the N. W. part, on the line of Middlefield, contains a church and 111 inhabitants; and **South Valley,** (p.v.,) in the S. E. part, 2 churches and 175 inhabitants. **Pleasant Brook** p.o. is a hamlet.[6] The settlements in this town were commenced about 1800. There are 5 churches in town.[8]

SPRINGFIELD—was formed from Cherry Valley, March 4, 1797. It lies upon the N. line of the co., E. of the center. The surface is a rolling and moderately hilly upland, the hills generally rising about 200 ft. above the valleys. Mt. Wellington, E. of the head of Otsego Lake, in the S. part of the town, is 300 to 400 ft. high. Summit Lake, in the N. part, in high water discharges its waters both N. and S. The streams are small brooks. In the N. part is a deep sink, called "The Chyle," into which a considerable stream of water runs and flows through a subterranean passage to Braman's Factory, where it again appears on the surface. The sink is tunnel-shaped, 240 feet in circumference and 15 ft. deep. After heavy rains it is sometimes filled with water, which, while discharging through the orifice below, often moves round in rapid gyrations. The soil is a black and yellow loam, resting upon limestone and slate. More hops are grown in this town than in any other town in the co. **Springfield Center** [illegible]

houses; and **East Springfield** (p. v.) a church and 20 houses. **Springfield** is a p. o. near the center. The first settlements were made in 1762, by John Kelly, Richard Ferguson, and James Young, from Ireland, at East Springfield; and Gustavus Klumph and Jacob Tygart, at the head of Otsego Lake. Most of these settlers were driven off during the war.[1] The first church (Bap.) was formed at an early period; Rev. —— Fairman was the first preacher.[2]

UNADILLA—was formed from Otsego, April 10, 1792. Butternuts, "*Suffrage*," (now Milford,) and "*Otego*" (now Oneonta) were taken off in 1796, a part of "*Huntsville*" (now Otego) in 1822, and a part of Butternuts in 1857. It lies at the junction of Unadilla and Susquehanna Rivers, in the s. w. corner of the co. The surface is a rolling and hilly upland, the highest summits being 400 to 500 ft. above the valleys. Unadilla River, forming the w. boundary, Susquehanna River, the E., and Sandy Hill Creek, in the E. part, are the principal streams. The soil on the river bottoms is an alluvial loam, and on the uplands a slaty and gravelly loam. **Unadilla,** (p. v.,) on the Susquehanna, was incorp. April 2, 1827. It contains 3 churches, the Unadilla Academy, a bank, newspaper office, cotton factory, furnace, 2 tanneries, a flouring mill, sawmill, paper mill, and various other manufactories. Pop. 795. **Unadilla Center** (p. v.) contains a church and 15 houses. Settlements were made at Unadilla, along the valley of the Susquehanna, prior to the Revolution; of the precise date, and by whom, no records or tradition inform us.[3] A conference took place between Gen. Herkimer and Brant, the Indian warrior, at Unadilla, in July, 1777. The first church (Prot. E.) was formed Nov. 1, 1809; Rev. Russell Wheeler was the first pastor.[4]

WESTFORD—was formed from Worcester, March 25, 1808. It is an interior town, lying S. E. of the center of the co. Its surface is hilly, the highest summits being 400 to 500 ft. above the valleys. It is drained S. by Elk Creek and W. by tributaries of Cherry Valley Creek. The soil is a sandy loam of good quality. **Westford,** (p. v.,) a little E. of the center of the town, contains 2 churches and 12 houses. **Westville,** (p. v.,) in the W., on the line of Middleford, contains 3 churches and 15 houses. The first settlements were made about 1790, in the S. E. part, by Thomas Sawyer, Benjamin Chase, Oliver Salisbury, Alpheus Earl and father, Artemas, Moses, and David Howe, and Ephraim Smith,—all from Vt.[5] The first religious association (M. E.) was formed in 1791.[6]

WORCESTER—was formed from Cherry Valley, March 3, 1797. Decatur, Maryland, and Westford were taken off in 1808. It is the S. E. corner town in the co. The surface is a hilly and broken upland. The highlands which occupy the S. part of the town descend toward the N. by an abrupt declivity 350 to 400 ft. high. This declivity forms a continuous ridge extending N. E. and S. W. through near the center of the town. The principal streams are Charlotte River and its tributaries and Schenevas Creek. The soil is a sandy loam. **Worcester,** (p. v.,) in the N. W. part, contains 2 churches, 2 gristmills, a tannery, and 40 dwellings; **East Worcester** (p. v.) 2 churches, a gristmill and sawmill, and 25 dwellings; and **South Worcester,** (p. v.,) on Charlotte River, a church, a bank, and 20 dwellings. The first settlements were made on Schenevas Creek, from 1788 to '90. The first church (Presb.) was formed at an early period;[7] Rev. —— Bushnell was the first preacher.[8]

[1] Mr. Tygart had two sons, John and Jacob, who were taken prisoners and carried to Canada during the war. Soon after the war, Uriah Dodge, Col. Le Roy and Aaron Bradlow from Conn. and Eb Parsons and Adam Shedden and Isaac White from Mass. settled in the central part of the town. The first inn was kept by Eb Parsons. East Springfield and the first store by Thomas and Stacy Hopper. Garret Staats erected the first gristmill and sawmill before the war.

[2] The census reports 4 churches; Bap., M. E., Presb., and Ass. Presb.

[3] Among the early settlers were Danl Bissel, Aliah Beach and Samuel Martin, at Unadilla. —— Bates, —— Morchebl, and Peter Rogers, at Unadilla Center, Abel De Forest and Wm. Buckley, in the E. part of the town. Solomon Martin kept the first store, in 1800, and Sampson Conger the first gristmill.

[4] The census reports 7 churches, 3 M. E., 2 Bap., Prot. E., and Presb.

[5] Among the other early settlers were Luther Seaver and Samuel Babcock, from Mass., the latter in March, 1791. Wm Chase was the first child born in town. Nathaniel Griggs kept the first inn at Westford Village, in 1795, and David Smith, the first store, about the same time. Capt. Artemus Howe built the first gristmill, in 1794, and also erected the first sawmill.

[6] The census reports 3 churches, 2 M. E., Cong., Prot. E., and Prot. Meth.

[7] Among the early settlers were Silas Crippen and Henry Stever, from Connecticut, Solomon Hartwell, Uriah Bigelow, and Nathaniel Todd, from Mass., and Charles Wilder and Joseph Lamber, from Vt. Philip Crippen, son of Silas Crippen, was the first child born in town. The first school was taught by Joseph Lamber, in 1798. Isaac Pullen kept the first inn, in 1795, and Aaron Kinney, the first store, in 1798. Silas Crippen built the first gristmill, in 1795, and the first sawmill, about the same time. The first clothing and carding works were erected by Rufus Draper.

[8] The census reports 4 churches; 2 Bap., M. E., and Evan. Luth.

PUTNAM COUNTY.

THIS county[1] was formed from Dutchess, June 12, 1812. It lies upon the Hudson, between Dutchess and Westchester cos., and extends E. to the Conn. line. It is centrally distant 85 mi. from Albany, and contains 234 sq. mi. It embraces nearly all of The Highlands E. of the Hudson. The mountains consist of several steep, rocky ranges, extending in a N. E. and S. W. direction and separated by deep, narrow valleys, the principal of which are Peekskill Hollow, and Canopus and Pleasant Valleys. The co. is watered by the upper branches of Croton River and several smaller streams. Among the mountain valleys are numerous picturesque lakes, the largest of which are Lakes Mahopac,[2] Canopus,[3] and Gleneida.[4] In the valleys the soil is a productive, sandy loam, but the mountains are bare and rocky, and only valuable for their mines[5] and quarries.[6] Iron ore abounds; and serpentine, magnesian limestone, and several other minerals are also found.[7] The rocks belong chiefly to the primitive and lower sedimentary or metamorphic series, consisting of granite, gneiss, granular quartz, talcose slate, metamorphic limestone, serpentine, greenstone, and hornblende. Peat and marl are found in various localities.[8] In the farming districts the people are principally engaged in dairying and furnishing milk for the New York market. Manufacturing is extensively carried on at Cold Spring. The principal works of internal improvement are the Hudson River R. R., extending through Philipstown, and the Harlem R. R., through Patterson and Southeast. The county seat is located at Carmel.[9] The co. buildings consist of a courthouse,[10] jail,[11] and co. clerk's office.[12] The poorhouse is located on a farm of 196 acres in Kent, about 2½ mi. from Carmel.[13] Two newspapers are published in the co.[14] A strip 580 rods wide along the E. border of the co. constitutes a part of the "*Oblong*" Tract, and was patented by Thomas Hawley and his associates, June 8, 1731.[15] The remaining part of the co., and a small part of Dutchess, are included in the great Highland Patent of Adolph Philipse. At the time of the Revolution this patent was owned by Philip Philipse, and Mary and Susannah, wives of Col. Roger Morris and Beverly Robinson, of the British army. Morris and Robinson, together with their wives, were attainted, and their property was confiscated and sold by the Commissioners of Forfeiture. It was subsequently shown in court that one-third of the patent was vested in the children of Col. Morris and his wife, and was not reached by the bill of attainder. The State was therefore obliged to

[1] Named from Maj. Gen. Israel Putnam, who was stationed in the co. a part of the time during the Revolutionary War. In the act of Dec. 19, 1775, the co. was styled "*South Precinct*," March 24, 1772, it was subdivided into "*Southeast*," "*Fredericksburgh*," and "*Philips*" Precincts. The first of these precincts included the present towns of Southeast and Patterson, the second Carmel and Kent, and the third Putnam Valley and Philipstown.

[2] On Sauthier's map of 1779 this word is written "*Macalpack*."

[3] This lake was formerly called "*Horsmans Pond*." It is now frequently called "*Osbornetown*," from an Indian chief said to have resided in this locality.

[4] Formerly called Shaw's Lake.

[5] Magnetic oxyd of iron is the most important of the ores found although limonite and other varieties are obtained. A bed of magnetic ore was opened several years since on Breakneck Mt., but it has not been extensively worked. Another bed has been opened on Constitution Island, opposite West Point Foundry. The Sinewog vein was formerly worked at the Ewansonal Mine on Sinewog Hill. The Philips vein has been tested at short intervals a distance of 8 mi., and several mines have been opened along its course. The Stewart Mine is the principal of these. Large quantities of ore obtained from the Denny Mine, in the N. part of Putnam Valley, were formerly used at the Cold Spring Furnace. Coal Grove and Government Mines are in the neighborhood of the Denny Mine. The "*Harvey Steel and Iron Co.*" have opened several mines in Southeast, from which an excellent quality of ore for the manufacture of steel was obtained; but they are not now worked.

[6] Blunt's Quarry, on the S. side of Breakneck Point near the line of Dutchess Co., affords a bluish gray granite which has been extensively used for the Delaware Breakwater, Fort Calhoun and Fortress Monroe. The Highland Granite Co.'s quarry, principally owned by Howard & Hall Hoag, is near the Hudson River, a short distance from Blunt's Quarry. It is elevated about 200 ft. above the river. Stony Point Quarry, on a rocky peninsula extending into the Hudson, Philips Quarry, on an estate of the same name, and other quarries in the co., have been worked. Marble is found in the N. part of Patterson.

[7] Among the minerals of the co. are arsenical and common iron pyrites, arsenite and chromate of iron, pyroxene, tremolite, arragonite, graphite, kerolite, brucite, actynolite hornblende, albite, laumonite stilbite, chabasite, epidote mica, zircon, sphene, and diallage.

[8] The principal localities where peat is found are near Patterson and on the E. side of Lake Mahopac.

[9] The first courts were held at the Baptist Church. The first co. officers were Stephen Barnum, *First Judge*; John Jewett, *Co. Clerk*, Wm. H. Johnston, *Surrogate*; and Joel Frost, *Surrogate*.

[10] The courthouse is a wood'n building, erected in 1814, at a cost of $2,500. Joseph Cran, Stephen Barnum, Joel Frost, Jonathan Ferris, and John Jewett were appointed to superintend its erection.

[11] The jail is a stone building, erected in 1814. It adjoins the courthouse on the E.

[12] The clerk's office is a stone fire proof building, located a few rods S. of the courthouse.

[13] The average number of inmates in the poorhouse is 52, supported at a weekly cost of 14 cts. each. The income from the farm is $600 per annum. A school is taught throughout the year.

[14] *The Putnam Co. Courier* was established at Carmel in 1814. It was successively issued as

The Putnam Republican, published by Thos. Smith; and

The Putnam Democrat, published by W. H. Sloat, and afterward by Elijah Yerks. James D. Little succeeded Yerks, and changed the paper to

The Democratic Courier; and again, in 1852, to

The Putnam Co. Democrat. By this name it is now published.

The Putnam Free Press was established at Carmel, June 12, 1858, by Wm. J. Blake, by whom it is still published.

protect the purchasers by settling the claims of these children.[1] During the Revolution the passes through the mountains in this co. were carefully guarded, and at different times large bodies of troops were stationed there. It was the principal scene of the consummation of Arnold's treason, and of many events of minor interest, though no battle took place within its limits. Gen. Putnam had command of the army stationed here most of the time.

CARMEL—was formed from "*Frederickstown*," March 17, 1795. It lies upon the s. border of the co., between Putnam Valley and Southeast. Its surface is rolling and hilly, with intervening valleys extending in a N. and S. direction. Peekskill Hollow Range and Bog Hill are the highest summits.[2] The w. branch of Croton River and Michaels Brook flow through the s. part of the town, and Peekskill Hollow Creek through the N. W. In the town are several beautiful lakes and ponds, the principal of which are Lakes Mahopac, Glenelda,[3] and Gilead, and Kent Lake Ponds. The soil is a light, sandy and gravelly loam intermixed in some places with clay. **Carmel**, p. v., the co. seat, is situated on Lake Glenelda. It is the seat of the Raymond Collegiate Institute,[4] and contains 3 churches, a bank, and 2 newspaper offices. P. p. 1,041. **Mahopac** p. v. contains 1 church, a bank, and about 40 houses; and **Red Mills**, p. v., contains 1 church and about 20 houses. Settlement was commenced about 1749.[5] Enoch Crosby, the "*Harvey Birch*" of Cooper's Spy, lived in this town till after the Revolution, when he removed to Southeast. A church was organized, and an edifice erected near Gilead Lake, a short time before the commencement of the Revolution. There are now 7 churches in town.[6]

KENT[7]—was formed as "*Frederickstown*," March 7, 1788. Its name was changed to "*Fredrick*" March 17, 1795, and to Kent April 15, 1817. Carmel was taken off in 1795. It is the central town on the N. border of the co. Its surface in the E. part is broken by numerous hills, and in the W. by steep and rocky mountain peaks separated by deep and narrow ravines. Smally Hill is the highest peak. The W. and middle branches of Croton River, and Horse Pound and Pine Pond Brooks, are the principal streams. In the town are several ponds and small lakes, the principal of which are White and Pine Ponds.[8] **Farmers Mills** p. v. contains 1 church and several manufacturing establishments.[9] **Coles Mills** (Kent p. o.) and **Ludingtonville** (p. o.) are hamlets. The first settlement was made about 1750, by Zachariah Merritt.[10] The census reports 3 churches in town,—2 Bap. and 1 Union.

PATTERSON[11]—was formed from "*Frederickstown*" and Southeast, as "*Franklin*," March 17, 1795, and its name was changed April 6, 1808. It is the N. E. corner town of the co. Its surface

[1] The Philipse Patent was granted June 17, 1697, to Adolph Philipse a merchant of New York, who died in 1749, without issue, leaving his estate to his nephew Frederick Philipse. The latter had 5 children, viz., Frederick, Philip, Susannah, Mary, and Margaret. By his will, dated June 6, 1751, Frederick was disinherited, and Margaret having died young, the property was equally divided among the remaining three. Philip left a widow who married Gen. Oliver De Lancey. Susannah married Beverly Robinson and Mary married Lieut.-Col. Roger Morris. On the 7th of Feb. 1751 the patent was divided into 6 lots, 3 each that upon the Hudson and the eastern waters, 3 each that westward to the Connecticut line. Frederick, Susannah, and Mary Philipse had each a lot upon the Hudson, and Philip, Susannah, and Mary Philipse had each a lot upon the Connecticut line. On the 14th of June, 1758, Frederick Philipse and Mary his wife executed a release of their interest in the patent to Philip Philipse, which was confirmed by a decree of the Court of Chancery, dated Feb. 6, 1762. Philip Philipse died in 1785, leaving a widow and children. By his will he devised all his property to his children, might be born under the marriage, reserving only to herself and Margaret Philipse, who was then unmarried, their property was sold, by decree of the Court of Chancery, dated Feb. 6, 1762. Philip Philipse died in 1785, leaving a widow and children. By his will he devised all his property to his children, the interest of the heirs of Morris in this property for £20,000. By act of April 5, 1832, the Comptroller of the State of New York was directed to pay to the Supreme Court of the United States the amount of the decree of the Court of Chancery, dated Feb. 6, 1762, with interest, upon the conveyance of the property to the State of New York. The Supreme Court of the United States decided that the State was not liable for the improvements that had been made by occupants, $250,000 more. The Comptroller refused to pay it, and suit was brought upon which the comptroller was, by act of April 5, 1832, directed to issue stock for the full amount, with costs. The amount issued was $ [illegible] larger interests to greater numbers, or which were argued with more ability, than this. In the suit against James Carver the counsel [illegible] were Messrs. Sedgwick, J. C. Hamilton, Emmet, Platt and Cowden and the defendant's counsel Attorney-Gen. Wetmore, Van Buren, Ogden Hoffman, and Cowen. is hilly; but, with a few exceptions, the hills are arable to their summits. The principal streams are the E. branch of Croton River and its tributaries, Quaker, Birch, and Muddy Brooks. Croton Lake is in the W. and Little Pond in the E. part. "*The Great Swamp*" extends along the E. branch of Croton River.[1] The soil is a sandy loam. **Patterson,** (p. v.,) a station on the Harlem R. R., contains 2 churches and 37 houses. **Towners Station** (Towners p. o.) and **Haviland Hollow** (p. o.) are hamlets. The Prot. E. Church at Patterson was built in 1770. There are 4 churches in town.[2]

PHILIPSTOWN[3]—was formed March 7, 1788. A part of Fishkill (Dutchess co.) was taken off in 1806, and Putnam Valley in 1839. It is the most westerly town of the co., and extends about 10 mi. along the Hudson. Its surface is broken by numerous steep and rocky mountain ridges separated by deep and narrow valleys.[4] These mountains constitute the most elevated portion of The Highlands.[5] The ranges have a general N. and S. or N. E. and S. W. direction. Cleve Creek flows through the N. part of the town, and Canopus Creek through the N. E. corner. Foundry, Breakneck, Andreas, Indian, and other brooks flow through narrow valleys and rocky ravines into the Hudson. The greater part of the surface is unfit for agricultural purposes. Constitution Island[6] is a promontory opposite West Point, connected with the mainland by a marshy meadow. The "*Sunk Lot*" is a tract of 1300 acres of low and apparently sunken ground. Several mines of magnetic iron ore had been opened in town; but none are now wrought. Granite is extensively quarried, and brick are made at several points along the river. The soil is a gravelly, sandy, and clayey loam. **Coldspring,** (p. v.,) situated on the Hudson, was incorp. April 22, 1846, and includes the suburban villages of Nelsonville and Marysville. It is a station on the Hudson River R. R., and contains 6 churches and an extensive foundry.[7] Pop. 2,237. **Breakneck** and **Griffins Corners** contain each about a dozen houses. **Davenport Corners** contains 1 church and 10 houses. **Continental Village**[8] has 1 church and about 12 houses. **Garrisons,** (p. o.,) on the Hudson, is a station on the Hudson River R. R. The first settlement was made about 1715, by Thos. Davenport.[9] This town was principally settled under Col. Beverly Robinson,[10] who acquired title by marriage with Susannah, daughter of Frederick Philipse. Undercliff, the residence of Gen. Geo. P. Morris, is situated on a high bluff in the N. part of Cold Spring. The census reports 9 churches in town.[11]

PUTNAM VALLEY—was formed from Philipstown, as "*Quincy*," March 14, 1839. Its

[2] Prot. E., Bap., Friends and Presb.

[3] Named from Adolph Philipse, patentee of the Philipse Manor. The Philipse Precinct was formed March 24, 1772.

[4] "*Manitou Ridge*" or the Martyrs Reach, was a short stretch of the Hudson, just above West Point, where early navigators were often retarded by baffling winds. There were 12 tracks, or reaches, on the Hudson known to sailors as "*Horse*," "*Sand Anchorage*," "*Gricks*," "*Hogs*," "*Poet*," "*Bakers*," "*John Pintards*," "*Hart's*," "*Sharpens*," "*Parsons*," "*Pool*," "*Martlaers*," and "*Long*." Reaches, the last named extending from Pollepels Island to Kosby Ellebaugh. *Bowen's Manual*, p. 12.

[5] Among the peaks of The Highlands in this town are Anthonys Nose, Sugar Loaf, Breakneck Mt., and Bull Hog Back. Vinegar, Cot, Pine, and Fort Hills. Anthonys Nose is 1228 feet above the Hudson and Sugar Loaf 857 ft.

[6] This promontory was called "*Martlaers Island*" before the Revolution. In July, 1775, a bar was built upon it, under the direction of Bernard Romans, and in 1778 a heavy chain was stretched across the Hudson from this fort to West Point. Col. Timothy Pickering appointed to have charge of this work, in March, 1778, contracted with Peter Townsend (at the Sterling Iron Works at Warwick, Orange co.) for the construction of the chain. The task was done in two works and the heavy chain united in sections to West Point. The links weighed from 100 to 150 pounds each, and the entire weight was 150 tons and its length 1,500 ft. It was buoyed up by large spars, a few feet apart, secured by strong timbers framed into them and firmly attached to the rock on both shores. In winter it was drawn on shore by a windlass and replaced in the spring. It was never broken by the enemy and continued in use until the peace. A second chain, 1 inch in diameter and 1,800 ft. in length, (made at the Ringwood Iron Works, N. J.,) was stretched across the channel from Anthony's Nose to Fort Montgomery, in Nov. 1779. It parted twice, and the enemy broke it and passed it in the fall of 1778. Another, stretched from Pollepels Island to the shore, consisted of spars pointed, and their ends united by iron rings. There was also a *chevaux de frize* sunk at the same place to prevent the passage of vessels. Most of these works were constructed and placed under the immediate direction of Capt. Thomas Machin, an engineer in the service. Traces of Fort Constitution and the outworks are still visible.

[7] The West Point Foundry is one of the largest establishments of the kind in the country. It was established in 1817, by an association organized for that purpose. A tract of 150 acres was purchased of Frederick Philipse, and a moulding house, boring mill, blacksmith and pattern shops, and drafting and business offices were erected. An act of incorporation was obtained April 15, 1818, and in 1819 the finishing or machine, smiths and boat departments of the establishment were brought from New York. The works now consist of a moulding house, with 3 cupola furnaces; a gun foundry, with 3 air furnaces; 2 boring mills—one driven by an overshot waterwheel and the other by a steam engine; a blacksmith shops, a turning shop; a finishing shop, with a pattern shop on the second floor; a model shop, a punching machine house, 3 pattern houses, a fire engine house, an office, and several smaller buildings. A dock on the river belongs to these works, and a branch from the R. R. extends to them. From 400 to 600 men are employed. Shafts 2 ft. in diameter, and of 15 tons weight, have been forged here.

[8] This village, together with barracks for 2,000 men, was burned in Oct. 1777, by a detachment of the enemy on their way up the Hudson to cooperate with Gen. Burgoyne. Two small forts were erected here during the Revolution, and traces of them are yet visible.

[9] Davenport built the first house at Coldspring, in 1715. David Hurtin, and several families named Haight, Bloomer, and Wilson, settled in the town in 1720. John Meeks was the first settler at Continental Village, and John Rogers settled a little N. of the same place about 1730. Jas. Stanley settled in the town in 1730, and Thos. Sarles in 1731. The first gristmill was built about 1762, by Beverly Robinson, at Continental Village.

[10] Col. R. Gunnison's house, situated at the foot of Sugar Loaf Mt., was the head quarters of Gens. Putnam and Parsons in 1778–79, and of Gen. Arnold at the time of his treason. The building is still standing, and is owned by Richard D. Arden, by whom it is carefully preserved in its original character. Col. Robinson granted a glebe to St. Philips Church in The Highlands, 1 mi. E. of Garrisons, which was confirmed by the act of March 27, 1794. The church was used as a barrack during the Revolution.—*Hasbrouck's Hist. Putnam Co.* pp. 180–202, *Sibley's Log's*, etc. p. 502.

name was changed Feb. 1st, 1840. It has [illegible] Carmel. Its surface is broken by steep and rocky mountain ridges extending in nearly a N. and S. direction, and separated by narrow valleys. These mountain ranges constitute a part of The Highlands. The principal streams are Canopus Creek, Canopus Lake Creek, and Peekskill Hollow Brook. Canopus Lake is a beautiful sheet of water near the center of the town.[1] The soil in the valleys is a moderately fertile, sandy and gravelly loam. Iron ore has been found in several localities, but in places so difficult of access that it is not mined to any considerable extent. **Oregon,** at the confluence of Peekskill Hollow Brook and Canopus Lake Creek, contains 17 houses, and **Crofts Corners** [illegible] **Tomkins Corners** [illegible]. Among the early settlers were families named Dusenbury and Adams.[2] The census reports 4 churches in town; 3 M. E. and 1 Bap.

SOUTHEAST—was formed from Frederickstown and "*Southeasttown*,"[3] March 7, 1788. A part of Patterson was taken off, as "*Franklin*," in 1795. It is the S. E. corner town of the co. Its surface is rolling and hilly. The streams are the E. and middle branches of Croton River and their tributaries. Several small lakes and ponds lie among the hills.[4] The soil is a sandy and gravelly loam. Iron ore abounds, but no mines are wrought at the present time. QUEENS COUNTY.

This county was organized Nov. 1, 1683,[1] having previously been included in the North and West Ridings of Yorkshire.[2] Its original bounds have not been changed. It lies upon Long Island, near the w. extremity, is centrally distant 133 mi. from Albany, and contains 410 sq. mi. It extends across the island, bordering both upon Long Island Sound and the ocean. Its coasts are deeply indented by irregular inlets, bays, and harbors. The principal of these upon the sound are Oyster Bay, Cold Spring and Oyster Harbors, Mill Neck Creek, Hempstead Harbor, Manhasset Bay, Little Neck Bay, Little Bay, Powells Cove, Flushing Bay, and Bowery Bay. Upon the East River are Halletts Cove and the narrow passage of Hell Gate, and upon the s. shore, Jamaica, Hempstead, and South Oyster Bays. Along these bays and the creeks that flow into them are wide salt meadows, the most extensive being upon the s. shore. Outside of the bays on the ocean side is a series of beaches and shifting sand-ridges, affording a complete protection from the storms of the ocean. These beaches are divided into distinct parts by several inlets opening into the bays.[3]

Inclosed in the bays within the beaches is a great number of low, marshy islands separated by narrow tidal streams and covered with sedges.[4] A wide strip bordering immediately upon the bays is of the same marshy character. Along the deep bays upon the N. coast are small patches of salt meadow; but the greater part of the land upon the capes, necks, and promontories is of a most excellent character.[5] A range of hills 100 to 300 feet high extends in a general E. and W. direction through the co., a little N. of the center, and irregular spurs extend northward to the sound. From the base of the ridge a wide, unbroken plain extends to the S. to the salt marshes which surround the bays.[6]

The streams of the co. are mostly small, and afford but a limited amount of water-power. At the mouth of several of the creeks on both the N. and S. shores the ebbing tide is used for hydraulic purposes. At the head of several of the streams are little, fresh water ponds,[7] the principal of which is Success Pond,[8] near the top of the high ridge in the S. E. corner of Flushing. The soil upon the N. side is a productive, sandy loam, in some places mixed with clay. The plains have a coarse, sandy soil, which is rendered productive only at considerable cost. Along the borders of the salt meadows is a strip of light, sandy soil, easily cultivated and of moderate fertility.[9]

The people are principally engaged in agriculture and market gardening. Fishing and the taking of oysters afford occupation to a large number of people. An extensive coasting trade is carried on, and the co. each year furnishes a large quota of sailors. Manufactures are extensive and various, and are confined principally to the N. shore.

The co. courthouse is situated upon the plains of North Hempstead, a little N. E. of Mineola station and p. o., and near the geographical center of the co.[10]

The jail occupies a portion of the courthouse building.[1] The county records are kept in a stone fire-proof building in the village of Jamaica and in the same building are also the Surrogate and Board of Supervisors.[1] There is also no poorhouse, but each town provides for the accommodation of its own paupers.

The Brooklyn and Jamaica R. R., extending w. from Jamaica to the co. line, is leased by the Long Island R. R., which extends e. from Jamaica through Hempstead, Mineola, Hempstead and Oyster Bay. The Flushing R. R. extends n. from Flushing Village through Newtown to the mouth of Newtown Creek. The Spring Branch R. R. connects Rockaway with the L. I. R. R., with the village of Spring, 10 m. s.

There are 7 newspapers published in the co.: 2 at Jamaica, 2 at Hempstead, 2 at Flushing, and 1 at Glen Cove.[3]

The co. was mostly settled by English immigrants, under the patronage of the Dutch government during the last 20 years of its existence. The community of Long Island was composed by the Puritans and others of New England, and the boundary line was the subject of a long and angry dispute, which was at one time referred to the final arbitration of New York in the person of Penn.[2] The old deed to which was made the fourth exempt Oyster Bay, which even disputed territory. The first purchase made of the Indians by individuals, and their successors in the purchase of the lands in the province. They were mostly settled by a company of the Dutch, and were governed with certain civil rights, which were afterwards confirmed by the English Governors of New York, and some of which remain in force to the present time. The people chose a Board of magistrates and municipal officers, from which the Dutch Governor selected such as he pleased.

The people employed their own ministers, and enjoyed complete religious freedom. The Dutch, however, did not forcibly carry out the oppressive measures they had enacted for such services, and in 1664, Dongan was sent to the city to remove the oppressive measures. He was not heeded, and when the people again met it for the purpose they were ordered to disperse. The inhabitants rejoiced when the Dutch rule was finally broken and they came under the protection of the English. On 6 Nov. 1683, the first English Governor convened a parliament from the several towns upon Long Island, which met at Hempstead in the spring of 1665. A code of laws and ordinances was adopted, in which the council, the assembly, and the governor were pledged. Boundaries were settled, and affairs were regulated to suit the views of the new government. From this time land could be taken without purchase from the Indians and patent from the Governor.

During the Revolution many hostile encounters took place between the people of the county and the British, and the latter were mostly in possession of the county. Refugees were numerous, occupying the islands in the Sound. Provisions and cattle were frequently taken and fortifications erected. A party would frequently put on in whaleboats, and daring exploits were performed by partisans of both sides.

FLUSHING[1]—was first granted by letters patent—issued by the Dutch Governor Keift, Oct. 10, 1645—to a company of English immigrants.[2] This grant was confirmed by Gov. Nicoll, Feb. 1666, and by Gov. Dongan, March 23, 1685.[3] Under the provisions of these charters a considerable amount of land was held in common, to be under the charge of 5 trustees, elected annually.[4] It was recognized as a town under the State Government, March 7, 1788.[5] It lies upon the N. border of the co., W. of the center. Its surface is moderately uneven and has a gentle inclination to the N. A low range of hills extends along its S. border and separates it from Jamaica. Flushing Creek, the principal stream, forms a portion of the W. boundary. The principal indentations upon the coast are Flushing Bay, Powells Cove, Little Bay, and Little Neck Bay. An extensive salt marsh extends along Flushing Creek and the head of Flushing Bay.[6] The soil is a fine quality of productive sandy loam. Gardening, fruit growing,[7] and the nursery business[8] constitute the leading pursuits of the people. The town supports its own poor, and has a house and farm for their accommodation. **Flushing,** (p. v.,) at the head of Flushing Bay, was incorp. April 9, 1813. It contains 8 churches, 2 newspaper offices, several private seminaries,[9] and has a limited amount of manufactures.[10] It is connected with New York by the Flushing R. R. and by a steam ferry from Hunters Point. From its proximity to New York, it has become the residence of many wealthy persons doing business in the city. Pop. 3,488. **College Point,**[11] (p. v.,) on the sound, E. of Flushing Bay, is a modern village, settled mostly by Germans. It contains 2 churches, and an immense manufactory of whalebone, India rubber, and ratan, giving employment to 500 to 700 hands. Pop. 1,150. **Whitestone**[12] (p. v.) is located on the sound, in the extreme N. part of the town. It contains 2 churches, and an extensive tin and sheet ironware manufactory.[13] Pop. 630. **Marathon,** at the head of Little Neck Bay, is a small, straggling village with one church. Several of the neighborhoods in this town are known by distinct local names.[14] **Wilkins Point** has recently been purchased by the U. S. Government for the site of a fort.[15] There are now 13 churches in town.[16] The first settlements were made by English, who probably had first settled in Holland. They arrived at "*New Amsterdam*" in 1645. They were Non-conformists in religion, and settled on the Dutch dominions under the promise of entire religious freedom.[17] But the Dutch soon commenced a series of persecutions that continued until the time of the British conquest in 1664. Several French Protestant families found their way into this town after the revocation of the Edict of Nantes; but few of their descendants are now found. The fruits introduced by these people are said to have given the first direction to the nursery business for which this town is so celebrated. During the Revolution a British force was stationed here.

HEMPSTEAD—was granted by Gov. Keift to several English families, Nov. 14, 1644. This patent was confirmed by Gov. Nicoll, March 6, 1666, and by Gov. Dongan, April 17, 1685.[18]

[1] Named by the Dutch "*Vlissengen*" from a place in Holland.

[2] The first patentees were Thos. Farrington, John Lawrence, John Hicks, John Townsend, Thos. Stiles, Robert Field, Thos. Saul, John Marsten, Thos. Applegate, Lawrence Dutch, Wm. Lawrence, Henry Sawtell Wm. Thorne, Michael Willard, Robt. Firman, and Wm. Wedgen for themselves and associates.

[3] The patentees named in the patent of Gov. Nicoll were John Lawrence, alderman of New York City; Richard Cornwell Chas. Bridges, Wm. Lawrence, Robert Terry, Wm. Noble, John Foxhush, Elias Doughty, Robt. Field, Philip Udall, Thos. Stiles, Benj. Field, Wm. Pidgeon, John Adams, John Hinchman, Nicholas Parcell, Tobias Feakes and John Bowne, and those in the patent of Gov. Dongan were Elias Doughty, Thos. Willett, John Bowne, Matthias Harvey, Thos. Hicks, Richard Cornwell, John Hinchman, Jonathan Wright, and Samuel Hoyt.—*Patents*, L. 64, V, 222 ; 2 *N. Sec. Office*.

[4] These trusts have since been mostly taken up by individuals, though the trustees are still elected to take charge of the remainder. The town records were burned, Oct. 31, 1795, by a servant girl, who was afterward hung for the deed.

[5] By the General Act, establishing towns.

[6] A chalybeate spring was discovered near the head of this marsh in 1806. It was named "*Cheltenham Springs*," and for a time attracted much attention.

[7] The principal fruit grown are cherries, of which large quantities are annually sent to the New York market.

[8] Flushing has a wide reputation for its nurseries, of which there are six, occupying 246 acres and valued at $124,000. The first nursery was commenced about 1750. They now furnish every species of fruit tree, ornamental shrub, and exotic plant cultivated in the country.

[9] The principal of these schools are the Flushing Institute, the Flushing Female College, and the Linnean Hill Seminary.

[10] The principal manufactories are the Excelsior Emery and Sand Paper Manufactory, a steam planing and saw mill, and a tide grist mill.

[11] This place was formerly known as "*Lawrences Neck*." Several farms have been laid out into village plats, each one taking a distinct name. An Episcopal college was incorp. here in 1840; but it has since been abandoned. The location of this institution gave the name to the village.

[12] Named from a large boulder near the landing. The place was first called "*Clark's Hill*" and afterward "*Clarkonia*."

[13] This establishment gives employment to 450 hands.

[14] **Bay Side**—the seat of A. G. Mickle, Ex-Mayor of New York—and **Springville** are near Little Neck Bay. **Fresh Meadows, Ireland,** and **Spring Hill** are locations S. E. of Flushing Village. **Rocky Hill** and **Union Place** are farming neighborhoods. Spring Hill was the residence of Cadwallader Colden, who died here Sept. 20, 1776. His son espoused the cause of the Royalists, and his estate was confiscated.

[15] When fortified, this point will completely command the channel on the N., and render the approach of ships of war toward New York impossible from that direction.

[16] Of these there are at Flushing 2 Friends, Prot. E., M. E., Ref. Prot. D., R. C., Cong., and Bap.; at College Point R. C. and Luth.; at Whitestone, Prot. E. and M. E., and at Marathon a Prot. E.

[17] The religious faith of these people was much the same as that afterward professed by the Quakers, who had not become at that period a distinct sect in England. Their first religious teacher was Francis Doughty, from Taunton, Mass., a Baptist, who became a Quaker in 1657, as did many of the inhabitants. The celebrated Geo. Fox visited America in 1672 and preached in this town. He was entertained at the house of John Bowne, who had particularly suffered from the persecutions of the Dutch; but, his dwelling not being sufficiently large to accommodate the audience, his hearers assembled under the shade of the venerable oaks, one of which is still standing. The Bowne House stands in Parsons & Co's Commercial Garden and Nursery, and is in a fine state of preservation.

[18] The grantees named in the first patent were Robert Ford-

Upon the erection of North Hempstead, in 1784, its name was changed to South Hempstead, and its present name was readopted Feb. 5, 1796. It was recognized as a town March 7, 1788. It lies upon the s. side of the island, extending 20 mi. along the ocean, and embracing about 100 sq. mi. The shore is bordered by a line of beaches and sand hills; and within them are Hempstead and South Oyster Bays, inclosing a large number of low, sedgy islands. West of the bay a long, narrow sandbar, known as Rockaway Beach,[1] extends to the s. w., forming the E. boundary of Jamaica Bay. Wide salt meadows border upon the bays, and from them the land spreads out into an almost perfectly level plain.[2] The soil along the borders of the marshes is moderately fertile, and upon the plain it consists of sand and fine gravel, which is naturally barren, although it may be made productive by the proper application of manures. A considerable portion of the marshes and plain belongs to the town and is used as common property.[3] The people are largely engaged in market gardening. There is no poorhouse; but the paupers are annually put up at auction and struck off to the lowest bidder. **Hempstead,** (p. v.,) near the center of the town, was incorp. June 20, 1853. It contains 3 churches, the Hempstead Seminary,[4] and 1,486 inhabitants. Along the s. shore are several villages, generally scattered and extended over a large territory. They are mostly surrounded by gardens and orchards. **Jerusalem South,** (p. v.,) in the S. E. corner, contains a gristmill and Friends' meetinghouse; next w. are respectively **Bridge Haven,** containing a gristmill and church, **Merrick,** (p. v.,) and **Greenwich Point,** two farming neighborhoods: **Freeport,**[5] (p. v.,) a fishing village, containing 2 churches; **Milburn, Baldwinville,** and **Christian Hook,** hamlets: **Rockville Center,** (p. v.,) containing 1 church; **Near Rockaway,** a hamlet, and **Far Rockaway,** (Rockaway p. o.,) a noted seabathing place.[7] **Valley Stream** and **Fosters Meadows** are two scattered settlements along the E. border. **New Bridge,** (formerly "*Little Neck*,") **Washington Square,** and **Brookfield** are farming neighborhoods. The first settlements were made in 1643, by a colony of English, who had previously settled at Weathersfield and Stamford, in Conn. They founded the first English settlement within the co.[8] The town early acquired a prominent rank, and its records (preserved at North Hempstead) contain a large amount of valuable historical information. Horse races were established here by the Governor in 1690. The first church (Presb.) was started in 1648. There are 18 churches in town.[9]

JAMAICA[10]—was first granted for settlement by Gov. Stuyvesant, March 21, 1656; and a more ample patent was granted in 1660. The rights of the town were confirmed by Gov. Nicoll, Feb. 15, 1666, and by Gov. Dongan, March 17, 1686.[11] It was recognized as a town March 7,

[1] The accompanying seal presents a view of sea and shore from this beach. The name is of Indian origin. This point was formerly inclosed by a fence from Hempstead to Jamaica Bays, and was used for pasturing cattle, horses, and sheep.

[2] This plain is level and treeless. When first known to the European, it was destitute of timber, except a few shrubs. The original planting of this timber was prohibited by statute in 1726. It is mostly unincloused, and used as pasture.

[3] About 1,000 acres of the plain and the salt meadows are common property. The line of cattle in the bay is fixed at the annual town meetings, and the first one on the ground has the choice of location. The [illegible] the morning after, early hour on the appointed day, and sometimes during the night previous. Each inhabitant may hire as many [illegible] he chooses, of the town clerk. North Hempstead formerly enjoyed the right of cutting grass upon these meadows, but has been practically deprived of it for many years. See page 548.

[4] This is a private seminary, owned by a joint-stock company. [illegible] documents variously spell it "*Mauje*," "*Mauje*," "*Mauje*," and "*Mauje*." The name was derived from a tribe of Indians that lived in the vicinity.

[5] First settled by Edward Raynor, and formerly known as "*Raynortown*."

[7] This place contains the Pavilion,—an immense hotel,—and several large summer boarding houses.

[8] Among the early settlers were Rev. Richard Denton, Jonas Wood, Wm. Raynor, Robert Coe, Richard Gildersleeve, Robert Jackson, John Ogden, John Karman, Capt. John Underhill, Andrew Ward, Thurston and Robt. Raynor, Matthew Mitchell and Robert Fordham. In 1647 the first eight, with Robt. Ashmun, Jeremy Ludmund, and Henry Wood, [illegible] and John Cox, Saml Strickland, John Tappin, John Lindon, Wm. [illegible] Jno. Lawrence, Henry Higbee, Thomas [illegible] Wm. Thickstone, Nicholas Tanner, Wm., John, sr. and jr., Jas., and Alvin Smith, Richard, jr., Saml, Dan'l, and Nath'l Denton, Thos. Armitage, Simon Searing, Thomas Willet, Henry Pierson, Jos. and Wm. Scott, Henry Wilson, [illegible] and John Lewis, Thos. Stevenson, John Storge, John and Robert Williams, Wm. Rogers, Richard Ogden, John [illegible], Wm. Washington, Thos. Sherman, Francis Yates, John Ellison, Wm. Shadding, Thomas and Chas. Foster, Roger Lines, Sam'l Clark, John Hudd, Thos. Pope, Daniel Whitehead, [illegible] Baccus, and John Strickland were freeholders, and shared in the division of the lands. A part of the above locations are now included in North Hempstead. The first child born of white parents in town was Caleb Karman, son of John Karman, Jan. [illegible] An order was made [illegible] 1650, requiring all persons to "repaire to the publique Meetings and Assemblies on the Lords dayes, and on publique dayes of fastings and thanksgivings, appointed by publique authority, [illegible] guilders for the first, 10 for the second, and 20 for the third offense. The Rev. Richard Denton, a prominent founder, was their first pastor. He returned to England in 1659, and wrote a historical account of New York, which was published in London in 1659.

[9] At M. E., 2 Presb., [illegible] the M. E. Church in South Hempstead is a monument, erected to the memory of 139 English and Irish immigrants who perished on the ships Bristol and Mexico, wrecked Nov. 21, 1836, and June 2, 1837.

[10] It was first planted [illegible] of the Indians. They called it "*Rusdorph*," signifying "county town." The Dutch named it "*Rusdorph*," signifying "county town." The present name is by some considered as from the Indian "*Jamico*."

[11] The first patent of confirmation continued the names of Daniel Denton, J. P., Robt. Coe, Capt. Bryan Newton, Wm. Hallet, Andrew Messenger, and Nathaniel Denton; and the second named [illegible] V. 172.

1788. It is the s. w. corner town of the co. A range of low sand hills forms its N. boundary; but the remainder of the town consists of an extensive sand plain, and a series of wide salt marshes along the shore. Jamaica Bay, forming its s. boundary, incloses a large number of low, marshy islands. Several small streams take their rise in springs and small ponds among the hills and flow s. to the bay.[1] The soil is light and sandy. A considerable tract immediately bordering upon the marshes is kept in a high state of fertility by artificial means, and is devoted to market gardening. This town has long been celebrated for its race courses.[2] The town poor are annually let to the lowest bidder.[3] **Jamaica,** (p. v.,) near the N. border of the town, was incorp. April 14, 1814. It contains 6 churches, the Union Hall Academy,[4] several private seminaries, a union school, 2 newspaper offices, and several manufactories.[5] Pop. 2,817. **Woodhaven** was organized in 1850 by a number of capitalists for the manufacture of shoes. **Cypress Avenue** is a R. R. station near the line of Kings co. The country in the immediate vicinity is laid out in a village plat, and named **Unionville,** from the Union Race Course: **Clarenceville** is a village plat on the R. R., E. of Jamaica; **Centerville,** a plat adjacent to the trotting course; **Hopedale** and **Jamaica Heights,** two prospective villages in the N. part; **Willow Tree,** a R. R. station, E. of Jamaica; **Queens,**[6] (p. o.,) a R. R. station near the E. line, and **Springfield,** a vicinage 3 mi. long, in the E. part, extending to the bay. The first settlement was made about 1656, by people from Hempstead, who in that year obtained leave of the Dutch Government to purchase lands and erect a town, "according unto their place limited, named Canarise, about midway from Hempstead." In 1702 the civil officers of government removed to this place, on account of prevailing sickness. An attempt was made soon after to appropriate the church to the use of the Episcopalians,—which was resisted, and a controversy commenced, which was not settled until 1728. In 1753 the General Assembly again convened at this place. During the Revolution the town was occupied by the British, and, especially in winter, large bodies of troops were stationed here. The Dutch Church was used as a storehouse. The first church (Presb.) was formed in 1663. The Ref. Prot. D. Church was formed in 1702; and the first Prot. E. services were held during the same year. The Chapel of the Sisters—a neat edifice, built of hewn granite—was erected in the Presb. Cemetery, by Nicholas Ludlum, of New York.[7]

NEWTOWN[8]—was first conveyed by patent, by Gov. Stuyvesant, in 1652. The grant was confirmed by Gov. Nicoll, March 6, 1666, and by Gov. Dongan, Nov. 25, 1683.[9] It was recognized as a town March 7, 1788. It lies upon the East River and Long Island Sound, in the N.W. corner of the co., and includes North and South Brother, Rikers, and Berriens Islands.[10] A range of hills extends along the s. border; but the remaining part of its surface is level or moderately uneven. Flushing Creek forms a portion of the E. boundary, and Newtown Creek, a portion of the W. boundary. Extensive salt meadows border upon these creeks and the bays. Hell Gate is a narrow, tortuous passage between Wards Island and Hallets Point, near the N. extremity of the town.[11] The soil is a fine quality of sandy loam. Market gardening and the cultivation of flowers are the most important business. The town poor are let out by contract. **Astoria,**[12] (p. v.,) upon East River, near Hell Gate, was incorp. April 12, 1836. It contains 5 churches, a female seminary, union school, and several extensive manufactories.[13] It is particularly distinguished for its floral gardens

[1] Several of these ponds have been purchased by the Brooklyn Water Works Company. The remains of a mastodon were found in excavating at Parsons' Pond in this town, March 27, 1858. They consisted of six molar teeth and some small fragments of bones, blackened but not mineralized.

[2] A course was laid out, in colonial times, around the border of Beaver Pond; a short of water adjacent to the village, since drained. Union Course was laid out soon after the passage of the act of 1821, and continued under that of 1854. It is now owned by the "Union Association," formed under general act, Aug. 2, 1858, with a capital of $50,000. It is a few feet over a mile in circuit. There is a trotting course 8 F. of the former.

[3] The town elects trustees annually to manage its property. It has a fund given by Henry Townsend nearly two centuries since, "for the relief of poor widows and children, persons blind, lamed, or aged, and such as should be unable to get a living, or any that should suffer by fire and whose necessities might call for relief."

[4] This academy was incorp. Feb. 29, 1792.

[5] A carriage factory and the repair shops of the L. I. R. R.

[6] Formerly called "*Brookville*." The name was changed at a public meeting, Jan. 1, 1857.

[7] There are now 7 churches in town: 2 M. E., Af. Meth., Ref. Prot. D. Presb. Prot. E. and R. C.

[8] Named "*Middleburg*," under the Dutch.

[9] The first deed of confirmation contained the names of Capt. Richard Betts, J. P., Capt. Thos. Lawrence, Capt. John Coe, John Burroughs, Ralph Hunt, Dan'l Whitehead, and J. Bunger Yest; and the second the names of 108 freeholders. The annual quitrent was 2 *s.*—*Patents*, II, 78; *Sec. Office*: *Thompson's Hist. L. I.* II, 142.

[10] These islands are cultivated as gardens. Berriens, near Lawrence Point, has an area of 12 acres. Rikers is the largest and most valuable, and was formerly called "*Hewletts Island*," from its having been the residence of Gov. Hewlett. It is 1 mi. from the mainland, and contains over 50 acres. It was confirmed to Gouverneur Rikers by Stuyvesant, Dec. 24, 1667, and is still owned by the family. *Thompson's Hist.* II, 154.

[11] This name was probably derived from the Dutch "Helling," angry, and "Gat," a gate. It is often softened down to "*Hell Gate*." From the earliest time this has been a difficult strait to navigate, owing to sunken rocks and the strong current of the tide. In 1852 the rocks were mostly removed by a system of submarine blasting and the navigation greatly improved.

[12] This place was formerly known as "*Hallets Cove*," and was settled by Stephen A. and John C. Halsey. At the time of its incorporation it was proposed to call it "*Sunswick*," from the Indian name of a stream near by; but the name Astoria was adopted, in hope of securing a gratuity from John Jacob Astor. In this, however, the people were disappointed, as he gave only $400 to the seminary.

The National Race Course, incorp. May 31, 1854, is located near the Flushing R. R.[5] The first settlements were made in 1651, by English immigrants, who had first located in New England. The first grant of privileges obtained from the Dutch in 1652 was [illegible] by another more liberal in its character in 1665. The early records of the town were lost during the British occupation in the Revolution. A blockhouse was built at Hell Gate during the Revolution, and a water-battery, named Fort Stevens,[8] during the War of 1812. The first church edifice (Presb.) of which there is any record was erected, in 1670, at Newtown Village; and the first preacher was Rev. John Moorehead, who was employed from the first settlement until his death, in 1661. The census reports 15 churches in town.[9]

NORTH HEMPSTEAD[10]—was formed from Hempstead, April 6, 1784. It lies on Long Island Sound, between Hempstead Harbor and Little York Bay, and on the S. extends to near the center of Hempstead Plains. A range of hills extends E. and W. through near the center; and from them spurs extend to the Sound, giving to the N. part a moderately hilly character. Hempstead Harbor and Manhasset Bay are irregular bays extending far inland, dividing the coast into "necks" and points,—the principal of which are Cow and Great Necks, Motts, Prospect, Sands,

The town poor are supported by the Jones Fund,[2] at an institution situated at Brookville, in the town of Oyster Bay; and 2 trustees are annually elected to the board having this fund in charge. **Manhasset,**[3] (p. v.,) near the center, a straggling village, contains 4 churches. The neck of land extending eastward of Manhasset Bay is called Manhasset.[4] **Roslyn,** (p. v.,) at the head of Hempstead Harbor and 2 mi. above the steamboat landing, contains 2 churches and several manufactories.[5] P. p. 592. **North Hempstead** (p. o.) is at the co. courthouse; **Mineola** (p. v.) is a scattered village at the junction of the L. Bryant. **Westbury**[6] is a farming neighborhood, extending from near the courthouse to the E. line of the town. **Carl Place,** near Westbury, and **Clowesville,** near Mineola, are village plats. **Hyde Park,**[7] near the R. R., **Lakeville,**[8] near the line of Flushing, and **Farmers Village,** on the edge of the plains, are farming localities. **Port Washington** (p. o.) is a small village on the W. side of Manhasset Bay. The first settlement was made in the spring of 1640, by a small company of English immigrants from Lynn, Mass., under the lead of Capt. Daniel Howe, who took possession of the head of Cow Bay, under the authority of Farrett, agent of the Earl of Stirling. The Dutch sent a party of soldiers, who captured several of the intruders; but they were released upon promising to quit the place. These persons afterward made the first settlement at Southampton. The necks of land of this town were first used for pasturage in commons. During the Revolution marauding parties committed various depredations upon the people of this town, rendering both property and life insecure. The census reports 9 churches in town.[9]

OYSTER BAY[10]—was patented by Gov. Nicoll, Nov. 29, 1667, and confirmed by Gov. Andross, Sept. 29, 1677.[11] It was recognized as a town March 7, 1788. It occupies the E. extremity of the co., and extends across the island from the sound to the ocean. The N. shore is deeply indented by irregular bays, the principal of which are Oyster Bay, Cold Spring, and Oyster Bay Harbors, Mill Neck Creek, and Mosquito Cove. Cove Neck, Center Island,[12] and Mosquito Neck are long peninsulas formed by these bays;[13] Lloyds Neck is a peninsula extending E. of Cold Spring Harbor. The great indentation of South Oyster Bay, separated from the ocean by Jones Beach, forms the S. boundary. This bay is bordered by salt meadows, and incloses several marshy islands belonging to the town. A range of hills extends through the N. part; and the remainder of the surface is level. The soil is a sandy and clayey loam, and with proper care is very productive. The town poor are supported by the Jones Fund.[14] **Oyster Bay,** (p. v.,) on Oyster Bay Harbor, contains 6 churches and 900 inhabitants;[15] **Glen Cove,**[16] (p. v.,) near Hempstead Harbor, in the N. W. part, contains 3 churches, a printing office, fire insurance office, and a corn starch factory.[17] **South Oyster Bay** (p. o.) is a scattered village on the S. shore. **Farmingdale** (p. o.) is a hamlet and R. R. station near the E. line; **Hicksville**[18] (p. o.) is a R. R. station near the W. line. **Syosset**[19] (p. o.) is the present terminus of a R. R. extending N. E. from

[1] A lighthouse has been erected upon Sands Point, and a life-boat station is maintained here.

[2] See note 14. [3] Formerly called "*Ten Yards.*"

[4] Formerly called "*One Neck,*" and by the Indians "*Seat Seal.*" It was originally inclosed from Hempstead Harbor to the creek by a fence separating it from Great Neck, and every person was entitled to put as many cattle upon it as he built standing gates or panels of fence. When afterward distributed, in 1674, these rights were called gate-rights. The number of contributors in 1878 was 60, and the number of panels of fence 320.

[5] Formerly called "*Hempstead Harbor.*" Harbor Hill, in the rear of the village, is 319 feet high. The first paper mill in the State is said to have been built here in 1775, by Hendrick Onderdonk, grandfather of two bishops of this name, Hugh Gaine, and Henry Remsens. There are 2 paper mills, 2 gristmills, and a sawmill at this place.

[6] The people in this vicinity are chiefly employed in furnishing milk for the New York market.

[7] Upon the open grounds S. of this place, recently called "*Salisbury Plains,*" a race course was established by Gov. Nicoll in 1665. It was called "*New Market,*" and continued devoted to the sports of the turf more than one hundred years.

[8] Formerly called "*Success,*" from Success Pond in the vicinity. The name was changed to Lakeville in 1833. The towns of Flushing and Hempstead gave 618 acres, between the Lake and Hyde Park, to Gov. Dongan, who had a country residence here.

[10] The lands and commons of this town are under the charge of the supervisor. The South Meadows are sold annually at auction for about $1,200. Taxpayers only have the right of fishing and oystering in the waters of the town.

[11] Henry Townsend, sr., Nicholas and Gideon Wright, Richard Harrison, Joseph Carpenter, and Josiah Lathing were named in both patents.—*Patents,* I. 104, 162. *See Other.*

[12] Formerly called "*Hog Island.*" It is connected with the main island by a beach, includes 600 acres of excellent soil, and has a brickyard, with steam power, that makes 3,000,000 bricks annually.

[13] The principal capes or points upon the N. shore are Olivers, Sequis, Moses, Plum, Center Island, Old Neck, Fox Island, Peacock, Matinecock, and Red Spring Points.

[14] In 1816, Sam'l Jones gave $20,000—known as the "Jones Fund"—for the support of the poor of this town and North Hempstead; and if the income of this fund was more than sufficient for this purpose, the overplus was to be kept to Flushing. A farm was purchased at Brookville, upon which suitable buildings have been erected for the support of the poor. Walter R. Jones, the distinguished financier, also a citizen of this town, gave $5,000 more for the same purpose. The fund is managed by 3 trustees, chosen by this town, and 2 by North Hempstead. The institution is known as the "Jones Institute;" and it supports 60 to 70 indigent persons annually.

[15] P. O. changed to "*Syosset*" Jan. 20, 1846, and old name restored one week after. Jas. Colwell, appointed P. M. by Jefferson, held the office till his death, in 1864, when his granddaughter was appointed.

Hicksville, projected to Cold Spring. **Norwich** (East Norwich p.o.) is a farming settlement 3 mi. S.E. of Oyster Bay.[1] **Cedar Swamp,** (p.o.) S.E. of Glen Cove, and **Locust Valley,**[2] N.E. of the same place, are farming settlements. **Jericho** (p.o.) is a settlement, N. of Hicksville:[3] **Woodbury** (p.o.) is a small village, near the E. border; **Lloyds Neck** is a farming vicinage, in the extreme N.E. part:[4] **Bethphage** is a farming locality, and **Brookville** is a hamlet.[5] **Fort Neck** was named from two ancient Indian forts.[6] **Dosoris,**[7] **Lattingtown,** and **Matinicock**[8] are localities N.E. of Glen Cove. An attempt was made by a party of English to make a settlement in this town in 1640; but the settlers were driven off by the Dutch. In 1642 other English parties, who had purchased lands of the Indians, were also driven off. The question of jurisdiction was a matter of debate until 1650, when commissioners were appointed on both sides to settle it. The W. boundary of Oyster Bay was fixed upon as the line of separation of the two colonies; and in 1653 the first permanent English settlement was made, upon land previously purchased of the Indians.[9] In 1662 the town formed a close alliance with Conn. De Lancey's corps of royalists built a small fort on the hill, in the village of Oyster Bay, in 1776; and it was occupied by Simcoe's Queen's Rangers in 1778 and '78. The census reports 16 churches in town.[10]

RENSSELAER COUNTY.

This county was formed from Albany, Feb. 7, 1791, and named from the Rensselaer family.[1] It is centrally distant 12 mi. from Albany, and contains an area of 690 sq. mi. Its surface is very broken and hilly. Two distinct ranges of mountains extend through it N. and S., known as the Taghkanick and Petersburgh Mts. The Taghkanick Range occupies the extreme E. borders of the co., and is divided from the Petersburgh Mts. by the long, deep valley through which flow Kinderhook Creek and Little Hoosick and Hoosick Rivers. These mountains are wild, rugged, and rocky, rising to a height of 1000 to 2000 feet above tide, and affording wild and picturesque scenery. Their declivities are usually precipitous, and their summits are crowned with forests or masses of naked rocks. These mountains are composed of the slate, quartz, sandstone, and limestone which constitute the Taconic rocks of Prof. Emmons. The quartz exists in the form of injected veins, and in many places the slate has been decomposed and washed away, leaving the quartz veins in the form of sharp pointed rocks, or of isolated masses. Upon the summits and sides of the mountains the soil is thin and poor; but in the valleys it consists of gravelly loam, and is moderately fertile. The Petersburgh Mts. occupy the whole central part of the co. They are wild, irregular, and broken mountain masses, with precipitous sides on the E., but with more gradual declivities on the W. In some places the summits spread out over a wide surface, constituting a high, sterile plateau broken by hills and rocks. They are composed of the graywacke slates and limestone belonging to the Hudson River group. An extensive tract among these mountains, comprising a portion of Stephentown, Berlin, Sand Lake, and Poestenkill, is still covered with forests. The soil is generally hard and sterile, consisting of a stiff clay and disintegrated slate, largely underlaid by a retentive hardpan.

Hudson River is on the W. boundary of the co.; and along its bank extends an intervale varying from a few rods to a half mile in width, and bounded by a series of bluffs 100 to 200 feet in height. From the summits of the bluffs to the foot of Petersburgh Mts. the country assumes the character of a broken, hilly upland. This region is composed of the drift deposits mixed with disintegrated slates, in some places the clay, and in others the sand, predominating.

The valley of Kinderhook Creek, Little Hoosick and Hoosick Rivers extends through the E. part of the co. The summit level in this valley at S. Berlin, between the waters flowing S. and those flowing N., is 600 feet above tide. The numerous streams that flow from the Petersburgh Mts. westward to the Hudson have worn deep ravines through the clay bluffs, forming lateral valleys, which extend eastward from the valley of the Hudson. Among the wild and rocky regions of the Petersburgh Mts. are numerous small lakes and ponds, forming a peculiar and beautiful feature of the landscape. Several interesting mineral springs are found within the county.

The narrow intervales, and a large portion of the uplands, are adapted to grain, and produce liberal crops, chiefly of corn, oats, spring wheat, potatoes, and flax; but the soil is generally best adapted to grazing and dairying, especially along the E. towns, where these occupations form the leading pursuits. Manufactures are extensively carried on at Troy and in the Hoosick Valley, and commerce has received much attention at Troy, and, at an earlier day, at Lansingburgh.

The principal works of internal improvement in the co. are the Troy & Greenbush R. R., a continuation of the Hudson River R. R. to Troy; the Albany & West Stockbridge R. R., extending from Greenbush in a S. E. direction, through East Greenbush and Schodack, to the S. bounds of the co., 7 mi. from the river; the Troy & Boston R. R., extending from Troy N. E. through Lansingburgh, Schaghticoke, Pittstown, Hoosick, and a corner of Petersburgh, to the Vt. line; the Troy & Bennington R. R., forming a branch (5$\frac{7}{8}$ mi. long) of the Troy & Boston R. R., from Hoosick Fall Junction to the State Line toward Bennington, Vt.; and the Albany, Vt. & Canada R. R., extending through Schaghticoke across the N. W. corner of the co., terminating at Eagle Bridge, where it connects with the Vt. roads. Besides these lines, which are within the co., several others communicate with Troy from the W. side of the river. Among these are the A. V. &

[1] This co included a large slice of the Rensselaer Manor E of the river, and the present towns of Hoosick, Pittstown, Schaghticoke, and a part of Lansingburgh.

C. R. R., which sends a branch to West Troy; a branch of the N. Y. Central R. R., extending to Schenectady;[1] and the Rensselaer & Saratoga R. R., extending from Troy to Saratoga. The Northern and Erie Canals also both connect with the Hudson at Troy, and there is an uninterrupted steamboat navigation to New York.[2]

The first newspaper in the county was established at Lansingburgh, in 1787.[3]

The county seat is the city of Troy, situated at the head of sloop navigation on the Hudson.[4] The courthouse—built at the joint expense of city and co., and containing the courtroom and co. and city offices[5]—is situated on the corner of Congress and Second Sts.[6] The jail is on Ferry, corner of Fifth St. A house of industry, for the support of paupers, located on a farm of 140 acres 2 mi. S. E. of the city, was founded in 1821, on the plan of Count Rumford. In 1857 the co. poorhouse was reported as being located upon a farm of 152 acres. The co. poor were let, by contract, at $1 per week, the contractor having free use of the farm, and the services of the paupers as far as they were able to labor.[7]

The greater part of the co. was included in the patent of Killian Van Rensselaer, in 1630; and the first settlement was made by tenants under him the same year.[8] The lands were held by the same tenure as those in Albany co., and similar difficulties have frequently occurred in endeavoring to enforce the collection of rents. Upon the death of the late Stephen Van Rensselaer the manor was divided, the portion E. of the river passing into the hands of his son William P.; and since that time a considerable portion of the leased land has been conveyed in fee.[9] During

the French wars, the N. border of the co. was repeatedly ravaged by the enemy and the settlements were broken up. Upon the approach of Burgoyne's army, in 1777, the American families hastily fled with such property as could be easily removed, leaving the houses and farms to be plundered by the enemy. Scouting parties of the British penetrated as far s. as Lansingburgh. The battle of Bennington was fought within the limits of the co., Aug. 16, 1777;[1] and from that moment the American cause daily grew brighter.[2] The proprietor of the manor extended every possible assistance to the distressed families flying before the invaders, proving to them a sincere friend in their hour of need.

BERLIN—was formed from Petersburgh, Schodack, and Stephentown, March 21, 1806. A portion of Sand Lake was taken off in 1812. It lies near the center of the E. border of the co. Its surface consists of 2 ranges of mountains separated by a narrow valley extending N. and S. The hilly region is wild and broken, and the declivities are generally precipitous. The principal streams are Kinderhook Creek, flowing S., and Little Hoosick River, flowing N. The headwaters of these streams are but a few rods apart, near S. Berlin. The W. part of the town is covered with forest, in which are several fine lakes. The soil in the valley is a gravelly loam, but among the mountains it is a hard sterile clay intermixed or covered with fragments of rock. **Berlin,** (p. v.,) containing 326 inhabitants, **South Berlin** (p. v.) and **Center Berlin,** (p. v.,) are all situated in the valley of the Little Hoosick. **West Berlin** is a p. o. Godfrey Brimmer located near N. Berlin in 1765.[3] The first church (Seventh Day Bap.) was formed at N. Berlin, in Dec. 1780; Wm. Coon was the first preacher.[4]

BRUNSWICK—was formed from Troy, March 20, 1807. A part of the town was reannexed to Troy, April 15, 1814. It lies a little N.W. of the center of the co., upon the hilly region W. of the summits of the Petersburgh Mts. The most elevated portions of the town, in the extreme E. and in the N.W. parts, are 800 to 1000 feet above tide. The principal streams are Poesten Kil, its tributary Quacken Kil, and Tomhannock Creek. The soil upon the summits of the hills is hard and sterile, but in the valleys and lowlands it consists of a fertile, gravelly loam intermixed with clay. The people are largely engaged in furnishing milk, vegetables, and hay to the Troy market. **Brunswick Center, East Brunswick,**[5] **Millville,** (Eagle Mills p. o.,) and **Cropseyville**[6] (p. o.) are small villages. The first settlement was made about 1760, by a company of Germans.[7] This town suffered greatly upon the approach of Burgoyne in 1777, and after the battle of Saratoga many families of royalists withdrew to Canada, and but few returned. There are 4 churches in town.[8]

EAST GREENBUSH—was formed from Greenbush, as "*Clinton*," Feb. 25, 1855, and its name was changed April 14, 1858. It lies on the bank of the Hudson, S.W. of the center of the co. The bluffs which border upon the river rise from the edge of the water to an elevation of 100 to 300 feet. The principal one of these, opposite Albany, is known as Pon-o-kose Hill.[9] From the summits of these bluffs the surface spreads out into a rolling upland, rising toward the E. The chief streams are Tierken Kil,[10] or Mill Creek, in the central, and Moordeners Creek in the S.W. part of the town. The soil consists of sand, gravel, and clay, and is very fertile. There are several sulphur springs in town, the principal of which is opposite Albany and is known as "Harrowgate." A large island called Papskanee[11] lies in the river, and belongs to this town. **East Greenbush** (p. o.) is the only village. It contains the Greenbush and Schodack Academy[12] and about a dozen houses. Settlements are supposed to have commenced here as early as

2 From this time the timid were emboldened, the secretly disaffected overawed, and great numbers before undecided now committed their fortunes to the cause of freedom.

3 Among the other early settlers were Reuben Benested and a family named Richet, who came in soon after Mr. Brimmer. In 1769 Peter Simmons and John O. Cropsey lived at the Hollow, and in the same year David Hull and Joseph Green came into town. Col. Bentley settled near N. Berlin, and Thos. Sweet, a blacksmith, at S. Berlin. Jas. Green, a son of Joseph G., died in 1857, aged 100 years. David Hull kept the first tavern before the Revolution, and Hezekiah Hull opened an inn soon after the war. Caleb Bentley built the first grist mill, and Amos Sweet the first saw mill in 1780. Dr. John Forbes, the first physician, located at S. Berlin in 1775. Soon after the battle of Lexington two companies were formed in this and the adjacent towns, a part of whom were stationed at D. Hull's for local protection, the others were engaged elsewhere in active service.

4 The census reports 2 churches: Bap. and Christian.

5 This village is the seat of a cotton batting and a sash and blind factory.

6 A woolen factory and tannery are located here.

7 Among the early settlers were David Coons, and families named Hardwick, Braunschweigt, Springer, Beeck, Hayner, Outhout, Van Arsdale, Hogg, Fisher, Bunn, Watson, Utt, Quackenbush, Mulder, Conway, and Clum. A man named Filo kept the first inn, near the Lutheran Church. In 1790, and Henry Clum the first store at Cropseyville. The first factory was erected by a company at "Albia," now a part of Troy. The first mill was built by —— Cross, in 1792, with no tools but an ax, saw, and auger.

1630.[1] During the war of 1812, extensive barracks were erected on the hills near Greenbush Village; and for several years the place was the center of active military preparations, and the rendezvous of large bodies of troops.[2] Edmund C. Genet, Minister from the French Republic to the U. S., was long a resident of this town, and died here July 14, 1834. There is but 1 church (Bap. Prot. D.) in town.

GRAFTON—was formed from Troy and Petersburgh, March 20, 1807. It lies a little east of the center of the co., upon the summits of the Petersburgh Mts. Its surface is very rocky and broken, and a large part of it is yet covered with forests. The summits of the hills are 800 to 1200 feet above tide, and many of them are covered with huge and jagged masses of graywacke. Among the hills are 25 ponds, several of which cover an area of several hundred acres each.[3] The Quacken Kil is the principal stream. The soil is chiefly clay, underlaid by hardpan, and is wet, cold, and hard of cultivation. Mineral paint is made from the red argillite at Quackenkill. Considerable quantities of wood, tan bark, and charcoal are sent from this town to Troy. **Grafton**[4] (p. v.) contains 14 houses, **East Grafton** (p. v.) 12, and **Quackenkill** (p. v.) 10. The first settlements were made by tenants under Van Rensselaer; they paid an average annual rent of 10 bushels of wheat per 100 acres.[5] The census reports 2 churches; Bap. and M. E.

GREENBUSH[6] was formed from "*Rensselaerwyck*," April 10, 1792. Another act of incorporation is dated March 17, 1795. A part of Sand Lake was set off in 1812, and "*Clinton*" (now E. Greenbush) and N. Greenbush, in 1855, leaving but the corporate bounds of the village established by the act of April 9, 1852. Its surface consists of the flat intervale on the river and a portion of the adjacent hillsides. The soil is clay mixed with sand and alluvial deposits. **Greenbush** (p. v.) was incorp. April 14, 1815.[7] Pop. about 3303. The upper part of the village, locally known as "East Albany," contains the depôts, freight houses, and machine shops of the several railroads which terminate opposite Albany, and is a place of considerable business.[8] The first settlement was made previous to 1631.[9] A ferry was established at the mouth of Beaver Creek in 1642, and was first kept by Hendrick Albertsen. The country around "*Beverwick*" was thrown into alarm by the news of the Indian massacre at Esopus in June, 1663, and the settlers took refuge in Fort Crailo, on the patroon's farm, and a night watch was established.[10] There are 4 churches in the village.[11]

HOOSICK[12]—was formed as a district, March 24, 1772, and as a town, March 7, 1788. It lies in the N.E. corner of the co. Its surface consists of the narrow valley of Hoosick River, and the wild, rocky regions of the Taghkanick and Petersburgh Mts., rising respectively on the E. and W. The two highest peaks are Fondas Hill in the S.E. and Potters Hill in the S.W. each about 900 feet above tide. The valleys are very narrow, and are bordered by steep hillsides. A belt of dark slate, which is quarried for roofing, extends along the E. bank of the river. East of the river, the rocks consist of a slaty shale and limestone, the latter furnishing lime. The principal streams are Hoosick and Walloomsac[13] Rivers, Punch Kil, White Creek, and Snow Brook. The soil among the mountains is hard and sterile, but in the valleys it is principally clay, mixed with disintegrated slate. In the S.E. corner are 6 springs, from which issue mineral gases.[14] Land is very extensively cultivated.[15] Considerable attention is also paid to manufactures. **Hoosick**

[1] Among the early settlers were the names of Van Buren, Van Hoesen, Staats, Bas, Vanderburgh, Wendell, Cowenhoven, and Van Wie.

[2] Encampments existed also on the opposite island of Greenbush. The ground occupied by the encampment of Mount Morris was supposed to be very unhealthy, but during the last year of the war, persons who were stationed there declared that the most healthful place in the whole Mount Morris encampment was the spot where the sick were buried. Several military executions for desertion took place here during the war. The old barracks have nearly disappeared.

[3] These ponds are noted for the wild fowl which resort to them, and they are favorite resorts of sportsmen.

[4] Post-office established as early as 1813, formerly "*Petersburgh Mills*."

[5] Among the first settlers were the families of Lemmon, Lemmon, Stephen, McClellan, Lamb, Hall, Hall, and Hall. A grist mill was built on the creek now owned by the patroon at the Center.

[6] It was called "*Greene Bush*" by the Dutch from the pine woods which originally covered the flats. Called by the Indian names of Pe-tu-qua-poen and Tus cum-ca-tick in early documents. A part of Schodack was annexed in 1854.

[7] The village was incorporated as early as 1801, and for several years after its charter was quite active. During the War of 1812 it contained [illegible] U. S. troops.

Falls (p. v.) was incorp. April 14, 1827. Pop. 1200. It contains Ball's Seminary, 2 foundries, 2 cotton factories, 2 reaping and mowing machine factories, and 1 establishment for the manufacture of machinery for cotton and woolen factories. **North Hoosick**[1] (p. v.) contains 175 inhabitants, and **Buskirks Bridge** (p. v.) 125; **Hoosick Corners** (Hoosick p. o.) contains 30 houses, **Eagle Bridge** (p. v.) 14, **Walloomsac**[2] 12, **West Hoosick** (p. o.) 10, and **Potter Hill** (p. o.) 7. This town was included in the Hoosick Patent,[3] granted June 3, 1688, and the Walloomsac Patent,[4] granted June 15, 1739. The first settlements were made upon the Hoosick Patent by several Dutch families.[5] A Dutch church was founded, and known as the "Tyoshoke Church," at San Coick, near the N. border of the town. The settlement at Hoosick was entirely broken up by a party of French and Indians on the 28th of Aug. 1754. Two persons were killed, and the houses, barns, and crops were destroyed.[6] The next day the settlement of San Coick, S. of Hoosick, was also destroyed. The battle of Bennington was fought in this town, Aug. 16, 1777.[7] There are 6 churches in town.[8]

LANSINGBURGH[9]—was formed from Troy and Petersburgh, March 20, 1807. A tract was annexed from Schaghticoke in 1819. A part of Troy was taken off in 1836, and a part of Brunswick in 1839. It is a narrow strip of land extending along the Hudson. In the S. part the river intervale is one-fourth of a mile in width; but in the N. the bluffs rise directly from the water. In the N. E. is a high, rocky hill, 400 to 600 feet above the river. The high bluff E. of the village is called Diamond Rock. The streams are Deepi Kil and Koola Kil. The soil is a gravelly and clayey loam. The people are largely engaged in the manufacture of brushes, oilcloths, flax cordage, and malt liquors. A lock at Troy admits the passage of sloops up to this place.[10] **Lansingburgh**[11] (p. v.) contains extensive brush, oilcloth, and other manufactories, the Lansingburgh Academy,[12] a Female Seminary,[13] 6 churches, 2 printing offices, and about 4000 inhabitants. [3] This patent was granted to Maria Van Rensselaer, Hendrick Van Ness, Jacobus Van Corthandt, and Gerrit Fimmse. The patent extended from the Schaghticoke Tract, a distance of 2 mi. each side of the river, up to a "certain fall, called Quequick; and from said falls, up the creek, to a place called Nachaquick-quack."

[4] This patent contained 12,000 acres, on both sides of Walloomsac River, and lying partly in Washington Co. and Vt.; it was granted to Edward Collins, James De Lancey, Gerardus Stuyvesant, Stephen Van Rensselaer, Charles Williams, and Frederick Morris.

[5] Among these early settlers were Adam Vrooman, an Indian trader, Henry Van Ness, Abraham Fort, Lewis and Peter Viele, John Van Buskirk, Walter Van Vechten, Geo. B. Nichols, Jacob Odekirk, Daniel Bradt, and Reynert Bates.

[6] The invaders were supposed to be Schaghticoke Indians who a little time before had abandoned their settlements and gone to Canada. The loss of the two settlements was estimated at £1,000.—*Smith's Hist. of N. E.*, Albany, p. 507; *Trans. Ag. Soc.*, 1848, p. 9[illegible]; *Hall's Hist. Eastern Vt.*, p. 60.

[7] The Battle of Bennington was one of the most important of the military events connected with the expedition of Burgoyne in 1777. About the first of Aug. the British army reached the Hudson and took possession of Fort Edward. For several weeks they had been engaged in repairing the bridges and in clearing the roads from the impediments left by the retreating Americans; and upon their arrival at the Hudson, Burgoyne congratulated himself that his troubles were at an end. His greatest source of embarrassment was in securing provisions for his army and in obtaining means of transportation. With 15 days' hard labor he was only enabled to bring 10 bateaux and 4 days' provisions from Lake George. Learning that the Americans had collected a large quantity of military stores, cattle, and horses at Bennington, he was persuaded by Maj. Skene, against the advice of his more experienced officers, to send a party to capture them. The detachment consisted of 500 Hessians, Canadians, and Indians, under the command of Col. Baum. They were instructed "to try the affections of the country, to mount Reidesel's dragoons, to cripple Pet's corps, to distress rebels, and obtain a large supply of cattle, horses, and carriages." This accomplished, he was to scour the country from Bennington to Otter Creek, go down as far as Brattleboro, and join the main body by the great road to Albany. The detachment left the camp at Fort Edward, Aug. 13; and on the evening of the same day they surprised and captured 5 Americans at Cambridge. On the 14th they advanced as far as the mill upon Walloomsac River in the N. E. part of Hoosick, and within 12 mi. of Bennington. Gen. Stark, who commanded the American forces at Bennington, hearing of the approach of the enemy, took immediate measures for defense. He sent an order to Col. Warner, at Manchester, to march immediately with his regiment of Green Mountain Boys; he rallied the neighboring militia, and on the 14th he sent out an advance guard of 200 men, under Lieut. Col. Gregg, to impede the progress of the enemy. On the morning of the 14th he marched with his whole force to the support of Gregg, and about 5 mi. from Bennington he met Gregg in full retreat, with the enemy within 1 mi. of him. Both armies chose strong positions and threw up temporary intrenchments. Baum, alarmed at the number of Americans, sent for a reinforcement. On the 15th a heavy rain set in; and the day was spent in skirmishing and in preparing for the battle. Col. Warner's regiment arrived at Bennington in the evening, and there stopped to dry themselves and recruit after their fatiguing march. Stark, fearing the enemy might receive reinforcements, resolved to attack them early on the morning of the 16th. Previous to the signal for attack he made the following laconic speech to his men: "See there, men! there are the red-coats. Before night they are ours, or Molly Stark will be a widow." The attack was at once made simultaneously at all points. The Indians fled at the beginning of the contest, and the tories were soon driven from their posts, leaving the Hessians to sustain the weight of the engagement. After 2 hours of hard fighting the enemy gave way at all points, and commenced a disorderly retreat. While the Americans were busy in plundering the abandoned camp of the enemy, and in detached parties were engaged in pursuit, Col. Breyman, with a reinforcement of 500 men, arrived. He met the flying fugitives about 2 mi. from the scene of action, and immediately charged upon the broken ranks of the Americans. The tide of battle now turned, and Stark had the mortification of seeing his army driven helplessly from the field where they had so lately been victorious. At this juncture Col. Warner's regiment arrived from Bennington and checked the advance of the British. Stark rallied his broken forces behind the fresh troops, and soon the battle again became general. At sunset the British fled toward the Hoosick and were pursued by the Americans until dark. The Americans lost about 70 killed and 40 wounded. The British loss, in killed, wounded, and prisoners, was 904. The result of this battle was disastrous in the extreme to Burgoyne, and contributed more than any other event to his final surrender at Saratoga.

here crosses the Hudson to Waterford. The Troy & Boston R. R. passes through the town. The village was founded by Abraham Jacob Lansing, about 1770. It was first organized under the name of "*New Arabia*" in 1771.[1] In May, 1775, 50 of the citizens—at the head of which was A. J. Lansing, the proprietor—signed articles of association pledging themselves to sustain the measures recommended by the Continental or Provincial Congress. The first act of incorporation under the State government was passed April 5, 1790, at which time the village was included in the town of "*Rensselaerwyck*."[2] In 1791 it was included in the town of Troy. The place rapidly increased in population, and early became an important trading and commercial village. The first church (Ref. Prot. D.) was organized in 1784; and reorganized in 1792 as a Presb. church.[3] **Speigletown** is a village of 15 houses.[4]

NASSAU—was formed from Petersburgh, Stephentown, and Schodack, March 31, 1806, by the name of "*Philipstown*."[5] Its name was changed April 6, 1808. It lies near the center of the s. border of the co. Its surface is very broken. Snake Hill, in the s. w., is about 800 feet above tide. The principal streams are Kinderhook and Tsatsawassa[6] Creeks, and Valatie Kil. There are several fine lakes among the hills, the principal of which are the Tsatsawassa and the Pattawassa. The Pan-ne-cooke Swamp, w. of the center, covers several hundred acres. The soil is clay and gravel underlaid by hardpan. Considerable manufacturing is carried on in town.[7] **Nassau**, (p. v.,) in town, March 12, 1819, is the seat of Nassau Academy. Pop. 300. **West Nassau**[8] has 57 houses. **East Nassau** (p. v.) 45. **Hoags Corner** (p. v.) 25. **Alps** (p. v.) 24. **North Nassau** (p. v.) 15, and **Millers Corners** 10. **Brainards** (p. v.) contains a female seminary and 20 houses.[9] The first settler was Hugh Wilson, who located on the site of Nassau Village in 1760.[10] At that time a few families of the Stockbridge Indians were living where Mr. Hoag's orchard now stands.[11] The Indians conveyed to Joseph Primmer a tract of land s. of Hoags Pond,[12] and another tract s. of it to Hugh Wilson, May 16, 1760.[13] Within the last 20 years a considerable quantity of land has been allowed to produce a second crop of timber. There are 7 churches in town.[14]

NORTH GREENBUSH—was formed from Greenbush, Feb. 23, 1855. It lies upon the Hudson, directly w. of the center of the co. The clay bluffs, 100 to 200 feet high, rise from the edge of the water, leaving little or no intervale. From the summits of the bluffs the surface spreads out into a rolling upland, broken by the deep gulleys of the streams. The principal stream is Wynants Kil, in the N. E. Aries Lake, on the E. border, is a fine sheet of water. The soil is a sandy and gravelly loam interspersed with patches of clay. The people are extensively engaged in supplying the markets of Albany and Troy with garden vegetables and milk. **Bath**,[15] opposite the upper part of Albany, contains about 12 houses. **Defriestville**[16] (p. v.) 12, and **Wynantskill** (p. v.) 15. The first settlement, made by tenants under Van Rensselaer, was among the first in the manor.[17] There are 3 churches in town.[18]

PETERSBURGH[19]—was formed from Stephentown, March 18, 1791. Its boundary on the line of Berlin was changed, Jan. 4, 1793; parts of Berlin and Lansingburgh were taken off in 1806, and parts of Nassau and Grafton in 1807. It lies upon the E. border of the co., N. of the center. Its surface consists of two precipitous mountain ridges separated by the narrow valley of Little Hoosick River. The highest peaks are 1000 to 2000 feet above tide. The mountain regions are barren and almost inaccessible. The Hoosick River breaks through the Taghkanick Mts. in the N. E. part. The soil in the valley is a gravelly loam. **Petersburgh**, (p. v.,) formerly "*Rens-*

PITTSTOWN—was erected as a township by patent, July 23, 1761, and was formed as a town, March 7, 1788. Its boundary was changed Feb. 14, 1793. It lies in the center of the N. part of the co. Its surface is mountainous in the S. and E. and declines into a moderately hilly region in the N. The highest summits, in the S. E., are 800 to 1,000 feet above tide. The soil is principally a gravelly and slaty loam. Flax is extensively cultivated,[3] and there are several manufactories in town.[4] **Johnsonville** (p. v.) contains 35 houses, **Tomhannock** (p. v.) 40, **Raymertown** (p. v.) 27, **Pittstown Corners** (Pittstown p. o.) 22, **Boynton** 20, **Pittstown Station** (Valley Falls p. o.) 16, **North Pittstown** 20, and **Cooksborough** (Haynerville p. o.) 10. **Shermans Mills** is a hamlet. Settlement was commenced about 1650.[5] The first church (Bap.) was formed in 1784; Elder Isaac Webb was the first preacher.[6]

POESTENKILL[7]—named from its principal stream—was formed from Sand Lake, March 2, 1848. It lies near the center of the co., upon the western declivities of the Petersburgh Mts. The central and E. portions are rugged, rocky, and mountainous, and the soil is cold, sterile, and unproductive. The W. part is hilly, with a gravelly loam well adapted to pasturage. Snake Hill, near the center, is one of the principal elevations. Upon the Poesten Kil is a fall of about 80 feet. One mi. W. of the falls is a medicinal spring, with a local celebrity for the cure of eruptions and cutaneous diseases.[8] **Poestenkill** (p. v.) contains 300 inhabitants, **East Poestenkill** (p. o.) 10 houses, and **Barberville** 16. A union academy was formed in this town in 1854, but it is not under the regents. The census reports 4 churches.[9]

SAND LAKE—was formed from Greenbush and Berlin, June 19, 1812. A part of Greenbush was taken off in 1843, and Poestenkill in 1848. It lies a little S. of the center of the co. Its surface is mountainous in the E. and hilly in the W. Perigo Hill, in the N. E. corner, is 900 feet above tide, and Oak Hill, near the center, is but little less in height. The E. part of the town is mostly covered with forest.[10] Wynants Kil, flowing N. W. through the center, and Tsatsawassa Creek, in the E., are the principal streams. Along the valleys of these streams are several fine lakes, the principal of which are Sand, Glass, and Crooked Lakes, and Big Bowmans Pond. The soil among the mountains is a hard, sterile clay, but in the W. it is a good quality of gravelly loam. Three-fourths of a mi. E. of W. Sand Lake is a chalybeate spring. Large quantities of cordwood, charcoal, and tan bark are carried to the Troy and Albany markets. **Sand Lake** (p. v.) contains the Sand Lake Academy, a boarding school,[11] foundery, cotton warp factory, knitting mill, and 300 inhabitants. **West Sand Lake**[12] (p. v.) contains 300 inhabitants, **Sliters Corners** 100, and **Glass House** 200,[13] **South Sand Lake** is a p. o. Settlement commenced before the Revolution.[14] The census reports 7 churches in town.[15]

SCHAGHTICOKE[16]—was formed as a district, March 24, 1772, and as a town, March 7, 1788. Pittstown was taken off, March 7, 1788, and a part of Lansingburgh in 1819. It lies on the Hudson, in the N. W. corner of the co. The surface is principally a rolling upland, about 200 feet above the river. The summits of the hills in the S. are 800 feet above tide. Hoosick River,

1 Among the early settlers were Wm. Prendergast, John Bemmer, Jacob and Godfrey Bemmer, John Spencer, Hans and Peter Bockes, Jeremias Rowter, Henry Lateler, Hans Lautman, Barent Bratt, Jacob Best, Petrus Vosburg, Bastian Del, Frans, Barn. Jacob Kneiper, Henry Young, Schoolmaster Watson, and Luke Andries. John Spencer built a log gristmill before the Revolution; at S. Pittsborough; and Barber & Murray built a carding mill about 1800. Several of the settlers were killed or taken prisoners during the French War,—probably by the same party that destroyed the Hoosick settlements in 1754.

3 The census of 1855 reports that, in 1854, more than 250,000 lbs. of flax and 7,000 bush. of flaxseed were raised, and that there were 13 flax mills in town.

4 There are two manufactories of cotton bags at Shermans Mills, a paper mill at Valley Falls, and manufactories of cordage and axes at Johnsonville.

5 Wm. Prendergast, Stephen Hunt, and Edmund Aiken were among the first settlers near Johnsonville; Lucas Van Vleet at Valley Falls, in 1772; and Christian Fisher and Michael Vanderzee at Cooksborough. In 1779 Wm. Shepard from New England settled on 400 acres; in 1778-80, Benj. Aiken from Dutchess Co. on 100 acres; and in 1785, Alex. Thompson, on 300 acres. Wm. Hammond kept a school at N. Pittstown in 1785, and Robert Thompson at Shermans Mills in 1789.

6 The census reports 15 churches; 6 M. E., 3 Presb., 2 Christian, Bap., Ev. Luth., Friends, Union.

7 Pronounced "Poos-te-kill." It is a Dutch word, signifying "puffing or foaming creek."

8 A bathing establishment erected here was swept away by a freshet.

9 Bap., F. W. Bap., Disciple, and Ev. Luth.

10 This town is a favorite resort of hunting and fishing parties.

11 The Sand Lake Collegiate Institute was established in 1856 by Wm. H. Schram.

12 Formerly called "*Ulmsville*," from Bernard Ulme, who built the first house. His son, of the same name, was first innkeeper.

13 This village was formerly the seat of an extensive glass factory, and was called "*Rensselaer Village*." The company was organized in 1805, incorp. in 1806, and discontinued in 1852. In 1813 100 men were employed by the co.

14 Among the early settlers were Abram Frere, Nicholas Fellows, Andreas Barent, Fred. Shaver, Abram Bristol, Eph. Quinby, John Carmichael, Andreas Weatherwax, and Stephen Miller. Joshua Lockwood and Wm. Carpenter built the first grist mill in 1768, at W. Sand Lake.

16 From "Skat-te-kook." In old documents it is variously spelled "Schetekoke," "Schaticoke," "Scahwahook," and "Schaticogue." It is said to be an Algonquin word, signifying "Landslide." The Stockbridge Indians called it "Pah-ta-koke."

flowing through the N. part, is bordered on a portion of its course by steep banks 200 feet high. On this stream, at the mouth of Tomhannock Creek, is a beautiful circular valley, three miles in circumference, and bounded on nearly every side by steep hills.[1] The soil is generally a fertile, sandy or gravelly loam. Considerable manufacturing is carried on in town. **Schaghticoke Point** (Schaghticoke p.o.) contains a pop. of 1148. **Schaghticoke Hill** contains 25 houses. **The Borough** & **Junction** (p. v.) 17, and **Old Schaghticoke** [illegible]. In 1670, Gov. Andros settled a remnant of the Pequots and other Eastern tribes, under the name of "Schaghticokes," in this town, on land given them by the Mohawks, as a barrier against the Northern Indians.[3] By the charter of 1686 the city of Albany was allowed to purchase of the natives 500 acres of land in this town; but, neglecting to do so, Hendrick Van Rensselaer obtained the same privilege in 1698. He sold his right to the city the next year, and in 1707 an Indian deed was obtained for a tract 6 mi. square, mostly within the limits of this town. In Oct. 1709, the city conveyed the land to actual settlers.[4] The early settlements suffered greatly from Indian hostilities. A fort was built in 1746 at Old Schaghticoke and garrisoned by 2 companies of Rangers. The whole settlement was abandoned on the approach of Burgoyne; but, though the inhabitants of the royalists, the place was not burned, though held for some time by the British and Hessian outposts.[5] The Schaghticoke Seminary was incorp. May 4, 1836. The first church (Ref. Prot. D.) was formed in 1714.[6]

SCHODACK[7]—was formed March 17, 1795, at the time of the division of "*Rensselaerwyck*;" parts of Berlin and Nassau were taken off in 1806. It lies upon the Hudson, in the S.W. corner of the co. From the river the surface rises in a series of bluffs 200 feet high, from the summits of which it spreads out into an undulating upland inclined toward the W. Bunker Hill, the highest point, is about 500 feet above tide. The surface is intersected by numerous deep ravines of small streams. The principal streams are Vierdee Kil,[9] Moordeners Kil,[10] Vlockie Kil, Muitzes (Mitch-es) Kil, and Valatie (Vola-she) Kil.[11] The soil in the E. is clay, and in the W. a fertile, sandy and gravelly loam. **Castleton**[12] (p. v.) is a fine village upon the Hudson. Pop. 1145. **Schodack Landing** (p. v.) contains 250 inhabitants, **Muitzes Kill** 20 houses, **Schodack Depot** (p. v.) 18, **East Schodack** (p. v.) 15, and **Bunker Hill** 9. **Schodack Center** and **South Schodack** are p. offices. This vicinity seems to have been thickly inhabited by native tribes at the time of Hudson's visit in 1609.[13] The first settlements were made by tenants under Van Rensselaer. Over 40 settlers are mentioned in Bleeker's survey of 1767.[14] The census reports 7 churches.[15]

STEPHENTOWN[16]—was formed from "*Rensselaerwyck*," March 29, 1784. Petersburgh was taken off in 1791, and parts of Berlin and Nassau in 1806. It lies in the S.E. corner of the co. Its surface consists of 2 rocky mountain ranges separated by the valley of Kinderhook Creek. The highest summits are about 1800 feet above tide. The principal peaks are Round Mt. and Whitney and Butternut Hills, E. of the valley, and Brockway Hill and Webster Mt. W. [illegible]

TROY CITY—was formed as a town from "*Rensselaerwyck,*" March 18, 1791. Brunswick, and parts of Grafton and Lansingburgh, were taken off March 20, 1807, and a part of Greenbush in 1836. A part of Brunswick was annexed in 1814. The first village charter was passed in 1791;[3] and another Feb. 16, 1798. The village was formally incorp. by acts passed April 2, 1801, and April 9, 1805. The city charter was granted April 12, 1816. A portion of Lansingburgh was annexed May 4, 1836. It lies upon the Hudson, near the center of the w. border of the co. Its surface comprises the alluvial flat, three-fourths of a mile wide, upon the river, and the high bluffs which border it on the E. The high land immediately E. of the city is known as Mt. Ida, and that on the N. E. as Mt. Olympus. Mt. Ida is principally clay, and has been the scene of several destructive land-slides. Poesten Kil and Wynants Kil both break through these hills in narrow ravines and in a series of cascades, forming an excellent water power.

The first religious meetings were held in a store, and afterward in a schoolhouse, about 1785. The first framed house of worship was erected in 1791, now the First Presb. Church; Rev. Jonas Coe, of Lansingburgh, was the first pastor. There are now 33 churches in the city.[4]

The *Public Schools* are under the charge of 20 commissioners, elected for two years.[5] In 1857 the city was divided into 25 school districts, and employed 76 teachers,—14 males and 62 females. The number of children, between 4 and 21, was 11,200, of which 7228, or 63 per cent., attended the public schools during some portion of the year.[6]

The *Troy Academy*, incorp. May 5, 1834, and received under the regents Feb. 5, 1839, is located near the center of the city.

The *Troy Female Seminary*,[7] situated on Second Street, between Congress and Ferry Sts., was first established at Middlebury, Vt., in 1813, removed to Waterford in 1819, and to Troy in 1821. It was incorp. May 6, 1837, and received under the regents Jan. 30, 1838. It has gained a national reputation under the charge of Mrs. Emma Willard.

The *Rensselaer Polytechnic Institute*,[8] endowed by Stephen Van Rensselaer, is situated near the head of State St. It was organized in 1824. It was formed for the purpose of teaching the application of mathematics to civil engineering and the natural sciences. It numbers 14 professors and has about 100 students. Next to West Point, this institute has the best reputation, in its special departments, of any school in America.

The *Troy Lyceum of Natural History* was incorp. March 7, 1820. Its cabinet and library are kept in the Troy University.

The *Troy University*[9] is located upon Mt. Ida, a beautiful situation, overlooking the city and valley. It is under the charge of the M. E. denomination, and was opened in 1859.

St. Peter's College[10] is under the charge of the R. C. denomination, and is not yet fully organized.

The *Troy Hospital*, [illegible] nurses belong to the Sisters of Charity.

Marshall Infirmary [illegible] and grounds cost $35,000; which sum was donated by its founder.

Troy Orphan Asylum, incorp. April 10, 1835, is situated on Grand Division between 7th and 8th Streets. The building is of brick, and has about 100 inmates. The Asylum is supported by [illegible] distance [illegible] of 17. During the first 22 years over 500 had been dismissed; and most of them have since filled respectable stations in life. A school is maintained regularly in the Asylum.

St. Marys Orphan Asylum is an institution connected with St. Marys Church, (R. C.) The male department is under the charge of the "The Brothers of the Christian Schools," and the female, of "The Sisters of Charity."

The *Warren Free Institute*, a school for indigent female children, was incorp. March 19, 1846. It was founded and endowed by the Warren family. A free church, (Prot. E. Church of the Holy Cross,) for the pupils and their parents, is connected with the Institute.

The Troy Water Works were built by the city in 1833–34, and they have been subsequently extended. The water is drawn from Piscawin Creek, and the reservoir is sufficiently high to throw the water to the top of most of the houses. The works are under the charge of water commissioners, and the rents are charged to property owners and collected with the taxes.

The city is 150 miles from New York, with which it is connected by R. R., and, in the season of navigation, by lines of steamers. Its commerce is extensive, and it has a large trade with the region N. and E. The Union R. R. Co. have erected a magnificent depôt in the central part of the city for the accommodation of the various lines of roads that center here.[1]

The manufactures of Troy are extensive and various.[2] Wynants Kil, on the S., furnishes 12 mill sites, with an aggregate of 2000 horse power; Poesten Kil, on the N., has 10 sites, equivalent to 1000 horse power, and the dam across the Hudson furnishes 4000 horse power. Besides these there is an immense amount of steam power in use.

In 1720, Derick Vanderheyden[3] acquired from Van Rensselaer the title to 490 acres of land, now included in Troy, at an annual rent of 3¾ bush. of wheat and 4 fat fowls.[4] The tract was occupied as a farm until about 1786, when a company of New Englanders induced the owners to lay it out as a town. It was surveyed between 1786 and '90, and was variously known as [illegible] contained 5 small stores and about a dozen dwellings. The name, Troy, was adopted at a meeting of the freeholders, Jan. 5, 1789. The first settlers came in soon after the war.[5] The completion of the Erie Canal gave an impulse to this place that speedily raised it from a comparatively obscure village to a large and important city.[6] Several destructive fires have occurred, occasioning great losses.[7]

RICHMOND COUNTY.

This county[1] was organized Nov. 1, 1683. It includes Staten Island,[2] Shooters Island, and the islands in the mouth of Staten Island Sound. It is separated from Long Island by New York Bay, the Narrows,[3] and New York Harbor; from Bergen, N. J., by the Kill Van Kull; and from N. J. on the w. by the Arthur Kill, or Staten Island Sound.[4] Staten Island is a mountainous ridge, the highest land extending N. E. and S. W. It has an area of 58½ sq. mi., and is connected with Long Island, Amboy, Prince's Bay, and Great Kils are small bays on the shore. Fresh Kils is a tidal estuary extending about 3 mi. inland from Staten Island Sound, and draining [illegible] nearly its whole extent. The surface of the island is gently undulating. A broad range of hills extends from the Narrows across the island, terminating between the branches of the Fresh Kils. Near Tompkinsville these hills attain a height of 310 ft. They are composed of granitic rock upon the N. slope and steatitic rock and serpentine upon the S. Hematitic iron ore[6] and many other interesting minerals are found in the co.[7] Along the Fresh Kils, and along Staten Island Sound, in Northfield, and also around the head of Great Kils and the mouth of New Creek, are extensive salt meadows. The waters of the sound and the bays adjacent to the island abound in oysters; and the oyster trade is the principal industrial pursuit of those inhabitants not engaged in business in New York, Brooklyn, or Jersey City. The right of taking oysters belongs to the owners of the adjoining banks.[8] At Port Richmond, Factoryville, and other places along the N. shore, are extensive manufactories.[9] Market gardening is followed to a limited extent, chiefly to supply the home demand. The erection of forts, hospitals, and other public establishments of the General and State Governments has given employment to great numbers of persons and caused the expenditure among the people of the co. of large sums of money. Since the establishment of regular steam ferries,[10] many wealthy citizens engaged in business in New York City have erected residences upon the island. These country seats are mostly upon the N. shore and upon the heights that overlook the bay and sound. All the villages along the N. shore are lighted by gas furnished by the Richmond Gas Light Works, located near the Quarantine. A company was incorp. in 1836 to build a R. R. across the island to connect with the Camden & Amboy R. R.[11]

The co. seat is located at Richmond.[12] A courthouse and jail, in the same building, was erected pursuant to the act of March 23, 1837, at a cost of $10,000.[13] The co. clerk's office was erected in

1848 and enlarged in 1857. It is a 2 story brick building, and contains the supervisor's room, office for the surrogate and district attorney, and accommodations for the sheriff. The poorhouse is located upon a farm of 105 acres in Northfield.[1] Several of the public schools of Castleton and Southfield have been organized as union schools under a special act, and are in charge of a board of education. The schools of the co. generally are in a flourishing condition.[2] Richmond co. is within the jurisdiction of the Metropolitan Police Commissioners; but no men have hitherto been detailed for ordinary service within its limits.

Two newspapers are published in the co.[3]

Staten Island was visited by Henry Hudson in his celebrated voyage of discovery in 1609. It was purchased from the Indians, Aug. 10, 1630, by Michael Pauw, one of the 4 Patroons of New Netherlands, and formed a part of the tract known as "*Pavonia*" in the early Dutch records.[4] It soon reverted, however, to the West India Co.; and in 1636 a part of the island was granted to D. P. De Vries, by whom a colony was planted upon it in Jan. 1639. The remaining part of the island was granted by the Directors of the West India Co. to Cornelius Melyn in July, 1640. The following year, Melyn with his family settled upon this grant, and in June, 1642, he obtained letters patent. In Sept. 1641, the settlement of De Vries was attacked by the Indians,[5] and hostilities between them and the whites ensued. A peace was concluded in 1642; but in Feb. 1643, under a frivolous pretext, the Indians were attacked opposite Manhattan and at Corlaers Hook and great numbers of them slain. This barbarous measure invoked retaliation, and the white settlements within reach were laid waste. The island was again purchased of the natives, Dec. 6, 1651, by Augustine Herman, and finally quitclaimed to Gov. Lovelace, April 13, 1670.[6] Possession was given on the 1st of May following, and at this time the island was finally abandoned by its primitive inhabitants.

A considerable number of French Huguenots, after the revocation of the Edict of Nantes in 1685, found their way into the English colonies, and a part of them settled upon Staten Island. The family names of these immigrants are still common in this co.[7] The earliest grants upon the island under the English were made to the officers of the ship Elias, immediately after the conquest.[8] Two manors were subsequently granted,—one on the N. shore, styled "*Castleton Manor*," to Gov. Dongan,[9] and the other in the S. part, known as "*Billop Manor*." This island was first occupied by British troops in the Revolution, July 4, 1776, and it was held by them until their final removal from the State late in 1783. On the 21st of Aug. 1777, the British posts upon the island were attacked by an American force under Gen. Sullivan. The expedition was well planned, but it failed to accomplish its main object.[10] During the severe winter of 1779–80, while the Americans were encamped near Morristown, (N. J.,) a second expedition was sent out, under Gen. Lord Sterling, to surprise the enemy in the interior of the island. The party, consisting of 2500 men, crossed the sound on the ice from Deharts Point on the Jersey shore, on the morning of the 15th of Jan.; but the movement was observed in time to prepare for defense. Contrary to expectation, the passage to New York was found to be free from ice, and during the day the British were reinforced from the city. Two or three were killed on each side, and a few prisoners were taken by the Americans. While the party remained, some persons from the mainland passed over and plundered several of the inhabitants; but a strict search was made and the stolen property was recovered and restored to its owners.[11] On the 11th of

[1] The county house consists of 2 stone buildings, each 2 stories high. The Senate Com. in their report of 1857, say that it is "without ventilation and without any provisions for bathing, and a general survey of the house, while it fixes upon it the charge of inhumanity, is not wholly unmerited." The farm yield an annual revenue of $2,000.

[2] In 1845, efforts were made by Gov. Vroom and others to establish a college upon the island. A petition and charter was obtained from the regents, under the name of "[illegible]," and a subscription [illegible] and a library was secured. The [illegible] and property was proposed to unite the institution with [illegible] Col. [illegible] but without success. An act was passed, April 18, 1855, incorporating "*Richmond College*" upon condition that $50,000 be raised within 2 years; but the effort failed.

[3] *The Journal and Register* was established at Tompkinsville in 1828 by C. N. Baldwin, and [illegible] 2 years.

The Richmond Co. Free Press was started at Richmond in 1833 by Wm. Hagadorn, and continued 3 years.

The Staten Islander was established at Stapleton, as a weekly paper, in 1849, by E. L. Hagadorn, and is now published semi-weekly.

The Dead the Staten Islander was commenced in 1855 at Stapleton by August Fries, but has since been discontinued.

The Staten Island Chronicle was started at Tompkinsville in 1858, and is still published.

Sept. 1776, a conference between Lord Wm. Howe and a committee of Congress consisting of Dr. Franklin, J. Adams, and E. Rutledge was held at the house of Capt. Bishop, opposite Perth Amboy.[1] No events of special interest occurred upon the island during the late war with Great Britain. A brigade of militia, consisting of 2000 men, was stationed here, and remained in camp from Aug. to Dec. 1814. During the troubles that preceded the War of 1812, the Legislature of New York memorialized Congress for the erection of defensive works around the harbor of New York, claiming protection against the arms of a foreign power as no more than an equitable return for the revenues which the State had surrendered to the General Government upon the adoption of the Constitution.[2] Failing in this, the governor was directed to purchase a tract, not to exceed 25 acres, at the Narrows;[3] and upon this tract fortifications were afterward erected. The amount of the appropriation made by the State for the defences upon Staten Island previous to 1820 was $154,105 46. These works were purchased by the General Government, pursuant to an act of Congress passed Aug. 3, 1846,[4] and they are now being rebuilt at an immense cost. When these and the other contemplated works along the approaches to New York Harbor are completed, the city will be among the best fortified in the world.[5] A quarantine was established by the State, under an act passed Feb. 25, 1799, upon the N. extremity of the island, in the town of Castleton, and maintained until it was destroyed, on the evening of Sept. 1 and 2, 1858, by an armed mob encouraged and led by prominent citizens.[6]

CASTLETON—was first recognized as a town March 7, 1788. It lies in the N. part of the island, and is the smallest but most populous and wealthy town in the co. The surface is mostly hilly. The people are principally engaged in manufacturing. **Factoryville** North Shore P.O. is a populous village in the N.W. part of the town, containing extensive dye and print works[7] and other manufactories. **Elliottsville**[8] is a hamlet. A little E. of this place is the

[4] These lots consisted of the Hamilton, Wolf, Fort Tompkins, and the Water Battery lots, and the Middle, Quarantine, and Lighthouse lots, and Hoffman's, Robbin's, and Latourette's islands, and Meiggs' Point, in the Bay. By the act of June 14, 1858, the N.Y. Artillery Institute, the proceeds of the U.S. Military Academy lands, also were proposed and the grounds were surrendered by the State to the General Government. The purchase of so much land was necessary for this purpose. No further steps toward its removal have been taken.

[5] A commission was appointed in 1857 to report how Fort Tompkins and this work is now about to be replaced by one of stone, at an estimated cost of over $2,000,000. The report of the commissioners was made to the Common Council of the city, but has not been published. The amount appropriated by the General Government for the fortifications in the harbor of New York, from 1794 to 1857, was $7,000,000. Fort Tompkins, $192,300; for Batteries Hudson and Morton, $[illegible]. A portion of this appropriation was expended in the purchase of Hoffman's and Swinburne's islands, and the Middle Ground. Fort Hamilton has been rebuilt and the Narrows fortified. Fort Lafayette has been [illegible] Fort Wadsworth and the Battery at Tompkinsville are in progress. Work has been suspended upon the Southern Battery and Fort Richmond, upon the advice of Gen. Totten.

[6] In 1799 a law was passed to prevent the spread of infectious diseases, and a board of health was created. May 4, 1799, Elisha Parker and others were appointed health officers. May 4, 1799, Governor Jay appointed Edward Livingston, Richard Harrison, and Peter Van Schaack commissioners of quarantine; and in March, 1797, a lazaretto was directed to be built upon Bedloes Island. The awful visitation of yellow fever in [illegible] rendered this precaution necessary at the time. Of this lot 5 acres were sold, and ceded (April 1, 1800) to the U.S. for [illegible]. The first building erected was the Marine Hospital, and [illegible] were erected on the [illegible] Island. In 1824 a steam ferry-boat was established between the Battery and the quarantine ground, and the work of removing the sick commenced. [illegible] were received during the year. In 1825 the Marine Hospital was removed to Staten Island, and the quarantine establishment was broken up. The [illegible] were removed to Staten Island. In 1847 the Marine Hospital was removed to Stapleton

Sailors' Snug Harbor, an institution established for the support of aged and infirm mariners.[1] An institution for the support and education of the destitute children of seamen is situated near the Sailors' Snug Harbor.[2] **New Brighton** (p. v.) contains 5 churches, several manufactories,[3] 2 large family boarding houses, and the residences of many persons doing business in New York City. **Tompkinsville**[4] (p. v.) contains 4 churches and a number of manufactories. In this village are numerous suburban residences; and near by is the Quarantine. **Centerville** is a hamlet. The census reports 7 churches in town.[5]

NORTHFIELD—was formed March 7, 1788. It is situated in the N. W. part of the co., and includes several small islands in Staten Island Sound and Newark Bay. Its surface is level in the northern and central parts and hilly in the southern. Fresh Kils form the boundary between this town and Westfield. The soil is a clayey loam, under excellent cultivation. Along the W. and S. borders are extensive salt marshes. The town is very thickly settled along the shore of Newark Bay and the Kil Van Kull. **Port Richmond,** (p. v.,) in the N. E. part of the town, is a large manufacturing village,[6] with convenient docks for shipping. Pop. 1,429. **Graniteville,** adjacent to Port Richmond, is a small settlement, with a pop. of 481. Granite was formerly extensively quarried at this place.[7] **Mariners Harbor** is a thickly settled street along the shore of Newark Bay. Pop. 1,142. **Old Place** and **New Springville** (p. o.) are hamlets. **Chelsea** is a small village nearly opposite the mouth of Rahway River. **Southfield** and **Hollins Hook** are hamlets, and **Long Neck** is a p. o. near Fresh Kil. A part of **Richmond** and of **Egbertsville**[8] are in this town. St. Andrews Church, (Prot. E.,) at Richmond, is the oldest on the island, and under the colonial Government it was supported by a co. tax.[9] The census reports 11 churches in town.[10]

SOUTHFIELD—was formed March 7, 1788. It is a long, narrow town extending along New York Bay. Great Kil is a bay in the S. part.[11] Its surface is level or gently undulating, terminating in bluffs upon the E. shore. In the S. part are several small streams bordered by salt meadows. **Stapleton** (p. v.) is a scattered village in the N. part of the town. It contains 4 churches. The Seamen's Retreat[12] and the Mariners' Family Asylum[13] are located here. **Clifton** contains 2 churches and many beautiful residences. **Richmond** (p. v.) is situated

[1] This establishment was founded by Robert Richard Randall, of New York. By the provisions of his will, dated June 1, 1801, several annuities and legacies were to be paid, and the residue of his estate conveyed in trust to the State Chancellor, the Mayor and Recorder of New York, the senior minister of the Episcopal and of the Presbyterian churches of the city, the President of the Chamber of Commerce and the President and Vice President of the Marine Society, and their successors for the support of aged and infirm seamen. The trustees were incorp. Feb. 6, 1806. The property thus bequeathed lay near Union Square in New York, and a portion of it being of extensive lawsuit prevented the trustees from fully executing the intentions of the benefactor until many years after his death. This suit was decided in the U. S. Supreme Court, in Feb. 1840, in favor of the trustees. It was allowed to accumulate until 1829 when the present site on Prince Bay was purchased and preparations were made for the erection of the necessary buildings. The cornerstone of the edifice was laid Oct. 21, 1831. The buildings consist of a main edifice with two wings, a hospital connected in 1837 to accommodate 40 aged and lodging hall erected in 1840, a chapel, erected in 1851, the governor's house, chaplain, and steward's dwellings, a laundry, a gardener's house, and other buildings. The remains of the founder of the institution were interred beneath a monument in front of the main building, Aug. 31, 1851. The officers of the establishment consist of a president, secretary, governor, treasurer, chaplain, physician, assistant and lay vernon, steward, and a board of visitors annually by the trustees. Capt. John Whetter was the first vernon, and since 1854 Capt. De Peyster has been the officer. The total number of inmates received since 1840 has been 477, the present number (Aug. 1858) is 80. Among the inmates the average number of deaths is 2 per annum. The annual income of the institution is $7,000.

[2] *The Society for the Relief of Destitute Children of Seamen* was formed in 1806 and incorp. 1814. An annual payment of $2 constitutes a member, and a single payment of $50 a life member. It is managed and chiefly supported by ladies. The yearly expenditures are about $7,000.

[3] A silk handkerchief printing establishment, started here in 1854, gives employment to about 100 persons.

[4] Named from Gov. Daniel D. Tompkins, who resided here from 1814 till his death in 1825.

[6] The Dunderberg Steel Co. employs 500 to 600 hands in the manufacture of iron from the ore, and of steel from iron. At this place are several large brickkilns. The Northfield Brick Co. employs about 100 hands, and the Richmond Co. about 45. White lead is also manufactured to some extent.

[7] The granite obtained at this place is very tough, and consists of hornblende and feldspar intimately blended. It was quarried by the Rock and Granite Co., organized in May, 1848, and was largely used in making the Russ pavement of New York City. A R. R. has been built from the quarry to the dock,—a distance of 1 mi.

[8] Named from Jas. Egbertse, a former resident.

[9] Thos. Lafoureau, by will in 1708 devised a certain plantation as a glebe to this church. By the act of Feb. 18, 1814, the trustees were authorized to sell this, and the proceeds were invested for the benefit of the church. A large amount of valuable real estate adjoining the Quarantine Ferry is owned by this society, and is leased for a term of 50 years.

[11] The waters of the bay S. of this town were selected for the anchorage of detected vessels by the commissioners for the removal of the quarantine, June 9, 1857.

[12] In March, 1801, a tax was imposed upon seamen and passengers entering the port of New York, the proceeds of which were applied to the Quarantine Hospital. But the misuse of devoting a revenue derived from the hard earnings of seamen to objects having no connection with their interests or support led to the passage of a law in 1834, by which this tax was directed to be paid to the Board of Trustees of the Seamen's Fund and Retreat in the city of New York. A surplus that had been paid into the State treasury, amounting to $12,197 68, was also placed in the hands of the trustees. A tract of 40 acres was bought for $8,000, temporary buildings were erected, and, on the 1st of Oct., 1801, 47 patients were admitted. The corner stone of the present structure was laid July 4, 1835, and the building was finished in 1837. It is built of hammered stone, is 5 stories high, and will accommodate 200 inmates. An insane hospital houses for the superintendent and physicians, and other buildings, have been erected. The cost of the main building was $90,000, of the insane hospital $8,000, and the total cost has been $11,000. Up to Jan. 1, 1854, 16,764 patients had been received, of whom 680 had died. By an act passed April 7, 1854, the mayor and health officer of New York, the presidents of the Seamen's Savings Bank and the Marine Society, and 7 other persons, (4 of whom must be masters of vessels, appointed by the governor and senate, were constituted trustees of the establishment. The trustees must be residents of New York, Kings, Queens, or Richmond Cos.

[13] By an act passed in 1847, the trustees of the Seamen's Retreat were directed to provide for the support of destitute sick or infirm mothers, wives, sisters, daughters, and widows of seamen, and $10,000 was applied for the erection of suitable buildings.

on a creek tributary to the Fresh Kils, on the line of Northfield. It is the co. seat, and contains the co. buildings, 1 church, and about 50 houses. **Bay View** is a p. o., and **Egbertsville** (New Dorp p. o.) is a small village. The census reports 5 churches in town.[1]

WESTFIELD—was formed March 7, 1788. It occupies the N.W. extremity of the island, and is the largest town in the co. Its surface is generally level or gently undulating. Princes Bay is an indentation upon the S. coast, to the E. of which is Seguines Point.[2] Fresh Kils forms the boundary between this town and Northfield. Material for fire brick is found in abundance near Staten Island Sound, and considerable quantities of it have been taken to New York for manufacture. Upon the coast, near the W. extremity of Princes Bay, is a lighthouse.[3] The people of this town are principally engaged in fishing and taking oysters. A limited amount of manufactures is carried on.[4] **Tottenville**[5] (Bentley p. o.) is situated on Staten Island Sound, opposite Perth Amboy. Pop. 600. **Rossville**[6] (p. v.) has a population of 300. The inhabitants are chiefly engaged, directly or indirectly, in the oyster trade. **Lemon Creek** p. o. is a hamlet, known as "*Pleasant Plains*," and **Marshland** is a p. o. **Blooming View** and **Woodrow** are small villages. **Richmond Valley** (p. o.) is a hamlet, and **Southside** a p. o. The census reports 7 churches in town.[7]

ROCKLAND COUNTY.

This county was formed from Orange, Feb. 23, 1798. It is triangular in form, Hudson River, New Jersey line, and the s. bounds of Orange co. being respectively its E., S. W., and N. W. boundaries. It is centrally distant 105 mi. from Albany, and contains 208 sq. mi. The Ramapo Mts., extending along the N. W. border, are the connecting link between the Blue Ridge of Eastern Penn. and N. J. and the Matteawan Mts. of Putnam co., E. of the Hudson. They are separated into numerous distinct spurs, ridges, and peaks, and occupy more than one-third of the entire surface of the co. They are generally steep, rocky, and barren, and the valleys between them are narrow, rocky ravines. The Palisade Range from N. J. enters the extreme s. angle of the co., and terminates abruptly s. of Piermont. A broken ridge, known as the Nyack Hills, forming a N. spur of this range, but without its continuous and wall like character, extends N. along the river to the N. part of Clarkstown, where it unites with Verdrieteges Hook, an E. spur of the Ramapo Range. The surface of the central and S. W. portions of the co., lying between these ranges, is rolling or moderately hilly. The highest summits in the N. W. part are 700 to 1,000 feet above tide. The principal streams are Hackensack River, flowing S. through Clarkstown and Orangetown, Ramapo River, in the W. angle of Ramapo, and Minisceongo Creek, Minas Fall Creek, and Spar Kil, tributaries of the Hudson. The rocks of the Ramapo Mts. are principally primitive. Granite, gneiss, and metamorphic limestone abound. The hills along the river and Verdrieteges Hook are composed of red sandstone, known to geologists as the New Red Sandstone; and the central and W. portions of the co. are principally underlaid by limestone. These rocks yield an abundance of most excellent building material,[1] and from the white limestone in the N. E. corner of the co. large quantities of lime are manufactured.[2] Trap rock extends from N. J. into the S. border of the co. The people are largely engaged in fruit growing and gardening. Milk is sent from some parts of the co. in considerable quantities to the New York market. The manufacture of lime and brick and the exportation of ice are important branches of the industry of the co. Large quantities of red sandstone for building are annually quarried and exported. The manufactures of the co. are also important and various, consisting principally of shoes, wooden ware, and woolen yarn.

The co. seat is located at the village of New City, in Clarkstown. A combined courthouse and jail, built of brick, is situated upon a beautiful eminence overlooking the village.[3] The clerk's office is a fireproof brick building adjacent to the courthouse. The poorhouse is located upon a farm of 43 acres at Mechaniesville, in Ramapo, 7 mi. W. of the courthouse. The average number of inmates is 100, supported at a weekly expense of 75 cts. each. The farm yields a revenue of $700. A school is taught during the entire year, and the house is well kept. The N. Y. & Erie R. R. extends through the W. part of Ramapo, and the Piermont Branch of the same road extends from Piermont, on the Hudson, to Sufferns, where it unites with the main track.[4]

Two weekly newspapers are now published in the co.[5]

This co. was included in patents known as the Kakiate Patent, granted to Daniel Honan and Michael Hawdon, June 25, 1696; the Wawayanda Patent, granted to John Bridges, April 29, 1703; and the Cheesecocks Patent, granted to Ann Bridges and others, March 20, 1707. The first patent recorded in the co. clerk's office is one granted to Samuel Bayard, bearing date Sept. 16,

[1] See page 570.

[2] This lime is used exclusively for agricultural purposes.—See page 569.

[3] The first courthouse after the erection of the co. was built in 1798-99. The present house was erected in 1827, and the jail was added in 1856. The whole cost was about $16,000. The first co. officers were John Sullivan, *First Judge*; David Pye, *Co. Clerk*; Jacob Wood, *Sheriff*; Peter Tallman, *Surrogate*.

[4] A R. R. extends S. from Piermont to Jersey City. It was finished in 1859, and is intended to continue N. to Warren.

[5] *The Palladium* was started at Warren, about 1842, by Ezekiel Burroughs, and was continued a short time.

The Rockland Register was commenced at Warren in 1828, by Ezekiel Burroughs; in 1830 it was changed to *The Rockland Gazette*, and in 1834 it was united with The Advertiser.

The Rockland Advertiser was started at Warren, in May, 1833, by John Douglas; and in 1854 it was united with The Gazette, under the name of *The Rockland Advertiser and Family Gazette*; and in 1843 it was published as *The Rockland News and General Advertiser*, by John L. Pratt.

The North River Times was started at Warren, in 1844, by Alexander H. Wells, and was continued a short time.

The Mirror was published at Warren a short time in 1845.

The Rockland County Messenger was established at Warren, in May, 1846, by Robert Marshall; in 1852 it passed into the hands of Robert Smith, by whom it is still continued.

The Rockland County Journal was commenced in July, 1870, at Nyack, by Wm. G. Hasselbarth, and is still continued by him.

1703.[1] The old courthouse, built about 1739 for that part of Orange co. s. of the mountains, was at Tappantown, opposite the old Ref. Prot. D. church, and was burned before the Revolution. The first settlers were Dutch, who located in the S. E. part of the co. from 1690 to 1710.[2]

CLARKSTOWN—was formed from Haverstraw, March 18, 1791. It lies upon the Hudson, and is the central town upon the E. border of the co. Verdrieteges Hook, a rocky ridge 500 to 800 feet above tide, extends along the N. line, and the Nyack Range occupies a considerable portion in the S. E. corner. The remaining parts of the town, comprising four-fifths of its surface, are rolling or moderately hilly. Hackensack River flows S. through near the center, and a narrow swamp extends along the greater part of its course. Rockland Lake, about 1 mi. from the Hudson, is a fine sheet of pure water, 3 mi. in circumference and 160 feet above the river. The soil is a reddish, sandy loam underlaid by clay. Considerable attention is given to fruit growing. **Rockland Lake,**[3] (p.v.,) in the E. part of the town, and extending from the lake to the river, contains a church, a foundry and machine shop, and a ship yard. Pop. 430. An extensive business is carried on at this place in preserving and exporting ice.[4] **New City,** (Clarkstown p. o.,) the co. seat, a little N. W. of the center, contains the co. buildings, a church, and 28 dwellings. **Nanuet,** (p.v.,) formerly "*Clark town Station*," a station upon the Piermont Branch of the Erie R. R., in the S. W. part, contains 1 church and 20 dwellings. **Clarksville,** (Nyack Turnpike p.o.,) in the S. part, contains a church and 18 dwellings. **Dutch Factory,** a hamlet in the W. part, contains a cotton factory and 2 woolen yarn factories. The first settlements were made by the Dutch, at an early period. The first church (Ref. Prot. D.) was formed near Clarksville.[5]

HAVERSTRAW[6]—was formed March 7, 1788.[7] Clarkstown and Ramapo were taken off in 1791. It lies upon the Hudson, in the N. angle of the co. Nearly the entire surface is hilly and mountainous. The Ramapo or Blue Mts., extending through the N. W. part, are divided into numerous precipitous and rocky peaks, and spurs from the principal range extend to the banks of the Hudson.[8] Verdrieteges Hook, a long, rocky ridge, forms a considerable portion of the N. border. The S. E. portion is moderately hilly. The valleys separating these mountains are mostly narrow, rocky ravines. Stony Point is a small rocky peninsula on the river, near the center of the E. border of the town.[9] The principal streams are Minisceonga and Miners Creeks, flowing into the Hudson, and Stony Brook, a tributary of Ramapo River, a branch of the Passaic. The soil is a sandy loam underlaid by clay. Extensive beds of a fine quality of clay border upon the river above Warren, and from them are annually manufactured 150,000,000 of bricks, giving employment to over 1,000 men. Limestone crops out near Tompkins Cove, from which large quantities of lime are manufactured. A gas spring is found 2½ mi. S. of Stony Point. **Warren,**[10] (Haverstraw p. o.,) situated upon the Hudson, in the S. E. angle of the town, was incorp. in 1854.

[1] [illegible] as follows: "A certain tract of land within our county of Orange, called by the Indians Wighpus Pereck, Gerritt Hopper and Nonsebanner, and by some other small persons and Indians [illegible] south bounds of lands granted to Daniel Honan and Mr. Hoel Hawdon being small parcel of land on the Creek to the southward of Nanebanck, and [illegible] by Domine Selyns, Koert Turnure and Cobus Dey, purchased said Province from the Indians [illegible] line westward to a small river called Pascack River, then by the said river northward until an east line doe run to the southwest corner of the said Honans and Hawdons land, containing by estimation two thousand acres of improvable land, &c. &c."

Another deed on record commences, "To all X Tian People," (Christian People) [illegible] Albert Mynne, of Haverstraw, &c. &c., and dated 1694.

Witness, Thomas Lambert, Lucas Wessels and Peter Jacobus Maurius.

[2] Among these early settlers were Capt. Cornelius Cuyper, Capt. Cornelius Harring, Johannes Meyer, Gerhardus Clowes, Derrick Straat, Jacobus Swartwout, Jonathan Ross, Thomas Pulling, John Gaile, Cornelius Smith, Jacob King, William Kurtrack, John Ellison, Rinear Kisarike, Col. Vincent Matthews, Hendrick Ten Eyck, Guylbert Crom, Minard Hogon Kamp, Garret Sneden, [illegible] Peter Jacobus, Jacobus Simmons, Thos. Maybee, Daniel De Clark, William Wyant, Evert [illegible], John Van Orden, [illegible], Lambert Andries Van Houten and Thomas Idens.

[9] During the Revolution, Stony Point and Verplanks Point, on the opposite side of the Hudson, were strongly fortified, the two fortresses commanding the channel and Kings Ferry, the principal [illegible] of June, 1779, Gen. Vaughn, at the head of a considerable British force, made an attack upon these places and captured both. The garrison at Fort La Fayette, on Verplanks Point, consisting of 70 men, were taken prisoners; and that at Stony Point, consisting of 40 men, evacuated the place on the approach of the British. Gen. Clinton immediately ordered the works strengthened, and prepared for permanent occupation. Stony Point was surrounded [illegible] covered at high tide, and crossed by a narrow causeway. This action was one of the most daring and brilliant that occurred during the war. A light was erected on the site of the fort in 1826.

[10] [illegible] Haverstraw. The [illegible] of the Sampson Iron Co., 1½ mi. W. of this place, usually employing 1 to 1[illegible] hands, has suspended operations.

It contains 5 churches, a newspaper office, academy,[1] paper mill, ship yard, foundry, and a silk manufactory. Pop. about 1,700. **Tompkins Cove,** upon the Hudson, is a village grown up around the extensive limeworks of C. Tompkins & Co. It contains a church, a private school supported by the company, and 60 dwellings.[2] **Garnerville,** 2 mi. N. W. of Warren, contains 1 church, the Rockland Print Works,[3] and 40 dwellings. **North Haverstraw,** (p. v.,) upon the Hudson, 3 mi. N. of Warren, contains 2 churches and 28 dwellings. **Thiells Corner,** 4 mi. W. of Warren, contains a needle factory, 2 gristmills, a church, and 15 dwellings. **Montville. Caldwells Landing,**[4] and **Grassy Point** are hamlets. Fort Clinton, the ruins of which are still visible, was situated upon the river, in the N. E. angle of the town. The house in which Arnold and André met to consummate the bargain for the delivery of West Point to the British is still standing, about halfway between Warren and North Haverstraw. There are 11 churches in town.[5]

ORANGETOWN—was formed March 7, 1788, and was named from Orange co., of which it then formed a part. It lies upon the Hudson, in the S. angle of the co. Its surface is broken by abrupt and rocky hills in the E.; but in the center and W. it spreads out into a rolling or moderately hilly region. The Nyack Hills, extending along the river, are 300 to 500 feet high, with steep, rocky declivities upon the E., but more gradual slopes upon the W.[6] Their summits are rocky and covered with a light growth of forest trees. Snake Hill, in the N. E. corner, upon the line of Clarkstown, is one of the principal peaks. The principal stream is Hackensack River, flowing S. through the W. part. Pascasek Creek flows through the extreme W. angle, and Spar Kil is a tributary of the Hudson. Near the N. line are several bog or peat meadows, generally well drained and under cultivation. The red sandstone which crops out on the E. declivities of the hills, within a few rods of the river, between Piermont and Nyack, is extensively quarried and exported for building stone.[7] The soil is a reddish, sandy loam intermixed with clay. Fruit growing and furnishing milk for the New York market have become leading pursuits. **Nyack,** (p. v.,) upon the Hudson, in the N. E. corner of the town, contains 5 churches, 5 shoe manufactories,[8] a steam tub and pail factory,[9] the Rockland Female Institute,[10] and a private academy.[11] Pop. 1,458. **Piermont,**[12] (p. v.,) upon the Hudson, in the S. part, was incorp. May 21, 1850. It is the E. terminus of the Piermont Branch of the N. Y. & Erie R. R.,—the one over which the freight is carried. Nearly the whole business of the place is connected with the R. R. establishment. A pier 1 mi. long has been built into the river, where the freight is transferred to and from the cars and barges in the river. Upon each end of the pier are extensive offices for the transaction of the business of the road. At this place the R. R. co. also have a large iron foundry and extensive repair shops. Pop. 2,204. **Tappantown,**[13] (p. v.,) near the N. J. line, contains 2 churches and 30 dwellings. This place was the scene of the trial of André, and for a time in 1780 was the headquarters of Gen. Washington.[14] **Rockland,** (Palisades p. o.,) upon the Hudson, in the S. part

[1] The Haverstraw Mountain Institute, a private institution, was established in 1853. It employs 2 teachers, and has an average of 40 pupils.

[2] The company have 4 limekilns and manufacture 100,000 bbls. of lime annually, giving employment to 100 men. The lime is of a fine quality and is used for agricultural purposes.

[3] The establishment employs 150 hands, who print about 5,000,000 yards of calico annually, and consume 1,250 bbls. of cloth, and large quantities of coloring matter, dye stuffs, and chemicals, at a cost of $75,000 per annum.

[4] This place is just below the Highlands and opposite Peeks kill, with which it is connected by a steam ferry. The day line of steamers between New York and Albany land here. About 1½ years since, a company was formed for erecting an old-world, or three-story hotel on the grounds of the late Judge Caldwell, from which the village takes its name. A sufficient number of rooms were erected to furnish accommodations for 100 boarders, when it was found that the enterprise was not remunerative, and the building was converted into a private boarding-house for pupils of the Rockland Female Institute, which was removed from Nyack to this place in 1857. The building is now owned by Prof. E. A. Merry, and is used as a boarding-house for pupils of the Institute.

[5] The valley of Spar Kil forms a break in the hills through which the Piermont Branch of the Erie R. R. passes. In the hill just S. of Piermont is an opening in the rocks, appearing like a gateway to the site of the old fort, and by some is said to be a natural cave. It is divided into 2 passages, one extending 70 feet W. and the other 100 feet S. by 8 feet wide. The passage is very irregular, 4 to 6 feet in width, and 9 to 12 feet high. At the extremity of the longest passage is an immense spring of clear, cold water.

[6] The State House at Albany was built of this stone.

[7] The manufacture of women's and children's shoes is at this place on an extensive business. It gives employment to about 600 hands in the vicinity, and 30 sewing machines are kept in constant operation. Goods to the amount of $2,000,000 are annually produced.

[8] The factory employs 50 hands, and produces $60,000 worth of goods annually.

[9] His establishment is beautifully located upon a level 10 acres, upon the line of the Hudson R. R. in the S. part of the village. It is supplied with pure spring water from the mountain, is heated with furnaces and lighted with gas. It has accommodations for 100 boarding pupils. The institution owes its origin to the late Simon V. Sneden, of Nyack, who gave $25,000 toward the erection of the building.

[10] The Nyack Classical School and Commercial Academy, established to prepare young men for college and commercial pursuits, has recently been established.

[11] Nyack is named from the Indian tribe of that name.

[12] Piermont is named from the Dutch word, signifying "mountain at the water's edge."

[13] According to Hockewelder, Tappan is from the language of the Delawares, and derived from Tuphatteu or Tuphatteuc, "Cold Stream." Winsor's Hist. of Am. Vol. II.

[14] The house occupied by Gen. Washington, still standing, is owned and occupied by Dr. Smith. It was a stone house, and is said to have been erected in 1700. The house in which André was confined during his trial is now kept as a tavern, under the name of "The Old Tory House." The trial was held in the old Ref. Prot. D. Church. The scene of André's execution and burial was upon an eminence ½ mi. W. of the village, and about 20 rods from the N. J. line. In Aug. 1831, his remains were disinterred, under the superintendence of Mr. Buchanan, British Consul at New York, and taken to England. A small cedar tree that stood by the grave was also taken away, and a box was afterward made from its wood and filled with gold, and sent to Eng. Mr. Demarest of Tappantown, in token of his appreciation of the services rendered by him at the disinterment. On the box was the following inscription:—"From his Royal Highness the Duke of York to the Rev. Mr. Demarest." No monument now remains to mark the spot of the execution or the grave. A rock was formerly placed to mark the spot, but this has been broken up and removed.

of the town, contains 3 churches and 40 dwellings.[1] **Orange Mills, Middletown,** and **Blauveltville,** p. o., a station on the N. Y. & E. R. R., are hamlets. The first settlement is supposed to have been made by the Dutch as early as 1670.[2] The first church (Ref. Prot. Dutch) was formed Oct. 24, 1694; and the first preacher was Rev. Graham Bartholf. The first church edifice was erected in 1716. There are 10 churches in town.[3]

RAMAPO—was formed from Haverstraw, March 18, 1791, as "*Hempstead.*" Its name was changed to "*Hempstead*" March 3, 1797, and to Ramapo in 1798. It is the most westerly town in the co. The Ramapo or Blue Mts. extend N. E. and S. W. through the W. part.[5] They are steep and rocky, and the valleys between them are deep and narrow. Ranges of rounded and arable hills extend through the S. E. half of the town and occupy the greater part of its surface. The principal streams are Ramapo River, flowing S. through the W. corner, and its tributaries Maway River and Stony Creek. Niggar and Shepard Ponds, on the line of N. J., in the S. W. angle, are small bodies of water. The people are principally employed in raising vegetables for the New York market. **Ramapo,** (Ramapo Works p. o.,) a station on the N. Y. & E. R. R., in the W. part of the town, contains 1 church, several manufactories, and 50 dwellings.[6] **Sufferns,** (p. v.,) near the line of N. J., in the W. part, contains a rolling mill and 20 dwellings. It lies at the junction of the two branches of the Erie R. R., and is an important station. **Sloatsburgh,** (p. v.,) on the Erie R. R., in the extreme W. part, contains a church, cotton twine factory,[7] hoe factory, and 180 inhabitants. **Spring Valley,** (p. v.,) on the Piermont Branch of the Erie R. R., contains a church and 18 dwellings. **Mechanicsville,** near the center of the town, contains a church and 15 dwellings. **Tarmanville** and **Monsey Depot** (Monsey p. o.) are hamlets. The first church (Ref. Prot. D.) was formed near the center of the town, Dec. 4, 1774; Rev. Peter Leyt was the first preacher.[8]

ST. LAWRENCE COUNTY.

This county was formed from Clinton and parts of Montgomery and Herkimer, March 3, 1802.[1] It contains an area of 2,880 sq. mi., and is the largest co. in the State. It is centrally distant 140 mi. from Albany. The surface is broken by a series of parallel ridges extending in a N. E. and S. W. direction, and gradually declining in height from the summits, about 1000 ft. above tide, on the S. border, to the level of the banks of St. Lawrence. The highest summits, in the S. E., are about 2000 ft. above tide. The declivities of the ridges are usually gradual slopes, giving to the surface a rolling character, changing from gentle undulations along the river to a hilly and almost mountainous character in the S. E.

The principal streams are the Indian, Oswegatchie, Grass, Racket, St. Regis, and Deer Rivers.[2] These streams all have their rise upon the highlands, which occupy the center of the great northern wilderness, flow for a considerable distance in a N. W. direction, and most of them gradually bend toward the N. E. and finally traverse the greater part of the co. nearly parallel to the St. Lawrence. They all are frequently interrupted by rapids and cascades in their upper and middle course, but as they approach the St. Lawrence they become sluggish; and most of them are navigable for short distances from their mouths.[3] The southern and central parts of the co. are thus abundantly supplied with water-power. In the S. part are numerous small lakes, the principal of which is Cranberry Lake. Long Lake, the largest body of water in the co., lies along the course of Indian River, near its junction with the Oswegatchie.

The geological formation of the co. is very simple. The whole central and southern portions are underlaid by the primitive formation, consisting of gneiss and white limestone.[4] The northern extremity of this formation may be readily traced, by a line commencing upon the border of Jefferson co., about 2 mi. W. of the Ox Bow, thence extending northerly to near the center of the S. shore of Black Lake, thence bending toward the E., and extending to the E. border of the co. on the N. line of Hopkinton. A belt of country 5 to 10 mi. wide, N. of the primitive region and parallel to it, is underlaid by Potsdam sandstone; and the remainder of the co., comprising a belt 3 to 20 mi. wide bordering upon the St. Lawrence, is underlaid by the calciferous sandrock. The primitive portion of the co. is generally elevated and considerably broken. Its soil is light and sandy; and in some parts are extensive sand plains, entirely unfit for agricultural purposes. A considerable portion of the co. is covered with drift deposits, which go far to neutralize the effect of the underlying rock upon the character of the soil. In this region the intervales along the streams are usually fertile; but the whole is best adapted to grazing. Magnetic iron ores abound in the S. part; but they have never been examined or worked to any considerable extent, owing to their remoteness from settlements.[5] In Rossie rich veins of lead have been found and extensively worked;[6] and the rich specular iron ore found along the W. border of the co. and in the adjacent portions of Jefferson, lies between the gneiss and sandstone.[7] The sandstone region is level or gently undulating, broken in some places by disrupted masses of the underlying rock. In this region are numerous quarries, from which are obtained sheets of sandstone of 2 inches to a foot in thickness and of almost any desirable size. This stone acquires hardness by exposure and is indestructible by atmospheric agencies. The soil in this region is usually thin, but fertile, and is derived principally from drift. The calciferous sandstone region commences as a narrow strip on the St. Lawrence, in the N. part of Hammond, and continually widens to the E. border of the co. The soil, consisting of drift and marine clay, is usually very productive.

[1] This co. included the "*Ten Towns*," and Great Tracts Nos. 11 and 111 of Macomb's Purchase were provisionally annexed, and now form part of the co.

[2] These streams are known to the St. Regis Indians by the following names: Indian, Oiatskwake, "where the ash tree grows with knobs;" Oswegatchie, a Huron word, said to signify "black water;" Grass, Nikeiatsteke, "full of large fishes;" Racket, Nikaientewate, "racket, or noisy river;" St. Regis, Akwesasne, "where the partridge drums;" Deer, Oiekaronte, or "Trout River."

[3] In severe cold weather the tributaries of the St. Lawrence are liable to a sudden reversal of their currents near their mouths, from the damming up of that stream by ice; the streams in consequence overflow the lowlands, making the maintenance of fences and bridges impossible.

[4] This region is remarkable for the variety and beauty of its minerals, of which 60 species are found.—*Hough's Hist. St. Lawrence and Franklin Cos.*, p. 684.

[5] The Clifton Mine in Pierrepont has furnished 1,500 tons of iron. [6] See p. 582.

[7] In the town of Pierrepont a substance used for red paint has been found in the same relative geological position.

Dairying and stock raising are the branches of agriculture most extensively pursued. Corn is also cultivated to some extent.[2] Fruits are not extensively cultivated. Manufactures, consisting of iron,[3] castings, lead,[4] lumber, and articles of wood,[5] are carried on. Commerce to some extent is carried on by means of the St. Lawrence and the various railways.

The chief works of internal improvement in the co. are the Ogdensburgh R. R., extending from Ogdensburgh to Rouses Point, on Lake Champlain;[7] the Potsdam & Watertown R. R.,[8] in connection with the O. R. R. on the n. and with the W. & R. R. R. and N. Y. Central on the s. Improvements have been made by the State in the navigation of several of the rivers, for the purpose of floating down logs from the s. forests.[9] Daily lines of steamboats connect Ogdensburgh and other points on the river with Montreal and with the various ports on Lake Ontario.

The county seat is located at the village of Canton.[10] On the P. & W. R. R., 18 m. s. of Ogdensburgh. The courthouse, jail,[11] and clerk's office are in separate buildings, situated adjacent to each other. The co. poorhouse is situated on a farm of 130 acres 1 mi. w. of Canton Village.[12]

Six newspapers are now published in the co.: 5 at Ogdensburgh, 2 at Potsdam, and 1 at Canton.[13]

The first white settlement in this co. was made by Francis Picquet, a French Sulpitian, who established an Indian mission at the mouth of the Oswegatchie in 1749 and styled it "*La Presentation.*"[1] In 1759 the first island below Ogdensburgh, 3 mi. down the St. Lawrence, was taken possession of by the French and strongly fortified.[2] It was named Fort Levi; and here the last French resistance was made against the English, in 1760. During the Revolution it was the rendezvous of scalping parties of tories and Indians, who harassed the frontier settlements on the Mohawk and Hudson. Two expeditions were fitted out against this place during the Revolution: but the English held possession of the fort at Oswegatchie until 1796, when it was surrendered under the provisions of Jay's Treaty.[3] The Oswegatchies collected by Picquet were removed, in 1793, from the vicinity of Johnstown, U. C., to a point opposite, on the s. shore, known as Indian Point. In 1807 they removed to St. Regis and elsewhere.[4]

The co. includes the tract known as the "*Ten Towns*,"[5] Tract No. II,[6] of Macomb's Purchase, containing 821,879 acres, Tract No. III,[7] of the same purchase, containing 640,000 acres,[8] a small portion located by Revolutionary land warrants,[9] and the islands in the St. Lawrence.[10] The first settlement under State authority was made at Ogdensburgh, in 1796, by Nathan Ford, agent of Samuel Ogden. Before 1800, small beginnings had been made at Lisbon, Madrid, and Massena. The "*Ten Towns*" were opened for settlement, under the original purchasers, within the next 5 years, and the adjacent parts of the Macomb Purchase soon after. At the commencement of the War of 1812 there were about 8,000 inhabitants in the co., thinly scattered over nearly the whole territory now settled. Great alarm was felt along the whole frontier, and many families left the river towns. It soon became the theater of stirring military events, and various expeditions were planned and attacks made on both sides of the border.[11]

At the close of the war the co. rapidly filled up with an immigration chiefly from Vt. and the other New England States. The completion of the Erie Canal checked the growth of the co. by opening to emigration the more fertile lands of the West. The price of wild lands greatly fell, and many visions of immense wealth were blighted. For the last twenty years a steady and healthy improvement has been going on, which has been greatly increased by the lines of railroad completed through it.[12] In 1837–40 the whole frontier was greatly excited by the "*Patriot*

The Inspector and Tariff Advocate, a campaign paper, was issued from The Cabinet press in 1844 by Chas. Bowntree.

The Canton Weekly Courier was begun Jan. 1, 1852, by J. S. Sargeant, and continued 4 weeks.

The Canton Independent was removed from Madrid in 1853, and published by O. L. Bay. It was soon discontinued.

The St. Lawrence Plain Dealer was begun in 1855 by Goodrich & Remington. It is now published by S. P. Remington.

Young America is now published by C. W. Ames.

The other papers in the co. have been:

The American New Yorker, began April 2, 1849, at Gouverneur, by Wm. Goodrich and M. L. Wilson; and issued a little more than one year.

The St. Lawrence Advocate was begun in 1850, at Gouverneur, and a few numbers issued.

The Laborer was commenced in July, 1852 at Gouverneur, by M. Mitchel. It was short-lived.

The St. Lawrence Free Press, began in 1853 by J. J. Emmes, and afterward published by C. B. Lyman. It was removed to Ogdensburgh in the fall of 1854 and united with The Sentinel.

The Progressive Age was begun in June, 1854, at Gouverneur, by G. D. Greenfield. It was removed to Potsdam in 1856 and changed to The Northern Freeman.

The Free Democrat was begun in May, 1854, at Madrid, by M. F. Wilson and O. L. Bay. In its 2d year it became

The Canton Independent, which united with it, when it was removed to Canton and changed to The Canton Independent.

[1] This place became a French military station and a magazine for supplying expeditions sent by the governors of Canada against the Iroquois. From this point were fitted out many of the parties that ravaged the back settlements of N. Y., Penn., and Va.

[2] The island was called by the Indians "*Onaremendon*," and by the French "*Isle Royal*." It is now called Chimney Island, from the ruins still visible.

[3] Upon the approach of Lord Amherst in 1759, the fort at the mouth of the Oswegatchie was abandoned. The island was invested on the 18th of Aug. Upon it they found the English Indians a number of scalps which so exasperated them that they burned the chapel and houses, the ruins of which are still visible. The batteries opened on the 24, and on the 25th the place, under French, surrendered. The English manned the fort, and called it Fort Augustus. On their voyage down the river from this place to Montreal, the English lost in the rapids 40 batteaux, 47 whale boats, and 84 men. The island was occupied but a short time, and the works soon fell into ruins.—*Knox's Journal; Wade's Hist.; Memoir of Pouchot; Entick's Hist.*

[4] These Indians claimed large tracts of land and leased them to parties from Canada, who, at the most favorable, timbered and committed other wasteful depredations.

[5] The "*Ten Towns*" were sold at auction by the land commissioners in 1787, in quarter sections, except Macomb's, Oswegatchie, which were sold in square miles. In each township a square was reserved for lots for a church and another for the gospel and schools.

[6] The original townships in this tract were named as follows: —1. Sherwood; 2. Oakfield; 3. Matilda; 4. Hollywood; 5. Jamestown; 6. Brierfield; 7. Grindstone; 8. Hollywood; 9. Kildare; 10. Matildaville; 11. Wick; 12. Lawrenceville; 13. Goldsmith; 14. Catharineville; 15. Islington; 16. Chesterfield; 17. Grange; 18. Crumack.

[7] The original townships of this tract were named as follows: —1. Hammond; 2. Somerville; 3. De Witt; 4. Le Ray; 5. Ballyheen; 6. Clare; 7. Killinaa; 8. Edwards; 9. Scarborough; 10. Clifton; 11. Portaferry; 12. Scriba; 13. Chaumont; 14. Bloomfield; 15. Emilyville.

[8] These tracts were conveyed to Dan'l McCormack by patent in 1795–98.

[9] The town of Massena comprises this portion of the co.

[10] The islands were sold in 1823.

[11] A regiment of militia was stationed at Ogdensburgh during the summer of 1812. In July, 1812, a fleet of 6 schooners—caught at Ogdensburgh by the war—attempted to reach the Lake, but were intercepted, 2 were burned, and the rest returned back. On the last day of July the 2 schooners engaged took place between the American schooner, Julia, and the British vessels, Earl of Moira and Duke of Gloucester. In Sept. an attack was made upon a number of Batteaux at Toussaint Island, opposite Lisbon, in which the Americans lost one and the British several men. On the 2d of Oct. the British made a show of attacking Ogdensburgh, and on the 4th made a real attack, but were repulsed with the loss of a gunboat and 2 men killed. In Jan. the Americans surprised and captured Brockville, liberated several prisoners, paroled 300 of the citizens, and took a quantity of stores. On the 22d of Feb. the British, in retaliation, captured Ogdensburgh, carried away the cannon and stores and paroled a large number of citizens, who were afterward exchanged for those of Brockville. Late in 1813 Gen. Wilkinson's expedition passed down the St. Lawrence and suffered a humiliating defeat at Chrysler's Field, opposite Lancaster. The British followed the retreating Americans and entered at Hamilton (Waddington). —*Headley's Hist. St. Lawrence & Franklin Cos.*

[12] The lands in the co. have doubled in value by the completion of the railroads.

War." The battle of Windmill Point, the most memorable event of that ill-conceived [illegible], was fought within sight of Ogdensburgh, in Nov. 1838.[1] The U. S. Court for Dist. of Ogdensburgh was established March 2, 1811, and embraces the whole co. Its court-house is at Ogdensburgh, with subordinate offices at each of the river towns.

BRASHER[2]—was formed from Massena, April 21, 1825. A part of [illegible] was taken off in 1828. It lies on the w. border of the co., N. of the center. Its surface is generally level, with gentle undulations in the w. part. The principal streams are St. [illegible] and Trout Brook. The soil in the w. part is stony and in parts sandy, [illegible] and sandy; and in the N. it is a clay loam and very productive. Bog iron ore is [illegible] in the E. part, in the range where the sand rests upon the clay deposits. **Brasher Falls** (p. v.) is a manufacturing village upon the St. Regis, in the s. w. corner of the town, 1 mi. below the R. The first improvement in town (at Helena) was under the agency of [illegible] Ayer's water, in 1817. Stillman Fuller built the furnace at Brasher Iron Works in 1825. [illegible] settlement at Brasher Falls was made in 1826. In 1829 C. T. Hulburd purchased [illegible] acres, including the village site of Brasher Falls, and in 1841 made the first considerable improvement. On the 26th of May, 1857, a fire in the woods ravaged this town, and destroyed the furnace and nearly the whole village at the "*Iron Works.*"[6] The census reports 6 churches in town.[7]

CANTON[8]—was formed from Lisbon, March 28, 1805. It occupies a nearly central position in the co. Its surface is level or gently undulating. Grass River, flowing through the center, and the Oswegatchie, flowing through the N. W. corner, are the principal streams.[9] It is underlaid by white limestone and gneiss in the S., and by Potsdam sandstone in the central and N. parts. The soil is a deep, fertile, gravelly loam. Iron pyrites, from which copperas (sulphate of iron) has been manufactured, is found in abundance near High Falls, on Grass River.[10] **Canton**, the county seat, is pleasantly situated on Grass River, a little E. of the center of the town. It is an important station on the P. & W. R. R. It has a number of manufactures,[12] and is the seat of the Canton Academy, founded in 1831, and of the St. Lawrence University,[13] an institution founded under the auspices of the Universalist denomination in 1856. Pop. 1,029. **Morley**[14] (p. v.) is on Grass River, near the N. border of the town. P. p. 350. **Rensselaer Falls** (p. v.) is a small village on the Oswegatchie, in the N. W. corner of the town. It was formerly the seat of an iron forge. **Cranys Mills** (p. o.) is a hamlet on the line of Potsdam. **South Canton** is in the E. part. Daniel Harrington settled on the site of the Agricultural Fair Grounds in Canton Village in 1800. The first permanent settler was Stillman Foote, who built a log house square where the village now stands, and removed thither in 1801, accompanied by several men. In 1802 he built a mill, and the town began to be rapidly settled.[16] Religious meetings were held as early as 1804. The first church (Presb.) was formed under the Rev. Amos Pettingill, in 1807.[17]

COLTON[1]—was formed from Parishville, April 12, 1843. A small part was annexed from Parishville in 1851. It is a long, narrow town, lying S. E. of the center of the co. and extending to Hamilton co. on the S. Its surface is broken and hilly; and it is nearly all covered with forest. It is crossed by the Racket, Grass, and Oswegatchie Rivers. In the central and S. parts are numerous small lakes, the principal of which is Cranberry Lake. The extreme N. part only is inhabited. The principal business is lumbering. **Colton** (p. v.) is an important lumber station upon Racket River, near the N. W. corner of the town. Several extensive gang sawmills were erected here in 1850–52; but the business has been partially suspended. An extensive tannery for the manufacture of sole-leather was built here in 1857.[2] Pop. 379. **South Colton** is a p. o. at Three Falls. The first settlement was begun in 1824, at Colton Village.[3] There are a M. E. and a Univ. church in town, both built in 1852.

DE KALB[4]—was formed from Oswegatchie, Feb. 21, 1806. A part of De Peyster was taken off in 1825, and a part of Hermon in 1830. It lies on the Oswegatchie, W. of the center of the co. Its surface consists of broken ridges of white limestone and gneiss with narrow valleys between them. The soil is excellent and is generally under a good state of cultivation. **De Kalb**[5] (p. v. is situated on the Oswegatchie, near the center of the town. Pop. 120. **Richville**[6] (p. v.) is situated on the Oswegatchie, in the S. W. corner of the town. Pop. 250. **East De Kalb** is a p. o. and station on the P. & W. R. R. **Coopers Falls** is a hamlet. The first settlement was made in 1803, under Judge William Cooper, of Cooperstown, as agent. The first settlers were principally from Otsego co. There are 5 churches in town.[7]

DE PEYSTER[8]—was formed from Oswegatchie and De Kalb, March 24, 1825. It lies on the S. shore of Black Lake, N. W. of the center of the co. Its surface is broken in the S. by the parallel primitive ridges, and is level in the N. The principal streams are the Oswegatchie, on the N. border, and Beaver Creek, on the S. Moon Lake lies in the S. part. The soil along the lake is very fertile, in the center of average fertility, and in the S. it is light and sandy. The "*Old State Road*," the first traveled route through this part of the co., extended through this town. **De Peyster Corners** (De Peyster p. o.) is a small village. **Edenton** is a p. o. The first settlement was made in the fall of 1802, by Sam'l Bristol and others.[9] The census reports 2 churches: a M. E. and a Cong.

EDWARDS[10]—was formed from Fowler, April 7, 1827. A part of Hermon was taken off in 1830, and a part was annexed from Hermon in 1850. It lies on the Oswegatchie, S. W. of the center of the co. Its surface consists of ridges of the primitive formation and the narrow valleys between them. The soil is generally a light, sandy loam, and in the valleys is very productive; but the town is best adapted to grazing. A large number of minerals are found among the primitive rocks.[11] **Edwards** (p. v.) is situated on the Oswegatchie. Pop. 350. **South Edwards**[12] (p. v.) contains a grist and saw mill and several mechanic shops. The first settlement commenced along the St. Lawrence Turnpike, in 1812.[13] Several Scotch families came into town in 1817. There are 5 churches in town.[14]

FINE[15]—was formed from Russell and Pierrepont, March 27, 1844. It lies in the extreme S.

[1] Named from Jesse Colton Higley, an early settler. It embraces the townships of "*Stone Arabia*," "*Hillsborough*" or "*Colton*" and "*Middlebush*," or Nos. 1, 4, 7, and 8 of Great Tract No. 11, Macomb's Purchase.

[2] Employment for about 25 men.

[3] Among the first settlers were Asahel Lyman, Abel Brown, Wm. Hall, Hiram Gottrell and Sam'l Bristol. Miss Young taught the first school, in 1826. The first death was that of a child of Jesse Higley, in 1820.

[4] Named from Baron De Kalb. It originally embraced No. 7 of the "*Old Survey*."

[5] Also called "*Westmoreland*."

[6] Among the first settlers in the first year were Solomon Rich, Jona. Haskins, and Sol. Pratt were among the first settlers of Richville. The first child born was Lyndon Brooks; the first marriage that of Linden Cook and Lydia Wright; and the first death that of Lucy Bailey. Bela Willis taught the first school in Richville and Jas. Knoeland at Richville. Wm. Cooper built the first hotel, in 1803, and the first mills, at Coopers Falls, in 1804.

[7] Rep. and Cong. at Richville, Presbs., M. E., and Union (M. E. and Bap.) at East De Kalb.

[8] Named from Frederick De Peyster, of New York, former proprietor. Mr. De Peyster gave the town-house, including a union church and town-house, the bell for which he had to cast, with an appropriate inscription for its use.

[9] Among the first settlers were Thos. Wilson, Joseph Round, Sam'l Barnard, —— Green, Ichabod Arnold, Robt. Hill, Fred. R. Plympton, David Day, Rufus Washburn, and Smith Stillwell. Bela Willis taught the first school and was the first local preacher.

[10] Named from Edward McCormack, brother of the proprietor. It embraces parts of No. 8 of Great Tract and No. 1 of Macomb's Purchase.

[11] Among the specimens found are Rensselaerite, specular iron and tourmaline.

[12] Locally known as "*Scotch Settlement*," from the Scotch settlers who opened the first store in 1815. [illegible] was the seat of justice from [illegible] to 1844.

[13] Among the first settlers were Alex. Peterson, Jas. M. Brewster, S. & E. Jones, and —— Johnson. The first [illegible] were Lucy B. Brayton, in 1812; and the first death was that of —— Partridge, accidentally killed in 1812. Orra Shead built the first grist-mill in 1814. In 1817 a large number of Scotch settlers came in town.

[14] M. E., Univ., Cong., Bap., and Union.

[15] Named from John Fine, of Ogdensburgh, principal pro-

part of the co. Its surface is elevated and broken, and its soil is a moderately fertile, gravelly loam. It is drained by the Oswegatchie and its branches. It is principally a wilderness, the settlements being confined to the N. part. Iron ore is found in town. **Pine** is a p. o. in the N. There is no village in town. The first clearing was made in 1823, by Elias Foall.[1]

FOWLER—was formed from Rossie and Russell, April 15, 1816. The townships of Edwards and Fitz William (now a part of Hermon) were annexed from Russell in 1818. Edwards was taken off in 1827, a part of Hermon in 1829, and Pitcairn in 1836. It lies upon the Oswegatchie, in the southwesterly part of the co. Its surface is much broken by ranges of gneiss. It is drained by the Oswegatchie and its branches. Silver Lake lies S. of the center of the town. The soil along the streams is a fertile loam, in the N. W. a clayey loam, and in the E. a light sand. Several valuable minerals are found in town.[2] **Hailesborough**, on the Oswegatchie, and **Little York**, Fowler p. o.'s, are small villages. **Fullerville** (Fullerville Iron Works p. o.) is the seat of an extensive manufactory of iron.[3] **West Fowler** is a p. o. The first settlements were made by Brig. Gen. Hale, at Hailesborough, in 1807,[4] and by Sam'l B. Sprague, at Little York, in 1811. The town did not begin to be settled rapidly until after 1820. The census reports 4 churches in town.[6]

GOUVERNEUR[7]—was formed from Oswegatchie, April 5, 1817. A part of Macomb was taken off in 1841. It lies in the W. part of the co. Its surface is generally level, but somewhat broken in the N. by low ridges of white limestone. It is drained by the Oswegatchie, which twice flows across the town. The town abounds in interesting minerals.[8] The soil is sandy in a few places, but is chiefly clay and loam, and is highly productive. The Kearney Iron Mine, in the S. corner, has furnished an immense quantity of ore. **Gouverneur** p. v. was incorp. Dec. 7, 1847. Pop. 785. It is the seat of a flourishing academy,[9] and has a considerable local trade and the only p. o. in town. Riverside Cemetery is beautifully located on the opposite bank of the Oswegatchie, E. of the village. It was consecrated June 23, 1858. It is a station upon the P. & W. R. R. The first settlement was made in the summer of 1805, by Dr. Richard Townsend, agent of Gouverneur Morris, the proprietor.[10] The first church (Bap.) was formed in 1810.[11]

HAMMOND[12]—was formed from Rossie and Morristown, March 30, 1827. A part was annexed to Macomb in 1842, and a part to Rossie in 1844. It lies upon the St. Lawrence, in the extreme W. part of the co., and includes a portion of The Thousand Islands. The surface is generally level, but broken upon its N. and S. borders by low primary ridges. A level terrace of sandstone, forming a continuous and regular mural wall, extends from the N. shore of Black Lake through the center of the town into Jefferson co. Black Brook flows through a stagnant swamp, which borders upon this sandstone terrace. Its soil is generally a deep, fertile loam. **Hammond**, (p. v.,) on the Rossie Plank Road; **South Hammond**, on the "Old Military Road;" and **Oak Point**,[13] (p. v.,) a landing on the St. Lawrence, are small villages. **Chippewa** is a hamlet on a Bay of the same name. Slight improvements began here in 1812; but settlements did not increase until 1818–21, when a number of Scotch families located just W. of the present site of Hammond Village.[14] There are 4 churches in town.[15]

HERMON[1]—was formed from Edwards and De Kalb, April 17, 1830, and named "*Depau.*" The name was changed Feb. 28, 1834, and a part was annexed to Edwards in 1850. It lies in the primitive region, s. w. of the center of the co. The surface is generally rolling, but broken and hilly in the s. part. Elm and Cedar Creeks are the principal streams. Trout and Clear Lakes lie near the s. border, and Gardners Pond near the center of the town. The soil is generally a sandy loam interspersed with tracts of sand, and is best adapted to grazing. **Hermon** (p. v.) is situated on Elm Creek, in the N. E. corner of the town. Pop. 346. **Marshville** is a hamlet, 1 mi. s. of Hermon. The first settlement was made by Jas. Taylor, and a few others who came soon after him, previous to 1812.[2] The town did not begin to be settled rapidly until 1822-25. Rev. Mr. Wright was the first preacher.[3]

HOPKINTON[4]—was formed from Massena, March 2, 1805. Russell was taken off in 1807, Parishville in 1818, and a part of Lawrence in 1828. It lies along the E. border of the co., and is the second largest town in the State. Its surface is level in the N., but broken and hilly in the S. It is crossed by the St. Regis and Racket Rivers; and in the central and S. parts are several extensive lakes, the principal of which is Tuppers Lake, on the line of Franklin co. The whole town is a wilderness, except the extreme N. part and a small tract upon Tuppers Lake. The soil is a fertile loam in the N. part. **Hopkinton** (p. v.) contains about 20 houses. **Nicholville** is a small village on the line of Lawrence and mostly in the latter town. **Fort Jackson,** in the N. part, on St. Regis, is a hamlet of a dozen houses. The first settlement in town was made by Roswell Hopkins, in 1802.[5] In 1814 a party of British, consisting of 30 men, under Maj. P. W. De Haven, visited this town and captured a large amount of flour belonging to the U. S., which was here stored in a barn.[6] In the spring of 1858 a company consisting of 13 families located in the vicinity of Tuppers Lake, with the design of forming an agricultural settlement.[7] The township of Mortlake, or No. 3 of Tract II, has been called "*Atherton,*" but it has yet no legal organization. There are 4 religious societies in town.[8]

LAWRENCE[9]—was formed from Hopkinton and Brasher, April 21, 1828. It lies on the E. border of the co., N. of the center. The surface is very level, and the soil is a fertile, sandy loam underlaid by Potsdam sandstone. It is drained by St. Regis and Deer Rivers. **Lawrenceville** (p. v.) and **North Lawrence** (p. v.) are villages upon Deer River, each with a pop. of about 220. The latter is a station on the Northern R. R. **Nicholville,**[10] (p. v.,) on the line of Hopkinton, contains about 200 inhabitants. The first settlement began in 1806.[11] Since the completion of the R. R. this town has rapidly increased in population. The Quakers held the first meeting in 1808. There are 7 churches in town.[12]

LISBON—was formed March 6, 1801.[13] Madrid and Oswegatchie were taken off in 1802, and Canton in 1805. It lies upon the St. Lawrence, N. W. of the center of the co. Its surface is level or gently undulating. It is drained by Great and Little Sucker Creeks, and several smaller streams. Its soil is a light but fertile loam underlaid by calciferous sandstone. The town includes Gallop[14] Island in the river. **Lisbon Center** (p. o.) is a station on the Ogdensburgh R. R., and contains about a dozen houses. **Plackville**[15] (p. o.) is a hamlet, on the Ogdensburgh & Canton Road. **Red Mills**[16] (Lisbon p. o.) is a hamlet, on the river, opposite Gallop Island. This town was the first one organized in the co. The first settlement was made by Wm. O'Neal, in 1799. Alex. J. Turner came in as agent in Feb. 1800.[17] He was from Salem, N. Y., and induced many families

1 Named from Scripture. It embraces "*Fitz William,*" or No. 9 of Great Tract No. III, Macomb's Purchase, and parts of other townships.

2 Among the early settlers were Geo. Davis, Philemon Stuart, Jas. Parr, Asa Hammond, and Richard Hopkins. William D. Moore taught the first school, in 1817. The first death was that of Dea. Parr.

3 There are 3 churches in town, M. E., Bap., and Christian.

4 Named from Roswell Hopkins, the first settler. It embraces the townships of "*Oakfield,*" "*Massena,*" "*Hopkinton,*" "*Piercefield,*" "*Hermon,*" "*Harrisburgh,*" "*Parishville,*" "*Russell,*" "*Edwards,*" and "*Depeyster.*" It is No. 2 of Tract No. 6, 8, 9, 12, and 15 of Great Tract No. II, Macomb's Purchase.

5 Mr. Hopkins bought a part of Islington. Among the early settlers were Joel and Samuel Goodale, R. W. Hopkins, Jared Dewey, and Elizabeth Bradley. The first birth was in the family of ——— Shedden, and the first death, that of an infant, in 1807. Judge Hopkins built the first gristmill, in 1810.

6 There is good reason to believe that on this and other occasions the British received information from a prominent citizen of Plattsburgh.

7 The township was purchased Oct. 22, 1853, by a company consisting of Chas. G. Atherton, John H. Gage, and Daniel H. Bearborn, of Nashua, N. H., Elbridge G. Reed and Wm. D. Pearson, of Chelsea, Mass., and Moses A. Dewick, of Boston, to its lumber. The settlement was made under the auspices of this Company.

LOUISVILLE—was formed from Massena, April 5, 1830. A part of Norfolk was taken off in 1823, and a part of the same town was annexed in 1844. It lies upon the St. Lawrence, in the N. E. part of the co. The surface is level. Grass River, the principal stream, flowing centrally through the town, affords a water-power at the village. The soil is a fertile, sandy loam, underlaid by calciferous sandstone. **Louisville**, (p.o.) on Grass River, and **Louisville Landing**, (p.o.) on the St. Lawrence, are hamlets. The water-power at the latter place has been somewhat improved; and the latter place is a landing for the American line of steamers. The first settlement was made by Nahum Wilson and Aaron Allen, in 1800.[4] The growth of the town was checked by the war; but it soon revived. There are 2 churches in town; M. E. and Union.

MACOMB[5]—was formed from Gouverneur and Morristown, April 5, 1841. A small [illegible] was annexed from Hammond in 1842. It lies upon the S. shore of Black Lake, in the W. part of the co. Its surface is broken by ridges of gneiss and white limestone parallel to the lake. Fish and Bird Creeks are the principal streams. Pleasant and Yellow Water Hockey Lakes are [illegible] of water, with rocky shores, in the central part of the town. The soil is a light, sandy loam. The ridges are often without vegetation, but the valleys are fertile. Several valuable minerals are found in town.[6] **Macomb**, (p.o.) on the "*Old State Road*," and **Popes Mills**, (p.o.) on [illegible], are hamlets. The first settlements were made upon the "*Old State Road*," about 1805–06.[7] Timothy Pope made the first improvement at Popes Mills, in 1816. There is 1 church (M. E.) in town.

MADRID[8]—was formed from Lisbon, March 3, 1802, and Potsdam was taken off in 1[illegible]. It lies upon the St. Lawrence, E. of the center of the co. The surface is level or gently undulating. It is watered by Grass River, and by Great and Little Sucker, Brandy, and Trout Brooks. Upon both the St. Lawrence and Grass Rivers are rapids, from which are derived an immense amount of water-power. The soil is a light, sandy loam, generally fertile. **Waddington**[9] (p.v.) is situated upon the St. Lawrence, opposite Ogdens Island and the "*Rapide Plat*." The rapids at this place impede the river navigation, but furnish an abundance of water-power.[10] The entire fall is 11 ft. Pop. 705. **Columbia Village**, Madrid (p.o.) is situated at the falls of Grass River, [illegible] the R. R. station. It is a place of considerable business. Pop. 500. **Chases Mills** (p.v.) is a settlement, upon Grass River, on the line of Louisville. The first settlement was made along the St. Lawrence, in 1798, under Joseph Edsall, agent of the proprietors.[11] In Jan., 1814, a party of Canadian militia, under Capt. Sherwood, crossed the St. Lawrence at Point Iroquois and [illegible] to Columbia Village, pressed teams, and carried off a quantity of merchandise which had been captured upon bateaux on the preceding Oct. There are 9 churches in town.[12]

MASSENA[13]—was formed March 3, 1802. Hopkinton was taken off in 1806, Stockholm in 1806, Louisville in 1810, and Brasher in 1825. It lies upon the St. Lawrence, in the N. E. corner of the co. The surface is generally level or gently undulating. The principal streams are the Grass[14] and Racket Rivers, which flow through the town in parallel channels 1 to 2 mi. apart. Its soil is a productive, gravelly and sandy loam. **Massena** (p.v.) is situated [illegible] at the Lower falls. It has a limited amount of manufactures. Pop. 540. **Massena Springs**

lies upon the Racket, about one mi. distant from Massena. Pop. 120. It is a favorite summer resort. **Massena Center** (p. v.) contains about 25 houses, and **Racket River** (p. v.) about 20. By the treaty of 1796, a mile square at the mouth of Grass River was reserved by the St. Regis Indians; and most of the other lands in the town were located on Revolutionary land warrants before the sale of the rest of the co. Before the treaty the Indians issued unauthorized leases to different parties; and hence arose much annoyance from conflicting claims.[1] The first improvements were made on Grass River, on land leased of the Indians, in 1792. The first settlements on Revolutionary grants were made in 1798, by Amos Lay and others.[2] In 1812 the U. S. Government erected barracks here, which were occupied 3 months by militia. In Sept. 1813, a party of Canadians burned the barracks and carried away several prisoners. There are 5 churches in town.[3]

MORRISTOWN[4]—was formed from Oswegatchie, March 27, 1821. A part of Hammond was taken off in 1827, and a part of Macomb in 1841. It lies between the lower end of Black Lake and the St. Lawrence. Its surface is gently undulating, rising from either side toward the center. Chippewa Creek, flowing through the center, is the principal stream. The soil is a gravelly loam and generally fertile. **Morristown** (p. v.) is situated upon the St. Lawrence. Pop. 254. **Edwardsville**[5] (p. o.) is a small village on Black Lake, at which point a ferry has been established. **Brier Hill** (p. o.) is a hamlet. David Ford—as agent of Gouverneur Morris, the proprietor—made the first settlement on the site of the village, in 1790.[6] John K. Thurbar and Henry Ellenwood made the first improvement in the vicinity of Edwardsville, in 1810. In 1817–18 several English families located at a place still known as the "English Settlement." There are 7 churches in town.[7]

NORFOLK—was formed from Louisville and Stockholm, April 9, 1823. A part was annexed to Louisville in 1844. Its surface is moderately uneven. Racket River, the principal stream, flows diagonally through near the center of the town, and affords a large amount of water-power, partially improved.[8] The soil is generally fertile, resting upon drift deposits of gravel and marine clay, and all underlaid by calciferous sandstone. The E. part is sandy; and a swamp lies between the Racket and Grass Rivers. **Norfolk** (p. v.) is situated upon Racket River. Pop. about 200. It has manufactories of lumber, shingles, and articles of wood. **Raymondville**[9] (p. o.) is a small village on the Racket, below Norfolk. The first settlement was made by Erastus Hall, in 1809, at Raymondsville.[10] The Racket was formerly navigated, to some extent, as far as this place. There are 4 churches in town.[11]

OSWEGATCHIE[12]—was formed from Lisbon, March 3, 1802. De Kalb was taken off in 1805, Gouverneur in 1810, Morristown in 1821, and a part of De Peyster in 1825. The surface is level or gently undulating. Oswegatchie River, the principal stream, affords water-power at Heuvelton and at Ogdensburgh, which is available most of the year. The soil is a fine quality of gravelly loam, and is under a good state of cultivation. **Ogdensburgh,**[13] (p. v.,) situated upon the St. Lawrence, is one of the largest and most important villages in Northern New York. It is the W. terminus of the Ogdensburgh R. R., and stands at the foot of sloop navigation upon the great lakes and St. Lawrence River, giving to it important commercial advantages. A limited amount of manufacturing is also carried on, chiefly on the W. side of the Oswegatchie. It contains the depôts and buildings of the Ogdensburgh R. R.,—among the finest in the co.,—an academy,[14] a townhall,[15] U. S. customhouse,[16] and an armory.[17] Pop. Jan. 1858, 7,308. **Heuvel-**

[1] Most of the valuable timber was stolen before settlement.

[2] Among the first settlers were Martin Varney, Calvin Parsley, Elias Hutchinson, Hugh Bailey, David Latta, Seth Reed, and Le Grand Hornick. Gilbert Reed taught the first school, in 18[illegible]. Amariah Parmelee was a lawyer of the first bar, under the Indian laws.

[3] 2 Cong., Bap., M. E., and R. C.

[4] Named from Gouverneur Morris, principal proprietor. It originally embraced the township of "*Hague*," or No. 9 of the "*Ten Towns*."

[5] Formerly known as the "*Narrows*." Named from Jonathan S. Edwards, the first postmaster. On early maps it was marked "*Morristown*."

[6] Amariah Smith and Thomas Hill were first settlers on the river, and H. Harrison, Ephraim Story, and Benj. Tubbs on the lake. Smith kept the first inn, and Reed built the first house.

[7] 2 M. E., Presb., Cong., Prot. E., Evang. Luth., and Union.

[8] There is a dam 1 mi. from the R. R. station, near the S. W. corner of the town, another at Norfolk, and another at Raymondville.

[9] Named from Benj. Raymond, the first agent for that township and Potsdam. First named "*Rockton*."

[10] Among the early settlers, who came in the fall of 1810, were Elam Judson, Martin Barney, J. W. Osborn, C. G. Stowell, and Mrs. Brewer. The first death was that of E. Judson, in 1813. The first clearing at Norfolk Village was made by De Ray, in 1811; and the first settlement was begun by Russell Atwater, in 1816.

A furnace was built at the village in 1825, and supplied with [illegible] ore. It was [illegible] in 1834.

[11] M. E., Prot. E., and Presb. at Norfolk, and Presb. at Raymondsville.

[12] Pronounced Oswe-gat'-chie. Named from the river. It embraces most of No. 4 of the "*Ten Towns*."

[13] Named from Samuel Ogden, the first proprietor. Incorporated in 1817. The unsold lands in and about the village were located by David Parish in 1803, the owner of large tracts in the co. He built an extensive watt house and several stores, and laid out a large business, which he was prevented by the war from [illegible].

[14] This academy now [illegible] the upper part of the public educational system of the village. The schools in all grades, and the pupils are advanced according to attainment, from the primary schools to the complete academic course. The academy receives the income from the ferry at this place. In 1857 there were 7 school-houses and 18 teachers. The average number of pupils on the rolls was 1328, and average daily attendance [illegible].

[15] By special act of 1858 a town hall was erected at an expense of $30,000, on the corner of Washington and Franklin Sts.

[16] The corner-stone of the old French Mission house is placed over one of its entrances.

[17] An appropriation of $110,000 was made in 1857 for erecting a custom-house, post-office, and U. S. court-room. It is to be erected on the site of the old court-house, corner of State and Knox Sts.

ton[1] (p.v.) lies upon the Oswegatchie, 7 mi. above Ogdensburgh. It has a number of manufactories. Pop. 699. **Black Lake** is a post-office in the s.w. part of the town. The growth of the town has already been noticed.[2] The first improvement, after Ogdensburgh was abandoned by the British, was made in 1796, by Nathan [illegible] and [illegible] commercial importance. The war checked the prosperity of the place, and after the return of peace business revived slowly. The opening of the Welland Canal and completion of the Ogdensburgh R. R. greatly increased the trade and added to the population of Ogdensburgh.[4] The completion of the Grand Trunk Railway through Canada has in some measure diverted [illegible] ing business into other channels. The first religious meetings were held while it was a French, and afterward a British, post. The census reports 11 churches.[5]

PARISHVILLE[6]—was formed from Hopkinton, April 15, 1818. [illegible] 1843, and another part of Parishville annexed to it in 1851. It lies upon St. Regis River, S. E. of the center of the co. Its surface is level in the N. and considerably broken in the S. The soil is a deep loam in the N., but in the S. is light and sandy. A large portion of the town is yet a wilderness. **Parishville** (p.v.) is situated upon the W. branch of St. Regis River. Pop. 236. It has a limited amount of manufactures.[7] **Parishville Center,** in the N. part, is a hamlet. Daniel Hoard settled in 1810, as agent for the proprietors.[8] During the war the settlement was greatly increased by immigrants from the frontier towns. The census reports 4 churches.[9]

PIERREPONT[10]—was formed from Russell, April 15, 1818. A part [illegible] off in 1844. It occupies a long, narrow strip S. of the center of the co. The surface is quite broken. The three branches of Grass River, E. branch of the Oswegatchie, and Racket River are the principal streams. The soil in the N. is well adapted to grazing, and that in the S. is light and sandy. Settlements are confined to the N. part. Magnetic iron ore and other valuable minerals are found in large quantities. **Pierrepont** [illegible] a small village upon the [illegible] of No. 3. **East Pierrepont**[11] (p.v.) is situated on Racket River. Pop. about 100. Flavius Curtis settled upon the line of Canton in 1806–07. The principal settlement commenced upon the completion of the St. Lawrence Turnpike, in 1811–12.[12] There are 2 churches; M. E. and F. W. Bap.

PITCAIRN[13]—was formed from Fowler, March 29, 1836. It lies on the S. border of the co., W. of the center. Its surface is much broken by ridges, separated by swamps, lakes, and fertile intervales. The soil is light and sandy, with a few alluvial flats along the streams. Iron ore, marble, and lead are found in town. The Jay Iron Ore Bed has been worked; and unprofitable attempts have been made to work some lead mines. The town is thinly settled. **Pitcairn** and **East Pitcairn** are p.offices. Settlement was begun in 1824 by immigrants from [illegible].[14] There is no church in town.

POTSDAM[15]—was formed from Madrid, Feb. 21, 1806. It lies on Racket River, N. E. of the center of the co. Its surface is rolling; and its soil is a deep, rich loam. The streams are Racket River, affording a large amount of water-power, and Grass River, with a limited amount. Lumber and articles of wood are largely manufactured. There are extensive quarries of sandstone above the village.[16] This is the leading agricultural town in the co., and every part is under improvement. **Potsdam**[17] (p. v.) is located upon Racket River, E. of the center of the town. The river is here divided by islands and broken by rapids, and furnishes an extensive water-power. Pop. in 1st and 4th election districts, 2,123. It has a considerable amount of manufactures, and

is the seat of an academy.[1] It also contains a bank and 2 printing offices. **Racketville** (North Potsdam p. o.) lies on Racket River, in the N. corner of the town. Pop. about 150. It has an extensive water-power, and is the Potsdam Junction station on the Ogdensburgh R. R. **Bucks Bridge**[2] is a hamlet upon Grass River, in the W. part of the town. **West Potsdam** (p. o.) is a small village in the midst of an agricultural region. The first settlement commenced in 1803, under Benj. Raymond, agent for the proprietor, and the town rapidly filled up by immigrants from Vt.[3] In Nov. 1804, Wm. Bullard took up 2,427 acres of land, and formed an association, styled "*The Union*," holding the land in common. The association broke up in 2 or 3 years.[4] There are 10 churches in town.[5]

ROSSIE[6]—was formed from Russell, Jan. 27, 1813. A part of Fowler was taken off in 1816, and a part of Hammond in 1827. A part of Hammond was annexed in 1844. It lies on the S. W. border of the co. Its surface is level in the E., and broken by ledges of gneiss, limestone, and sandstone in the remaining parts. It is drained by Oswegatchie and Indian Rivers. Its soil is like that of the adjoining towns. Between the gneiss and limestone, near Indian River, are extensive and valuable mines of lead and iron,[7] and a great variety of valuable minerals.[8] **Rossie** (p. v.) is situated on Indian River, at the head of the Black Lake navigation. Pop. 244. It owes its importance to its iron manufacture, commenced here in 1813. **Churchs Mills,**[9] (Wegatchie p. o.) situated on the Oswegatchie, is the seat of a furnace. Pop. about 170. **Somerville** (p. v.) contains 20 houses. **Shingle Creek** is a p. o., in the S. E. corner. The first settlement was made in 1807.[10] A number of Scotch families came in about 1810. A blockhouse was built near Somerville in 1812. There are 2 churches in town; Univ. and M. E.

RUSSELL[11]—was formed from Hopkinton, March 27, 1807. Rossie was taken off in 1813, a part of Fowler in 1816, Pierrepont in 1818, and a part of Fine in 1844. It lies upon Grass River, S. of the center of the co. Its surface is much broken, and its S. part is still a wilderness. Its soil is light and sandy, but fertile in the valleys. **Russell** (p. o.) is a small village, upon Grass River, in the central part of the town; **North Russell** is a p. o. The first settlement was made in 1804, under the agency of R. Atwater.[12] A State arsenal was built in the village in 1809,[13] and the St. Lawrence Turnpike was opened the same year. The principal growth of the village was received in 1811 and 1812. A forge was built in 1846, and supplied with bog and magnetic ores. There are 2 churches in town; Bap. and M. E.: the Presb. and Prot. E. each have societies formed.

STOCKHOLM[14]—was formed from Massena, Feb. 21, 1806. A part of Norfolk was taken off in 1823. It lies in the northeasterly part of the co. Its surface is rolling. Its soil is a light, sandy loam, generally productive. It is watered by the two branches of St. Regis River. It is strictly an agricultural town, and one of the most wealthy in the co. **Stockholm Depot** (p. o.) is a small village upon the R. R., in the E. part of the town. **East Stockholm** (Stockholm p. o.) and **Sandfordville** are hamlets of a dozen houses each. **West Stockholm** (p. o.) is a small manufacturing village upon St. Regis River. **Knapps Station** (North Stockholm p. o.) is a R. R. station on the N. W. border of the town; and **Southville** is a p. o. **Skinnerville** is a hamlet on the W. branch of the St. Regis. The first settlement was begun in 1802, by Ebenezer Hulburd and Dr. Luman Pettibone, agents.[15] The census reports 5 churches.[16]

[1] The St. Lawrence Academy was commenced, through the exertions of Benj. Raymond, in 1812. It has long maintained a high reputation, and is the oldest [illegible] Northern New York.

[5] Union, named from the Association. Named from Asst. Pastor David Parish, the proprietor. It embraces "Somerville." 1 No. 1 of Great Tract No. III. Macomb's Purchase.

[6] The first lead mining operations in this town were unskilfully [illegible] and resulted with much trouble, which led to their abandonment. After 20 years' suspension the mines were re-opened by the Rossie Lead Company. The Rossie & Genesee Lead Company [illegible] and [illegible] upon a lease of 20 years from June 1, 1856; and they are said to have been successful. The Caledonian and Keene Iron Mines, near the R. R., owned by Parish, have yielded an immense quantity of ore which has recently been worked at Rossie Iron Works.

[7] Among these minerals are marble, graphite, heavy spar, phosphate of lime, copper pyrites, calcite, pearl spar, apatite, zircon, tremolite, adularia, celestine, carbonate of iron, chondrodite, and spinelle.

[8] Formerly called "*Oxbridge*," and "*Hounds Mills*," from Jas. Hound, former proprietor.

[9] Among the first settlers were Jos. Teall, Reuben Stevens, A. Simmons, O. Mattocks, A. Kenney, [illegible] Bailey, S. Wood, and J. Stevens. The first child born was Wm. Rossie Williams. Reuben Stevens built the first mill.

[10] Named from Russell Atwater, first settler.

[11] Among the early settlers were Nathan, Loren, and David Rice, Hezekiah Morgan, Elias Hayden, Reuben Ashman, Jesse Emmell, Elihu Morgan, and Joel Clarke, who came in 1805. The first child born was a son of Reuben Ashman, in 1806; the first marriage, that of Calvin Hill and Harriet Knox; and the first death, that of —— Curtis. Reuben Smith taught the first school, and Atwater built the first mills.

[12] Sold for a school building, in 1850.

[13] It originally comprised No. 2 of the "*Ten Farms*," and is nearly 1 mile sq.

[14] Among the early settlers were Benj. Wright, Isaac Ivison, Abram, Sheldon and John and Ruth Easton. Mrs. R. Sheldon was the first woman who came into town.

[15] 2 Cong., M. E., Bap., W. Meth.; the Christians and F. W. Bap. have also societies in town.

SARATOGA COUNTY.

THIS county[1] was formed from Albany, Feb. 7, 1791. It lies in the N. angle formed by the junction of the Hudson and Mohawk Rivers, centrally distant 31 miles from Albany, and contains 862 sq. mi. Its surface is hilly or undulating in the S. and mountainous in the N. Two ranges of mountains traverse the co. from N.E. to S.W. The Palmertown or Luzerne Mts., the most eastern of these ranges, extend from Warren co., through the W. part of Moreau and Milton and the E. part of Corinth, into Greenfield, where they terminate in a series of low, irregular hills. Hudson River breaks through this range on the N. border of the co. in a deep ravine 3 mi. in extent. The mountains rise abruptly from the water's edge to a height of 800 feet. Their declivities are generally rocky and precipitous, and their summits spread out into a broad, rocky upland covered with forests. The Kayaderosseras Range extend through the N. part of the co. and occupy the greater part of Corinth, Edinburgh, Day, and Hadley. The declivities of these mountains are generally precipitous, and their summits spread out into broad, rocky uplands broken by ledges and craggy peaks. A group of isolated hills, 450 feet high, with rounded summits and terraced declivities, extend through the W. part of Stillwater and Saratoga. A broad intervale extends along the Hudson, bordered by a range of clay bluffs 40 to 200 feet in height. From the summits of these bluffs an extensive sand plain extends westward to the foot of the mountains, covering the greater part of Moreau, Wilton, Northumberland, Saratoga Springs, Malta, and Clifton Park. The S.W. portion of the co. is rolling or moderately hilly.

Hudson River flows nearly 70 mi. along the E. border of the co. It is interrupted by falls and is crossed by several dams and bridges.[2] The Mohawk forms a portion of the S. boundary. The Sacondaga, forming the outlet of the principal lakes in the S. part of Hamilton co., flows in a tortuous channel through Edinburgh, Day, and Hadley. It is navigable for boats and steamboats of light draught from Fish House, on the border of Fulton co., to Conklingville Falls, in Hadley, a distance of 20 mi. Below the falls it flows between high, rocky hills in a series of rapids to the Hudson. Kayaderosseras River drains the central part of the co. and flows into Saratoga Lake. The outlet of the lake takes the name of Fish Creek. The other principal streams are Snook Kil, Anthonys Kil, and Glowegee Creek. Saratoga Lake is a beautiful sheet of water, 6½ mi. long and 2 broad, situated about 4 mi. S.E. of Saratoga Springs. Ballston, Round, and Owl Lakes are small sheets of water in the S. part of the co. Among the mountains and forests in the N. are numerous other small lakes but little known.

The Kayaderosseras and Luzerne Mts. are both principally composed of primary rocks. A stratum of crystalline limestone extends along the foot of the mountains; and this is succeeded by Potsdam sandstone. In these formations iron ore has been obtained; but the beds have been imperfectly explored.[3] The rocks in the S. half of the co. belong to the shales and slates of the Hudson River group. A large part of the co. is covered with drift deposits, consisting of sand and clay. The soil among the mountains is a light, sandy or gravelly loam, and is best adapted to grazing; upon the intervales along the rivers it is a deep, fertile, clayey loam and alluvium; and in the S.W. part it is a heavy, clayey loam. A strip of light sand occupies the greater part of the two eastern tiers of towns. The people are chiefly engaged in grain and stock raising. Lumbering and tanning are extensively carried on in the N. part of the co. Considerable attention is also paid to the manufacture of cotton and woolen goods and paper.[4]

The county seat is located at the village of Ballston Spa, in the town of Milton.[5] The courthouse, a

The county poorhouse is situated [illegible] mi. s. w. of Ballston Spa. The average number of inmates is about [illegible], and the institution has an annual revenue of $4,000.[1]

The Champlain Canal extends along the Hudson from Waterford to the s. border of Northumberland, at which point it crosses the river into Washington co.[2] The Saratoga & Schenectady R. R. extends from Saratoga Springs through Milton, Ballston, and Charlton Post to Schenectady.[3] The Saratoga & Whitehall R. R. extends from Saratoga Springs to [illegible] Northumberland to Moreau, where it crosses the Hudson to Fort Edward. The Rensselaer & Saratoga R. R. crosses the Mohawk at Waterford, and passes through [illegible], Clifton Park, Malta, and Ballston to Ballston Spa. The Albany, Vermont & Canada R. R., crossing the Mohawk at Cohoes, intersects the R. & S. R. R. at Saratoga Junction and crosses the Hudson at Deepikill into Rensselaer co. The Lake Ontario & Hudson River R. R.[4] has been laid out and partly worked from Saratoga Springs through Greenfield, Corinth, and Hadley.

Eight weekly and 4 daily papers are published in the co.[5]

The greater part of this co. is embraced within the "Half Moon," "Clifton Park" or "Shannondhoi," "Saratoga," "Appel," and "Kayaderosseras" or "Queensborough" Patents. The last-named patent includes the greater part of the co. The purchase of the tract was confirmed by the Mohawks, July 26, 1683. The bounds were so loosely defined that disputes arose between the

proprietors and the owners of the Schenectady, Clifton Park, and Half Moon Patents, which were not settled until after the Revolution.

The first settlements in the co. were made by the Dutch, within a few years after their first colonization of the country about Albany. These settlements commenced near Waterford, on the Mohawk, and gradually extended up the valley of the Hudson. Lying in the great thoroughfare between the English settlements at Albany and the French posts on Lake Champlain, the continual passing of military parties checked the progress of settlement and exposed the few hardy pioneers to all the dangers and anxieties of border warfare. Immediately after the conquest of Canada, in 1760, settlements rapidly extended along the river valleys and to some distance into the interior. During the Revolution, some of the most important events of the war transpired within the limits of this co. Upon the approach of Burgoyne in 1777, Gen. Schuyler retreated from Fort Edward and made a stand first at Saratoga, then at Stillwater, and finally at the mouths of the Mohawk.[1] This last stand he considered the best position for checking the advance of the enemy, which he was expecting both from the N. and W. The inhabitants of the co. above fled in consternation to Albany, leaving their homes and fields of grain to be destroyed by the advancing foe. The islands at the mouth of the Mohawk were fortified about the 1st of August, and Burgoyne took possession of Fort Edward at nearly the same time. While the armies lay in this position, two events took place which served greatly to embarrass Burgoyne and to render sure his final defeat. The first of these was the defeat of Baum at Bennington, and the second the retreat of St. Leger from the siege of Fort Schuyler.[2]

The American army in the mean time, under Gen. Gates, who had superseded Gen. Schuyler, advanced toward the enemy, and about the 1st of September took possession of and fortified the high bluffs known as Bemis Heights, upon the river, in the N. part of Stillwater.[3] Greatly perplexed and embarrassed, Burgoyne finally concluded to continue his march toward Albany. On the 14th of September he crossed the Hudson, above the mouth of the Batten Kil, into the N. part of Saratoga, and continued his march southward. On the 19th the first battle of Stillwater was fought, in front of the American intrenchments at Bemis Heights. The American loss was 315 and the British 500, the former returning to their camp and the latter retaining possession of the battle field. On the 7th of October another severe battle was fought, in which the British lost 700 and the Americans 150. During the succeeding night the British abandoned their camp and retreated northward, and finally took position upon the heights of Saratoga, just W. of the present village of Schuylerville. Here Burgoyne found himself completely hemmed in. A victorious and hourly increasing army was in front; a strong detachment was posted on the R. bank of the river to prevent his crossing that stream; Fort Edward, in his rear, had been taken by the Americans; his bravest officers had fallen in battle; Lord Howe had failed to afford the promised support from New York;[4] and his army was reduced to the last extremity for want of provisions. Under these circumstances, the British commander reluctantly yielded to an imperative necessity, and on the 17th of October signed articles of capitulation. On the 17th the whole British army laid down their arms and were marched eastward to Mass.[5] The close of this campaign left the co. stripped of nearly every evidence of civilized occupation. The fear of continued Indian hostilities prevented the immediate re-occupation of the abandoned lands; but after the close of the war settlements rapidly spread. Since this period few incidents of general interest have occurred, and the history is but the record of the everyday events connected with the conversion of a wilderness into fruitful fields and happy homes.

In 1770, Rev. Eliphalet Ball, with his three sons John, Stephen, and Flamen, and several members of his congregation, removed from Bedford, N. Y., and settled in the vicinity of Academy Hill.[3] Soon after their arrival a large number of settlers came in from New England, N. J., Scotland, and the north of Ireland.[4] The settlements in this town were twice invaded during the Revolution, and several of the inhabitants were carried away prisoners to Canada.[5] The first church (Presb.) was organized Oct. 6, 1792.[6] There are 6 churches in town.

CHARLTON—was formed from Ballston, March 17, 1792. It is the s. w. corner town of the co. Its surface is undulating, with a gentle inclination toward the s. Its streams are the Aalplaats[7] and a branch of the Mourning Kil. The soil is an excellent quality of sandy, gravelly, and clayey loam. Ledges of limestone in the w. part, affording an excellent quality of building stone, are extensively quarried. **Charlton,** (p. v.,) in the s. E. part, contains 3 churches and 38 houses; **West Charlton** (p. v.) contains about 20 houses. The commissioners appointed to divide the Kayaderosseras Patent appropriated 5,000 acres in the s. part of this town to defray the expenses of the division. The first settlement was commenced in 1774, by Thos. Sweetman, who located in the E. part of the town.[8] The first church (Presb.) was incorp. Dec. 11, 1792; Rev. Wm. Schenck was the first pastor.[9]

CLIFTON PARK—was formed from Half Moon, March 3, 1828, as "Clifton," [illegible] was changed March 31, 1829. The surface is level or undulating, except in the N. E., where it is broken by sand hills and ravines. A line of rugged clay bluffs borders upon the Mohawk Valley. Stony Creek, Swarte and Dwaas Kils are the principal streams. A belt of heavy clay and gravelly loam extends along the river above the bluffs. The soil is alluvial upon the Mohawk flats and a sandy loam in the central and N. parts. **Clifton Park,** (p. v.,) on the border of Half Moon, contains 2 churches and 22 houses; **Amity,** (Visschers Ferry p. o.,) a canal village in the s. part, contains 1 church and 45 houses; **Jonesville,** (p. v.,) in the N. part, 1 church, the Jonesville Academy,[10] and 30 houses; and **Rexfords Flats,**[11] (p. v.,) a canal village in the s. w. corner of the town, 25 houses. **Grooms Corners,** [illegible] in the [illegible] w., **Dry Dock,** [illegible] E., and **Forts Ferry,** on the Mohawk, are hamlets. Part of this town was included in the "Clifton Park" or "Shannondhoi" Patent, granted Sept. 23, 1708.[12] Settlements were made in the

CORINTH—was formed from Hadley, April 20, 1818. A part of Moreau was annexed Jan. 28, 1848. It lies upon the Hudson, in the S.E. part of the co. The Kayaderosseras Mt. Range occupies the central and S. parts, and the Palmertown Mts. the S.E. corner. The declivities of these mountains are steep, rough, and broken, and their summits are rocky and mostly covered with forests. A valley 4 mi. wide separates the two ranges. The principal streams are the Hudson, forming the S.E. border, and Cole Brook, flowing along the S. foot of the mountains. The Great Falls, in the Hudson, are on the border of this town.[2] Among the mountains in the S. part are several fine lakes, the principal of which are Efnor, Hunt, Jenny, and Black Lakes. The soil is a sandy and clayey loam. Lumbering is extensively carried on, the Hudson River and small streams from the hills furnishing an abundance of water-power. **Jessups Landing,** (Corinth p.o.,) on the Hudson, contains 3 churches and 88 dwellings; and **South Corinth** (p.v.) 1 church and 30 dwellings. The first settlement was made near S. Corinth, in 1790, by Fred. Parkman, Washington Chapman, Jeremiah Eddy, Jephtha Clark, and Jonathan Dewel.[3] The first church (Bap.) was organized June 1, 1822.[4]

DAY—was formed from Edinburgh and Hadley, as "*Concord*," April 17, 1819. Its name was changed Dec. 3, 1827. It is the N.W. corner town of the co. Its surface is principally occupied by several spurs of the Kayaderosseras Mts. Oak and Bald Mts., the principal peaks, near the center of the town are 900 feet above the river. The whole mountain region is wild, rugged, and rocky, and scarcely susceptible of cultivation. The Sacondaga River flows in a narrow valley through the S. part. Its course is tortuous, and it is navigable through the town. Paul, Glass House, and Allens Creeks are the other principal streams. Livingston, Sand, and Mud Lakes are small bodies of water in the N. part. The soil is a moderately fertile, sandy and clayey loam. Lumbering is extensively carried on. **Huntsville** (West Day p.o.) is a hamlet in the S.W. part. **Day** is a p.o. The first permanent settlers were Phineas Austin, James Thomas, and Dyer Perry, and families named Clay and Bond. The first religious meetings were held in the barn of Peter Van Vleck, in 1801-02. The first church (Bap.) was formed in 1809. The census reports 2 churches: Christian and Ref. Prot. D.

EDINBURGH—was formed from Providence, March 13, 1801, as "*Northfield*," and its name was changed April 6, 1808. A part of Day was taken off in 1819. It lies upon the W. border of the co., N. of the center. Its surface is principally occupied by two high mountain ridges separated by the valley of the Sacondaga River. The mountain regions are rocky and broken, with a thin, sandy or gravelly soil, and are covered with forests. Beechers Creek is a small mill stream W. of the river. The soil on the river flats is a good quality of clayey and gravelly loam. Lumbering is the chief occupation of the people. **Batchelerville,** (p.v.,) on the E. bank of the Sacondaga, contains 30 houses; and **Beechers Hollow,** (Edinburgh p.o.,) on the W. side of the river, 12. The first settlers came in about 1790 and located in the valley below "Fish House."[5] The first church (Bap.) was organized in 1798, by Rev. Mr. Munroe, from Galway.[6] Traces of an ancient Indian burial place are visible on the S. bank of the Sacondaga, near the border of Day.[7]

GALWAY[8]—was formed from Ballston, March 7, 1792. Providence was taken off in 1796. It lies on the W. border of the co., S. of the center. Its N. half is occupied by a group of rounded hills forming the southern continuation of the Kayaderosseras Mts. The surface of the S. half is gently undulating. The principal streams are head branches of Feegowesee and Calderwood Creeks and the Mourning Kil. The soil is generally a heavy clay, intermixed in places with sand and gravel. **Galway,** (p.v.,) near the center of the town, was incorp. April 18, 1838. It contains 3 churches, a female seminary,[9] and about 45 houses: **West Galway,** (p.v.,) on the border of Fulton co., contains 1 church and 20 houses. **Yorks Corners,** (E. Galway p.o.,) in the N.E.

HADLEY—was formed from Greenfield and Northumberland, Feb. 27, 1801. Its boundaries were amended Feb. 28, 1808. Corinth was taken off in 1818, and a part of Day in 1819. It lies upon the Hudson, in the N. E. corner of the co. A large share of its surface is occupied by the peaks and ridges of the Kayaderosseras Mts. Mt. Anthony is an isolated peak in the S. E. part.[6] Sacondaga River flows through the S. part. Its valley is narrow; and below Conklingville its current is rapid and frequently interrupted by falls. The soil generally is a coarse, yellowish, unproductive sand and gravel. Lumbering and tanning are extensively carried on. **Conklingville,** (West Hadley p.o.,) on the Sacondaga, in the W. part of the town, contains 1 church, a large tannery,[7] and 39 houses. **Hadley** (p.o.) is a hamlet at the junction of Sacondaga and Hudson Rivers. Richard Hilton commenced the first settlement, just after the close of the Revolution, on the Hudson.[8] The census reports 2 churches in town; a F. W. Bap. and a Wes. Meth.

HALF MOON[9]—was formed as a district, March 24, 1772, and as a town, March 7, 17[illegible]. Its name was changed to "*Orange*" April 17, 1816, and the original name was restored Jan. 16, 1820. Waterford was taken off in 1816, and Clifton Park in 1828. Its surface is undulating and broken by the narrow ravines of small streams. Hudson River forms the E. boundary, and the Mohawk a portion of the S. The river intervales are about ½ mi. wide, and are bordered by a line of steep, clay bluffs 60 to 100 feet high. The other streams are Anthonys, Dwaas, and Steena Kils. The soil is a clayey and gravelly loam upland, and a fine quality of alluvium in the intervales. **Crescent**[10] (p.v.) is a canal village near the center of the S. border of the town. Pop. 593. **Middletown,** Half Moon p.o., 1½ mi. E. of Crescent, has a pop. of 240. **Mechanicsville,** (p.v.,) at the mouth of Anthonys Kil, lies mostly in Stillwater. Pop. in Half Moon, 495. **Clifton Park** (p.v.) is on the W. line. **Newtown, Smithtown,** [illegible]; **Grays Corners** are hamlets. The first settlements are supposed to have been made between 1680 and '90, by Germans, on the Mohawk Flats.[11] The first church (Ref. Prot. D.) was organized in 1800.[12]

MALTA—was formed from Stillwater, March 3, 1802, and a part of Saratoga was annexed March 28, 1805. It lies upon the w. bank of Saratoga Lake, S. E. of the center of the co. Its surface is chiefly an undulating upland, 60 to 80 feet above Saratoga Lake, and broken by the deep gulleys of small streams. The streams are Kayaderosseras Creek, forming the N. boundary, Ballston Outlet Creek, an inlet, and Anthonys Kil, the outlet of Round Lake, and Drummonds Brook, flowing into Saratoga Lake. Round Lake, in the S. E., is nearly circular, and 1 mi. in diameter. A swampy region covering an area of several hundred acres lies in the N. E. part of the town, at the mouth of the Kayaderosseras. The soil is principally a light, sandy loam, with clay and muck in the lowlands. **Dunning Street,** (Malta p. o.,) near the center of the town, contains 1 church and 17 houses. **Maltaville,** (p. o.,) in the S. part, **Malta Ridge,** in the N. and **Halls Corners,** are hamlets. The first settlers were two men named Drummond and McKelpin, who came before the Revolution and located W. of the lake.[1] The census reports 5 churches in town.[2]

MILTON—was formed from Ballston, March 7, 1792, and a part of Greenfield was taken off in 1793. It lies a little S. of the center of the co. Its surface is moderately hilly in the N., and undulating in the S., with a slight inclination toward Kayaderosseras Creek, which flows S. E. through the center of the town. This stream has a rapid fall and furnishes a valuable water-power. Glowegee Creek, from the W., is its principal tributary. In the N. part are limestone ridges, extensively quarried for building stone and lime. The Saratoga mineral spring region extends through the S. E. part. The soil is generally a sandy loam. **Ballston Spa,** (Ballston p. o.,) the co. seat, was incorp. March 21, 1807. It is situated on Kayaderosseras Creek, in the S. E. corner of the town. It contains the co. buildings, 2 seminaries,[3] 5 churches, 2 printing offices, and several manufacturing establishments.[4] Pop. 2,285, of which 1,941 are in this town. This village has long been celebrated for its mineral springs.[5] **Rock City Mills** (p. v.) contains 3 paper mills and 34 houses; **West Milton** (p. v.) a church, a paper mill, a shingle mill, a hoe factory, and 40 houses; **Bloodville** a scythe, edge tool, and knitting factories, and 40 houses; and **Factory Village** 2 paper mills and 22 houses. **Milton Center** and **Cranes Village** are hamlets. The first settlement in town was made by David Wood and his sons Stephen, Benj., Elijah, Nathan, and Enoch, who purchased 600 acres and moved into town before the Revolution.[6] The first church (Bap.) was organized Jan. 22, 1793.[7]

MOREAU[8]—was taken from Northumberland, March 28, 1805. A part was annexed to Corinth in 1848. It lies in the great bend of the Hudson, in the N. E. corner of the co. The W. part of the town is occupied by the rocky and precipitous peaks of the Palmertown Mt. Range. The central and E. portions are undulating and broken by the narrow ravines of small streams. The Hudson River forms the N., the E., and a part of the W. boundary of the town. Upon its course are numerous rapids and waterfalls.[9] The Snook Kil and its tributaries drain the S. part of the town. The soil is generally a light, yellow, sandy loam, but in the S. and W. are tracts of clay and gravel. **South Glens Falls,** (p. v.,) on the Hudson, opposite Glens Falls, contains several manufacturing establishments:[10] pop. 513. **Fortsville,** (p. v.,) in the central part, contains 25 houses. **Clarks Corners, Reynolds Corners,** and **State Dam** are hamlets. **Moreau Station** is a p. o., situated on the R. & W. R. R. Settlements are said to have been made before the Revolution; but their history is only a vague tradition.[11] The first church (Bap.) was built in 1795.[12]

NORTHUMBERLAND—was formed from Saratoga, March 16, 1798. A part of Hartford was taken off in 1801, Moreau in 1805, and Wilton in 1818. It lies near the Hudson, N. of the center of the co. Its surface is level or undulating and broken by deep ravines. A line of clay and slate bluffs, 30 to 100 feet high, extends along the river. Snook Kil and its tributary, Bacon Dam Creek, are the principal streams. The soil is generally a light, sandy loam. This town shares with Fort Edward the Fort Miller Falls.[1] **Gansevoort,** (p.v.) on Snook Kil, in the N. part of the town, contains 2 churches and a pop. of 162. It is a station on the S. & W. R. R. **Bacon Hill** (p.o.) and **Northumberland,** (p.o.)[2] in the S.E. part of the town, are hamlets. Fort Miller was built in this town in 1755, under the direction of Col. Miller. It was located upon the flat, above the rapids, and was enclosed on three sides by the river. A blockhouse was built on the heights that commanded the position on the W. The first settlers probably came in before the Revolution. Among them was a man named Munroe,[3] who built the first sawmill, at Gansevoort.[5] There are 4 churches in town.[6]

PROVIDENCE—was formed from Galway, Feb. 5, 1796, and Edinburgh was taken off in 1801. It lies near the center of the W. border of the co. Its surface is mountainous in the N. E. and broken and hilly in the S. W. The high regions along the N. and E. borders are mostly covered with forests. Hagadorns, Hans, Cadmans, and Frenchmans Creeks, small mill streams rising in the mountains and flowing S. W. into Fulton co., are the principal watercourses. The soil is chiefly a coarse, yellow sand or gravel of poor quality. Large tracts are stony and rocky. Wooden ware, leather, and lumber are extensively manufactured. **Barkersville** (p.o.) and **Hagadorns Hollow** are hamlets. **Providence** and **W. Providence** are p. offices. The first settlement was made previous to the Revolution, but the settlers were driven off during the war. Among the first settlers after the war were Nathaniel Wells and Seth Kellogg.[7] There are 3 churches in town; Bap., Christian, and M. E.

SARATOGA[8]—was formed as a district, March 24, 1772, and as a town, March 7, 1788. Easton (Washington co.) was taken off in 1789, a part of Greenfield in 1793, Northumberland in 1798, a part of Malta in 1802, and Saratoga Springs in 1819. It lies upon the Hudson, near the center of the E. border of the co. A range of high, rounded, and sometimes terraced hills extends N. and S. through the central and W. parts. These hills rise 150 feet above the Hudson and slope in every direction. Narrow alluvial flats bordered by high clay bluffs extend along the Hudson. Saratoga Lake forms a portion of the W. boundary. Fish Creek, the outlet of the lake, flowing through the N. part of the town, is the principal stream; and upon it are several fine mill sites. The other streams are small brooks. The soil N. of Fish Creek is light and sandy, and in the remaining parts of the town it is a gravelly and clayey loam. Three mineral springs, known as "Quaker Springs," issue from the Hudson River slate, in a ravine a little S. E. of the center of the town.[9] **Schuylerville,**[10] (p.v.) incorp. April 16, 1831, is situated on the river, at the mouth of Fish Creek. It contains 4 churches, the Schuylerville Academy, a newspaper office, a bank, cotton factory, and foundery; pop. 1,184. **Victory Mills,** (p.v.) situated on Fish Creek, contains 1 church, a machine shop, and an extensive cotton factory;[11] pop. 729. **Quaker Springs,** (p.v.) near the center of the town, contains 1 church and 22 houses. **Grangerville,** (p.o.) on Fish Creek, is a hamlet. **Deans Corners** (p.o.) and **Coveville** are hamlets. Settlement was begun in the early part of the last century, upon the Hudson.[12] The first church (Ref. Prot. D.) was formed before the Revolution.[13] The census reports 7 churches in town.[14]

SARATOGA SPRINGS was formed from Saratoga, April 9, 1819. It occupies a nearly central position in the co. Its surface is rolling or moderately hilly. Kayaderosseras Creek

[2] Named from Col. Peter Gansevoort, who located here soon after the Revolution.

[3] Samuel Munroe, Deputy Paymaster General, 1754–1759, and Commissary of Stores and Provisions, 1759–1760. He was a native of Boston, Mass., and died in Saratoga co., Aug. 4, 1811, aged 87 years.

[4] Munroe was a Tory, and fled to Canada, and his property was confiscated.

[5] Gansevoort's mill and Munroe's mill are the first mills mentioned. He was also the builder of Fort Miller. Fort Miller was first occupied by a British garrison, March 19, 1755. The garrison was withdrawn in 1844. It was a regular military post, with barracks, &c. 2 Ref. Prot. D. 2 M. E.

[6] Some say that the first sawmill, in 1788, and the first gristmill, soon afterward. The first inn was kept by —— Shankland.

[7] Wells built a "stockade house" and a log house about 1777. Upon the flat at the foot of the Kayaderosseras Creek falls, the Indians established a "Stockade Fort." The name was first applied to the settlement in the vicinity of the present village of Schuylerville. It is said to [illegible] in contradistinction to still water, just below.

[9] The water of these springs contains lime, magnesia, and [illegible] of common salt and soda.

[10] Named in honor of Gen. Philip Schuyler, who resided here previous to the Revolution. During the war his buildings and mills were burned by order of Burgoyne.

[11] Built in [illegible] In 1857 [illegible] of print cloths and silesias were manufactured.

[12] At [illegible] side of the Hudson, in the fall of 1745, several sawmills and other buildings, upon Fish Creek and the river, were burned, and about 30 families were killed or taken prisoners.

and Saratoga Lake, forming the s. boundary, are skirted by a line of low bluffs. The streams are Ellis and Owl Pond Creeks. An extensive tract lying N. of Saratoga Lake and along the course of Owl Pond Creek is low and swampy. The soil is an inferior quality of yellowish, sandy loam. The far famed mineral springs, which give to the town its name, are situated about 3 mi. N. W. of Saratoga Lake. They are near the center of the mineral spring region, which has a radius of nearly 10 mi.[1] **Saratoga Springs** (p. v.) was incorp. April 17, 1826. It contains 2 female seminaries,[2] 7 churches, 2 banks, 5 printing offices, 2 public halls, 22 hotels,[3] and several sanitary institutions.[4] Pop. 5,129. The business of the village is principally connected with the entertainment of strangers during the fashionable watering season. The springs are on that part of the Kayaderosseras Patent that fell to the share of Rip Van Dam. Sir Wm. Johnson is said to have been the first white person who ever used the Saratoga waters for medicinal purposes. In 1767 he was brought to the place on a litter, and, after remaining several days, he was able to return on foot. His example was followed, and the visits of invalids soon became of frequent occurrence. In 1773, Derick Scowton made the first clearing and erected a hut. He was followed soon after by George Arnold and Saml. Norton.[5] In 1783, Gen. Schuyler cut a road through from Fish Creek, and spent several weeks here, living in a tent. The next year he erected a framed house, (the first in town,) and annually afterward until his death he spent a part of the summer here with his family.[6] Several prominent men have resided in the village.[7] The census reports 7 churches in town.[8]

STILLWATER[9]—was formed March 7, 1788. A part of Easton (Washington co.) was

[1] *High Rock Spring*, the first discovered of these, was so named from a peculiar mineral deposit around the tube which has been formed around it. An opening 1 foot in diameter opens from the top of the rock downward 4 feet, in which the water generally rises 1½ feet above the surface of the ground. It is said that the water once overflowed the top of the rock, and that the rock was cracked by the fall of a tree, and the water sunk to its present level. *Congress Spring* was discovered in 1792, by a hunting party, and named in compliment to John Taylor, one of the number, who had been a member of the Continental Congress. The present spring was obtained by sinking a well in the bed of the stream near the original fountain. *The Columbia Spring*, a few rods S. W. of the latter, is chalybeate, and constantly boiling from the escape of gas. It was opened in 1806, by G. Putnam. *The Hamilton Spring*, 30 rods N. E. of Congress, was discovered by G. Putnam, and brought into use by Dr. Clarke. *The Pavilion Fountain*, opened in 1820, has a smart, pungent taste. *The Iodine Spring*, situated a few rods S. of High Rock, was opened in 1839. The water contains a large proportion of iodine and very little iron. This spring has sometimes been called the Walton Spring, from Henry Walton, a large proprietor of lands in the vicinity. *The Empire Spring*, the most northerly in the village, was opened in 1846. It discharges 75 gallons per hour. *The Washington Spring*, 30 rods S. W. of Congress Spring, was opened in 1806. *Putnam Spring* is in the immediate vicinity. *Flat Rock Spring*, 100 rods N. E. of Hamilton is chalybeate. *Red Spring* is 90 rods N. E. of High Rock and *Monroe Spring*, 15 rods N. of Flat Rock. *Ten Springs* were discovered in 1814, 1 mi. N. E. of the village. *Ellis Spring* is situated in a ravine 2 mi. S. W. of Congress. There are several other springs in the immediate vicinity. Baths are connected with most of these springs, and an immense trade has sprung up in the bottling and sale of the water. The temperature of the fountains ranges from 48° to 51°, and it is not sensibly affected by the seasons. The following table gives an analysis of several of these springs. The figures show the number of grains in a gallon of water.

[2] Empire State Female Seminary, a boarding school, was established in 1833. The Saratoga Female Seminary was established in 1839.

[3] Several of these hotels are among the most extensive in the country. The Clarendon Hall was built in 1842, by G. Putnam. The Congress Hall, in 1868, by Jedediah Holmes. Congress Hall, in 1811, by G. Putnam. The Empire, in 1844, by Nathan Lowe. And The United States, in 1824, by Elias Benedict. All of these have been enlarged at various times since erection.

[4] Among these are the Saratoga Water Cure and the Medical and Surgical Institute, both established in 1852.

[5] Norton joined the British, and his property was confiscated. Alexander Bryan and Henry Livingston were the first settlers after the war. Gideon Putnam came in 1790. Mr. P. built the first sawmill in 1792, [illegible] and the first [illegible] of the springs. Dr. Clarke [illegible] with Putnam, and [illegible] and Asahel Lovell opened the first store, in 1794; Robt. Ellis and Geo. Peck built the [illegible] in 1814; [illegible] works, in 1811. taken off in 1789, and Malta in 1802. It lies upon the Hudson, s. of the center of the co. It is uneven in the s. and moderately hilly in the N. The highest point is about 250 feet above the Hudson. A range of clay bluffs 60 to 100 feet high borders upon the Hudson, and of the Hudson and Anthonys Kil. The streams are generally small brooks flowing in deep gullies worn in the drift deposits.[1] The N. W. corner borders upon Saratoga Lake. The river [illegible] alluvial. West of the river bluffs is a wide belt of heavy clay; and in the S. W. part is a sandy tract interspersed with swamps. Upon the lake shore is a sulphur spring.[2] **Stillwater,** [illegible] p. v., April 17, 1816, is situated on the Hudson. It contains 4 churches, and manufactures of lumber, paper, woolens, and castings. Pop. 552. **Mechanicsville,** p. v.,) incorp. July 10, 1871, [illegible] on the Hudson, at the mouth of Anthonys Kil, on the line of Half Moon, is a station on the Rensselaer & Saratoga R. R. It contains 5 churches, a printing office, and an extensive [illegible] manufactory.[3] Pop. 1,111.—516 in Stillwater, 595 in Half Moon. **Bemis Heights,** [illegible] the Champlain Canal, near the Hudson, and **Ketchums Corners** [illegible]. This town was included in the Saratoga Patent of 1684; and settlement was [illegible] about 1712. The first church (Cong.) was established in 1763.[6] There are 8 churches in town.[7]

WATERFORD[8]—was formed from Half Moon, April 17, 1816. It lies at the junction of the Hudson and Mohawk Rivers, in the S. E. corner of the co. Its area is about 7 sq. mi. Its surface is mostly an upland, 50 to 100 feet above the river. The Mohawk is bordered by a nearly perpendicular range of slate bluffs, and the Hudson Valley by a range of clay bluffs. The soil is a sandy, clayey, and alluvial loam of great fertility. The falls in the Mohawk furnish a valuable water-power. **Waterford,**[9] (p. v.,) incorp. April 6, 1801,[10] situated on the Champlain Canal, near the confluence of the Hudson[11] and Mohawk Rivers, is a station on the Rensselaer & Saratoga R. R. and the Albany & Northern R. R. It contains 6 churches, a newspaper office, a bank, and several manufacturing establishments.[12] Pop. 3,083. Settlement was commenced by the Dutch at a very early day. The census reports 7 churches in town.[13]

WILTON—was formed from Northumberland, April 20, 1818. It lies a little S. E. of the center of the co. The Palmertown Mts., with their steep, rocky slopes and broken, forest-covered summits, extend across the N. W. corner. The center and S. W. are gently undulating, [illegible] low ridges. The principal streams are Snook Kil and Beg Meadow and Cold Brooks. The soil in the E. and S. E. is a yellow, sandy loam resting on clay, and in some places swampy. At the foot of the Palmertown Mts. is a belt of productive gravel and clay loam. A heavy growth of white and yellow pine originally covered the plains, but little woodland now remains. Near Emersons Corners is a spring of acidulous and carbonated water, and in the S. part of the town is a sulphur spring. **Wilton** (p. v.) contains 20 houses; and **Emersons Corners,** in the N. part of the town, is a hamlet. The first settlement was made in 1774 or '75, by Rowland Perry and his sons Samuel, John, Benj., Absalom, Roswell, Artemas, Rowland, and Joseph, from Dutchess co.[14] Near the mill pond on Snook Kil are traces of Indian occupation: pestles, broken pottery, and flint arrow heads have been found in abundance. The census reports 4 churches in town.[15]

SCHENECTADY COUNTY.

THIS county was formed from Albany, March 7, 1809. It is centrally distant 20 mi. from Albany, and contains 221 sq. mi. The greater part lies between Mohawk River and Schoharie Creek,—the town only lying N. of the Mohawk. The surface consists of the Mohawk Valley and an upland, generally much broken by ridges and isolated hills, 200 to 350 feet above the river. The latter are the northern continuation of the Helderberg and Schoharie Mts. The underlying rock is generally the shales of the Hudson River group, which crop out in the valleys and the beds of the ravines. In portions of Glenville and Duanesburgh this rock is underlaid by birdseye limestone, from which are obtained both lime and stone for building. The greater part of the surface is covered with a thick deposit of drift, consisting principally of clay in the W. part and sand in the E. The rocks crop out on the banks of the streams and form the declivities of the steeper hills. The soil in the W. part is a tenacious, clayey loam, underlaid by hardpan on the hills, and in the E. a light, unproductive sand. The valley of the Mohawk consists of a deep, rich alluvium, well adapted to tillage, and extensively devoted to the cultivation of broomcorn.[1]

The principal streams are Mohawk River, Schoharie Creek, and Normans Kil, and their branches. The valleys of these streams are generally bordered by the steep declivities of the uplands, rising to a height of about 200 feet. Many of the smaller streams have worn deep gulleys in the loose drift deposits, giving to the surface a very broken character. These small streams are mostly dry in summer. The fine alluvial flats near Schenectady, extending 5 mi. W. on the S. side of the river, were called by the first settlers "*The Bowuland.*"[2] A tract 2 mi. in extent, N. of the river, was called the "*Maalwyck;*"[3] and a tract on both sides, 4 mi. W. of the city, was known as the "*Woestina.*"[4] A region immediately about Schenectady was called "*Oron-uggh-wurrie-gughre;*"[5] the hills S. were known as the "*Yan-ta-pach-a-berg;*"[6] and those on both sides of the river above the city were called "*Tou-ar-en-ar.*" The streams of "*Woestina*" were "*Werf Kil,*"[7] *Zandsee Kil,*[8] and "*Righellbrigh Kil.*"[9] The valleys are best adapted to tillage and the hills to pasturage.[9] Manufactures are chiefly limited to the city of Schenectady.[10] In Glenville are about a dozen broom factories, employing 150 persons.

The county seat is located at Schenectady City.[11] The courthouse and clerk's office are both situated on Union St.: the former contains the courtroom, jail, sheriff's and supervisors' rooms,[12] and the latter the clerk's and surrogate's offices. The poorhouse is located on a farm of 110 acres, on the Albany Road, just E. of the city. It has, on an average, about 75 inmates, and the farm yields a revenue of $1,200. There are 4 newspapers published in the co.[13]

1 One-half of the entire broomcorn crop of the State is raised within this co. A considerable portion of the broomcorn land is annually overflowed, rendering it exceedingly fertile, and many farms have produced this crop for 40 years.

2 "Arable land."

3 "Wet land," from the tortuous course of the Mohawk.

4 "Wet grass."

5 Myself [corrupted] Dutch signifying "Johnson of our hill."

6 "Point creek, from the point which the river forms."

7 "Sandy Creek." 8 "Rapid Creek."

9 At an early period, the Mohawk Valley was celebrated for its large wheat crops, but now very little is raised.

10 See page 708.

11 By the terms of the act making Schenectady the county seat, the courthouse was to be built at the expense of the city. The first county officers were Gerrit S. Veeder, *First Judge;* Peter V. Veeder, *Clerk;* Jas. V. S. Rider, *Sheriff;* and Wm. J. Teller, *Surrogate.*

12 The first courts were held in the City Hall, and afterward in the West Church.

13 The following is a nearly complete list of the newspapers in the co.:—

The Western Spectator was issued prior to 1807.

The Schenectady Cabinet was commenced in Jan. 1810, by Isaac Riggs. In 1850 it passed into the hands of S. S. Riggs, who continued it until 1857.

The Western Relief was issued a short time in 1809.

The Mohawk Advertiser was published in 1810 by R. Schermerhorn.

The Herald, N., was published in 1811.

The Schenectady Gazette was published in 1812 by Isaac Schermerhorn.

The Schenectady County Whig was issued in 1835 by C. and A. Palmer, and was continued [illegible].

The Schenectady Star was published in 1841 by T. J. Sutherland.

The Schenectady Democrat was issued in 1842 by C. and A. Palmer. T. W. Hoffman was publisher, and the same year changed the name to

The Reflector and Schenectady Democrat. It has been [illegible] by A. Van H. Ramsey, and A. A. Kenyon, and by Fred W. Hoffman.

The Gleaner was published in 1843 by the students of Union College.

The Partisan, N., was published in 1844 by the students.

The Mohawk was published in 1845 by Rogers & Nott.

The Freeman's Journal was issued in 1845 by John Mowatt, and [illegible] 2 years.

The Wreath was issued in 1845 by W. H. Bartlett, and continued 1 year.

Freedom's Sentinel was issued during the year 1845 by Stephen S. Jones.

The Antiquarian and Literary Review was started in 1845 by Rev. W. Arthur, and [illegible] 1 year.

The Scout was published during the year 1849.

The Schenectady Democrat was issued in 1850 by Wm. M. Cornell and W. N. Cornell. In 1857 the [illegible] was published by Alex. J. Bingham.

The great flat upon the Mohawk w. of "*Fort Orange*," and where the city of Schenectady now stands, was bought of the natives in July, 1661, in the name of Arent Van Corlear:[1] and settlement was commenced during the same year. It was under the charge of 5 commissioners until Nov. 1, 1684, when Gov. Dongan granted a patent confirming previous rights and extending the territory.[2] On the night between the 8th and 9th of Feb. 1690, N.S.,[3] the settlement—then consisting of about 80 houses—was surprised by a party of about 300 French and Indians, and nearly every house was burned. Sixty-three persons were killed, and 27 were carried to Canada as prisoners. The night was intensely cold, and the nearest place of refuge was Albany, to which a few escaped after much suffering.[4] In 1702 R. Schermerhorn became sole trustee; and in 1705 a new patent was issued, conferring certain township privileges. On the 23d of Oct. 1765, the place was created a borough, with the rights and immunities incident to these corporations.[5] From 1726 to the Revolution the township of Schenectady sent a representative to the General Assembly. During the war the village was fortified and garrisoned at the public expense, and many families from the Upper Mohawk sought protection here from the incursions of the tories and Indians.[6] For several years after 1779 a large number of friendly Oneida and Tuscarora families, driven from their homes by the hostile tribes, were supported in this vicinity at the expense of the General Government. At the return of peace the settlement shared in the general prosperity. A new impulse was given to business by the improvements effected by the Western Inland Navigation Co., which enabled large boats to make longer voyages.[7] Upon the completion of the Erie Canal the Mohawk navigation was entirely superseded. For several years after the completion of the R. R. from Albany in 1831, large quantities of merchandise were sent here to be shipped on the canal, saving the delay of the circuitous route and numerous locks on the canal between Schenectady and Troy.[8] In 1832 a R. R. was built to Saratoga, in 1835, to Utica, and in 1843, to Troy. In 1849 several plank roads were built, which since have been mostly abandoned.

DUANESBURGH[9]—was erected as a township, by patent, March 13, 1765, and it was first recognized as a town March 22, 1788. It lies in the S. E. corner of the co. Its surface consists of an upland, broken by the narrow valleys and gulleys of small streams. Schoharie Creek forms a portion of its W. boundary, and Normans Kil flows through the S. part. The hills that border upon these streams are steep, and in some places rocky. The other principal streams are Corrys Brook, Chuctenunda Creek, and Bozen Kil. Maria Pond and Featherstons Lake are 2 small bodies of water in the N. E. part, about 250 feet above the canal. The soil is principally a stiff, clay loam, with a slight intermixture of gravel. It is best adapted to pasturage. **Duanesburgh** (p. v.) contains about a dozen houses, **Quaker Street**[10] (p. v.) 30, **Mariaville**[11] (p. v.) 20, and **Bramans Corners** (p. v.) 18. **Eatons Corners** is a hamlet. Large tracts in this town were purchased by different parties between 1736 and 1770,[12] but no active measures of settlement were taken till about the time of its organization in 1765. During that year Duane, who had become an extensive proprietor, con-

The Schenectady Daily News was started in April, 1864, by Lansing, Hopson & Co.

[1] The grantees were 4 Mohawk chiefs, named Cantuque, Sonarotsise, Anckane and Schadagaase. This grant was confirmed the next year, and the tract was surveyed in 1664. The inhabitants of Fort Orange, wishing to monopolize the Indian trade, proceeded to the settlers, before the land was received from the surveyor, a written pledge to abstain from trading with the Indians. A remonstrance against this injustice was signed by the following early settlers, viz.: A. Van Corlear, Philip Hendricksen Sanders, Lambertsen Glen, Simon Volkertsen, Pieter Seghmack Jak, Tennis Cornelisen, Marte Cornelisen, William Teller, Bastiaen De Winter for Caldyn, will w of Arent Andriese de Voss, Pieter Jacobse Borsboom, Pieter Danielse Van Olinda, Jan Barentse Wemp, and Jacques Cornelise. Their resistance caused several years' delay in the survey of the lands.

[2] Wm. Teller, Ryer Schermerhorn, Sweer Teunisen, Jan Van Eps, and Myndert Wemp were appointed trustees under this grant. The tract embraced the present city, and the towns of Glenville, Rotterdam, and part of Niskayuna.

[3] Previous to 1752 time was reckoned in England by "Old Style;" the year commencing on the 25th of March. All dates previous to that time between Jan. 1 and March 25, are reckoned in 1 year by "Old Style," and in the following year by "New Style."

[4] *Colden's Five Nations*, 3d ed., I. p. 120.

[5] This and West Chester were the only boroughs in the colony.

[6] The place was never visited by a hostile army after 1690. The colonial statutes contain frequent provisions for the rebuilding, repairs, and supplies of this fort.

[7] This company cleared the river and completed its navigation as much as possible, built a lock at Little Falls, and in 1796 built a short canal connecting the Upper Mohawk with Wood Creek, which flows into Oneida Lake, opening a direct water communication with the chain of lakes in the interior of the State, and with Lake Ontario and the St. Lawrence. The boats employed, called "*Durham boats*," were propelled up stream by setting poles, and were floated down by the current.

[8] This business was stopped by the repeal of the statute prohibiting the R. R. from carrying freight by way of this place.

[9] Named from James Duane, the principal proprietor. It was first joined with Schoharie, as "the united district of Duanesburgh and Schoharie." It was made a separate district, March 24, 1772. Mr. Duane took an active part in public affairs during the Revolution and the earlier years of the State Government, and was a liberal benefactor of the town.

[10] Boots and shoes, wagons, and sash and blinds, are manufactured here.

[11] Named from a daughter of James Duane.

[12] Among the purchasers were Thos. Freeman, in 1736, Timothy Bagley, in 1767, A. P. and William Cosby, in 17—, S. Walter Butler, in 1769, and Jonathan Brewer, in 1770. Wm. North an officer of the Revolution, married a daughter of Duane and resided several years in this town.

tracted with 20 Germans from Penn., of whom 16 came on and made a permanent settlement.[1] The first church (Christs Ch., Prot. E.) was formed Aug. 6, 1765, and the church edifice was consecrated by Judge Duane. Rev. David Belden was the first rector.[2]

GLENVILLE[3]—was formed from Schenectady, April 14, 1820. It is the only town in the co. N. of the Mohawk. The central and W. parts are occupied by rugged and wooded hills abruptly rising from the valley of the river to a height of 300 feet. The E. part is nearly level. The streams are Crabbs Kil, Chaugh-ta-noon-da, Aalplaats,[4] and Jan Wemps Creeks, and Verf Kil. The soil among the hills is a stiff clay, underlaid by hardpan, with an occasional outcrop of slate; and in the E. part it is a sandy and gravelly loam. The Mohawk intervales are very fertile, and are chiefly devoted to the culture of broomcorn. **Glenville** (p. v.) contains 2 churches and 20 houses. **Scotia** (p. v.) 2 churches and 266 inhabitants. **Roeseville** 22 houses and a broom factory, and **High Falls** 13 houses, a grist mill, and woolen factory. **Hoffmans Ferry**[5] p. o. is a hamlet and station upon the N. Y. C. R. R. **East Glenville** is a p. o. Bridges connect this town with Schenectady and Niskayuna. Settlements were made about 1665, and were among the earliest in the co.[7] The Sanders House, in this town, was spared by the enemy when Schenectady was destroyed.[8] There are 5 churches in town.[9]

NISKAYUNA[10]—was formed from Watervliet, (Albany co.,) March 7, 1809. A part of Schenectady was annexed in 1853. It lies upon the Mohawk, in the E. part of the co. Its surface is mostly upland, terminating in steep bluffs upon the river valley. The intervales are very rich and productive. A strip of land about 1 mi. wide, extending back from the summits of the bluffs, has a hard, clay soil, and a considerable portion of it is swampy and unfit for cultivation. Further S. the soil is sandy. **Watervliet Center** p. o. is within the limits of this town. **Niskayuna** is a hamlet in the S. E. corner. The first settlements were made about 1640.[11] The canal crosses the Mohawk into this town upon a magnificent stone aqueduct.[12] There is 1 church (Ref. Prot. D.) in town.

PRINCETOWN[13]—was formed from Schenectady, March 26, 1798. It lies a little W. of the center of the co. Its surface consists of a broken upland, gently descending toward the S. E. The streams are Normans Kil in the S. and Zantzee Kil in the N.[14] The soil is a heavy clay loam, underlaid by hardpan, and is best adapted to grazing. **Princetown** p. o. is a hamlet. The town was chiefly conveyed to Geo. Ingoldsby and Aaron Bradt, in 1727. Wm. Corry afterward became owner, and formed a settlement, which was long known as "*Corrysbush.*" The town was thinly settled at the time of the Revolution. The Princetown Academy, a Presb. institution, was opened here, on an extensive scale, in 1853, and was discontinued in 1859. There are a Prot. and a Ref. Prot. D. church in town.

ROTTERDAM—was formed from Schenectady, April 14, 1820. A part of the city was annexed in 1853. It lies near the center of the co., upon the S. bank of the Mohawk. The surface consists of a broken, hilly region in the N. W., a level intervale extending from the center toward the S., and a high plain in the E. The soil upon the W. hills is a tough clay, underlaid by shale, which frequently crops out. The central valley or plain, 5 mi. in extent, was called by the Dutch the "*Bouwlandt.*" The soil is a deep alluvium. The E. plateau is sandy and barren. **Rotterdam, Mohawkville,** and **Factoryville** are hamlets.[15] Settlements were made about 1661.[16] The first church was organized Aug. 29, 1800; Rev. Thos. Romeyn was the first pastor.[17]

1 The first settlers arrived in the autumn of 1710, and the lands were laid out in 1711. In 1712 a petition was presented to Governor Hunter, praying that the Germans might be allowed to purchase the lands they had settled upon. The petition was granted, and the lands were surveyed and divided among the settlers in 1713. The first church was built in 1729, and was burned by the Indians in 1748. The second church was built in 1770, and was burned by the British in 1780. The third church was built in 1788, and was burned in 1845. The fourth church was built in 1846, and was burned in 1861. SCHENECTADY CITY—was patented, with certain municipal rights, Nov. 4, 1684; chartered as a borough Oct. 23, 1765; incorp. as a district, March 24, 1772, as a town, March 7, 1788, and as a city, March 26, 1798. Princetown was set off in 1798, Rotterdam and Glenville in 1820, and parts of Niskayuna and Rotterdam in 1853.[1] It is situated on the Mohawk, and on the borders of one of the finest intervales in the State. A considerable amount of trade is carried on in the city by means of the canal and the railroads that center here; but the people are more largely engaged in manufactures.[2] The engine houses and repair shops of the N. Y. C. R. R. Co. are very extensive; and one of the largest locomotive manufactories in the country is located here.[3] This city is especially noted as the seat of Union College. This institution was incorp. by the regents, Feb. 25, 1795, and received its name from the cöoperation and union of several religious denominations in its foundation.[4] A fund was first raised by private subscription to erect the necessary buildings and to defray the expenses of opening the school;[5] and this was increased by the avails of several lotteries authorized by the legislature,[6] by grants of land and money from the State, and by private donations. The total amount received from the State, up to 1822, for permanent investment, was $331,612 13. In a will dated Dec. 28, 1855, Dr. Nott, the president of the college, bequeathed to the trustees $555,000 for specific purposes and an additional fund for miscellaneous expenses.[7] The funds thus bequeathed were derived from the profits of certain investments of college funds, and amounts from other sources, which had been employed for the purpose of creating a fund for the endowment of the institution. The first college building was erected in the city;[8] but in 1814 a tract of land upon an eminence E. of the city was purchased, and the two principal buildings were erected.[9] The site commands an extensive view of the city, the river, and the valley. The faculty of the college now consists of a president, 12 professors, 1 lecturer, and 3 tutors. The total number of students is 420, and has not materially varied from this number for a great number of years, the junior and senior classes being invariably larger than those that preceded them. A considerable number of students derive aid from the State fund, which is extended to students of limited means without reference to the profession they intend to follow. The college has received from E. C. Delavan, Esq., a magnificent donation of minerals and shells, known as the "Wheatley Collection," which was purchased for this purpose at a cost of $10,000. Departments of Civil Engineering and Analytical Chemistry have been organized, and the facilities which they afford are of the most ample kind.

The *Public Schools* are under 8 commissioners, elected once in 2 years. There were, in 1857, 9 school districts, employing 3 male and 22 female teachers. The number of children between 4 and 21, was 3065, of whom 1729, or 56 per cent., attended the public schools.[10]

The first settlement was made in 1661, as already noticed.[11] As this was an advance frontier settlement, the compact part, at an early period, was enclosed by palisades. In 1690 the enclosure

[1] An Indian name signifying "beyond the plains." Formerly spelled Schenectada. The city, under its first charter, contained an area of 128 sq. mi.; but the successive changes which have been made have reduced it to a plot of 2·6 acres.

[2] The manufacturing establishments of the city consist of the N. Y. C. locomotive shops, locomotive works, a cotton factory, 3 carriage shops, an agricultural implement factory, 3 furniture and looking-glass shops, shawl factory, 2 breweries, 1 branch, yard, 2 edge tool stores, 1 combined planing mill, pump factory, tannery, 2 tobacco factories, a cut and spring factory, and a great variety of other manufacturing shops.

[3] The Schenectady Locomotive Works Co. was incorp. June 4, 1851, with a capital of $1,000,000, all which is actively employed. When in full operation, they employ 600 hands, and turn out 1 locomotive every 10 days.

[4] Rev. Wm. Andreas opened the first grammar school, in 1771; and 1 of the objects of the year he proposed to change it to an academy. The Consistory of the Ref. Prot. Dutch church erected a small academy in 1785. The Schenectady Academy was incorp. Jan. 29, 1795, and was merged in the college in 1795. Rev. John Blair Smith was the first President. He was succeeded in June, 1799, by Rev. Jonathan Edwards, who remained until his death in Aug. 1801. Rev. Jonathan Maxcy was next elected president, and continued till 1804, when he resigned, and was succeeded by Rev. Eliphalet Nott, the present venerable president of the College.

[5] In 1779 the inhabitants of the northern part of the state petitioned for the incorp. of a college, but without success. The petition was renewed in 1791, but did not succeed. In 1794 another effort was made, and a subscription of $7935 was raised from 99 persons in Albany, and of $3425 from 231 persons in Schenectady, for an enactment. This sum was afterward largely increased by subscription. The location was fixed at Schenectady, it is said, chiefly through the influence of Gen. Schuyler, and because of its then central location.

[6] Lotteries were authorized in 1806, 1814, and 1822.—*Munsell's Ann. of Albany*, VII. 126; *Semi-Centen. Celebration of Union Coll.*

[7] The items of this bequest are as follows:—
$225,000 for 9 professorships, with a salary of $1500 each.
$60,000 for 6 assistant professorships, at $900 each.
$60,000 for an astronomical observatory.
$20,000 for 60 auxiliary scholarships, of $10 and $12 per term.
$60,000 for 60 prize scholarships for undergraduates, of $15 and $18 per term; in certain cases to be increased to $24.
$15,000 for 9 scholarships for graduates of 6 follows, of $2 each.
$20,000 for a cemetery.
$10,000 for apparatus.
$5,000 for textbooks.
$30,000 for an eclectic library.
$5,000 for a geological and mineralogical cabinet.
$5,000 for a historical cabinet.
$10,000 for a lecture fund.
The miscellaneous fund was left discretionary with the trustees to fill deficiencies and extend the operations of the foregoing objects. At the time of this gift the greater part of the funds were invested in real estate in Greenpoint village, opposite N. York City.

[8] This building, formerly known as "*Brat College*," was sold to the city, and, with an adjoining building, accommodates the 10 departments of the public schools of the city.

[9] Other buildings have since been erected, for library, cabinet, and lecture rooms. The corner stone of the Central Chapel was laid July 28, 1858.

[10] Total receipts $14,143 06; total expenses, $14,423 06. Volumes in district libraries, 3045.

was in form of an oblong rectangle, with gates at the ends. The people, however, felt so secure that the gates were habitually left open, and no guard was kept; and it was easily entered by the enemy on the memorable 9th of Feb. 1690, N.S. The lives of 60 persons and the burning were spared from the massacre. The settlement recovered slowly from the disaster, and until the close of King William's War did it receive any considerable accessions. A new fort was built in May, 1690, which was garrisoned for many years. Another fort was built in 1755, and another in 1780.[1] The latter stood at the intersection of Ferry and Front Sts. The first church (Ref. Prot. D.) was organized in 1684, and the building was erected on the s. end of Church St. in 1685. It was burned in 1690, and a new building was erected, about 1702, on the site of the present church, corner of Union and Church Sts.[2] St. George's Church (Prot. E.) was organized, in 1755, by Rev. H. Barclay, incorp. in 1766, and an edifice erected in 1768.[4] The first mail was brought to the town April 5, 1790. The first English school was opened, under the care of Rev. Henry Barclay, in 1710.[5] The Vale Cemetery Association was formed Feb. 25, 1858.[7] The population of the city has slowly and steadily increased, although, from the setting off of portions of its territory, the census reports for some periods show an apparent decrease.[8]

SCHOHARIE COUNTY.

THIS county was formed from Albany and Otsego, April 6, 1795.[1] A small part of Greene was annexed in 1836. It is an interior co., lying S. E. of the center of the State, is centrally distant 35 mi. from Albany, and contains 675 sq. mi. Its surface is an upland, broken by mountains in the S. and by hills in the center and N. A northerly branch of the Catskill Mts. lies along the S. border, the highest summits of which are 3,000 ft. above tide. From them irregular spurs extend northward, occupying the greater part of the co. Many of the summits along the E. and W. borders are 800 to 1,000 ft. above the valleys and about 2,000 ft. above tide. In the N. the hills are generally rounded and are arable to their summits; but in the center and S. the declivities are steep and in many places precipitous. The high ridge along the E. border, and extending into Albany co., is known as the Hellebark Mts.

The hills derive their general features from the rocks that underlie them. The extreme N. part of the co. is terraced like the limestone region farther W. Toward the S. the hills become more steep; and in the shaly region they are broken by deep, irregular ravines. In many places the hills bordering upon the streams are 1,000 ft. high and in places very steep. Schoharie Creek flows N. E. through the co., a little E. of the center. It receives as tributaries Foxes Creek, Stony Brook, Little Schoharie Creek, Keysers, Platter, and Manor Kils from the E., and Cripplebush, Cobles, Line, Panther, West, and Mine Kils from the W. West and Punch Kils are tributaries of Cobles Kil. Charlotte River, a branch of the Susquehanna, takes its rise in the W. part, and Catskill Creek in the S. E. part, having its source in a marsh called the Vlaie. Utsyanthia[2] and Summit Lakes, two small ponds, are the only bodies of water in the co. The former is 1,900 ft. and the latter 2,150 ft. above tide.

The rocks in the co., commencing upon the N. border and appearing successively toward the S., are those belonging to the Hudson River group, Clinton group, Onondaga salt group, Helderbergh series, Hamilton group, Portage and Chemung group, and the Catskill group. The limestones are cavernous; and the minerals which they afford are particularly interesting to mineralogists.[3] Drift is scattered over the co. to a limited extent. Waterlime is found, but is not now manufactured.

The soils are principally derived from the disintegration of the underlying rocks. In the N. the soil is a productive, clay loam, and in the center and S. it is a clay and sandy loam, the latter predominating upon the S. hills. The alluvial flats along Schoharie Creek are unusually fertile.

The co. is eminently an agricultural region. Spring grains are largely produced. Hops are cultivated in the W. part, and broomcorn upon the Schoharie Flats. Dairying is the principal business in the S. part. Very little manufacturing is done, except such as is customary in an agricultural region.

The county seat is located at the village of Schoharie.[4] The courthouse is a fine edifice built of blue limestone, located near the center of the village. The jail is a stone building, situated in rear of the courthouse. The clerk's office is a small, fireproof building, upon the courthouse lot, nearly in front. The poorhouse is located upon a farm of 160 acres in Middleburgh, 5 mi. S. W. of the courthouse. The average number of inmates is 60, supported at a weekly cost of 75 cents each. This institution seems to be well managed and much above the average of similar institutions in the State.

The Albany & Susquehanna R. R. is located along the valleys of Schoharie Creek and Cobles

[1] Schoharie is said to signify "drift wood." At a place 2 mi. above Middleburgh Bridge the Line Kil and Little Schoharie flow into Schoharie Creek from opposite sides, and bear drift wood as said to have accumulated in large quantities forming a natural bridge. — *Brown's Hist. Schoharie.*

The original Indian name was Te-wos-schecken, and it has been written Skeorry, Skharry, Schaghticoke, &c.

[2] Utsyanthia was the Indian name of the Hardenbergh Patent, and a distinguished Indian in early records.

[3] Among the more interesting are stalactites of pure white translucent and solid sulphate of baryta, calcite, satin spar, tufa, agate, mineral hair, pure black oxide of manganese, sulphate and carbonate of strontia, fine specimens of celestine, crystals of iron, and arragonite. The co. affords an unusual variety of fossils peculiar to the respective geological formations.

[4] The first courts were held in a wagon house of Johannis Lindel, and prisoners were at first sent to the Albany jail. The first meeting of the Judges, Justices, and Supervisors was held Dec. 16, 1795, and it was decided to fix the site for the buildings 2 mi. W. of their present location. The location was changed before the buildings were erected. The first buildings were erected soon after, and were burned in 1845. The first courthouse was built under the direction of Joost Borst, jr., Jacob Lawyer, Peter Snyder, John H. Stover, and Wm. Phrall, commissioners. Alexander A. Post, of Ontario, Alexander H. Buel, of Herkimer, and Wm. Duer, of Oswego, were appointed to locate the present site. The first co. officers were Wm. Beekman, *First Judge*, reappointed constantly till 1818; Jochim G. Staats, *Clerk*; Jacob Lawyer, jr., *Sheriff*; and Stephen A. Becker, *Surrogate*.

Kil, through Esperance, Schoharie, Cobleskill, and Richmondville.[1] Several turnpikes and lines of plank road extend across the co.[2]

About thirty years previous to the advent of the whites, a number of Indians belonging to the Mohawks, Mohicans, Delawares, Tuscaroras, and Oneidas united together, formed the Schoharie tribe, and took up their abode along Schoharie Creek.[3] Their principal chief was Ka-righ-on-don-tee, who had been a prisoner of the French in Canada and had married a Mohawk woman. This tribe was subordinate to the Six Nations. They could bring into the field about 600 warriors, and in the wars that ensued they steadily espoused the cause of the British. At an early period, with the aid of the Colonial Government, they erected several strongholds to protect themselves from the attacks of the Canada Indians. A band of 200 Indians remained in the valley, at peace with the settlers, until the commencement of the Revolution. Efforts were made to induce them to remain neutral during the war; but the offers of the British were so tempting that at last they took up arms against their neighbors. Previous to this a pestilence had swept off the greater part of the tribe, though the whites were not in the least affected by it.

The first white settlement was made by a colony of German Palatinates, in 1711. These people had previously settled at East and West Camp, on the Hudson. Their number is estimated at 600 to 700. They settled in 7 clusters, or villages, each under a leader or head man, from whom the dorf, or village, was usually named.[4] The Dutch soon after began a settlement at "*Vroomanshand*," on the w. side of the creek, 2 or 3 mi. above the German settlement.[5] The Palatinates at first did not secure a patent for the lands they occupied, and a short time after their settlement Nicholas Bayard appeared as agent of the British Government, and offered to give the settlers deeds for their lands; but he was assailed by a mob and was obliged to flee for his life. Upon reaching Schenectady he sent back word that for an ear of corn each he would give a clear title to the lands occupied by each; but this offer was rejected. He returned to Albany and sold the tract to 5 persons at that place.[6] A sheriff, named Adams, was sent to arrest some of the trespassers; but no sooner was his business known than he was assailed by a mob and ridden upon a rail. For a considerable time after this outrage none of the German settlers dared visit Albany; but after a time they ventured to do so, and were at once arrested and thrown into jail. They were at length released on making a written acknowledgment of the outrage they had perpetrated.[7] The settlers at length sent an embassy, consisting of Conrad Weiser, —— Casselman, and another, to England to petition the king for redress. The ship that took them out carried also a statement of the outrages, and the ambassadors were at once imprisoned; but after a time they were set at liberty and permitted to return. Weiser was so chagrined at the result of the controversy that soon after, with about 60 families, he emigrated to Tulpehocton, Berks co., Penn. Other families removed to German Flats and others to Stone Arabia.[8] Peter Vrooman, with several Dutch families,[9] perma-

[1] The elevation of this road where it enters the co. on the E. is 700 ft. above tide; at Schoharie Creek it is 550 ft.; at Cobleskill 900 ft.; at Richmondville, 1,175 ft.; and at the w. co. line, 1,400 ft.

[2] The principal turnpikes in the co. are early times were the Great Western, extending to Cherry Valley, built in 1807; and the Charlotte River Turnpike, built in 1809. The latter opened the great thoroughfare to the settlements in Delaware co. and adjacent regions. The plank road project was pretty thoroughly tried, and has been abandoned after a sacrifice of nearly all the capital invested.

[3] The Mohicans principally settled near the mouth of the Little Schoharie; and the largest settlement of the others was at "*Vroomanshand*," in the present town of Fulton.

[4] Six of these leaders were Conrad Weiser, Hartman Winterkel, John Hendrick Knoeckern, Lucas Gerlach, Johannes Conrad Smidt, and William Fox; and John Lawyer, who came soon after, is supposed to have been the seventh. "*Weiser Dorf*" occupied the present site of Middleburgh Village, and had some 40 dwellings, like the others, built rudely of logs and earth and covered with bark and grass. "*Hartman Dorf*" was 2 mi. below, and had 60 dwellings. "*Bauch Dorf*," or "*Bowman Dorf*," or "*Fondaw town*," was near the courthouse. "*Smith Dorf*" was a mi. further N. "*Keys Dorf*" was still further down, about a mi. from Smiths. "*Gerlach's Dorf*" was 2 mi. below, and "*Kockern Dorf*" 2 or 3 mi. still further N. Among these early settlers, besides those above named, were families named Keyser, Bauch, Richtmeyer, Warner, Weaver, Zimmer, Mattice, Zeh, Bellinger, Borst, Schoolcraft, Crysler, Casselman, Newkirk, Earhart, Brown, Settle, Merckley, Snyder, Ball, Wormuth, Deitz, Marsh, Sternberg, Shumach, Enderse, Sudsey, Bergh, and Houck. Within a week after their arrival, Catharine Mattice, Elizabeth Lawyer, Wilhelmus Bouck, and Johannes Earhart were born. The first wheat was sown by ——— Sternberg, in 1713; and the first apple planted likewise yielded Sept. 1

[5] Adam Vrooman, from whom he by, obtained a patent for 1,100 acres, Aug. 26, 1714. His tract was afterward found to contain 1,400 acres. It embraced the flats along the creek in the present town of Fulton, except W[illegible] H[illegible] place was an Indian castle and settlement. nently located upon his patent in 1727. The German and Dutch races long remained distinct. The Dutch were generally wealthier than the more hardy and laborious Germans, and preferred to contract marriages with those of their own class in the older Dutch settlements. They often kept slaves, while the Germans seldom had further assistance than such as their own households, of both sexes, might afford. The Germans, by intermarriage, became a "family of cousins:" and they were united by many ties of common interest. Industry and frugality gradually brought them to a level, and long acquaintance has almost entirely obliterated these hereditary distinctions of society. Upon the approach of the Revolution, a part of the people espoused the cause of the British; but the majority were ardent patriots. In many cases members of the same family were engaged on opposite sides, and the struggle assumed all the horrors of a civil war, aggravated by Indian barbarities. A Council of Safety was organized in 1774, of which Johannes Ball was chairman. During the war several conflicts took place within the limits of the co., and the people were continually exposed to the attacks of small scalping parties of the Indians.[1]

At the close of the war a large number of families removed to Canada, and their property was confiscated.[2] Several tories and Indians who had been active during the war returned at its close and were waylaid and shot. Others, warned by these examples, fled the country.[3] Since that period little of especial interest has occurred in the history of the co. In 1845 and '46, in common with the surrounding regions, this co. partook largely in the anti-rent excitement,—though no actual violence took place within its limits.[4] Within the last ten years, a mania for building large seminaries, far beyond the wants of the people, has spread through the co. The speculation has proved a ruinous one, and the entire amount of capital invested in the enterprises has been sunk.[5]

Three weekly newspapers are now published in the co.[6]

[1] The principal events of the Revolution in Schoharie co. were as follows:—

1774. Council of Safety formed.

1776. Col. James Huston enlisted tories at Loonenburgh.

1777. Schoharie militia called into service under Captain Hager. Col. Huston and 20 others were arrested and Huston was hung.

" Aug. 10.—Engagement between an American force under Col. John Harper and the tories under Capt. McDonald at Brakabeen. The tories were defeated and fled. Capt. Geo. Mann, one of their number, remained secreted in the vicinity until the succeeding spring, when he delivered himself up to the authorities. He never afterward joined the enemy, and his property was not confiscated.

" In the autumn of this year the middle fort was built, and the upper and lower forts were begun. The lower fort is the old stone church, lately changed to an arsenal.

1778, May 8.—Battle at Cobles Kill in which Captain Patrick and 22 men were killed.

" July.—Lieut. Col. Wm. Butler, with 3 companies of Morgan's Riflemen, was stationed at Schoharie. Several tories recruiting for the British were shot.

1779. Aug.—Col. Butler joined Sullivan's expedition against the Western Indians.

1780, Aug. 9.—A party of 75 Indians and 5 tories made an attack upon the settlements at Vrooman's Land, killed 5, and took 20 prisoners.

" Oct. 16.—Sir John Johnson, with 500 troops and a large body of tories and Indians, invaded the Schoharie settlements from three. The upper fort was garrisoned by 100 men, under Capts. Jacob Hager and Joseph Harper; the middle fort by 200 men, under Maj. Woolsey; and the lower fort by 150 men, under Maj. Becker. The middle fort was attacked, and the commander, Major Woolsey, being an arrant coward, wished to surrender, but a soldier, named Murphy, fired upon the flag which was sent with a summons to surrender; and, after an ineffectual attack, Sir John abandoned the attempt. The dwellings, barns, stacks, and all the property of the inhabitants were destroyed, though but few persons lost their lives.

1781. Early in the year blockhouses were built at "*Kneiskerns Dorf*," "*Hartmans Dorf*," and Cobleskill.

1781, July 9.—An engagement took place in Sharon, 2 miles E. of the springs, between a party of tories and Indians under Doxtader, and an American force under Col. Willett in which the former were defeated, with a loss of 40 killed.

1781, July.—Several persons at Middleburgh were surprised and taken prisoners while harvesting. One escaped and the others were carried prisoners to Canada.

" Oct.—Three men at Christian Myndert's house, in Sharon, were taken prisoners by a small party of Indians, and carried to Canada.

" Oct. 24.—A party of 60 or 70 Indians, under Brant, entered Vrooman's Land and commenced their work of plunder. Isaac Vrooman was murdered. A party of Americans under Capt. Hager, rallied to their assistance, and the Indians retreated. A sharp skirmish took place at Utsyantha Lake; but a part of the American force under Capt. Hale fled at the commencement, and the remainder were obliged to retreat. Hale was arrested in his retreat by the threat of being shot; but the enemy had escaped.

1782, July 26.—Several tories and 22 Indians made an incursion into Foxes Creek Valley for the purpose of capturing Maj. Becker. But the Maj. and family defended the house with such vigor that the Indians retreated. Several persons were murdered by the Indians, and several of the latter were shot.

1784, Dec. 16.—Many persons who had been taken to Canada were released on Lake Champlain, and returned to their homes.

[2] In Canada, opposite St. Lawrence co., are many families who claim relationship to inhabitants of this co. They were refugees to whom grants of land were made by the British Government.

[3] Among these was one Bencraft, who boasted of his feats of villainy. Soon after his return he was surprised by about a dozen whigs, near Blenheim bridge, led into a grove, stripped, bound, and punished with nine lashes with hickory gads, the executioners at every stroke telling him for what particular offence they were appointed. He was then unbound and allowed a very short time to disappear.

[4] In this co. George Clark had then considerable tracts, leased for 3 lives at a rent of a penny of sterling per acre. Scott's Patent of 30,000 acres was then chiefly owned by the heirs of John Livingston, and leased for 2 lives at a rent of $14 per 100 acres. The Blenheim Patent was also in part leased.

[5] Of 9 academies built in this co., 5 have been burned, 3 are "to let," and 3 are still open.

[6] *The Times Intelligencer* the first paper published in the co. was commenced at Schoharie in June, 1809, by Derick Van Veghten. In 1832 its name was changed to *The Schoharie Herald*, and the paper was soon after discontinued.

Several caves are found in the limestone regions in various parts of the town.[1] **Argusville,**[2] (p. v.,) in the N. W. corner, upon the line of Sharon, contains 3 churches, a sawmill, gristmill, tannery, and 35 houses. **Carlisle,** (p. v.,) upon the Western Turnpike, in the N. part, contains a church, boarding school,[3] and foundery. Pop. 107. **Grovenors Corners,** (p. o.,) in the S. E. corner, contains a church and 10 houses. The first settlement was made in the s. w. part, about 1760.[4] The first church was formed by Dr. Simon Hosack, of Johnstown, in 1803 or '04.[5]

COBLESKILL[6]—was formed from Schoharie, March 17, 1797. The line of Sharon was changed March 15, 1799. A part of Carlisle was taken off in 1807, a part of Summit in 1819, and Richmondville in 1845. It is an interior town, lying N. of the center of the co. Its surface is principally a hilly upland, broken by the deep valley of Cobles Kil, which extends E. and W. through the center. The highest points, on the N. and S. borders, are 600 to 900 ft. above the valley. The soil upon the hills is a sandy loam, and in the valley an alluvium. **Cobleskill,** (p. v.,) in the W. part, contains 3 churches, a sawmill, gristmill, planing mill, and tannery. Pop. 364. **Cobleskill Center** (p. v.) contains a church, sawmill, and 20 dwellings. **Lawyersville,**[7] (p. v.,) in the N. W. corner, contains 3 churches, 2 sawmills, and 25 dwellings. **East Cobleskill,**[8] (p. v.,) in the S. E. corner, contains 2 churches and 21 dwellings. **Barnerville,** (p. v.,) near the center, contains a church, gristmill, clothing works, and 16 dwellings. The first settlement was made about 1750.[9] The first land grants were made about 1730. During the Revolution the people mostly espoused the cause of the colonists, and in consequence were subjected to constant incursions from the Indians. A regular engagement took place between a company of militia and a large Indian force under Brant, May 31, 1778. The Americans were defeated, and about one-half of their number were killed.[10] Howe's Cave, near the E. line, is a place of considerable interest.[11] The census reports 7 churches in town.[12]

CONESVILLE[13]—was formed from Broome and Durham, (Greene co.,) March 3, 1836. It is the S. E. corner town of the co. Its surface is generally a hilly upland, mountainous along the E. border. The highest summits are 1,600 to 2,000 ft. above the valleys. Schoharie Creek forms a small portion of the W. boundary; and Manor Kil flows W. through near the center. Upon the latter stream, near its mouth, is a cascade of 60 ft. The valleys of these streams are bordered by high and often nearly precipitous hills. **Strykersville,** (West Conesville p. o..) upon Manor Kil near its mouth, contains a church, tannery, and 20 houses; and **Stone Bridge,** (Conesville p. o.,) near the center, a church and 10 houses. **Manorkill** (p. o.) is a hamlet. The first settlement was made by Ury Richtmeyer, in 1764.[14] There are 3 churches in town; 2 M. E. and Ref. Prot. D.

ESPERANCE[15]—was formed from Schoharie, April 4, 1846. A small portion was reannexed to Schoharie in 1850. It is the E. town on the N. border of the co. Its surface consists of two ridges, extending E. and W. across the town, separated by the valley of Schoharie Creek. The

[1] The principal of these caves are known as Young's and Selkirk's caves. Near Carlisle Village is a small cavern, in which it is supposed that Indians found shelter during the Revolution. Fibrous sulphate of baryte, fibrous carbonate of lime, and arragonite are found near Grosvenors Corners.

[2] Named from the Albany Argus, at the time the principal paper taken in town. Formerly known as "*Mollett's Mills.*"

[3] The Carlisle Seminary was built by a stock company in 1853, at a cost of $24,000. It is beautifully situated in a grove a little S. of the center of the village. It was opened in Nov. 1853 and closed in March, 1855. It has accommodation for about 300 boarders.

[4] Andrew Loucks, Coenradt Enzle, Philip Hooker, and Peter Young were among the first that located in town. The late Judge Brown, author of a small local history, settled at an early period. John C. McNeill, Wm. Caldwell, John Sweetman, Aaron Howard, Tennis Van Camp, Mathias Cass, and Lodowyck Primer were also early settlers.

[5] There are now 5 churches in town; Bap., Evan. Luth., Presb., Univ., and Union.

[6] Named from —— Cobel, who built a mill near Central Bridge at an early period. Cobles Kil was called by the Indians Otsgaragee.

[7] Named from Lawrence Lawyer, said to have been the first settler in town.

[8] Locally known as "Punchkill."

[9] Among the early settlers were families named Shafer, Bouck, Keyser, Werner, Fromyre, Borst, and Brown. Mostly from Schoharie. Capt. Jas. Dana, an early settler, distinguished himself in the battle of Bunker Hill. John Redington, another soldier of much service, also lived in this town.—*Simms's Schoharie*, p. 679. A sawmill, built before the war by Christian Brown, was not destroyed by the Indians, as it was covered by a tory, who expected to receive it after it was confiscated by the British.

[10] The American force of 16 men, under the command of Capts. Brown and Patrick, were drawn into an ambuscade. Upon the retreat, 5 of the soldiers threw themselves into a house, which was surrounded by the Indians and burned; the soldiers perishing in the flames. The delay occasioned by the resistance made at this house gave the remainder of the fugitives and the inhabitants time to escape. The whole number of Americans killed was 22; and it is supposed that the Indians lost about an equal number. Fort Du Bois, a strong blockhouse, stood in this town during the war.

[11] This cave was discovered in May, 1842, by Lester Howe, the owner. Its entrance is about 50 ft. above Cobles Kil. After passing several spacious rooms, one of which is named "The Chapel," the visitor comes to a crawling place 200 ft. long, beyond which is a limpid sheet of water 30 ft. long, 20 wide, and 10 deep. Beyond this the cavern extends a great distance, much of the way along a brook, and the total length of the passages measures several mi. Many highly interesting stalactital concretions—some of great size—have been found in this locality. It has been named the Otsgaragee Cavern.

[12] 4 M. E., 2 Ref. Prot. D., and Evan. Luth.

[13] Named from Rev. Jonathan Cone, of Durham, Greene co. The town was included in a tract granted to C. Richtmeyer and others, May 6, 1754, known as Dise's Manor; and tracts to Daniel Crane, Samuel Stringer, Walter McFarlane, John Richtmeyer, Christian Patrie, and others.

[14] Mr. R. was joint owner of several patents with John Dise and others; and the name is still common in town. During the Revolution the settlers fled for safety to the upper fort. Peter Richtmeyer was twice taken prisoner by the Indians under the tory Jones. After the war, Philip Krimple, Conrad Patrie, John Shew, Barent Stryker, Stephen Sewell, James Allerton, and Hubbard and Judah Luring, the last two from Conn., came into town. The first death was that of Ury Richtmeyer, Aug. 14, 1769. Thomas Canfield taught a school in 1794. Peter Richtmeyer kept the first inn, in 1784. Barent Stryker built the first mill, above the falls of Manor Kil.

[15] The town was named from the village. The site of the latter was bought by Gen. Wm. North in 1800, laid out into lots, and named by him from a French word signifying *Hope*.

highest parts are 600 to 800 ft. above the valley. The soil is principally a clayey loam. **Esperance,** (p. v.,) upon the E. line, was incorp. April 21, 1832. It contains 2 churches, a paper mill, gristmill, sawmill, and foundery. Pop. 322. **Sloansville,**[1] (p. v.,) near the center, contains 2 churches, 3 sawmills, and 2 gristmills. Pop. 252. The first settlements were made by Palatinates, about 1711.[2] There are 4 churches in town: 2 Bap., Presb., and M. E.

FULTON[3]—was formed from Middleburgh, April 15, 1828. It is the central town in the co. Its surface is a hilly upland, broken by the ravines of the streams. Schoharie Creek[4] flows N. through the E. part, receiving Panther Creek from the W. The highest summits are 1,000 ft. above the valleys. The hills next to the creek are conical and often precipitous; but farther W. they assume a rounded form and are bounded by more gradual slopes. The soil is a gravelly and clayey loam. **Brakabeen,**[5] (p. v.,) upon Schoharie Creek, in the S. part, contains a church, gristmill, foundery, 2 sawmills, and 200 inhabitants. **Fultonham,** (p. v.,) near the E. line, contains a church, gristmill, 2 sawmills, and 25 dwellings; and **West Fulton** (p. v.) a church, sawmill, gristmill, and 16 dwellings. **Watsonville** is a small village in the E. part; and **Petersburgh** a hamlet, in the N. part. The first settlements were made by Dutch and Palatinates, about 1711. The upper fort of the Schoharie during the Revolution was erected upon the present site of Fultonham. The census reports 5 churches in town.[6] Gov. Wm. C. Bouck was born in this town Jan. 7, 1786, and died here in April, 1859.

GILBOA—was formed from Blenheim and Broome, March 16, 1848. It is the central town upon the S. border of the co. Its surface is a mountainous upland, broken by deep ravines. Schoharie Creek[7] flows N. through the center, receiving Platter Kil from the E. and Mine Kil from the W. The streams are bordered by steep hillsides rising to a height of 2,000 to 3,000 ft. above tide. The soil is a gravelly and clayey loam. **Gilboa,** (p. v.,) upon Schoharie Creek, contains 2 churches, a private seminary, cotton factory,[8] gristmill, tannery, and 566 inhabitants. **South Gilboa,** (p. v.,) in the W. part, contains a church and 20 dwellings. **West Gilboa,** (p. o.,) in the N. W. part, is a hamlet. **Mackies Corners,** (Broome Center p. o.,) in the E. part, contains a church and 15 dwellings. **Mine Kil Falls** is a p. o. Settlement was commenced in 1764, by Matthew and Jacob Dise.[9] The first preacher was Rev. Joel Peebles, settled in 1808.[10]

JEFFERSON—was formed from Blenheim, Feb. 12, 1803. A part of Summit was taken off in 1819. It is on the S. line of the co., near the S. W. corner. Its surface is a hilly upland, the principal summits being about 1,000 ft. above the valleys and 2,000 ft. above tide. Mine Hill, in the extreme S. part, is estimated to be 3,200 ft. above tide. A high ridge extending N. E. and S. W. through near the center forms the watershed between Delaware and Mohawk Rivers. Utsyantha Lake is a small sheet of water on the S. line.[11] The soil is a gravelly and clayey loam. **Jefferson,** (p. v.,) near the center, contains 2 churches and 25 houses. **Harseville,** in the

[1] Named from John R. Sloan, an early settler. Many years since, near this place, by the side of a path leading to Fort Hunter was a stone heap, thrown up by the Indians who, from superstitious motives, never failed to contribute to the pile when ever they passed it. The Rev. Gideon Hawley, who passed it in 1753, relates (1 *Mass. Hist. Coll. IV*) that this heap had been accumulating for ages, and that his native guide could give no other reason for the observance than that his father practised it and enjoined it upon him. He did not think it idolatrous, and the conclusion to which he came was that the custom was a religious offering to the unknown God. Others state that a tradition fixes this as the spot where a murder was committed. The heap was known by the name of Stone Heap Patent, granted to John Lewis and others Sept. 1, 1752. The heap was of rocks, large and small, and had both birch and nut trees growing upon it. The custom was common among the Indians, and has been noticed in other sections of the State. MIDDLEBURGH—was formed from Schoharie, March 17, 1797, as "*Middletown.*" Its name was changed in 1801. A part was re-annexed to Schoharie March 26, 1798. Fulton was taken off in 1828, and parts were annexed to Broome in 1849. It is the central town upon the E. border of the co. Its surface is a hilly upland, divided into two ridges by the valley of Schoharie Creek, which extends N. and S. through the town. The highest summits are 600 to 800 ft. above the valley.[3] Schoharie Creek receives Little Schoharie Creek from the E. and Line Kil from the W. The hills bordering upon the streams are usually steep and in many places precipitous. The soil is a clayey loam upon the hills, and a sandy loam in the valleys. Hops and broomcorn are extensively cultivated. **Middleburgh,** (p. v.,) upon Schoharie Creek, contains 4 churches, a private seminary, 2 steam paper mills, a steam gristmill, a foundery, and 110 dwellings. **Hunters Land,** (p. v.,) near the S. E. corner, contains 2 churches, a sawmill, gristmill, foundery, and 101 inhabitants. **Mill Valley,** on the line of Fulton, contains 2 large tanneries, a gristmill, and 25 dwellings. The first settlements were made by Palatinates, in 1711.[4] The middle fort of Schoharie stood a little below the present site of Middleburgh Village during the Revolution. The census reports 5 churches in town.[5]

RICHMONDVILLE—was formed from Cobleskill, April 11, 1845. It lies upon the W. border of the co., a little S. of the center. The surface is a hilly upland, separated into two distinct parts by the valley of Cobles Kil, which extends E. and W. through the center. The highest summits are 500 to 700 ft. above the valley. The soil is generally a clayey loam. Hops are extensively cultivated. **Richmondville,**[6] (p. v.,) near the center, contains 3 churches, a foundery, sawmill, gristmill, and 370 inhabitants. **Warnerville,**[7] (p. v.,) upon Cobles Kil, at the mouth of West Kil, contains 2 churches, a boarding seminary,[8] 2 tanneries, and 44 dwellings. **West Richmondville** is a p. o. The first settlement was made before the Revolution, by George Warner and his sons Nicholas, George, and Daniel, from Schoharie.[9] The census reports 5 churches in town.[10]

SCHOHARIE—was formed as a district March 24, 1772, and as a town March 7, 1788. Sharon, Cobleskill, Middleburgh, and Blenheim were taken off in 1797, and Esperance and Wright in 1846. A part of Middleburgh was re-annexed in 1798, and a part of Esperance in 1850. It lies in the N. E. part of the co., its N. E. corner bordering on Schenectady co. Its surface is a hilly upland, broken by the deep valleys of the streams. The declivities of the hills are generally gradual slopes, and their summits are 400 to 500 ft. above the valleys.[11] Schoharie Creek flows N. through near the center, receiving Foxes Creek from the E. and Cobles Kil from the W. In the limestone region in this town are numerous caverns.[12] The soil upon the hills is a clayey loam, and in the valleys a gravelly loam and alluvium. Hops and broom corn are largely cultivated. **Schoharie,** (p. v.,) the county seat, is situated upon Schoharie Creek, S. of the center of the town. Besides the co. buildings, it contains 3 churches, the Schoharie Academy, 2 newspaper offices, an arsenal, and a bank. Pop. 806. **Central Bridge,** (p. v.,) at the mouth of Cobles Kil, contains a church, sawmill, gristmill, machine shop, and 12 dwellings. **Barton Hill** is a p. o., near the N. E. corner. The first settlement was made in 1711, by a colony of German Palati-

[1] Ames and Caleb Northrop settled in the S. part; Samuel and Noah Judson, near Utsyantha Lake; Henry Shelmerdine and James McKenzie, on West Kil; Stephen Marvin, Erastus Judd, and Aaron Jones, near the village. These were mostly from New England. The first marriage was that of Marvin Judd and Lois Gibbs, Aug. 1800; and the first death, that of Elsie Judd, in June, 1799. Heman Hickok taught the first school, in 1799. Cantell Coe kept the first inn, in 1794; and Rodman Lewis the first store, in 1800. Stephen Judd built the first sawmill, in 1799; and Heman Hickok the first gristmill, in 1799. Eli Jones built the first tannery, in 1810.

[2] The census reports 6 churches: 4 M. E. and 2 Bap.

[3] A hill opposite Middleburgh Village was named On-can-ge-da, "Mountain of Snakes." A mountain just above Middleburgh, on the W. side, was called Onis-ta-gra-wa; the one next W., Te-wok-non-ta, or "Spring Hill;" and the one S. E. of Middleburgh, Mo-he-gou-ter.

[4] This town comprises parts of Schoharie Patent, Lawyer's & Zimmer's 1st Allotment, Thos. Eckerson's, Becker & Eckerson's, Thos. & Cornelius Eckerson's, Clark's, Depeyster's, Vrooman's, John Butler's, Bauck's, Lawrence Lawyer's, Nicholas Mattice's, and the Vlaie Patents.

[5] 2 M. E., Evan. Luth., Ref. Prot. D., and True Dutch.

[6] Richmondville Union Seminary and Female Collegiate Institute was built by a joint stock company in 1852 at a cost of $24,000, including grounds, buildings, and furniture. It was burned Dec. 13, 1855, and was immediately rebuilt at a cost of $34,000, but was again burned June 30, 1854.

[7] Named from Capt. Geo. Warner, the first settler.

[8] Warnerville Seminary was built in 1851, at a cost of about $25,000, grounds and furniture being $3,000 additional. It has accommodations for 200 boarding students. A school was in operation about 3 years, when it was closed and has not since been opened.

[9] Geo. Mann, John and Henry Shafer, Andrew Michael, Elijah Hods ll, John Lick, and John Bingman settled soon after the Revolution. The first school (German) was taught by —— Skoskey. The first inn was kept by —— Ball; the first store by Geo. Skillmans; the first sawmill was built by a company of settlers; and the first gristmill by David Lawyer, on Cobles Kil. The town is comprised in the Skinner and portions of the Franklin, John F. Bouck, and B. Glazier Patents. Bauck's Patent, of 3,000 acres, was granted March 19, 1754, and Glazier's, of 3,000 acres, July 28, 1772.

[10] 2 M. E., Bap., Evan. Luth., and Christian.

[11] The grade of the Albany & Susquehanna R. R., upon the N. line of this town, is 500 ft. above tide.

[12] Ball's Cave, otherwise called Gebhard's Cave, 4 mi. E. of the courthouse, was first explored in Sept. 1831. It descends about 100 ft. below the surface. A stream of water, with small cascades, flows through it, and a boat is kept for the use of visitors. About 1835, it was purchased by W. H. Knoepfel, of N. Y., with the design of making it a popular place of resort. When first explored, it abounded in magnificent stalactites, of the purest white, translucent and fibrous. Nehtaway's Cave, 2 mi. S. E. of the courthouse, was explored in 1836, by John Gebhard, jr., and John Bonny. A few fine specimens of colored rhombohedral spar were found in it.

nates, who had previously located upon the Hudson.[1] The first church, German, was established soon after the first settlement;[2] Rev. Peter Nicholas Sommer was the first clergyman.

SEWARD[3]—was formed from Sharon, Feb. 11, 1840. It lies on the w. border of the co., N. of the center. Its surface is a hilly and broken upland, the highest summits being 300 to 500 ft. above the valleys.[4] West Kil, the principal stream, flows S. E. through the center. The soil is a clayey loam. Hops are largely cultivated. **Hyndsville,** (p. v.,) upon West Kil, in the S. part, contains a sawmill, gristmill, tannery, and 115 inhabitants. **Seward Valley,** (Seward p. o.,) in the N. W. part, contains a gristmill, sawmill, and 16 houses. **Gardnerville** contains a church and 84 inhabitants. **Clove** is a hamlet. The first settlements were made in the N. part of the town, by a colony of Germans, in 1754.[6] Their settlement was known as "*New Dorlach.*" The census reports 8 churches in town.[7]

SHARON[8] was formed from Schoharie, March 17, 1797, as "*Dorlach.*" Its name was changed March 17, 1797. Seward was taken off in 1840. It is the N. W. corner town of the co. Its surface is a rolling and hilly upland. The highest summits, in the S. W. corner, are about 500 ft. above the valleys. West Kil, flowing S. through the W. part, is the principal stream. The soil is a gravelly loam. In the underlying limestone are numerous caves. Hops are largely produced. **Sharon Springs,** (p. v.,) a little N. W. of the center, is celebrated for its sulphur and magnesia beate springs.[9] It contains 5 large hotels for the accommodation of the visitors to the springs, and 2 churches. Pop. 230. **Rockville,** upon the turnpike, about a quarter of a mi. above the springs, contains 3 churches and 20 dwellings. **Sharon Center** (p. v.,) contains 20 dwellings. **Sharon Hill,** (Sharon p. o.,) in the S. E. part, contains a gristmill, sawmill, tannery, and 20 dwellings: **Leesville,** (p. v.,) in the N. W. part, 2 churches and 20 dwellings. **Engelville,** (p. o.,) near the W. line, and **Beekmans Corners,** near the S. line, are hamlets. Col. Calvin Rich, from New England, is said to have been the first settler.[10] July 9, 1781, the tory Doxtader, with a party of 300 Indians, made a descent upon Currytown, Montgomery co.; and on his return, with his plunder and prisoners, he was overtaken by an American force, under Col. Willett. An engagement ensued, in which about 40 Indians were killed, and the remainder fled. The battle ground is about 2 mi. E. of Sharon Springs. The census reports 5 churches in town.[11]

SUMMIT—was formed from Jefferson and Cobleskill, April 13, 1819. It is the S. W. corner town of the co., lying principally on the W. border. Its surface is a broken and hilly upland. The central ridge forms a portion of the watershed between Susquehanna and Mohawk Rivers, the highest summits being 2,000 to 2,300 ft. above tide. Charlotte River, the principal stream, flows S. W. through the W. part. The soil is a gravelly and clayey loam. **Summit,** (p. v.,) upon the ridge, near the center, contains 2 churches and 28 dwellings. It is 2,200 ft. above tide. **Charlotteville,** (p. v.,) upon Charlotte River, in the S. W. part, contains a church, the N. Y. Conference Seminary and Collegiate Institute,[12] 2 sawmills, a gristmill and clothing works, and about 40

[1] This town includes parts of the Schoharie, Harris & Cayuga, Lawyer's, Bleeker's, and the 2d Allotment, Lower & Zimmer's Patents. For particulars of early settlement, see page 601.

[2] A lot of 14 acres in Hunter's Patent was sold Feb. 7, by Johannes Shell, Hendrick Conradt, and Johannes Ingold to Jonas Le Roy and Peter Speis, for the support of the Middleburgh and Schoharie high and low Dutch churches. By an act of Feb. 8, 1799, the two congregations were empowered to divide and mutually release this lot. The census reports 4 churches: 2 Evan. Luth., M. E., and Ref. Prot. D. [3] Named in honor of Gov. Seward.

[4] Upon the S. E. border of the town is a hill, called by the Indians Onyaharine, and Seward Valley is sometimes called Onyaharine. Local name is Nicklas Hollow.

[6] The first settlers were Sebastian France, Michael Merckley, Henry Hyndshaw and Ernest Fritz. Among the early settlers were Caleb Chapel, Wm. Lee, Thomas Spencer, and Daniel Brown, who located near the Luth. church: and Wm. Ripsomah, Henry Hayes, Henry Hayes, Gerrimus Chapel, and John Peter, and Martin Sears at New Peter Nicholas Sommer's, in the E. S. E. part. The first grist mill was built by ——Pinkerbeer, the first tannery was kept by Thos. Alexander, the first store by Wm. E. Spratbeer. Wm. Hayes built the first saw mill, and Henry Hayes the first gristmill. The first birth was that of a son of ——France.

[8] Named in honor of Sharon, Conn.

[9] The springs have a high reputation for the cure of cutaneous diseases, and are also used internally. The analysis of Assayalyzed by Dr. Chilton, a pint of the water is found to contain,—

Sulphate of magnesia	2.65	grains
Sulphate of lime	6.08	"
Chloride of sodium	0.14	"
Chloride of magnesium	0.15	"
Hydrosulphuret of sodium	0.14	"
Extractive matter		
	10.06	

Sulphuretted hydrogen gas.—1 cubic inch.

The water is sparkling and very palatable, and when exposed to the air becomes covered with white and flocculent sulphur. The gas from the sulphur spring quickly tarnishes silver, even in the pocket. In the neighborhood is a chalybeate spring. The water contains a large amount of sulphate of lime. A quarter of a mile below the spring is a fine cascade. A copious spring of common water gushes from the rocks a short distance above, in volume sufficient to turn a mill.—Gaz. of Del., p. 56. Mineral Springs, p. 144.

[10] Col. R. was allowed [illegible] militia in Gen. Richard Dodge's brigade. Calvin Pike, William Vanderwerker, Conrad Fritche, Abraham and John Mereness, John Malick, and Peter Courment were early settlers, and were obliged to flee to Schoharie or Fort Hunter for safety during the war. Wm. Beekman kept the first store; John Hutt built the first sawmill, Omeo Lagrange the first gristmill, John Hutt the first clothing works, and Frederick & Crouch the first tannery. The town comprises [illegible] acres, granted Sept. 25, 1761; a tract granted to Bradt & Livingston, of 8,000 acres; a part of Johan D. Gross' Tract; a tract granted to Johannes Lawyer, jr., Jacob Boist, and others, of 7,000 acres, Aug. 14 [illegible] Patent. The first owners of New Dorlach Patent were Michael, Johannes, Johannes [illegible] Bauch, Michael Heltzinger, Henrick Hanes, Johannes Shaffer, Johannes [illegible] Lambert Sternberg, Barent Keyser, and Peter Nicholas Sommer. The patent provided that any differences that might arise were to be settled by arbitration.

dwellings. **Lutheranville,** (p. o.,) in the N. w. part, contains a church and 10 dwellings; and **Eminence,** (p. v.,) on the line of Blenheim, 2 churches and 15 dwellings. The first settlement was made in 1794, by Frederick Prosper, from Dutchess co.[1] Rev. M. Sherman was the first preacher. The census reports 7 churches in town.[2]

WRIGHT[3]—was formed from Schoharie, April 4, 1846. It is the N. town on the E. border of the co. Its surface is a hilly upland. The highest summits, along the s. line, are 600 to 800 ft. above the valleys. The principal stream is Foxes Creek, flowing N. w. through the center. The soil is a clay and gravelly loam. **Gallupville,** (p. v.,) near the center, contains 3 churches, a sawmill, tannery, carding machine, and 40 houses. **Shutters Corners,** (p. o.,) in the w. part, contains a sawmill, gristmill, and 10 houses. **Waldenville** is a p. o., near the E. line. The town comprises the whole of several patents and parts of several others, principally granted from 1760 to 1770. The first settlement was made by Jacob Zimmer, near Gallupville, several years prior to the Revolution.[4] A stone house built by Johannes Becker, an early settler, was used as a fort during the war.[5] There are 5 churches in town.[6]

[1] Christ. Davis, Samuel Allen, Martin Van Buren, Morris Kill Robert and Abraham Van Dusen, A. M. Luykendaugh, Joseph L. Barrett, Amos Baldwin, Jonathan Bradish, E. Bass Prosper and James Brown were early settlers. The first birth was that of —— Luykendaugh, and the first marriage that of Christ. Davis and Lovina Allen, in 1797. David Hoffman built the first school-house, in 1798. Benj. Rider kept the first store. Jacob Burns the first store, and —— Van Buren the first sawmill. The town comprises a part of the Stratsburgh, Charlotte River, Stephen Skinner's, and Walter Franklin Patents.

[4] Among the early settlers were Johannes Becker, —— Shafer, Frederick Dening, John Narhold, Frederick Beller, Christopher Shockle, Jr. and John Hilsley. Jacob Zimmer kept the first tavern, John and Henry Becker the first store, Jacob Zimmer built the first gristmill, and Zimmer, Becker & Shaffer the first sawmill.

[5] On the morning of July 26, 1[illegible], a band of Tories and Indians appeared in the valley of Foxes Creek, murdered several persons, took some prisoners, and attempted to besiege the inmates of the stone house, but failed. This house is still standing.

SCHUYLER COUNTY.

This county[1] was formed from Steuben, Chemung, and Tompkins, April 17, 1854. It lies upon both sides of the s. extremity of Seneca Lake; is centrally distant 160 mi. from Albany, and contains 352 sq. mi. Its surface is mostly an undulating and hilly upland, divided into two distinct ridges by the deep valley of Seneca Lake and its inlet. The highest summits are 1,000 to 1,000 ft. above Seneca Lake and 1,200 to 1,600 ft. above tide. A bluff 100 to 300 ft. high extends along the shores of the lake, too steep for profitable cultivation; but farther inland the hills are bordered by long and gradual slopes and are generally arable to their very summits. The extreme s. part of the co. assumes a more hilly and broken character. Catharines Creek, flowing into the head of Seneca Lake, is the principal stream. Its course is through a deep, narrow, and winding valley bordered by steep hillsides 400 to 600 ft. high. Upon it are numerous falls, affording abundance of water-power; and near its mouth is a marshy region of considerable extent. Meads Creek, a tributary of Chemung River, drains the S. W. corner, and Cayuta Creek the S. E. corner. The other streams are small creeks and brooks, mostly discharging their waters into Seneca Lake. A few streams take their rise along the N. E. border and flow into Cayuga Lake. Little and Mud Lakes, two smaller sheets of water along the W. border, discharge their waters through Mud Creek into Conhocton River. Cayuta Lake is a fine sheet of water, in the E. part of the co. Hector Falls, upon a small stream flowing into Seneca Lake from the E., is one of the finest cascades in the State. The rocks of this co. mostly belong to the Portage and Chemung groups,—the former occupying the N. and the latter the S. part of the co. In the deep valley along the shore of Seneca Lake, in the extreme N. part of the co., are found outcrops of Genesee slate. The only good building stone in the co. is the thin-bedded sandstone separating the thick beds of shale. In many places these rocks are covered deeply with drift deposits. The soil upon the highlands is clayey and gravelly, principally derived from the disintegration of the shales; and in many places this is underlaid by hardpan. In the valleys the soil is a gravelly loam intermixed with alluvium.

Agriculture forms the leading and almost the sole occupation of the people. Spring grains are extensively grown, and stock and wool growing and dairying are largely carried on. The climate and soil are both better adapted to pasturage than to tillage. Fruit is becoming an important article of culture, and all kinds adapted to the climate succeed well. A limited amount of manufacturing is carried on at Watkins and Havana.

In 1854, commissioners appointed to locate the co. buildings fixed upon Havana as the county seat.[2] The action of the commissioners was resisted by the Board of Supervisors, and by them the county seat was located at Watkins, at the head of Seneca Lake. A courthouse was erected at each village; but subsequently the courts decided in favor of the action of the commissioners, and, April 13, 1857, an act was passed by the legislature confirming the location of the county seat at Havana. This act was confirmed by the Supreme Court, April, 1859. The Board of Supervisors soon after changed the location to Watkins, and at this place the co. offices are at present located. The buildings erected at each place for a courthouse, and for a clerk's office and jail at Havana, are fine buildings, embodying nearly all modern improvements. The buildings at Havana were erected at a cost of $30,000. No poorhouse has yet been established.

The public works in the co. are the Chemung Canal, extending from the head of Seneca Lake S. through the valley of Catharines Creek, uniting with Chemung River at Elmira; the Elmira, Jefferson & Canandaigua R. R., extending along the W. shore of Seneca Lake to Watkins; and the Chemung R. R., extending S. from Watkins along Catharines Creek to Elmira. These roads are both leased to the N. Y. & E. R. R. Co.

In 1779, Sullivan's army marched through the defiles along Catharines Creek, closely pursuing the Indians, who were flying from the fatal battle of "Newtown," near Elmira. So great was the terror of the Indians that they neglected to defend the passes, and the American army

[1] Named from Gen. Philip Schuyler.

[2] These commissioners were Darius De Wolf, of Oswego, Edward Dodd, of Washington, and Virus W. Smith, of Onondaga.

marched unmolested through the only place where successful resistance was practicable. Upon the conclusion of peace, many of the soldiers belonging to the army returned to this region and located upon land which had been first brought to their notice during their march against the Indians. The first settlements in the co. were made on Catharines Creek, near the present site of Havana, in 1788, and on the shores of Seneca Lake, in 1790. The town of Hector belonged to the Military Tract; the towns of Catharines, Dix, and Reading, to the Watkins and Flint Purchase; and Tyrone and Orange, to the Phelps and Gorham Purchase.

Two weekly newspapers are now published in the co.[1]

CATHARINES[2]—was formed from "*Newtown*," (now Elmira, Chemung co.,) March 15, 1798. Catlin and Veteran (Chemung co.) were taken off in 1823. A part of Newfield (Tompkins co.) was annexed June 4, 1853, and a part was added to Cayuta, April 17, 1854. It lies upon the s. border of the co., E. of the center. Its surface is a hilly upland, broken by the deep valleys of the streams. Catharines Creek, along the w. border, flows in a deep ravine 300 to 700 feet below the summits of the hills. Cayuta Lake lies in the N. E. part; and its outlet, Cayuta Creek, flows s. into the Susquehanna. The soil is principally a gravelly loam mixed with clay. **Havana,** (p. v.,) upon Catharines Creek, on the line of Dix, 3 mi. from Seneca Lake, was incorp. May 13, 1836. It contains a courthouse, jail, clerk's office, the People's College,[3] 3 churches, a newspaper office, 3 flouring mills, and several manufacturing establishments.[4] It is a canal village and a station upon the Chemung R. R. Pop. 1,290. **Odessa,** (p. v.,) near the center of the town, contains 2 churches, a gristmill, several sawmills, and 40 dwellings; and **Catharines,** (p. v.,) in the s. part, 2 churches and 25 dwellings. **Alpine,** (p. v.,) on the S. E. border, is partly in this town. The first settlement in town was made at Havana, in 1788, by Silas Wolcott and —— Wilson.[5] The first religious meeting was held at the house of Mr. P. Bowers, by a Presbyterian minister, in 1794.[6]

CAYUTA—was formed from Spencer, (Tioga co.,) March 20, 1824. Parts of Catharine and Erin (Chemung co.) were annexed in 1854. The town was transferred from Tioga to Tompkins co. March 22, 1822. It is the S. E. corner town in the co. Its surface is a hilly upland. Cayuta Creek flows S. E. through the town, in a narrow valley bordered by steep hillsides 300 to 600 ft. high. The soil is a clayey and gravelly loam. **Cayuta** (West Cayuta p. o.) contains 15 dwellings; **Alpine,** (p. v.,) on the N. line of the town, a flouring mill, sawmill, chair factory, and 25 dwellings. The first settlement was made in the valley of the Cayuta, near West Cayuta, in 1801, by Capt. Gabriel Ogden, Rev. David Janes, and Jos. Thomas,—the first two from Tioga co., and the last from Athens, Penn.[7] The first religious services were held by Rev. Mr. Janes, (Bap.,) at his own house, in 1802. No churches are reported.

[1] *The Tioga Patriot* was started at Havana in June, 1828, by L. B. and S. Butler, and was continued a short time.
The Havana Observer was started in 1830 by F. W. Ritter, and was soon discontinued.
The Havana Republican was commenced in 1835 by Nelson Colgrove. It was issued successively by G. Barlow Nye, T. I. Taylor, and W. H. Ongly until 1849, when it was changed to
Life in The Country and Havana Republican. It was discontinued in 1850.
The Chemung Democrat was removed from Horseheads to Havana in 1840, and to "*Jefferson*" (now Watkins) in 1842. Its name was soon after changed to
The Democratic Citizen, and it was issued by J. I. Hendrix until 1850.
The Independent Freeman was started at Watkins, June 15, 1850, by W. B. Slawson & Co.; in 1851 it was changed to
The Jefferson Eagle, and was continued a few months.
The Chemung Democrat, a literary paper, was published at "*Jefferson*" about the same time.
The Havana Journal was commenced April 16, 1853, by John B. Look, and its publication is still continued.
The Watkins Republican was established in June, 1854, by S. M. Taylor. It passed into the hands of J. K. Averill, and afterward into those of M. Ells, by whom it is still published.
The Schuyler County Democrat, commenced at Havana, April 25, 1855, by Averill & Baxter, was soon after discontinued.

[2] Named from Catharine Montour, a French woman who married an Indian, was adopted into the Seneca tribe and exerted a controlling influence among the Indians. She received a small salary from the English Colonial Government, for many years, on account of her influence among the Indians. She resided on the present site of Havana, and was known as Queen Catharine. This town as first formed embraced the N. part of Tps. 1 and 4 and all of Tps. 2 and 3 of John W. Watkins's Tract.

[3] This institution was incorp. April 13, 1854, and was located at Havana Jan. 8, 1857. The college edifice—the erection of which has been commenced—is to be 320 by 52 feet, 4 stories high, with a basement. At either end is a wing, 200 by 52 ft., 4 stories high; and a wing will project rearward from the center, 68 by 64 ft., 3 stories high. Above the basement the walls are to be erected of brick; the whole at an estimated cost of $175,000. The institution is to afford instruction in some departments of mechanics and manufactures, and students are to be paid for their services. The trustees have resolved to establish 19 professorships.

[4] 2 plaster mills, 2 sawmills, a planing mill, woolen factory, iron foundery, and tannery.

[5] Geo. Mills, Wm. McClure, Phineas Bowers, John King, and 2 families by the name of Stevens, settled in the valley at and near Havana in 1789–90. Anthony Broderick kept the first school, in a house owned by Phineas Bowers, in 1792–93. Silas Wolcott kept the first inn, soon after his settlement, and Isaac Baldwin and George Mills the first store, in 1805, at Havana. Phineas Bowers erected the first grist and saw mills, at or near the village.

[6] The census reports 7 churches; 2 Prot. E., 2 Presb., 2 M. E., and Bap.

[7] Hermon White, Benj. Chambers, and Jeremiah Taylor settled in the same vicinity in 1803; Moses Brown, Langstaff Compton, and others in 1804. The first birth was that of Rosetta, daughter of Jonathan Thomas, in Jan. 1804; the first marriage, that of Ebenezer Edwards and Sarah Ogden, in 1804; and the first death, that of Joseph Thomas, in July, 1802. Robert Lovell taught the first school, in a house belonging to Elder Janes, in the winter of 1805. Capt. Gabriel Ogden kept the first inn, at West Cayuta, in 1805, and Jesse White the first store, in 1808. John White erected the first sawmill on the E. branch of the Cayuta, in 1816, and John Ennis the first gristmill, 2 mi. below West Cayuta, in 1817.

DIX[1]—was formed from Catlin, (Chemung co.,) April 17, 1855. It lies upon the w. side of Catharines Creek, and extends from the head of Seneca Lake to the s. bounds of the co. The surface is mostly a rolling and hilly upland, the summits being 400 to 700 ft. above the lake. It is drained by Catharines Creek and several smaller streams. The soil is principally a fine quality of gravelly loam. A little s. w. from the head of the lake is a deep glen in the hills, bordered by perpendicular rocks 200 ft. high. A small stream runs through it, forming a series of beautiful cascades. **Watkins,**[2] (p. v.,) upon the line of Reading, at the head of Seneca Lake, was incorp., as "*Jefferson,*" April 11, 1842, and its name was changed April 8, 1852. It contains a courthouse, 5 churches, a newspaper office, and several manufacturing establishments. It is a lake, canal, and R. R. station; a daily steamboat plies upon Seneca Lake between this place and Geneva. Pop. 1,084. **Beaver Dams,** (p. v.,) in the s. w. corner, contains 2 churches, several manufactories, and 28 dwellings: **Townsend,** (p. v.,) near the w. line, contains 1 church, several mills, and 36 dwellings; **Crawford Settlement,** (Moreland p. o.,) near the s. line, contains 2 churches and 26 dwellings. The first settlements were made near the head of the lake and along the valley of Catharines Creek, about the commencement of the present century.[3] The first church edifice (Bap.) was erected in 1833, at Townsend.[4]

HECTOR—was formed from Ovid, (Seneca co.,) March 30, 1802. It is the s. w. corner township of the Military Tract and the N. E. corner town of the co. Its surface is a rolling upland, its highest summits being 500 to 700 ft. above Seneca Lake. The bluffs bordering upon the lake are 100 to 300 ft. high, and nearly perpendicular. It is drained by a large number of small creeks flowing into Seneca and Cayuga Lakes. Hector Falls, upon a small creek in the s. w. part of the town, is a cascade made by the stream flowing down the bluff which borders upon the lake. The soil is a clay, sandy, and gravelly loam, in some places underlaid by hard pan. **Perry City,** (p. v.,) upon the E. line of the town, contains a Friends' meeting house and 120 inhabitants; **Mecklenburgh,** (p. v.,) situated 2 mi. s. w. of Perry City, contains 3 churches, 2 sawmills, a flouring mill, and 338 inhabitants; **Reynoldsville,** (p. v.,) near the center of the town, contains a church and 117 inhabitants; **Bennetsburgh,** (p. v.,) in the s. part, contains a church, 4 saw and shingle mills, 1 gristmill, tannery, and 25 dwellings; **Burdett,** (p. v.,) in the s. w. part, contains 3 churches, a woolen factory, agricultural implement factory, iron foundery, gristmill, sawmill, tannery, and 360 inhabitants; **Peach Orchard,** (Hector p. o.,) in the N. w. part, contains 3 churches and 34 dwellings; **Polkville,** (p. v.,) in the N. w. part, contains a church and 16 dwellings; **Searsburgh** (p. o.) contains 2 churches and 10 dwellings. **North Hector** and **Cayutaville** are p. offices, and **Steamburgh** is a hamlet. John Livingston and Wm. Wickham settled in 1791, in the N. w. part of the town, on the bank of the lake.[5] The first church (Presb.) was formed by Rev. Mr. Stewart, at Peach Orchard, in 1809.[6]

ORANGE—was formed from Wayne, (Steuben co.,) Feb. 12, 1813, as "*Jessup.*" Its name was changed Feb. 20, 1836. A part of Hornby, (Steuben co.,) was annexed April 11, 1842, and a part of Bradford, (Steuben co.,) April 17, 1854. It is the s. w. corner town in the co., and is bounded on the E. by the pre-emption line. Its surface is a rolling and hilly upland, broken by the deep and irregular valleys of the streams. Meads Creek, flowing S. w., forms the principal drainage. The soil is chiefly a gravelly loam. **Monterey** (Orange p. o.) contains 3 churches, a gristmill, and 301 inhabitants. **Sugar Hill** is a p. o. in the N. E. part. The first settlements were made in 1799, by Abraham Rozenback and Samuel Scomp, N. E. of Monterey.[7] The first church (M. E.) was formed by Rev. Peregrine Hallett, the first preacher.[8]

READING—was formed from "*Fredrickstown*," (now Wayne, Steuben co.,) Feb. 17, 1806. It lies upon the w. bank of Seneca Lake, and is the central town upon the N. border of the co. Its surface is a rolling upland 400 to 500 ft. above the lake. The bluffs upon the shore are very steep and in many places precipitous. Its streams are small brooks and creeks. The soil is mostly a clay loam. **Reading Center** (p. v.) contains 2 churches and 24 dwellings; **Irelandville** (Reading p. o.) contains 11 dwellings. **North Reading** is a p. o. The Elmira, Jefferson & Canandaigua R. R. traverses the town upon the w. shore of the lake. A settlement was made at Reading Center, by Judge John Dow, from Conn., in 1790.[1] The first church (Bap.) was formed by Elder John Goff, in 1810, at Reading Center.[2]

TYRONE—was formed from Wayne, (Steuben co.,) April 16, 1822. It is the N. W. corner town in the co. Its surface is an elevated upland divided into several ridges by the valleys of streams. Its principal stream is Mud Creek, flowing S. W. Little Lake, upon the W. border, is 3 mi. long and about 1 wide; and Mud Lake, in the S. W. corner, is 1½ mi. long and about one-half mi. wide. These lakes lie in deep valleys, and are bordered by nearly precipitous hills which rise 300 to 400 ft. above them. The soil is a clay loam. **Tyrone,** (p. v.,) a little E. of Mud Lake, contains 2 churches, 1 gristmill, 2 sawmills, 2 tanneries, several manufactories, and 160 inhabitants; **Weston,** (p. v.,) ¾ mi. N. W. of Tyrone, contains 2 churches and 177 inhabitants; **Altay,** (p. v.,) a little E. of the center, contains a church, tannery, 2 sawmills, a steam flouring mill, and 144 inhabitants; **Pine Grove** (p. o.) contains a church and 6 houses. The first settlement was made in 1800, by Gen. Wm. Kernan, on a tract of 4,000 acres, purchased by Thos. O'Conner.[3] The first church edifice (Union) was erected by the Presb. and Bap.; Rev. Joseph Crawford (Presb.) and Rev. Van Rensselaer Wall (Bap.) were the first preachers.[4]

[1] David Culver settled near Reading Center, in 1806, and Alexander Hinton, near Watkins, in 1802. The first marriage was that of Elisha Culver and Susan Divins, and the first birth, that of Minor Culver. The first school was taught by Ira Parker, at the Center. David Culver kept the first inn, S. of the Center, and David Culver, jr., the first store, at the same place. Elnadia Parker erected the first sawmill.

[2] The census reports 3 churches; Bap., M. E., and R. C.

[3] Mr. O'Conner was among the early settlers, and resided for a time in a log house on the shore of Little Lake. He was accompanied by a son and daughter,—the former of whom is Hon. Charles O'Conner, the eminent New York lawyer. Abraham Fleet, sr., from N. J., and Capt. John Seadrick, were among the first settlers near Tyrone Village, in 1800. Theodens, Gershom, and Abraham Bennett settled about 1801. Simon Fleet was the first child born in town. The first school was taught at Tyrone Village, by Hugh Jameson; the first inn was kept by Capt. Williams, and the first store by Thos. O'Conner, near the S. W. corner of the town. The first mill and factory were erected at Tyrone Village by Ralph Opdyke.

SENECA COUNTY.

THIS county was formed from Cayuga, March 29, 1804. A part of Tompkins was taken off in 1817, and a part of Wayne in 1823. It lies W. of the center of the State, centrally distant 156 mi. from Albany, and contains 420 sq. mi. It occupies the greater part of the land which lies between Seneca and Cayuga Lakes, and extends several mi. N. of Seneca Lake Outlet. A high ridge enters the co. from Tompkins and occupies nearly one-fourth of its surface. The summit of the extreme S. portion of this ridge in this co. is 700 to 800 feet above Seneca Lake and 1,100 to 1,250 feet above tide. Toward the N. it gradually declines to the level of Seneca Lake. The ridge is bordered in some places by steep declivities and in others by gradual slopes, and in the S. part of the co. generally terminates in high bluffs on the shores of the lakes. At the foot of Seneca Lake the bluffs, on an average, are about 20 feet high; but toward the S. they gradually rise to an elevation of 100 to 150 feet. At the foot of Cayuga Lake the shore is low and shelving; but in Romulus a bluff shore commences, which gradually increases in height until on the S. border of the co. it attains an elevation of 150 to 200 feet. From the summits of the bluffs to the central summit of the ridge the land generally rises in beautiful, smooth, gradual slopes, broken in a few places by sharp declivities of a terrace like formation. From Ovid toward the N. the land abruptly descends about 200 feet, and then by gradual slopes to the level of Seneca River. The region immediately N. of Seneca Lake Outlet and W. of the Cayuga Lake Outlet is level, and some of it is marshy. In the N. W. corner of the co. is a great number of alluvial ridges, composed principally of gravel. These ridges extend in a N. and S. direction and are 30 to 50 feet high. Their declivities are generally very abrupt toward the N., E., and W., but more gradual toward the S.

The geological formation of the co. is very simple. The rocks overlie each other in parallel layers slightly dipping toward the S. The lowest rocks that crop out in the co. are those of the Onondaga salt group, including both the red shales and gypsum. They are found along Seneca River, where the gypsum is extensively quarried. Next above these are heavy, compact masses of the corniferous limestone, occupying a belt of country 2 to 3 mi. wide S. of Seneca River. The intermediate waterlime and Onondaga limestone strata are developed in this co. only in very thin and scarcely noticeable layers. The corniferous limestone furnishes a building stone of great excellence and is extensively quarried. Next in order come the Marcellus and Hamilton shales, occupying a broad belt through the co. and extending nearly to the summits of the ridges; the Tully limestone, a layer of only a few feet in thickness, but valuable from the quantity and quality of lime manufactured from it; and the Genesee slate, a dark, shaly rock which crowns the summits of the southern hills. These rocks throughout the co. are covered with a deep deposit of drift, consisting of clay, sand, gravel, and hardpan, and crop out only along the shores of the lakes, the narrow ravines of the streams, and the steep declivities of the ridges. In the N. W. corner of the co. this drift is arranged in ridges with narrow valleys scooped out between them.[1]

The principal stream is Seneca River, forming the outlet of Seneca Lake. It has a course of about 14 mi. between the two lakes, and in that distance falls 60 feet. The falls are principally at Waterloo and Seneca Falls, furnishing an excellent water-power at each place, but much the greatest at the latter. From Cayuga Lake, Seneca River flows N. E. through a marshy region and forms a portion of the E. boundary of the co. Clyde River, a tributary of the Seneca, flows through a portion of the marshy region in the N. E. corner. The other streams are all small brooks and creeks, and for the most part are rapid torrents flowing in deep gulfs worn in the shaly rocks. They are frequently interrupted by waterfalls, are nearly dry in summer, and are subject to severe freshets.

Seneca Lake, the W. border of which forms the greater part of the W. boundary of the co., is 35 mi. long and 1 to 4 mi. broad. It is 216 feet above Lake Ontario and 447 feet above tide. It occupies a deep valley between the hills, and it varies in depth from 300 to 630 feet. Its shores are generally bold; and from their summits the land slopes gently and gracefully upward to a height

[1] The position and direction of these ridges seem to indicate that they were formed by the action of ice [illegible] to make the land [illegible] which has [illegible] the [illegible] of the [illegible] running [illegible] Valley [illegible] Station, and it has been suggested that at a geological period the [illegible] glacier.

of 200 to 700 feet above its surface, furnishing some of the most quiet and beautiful scenery in the State. This lake is never entirely frozen over. Cayuga Lake occupies a parallel valley on the E. border of the co., and is 38 mi. long and 1 to 3½ mi. wide. It is 60 feet below Seneca, and its greatest depth is 346 feet. Near the foot the lake is very shallow, and a large extent of land, immediately adjoining and lying along the course of its outlet, is swampy.[1] Further s. the shores are bluff and the country is of the same general character as that bordering upon Seneca Lake.

The soil is generally of a very excellent quality. The sandy and gravelly loam of the drift deposits are well adapted to either grain raising or grazing. The lower portions of the ridges are enriched by the disintegration of the rocks above, making the soil very productive. The lowlands bordering upon Seneca River are clayey and in many places mixed with disintegrated gypsum and limestone. North of the river have been found extensive marl deposits of great agricultural value. North of the foot of Seneca Lake is a sandy region once considered worthless; but upon trial the soil has been found susceptible of being made productive at little expense. The marshy regions W. of Cayuga Outlet are covered with thick deposits of marl and muck. Measures have been instituted to drain these marshes; if successful a new and exceedingly fertile region will be added to the productive lands of the State.

The co. is a half-shire, the co. seats being located respectively at Ovid and Waterloo.[2] The courthouse and clerk's office at Ovid are brick buildings, situated in the E. part of the village. The combined courthouse and jail at Waterloo is a brick building, situated near the R. R., fronting the public square, in the W. part of the village. The co. poorhouse is located upon a farm of 126 acres, upon the line between Seneca Falls and Fayette, 4 mi. S. E. of Waterloo.[3]

Four weekly newspapers are now published in the co.[4]

The public works of the co. are the N. Y. Central R. R., extending through Seneca Falls and Waterloo, and the Seneca Canal, extending along Seneca River through the same towns.[5] Above the falls at Waterloo the canal is formed by slackwater navigation upon the river.

The lands in this co. were first brought to the notice of the whites by the expedition of Sullivan, which passed along the banks of Seneca Lake in 1779. Portions of the land at that time had been cleared and were under cultivation. The Indians had a tradition that this whole region had once been occupied by a race that pursued agriculture, but which had long ago disappeared. Many of Sullivan's soldiers, attracted by the beauty and fertility of the lands, after the war settled in various parts of the co. The first settler, Job Smith, who located at Seneca Falls in 1787, and the second, Andrew Dunlap, who located at Ovid in 1789, came in by way of Chemung River. The third settler, Lawrence Van Clief, who settled at Seneca Falls in 1789, came in by way of Oneida Lake and Seneca River.[6] After 1790 settlement progressed rapidly, and the most fertile lands

[1] This swampy region is the southern termination of the noted Montezuma Marshes.

[2] The county seat was located at Ovid upon the erection of the co. in 1804. The courthouse was built in 1806. While a part of Onondaga co. in 1790, courts were held at the house of Andrew Dunlap. In 1817, upon the erection of Tompkins co., the co. seat was removed to Waterloo. But in 1822 the co. was divided into two jury districts, and the courts have since then been held alternately at Ovid and Waterloo. The first co. officers were Cornelius Humphrey, *First Judge*; Silas Halsey, *Clerk*; William Smith, *Sheriff*, and Jared Sandford, *Surrogate*.

[3] The average number of inmates is 80, supported at a weekly cost of $1.00 each. A school is taught 4 months in the year. The establishment seems to be pretty well arranged and managed.

[4] *The Seneca Patriot*, the first paper published in the co., was started at Ovid in 1815 by Geo. Lewis. In 1816 it was changed to

The Ovid Gazette. Upon the change of the co. seat in 1817, it was removed to Waterloo and changed to

The Waterloo Gazette, and was continued several years by the original proprietor.

The Seneca Farmer was started at Waterloo in 1822 by Wm. Child. In 1832 it was removed to Seneca Falls and united with the Seneca Falls Journal.

The Waterloo Republican was issued a short time in 1822.

The Waterloo Observer was started in 1824 by Charles Sentell. It was soon after issued a short time as

The Observer and Union, and was subsequently changed to

The Seneca Observer, under which title it is still issued by the original proprietor.

The Wreath and Literary Repository was issued from the Observer office in 1831.

The Seneca Republican was established at Ovid in 1827 by Michael Hayes. In 1830 it was changed to

The Ovid Gazette and Seneca County Register, and was issued a short time by John Duffy.

The Seneca Falls Journal was commenced in 1829 by O. B. Clark. In 1831 it passed into the hands of Wm. N. Brown, and in 1832 it was united with the Seneca Farmer and changed to

The Seneca Farmer and Seneca Falls Advertiser, and was issued by Wm. Child until 1835.

The Western Times was published at Waterloo in 1830 by Ebenezer P. Mason.

The Ovid Emporium was published in 1832 by Bishop Orenshner.

The Seneca County Courier was commenced at Seneca Falls in 1837 by Isaac Fuller & Co. It was successively published by Fuller & Bloomer, Mills & Bloomer, Mills & Davis, John J. Davis, N. J. Milliken, Milliken & Fuller, Milliken & Mumford, Foster & Judd, Fuller & Judd, until 1850, when it passed into the hands of Isaac Fuller, its present publisher.

The Ovid Bee was started in 1838 by David Fairchild & Son. At the end of one year it passed into the hands of the son, Corydon Fairchild, its present publisher.

The Seneca Falls Democrat was commenced in 1839 by Josiah T. Miller, and was continued 10 years.

The Seneca Democrat, semi-w., was issued a short time from the same office.

The Seneca Falls Register was commenced in 1835 by J. K. Brown, and was continued 2 years.

The Memorial was commenced at Seneca Falls in 1840 by Ansel Bascom, and was continued until 1846.

The Water Bucket was published at Seneca Falls by an association of Washingtonians in 1841.

The Free Soil Union was commenced at Seneca Falls in Aug. 1848, by N. J. Milliken, and continued about 1 year.

The Lily was commenced at Seneca Falls in 1849 by Mrs. Amelia Bloomer, and was continued until 1854, when it was removed to Ohio.

The American Reveille was commenced at Seneca Falls in Jan. 1855, by Wilkinson, Sherman & Baker. In 1856 it was purchased by C. Wilkinson, and was continued by him until Jan. 1857, when it passed into the hands of Holly & Stowell, the present publishers.

[5] The first locks on this river were made by the Seneca River Navigation Company, in 1815.

[6] Mr. Van Clief was one of the 100 men dispatched by Sullivan under Col. Gansevoort, directly E. from the head of Seneca Lake,

were speedily occupied. In 1791 the State Road, known as the "*Genesee Road*," was laid from Whitestown to Geneva; and this soon became the great highway for immigration. This road crossed the extreme w. portion of the Military Tract; and many of the early settlers were old soldiers who had drawn their portion of public land here.

COVERT—was formed from Ovid, April 7, 1817. Lodi was taken off in 1826. It lies upon the w. shore of Cayuga Lake, in the s. E. corner of the co. Its surface is an upland descending from its w. border and terminating in a steep and almost precipitous bluff upon the shore of the lake. This bluff rises 100 to 200 feet above the water, and the summit of the slope is about 400 feet higher. The town is watered by Trumansburg Creek and many smaller streams, flowing into Cayuga Lake. These streams have worn ravines in the slate and shales to the depth of 20 to 40 feet, the sides being nearly precipitous. In summer they are nearly dry, but during heavy rains they become fierce mountain torrents, bounding and seething in their confined channels and leaping from high precipices to mingle with the calm and peaceful waters of the lake. The soil is a gravelly and clayey loam. The whole surface is arable, except the steep declivities of the lake bluffs. **Farmersville,** (Farmer p. o.,) in the N. part, contains 3 churches, a steam sawmill, foundery, and machine shop. Pop. 350. **Covert,** (p. o.,) in the S. E. part, **Halls Corners,** near the center, and **Kellys Corners,** in the N. W., are hamlets. **Port Deposit** (Trumansburg Landing p. o.) is a steamboat landing near the S. E. corner. The first settler was Philip Truman, who located at Goodwins Point before 1792.[1] The first religious services were held at the house of Mr. King, by Elder Thomas; the first church (Bap.) was organized in 1805.[2]

FAYETTE—was formed from Romulus, as "*Washington*," March 14, 1800. Its name was changed April 6, 1808. Junius was taken off in 1803. It lies on the S. bank of Seneca River and extends from Seneca to Cayuga Lake. Its surface is rolling and inclined toward the N. From Seneca Lake the land beautifully slopes upward, forming some of the most delightful situations for residences in the co. Upon Cayuga Lake the shores are lower and in some places are marshy. The highest point in town is about 200 feet above Seneca Lake. The streams are mostly small brooks flowing with rapid currents, and at a few places furnishing limited water power. In some parts the corniferous limestone is extensively quarried, both for lime and for building purposes. The soil is a deep, rich loam, composed of clay, gravel, and sand. Near Canoga Village is an immense spring in a basin 14 feet in diameter, and from it flows sufficient water to form a large and valuable water-power. The spring also emits nitrogen gas. **Canoga,**[3] (p. v.,) in the N. E. part, on Cayuga Lake, contains 2 churches, a gristmill, 2 sawmills, and 197 inhabitants. **South Waterloo,** a suburb of Waterloo, on the S. bank of Seneca River, contains 1 church and 597 inhabitants. **Bearytown,** (Fayette p. o.,) on the line of Varick, is partly in this town. **West Fayette,** in the S. W. corner, and **Rose Hill,** in the W. part, are p. offices. The first settlement was made by James Bennett, from Penn., who located upon the shore of Cayuga Lake in 1789.[4] Red Jacket, the Seneca chief and orator, was born near Canoga Spring. There are 8 churches in town.[5]

JUNIUS—was formed from "*Washington*," (now Fayette,) Feb. 12, 1803; Wolcott (Wayne co.) was taken off in 1807, Galen (Wayne co.) in 1812, and Seneca Falls, Tyre, and Waterloo in 1829. It is the N. W. corner town of the co. In this town are numerous small, isolated gravel and clay ridges 30 to 75 ft. high, all extending in a general N. and S. direction. The numerous small streams that drain the town flow N. into Clyde River. Among the narrow valleys in the E. part is a limited amount of swamp land. The soil is a good quality of gravelly loam. **Dublin,** (Junius p. o.,) N. W. of the center, contains 1 church and 25 dwellings. **West Junius** is a p. o. near the S. W. corner. **Thorntons Corners** is a hamlet. The first settlements were made by Thos. Bodell and Jesse, Sam'l, and David Southwick, about 1795.[6] The first church (Cong.) was formed in 1811; three years after it was changed to a Presb. There are also 2 M. E. churches in town.

LODI—was formed from Covert, Jan. 27, 1826. It borders upon Seneca Lake, and is the S. W.

to lay waste the lands of the Cayugas, Onondagas, and Oneidas that had previously accepted destruction.

1 Among the other early settlers were Nathaniel, Reuben, and Barker Kelly, from Dutchess co., in 1793. Jonathan Woodworth and sons Nathaniel, Charles, and Orasmus, and Daniel Underhill, from Norwalk, Conn., Minard and Joseph Thomas, in 1794; and Turtellus Kingsley, in 1796.

2 This was the first church formed in the co. The census reports 1 church, 2 R. p., Univ., and 1 R. C. in D.

3 The name of the village, derived from that of the spring, is an Indian word said to signify "sweet water."

corner town in the co. Its surface is mostly inclined toward the w. and N., a small portion only lying E. of the summit. The bluff bordering upon Seneca Lake is 150 to 250 ft. above the surface of the water; and the highest part of the central ridge is 500 ft. higher and about 1,200 ft. above tide. The principal streams are Mill Creek, flowing N. W. through near the center, and Sheldrake Creek, in the N. W. corner. Mill Creek separates the highlands into two distinct ridges, the declivities being very abrupt. Upon this stream are several fine cascades. Lodi Falls, where the creek leaps down the precipitous bluff which borders upon the lake, are 125 ft. high. The water has worn a deep and irregular channel in the shale rocks one mi. back from the face of the bluff. The soil is principally a gravelly loam mixed with the disintegrated rocks. **Lodi,** (p. v.,) in the N. part, contains 2 churches, a gristmill, and 380 inhabitants; **Townsendville,** (p. v.,) in the S. E. part, a church and 20 dwellings. **Lodi Center** (p. o.) is a hamlet. **Lodi Landing** is on Seneca Lake, at the mouth of Mill Creek. The first settlement was made by Geo. Faussett, from Penn., who settled in the S. W. part in 1789.[1] There are 5 churches in town.[2]

OVID—was formed March 5, 1794. Hector (Schuyler co.) was taken off in 1802, and Covert in 1817. It lies S. of the center of the co., and extends from Seneca to Cayuga Lake. Its surface consists of an arable ridge, 600 ft. above Seneca Lake and about 1,100 ft. above tide, descending from W. of the center toward the lakes. The bluffs upon the lakes are 20 to 50 ft. high, and nearly perpendicular. A great number of small streams flow into both Cayuga and Seneca Lakes, the principal of which are Sheldrake, Osborn, Groves, and Barnum Creeks on the E., and Sixteen Falls Creek on the W. These streams have all worn deep, ragged ravines in the yielding shales. They are frequently interrupted by cascades, and in summer are nearly dry. The soil consists principally of clay and gravel intermixed with sand and the disintegrated rocks. **Ovid,** (p. v.,) near the N. line, contains a courthouse, co. clerk's office, 3 churches, the Ovid Academy,[3] a steam mill, and ax factory, and about 650 inhabitants. **Ovid Landing** is just over the town line in Romulus. **Sheldrake Point,** (Sheldrake p. o.,) a steamboat landing upon Cayuga Lake, contains a church, steam sawmill, boat yard, and 168 inhabitants. **Ovid Center** contains 20 houses. **Kidders Ferry,** (p. o.,) near the S. E. corner, and **Scotts Corners,** near the center, are hamlets. The first settlement was made in May, 1789, by Andrew Dunlap, from Penn., who located on Lot 8, in the N. W. part of the town.[4] The first religious services were held at the house of Abraham Covert, in 1794. The first settled preacher (Ref. Prot. D.) was John Lindley, in 1800.[5] The New York State Agricultural College and farm are located on the N. line of this town, W. of the village.[6] In the S. part of the town are the remains of an ancient fortification.[7]

ROMULUS—was formed March 5, 1794. Fayette was taken off in 1800, and Varick in 1830. It lies S. of the center of the co., and extends from Seneca to Cayuga Lake. Its surface is rolling or moderately hilly and has a general northerly inclination. The high bluff from Ovid extends into the S. border of the town, where it drops down abruptly about 200 ft. The land slopes from the center downward to the E. and W. The streams are small and generally flow in deep channels. The surface is smooth, except along the courses of the streams, and is nearly all arable. The soil is a fertile, gravelly and clayey loam. **Romulus,** (p. v.,) on the line of Varick, contains a church, steam sawmill, female seminary, and 36 dwellings. **Hyatts Corners,** in the S. E., contains 20 dwellings. **Romulus Center** is a p. o. **Whitneys Landing** is a station upon Cayuga Lake; and **Cooleys** and **Freleighs Points** and **Ovid Landing** are stations upon Seneca Lake. The first settlement was made by David Wisner, in 1789. There is but one church (Bap.) in town.

[1] Mr. Faussett brought in his family in 1790. Jas. Jackson, from Penn., settled in the N. W. part in 1788; Silas Halsey, from L. I., near Lodi in 1792. The next year his sons and sons-in-law and their families, numbering 18 persons, came in. The first child born was a daughter of Geo. Faussett. Peter Smith kept the first inn, and Silas Halsey built the first gristmill, in 1794.

[3] In 1850 the name of this institution was changed to the Seneca Collegiate Institute.

[4] The first settlers, mostly from Penn. and N. J., followed the trail of Sullivan's army and located in the W. part of the town. Among them were Wm. Dunlap and Joseph Wilson, from Penn., Peter Smith, from N. J., and Henry Wharton, in 1789; Abraham Covert and his son Abraham A., from N. J., in 1790; Elijah Kinne, from Dutchess co., and John Seely, from Saratoga co., in 1792. Nicholas and Richard Hull, Peter Hughes, Abraham De Mott and his son James, in 1793; and William and Robert Dunlap and Tennis Covert, in 1794. In the summer of 1795, Jonas C. Baldwin settled on Lot 11, where he remained until 1801, when he moved out and removed to Lysander, Onondaga co., and laid the foundation of Baldwinsville. The first child born was David, son of Andrew Dunlap, Feb. 2, 1790, and the first death was that of George Dunlap, brother of Andrew, Sept. 24, 1791. A triple marriage in 1793 was the first in town. The parties were Joseph Wilson and Anna Wyckoff, Abraham A. Covert and Catherine Covert, and Enoch Stewart and Jane Covert. They were obliged to cross Seneca Lake to find a justice authorized to perform the ceremony. Benj. Munger taught the first school, in 1795; John McMath kept the first store, in 1797, and the first inn, in 1800; and B. Boardman erected the first mill, in 1793, on Lot 2.

[5] The Ref. are now in town 7 churches, 2 Presb., 2 M. E., Ref. Prot. D., Bap., and R. C.

[6] This institution was incorporated in 1853, and the buildings are now in process of erection. They were designed by S. E. Hewes, of Albany, and consist of a main building 90 ft. front and 132 deep, having a wing on each side 84 by 60, and three stories high, 58 by 128. It is designed to accommodate about 400 students. The farm contains 600 acres.

[7] On Lot 29, within ½ mi. of the S. line of the town, and exactly on the dividing ridge between the two lakes, once existed a mound or fortification of an irregular, elliptical form, inclosing about 3 acres, and surrounded by an embankment of earth, which in 1801 was about 3 feet in height, with a base of 8 feet in width. The present proprietor, George Bo Dine, with his father, removed here in 1802, and built a house within the inclosed space, where he has since resided until within a few

SENECA FALLS—was formed from Junius, March 26, 1829. It lies upon the w. [illegible] of Cayuga Lake, N. of the center of the co. The surface is nearly flat, and it is elevated [illegible] above Cayuga Lake. The shores of the lake are low and sloping, and the N. portion is swampy. Seneca River flows E. and N. through the center of the town, its valley dividing the town into two distinct parts. The river flows over a series of ledges into a deep chasm, apparently worn by its waters. Just E. and S. W. of the village are extensive gypsum quarries. The soil is a stiff hard clay in the central E., a sandy loam in the N. W., and a heavy vegetable muck in the N. E. **Seneca Falls,** p. v., on Seneca River, near the center of the town, was incorp. April 22, 1831. It is a station on the N. Y. C. R. R. and the Seneca Canal. The total fall is 51 feet, and furnishes an [illegible] water-power, which is largely improved. It contains 7 churches, the Seneca Falls Academy, a union school, 2 newspaper offices, extensive manufactories of fire engines, pumps, machinery, iron, and woolen goods, and a great variety of other articles.[2] Pop. about 4,000. The first settlement was made by Job Smith, from Ulster co., upon the present site of the village in 1787; he left in 1793. The first permanent settler was Lawrence Van Clief, in 1789.[3] The first religious services were held by M. E. missionaries, about 1797; and the first regular minister was Rev. Matthew Stewart, (Presb.,) in 1804.[4]

TYRE—was formed from Junius, March 26, 1829. It is the N. E. corner town of the co. The E. half is a swamp, being the s. termination of the Montezuma Marshes. The w. half is occupied by peculiar drift ridges similar to those already described in Junius. These ridges are [illegible] 50 feet high, and generally have very steep declivities upon all sides except the S. One of the longest of these, in the w. part of the town, extends nearly two-thirds of the distance from the s. line to the N. Its summit is nearly level; and the road which is located upon it appears as though built upon an artificial embankment. The soil is clay and muck in the E. and a gravelly loam in the w. **Tyre City,** Tyre p. o.,) near the center, contains 2 churches and 20 dwellings. **Cruso** is a p. o. on the N. line. The first settlement was made by Ezekiel Crane, from N. J., who came in 1794.[5] The first church (Bap.) was formed in 1805. Elder Don Ralph was the first preacher.[6]

VARICK—was formed from Romulus, Feb. 6, 1830. It extends from Seneca to Cayuga Lake, across the center of the co. Its surface is slightly inclined toward the N. The slopes of the ridges are

years. The work was evidently of great antiquity,—the timber on the mounds being of the same size and appearance as that in the surrounding forest. Upon the bank and in the ditch large oak trees, the growth of centuries, were standing. In the enclosure were several pits, a few feet in width, which were probably used for ovens or cisterns. In making an excavation for a cellar on the E. side, 6 skeletons were found, but the depth of about 2 feet. This was in 1847. Several had been found previously, and, though all the settlers of the town had long since heaped the teeth and bones of the dead, human bones are remained. In all the embankment may still be found pieces of a coarse kind of pottery, ornamental pipes, &c. De Witt Clinton visited this place in 1810; and his theory is that these [illegible] were the remains of such works as those found occupying the most commanding positions in Western New York, and in the Valley of the Ohio and Mississippi, and that they were more civilized than the Indians, and that they preceded the latter in the occupation of the country. Time out of mind and antiquity, their annals lie in the dust of forgotten research, and their history will remain a sealed book perhaps forever. The Indians were evidently [illegible] found this fertile region [illegible] than they found it.

The soil is a gravelly loam intermixed with clay. **Bearytown,** (Fayette p. o.,) upon the line of Fayette, in the N. E. part, contains 3 churches, a steam sawmill, stave factory, and 128 inhabitants, of whom 51 are in this town. **Romulus** (p. v.) lies on the s. border. **East Varick** (p. o.) is a landing upon Cayuga Lake. **McDuffee Town** is a hamlet in the S. WATERLOO—was formed from Junius, March 26, 1829. It lies on the N. bank of Seneca River, N. W. of the center of the co. The surface is almost one unbroken flat. A marsh extends E. and W. through the town S. of the center, and another occupies the N. E. corner.[2] The bed of Seneca River, on the S. boundary, is almost level with the general surface. The soil is muck and clay in the N. and E., gravel along the N. border, and a sandy loam in the center and W. **Waterloo,** (p. v..) on Seneca River, near the E. border of the town, was incorp. April 9, 1824. It is a station upon the N. Y. C. R. R. and upon the Seneca Canal. A fall of 24½ feet in Seneca River furnishes an excellent water-power, which is mostly improved. It is a half-shire of the co., and contains the courthouse, 6 churches, the Waterloo Union School, a bank, a large shawl factory,[3] 3 distilleries, 2 malt houses, 3 flouring mills, 5 sawmills, 2 founderies and machine shops, 2 oil mills, and numerous other manufactories.[4] Seneca River above the falls, being seldom frozen, is navigable throughout the year. This village is an important depôt of lumber from the S. W. cos., and of coal from the Susquehanna and Blossburg Mines. Pop. 3,050. **South Waterloo,** formerly called "*Schoyes,*" is on the opposite side of Seneca River, in Fayette. Settlement was commenced by John Greene, from R. I., in 1789.[5] The first religious services were held about 1816.[6]

[1] The first child born was a son of James McKnight in 17[illegible].

[2] The waters of Black Brook which flow through the central part of the town are impregnated with earthy and vegetable matter, which gives to them the peculiar quality of coloring the finest of linen fabrics of the most delicate and durable tints, lasting from the time of the bleacher.

[3] The Waterloo Woolen Manufacturing Co. was organized in 18[illegible], with a capital of $[illegible]0 to $[illegible]0 thousand. They have 2[illegible] looms, 4 sets of cards, and 4[illegible] hands, and annually manufacture [illegible],000 yards of shawls. This is next to the Bay State Mills, the largest shawl factory in America.

[4] Among these establishments are a plaster mill, [illegible] and dry [illegible], 4 [illegible] gin and shovel mills, [illegible] mill, [illegible] and washboard factory, and 2 cabinet and furniture shops.

[5] Among the other early settlers were Jabez Gotham, from Rhode Island, who located upon the present site of the village. Simeon Dutton was from Saratoga. Came about the same time. The first child born was John Smith in 1788; the first marriage that of John Smith and Miriam Gotham, in 1790; and the first death that of John Gregory and James Hall, two Revolutionary soldiers who lived [illegible] in this town, settled upon the road [illegible], and about 1808. Isaac Gotham erected the first sawmill in 1800. Jabez Gotham kept the first tavern, about 1794. Charles Swart the first store, in 1815, and James Rees built the first mill, in 1794.

STEUBEN COUNTY.

This county was formed from Ontario, March 16, 1796, and named in honor of Baron Steuben. The [illegible] was annexed to Allegany co. March 11, 1808, [illegible] Crooked Lake to Ontario co. Feb. 25, 1814, a part of Dansville to Livingston co. Feb. 15, 1822, and a part to Schuyler co. April 7 1854. It lies upon the s. border of the State, considerably w. of the center, is centrally distant 188 mi. from Albany, and contains 1425 sq. mi. Its surface mostly consists of ridges and high, rolling uplands, forming the northern continuation of the Alleghany Mts. The watershed between Lake Ontario and [illegible] extends from Allegany co. eastward across the s. part [illegible] deep valley of Crooked Lake breaks the continuity of the highlands and extends 17 mi. s.w. from the head of the lake, connecting with the Conhocton Valley at Bath, and forming one of the numerous natural passes between the southern valleys and the basin of Lake Ontario. The highlands occupying the s.w. corner of the co. also form a portion of the watershed, being drained by branches of Canisteo River on the E. and of Genesee River on the w. The highest summits in the co. are about 2,500 feet above tide.[1]

The upland region has nearly a uniform elevation, with a slight inclination toward the N. It is intersected by numerous deep valleys, which have evidently been excavated by the action of water.[2] The formation of the steep hillsides which border upon these valleys is such as to prove conclusively that they were once united, and that a wide, rolling plateau spread over the region now so irregular and broken. The principal of these valleys are those of Canisteo and Conhocton Rivers, extending nearly N. W. and S. E. through the co. From these valleys numerous others diverge at nearly right angles and branch off into countless deep, crooked ravines, intersecting the plateau in every direction. The hills that border upon these valleys are usually steep and 300 to 600 feet high.

Conhocton River flows S. E. through near the center of the co. In high water it was once navigable for arks 14 mi. above Bath. It receives from the s. w. Neils, Bennetts, Campbells, Stockton, Michigan, and Stephens Creeks, and from the N. E. Twelve Mile, Ten Mile, Five Mile, (or Kanona,) Mud,[3] and Meads Creeks. Canisteo River flows through a valley s. w. of the Conhocton and [illegible] parallel to it. In freshets it rises 6 to 8 feet, and is then navigable for boats and arks about 40 mi. Its chief tributaries are Canacadea, Crosby, Purdy, Bennetts, Col. Bills, and Tuscarora Creeks, all from the s. w. Tioga River rises in Penn., flows N. through a deep, wild mountain valley, and unites with the Canisteo at Erwin, and with the Conhocton at Painted Post, from the latter place the combined stream taking the name of Chemung River.[4] Canaseraga Creek, flowing N., drains the N. W. corner of the co.; and several small streams rising in the s. w. corner form branches of Genesee River. Crooked Lake lies along the N. E. border, in a deep valley nearly surrounded by steep hills 500 to 800 feet high. Little Lake lies in a shallow valley along the E. border of the town of Wayne. It discharges its waters s. into Mud Lake, and through Mud Creek into Conhocton River. Loon Lake, in Wayland, lies in a valley which is the southern continuation of the valley of Hemlock Lake in Livingston co. Still further s., in the [illegible] Mud Lake, a small sheet of water, the outlet of which flows s. and empties into the Conhocton.

The shales and sandstones of the Portage group outcrop in all the deep ravines in the N. part of the co. and in the w. bank of Crooked Lake. Elsewhere, the Chemung group composes most of the surface rocks. Near the State Line the highest hills are capped with a coarse, silicious conglomerate, which forms the floor of the coal measures.[5] A feeble brine spring is found at La Grange,

[illegible]

[illegible]

3 Mud Creek [illegible] Mud Lake in Steuben co. At the first settlement of the co. this stream was navigable, and [illegible] Conhocton to the Susquehanna, and thence to the Baltimore market. Since the [illegible] this stream has [illegible]

and sulphur springs in Campbell, Jasper, and Urbana. The soil in general is composed of detritus of the adjacent rocks, and is better adapted to grazing than tillage. Upon the intervales along the larger streams the soil is a fertile alluvium. The extensive flats upon the Chemung are among the finest agricultural lands in the State. Agriculture forms the chief occupation of the people. Grain is largely produced on the alluvial lands, and stock is extensively raised on the uplands. Stock and wool growing and dairying are the principal branches of agriculture pursued. Lumbering is still extensively carried on,—though it is gradually decreasing. The manufactures are principally confined to lumber, articles of wood, and the heavier and coarser products necessary to an agricultural region.

The co. is divided into the northern and southern Jury Districts, the co. buildings being respectively situated at Bath and Corning.[1] The courthouse at Bath is a commodious brick building, erected in 1828.[2] The jail is built of wood and closely surrounded by other buildings. The cells for prisoners are in the basement, and are not provided with any means of ventilation. Its arrangements show a culpable neglect and an entire disregard of the general sentiments of the co. and of the age. The co. clerk's office is permanently located at Bath. The courthouse at Corning is a fine brick edifice, erected in 1853–54 at a cost of $14,000. The jail at Corning was erected at the same time. The courts are held alternately at Bath and Corning. The co. poorhouse is located upon a farm of 214 acres about 2 mi. N. E. of Bath Village.[3] The average number of inmates is 75; and they are supported at an average weekly cost of $1.00 each. The farm yields a revenue of about $2,000. No instruction is afforded; but the children of proper age are bound out.

The New York & Erie R. R. enters the co. from Chemung and extends along the valleys of the Chemung, Tioga, and Canisteo Rivers to Hornellsville, and the Canacadea to the w. border of the co. It passes through Corning, Erwin, Addison, Rathbone, Cameron, Canisteo, and Hornellsville.[4] The Buffalo, N. Y. & E. R. R. extends N. W. from Corning up the Conhocton Valley, through Erwin, Campbell, Bath, Avoca, Cohocton, and Wayland, to the N. border of the co. This road intersects the Genesee Valley R. R. at Avon, the N. Y. Central at Batavia, the Buffalo & New York City at Attica, and the N. Y. & Erie at Corning. The Hornellsville Division of the Buffalo, New York & Erie R. R. extends N. W. up the valley of the Canisteo from Hornellsville, passing through that town and the S. W. corner of Dansville. The Blossburg & Corning R. R. extends from Corning, through Erwin and Lindley, S. along the Tioga Valley to the Blossburg coal region. Crooked Lake is navigated by steam and canal boats, and forms a link in the chain of the internal water communication of the State. It is united with the Erie Canal at Montezuma by Crooked Lake Canal, Seneca Lake, and the Cayuga and Seneca Canals. The Chemung Canal navigable feeder extends from Corning E. to Horseheads, in Chemung co. Considerable lumber is floated down the rivers and finds a market at Philadelphia and Baltimore. These various works of internal improvement afford ample facilities for the transportation of goods and passengers, and bring the farm products of the co. into close proximity to the Eastern markets.

Six newspapers are published in the co.[5]

1 Upon the organization of the co., in 1796, the co. buildings were located at Bath. A wood courthouse, one and a half stories high, with two wings, was erected the same year. It was remodeled in 1828 and the present brick courthouse erected. About the time of the erection of the first courthouse, a jail was built of hewn logs, which was superseded by the erection of the present jail in 1845. By an act of the Legislature passed July 19, 1855, the co. was divided into two jury districts, and the co. buildings for the southern district were located at Corning.

2 The first co. officers were William Kersey, *First Judge*; Abraham Bradley and Eleazer Lindley, *Associate Judges*; Geo. D. Cooper, *Co. Clerk*; William Dunn, *Sheriff*, and Stephen Ross, *Surrogate*.

3 This establishment consisted of 3 buildings—one of brick and two of wood—containing altogether 31 rooms. In Sept. 1859, the two frame buildings were burned, and 6 persons, inmates of the establishment, perished in the flames.

4 The road was opened to Corning, Jan. 1, 1850, and to Hornellsville, Sept. 3, of the same year.

5 *The Bath Gazette and Genesee Advertiser*, the first paper published in Western New York, was established at Bath by Wm. Kersey and James Lallie, in 1796, and was continued several years. In 6 months from its first issue its circulation had reached 1,000 copies.

The Steuben and Literary Patriot was started at Bath in 1815 by Benj. Smead, and was continued until 1822. It was then changed to

The Farmer's Gazette and Steuben Advertiser. In 1849 it passed into the hands of William C. Rhoades, and in 1857, into those of P. S. Donahe, by whom it is now published as

The Steuben Farmers' Advocate.

The Farmers' Gazette was commenced at Bath in 1816 by David Ramsey.

The Steuben Messenger was started at Bath, April 17, 1828, by David Ramsey, and was published by him, Saml. M. Eddie, Wm. P. Agnel, and Chas. Adams successively until 1834, when its name was changed to

The Constitutionalist, and its publication was continued successively by R. L. Underhill, Whitmore & Van Valkenburgh, and Dowe & Richards, and by the last named firm as

The Steuben Democrat, until 1844. The paper was then suspended. In 1848 it was renewed by L. J. Beach, and in 1849 it was transferred to Geo. H. Bidwell, by whom the publication was continued until 1852.

The Steuben Whig was published at Bath during the political campaign of 1828, by William M. Swain.

The Steuben Courier was established at Bath in 1843 by Hull & Whittemore. It is now published by H. H. Hull.

The Temperance Gem was published at Bath in 1854, by Jenny and Caroline Ramsey.

The Addison Record was published in Addison by Isaac D. Booth from 1841 to 1842, and in 1849 by Dryden & Beck.

The Advocate was published by H. D. Dyer in 1848–49.

The Voice of the Nation was commenced at Addison by R. Denton in 1852. In 1855 the paper passed to Anthony L. Underhill, by whom it was published until 1856, when it was removed to Bath and its name changed to

The Steuben American, and its publication continued until May, 1857.

The Canisteo Express was published at Addison in 1850 by T. Messenger.

Steuben co. was all included in the Phelps and Gorham Purchase. It was sold by Phelps and Gorham to Robert Morris, who conveyed it to Sir Wm. Pulteney and others, in London. The territory was surveyed into townships and lots by Wm. Bull, for the Pulteney estate, in 1792. Sales were made by townships, at 18 and 20 cts. per acre. The first settlements were made in 1787, by immigrants from Wyoming, Penn., who located upon Chemung River, in the S.E. part of the co. These early settlers were originally from Conn. About 1790, settlements commenced in the w. part, adjoining Yates co. In 1792–93, Capt. Chas. Williamson,[1] agent of the Pulteney estate, commenced a settlement at Bath. He was accompanied by a large number of Scotch and other immigrants; and under his energetic and liberal policy the settlement progressed with great rapidity. The greater part of the early settlers came from Penn., by way of the Susquehanna and Chemung Rivers. Subsequently large numbers came from Eastern New York, New England, and New Jersey.[2] The co. was divided by the Court of General Sessions, in 1796, into the towns of Bath, Canisteo, Dansville, Fredericktown, Middletown, and Painted Post, comprising the territory now forming 31 towns of this co. and parts of Allegany, Yates, Livingston, and Schuyler cos. In 1796 the population was 165; in 1800 it was 1,788; and in 1855, 62,995. In extent of territory and in agricultural wealth it now ranks among the first cos. in the State.[3]

ADDISON[4]—was formed, as "*Middletown*," in March, 1795. Its name was changed to Addison in 1808. A part of Troupsburgh was taken off in 1808, Cameron in 1822, a part of Woodhull in 1828, and a part of Rathbone in 1856. It lies upon the s. border of the co., just E. of the center. The surface is mostly a hilly upland, broken by the valley of the Canisteo and its branches. The principal valley is about 1½ mi. wide and is bordered by steep hillsides 300 to 400 feet high. The principal streams are Canisteo River, and the Tuscarora, Elks Lick, and Goodhue Creeks. Goodhue Lake, covering an area of about 500 acres, lies in the N.W. corner of the town. The soil is principally a clay loam, with strips of gravel and alluvium upon the streams. **Addison,** p.v., on Canisteo River, contains 3 churches, a bank, several mills and manufacturing establishments. Pop. about 1,300. **South Addison** (p.v.) contains 18 dwellings. **Addison Hill** (p.o.)

The Addison Herald was started in 1841 by R. Porter, and was removed to Addison in 1842.

The Addison Democrat was established by Chas. L. Phelps in 1845, and was merged in The Advocate & the Nation in 1846.

The Addison Advertiser, established in 1858 by J. M. Addison & Henry Baldwin, is still published.

The Corning Journal Extra was commenced at Corning in 1840 by Chas. Adams. In 1841 it passed into the hands of Henry H. Hull, by whom it was merged, in 1842, in the Steuben Courier at Bath.

The Corning Journal was established by Thomas Messenger in May, 1847. In 1851 it passed to A. W. McDowell and C. W. Pratt, and in 1852 to Dr. Pratt, its present publisher.

The Corning Star was started in 1853 by M. M. Pomeroy and P. C. Van Gaasbeek. In 1854 Eva Tea Brown became the publisher and changed its name to

The Elmira Star and Corning Star Extra and continued until 1856.

The Corning Star was published for a time with the spread of 1856.

The Corning Democrat was established in 1857 by Chas. F. Hunter. It is now published by Francis B. Brown.

The Corning Herald was started by [illegible] in 1858 and continued [illegible].

The Elmira Star Herald was published by Hawley & Bennett [illegible] 1858.

The Hornellsville Tribune was established in Nov. 1857, by Irwin Heath. It is now published by F. Heath & Son.

The News was established at Hornellsville in 1858 by C. M. Harwood. In Nov. 1858 it passed into the hands of Chas. A. Keyes, and [illegible].

AVOCA[3]—was formed from Bath, Cohocton, Howard, and Wheeler, April 12, 1843. It is an interior town, lying N. W. of the center of the co. The surface is mostly a broken upland, divided into two ridges by the valley of the Conhocton. The declivities of the hills are steep, and their summits are about 400 feet above the river. The streams are Conhocton River and its tributaries Twelve Mile and Ten Mile Creeks from the N., and Bennetts and Neils Creeks from the S. W. The valley of the river is about 1¼ mile wide. The soil is a clayey and gravelly loam. **Avoca,** (p. v.,) situated in the valley of the Conhocton, is a station on the B., N. Y. & E. R. R. It contains 2 churches, an iron foundery, and a flouring mill. Pop. 301. **Wallace** (p. o.) is a station on the B., N. Y. & E. R. R. The first settlement was made in 1800, by Michael Buchanan.[4] There are 2 churches in town; Bap. and M. E.

BATH[5]—was formed March 18, 1796. Pulteney was taken off in 1808, a part of Howard and Cohocton in 1812, a part of Wheeler in 1820, Urbana in 1822, a part of Avoca in 1843, and a part of Cohocton in 1852. A part of Urbana was annexed April 26, 1839. It lies a little N. E. of the center of the co. Its surface is broken and hilly. The Conhocton Valley, extending S. E. through the center, divides the town into two nearly equal parts. The S. half is a hilly upland, and the N. half consists of a series of wide valleys broken by several steep and isolated hills. The streams are Conhocton River and its tributaries Five Mile and Mud Creeks from the N., and Campbells and Stocktons Creeks from the S. The Crooked Lake Valley extends N. W., and opens into the Conhocton Valley at the village of Bath, 340 feet above the lake. The soil is chiefly a gravelly and clayey loam, with a deep alluvium in the valleys. **Bath,** (p. v.,) incorp. April 12, 1816, is situated upon the N. bank of the Conhocton. It is a half-shire of the co. It commands the trade of a rich agricultural district and has a manufacturing business of considerable importance. It contains the co. buildings, 6 churches, 2 banks, and 2 newspaper offices. Pop. 2,012. **Kanona,**[6] (p. v.,) N. W. of Bath, a station on the B., N. Y. & E. R. R., contains 2 churches and 40 houses; and **Savona,**[7] (p. v.,) S. E. of Bath, a station on the same R. R., contains 2 churches and 232 inhabitants; **Sonora** (p. v.) contains 1 church and 20 houses. The first settlement was made at Bath Village, in 1793, by Charles Williamson, land agent for the Pulteney estate, with 15 families, mostly Scotch and Germans.[8] The first settled minister was Rev. John Niles, who moved to the town in 1807.[9]

BRADFORD[10]—was formed from "*Jersey*," (now Orange, Schuyler co.,) April 20, 1826. A part was annexed to Orange, April 17, 1854. It lies near the center of the E. border of the co. Its surface is a hilly upland, broken by the valley of Mud Creek. Mud Lake, near the E. border, in Schuyler co., is 1,100 feet above tide, and the summits of the hills are about 600 feet above the lake. The soil is generally a gravelly and clayey loam and best adapted to pasturage. **Bradford,** (p. v.,) on the outlet of Mud Lake, in the N. E. part of the town, contains 1 church and a gristmill and has a pop. of 260. **South Bradford** (p. v.) contains 1 church and 20 houses.

[1] Among the first settlers were Elisha Gilbert, Saml and Reuben Searls, John and Isaac Martin, Wm. Wombaugh, Wm. B. Jones, Israel Chamberlain, Jesse Rowley, Amos Corey and Amos Towsley. The first birth was that of Stephen Rice; the first marriage, that of Brown Gillespie and Miss Colbert; and the first death, that of James Martin. Wm. Wombaugh built the first sawmill, in 1805, and the first gristmill, in 1806. The first store was kept by Samuel Smith and the first inn by Reuben Searls.

[2] [illegible] reports 8 churches in town; 3 M. E., Bap., F. W. Bap., Prot. E., Presb., and R. C.

[3] Probably named from an Irish Melody, "The Meeting of the Waters," or from "Moore's Melodies." The early settlers called the place "*Hockorora*," or the "*Bright Meadows*."

[4] Among the first settlers were Joel Collier, Asa Phelps, James McWhorter, Finley McClure, Daniel McKenzie, Abraham Towner, Jonathan Tilton, James Robinson, John Dye, Ely Beard and John Van Buskirk, Deacon Taylor, [illegible] Moody, Henry and Allen Smith. James Davis and Samuel W. Buchanan were among the first settlers. Michael Buchanan, 2d, was born in 1800. Michael Buchanan died in 1851, and James McWhorter and [illegible] Buchanan were married in 1812. Eleazur Tucker built the first sawmill, and Jonathan Tilton the first gristmill, in 1825. Joel Collier kept the first inn, in 1808, and Alonzo Simmons the first store, in 1830.

[5] Named from Lady Bath, early child and heiress of Sir Wm. Pulteney, of London. She was married July 15, 1765, by Sir John Lindsay, to Sir [illegible] who was appointed Indian Trust agent. His Indian name was Tarachiagoudacte. *McMaster's Hist. Steuben, pp.* 111, 142.

[6] Formerly "*Kennedyville*" post, from a resident named Kennedy.

[7] Formerly "*Mud Creek*" [illegible]

[8] Dugald and Charles Cameron, Thos. Metcalf, Hector McKenzie, Andrew Smith, Gen. McClure, James McDonald, Henry McElwee, James Reese, Robert Campbell, and William Dunn settled in the town in 1793; and Wm. Iverson, John Wilson, Geo. D. Cooper, Daniel McKenzie and Gustavus and Brewer Colegrove soon after. Charles Williamson Dunn, born in 1795, was the first male child born in town. The first saw and gristmills were built in 1793, by Charles Williamson, and the first inn was kept the same year, by John Metcalf.

The proprietors of the Pulteney estate indulged in visions of boundless wealth to result from the settlement of their lands. They supposed that the natural avenue to market from the rich "Genesee country" was down the Susquehanna, and that a city might be founded upon some of the headwaters of that stream which would command the entire trade of the West. After a survey of the region, the present site of Bath was selected as the location of the future city. Every inducement was held out to lure settlers, and for several years the projects of Bath proved a mine of wealth to the few who raised more grain than enough for their own use. Williamson erected a theater within a few years after the first settlement, in anticipation of the future metropolitan character of the place. A race course was also established which for many years attracted spectators from all parts of the country. The golden visions of our grandsires were never realized.

[9] The census reports 3 churches in town, 3 Presb., 2 Bap., 2 M. E., Prot. E., and R. C.

[10] Named from Gen. Bradford.

The first settlement was made in 1793, by Frederick Bartles and John Harvey, from New Jersey.[1] Rev. E. Sanford was the first preacher in town; and Rev. Mr. Loucks, Bap., who settled in town in 1816, was the first settled minister. There are 2 churches in town; Bap. and M. E.

CAMERON[2]—was formed from Addison, April 16, 1822. Thurston was taken off in 1844, and a part of Rathbone in 1850. It lies a little s. of the center of the co. Its surface is a high, rolling upland, broken by the deep valley of Canisteo River, which flows s. e. through near the center of the town. The soil is a clayey and gravelly loam. **Cameron,** (p.v.,) on the Canisteo, is a station on the Erie R. R. and contains 2 churches and 35 houses: **West Cameron** (p.v.) contains 1 church and 15 houses. **North Cameron** is a p.o. The first settlement was made in 1800, by Richard Hadley, Phineas Green, Samuel Baker, and Ira Pratt.[3] Rev. Ira Bronson (M. E.) was the first settled preacher. The census reports 5 churches.[4]

CAMPBELL[5]—was formed from Hornby, April 15, 1854. It is an interior town, lying s. e. of the center of the co. Its surface consists of high, broken ridges, separated by the valleys of the streams. The declivities of the hills are generally steep and their summits are 300 to 500 feet above the valleys. The streams are Canisteo River, flowing s. e. through the w. part of the town, and its tributaries Wolf Run, McNutt Run, Meads Creek, Dry Run, and Stephens and Michigan Creeks. The valley of the river is about 1½ mi. wide. The soil is a clayey and gravelly loam on the highlands and a rich alluvium in the valleys. **Campbelltown,** (p.v.,) on the Canisteo, is a station on the B., N. Y. & E. R. R., and contains 1 church, 3 sawmills, a flouring mill, 2 breweries, and about 20 houses. **Curtis** is a station on the same R. R. Settlement was commenced in 1800.[6] The first church (Presb.) was organized in 1831; Rev. B. B. Smith was the first settled pastor. There are 2 churches in town; Presb. and M. E.

CANISTEO—was formed in March, 1796. A part of Troupsburgh was taken off in 1808, Hornellsville in 1820, and parts of Greenwood and Jasper in 1827. A part was annexed to Troupsburgh in 1818. It is an interior town, lying s. w. of the center of the co. The surface is mostly a hilly upland, broken by the deep valleys of the streams. Canisteo River flows eastward through the N. part of the town. Its valley is about ½ mi. wide and is bordered by steep hillsides 400 feet high. From the s. the river receives Bennetts and Col. Bills Creeks, which also flow through deep valleys bordered by steep hills. The soil is generally a clayey and gravelly loam. **Canisteo,** (p.v.,) on Bennetts Creek, in the w. part of the town, is a station on the N. Y. & Erie R. R., and contains 2 churches, a flouring mill, a tannery, and 60 houses: **Crosbyville,** (p.v.,) a station on the Erie R. R., contains 1 church and 20 houses. **Center Canisteo** (p.o.) is a hamlet of 10 houses. **Bennetts Creek** is a p.o. in the s. w. part. The first settlement was made in 1789, by Uriah Stephens, Sen., from Conn.[7] The first preacher—Rev. Geo. Spaulding—settled in town in 1805. There are 3 churches in town.[8]

CATON—was formed from "*Painted Post*," (now Corning,) as "*Wrisley*," March 28, 1797, and its name was changed April 3, 1840. It is the s. e. corner town of the co. Its surface is a rolling upland, more nearly level than most towns in the co. A considerable portion is yet covered with forests. The streams are small brooks, flowing northward. The soil is a clayey and shaly loam. Lumber is extensively manufactured. **Caton,** (p.v.,) near the center of the town, contains 3 churches and 34 houses. A temporary settlement was made in town in 1814, by Joseph and Charles Woleott; but the first permanent settlement was made in 1819, by Isaac Rowley, from Bradford co., Penn.[9] The first church (Presb.) was organized in 1822; and the Rev. Benj. Harrem was the first settled pastor.[10]

[1] Named from Calvin Blood. This is rendered an important station upon the R. R. from its connection with the Canandaigua Lake People. A daily line of stages runs to Naples, at the head of the Lake, and a steamer plies daily between the latter place and Canandaigua.

[2] James and Aruna Woodward settled in the town not long after; Joseph Chamberlain, in 1805; and Saml. Chamberlain, Capt. Jonas Cleland, Joseph Shattuck, Horace Fowler, and —— Eddy, in 1806. Timothy Sherman, James Barnard, Saml. Rhoades, Jesse Atwood, Isaac Morehouse, and Chas. Burlingame were also early settlers. The first marriage was that of Jos. Bivin and Sarah Hooker, in 1798; and the first birth, that of Bethiah Hooker, their child, in 1800. The first death was that of Richard Hooker, Feb. 19, 1801. Jonas Cleland built the first saw and grist mills, in 1808, and Jos. Shattuck kept the first inn, in 1809. Sophia Trumbull taught the first school, in 1810.

[3] Named from Hon. Erastus Corning, of Albany.

[4] In the summer of 1779, a party of tories and Indians, under the command of a Loyalist named McDonald, returned from an incursion into the Susquehanna settlements, bringing with them many of their number wounded. At the confluence of Tioga and Canisteo Rivers, Captain Montour, son of the famous Queen Catharine, took leave of his wounded. "His comrades buried him by the riverside, and planted above his grave a post on which were painted various symbols and rude devices. This monument was known throughout the Genesee Forests as '*The Painted Post*.' It was a landmark well known to all the Six Nations, and was often visited by their braves and chieftains." This account of the origin of the Painted Post was given to Benj. Patterson, the hunter, by a man named Taggart, who was carried to Fort Niagara a prisoner by McDonald's party, and was a witness of the burial of Capt. Montour, or at least was in the encampment at the mouth of the Tioga at the time of his death. Col. Harris, of Harpersfield, the well known officer of the frontier militia of New York in the Revolution, informed Judge Knox, of Knoxville, in this co., that the Painted Post was erected over the grave of a chief who was wounded at the battle of the "Hog-Back" and brought in a canoe to the head of the Chemung, where he died. It was well understood by the early settlers that this monument was erected in memory of some distinguished warrior who had been wounded in one of the border battles of the Revolution and afterward died at this place. The post stood for many years after the settlement of the co.; and the story goes that it rotted down at the butt, and was preserved in the bar room of a tavern till about the year 1810 and then mysteriously disappeared. It is also said to have been swept away in a freshet.—*McMaster's Hist. of Steuben. Stone's Hist. Schoharie, p. 353.*

[5] In 1852, 40,000 tons of Blossburg coal, brought by the Blossburg & Corning R. R., were transhipped at this place, and 50,000,000 feet of lumber were exported.

[6] Named from Judge John Knox, of this town.

[7] Benj. and Peleg Gorton, jr., Ephraim Patterson and his sons Ichabod and Stephen, Bradford Eggleston, Justus Wolcott, Elias, William, and Henry McCormick, Hezekiah Thurber, Jonathan Cook, Samuel Colgrove, and Eli and Uriah Mead settled in the town in 1790-91-92; Jonathan and Warren Rowley, in 1794. James Turner and Caleb Wolcott, in 1795; George McCulloch and Benj. Patterson, in 1796; and Nehemiah Hubbell, in 1798. The first birth was that of James Calkins, Nov. 4, 1790, the first marriage that of Benj. Gorton and Rachel Wolcott, in 1794; and the first death, that of Ichabod Patterson, in Aug. 1794. Ichabod Patterson built the first sawmill, and Jno. Henderson the first gristmill, both in 1793; Benj. Eaton kept the first store, in 1791, and Benj. Patterson the first inn, in 1798. The first school was taught by Samuel Colgrove, in 1793.

THURSTON[12]—was formed from Cameron, Feb. 28, 1844. It is an interior town, lying S. E. of the center of the co. Its surface is mostly a high, broken upland, forming a portion of the dividing ridge between Conhocton and Canisteo Rivers. The summits of the hills are 500 to 600 feet above the river valleys. The streams are Stocktons Creek, in the N. W., and Michigan Creek, in the S., flowing in deep, narrow ravines bordered by steep hillsides. The soil is a shaly and gravelly loam. **Merchantville,** in the E., **Bonny Hill,** (p. o.) in the S., and **Risingville,** (p. o.) in the W., are hamlets. **Thurston** and **South Thurston** [illegible]. The first settlers were William Smith, Luke Bonny, and Anderson Carpenter, at Bonny Hill, in

[1] Col. Lindley served with the Jersey Blues during the Revolutionary War. He has numerous descendants in this town, who are connected by ties of consanguinity with two-thirds of the families. Samuel and Lemuel Lindley, Mathew and John Smith, [illegible] Daniel Cook, and Elizabeth Cook, and their families, were among the first settlers. Rev. Thomas Lindley, nephew of Col. Lindley, taught the first school, near the Penn. line, in 1793; the [illegible] Lindley, in the [illegible] erected by Col. Lindley. There is no church, no hotel, nor place [illegible] in the town.

1813.[1] The first religious association (M. E.) was formed in 1814; Rev. Parker Buell was the first preacher.[2]

TROUPSBURGH—was formed from "*Middletown*" (now Addison) and Canisteo, Feb. 12, 1808. Parts of Greenwood and Jasper were taken off in 1827, and a part of Woodhull in 1828. A part of Canisteo was annexed April 4, 1818. It lies on the S. border of the co., W. of the center. Its surface is principally a hilly upland, broken by the deep valleys of small streams. The highest summits are 2,500 feet above tide and are the highest points in the co. Troups Creek, flowing S., is the principal stream. The soil is a slaty and clayey loam. **Troupsburgh Center,** (Troupsburgh p. o.,) on Troups Creek, near the center of the town, contains an academy[4] and 20 dwellings; **South Troupsburgh** (p. v.) contains 16 dwellings. **East Troupsburgh,** (p. o.) **West Troupsburgh,** (p. o.,) and **Young Hickory** (p. o.) are hamlets. The pioneer settler was Samuel B. Rice, from Conn., who located E. of the center of the town in 1805.[5] The first religious association (M. E.) was formed at the house of Samuel Cady, by Rev. Parker Buell, first preacher. The census reports 5 churches.[6]

URBANA—was formed from Bath, April 17, 1822. A part was annexed to Bath in 1839; a part of Wheeler was annexed May 3, 1839, and a part of Pulteney April 12, 1848. It lies at the head of Crooked Lake, N. E. of the center of the co. Its surface is divided by Pleasant Valley (a continuation of Crooked Lake Valley) into two series of highlands, rising 800 to 1,000 feet above the lake. Cold Spring Creek takes its rise in this valley and flows N. E. to the lake. The soil in the valleys is alluvial, and on the hilltops a heavy, gravelly loam. From their sheltered situation, the slopes of the hills descending to the S. and E. are finely adapted to the culture of the grape.[7] The town is noted for the production of a superior quality of fine wool. **Hammondsport,** (Urbana p. o.,) at the head of Crooked Lake, was incorp. June 16, 1856. It contains 2 churches and several manufacturing establishments. A daily line of steamboats plies between this place and Penn Yan. Pop. 560. **North Urbana,** (p. v.,) in the N. E. part of the town, contains 2 churches and 20 houses. **Cold Spring** is a hamlet; and **Mount Washington,** in the S. E., is a p. o. William Aulls and his son Ephraim, from Penn., settled at Pleasant Valley in 1793.[8] Elder Ephraim Sanford (Bap.) preached the first sermon, at the house of Mr. Baker, in 1795.[9]

WAYLAND[10]—was formed from Cohocton and Dansville, April 12, 1848. A part of Fremont was taken off in 1854. It is the most western town upon the N. border of the co. Its surface is an upland, rolling in the N. and moderately hilly in the S. It forms a portion of the watershed between Susquehanna River and Lake Ontario; and its highest summits are 1,600 to 1,800 feet above tide. The streams are small creeks and brooks. Loon and Mud Lakes are situated in a valley in the S. part of the town, and their waters flow in opposite directions. The outlet of the former is subterranean for half a mi.; and where it comes to the surface it is in sufficient volume to form a valuable mill stream. The soil in the N. is gravel and muck, and in the S. a shaly loam. **Wayland,** (Wayland Depôt p. o.,) in the N. E. part of the town, contains 40 dwellings. It is a station on the B., N. Y. & E. R. R. **Perkinsville,** 2 mi. S. W. of Wayland, contains 2 churches and 30 dwellings. **Patchins Mills** is a hamlet. **Loon Lake** is a p. o. The first settlement was made in 1806-07, by Thos. Bowles and John H. Miller.[11] The census reports 3 churches.[12]

[1] Amos Dickinson settled in 1814; and Joseph Fluent at Bonny Hill in 1817. The first settlers at Aldrich settlement were William Jack, Samuel Fisk, and Thomas Aldrich, in 1825. The first child born was Irena Smith, in 1815; the first marriage, that of Joseph Fluent and Fanny Dickinson, in 1818; and the first death, that of Anderson Carpenter, killed by the falling of a tree, in 1817. The first school was taught at Bonny Hill, by Caroline Vincin, in 1818; the first store was kept by Harlow Sears, at Merchantville. No tavern was ever kept in the town, and no license was ever granted to sell liquor.

[2] The census reports 4 churches; 2 M. E., Bap., and Christian.

[3] Named from Robert Troup, of N. Y., general agent of the Pulteney estate.—*Turner's Phelps and Gorham Purchase*, p. 279.

[4] This institution has an average attendance of about 60 pupils.

[5] Peter Young and Peter Dalson, from Addison, settled near Mr. Rice, in 1806; Lieut. Reynolds and Jonathan Rogers settled at the same place in 1809, Geo. Martin in 1810, and James Works in 1811. The first child born was Polly Young; the first marriage, that of Zebulon Tubbs and Sarah Rice; and the first death, that of Jeremiah Martin. Abner Thomas taught the first school, a little E. of Troupsburgh Village: Lieut. Reynolds kept the first inn, 4 mi. from the Center, and Ichabod C. Leach the first store, 2 mi. from the Center. Geo. Martin erected the first gristmill, at Troupsburgh Village. [6] 2 Bap., 2 M. E., and F. W. Bap.

[7] In 1867, 30 acres were devoted to vineyards, and the success of the experiment was so great that the number of acres was doubled in 1868. There are about 2,000 acres in town with the S. and E. inclination adapted to this purpose.

[8] Samuel Baker, Eb Read, and William Barney settled in Pleasant Valley in 1794, and Capt. Amos Stow, Capt. John Shether, James Shether, and Richard Daniels in 1795. These settlers were from New England most of them from Conn. They had served through the Revolutionary War, some of them with distinction as officers, and all were men fit to the privations and dangers incident to pioneer life. The first child born was Saml. Baker, jr.; the first marriage, that of Jonathan Barney and Polly Aulls, in 1794; and the first death, that of John Phillips, in Sept. of the same year. Elizabeth Norris taught the first school, in 1796, at Pleasant Valley. Caleb Chapman kept the first inn, at N. Urbana. Henry A. Townsend the first store, at Cold Spring, in 1815. John Shether built the first saw-mill, in Pleasant Valley, in 1795; and Gen. Geo. M. Clure, the first gristmill, at Cold Spring, in 1802.

[9] The census reports 6 churches, 2 Bap., and 1 each Presb., M. E., Prot. E., and R. C.

[10] Named from Rev. Dr. Francis Wayland, of R. I.

[11] Among the early settlers were Adam Zimmerman, David Brown, —— Kauzet, Stephen Hicks, Thos. Bogole, Solomon, James, and Elisha Brownson, Isaac Willis, Walter and Dr. Watson Patchin, Icanus Hess, Benj. Perkins, and Samuel Draper. The first sawmill was built by Benj. Perkins; and the first gristmill, by Dugald Cameron and Aliph Fowler, in 1815. Saml. Taggart kept the first inn, in 1827; and James L. Monier, the first store, in 1830. The first school was taught by Thos. Wilbur, in 1811.

SUFFOLK COUNTY.

THIS county[1] was organized Nov. 1, 1683. It comprises the [illegible] of Long Island, embracing about two thirds of its [illegible] and includes several smaller islands off the [illegible] coast. It is centrally distant 138 mi. from Albany, and contains 1,200 sq. mi. The E. extremity of the island is divided by Gardiners and Peconic Bays into two nearly equal parts, which are Gardiners, Shelter, and Robins Islands. A [illegible] extends from the N. branch nearly to the [illegible]. The coast, composed of alluvial sand and shingle, broken only by occasional inlets, skirts the S. shore of the island, enclosing several large, irregular bays, the principal of which are Great South, East, Shinnecock, and Mecox Bays. "This great beach is a line of spits and islands. One of the islands is about 25 mi. long, with a breadth of a few hundred yards. They are all narrow and long; and when above the reach of the surf they are covered by a labyrinth of hillocks of drifted sand, imitating almost all the variety of form which snow drifts present after a storm."

The action of the waves and winds is gradually extending this beach. Off the S. coast the sea is very shallow; 50 mi. from the shore its depth nowhere exceeds 40 fathoms; and sandbars at a considerable distance from the beach approach so near the surface as to break the waves into a surf. The traveler along the beach is seldom out of sight of a wreck.[3] Irregular branches project inland from Long Island Sound, in the W. part of the co., and from the bays upon the S. and E. The peninsulas and points thus formed are locally known as "*necks.*" Upon the S. side of the island these necks generally take the name of the stream E. of them. An irregular range of hills extends E. and W. through the co., a little N. of the center. A second range, commencing in Brookhaven, extends into the S. branch of the island, terminating at Canoe Place and reappearing farther E. as the Shinnecock Hills. Along the N. border of the co. the surface is somewhat broken; but in the S. it is very level. In the E. part are several fresh water lakes, and a few in the central and W. parts, the principal of which is Lake Ronkonkoma, on the W. border of Brookhaven. The principal streams are Peconic River, in the E., and the Connecticut, in the central part. The soil is generally a light, sandy loam, moderately fertile along the coasts; but in some parts the surface consists of almost sterile plains or barren sandhills. The interior of the island, from near the foot of the hills to within one or two mi. of South Bay, is occupied by the "*brush plains,*" which are sparsely inhabited and hardly susceptible of cultivation. Thousands of acres of these plains were burned over in 1844 and '45; and a thin growth of scrub oak, 3 to 4 feet high, has since sprung up on the burned tract.[4] Along the coast are extensive salt marshes. No native rock is found within this co.; and the whole island, except a few rocks near Hellgate, appears to belong to the drift formation or to have been formed as a strand of the sea. The waters of the sea are slowly encroaching upon the land of the E. and N. parts.

The various branches of agriculture form the leading industrial pursuits.[5] Successful husbandry in this co. involves a large expenditure for fertilizers,[6] which to considerable extent are obtained from the neighboring seas. Immense quantities of bony fish[7] are caught for this pur-

[3] From Nov. 1, 1854, to June 28, 1855, 7 vessels [illegible] on this coast, 27 [illegible] and 2 [illegible] were wrecked on the [illegible] coast. The Government has established 26 life-boat stations upon the S. shore, (of which 19 are within this co.,) 1 on Fishers Island, 1 at Orient Point, and 2 upon the sound. Each station is supplied with boats, [illegible] and rockets for throwing lines, and at each a keeper is in constant attendance. [illegible] the provisions of the act of Feb. 18, 1847, "*all matters* [illegible] are appointed by the Governor and Senate in and for the several counties bordering upon the seashore. Of these there are 15 in Suffolk co. It is their duty to render every [illegible] to [illegible] distressed vessels. A project has recently been formed of constructing a telegraph line from Montauk Point to Brooklyn, with stations along the beach, so that intelligence may be transmitted in season to admit of aid being sent to vessels in distress.

[4] [illegible] of these tracts [illegible] The fires destroyed not only the forest trees, but every vestige [illegible] deer and other animals, perished in them. These lands are [illegible] destroyed they become nearly worthless.

[5] Corn and potatoes are the leading agricultural exportations. [illegible] raised. Wheat is one of the principal crops. [illegible] Suffolk [illegible] pose by all the rest of the State.

pose, and are used either alone or in connection with seaweed, stable manure, compost, guano, ashes, and other fertilizers. Oysters and clams abound in the bays and seas around the island; and the taking of these, and fishing, form the principal occupations of the inhabitants along the shore. From the first settlement of the co. considerable attention has been given to whaling. This business was originally carried on in open boats from the shore;[1] but large vessels are now sent upon long voyages to the Polar Seas.[2] The preparation of "fish guano," and oil from bunkers,[3] shipbuilding, and brickmaking are the principal manufacturing interests of the co.[4] At Fire Island, Greenport, and Orient, and at most of the villages along the s. county road, are extensive hotels, especially fitted for the accommodation of families from New York City, great numbers of whom spend the summer months at these public houses or in private families.

The county seat is located at Riverhead.[5] The courthouse is a fine two story brick building, situated near the depôt, and contains the usual county offices, and accommodations for the sheriff's family.[6] The jail, situated in rear of the courthouse, is a two story stone octagonal building. The county clerk's office is a fireproof brick building. The co. has no poorhouse.[7]

The first regulation concerning public roads was adopted under authority of an act of General Assembly passed in 1724, and was kept alive by repeated enactments. Commissioners appointed by this authority about 1733 laid out 3 principal roads from w. to E. These were called the North, Middle, and South Country Roads, and upon them the principal villages and settlements are located. The project of opening a navigable communication between the bays upon the s. shore of the island was recommended by Gov. Clinton in 1825, and was subsequently authorized by law, but was never carried into effect.[8] The Long Island R. R. affords the principal avenue of business through the island.[9] Short stage routes connect the several villages along the N. and S. shores with the R. R.

Seven newspapers are published in the co.; 2 at Greenport, 2 at Huntington, 1 at Sag Harbor, 1 at Patchogue, and 1 at Riverhead.[10]

When Long Island first became known, it was inhabited by 13 tribes of Indians, of which all but two resided wholly or in part in this co.[11] Of these the Montauks were the most numerous

[1] At present 3 whaleboats at Mastic Point, 2 at Shinnecock near Southampton, and several at Bridgehampton, Easthampton, and Amagansett are kept in constant readiness for use upon the beach. They are manned, bottom upwards, upon a stagging, and are well supplied with oars, lances, harpoons, and other necessary tackle. During the winter and spring months a lookout is kept, and when a whale appears a signal calls the neighborhood to the chase. A year seldom passes without one prize, and sometimes half a dozen are captured.

[2] The whaling interests of this co. received a severe check upon the discovery of gold in California. Many whaleships were fitted out for the trade with that region, and upon the return that fall were sold. The number of whaleships now belonging to the co. in 1873, and the greatest number at any one time in 1845, 47, was 88.

[3] The manufactories of fish guano and oil are in Southold and upon Shelter Island, and on Napeague Beach. The fish are heated by steam, and the oil is extracted by hydrostatic presses. The residue is dried and ground for guano. Forty tons of fish yield 9 tons of guano and 840 gals. of oil. It is claimed by many that this manufactured article possesses all the valuable properties of the Peruvian guano.

[4] Salt was formerly made from seawater at Sag Harbor. An extensive business was formerly carried on in cutting wood and shipping it to the New York market. Southold includes, in 1874, as it did in 1824, says that a great portion of the fuel consumed in the city was furnished by the pine plains, and that large quantities were annually sent from Brookhaven. Since the fires of 1844 and '45 but little wood has been exported.

[5] A small two story frame building, erected in 1728, served for both a courthouse and jail. The first court of Oyer and Terminer held in the State Government was held, Sept. 1, 1787.

[6] This building was erected in 1814, and enlarged in 1847–8–9. The commissioners appointed to superintend the latter work were Samuel B. Neill, Wm. R. Post, and Sylvester Miller. By an act passed April 9, 1813, the county of Suffolk was authorized to establish her office in two places, and to appoint a deputy to have charge of one. The records migrated between Islip and Smithtown, and were kept nearly years at Smithtown. The records of the county of Suffolk so, extend back to 1699. The records of the county of General Sessions and Common Pleas have been separately recorded since 1772.

[7] Most of the towns have poorhouses, at which the paupers are provided for at the co. expense.

[8] The Long Island Canal Company, chartered April 8, 1848, was authorized to open a canal to what is now Setauket, and to Port Jefferson, via Stony Brook and Conscience Bay, to connect with Jamaica or Hempstead Bay, Great South, Southampton, and Moriches Bays, and to cross Canoe Place.

[9] The road was opened to Farmingdale Oct. 15, 1843, to Yaphank June 26, 1842, and to Greenport July 29, 1844.

[10] *Frost's Sachem's Long Island Herald* was established at Sag Harbor May 16, 1791, by David Frothingham. In 1802 it was sold to Suffolk Office, and changed to

The Suffolk County Herald. It was sold in Dec. 1804, to Alden Spooner, and its name was changed to

The Suffolk Gazette, and in Feb. 1811, it was discontinued.

The Suffolk Co. Intelligencer was established at Sag Harbor Oct. 19, 1816, by Samuel A. Seaman. In 1817 it was removed to

The American Eagle, 2 years afterward it was discontinued.

The Corrector was started at Sag Harbor Aug. 2, by H. W. Ogden, and is now published by Alden Spooner.

The Republican Watchman was started at Sag Harbor Sept. 18[illegible], by Samuel Pratt. In Sept. 1841, it was united to the Corrector, which is now published by Spooner & Son.

The Suffolk Times was started at Greenport in Aug. 1846, by David Bryant. It is now published by

The American Eagle was established at Riverhead, in 1821 by Samuel A. Seaman. In May, 1826, it was removed to

The Long Island Journal of Politics and General Literature, a county paper, published by Samuel Hart. In 1827 it was changed to

The Patriot, and was discontinued in 1830.

The Long Islander was started at Huntington in July, 1838, by Walter Whitman, and is now published by Geo. H. Shepard.

The Suffolk Democrat was started Feb. 1, 1847, at Huntington, and is now published by Edward Strahan.

The Suffolk Gazette was commenced at Riverhead in Apr. 1849. After 18 months it was removed to Sag Harbor. In Dec. 1854 it was again sent back to Riverhead, and was soon after discontinued.

The Suffolk Herald was established at Patchogue Aug. 14, 1858, by Van Zandt & Co., its present publishers.

The Suffolk Union was started at Riverhead in 1869 by Watson Van Zandt.

[11] The seven tribes were the "*Montauks*," occupying Montauk and a part of Easthampton, the "*Manhassets*," the country about Rockaway and parts of Jamaica and Newtown, the "*Marsapeagues*," the west end of the island from Hunnewells to the town of Huntington, the "*Nesaquakes*," the country from Huntington to Stony Brook, the "*Setaukets*," that from Stony Brook to Wading River, the "*Corchaugues*," all the N. branch of the island from Wading River to the "*Manhassets*" and "*Marsapeagues*," the country up in the s. side of the island as far as Islip, the "*Patchogues*," the country from there and the w. to the Islip, the "*Patchogues*," from the line of Islip to the w. part of Southampton, the "*Shinnecocks*," the country at and near Canoe Place, and thence E. to Easthampton, the "*Montauks*," that now included in the town of Easthampton and the "*Montaukets*," occupying Shelter Island. Of all these tribes there is now a man

and powerful; and the consent of Wyandance,[1] their grand sachem, was procured to the [illegible] of all Indian grants of that date upon the island. The earliest settlement within the co. was made in 1639, on Gardners Island, under title derived from James Farrett, agent of the Earl of Sterling, to whom a grant of the whole of Long Island had been made by the Plymouth Company.[2] Southold and Southampton were settled in 1640, Easthampton in 1648, Setauket in 1652, Huntington in 1653, Brookhaven in 1655, and Smithtown in 1665, by [illegible] from New England. These settlers were strongly imbued with Puritan principles and [illegible] devoted to their strict observance.[3] They naturally sought alliance with the adjacent New England colonies, to whom they were warmly attached, and with whom they were closely united until they were brought under the government of New York. Among the first measures taken by the colonists was the establishment of religious worship and schools, which in most of the towns date from the first or second year of settlement. These were commonly supported by tax, often levied in kind, and sometimes coupled with privileges and grants that are still recognized.

The patents granted by the New York governors created corporations, with municipal powers and privileges which were liberal for that period. These have never been changed, and are still valid. The rights were of two classes,—one belonging to all who might gain a residence and citizenship within the town, and the other pertaining only to the persons named in the patents and their heirs at law. During the Revolution most of the inhabitants of the co. warmly espoused the cause of the colonists; but after the battle of Long Island the British ascendency was complete, and few opportunities occurred for assisting in the popular movement. Several bold and successful incursions were made by partisan corps; but the armed occupation of the island was at no time interrupted.[4] During the latter part of the War of 1812 an English fleet was stationed off the eastern coast; but few depredations were committed. The history of the co. from that day to the present is only the record of the industrial pursuits of a thriving people.

BROOKHAVEN—was incorp. by patent, under Gov. Nicoll, March 13, 1665, with the usual privileges of a township;[5] and Dec. 27, 1686, the patent was confirmed by Gov. Dongan, and extended privileges were granted.[6] It was recognized as a town March 7, 1788. It occupies the entire width of Long Island, near the center of the co. E. and W. It has 20 mi. of coast on Long Island Sound, 21 on South Bay, and above 30 on Fire Island, which skirts the whole S. coast. Patchogue and Bellport Bays, upon the S. coast, are branches of Great South Bay; and Old Mans Harbor and Port Jefferson, Conscience, Setauket, and Flax Pond Bays, are indentations upon the N. coast from L. I. Sound. The principal capes upon the N. coast are Cranes Neck, Old Field Point,[7] Little Neck,[8] Dyers Neck,[9] Mount Misery, and Rocky Point. A range of low hills extends across the N. part of the town: but elsewhere the surface is level. The principal streams are Peconic River, in the E. part, and the Connecticut, in the central. There are several fresh water ponds of great depth and purity in the town, many of which have no outlet. The soil along the coast, both upon Long Island Sound and South Bay, is a moderately fertile, light, sandy loam, and in the interior it is generally unproductive. Along the streams near their mouths are numerous salt meadows. **Port Jefferson** situated at the head of Port Jefferson Bay, on the N. coast. Landing are hamlets on the coast of Long Island Sound. **Patchogue**[1] (p. v.) is situated on Patchogue Bay, in the s. w. part of the town. It contains 4 churches, an academy, and manufactories of twine, paper, cotton, ropes, and flour. Pop. 1,562. **Bellport,** (p. v.,) on the w. side of Bellport Bay, contains 1 church and an academy. Shipbuilding is carried on to a considerable extent. Pop. 383. **Blue Point,**[2] (p. o.,) in the s. w. part, is a hamlet. **Fire Place,** (p. v.,) on Bellport Bay, contains 1 church and about 35 houses; **Moriches,**[3] 4 churches and 50 houses; **East Moriches,** (p. v.,) 40 houses; and **West Moriches** (Moriches p. o.) and **Seatuck,** hamlets, are situated near the coast of East Bay. **Yaphank,**[4] (p. v.,) a station on the Long Island R. R., containing 3 churches and 35 houses, and **South Haven,** (p. v.,) containing 1 church and 20 houses, are situated on Connecticut River. **Mastic**[5] is a hamlet on Mastic River. **Middle Island,** (p. o.,) containing 2 churches, **Selden,** (p. o.,) 1 church, **New Village,** (p. o.,) 1 church, and **Coram,**[6] (Cor-um,) (p. o.,) are hamlets in the central part; and **Wampmissic,**[7] containing 1 church, and **Manorville,**[8] (p. o.,) are hamlets in the E. part. **Center Moriches** is a p. o. **Waverly,** and **Medford,** are hamlets and R. R. stations. The town poorhouse is located near Coram, upon a small farm purchased in 1817 at a cost of $900. The lighthouse on Old Fields Point was built in 1823; and another on Fire Island, near Fire Island Inlet, was built in 1858.[9] The first settlement was made at Setauket,[10] in 1655, by a colony of immigrants from near Boston, Mass.[11] The land was bought from the Setauket Indians, and the sale confirmed by a release from Wyandance, Sachem of Montauk. This settlement was received under the government of Conn. in 1661, and Richard Woodhull and Thos. Pierce were appointed magistrates by the General Court. The tract of land between Islip and Bellport, extending to the center of the island, was purchased of the natives by John Winthrop in 1666, and the title confirmed March 29, 1680.[12] Col. Wm. Smith purchased Little Neck, Oct. 22, 1686, and an extensive tract E. of Connecticut River, extending northward to the center of the co., in May, 1691.[13] Fort St. George, a strongly fortified British post on South Bay, was surprised and taken by a party of 80 men, under Maj. Tallmadge, Nov. 21, 1780. They crossed Long Island Sound from Conn., landing at Old Mans Harbor, marched to Coram, where they destroyed a large amount of forage, and then to Fort St. George, which they captured without the loss of a man. Over 50 men were made prisoners, and a large amount of property was destroyed.[14] Gen. Woodhull,[15] Pres. of the Second and Third Provincial Congresses, Gen. Wm. Floyd, one of the signers of the Declaration of Independence, Col. Richard Floyd,[16] and Maj. Wm. H. Smith, were residents, and Maj. Benj. Tallmadge was a native, of this town. In the infancy of the settlement a building was erected at Setauket, which served the double purpose of a townhall and church.[17] There are now 26 churches in town.[18]

EAST HAMPTON—was incorp. by patent, under Gov. Nicoll, March 13, 1666,[19] and confirmed by Gov. Dongan, Dec. 9, 1686. It was recognized as a town March 7, 1788. It lies at the E. extremity of Long Island, S. of Gardners Bay and Long Island Sound, and includes Gardners Island, lying N. of the mainland. The E. part consists of a narrow peninsula, to which the name, Montauk, is applied. Upon the N. coast are several large bays, some of them nearly landlocked. The principal of these are Northwest, Three Mile, Acabonac, and Napeague Harbors, and Fort Pond Bay. In the central and W. parts the surface is mostly level or gently undulating; but along the coast

1 Name taken from the "*Pechoags*" Indians, who inhabited this locality.

2 Called by the Indians "*Manasactus-patt*," an important oyster bed in Great South Bay, in this vicinity.

3 An Indian name pronounced Mo-ri-ches. Great quantities of fish and wild fowl are sent from this vicinity to the New York market.

4 Yaphank is the Indian name of a small tributary of the Connecticut. The place was originally called "*Masaroe*," and afterwards "*Brookhaven*."

5 The name is applied to a considerable tract of land which the Indians formerly occupied by the Poospatuck Indians, a tribe now reduced to the Pechonghs. Parts of this tract were known as "*Nonowantuck*," "*Connecticut*," "*Unispatuck*," "*Pochaquack*," "*Speonk*," "*Mastic*," and "*Mattatuck*."

6 Named from an Indian chief.

7 The name was given by the Indians to a swamp in the vicinity.

8 Formerly called "*St. George's Manor*."

9 The lighthouse is 167 ft. high and 166 ft. above the sea, and is furnished with a French flashing lens apparatus of superior quality.

10 Then called "*Cromwell Bay*."

11 The family names of these settlers were Woodhull, Hawkins, Whitehaire, Jennet, Perring, Gibb, Satterly, Longe, Tomlin, Rogers, Laney, Longbotham, Lane, Hand, Muncy, Seward, Wade, Sayler, Smith, Avery, Dayton, Davis, Frost, Thomas, Bayly, Thomson, Ward, Roe, Budd, Brooks, Williams, Wadley, Akerly, Coules, Waring, Mapes, Thorp, Elwine, Brewster, Pace, Sharpe, Burnet, Hulme, Garlick, Mager, Pierce, and Ware. Many of these names are still common on the island. By a vote of the inhabitants, taken July 15, 1687, the trustees of the town were directed to establish a school, and Frances Wadhams was employed as a teacher, at a salary of £30 per annum. The first mill was erected at Stony Brook, in 1699.—*Thompson's Hist. Long Island, 2d Ed., I.* 105.

12 A great part of this tract was divided into 36 prizes, and disposed of by lottery for £12,000 in June, 1758.

13 These purchases were confirmed Oct. 9, 1693, under the title of the "Manor of St. George," which included all the town as then founded E. of the Connecticut. A large proportion of this tract is still owned by the descendants of Col. Smith.

15 Gen. Woodhull fell in the battle of Long Island, Sept. 1776, and was buried in this town.

16 The lands of Col. Richard Floyd located in this town were confiscated by the British.

17 The early pastors of the church at Setauket were Revs. Nathaniel Brewster, in 1658, Geo. Phillips, in 1697, David Youngs, in 1716, Benj. Fallowfield, in 1734, Noah Wetmore, in 1786, and Zachariah Greene, in 1797.

upon the s. is a belt of low, shifting sand ridges: and the E. part is broken by low, irregular hills, some of which attain an elevation of 100 ft. above the sea. Near the coast in the s. part of the town and upon the peninsula are several fresh water ponds. The principal of these are [illegible] Fort,' Oyster, Hook, and Georgica Ponds: and their outlets have been closed by sand [illegible] beach. Upon the main portion of the peninsula of Montauk the soil is fertile, but its neck is a barren, sandy waste. In the w. part the soil is a light, sandy loam and is kept highly fertile by the use of manures. Stock raising forms the leading occupation; and to that pursuit Gardners Island[3] and Montauk Point are exclusively devoted. A tract of about 9000 acres, embracing the entire E portion of the town, is devoted wholly to pasturage. It is owned by a company, incorp. as tenants in common, whose affairs are managed by a board of 7 trustees elected annually.[4] Twelve trustees are chosen annually, to whom are committed the management of the town commons, the meadow beaches, and the waters within the bays, the privileges of which are enjoyed by all citizens. A town poor-house is located on a small farm about 2 mi. w. of East Hampton Village. Lighthouses are located upon Cedar Island, at the entrance of Sag Harbor,[5] at the N. extremity of Gardners Island, and upon Montauk Point.[6] **[illegible] Hampton**, (p. v.), about 1 mi. from the beach, [illegible] town, contains 1 church,[7] an academy,[8] 2 windmills, and about 70 houses. **Amagansett,** (p. v.,) a scattered village about 2 mi. E. of East Hampton, contains 1 church. Pop. 270. **Springs,** (p. o.,) near Acabonac Harbor, and **Wainscott,** in the s. w. corner of the town, are hamlets. **Sag Harbor**[9] (p. v.) is partly in this town. The first settlement in this town, and the first English settlement in the State, was made on Gardners Island in 1639, by Lyon Gardner.[10] Settlement in the w. part of the town was commenced in 1648, upon lands purchased of the Montauk Indians, by a company of English families from Lynn, Mass.[11] The government of the colony was purely democratic. The people met in "*General Court,*" and enacted laws, appointed civil and ministerial officers, and acted upon appeals from the decisions of their magistrates. Three magistrates,[12] a recorder, a secretary, and a constable were annually elected. Lands were allotted to individuals, and could not be alienated without the approval of the General Court. In Dec. 1653, they adopted the laws of Conn.; and from 1657 to 1667 they were united with that colony.[13] The inhabitants sided with the colonists in the disputes which led to the Revolution. In June, 1775, an "*Association*" favoring the measures of the Continental Congress was formed, and its articles were signed by every male inhabitant capable of bearing arms.[14] Rev. Thomas James, the first pastor in the town, settled in 1651.[15] There are now 4 churches in town.[16]

HUNTINGTON—was incorp. by patent, as [illegible] Gov. Nicoll, Nov. 30, 1666.[17] The [illegible] was renewed Aug. 2, 1688, and again Oct. 5, 1694. It was recognized as a town March 7, 1788, at which time Eatons Neck and Crab Meadow were annexed. The w. line was established Feb. 17,

2 The Indian name of this peninsula is "*Aquebogue-neck.*" It lies s. of East Pond, [illegible] and is [illegible] long.

3 Gardners Island was by the Indians "*Manchonat*" or "*Manchonake*," and also "*Monchonacki*," and by the Dutch "*Long Island*." It contains [illegible] acres.

4 This island originally belonged to the Montauk Indians and was conveyed by them to the inhabitants of East Hampton in 1648. It had the privilege of keeping [illegible] upon it, and [illegible] was built. Its [illegible] ship was vested in the [illegible] represented at first by 40 shares, valued at £40 each, and were intrusted to the management of the trustees of the town. The shares are now divided into eighths, of which [illegible] eighths are now worth $350 to $400 each. The tract is divided into large enclosures, of which "*the field*" is reserved for fattening stock. Every share entitles its possessor to the privilege of pasturing for "the season" 48 cattle, 14 of them to be [illegible] generally lasts from June 1 to Oct. 20. About 1400 cattle and 1100 sheep are annually kept within these enclosures. Five Indian families reside upon the tract, who own 50 shares and are entitled to the keeping of 50 cattle. These privileges are usually hired of them for $200 per annum.

1787, and Lloyds Neck was set off to Oyster Bay in 1788. This is the W. town of the co. It extends across the island, and has 10 mi. of coast on Long Island Sound and 6 on Great South Bay. It also includes about half of Oak Island Beach, and Cedar and several smaller islands in Great South Bay. The N. shore is deeply indented by Huntington Bay, from which Lloyds Harbor extends to the W., Huntington Harbor to the S., and Northport Bay to the E. Centerport and Northport Harbors branch off upon the S. of the latter bay, and two smaller arms upon the N. W. Great, Little, and Eatons[1] Necks are peninsulas formed by these bays and harbors. Groups of low hills extend through the center, and the surface 2 to 3 mi. from the sound is broken; but elsewhere it is comparatively level. The soil in the N. and S. is fertile; but in the interior it is unproductive. The industrial pursuits are various; whaling, fishing, and taking oysters and clams are some of the leading occupations. Shipbuilding and manufactures receive considerable attention. At the annual election 7 trustees are chosen, to whose care the management of the town property is committed.[2] The town poorhouse is located near Huntington Village. A lighthouse was built upon the point of Eatons Neck in 1798.[3] **Huntington,** (p. v.,) near the head of Huntington Harbor, contains 5 churches, a flourishing union school,[4] 2 printing offices, and a limited number of manufacturing establishments.[5] Pop. 1,328. **Cold Spring,**[6] (Cold Spring Harbor p. o.,) on the E. side of Cold Spring Harbor, contains 3 churches, 2 shipyards, a woolen factory, and other manufactories. Considerable whaling business is carried on from this port.[7] Pop. 602. **Northport**[8] (p. v.) is on the E. side of Northport Harbor. Shipbuilding is here largely carried on. Pop. 430. **Centerport**[9] (p. v.) contains 1 church and 142 inhabitants: and **Vernon Valley**[10] (p. v.) 1 church and 100 inhabitants. **Babylon,** (p. v.,) near Great South Bay, contains 2 churches and has a pop. of 470. This is a favorite resort for hunting and fishing parties. **Amityville,**[11] (p. v.,) in the S. W. part, contains 1 church and has a pop. of 304; **Deer Park,** (p. v.,) a station on the Long Island R. R., contains 12 houses; **Melville,**[12] in the W. part, 1 church and 108 inhabitants; and **Comac,** (Commack p. o.,) in the E. part, 2 churches and 121 inhabitants. **West Hills,** (p. o.,) containing 1 church, and **Dix Hills,** (p. o.,) are hamlets on the Smithtown turnpike. Settlement began near the N. coast, in 1653, by a company from Sandwich, Mass.[13] In 1660 the settlement was received under the government of Conn.; and in 1663 deputies were elected to the General Court at Hartford. Upon the English conquest, in 1664, the town came reluctantly under the government of New York. During the Revolution, companies of tories were stationed here, and many outrages were committed upon those friendly to the independence of the colonies. There are 22 churches in town.[14]

ISLIP[15]—was first recognized as a town by the Colonial Government, Nov. 25, 1710, and by the State Legislature March 7, 1788.[16] It lies W. of the center of the co., and extends from the S. coast to the middle of the island; it has a coast of about 18 mi. on Great South Bay, and includes Cap Tree, Oak, and several other islands off the S. coast. Numerous narrow inlets from Great South Bay divide the coast into distinct "necks," of which there are 35 within the limits of the town. The Connetquot River, and Sam-pe-wans or Thompsons Brook, are the principal streams. The surface is level, except in the N. part, where it is hilly. The brush plains occupy all the central portion; and near the coast are extensive salt meadows. Upon a tract extending along the bay, and varying in width from one to three miles, the soil is fertile. This part of the town is thickly settled; but the remainder is almost uninhabited. The keeping of the town poor is let to the lowest bidders. **Penataquit,**[17] (p. v.,) near the coast, contains 1 church and has a pop. of 292; **Islip,** (p. v.,) 2 mi. E. of Penataquit, contains 3 churches and about 70 houses. **Midroadville,** containing 40 houses, and **Sayville,** (p. v.,) containing 2 churches and 822 inhabitants, are in the S. E. part. **Lake-**

[1] Named from Gov. Eaton, of New Haven, by whom it was purchased of the Indians in 1640. The names "*Eatons Manor*" and "*Governors Neck*" have been applied to it.

[2] The ferry from this town to Norwalk, Conn., which has been maintained from an early period, is under the control of these trustees. Until then patent—which is still in force—the inhabitants claim the exclusive right of taking oysters and clams in the waters within the jurisdiction of the town. Most of the public lands were sold in 1853, and the proceeds invested to meet the ordinary expenses of the town. About 3,000 acres were sold, at $5 to $6 per acre.

[3] This lighthouse is 76 ft. high and 178 ft. above tide. It was built at a cost of $4,000.

[4] The school has an endowment of $7,400, bequeathed by Nathaniel Potter.

[5] I. C. Prime established a thimble factory at this place in 1857. Ten or 12 men are constantly employed, and the finest of gold and silver thimbles are made daily. There is a wind sawmill in this place, erected in 1825.

[6] Called by the natives "*Nechaquatuck*."

[7] Belonging to this port are 5 whaling vessels, with an aggregate of 2,129 tons.

There are 10 churches in town.[4]

RIVERHEAD—was formed from Southold, March 13, 1792. It [illegible] the island, between Brookhaven and Southold, and has 16½ mi. of coast upon Long Island Sound. Peconic River and Great Peconic Bay form the s. boundary, and Wading River[5] a part of the W. The surface in the s. part is level, but in the N. it is hilly. The shore is lined with high and precipitous bluffs of clay and hardpan. The soil is light and sandy, and in most parts but moderately fertile. The poorhouse is located on a farm of 45 acres. **Riverhead,** (p. v.,) an important station on the L. I. R. R., is situated on Peconic River at the head of boat navigation. It is the county seat, and contains the co. buildings, 3 churches, a seminary,[6] and several manufactories.[7] Pop. 813,—723 in Riverhead and 90 in Southampton. From Riverhead E. to the line of Southold, a distance of about 6 mi. upon the "*South Road*," is a continuous settlement, which has received at different places the names **Upper Aquebogue,** (p. o.,) **Old Aquebogue,** [illegible] and **Franklinville,** (West Suffolk p. o. There are 10 churches in town.[9]

SHELTER ISLAND[10]—was incorp. by patent, under Gov. Nicoll, May 31, [illegible] Its government was united with that of Southold until 1730. It was recognized as a town March 7, 1788. It lies between the two peninsulas which form the E. extremity of Long Island, and embraces an area of over 8,000 acres. The island is very irregular; upon all sides jutting headlands extend out into the surrounding waters, and branching bays penetrate into the interior. The principal of these inlets are Coecles, West Neck, and Deerings Harbors. The surface is hilly, and the soil fertile. Grain raising and sheep husbandry form the principal agricultural pursuits. Guano and oil are manufactured in considerable quantities from bony fish caught in the neighboring waters. There is a wind grist-mill near the center of the island. **Shelter Island** is a p. o., centrally [illegible] The island was the ancient residence of the Manhassett Indians. It was purchased for the Earl of Sterling by Jas. Farrett, and was afterward sold to Stephen Goodyear, of New Haven. In 1651 it was purchased by Nathaniel and Constant Sylvester, Thos. Middleton, and Thos. Rowe.[12] The first settlement was made in 1652. The first church edifice was built in 1743.[13]

SMITHTOWN[14]—was organized by patent, March 25, 1677, and [illegible] as a town March 7, 1788. It lies upon the N. side of the island, between Huntington and Brookhaven. Stony Brook and Nissequague Harbors, extending far inland, are separated by the Nissequague Neck. Nissequague River, emptying into the harbor of the same name, divides the town [illegible] equal parts. The surface is considerably broken and hilly. The soil is a light, sandy loam in the s. part, and a clayey loam along the sound. **The Branch,** Smithtown Branch [illegible] Brook, near the center of the town, contains 2 churches and 35 houses; **Smithtown,** Nissequague River, 20 houses; and **St. Jamesville,** (St. James p. o.,) [illegible] Harbor, 1 church and 25 houses. **Fresh Pond** is a p. o., in the N. the line of Islip, and **Nissequague,** on Nissequague Neck, are hamlets. A tract of land, including the principal part of this town, was, in July, 1659, conveyed to Lyon Gardner as a free gift, by Wyandance, Sachem of the Montauks;[1] and in 1662 the grant was confirmed by the Nessequake tribe, by whom the lands were occupied. In 1665 the tract was sold to Richard Smith, and in 1665 the remaining part of the town was purchased of the Indians by him. Fort Slongo, in the N. W. part of the town, was erected by the British during the Revolution. It was captured by a body of Americans, under Col. Tallmadge, Oct. 3, 1781.[2] There are 6 churches in town.[3]

SOUTHAMPTON[4]—was incorp. by patent, under Gov. Andros, Nov. 1, 1676,[5] confirmed by Gov. Dongan, Dec. 6, 1686, and recognized as a town March 7, 1788. It occupies the greater part of the S. branch of Eastern Long Island, and has 30 mi. of seacoast. The entire S. shore is skirted by a beach which is united in a few places with the mainland, separating the enclosed waters into distinct bays, the principal of which are East, Quantuc, Shinnecock, and Mecox Bays; minor bays, branching from these, divide the surrounding shores into numerous irregular "*necks*." The beach which separates the waters of these bays from the Atlantic is unbroken except by a single inlet into Shinnecock Bay. The outline of the N. coast is extremely tortuous; ragged and often nearly landlocked bays project inland, and irregular points of land jut out into the surrounding waters. A range of low hills extends along the N. border of the town, and the Shinnecock Hills occupy the central part; elsewhere the surface is level. The soil in the E. and S. parts consists of a light, sandy loam, and is moderately fertile; but in other parts it is of an inferior quality. A large tract S. of Peconic River is covered with extensive pine forests. Stock raising and the other branches of agriculture form the principal industrial pursuits. The lands are enriched by the application of immense quantities of bunkers. Large tracts of meadow and pasturage lands in different parts of the town are owned by 3 companies, who, in common, elect annually a board of 12 trustees, to whose management the lands are committed.[6] Taking clams and oysters, and whaling, form an important part of the business. The town has a small poorhouse, a short distance E. of Bridgehampton. A lighthouse has been recently erected on Ponquogue Beach.[7] **Sag Harbor,** (p. v.,) in the N. E. part, was incorp. as a fire district in 1803, and as a village March 12, 1819. It contains 7 churches, the Sag Harbor Institute, a newspaper office, a bank, a cotton flannel factory,[8] 2 clock factories, and several manufactories of oil casks. This port has long been noted for the extent of its whaling business.[9] It was made a port of entry in 1784, and by itself now constitutes a district of customs. Pop. 2,776, —2,041 in Southampton, and 735 in Easthampton. **Southampton,** (p. v.,) midway between Shinnecock and Mecox Bays, contains 2 churches, an academy,[10] and 65 houses. **Bridgehampton,**[11] (p. v.,) in the E. part, contains 2 churches and about 40 houses; **Shinnecock,** on the E. side of Shinnecock Bay, is an Indian settlement of about 20 houses.[12] **Sagg, Scuttle Hole** and **Watermill** are hamlets, in the E. part. **Flanders,** (p. v.,) in the N. part, contains 2 churches and about 20 houses; **Speonk,** (p. v.,) near East Bay, contains 2 churches and about 40 houses. **Ketchabonec** and **Quogue,** (p. o.,) near Quantuc Bay, and **Goodground** (p. o.) and **Canoe Place,** near Shinnecock Bay, are hamlets. **Riverhead** (p. v.) is partly in this town. On the morning of the 24th of May, 1777, Col. Meigs, with 130 men, surprised the British force stationed at Sag Harbor, destroyed 12 brigs and [illegible] forage, provisions, and merchandise, and returned across the sound without the loss of a man.[3] A body of American troops was stationed at Sag Harbor in 1813, in consequence of the presence of a British fleet in Gardners Bay.[4] The first church was erected at Southampton, in 1641;[5] and the first church in Bridgehampton was built in 1670.[6] There are now 17 churches in town.[7]

SOUTHOLD was incorp. by patent, under Gov. Andros, Oct. [illegible], and reincorp. as a town March 7, 1788. Riverhead was taken off in 1792. It comprises the principal part of the northern peninsula of Eastern Long Island, and includes Robins Island in Great Peconic Bay, and Plum, Fishers, and several smaller islands in Long Island Sound. Orient[10] is a peninsula upon the E.; and Great and Little Hog Necks are smaller peninsulas in the S. The S. shore is indented by several small, irregular bays; while the outline of the N. coast is unbroken except by 2 or 3 narrow inlets. The surface is elevated and level. The soil is a light, sandy loam, kept highly fertile by the use of manures. Plum Island,[11] separated from the mainland by Plum Gut, contains about 800 acres. Fishers Island, about 8 mi. eastward, is 7 mi. long by 1½ wide and contains about 4000 acres.[12] Great and Little Gull Islands are between Plum and Fishers Islands. Agriculture forms the leading industrial pursuit; potatoes, corn, and wheat are the principal crops.[13] Considerable attention is also given to shipbuilding, whaling, and commerce. A limited amount of manufacturing is carried on.[14] Scattered tracts of lands and beaches, owned by an incorp. company, are intrusted to the management of 3 trustees, elected annually. These lands are represented by 110 shares, valued at $15 each. The town has a poorfarm of 300 acres near Southold Village. Lighthouses are located on Hortons Point, Little Gull Island,[15] and "*The Dumplings*,"—a group of rocks in Fishers Island Sound.[16] **Greenport,**[17] (p. v.,) on Greenport Harbor, was incorp. April 18, 1838. It is a port of considerable whaling and commercial business,[18] and is the E. terminus of the L. I. R. R. It contains 5 churches and 2 printing offices. Pop. 1,665. **Southold,** (p. v.,) near the

It contains 3 churches, the Southold Academy, a savings' bank, and about 80 houses. **Hermitage,** a small settlement, **Cutchogue,** (p. v.,) containing 3 churches and nearly 100 houses, and **Mattituck,** (p. v.,) containing 2 churches and 40 houses, are stations on the L. I. R. R. **New Suffolk,** on Great Peconic Bay, contains 1 church and about 20 houses. **Franklinville** is on the line of Riverhead. **West Southold** is a p. o. **East Marion,**[1] (p. v.,) near the w. side of Orient Harbor, contains a windmill, a tidemill, and 1 church; pop. 300. **Orient,**[2] (p. v.,) on the E. side of the same harbor, contains 2 churches and 60 houses. The first settlement was made about 1640, by Rev. John Youngs and others, from New Haven.[3] The government of this colony, like that of several of the earlier New England settlements, was vested in the church members. None others were allowed to vote or to hold office; and the Mosaic code was adopted as their law. This exclusiveness was of short duration. All citizens were soon admitted to the right of suffrage; and in 1657 the Mosaic code was superseded by one better adapted to the circumstances of the people. Upon the union of New Haven with Conn., in 1662, Southold was united with the latter colony and was represented in General Court. In 1664 the town passed under the jurisdiction of New York. The first church was erected in 1641, in the village of Southold.[4] There are now 17 churches in town.[5]

SULLIVAN COUNTY.

This county was erected from Ulster, March 27, 1809, and was named in honor of Maj. Gen. John Sullivan, of the Revolution. It contains an area of 1,082 sq. mi., and is centrally distant 85 miles from Albany. The surface is generally very hilly, and along the E. border mountainous. In the S. and W. it consists chiefly of ridges separated by narrow ravines; but in the middle and N. it assumes more the character of a rolling plateau. The highlands of this co. may be considered as the S. slope of the Catskills; and near the N. borders of the co. they divide the waters that flow into Hudson and Delaware Rivers. From this elevated portion numerous ridges extend toward the Delaware, giving the co. a general southerly inclination. The Delaware cuts these ridges diagonally, its valley forming the only division between the Catskills and the mountains of Eastern Penn. The highest points in the co. are the hills in the town of Rockland, which are estimated to be 2100 to 2400 feet above tide. Walnut Hill, in Liberty, has an elevation of 1980 feet. The lowest summit of the Shawangunk[1] Mt., between Bloomingburgh and Wurtzboro, is 1271 feet above tide, and the highest summit is about 500 feet higher. This range of mountains at a distance presents a striking uniformity of outline, which is due to the evenness of stratification of the rock composing it. The lowest point in the co. is upon the Delaware, at the mouth of the Mongaup, which has an elevation of 550 feet above tide. The co. line on the Rondout is elevated 773 feet.

With the exception of a small district on its E. border, through which flow the upper waters of Shawangunk Kil and Lackawack Creek, this co. is drained by the Delaware and its branches, the largest of which are Neversink[2] and Mongaup[3] Rivers, Beaver Kil and Bashers Kil, and Callicoon (Caw-li-coon) and Ten Mile Creeks. The Neversink flows entirely across the co., having for its tributaries Bashers Kil, Wynecoop Brook, Bush Kil, Cherry-meadow Brook, and several minor streams. Most of these streams are rapid, and afford at numerous points a great amount of water power. In the valleys and forests of the co. are about 100 small lakes, which form peculiar and often picturesque and highly beautiful features in its scenery. Most of these ponds and streams abound in fish, of which trout is the most common. Pickerel have been introduced into several of them.

The geological formation of the co. is exceedingly simple. The whole surface is underlaid by the red sandstone of the Catskill Group and the Shawangunk Conglomerate. These rocks extend southward into Penn., and form the floor of the coal measures. Of these rocks the latter possesses an economical value for millstones,[4] building stones, and the manufacture of glass. The soil is mostly a reddish loam mixed with gravel, and is generally stony; in the S. E. portion is found some clay. Grass is the staple production, and the hilly character of most of the co. seems to adapt it to grazing rather than to tillage. The facility with which the products of the dairy can now reach the great markets, by means of the N. Y. & E. R. R., has within a few years given an impetus to the prosperity of the co., while the erection of tanneries, which the same thoroughfare has encouraged, has created a home market of great advantage to the farmer. In 1855 there were in the co. about 40 tanneries, producing over $2,000,000 worth of leather annually and employing about 750 laborers. The lumbering interests also employ large amounts of capital and labor. Winter wheat, formerly considered a sure and abundant crop, is found to yield smaller returns and with less certainty as the country becomes older; and other crops, less valuable but more certain, have been substituted to a great extent. The surplus wheat of Sullivan co. was formerly transported by land to the Hudson, where it found a profitable market; but, with the increase of manufactures, there is now less raised than is consumed in the co. Grass seed of a fine quality is raised in considerable quantities. The fruits are limited to apples, pears, plums, cherries, and a few peaches. The timber along the Delaware Valley is mostly hemlock, pine, oak, and chestnut; and on the highlands it is hemlock, beech, maple, birch, ash, and basswood. The climate is cool and bracing, and the co. is remarkably healthy.

[3] On Sauthier's Map, 1779, *Mongawpung*, or *Mingwing*.
[4] Esopus millstones, formerly so highly prized, were made from the Shawangunk grit.

The co. seat[1] is located at Monticello, in the town of Thompson. The co. buildings, consisting of a courthouse and jail, are substantial stone edifices, erected in 1844 in place of the original co. buildings, which were burned.[2] The poorhouse is located upon a farm of 100 acres 3 mi. E. of Monticello. The average number of inmates is 50, supported at a weekly cost of 75 cts. each. The farm yields a revenue of $400. A school is kept during 3 mo. in the year. No religious instruction is afforded. The house is too small, is poorly ventilated, is not furnished with water, and will not admit of a proper classification of its inmates.

The 2 great works of internal improvement within the limits of the co. are the Delaware & Hudson Canal,[3] extending through the S. E. part, and the N. Y. & E. R. R., built along the valley of the Delaware.[4] The former opens an easy and direct communication between the Hudson at Rondout and the Penn. coal mines at Carbondale; and the latter forms one link of the great chain of western travel. Several plank roads have been constructed, as auxiliary to this great thoroughfare, greatly benefiting the sections of country through which they pass. The first newspaper in the co. was issued in 1821.[5]

Little is known of the early history of the co. Many traces exist of its occupation long anterior to that by the present race of settlers. Upon the first advent of the present settlers, a road was found to extend S. W. from Esopus, on the Hudson, along the valley N. of the Shawangunk Mts. It was known as the "*Mine Road,*" and, according to traditional account, was built by a company of miners from Holland, before the English conquest of 1664.[6] Two mines are said to have been wrought,—one where the mountain approaches the Delaware, near the lower point of Panquaroy Flat; and the other N. of the mountain, about halfway between the Delaware River and Esopus Creek. The Minisink Flat, on the border of Orange and Sullivan cos., is said to have been settled by Hollanders many years before the date of Penn's Charter; and the settlement, which extended 40 mi. or more along both sides of the Delaware, had in a great degree become isolated from the rest of the world. When the present settlements were begun, there was a road from the E., near the central part of the co., called the "*Porter Road;*" and in the N. part was another, called the "*Hunter's Road.*"

With the exception of the vague traditions of early settlement by the Dutch along the Delaware, the first location of a permanent white inhabitant is said to have been made about the year 1700, by Don Manuel Gonzales, a Spaniard, who, having married into a Dutch family in Rochester, (Ulster co.,) removed to Mamakating Hollow, where he erected a house and raised grain. He opened a trade with the neighboring Indians, who were then friendly; and other settlers were induced to follow. Mamakating Precinct was formed in 1743, and until after the Revolution it embraced nearly all of the present co. of Sullivan. About 1750 a number of German families settled upon the W. frontiers of Ulster co. They suffered greatly from Indian hostilities. The first Indian incursion took place in 1777, when the family of Mr. Sprague, in Mamakating, was attacked. The next year the family of Mr. Brooks was attacked, some members were killed, and others taken prisoners.

On the 13th of Oct. 1778, a party of nearly a hundred tories and Indians, under Brant, invaded the settlements, first falling upon the family of Mr. Westfall, and killing one man. They next attacked the house of Mr. Swartwout, who was at home with his sons, (the women having been previously removed to a fort,) and killed all but one, who escaped. The firing alarmed others, who fled to the forts at Gumars and De Witts, where, by a skillful display of force by Capt. Abraham Cuddeback, who commanded at the former, the enemy were deterred from making an attack.

[1] By the act of incorporation the Gov. and council were to appoint 3 commissioners to locate the county seat, and the Board of Supervisors 3 others to superintend the erection of the courthouse and jail. Wm. Ross, Jos. Morrell, and Abraham H. Schenck were appointed for the former purpose, and David Hammond, John Lansley, Malachi West, John Newkirk, and Davies Martin successively for the latter.

[2] The first buildings, erected in accordance with an act passed March 22, 1841, were burned Jan. 15, 1844. The first court was held, and the first Board of Supervisors organized, at the house of Curtis Linsley. The county officers first appointed were Wm. A. Thompson, *First Judge*; Samuel F. Jones and Elnathan Sears, *Associate Judges*; John Conklin, Jabez Wakeman, and David Hammond, *Assistant Justices*; James S. Dunning, *Surrogate*; Uriah Lockwood, *Sheriff*; and John P. Jones, *Clerk*.

[3] The Delaware & Hudson Canal Co. was incorp. April 23, 1823. The work was commenced in July, 1825, and completed in Oct. 1828. It was of great importance to the early settlers of the co., as it opened an easy and cheap avenue to market.

[4] This R. R. enters the co. in the town of Tusten from Penn. It having been found difficult to construct the road on the N. Y. side of the river, the right of way for a short distance was solicited from Penn. The petition was granted, and for the substantial benefit which the R. R. conferred upon that State, the company was subjected to an annual tax of $10,000. This road forms a direct and speedy communication with N. Y., and has been of great value to the co. in stimulating its settlement and developing its resources.

[5] *The Sullivan County Whig* was started at Bloomingburgh in 1821, by John J. Tappan. It was removed to Monticello in 1828, and its name changed to

The Republican Watchman. Frederick A. Devoe and James E. Winslow were successively its editors, and since 1843 it has been published by J. E. Quinlan.

The Sullivan County Herald was commenced at Monticello in 1833, and published by M. Smith, S. Phelps, and others, about 4 years.

The Sullivan County Whig was published at Bloomingburgh in 1844, by J. S. Brown, and subsequently by John Waller, Jr. In 1855 it was changed to the

Sullivan County Democratic Republican, under which title it is now published by Waller.

The Union Democrat was established at Monticello in 1854, by F. A. Devoe, and was afterward united with *The Whig.*

[6] See *Eager's Hist. Orange Co.*, p. 50, where will be found a letter from Samuel Preston giving the substance of the tradition. It is from Hazard's Register.

After firing most of the houses and barns of the settlement, the marauders retired, leaving behind them a melancholy scene of havoc and desolation at the verge of an inclement winter. The distress thus occasioned was very great. Major Phillips arrived soon after the incursion with a company of militia; but the enemy had fled beyond reach.

In 1777 or '78, Capt. Graham, with a party of 18 men, went to Chestnut Brook in pursuit of some Indians who had been committing depredations upon the settlements at Pine Bush. Having stopped to drink, Capt. Graham saw an Indian in the path, and the party fired a volley without effect. Upon this the Indians on the opposite banks returned the fire with fatal effect, and but 3 of the party escaped to tell the dismal tale. To deprive the enemy of sustenance and the means for further annoyance, the Legislature, in 1779,[1] enacted a law directing the Governor to cause the destruction of such grain and crops in the w. frontiers of Orange and Ulster cos. as could not be removed to a place of safety. In 1783[2] the precinct of "*Mamacotting*" and the township of Rochester (the district of the regiment of Col. A. Hawke Hay, and that part of the Goshen regiment on the w. side of the Minisink Mts.) were exempted from a levy then made for the defense of the N. and W. frontiers.[3]

Several traces of Indian occupation were found in the first settlement of the co. About 4 mi. from the Delaware, on the Flat, was found a brass or copper tomahawk, with a steel edge, and a handle perforated for smoking. Stone axes, flint arrows, &c. were frequently found. In 1793, an Indian living in Rockland, at a place called "*Pocatocton*," (meaning a river almost spent,) removed to Niagara. He is supposed to have been the last of his race that inhabited the co. Indian trails were found along the Delaware, the Beaver Kil, and in other sections.

The part of this co. s. of the s. bounds of Callicoon and Bethel is comprised in the Neversink Patent, conveyed to Matthew Ling and others Aug. 28, 1704; and the remainder of the co. in the great tract granted to Johannes Hardenbergh and others April 20, 1708, and known as the "Hardenbergh Patent."[4] The Newburgh and Cochecton Turnpike (incorp. March 20, 1801) was opened across the co. in 1808, and gave the first impulse to its prosperity by making it accessible to settlers. This section continued to receive emigrants from New England and the older sections of the State until its growth was checked by the completion of the Erie Canal to the Genesee country and the great lakes, by which emigration was diverted to the new and fertile lands of the West. Real estate in consequence declined materially in value, and many of the early settlers abandoned their locations and joined the westward current. In 1819 or '20 the Orange Branch Turnpike was made, from Montgomery, (Orange co.,) crossing the Shawangunk Mt. at Roses Gap, and extending across the barrens through Wakemans Settlement to the Neversink Falls, and thence to Liberty. The charter of this road was long since given up, but the route is maintained as a district road.

BETHEL—was formed from Lumberland, March 27, 1809. Cochecton was taken off in 1828. It lies upon the high ridges which form the watershed between Delaware and Mongaup Rivers, a little s. w. of the center of the co. Its surface is broken and hilly, and many of the declivities are steep and rocky. It is watered by a large number of small streams, mostly tributary to Mongaup River; and it has many small lakes, which form a beautiful and romantic feature of the landscape. White Lake, near the center,—named from its white sandy shores and bottom,—is noted for the beauty of its scenery.[5] The other principal lakes are Birch Ridge Pond in the N. W., Horse Shoe and Pleasant Ponds in the N., Mallory Pond in the W., Indian Field Pond in the S. E., and Wells Ponds on the S. line, and Chestnut Ridge Pond and Black Lake and Lake Superior in the center. The soil is a sandy and gravelly loam, intermixed in places with clay. The settlements are comparatively new, and the people are chiefly engaged in the raising of [illegible], lumbering, and tanning.[6] **Mongaup Valley** (p. v.) contains 35 houses, and **Bethel** (c. **Bashville** and **White Lake** are p. offices. John Fuller was the first settler in the "Fuller Settlement," in 1806–07.[7] The first preacher (Presb.) was the Rev. Mr. Green.[8]

3 In events connected with these events, and the details of the memorable battle of Minisink in July, 1779, are given more accurately than the year in which they occurred.

4 Portions of the Hardenbergh Patent were settled upon leases of long terms; and during the anti-rent excitement, a few years since, the clamor against this tenure prevailed extensively, but without acts of open violence. The refusal to pay rents which this feeling occasioned, led to a great amount of litigation. Although the excitement has subsided, the question is not fully settled.

5 This lake is noticed in one of the poems of Alfred B. Street, by the name of "Ken-ne-onega."

6 A tannery at Mongaup Valley, in 1856, manufactured 50,000 sides of leather, valued at $187,000. It consumed about 5000 cords of hemlock bark, and employed 75 men, at a monthly pay-roll of $12,000. There are about 102,000 sides of leather manufactured annually at different tanneries in this town.

7 [illegible] 8 The census reports 4 churches, 2 M. E., Presb. and Bap. Presb.

CALLICOON[1]—was formed from Liberty, March 30, 1842. Fremont was taken off in 1851. It lies in the w. part of the co., about the sources of the N. branch of Callicoon Creek. It is watered by numerous streams flowing into the Delaware, the valleys being mostly narrow ravines, and the hills rising in steep declivities 200 to 600 feet above them. In the N. E. are Shandler and Sand Ponds, the latter affording a pure white sand, formerly used in making glass. The soil is mostly a sandy loam, and the hillsides and summits are generally capable of a good degree of cultivation. The settlement is recent, and the people are about equally engaged in lumbering, farming, and tanning.[2] **Jeffersonville,** (p. v.,) on the line of Cochecton, has a population of 433, of which 305 are in this town. **Youngsville,** (p. v.,) **North Branch,** (p. v.,) and **Callicoon Center** (Callicoon p. o.) have each about 30 houses. The first settlers were Wm. Wood and his sons, Gerrett, Edward, and David, who arrived in town May 19, 1814, and lived 15 years in the wilderness.[3] Rev. Mr. McClary, pastor of the Asso. Ref. church of Bethel, was the first preacher.[4]

COCHECTON[5] –was formed from Bethel, March 25, 1828. It is situated upon the bank of the Delaware, in the w. part of the co. Ridges of hills, with narrow valleys between, cover the entire surface of the town. The principal streams are the Callicoon and its branches, and several small tributaries of the Delaware. The mouth of the Callicoon is 777 feet above tide. Pike Pond in the E., Perry Pond in the S., and Mitchells Pond and Lake Huntington in the center, are the principal sheets of water. A large part of the surface is still covered with forests. The soil is mostly a gravelly loam, and best adapted to pasturage. Lumbering and tanning form the leading objects of industry. **Cochecton** (p. v.) contains 269 inhabitants, **Pike Pond** (p. v.) 188, **Callicoon Depot** (p. v.) 207, and **Stevensburgh** (Cochecton p. o.) 209. **Beech Wood** and **Fosterdale** are p. offices. Settlements were begun on the Delaware before the Revolution, but were broken up. The pioneer settler was N. Mitchell, who located near Cochecton Village.[6] The first church (Presb.) was formed in 1839, and the Rev. Mr. Cummings was the first pastor.[7]

FALLSBURGH—was formed from Thompson and Neversink, March 9, 1826. It derives its name from the falls in Neversink River at Fallsburgh Village. Its surface is hilly and rolling. It is drained by the Neversink and its branches. Sheldrake Pond, (named from the wild ducks that formerly frequented its waters,) Smith, Hill, and Brows Ponds in the W., and East Pond, in the E., are the principal lakes. The soil is a gravelly loam. The people are chiefly engaged in lumbering, dairying, and tanning.[8] **Woodbourne** (p. v.) contains 30 houses, **Neversink Falls** (Fallsburgh p. o.) 25, **Hasbrouck** (p. v.) 25, **Loch Sheldrake** (p. v.) 15, and **Sandburgh** (p. v.) 15. It is said that settlement was commenced in this town by Germans previous to the Revolution,[9] but the settlers were driven off during that war. Soon after the peace 3 brothers by the name of Baker located in town and commenced the first permanent settlement.[10] The first church (Ref. Prot. D.) was built at Hasbrouck.[11]

FORESTBURGH—was formed from Thompson and Mamakating, May 2, 1837. It lies principally upon the high ridges between Neversink and Mongaup Rivers, and has a broken surface and an average elevation of 1400 feet above tide. In this town are several small lakes, the principal of which are Ruddicks Pond in the N. W., Beaver Pond in the S., and Panther Pond in the center. The town still retains the character implied by its name. Mongaup Falls, on Mongaup River, 3 mi. above Forestburgh Village, are worthy of note. The river here falls into a chasm 70 feet deep, and the banks below the falls are more than 100 feet high. Lumbering, tan-

[1] Caw-li-coon. This name is said to signify "Turkey" in both Dutch and Indian. The Dutch for turkey is "*Kalkoen*." In the statutes and official publications of the State the name is commonly written "*Callicoon*." *Harper's N. Y. & P. R. R. Guide*, p. 84.

[2] There are 6 large tanneries in town, which manufacture about 125,000 sides of leather annually.

[3] Edward was a cooper, the others were farmers. The first child born was John Wood. Jacob Quick built the first sawmill, and Samuel Young kept the first store and built the first mill, at Youngsville. In 1833–34 settlers began to come in from Conn. and the S., and in 1840 Germans began to settle in the town in considerable numbers. The latter class now form about one-third of the population.

[4] The census reports 2 churches: Luth., Asso. Ger. Meth.

[5] Cochecktun. Originally called "*Cashcunautauk*," or low grounds.

[6] Among the other early settlers were David Young at Big Island, John Ross, at Callicoon Creek; Nicholas Conklin and — Tyler, at Cochecton. Joel Jones taught the first school, Cochecton, May 1. Ebenezer Taylor kept the first tavern and at Cochecton; and Mitchell Conklin built the first sawmill, at Pells Pond Brook. On Big Island, 2 mi. above Cochecton, was an extensive Indian burial place, of which traces are occasionally plowed up at the present day. There are about 100 Germans in this town.

[7] The census reports 3 churches: M. E., Presb., and Ref. Prot. D.

[8] At Fallsburgh is an extensive tannery, that manufactures 30,000 sides of leather annually, and another of the same size is located at Woodbourne.

[9] Fruit trees planted by these settlers are said to be still standing.

[10] Thomas Rawson came in 1787 or '88; Thomas Grant located in 1789; Samuel Thaddeus, Obadiah Brown, and James Hill settled a little N. of Fallsburgh, and James Neall, Peter Lecon, and Mr. Brush on the site of the village. The first sawmill was built in 1808, and the first grist mill in 1814, by Philo Briggs. Matthew Secha kept the first inn, at Hasbrouck, and Joel Reading the first store, at Fallsburgh. In 1797, the nearest mill was at Napanoch, in Ulster co.; and for many years the nearest market was Newburgh. In 1780 or '81 an extraordinary and destructive flood occurred upon this valley.

[11] This church was burned in 1837, and was rebuilt at Woodbourne. The census reports 3 churches in town; 2 M. E., and 1 Ref. Prot. D.

FREMONT—was formed from Callicoon, Nov. 1, 1851, and named in honor of John C. Fremont. It lies in the extreme w. part of the co., upon the bank of the Delaware. Its surface is broken and hilly, the summits rising 600 to 1000 feet above the valley and 1500 to 1800 feet above tide. Its waters are Basket and Hawkins Creeks, a great number of smaller streams, and numerous small lakes, the principal of which are Long Pond, Round and Basket Ponds in the N., Lox Pond in the E., and Trout Pond near the center. A large share of the surface is still a wilderness and is too rough for tillage. Tanning and lumbering form the principal [illegible] of the people. **Fremont Center** (p. v.) contains 141 inhabitants, and **Oberburgh** [illegible] p. o.) 20 houses. **Long Eddy** (p. o.) is the Basket Station on the N. Y. & E. R. R. **Hankins** is a station on the same R. R. The first settlers were Joseph Green, at Long Eddy; John Hankins, at Hankins Depot; Benj. Misner, at Long Pond; and Zach. Ferdon, at Round Pond.[4]

HIGHLAND—was formed from Lumberland, Dec. 17, 1853. It is an interior town, lying in the s. part of the co. It is named from the character of its surface, which consists of high ridges between Delaware and Mongaup Rivers, 600 to 1,000 feet above the canal at Barryville and 1,200 to 1,600 feet above tide. There are a great number of small lakes in town, the principal of which are Washington and Wells Ponds on the N. line, Mud and Hagan Ponds in the E., York Pond in the s. w., Washington Pond, used as a canal feeder, and Blind, Little, and Montgomery Ponds near the center. The people are chiefly engaged in lumbering and the rudiments of farming. **Barryville.** (p. v.) a canal village, contains 25 houses, and **Lumberland** [illegible] 15. The first settler was John Barnes, who located at Narrow Falls.[5] Rev. Isaac Sargent (Cong.) was the first preacher, about 1797.[6] The battle of Neversink, in the Revolution, took place within the limits of this town.[7]

LIBERTY—was formed from Lumberland, March 12, 1807, and Callicoon and a part of Thompson were taken off in 1842. It lies N. of the center of the co., upon the watershed between the Mongaup and Beaver Kil. Its surface is rough and broken. Walnut Hill, s. of Liberty, is 2,000, and Libertyville 1,467, feet above tide. The N. and w. parts of the town are still covered with forests. The principal sheets of water are Lillie Pond in the N., and Broadhead Pond near the center. The soil is good, but stony; and the people are chiefly engaged in lumbering, dairying, and tanning.[8] **Liberty** (p. v.) contains 364 inhabitants, **Parksville** (p. v.) 40 houses, and **Liberty Falls** (p. v.) 25. **Robertsonville** and **Stevensville** are p. [illegible]. The Liberty Normal Institute, at Liberty, is a flourishing academic institution.[9] Stephen Russell (from Conn.) settled near Liberty, in 1793 or '94.[10] Rev. Wm. Randall (Bap.) was the first preacher.[11]

LUMBERLAND—was formed from Mamakating, March 16, 1798, embracing all the co. w. of Mongaup River and s. of the present N. lines of Liberty and Callicoon. From it were erected Liberty in 1807, Bethel in 1809, and Highland and Tusten in 1853. Its surface is rugged and

broken, and much of it is yet a wilderness. The name of the town still suggests the leading pursuit of the people. A large number of small lakes, with their outlets, form the principal waters. The principal of these lakes are Lebanon Pond in the N., Round, Sand, and Hogais Ponds in the W., and Long Pond in the center. Metauques Pond, in the E., lies about 2 mi. W. of the Mongaup, and 300 feet above it. On its outlet is a beautiful cascade. **Mongaup** and **Pond Eddy** are p. offices. There is but one church, (M. E.) The Delaware & Hudson Canal extends through the town along the course of the river. It is supposed that settlement was commenced before the Revolution; but the names of the first settlers are not preserved.[1] In the survey of the Minisink Patent by Charles Webb in 1762, mention is made of "Reeve's Sawmill."[2]

MAMAKATING,[3] said to have been named in honor of an Indian chief, was erected into a precinct by the General Assembly, Dec. 17, 1743, and embraced all the present territory of Sullivan co. and a portion of Orange. It continued as a precinct until organized as a town, March 7, 1788. It was reduced to its present limits by the erection of Deerpark (Orange co.) and Lumberland in 1798, Thompson in 1803, and a part of Forestburgh in 1837. It lies upon the highlands between Neversink and Shawangunk Creeks. Two parallel ridges, separated by the valley of Bashers Kil, extend through the town in a N. E. and S. W. direction. The eastern of these ridges is known as Shawangunk Mt. The declivities of this mountain are gentle upon the E., but abrupt and broken on the W. It attains an elevation of 1100 feet above the summit level of the canal, and about 1700 feet above tide. In the N. W. part of the town is a mountain of nearly equal elevation, known as Panther Hill. The principal streams are Shawangunk, Bashers, and Pine Kils, the last of which is the outlet of a small lake in the W. part of the town, known as Yankee Pond. The summit level of the Delaware & Hudson Canal, 17 mi. long and 525 feet above tide, is constructed through the valley of Bashers Kil. Masten Pond, in the W. part, is used as a reservoir. About 2 mi. N. of Wurtzboro a vein of lead was discovered several years since, and was worked to a considerable extent. After an abandonment of several years, preparations are again being made to work it. The soil is a sand and gravel loam, in some places intermixed with clay, and best adapted to pasturage. The census of 1855 shows that this town is second only to Thompson in the amount of dairy products. **Bloomingburgh**[4] (p. v.) contains 365 inhabitants, and **Wurtzboro**[5] (p. v.) 491, **Summitville** (Mamakating p. o.) 20 houses, and **Phillipsport** (p. o.) 10; the three last named lie upon the canal. **Burlingham** (p. v.) contains 130 inhabitants. **West Brookville** (p. o.) is a hamlet, and **Honowack** is a p. o. The early settlement of this town has already been noticed,[6] but most of the details have been lost. On the approach of the Revolution the Indians became hostile, and several blockhouses were erected on the frontiers of Ulster co., one of which was at Wurtzboro. On account of the distressed condition of the people by reason of Indian hostilities, they were favored by the supervisors in the apportionment of taxes. Many persons in those days accounted wealthy were reduced to poverty, and but little that could be destroyed remained on the return of peace. Gonzales, the pioneer settler, is said to have built the first sawmill, at Wurtzboro. In 1792 this town contained 182 taxable persons, of whom 34 were in the present towns of Lumberland, Tusten, and Highland. In 1794, Capt. David Dorrance removed from Windham, Conn., and purchased 1000 acres immediately S. of the site of Wurtzboro.[7] John Dorrance, with Elijah Perry, also from Conn., erected the first bark mill in Sullivan co. Rev. Mr. Freleigh was the first pastor of the Ref. Prot. D. Church, built in 1793.[8]

NEVERSINK[9]—was formed from Rochester, (Ulster co.,) March 16, 1798. Rockland was taken off in 1809, and a part of Fallsburgh in 1826. The whole town is elevated, and the surface

[1] Among the early settlers since the Revolution were John Showers and Joshua Knight, at Mongaup; S. Gardner and Ichabod Carey, at Pond Eddy; P. Van Vanken, Abner Mongaup, and John Bunce and Wm. Rvarson, in other parts of the town. The first school was kept in a barn by Mr. Farnham; the first inn was kept by E. Carey, at Pond Eddy.

[7] A road was constructed at an early day, by Abraham Sackett, from Mamakating westward passing about three miles south of Lords Pond, and continuing to Nathan Kinne's Flats, from which place Capt. Dorrance made a road to Cochecton for 25 per mi. This road opened a communication from the Hallow to the Delaware River, a distance of about 20 mi. A portion of it is still in use, but the greater part was taken up by the Newburgh & Cochecton Turnpike. The village of Wurtzboro is built upon a tract of 1000 acres bought by Johannes Masten, who cleared the land and erected a sawmill. Westbrookville (formerly "*Bashshuwolle*") was settled about the same time, and the first house was built of stone and used as a fort to shelter the settlers. Mr. Felton was a pioneer near Burlingham, and J. Newkirk at Bloomingburgh. The early town records have been lost. The first school was kept at Bloomingburgh in 1784, by Mr. Campbell. Wm. Hall kept the first inn, 2 mi. N. of Bloomingburgh; Wm. Wighton opened the first store, 1 mi. S. of the same place; and H. Newkirk built the first gristmill, on the Shawangunk, within this town.

is very hilly and to a considerable degree covered with forests. It is watered by the Neversink and its branches, and by the Lackawack, or w. branch of the Rondout, which flows to the Hudson. Denman Hill, 3300 feet, and Thunder Hill, 2500, above tide, are the principal mountains. The latter received its name from the fact that one of the early settlers was terrified away from the place by loud thunder. The soil is generally a gravelly loam, and best adapted to pasturage. The people are chiefly engaged in lumbering, tanning,[1] and dairying. **Grahamsville** p.v. contains 40 houses, **Neversink Flats** (Neversink p.o.) 35, and **Claryville** p.v. [illegible]. The first settlement was commenced on the Lackawack, 2 mi. below Grahamsville, by the Hornbecks, Clines, Clearwaters, and Lowes, who obtained an Indian title in 1743, and were driven off during the Revolution. Mr. Larrabee, on Thunder Hill, and Benj. Gillett, John Hall, and Wm. Parks, on the 1000 acre lot, were the pioneer settlers after the war.[3] The first church (Meth.) was located at Grahamsville; and the first preacher was Rev. Samuel M. Knapp.[4]

ROCKLAND—was formed from Neversink, March 29, 1809. It lies upon the [illegible] of the Popacton, or E. branch of the Delaware, in the extreme N. part of the co. It is a rough, wild region, very hilly, and mostly covered with forests. Its principal streams are Beaver Kil and Williwemack Creek. A chain of small lakes extends through the town, the principal of which are Upper, Mongaup, and Hodge Ponds in the E., Big and North Ponds in the S. E., Shaw Pond in the S., Burnt Hill and Jenkins Ponds in the W., and Sand, Mud, and Knapp Ponds in the center. Lumbering, farming, and tanning[5] are the principal pursuits of the people. **Westfield Flats** (Rockland p.o.) contains 28 houses, and **Morsston** p.v. about 12. **Beaver Kill, Purvis,** and **Shin Creek** are p.offices. Settlement was begun in 1789, by two families named Stewart and West, from Middletown, Conn.; they located near the middle of the Big Beaver Kil Flat.[6] Rev. Mr. Conkey (Meth.) was the first preacher.[7]

THOMPSON—was formed from Mamakating, March 9, 1803, and named in honor of Wm. A. Thompson, first judge of the co. A part of Fallsburgh was taken off in 1826, and a part of Forestburgh in 1837. It lies principally upon the highlands between Neversink and Mongaup Rivers, and is less hilly than most of the towns of the co. The hills rise 100 to 300 feet above Monticello. Neversink and Mongaup Rivers, with several small lakes and streams, constitute the waters of the town. Kiamesha, or "*Clearwater*," better known as Pleasant Pond, is a beautiful little lake near Monticello. The other principal ponds are Dutch in the N. E., Lords and Mud in the E., Wolf in the S. E., and Sackets (named from Ananias Sacket, an early settler near it) in the S. W. The quiet scenery of these lakes is becoming appreciated by the lovers of nature and those seeking a retreat from the heat and dust of cities in summer. The soil is a reddish loam. The people are principally engaged in stock raising, lumbering, and tanning.[8] **Monticello,**[9] p.v., the principal village, was incorp. April 20, 1830. Pop. 629. It is beautifully situated upon a ridge of highlands 1387 feet above tide, and is surrounded by hills. It is finely laid out, the main street being 1 mi. long and 8 rods wide, with flagged walks and ornamented with shade trees. It contains a courthouse, jail, co. clerk's and surrogate offices, and a banking house, all of stone; 3 churches, the Monticello Academy, 3 hotels, 10 stores, 3 printing offices, and an iron foundery. **Thompsonville** [illegible] and **Bridgeville** p.v., each containing about a dozen houses. **Gates** and **Glen Wild** [illegible] p.offices. The first settlers were Wm. A. Thompson, John Knapp, and Timothy Childs, at Thompsonville.[10] Rev. John Boyd (Presb.) was the first preacher.[11]

Benjamin Tusten, who was killed in the battle of Minisink, in 1779.[1] This town lies upon the N. bank of Delaware River. The W. and S. parts are very hilly, and the E. portions belong to the plateau of rolling lands which comprises the greater part of Tusten, Highland, and Lumberland. The average height of this region is about 750 feet above the Delaware, or 1400 feet above tide. The principal streams are Ten Mile River and its branches: Half Moon and Mill Ponds in the E., and Mill, Davis, and Canfield Ponds in the center, are the principal sheets of water. The soil is a gravelly loam, and best adapted to pasturage. The people are generally engaged in farming and lumbering. **Narrowsburgh,** (p. v.,) containing about 35 houses, is the only village. It derives its name from the fact that the Delaware is here compressed by two points of rock into a deep, narrow channel. Over this is a wooden bridge, with a single span of 184 feet.[2] The place is known to lumbermen by the name of "*Big Eddy.*" Below the narrows the river expands into a wide basin, which in time of a freshet exhibits a stirring scene. **Delaware Bridge** and **Beaver Brook** are p. offices. John Moore kept the first inn and store, and R. Moore built the first mill. The Baptist is the only church in town.

[2] The "Narrowsburgh Bridge Co." was incorp. April 5, 1849, with a capital of $5,000. The bridge was to be 25 feet wide, well covered with plank, and secured by railings.

TIOGA COUNTY.

THIS county was formed from Montgomery Feb. 16, 1791. A part of Chemung was taken off in 1798. Parts were taken in 1817 and 1822 to form Tompkins in 1822; and Chemung in 1836. It lies near the center of the s. border of the State, centrally distant 150 m. s. from Albany, and contains 542 sq. mi. Its surface is broken by a series of ridges extending northerly through the co. from the Penn. line and forming a northerly continuation of the Allegany Mts. The summits of these ridges have a nearly uniform elevation of 1,200 to 1,400 ft. above tide. The valley of the Susquehanna cuts them diagonally and breaks the continuity of the general system of highlands. Numerous lateral valleys extend in a general N. and S. direction from the river, separating the ridges and giving a great variety to the surface. These valleys vary in width from a few rods to a mile and some miles in length, and are generally bordered by steep declivities which rise 250 to 400 ft. above them. The summits of the hills are generally broad and rolling, and in some places are broken and rocky.

The rocks of this co. belong to the Chemung and Catskill groups. The former occupies all the surface N. of the river and forms the underlying rock of the hills S., and the latter crowns all the summits S. of the river. The sandstone of the Chemung group is quarried for flagging; and some of the red sandstone is sufficiently compact to make good building stone. Limestone, from which lime is manufactured, is found along the Penn. border. There are no other minerals of importance. The river valleys, and many of the hills adjoining, are covered deep with drift, consisting of sand, clay, and gravel. This deposit near Factoryville is 80 ft. thick, and a wide belt of it seems to extend northerly in an almost unbroken line from the latter place to Cayuga Lake. The principal streams are Susquehanna River, and Owego, Catatunk, Cayuta, Pipe, and Apalachin Creeks and their branches. These creeks have generally rapid currents, though few waterfalls; and they furnish all necessary water-power for local purposes. Their valleys are usually narrow and rocky in their upper courses, but toward the Susquehanna they expand into broad and beautiful level intervales. The valleys of the Susquehanna and several of its tributaries are celebrated for their beauty.

The soil along the valleys is a rich, deep, gravelly loam, with an occasional intermixture of clay and sand. The intervales along the Susquehanna are especially noted for their fertility. The uplands are gravelly and sandy and moderately fertile. Upon the summits the soil is hard and unproductive, and in many places the rocks are entirely bare. A considerable portion of the uplands is still covered with forests.

The prominent interest of the co. is agricultural, and its various branches are successfully pursued. Winter and spring grains, corn, and the root crops, are mostly cultivated on the lowlands or river bottoms, and the uplands are devoted to stock and wool growing and dairying. Considerable commercial interest has grown up in connection with the rail roads, and manufactures have also been established to a limited extent.[1]

The county seat is located at Owego, upon the Susquehanna.[2] The courthouse, a wooden structure, was erected about 40 years since, at a cost of $8,000. It is in a good state of preservation. The jail, jailor's house, and barn, all of brick, were built in 1851, at a cost of about $6,000. The jail contains 8 double cells. The clerk's office is a fireproof brick building, erected in 1858, at a cost of $2,200. The courthouse, clerk's office, jail, jailor's house, and barn occupy a square in the center of the village.

June 8, 1812, the co. was divided into 2 Jury Districts, and the courts were held at Elmira and Spencer. The East Jury District embraced the [illegible] Catherines, Chemung, and Elmira. The courthouse at Spencer was [illegible] half-shire towns. Upon the organization of Chemung co. in 1836 [illegible]

The county poorhouse, a stone building, is located near Owego, upon a farm of 62 acres, which yields an annual income of $600. The average number of inmates is 62, and the whole number of rooms for their accommodation is 15. No school is connected with the establishment, and no means are provided for religious instruction.

The principal works of internal improvement are the N. Y. & E. R. R., extending along the river valley through Owego, Tioga, and Barton; and the Cayuga & Susquehanna R. R., extending from Owego northward through Tioga and Candor to Ithaca.[1] These roads furnish ample facilities for transportation, and bring the products of the county into close proximity to the Eastern markets.

Three weekly newspapers are now published in the co.[2]

The first settlement in this county was made upon the Susquehanna intervales, soon after the Revolution, by emigrants from the Wyoming Valley in Penn. These settlers originally came from Conn. and Mass., and left Wyoming in consequence of troubles growing out of the Indian hostilities and of controversies in regard to title. They located here before the Indian title to the lands was extinguished. The greater part of the present territory was comprised in the Boston Ten Towns. The title of this tract, comprising 230,400 acres between Chenango River and Owego Creek, was vested in the State of Mass. in 1786, and in 1787 it was sold to a company of 60 persons, mostly residents of that State. The greater part of the proprietors immediately took possession of these lands; and thus it happened that the county was filled up with a New England population while the fertile region of Western New York was yet an unbroken wilderness.

BARTON—was formed from Tioga, March 23, 1824. It lies w. of the Susquehanna, in the s. w. corner of the co. Its surface is generally hilly. A small portion of level land lies along the s. border. The highlands on the w. rise abruptly from the valley of Cayuta Creek, and are divided into two ridges by the valley of Ellis Creek. Their summits are broad and rolling and generally covered with forests. The highest points are 400 to 600 ft. above the river. The soil is a rich alluvium in the valleys and a sandy or gravelly loam upon the hills. A sulphur spring is found on Ellis Creek, near the center of the town. **Waverly,** (p. v.,) situated upon the Erie R. R., in the s. w. part of the town, was incorp. in 1854. It contains the Waverly Academy, 5 churches, and several manufactories. Pop. 1,067. **Factoryville,** (p. v.,) on Cayuta Creek, 1½ mi. N. of Waverly, contains 180 inhabitants; and **Barton,** (p. v.,) near the N. E. corner, on the Susquehanna, 30 dwellings. **North Barton** is a p. o. **Halsey Valley** (p. o.) is a hamlet in the N. E. part, on the line of Tioga. The first settlement was begun by Ebenezer Ellis and Stephen Mills, who located near the mouth of Ellis Creek in 1791.[3] There are 9 churches in town.[4]

BERKSHIRE—was formed from Tioga, Feb. 12, 1808. Newark was taken off in 1823, and Richford in 1831. It lies upon the E. border of the co., N. of the center. Its surface is mostly a hilly and broken upland, with a mean elevation of 1,200 to 1,400 ft. above tide. A high hill, with steep declivities, lies E. of the center of the town. The streams are the East and West Branches of Owego Creek and their tributaries. The soil in the valleys is a sandy and gravelly loam, and upon the hills it is a tough clay and hardpan. **Berkshire** (p. v.) contains 3 churches and 34 dwellings. **East Berkshire** and **Wilson Creek** are p. offices. The pioneer settlers of the town were Daniel Ball and Isaac Brown, who came in 1791.[5] Rev. Seth Williston conducted the first religious services in town.[6]

[1] This road cost $700,000, and it was sold, in 1852, for $4,500.

[2] *The American Eyrie* was commenced at Owego in 1810 by Stephen Mack. In 1815 it was sold to Stephen B. Leonard, who changed its name to *The Owego Gazette*, and continued it until 1835, when he sold to J. B. Shurtliff. In 1841 the office was burned, and the paper was discontinued a short time, but soon after it was resuscitated by E. P. Marble, and in 1843 it was sold to Thomas Woods. In 1844 it was changed to *The Tioga Freeman*, John Dow, publisher, and in a few years was discontinued. A local party dispute having arisen, another paper, called **The Owego Gazette**, was started in 1844 by H. A. Beebe, and the two papers were published under the same name for several months. In 1845 Thomas Peasall became proprietor, and in 1846 the paper was sold to David Walter and Leon. In 1848 it again passed into the hands of H. A. Beebe, by whom it is still published. *The Republican* was published 1 year at Owego in 1853 by —— Chatterton. *The Owego Advertiser* was commenced in 1836 by Andrew H. Calhoun, and was continued by him until 1852, when he sold to Powell & Barnes, who changed its name to *The Southern Tier Times*. In 1854 Wm. Smyth purchased the establishment and changed the name of the paper to **The Owego Times,** under which title he still continues its publication. **The Waverly Advocate** was commenced at Waverly Village in 1852 by F. H. Baldwin. It is now published by Baldwin & Pelley. *The St. Nicholas*, a monthly literary magazine, was published about 1 year in 1853.

[3] Among the other early settlers were —— Aikens, Ezekiel Williams, John Hanna, Wm. Beasley, Luke Saunders, James Swartwood, Charles Bingham, Lyndon Newell, Lyon C. Hodges, Philip Crans, Justice Lyon, John Muthart. —— Reed, and Silas Wolcott. A number of these were from the Wyoming Valley, and some of them lived in the adjoining towns of this co. George W. Buttson erected the first sawmill, at Barton Village.

[4] 3 M. E., 2 Bap., 1 Prot. E., and 1 R. C.

[5] Among the first settlers were Stephen and Samuel Ball, Peter Wilson, and Joseph Ball, from Stockbridge, Mass., in 1792-93. John Brown, Capt. Asa Leonard, Eben. Cook, Daniel Carpenter, Consider Lawrence, David Williams, Joseph Waldo, Nathaniel Ford, Abel, Azel, and Nathaniel Hovey, Jeremiah Campbell, and Samuel Culbertson, all from Berkshire co., Mass., came in soon after. W. H. Moore kept the first inn and store; David Williams erected the first mill; and Miss T. Moore taught the first school.

[6] The census reports 4 churches; 2 M. E., Cong., and Bap.

CANDOR—was formed from Spencer, Feb. 22, 1811. It lies upon the [illegible] center to the N. border of the co. Its surface consists of [illegible] into ridges by the narrow valleys of streams flowing in [illegible] generally abrupt, and their summits are mostly covered with [illegible] the center of the town, and the West Branch of Owego Creek [illegible] branch of Catatunk Creek enters the town near the center of its W. border and flows E., its valley completely dividing the western ridge into two parts. The soil is a gravelly loam, very fertile in the valleys and moderately so upon the hills. The settlements are mostly confined to the valleys. **Candor** (p. v.) is situated on Catatunk Creek, near the center of the town. It is a station on the C. & S. R. R., and contains 4 churches, a woolen factory, flouring mill, 2 sawmills, and about 70 dwellings. **Candor Center,** ½ mi. W. of Candor, contains 1 church, a flouring mill, 2 sawmills, and 20 dwellings. **Willseyville,** (p. v.,) a station on the C. & S. R. R. in W. part of the town, contains 20 dwellings. **South Candor,** on Catatunk Creek, near the S. border of the town, contains a church and about 20 dwellings. **Weltonville** [illegible] at the mouth of Doolittle Creek. **East Candor** is a p. o. The first settlers were Thos. Hollister, Job Judd, —— Luddington, and —— Jordan, from Conn., who came into town in 1793.[1] Rev. Daniel Loring was the first preacher. The census reports 10 churches.[2]

NEWARK was formed from Berkshire, as "*Westville*," April 12, 1[illegible]. Its [illegible] changed March 24, 1824. It lies upon the center of the E. border of the co. Its surface is mostly a hilly, upland region, with a mean elevation of about 1,200 ft. above tide. Its streams are the West Branch of Owego Creek, forming the W. boundary, and the East Branch, flowing S. W. through near the center of the town. The soil in the valleys is a fine, gravelly loam, but upon the hills it is an unproductive hardpan. The greater part of the uplands are yet unsettled. **Newark Valley,** (p. v.,) located in the valley of East Owego Creek, contains 2 churches, mills, an extensive tannery, and 75 dwellings. **Ketchumville,** (p. v.,) in the N. E. corner of the town, 7 mi. N. E. of Newark Valley, contains a church, sawmill, and 26 dwellings. **West Newark** is a p. o. The settlement of the town was commenced in 1791, by emigrants from Berkshire co., Mass.[3] The first religious association (Cong.) was formed in 1798, by Rev. Seth Williston, a missionary from Conn.; Rev. Jeremiah Osborn was the first settled preacher, at [illegible].[4]

NICHOLS—was formed from Tioga, March 23, 1824. It lies upon the S. bank of the Susquehanna, near the center of the S. boundary of the co. Its surface is mostly upland, terminating in steep declivities upon the river, and broken by the narrow valleys of small streams. The summits of the hills are broad and 300 to 500 ft. above the river. Many of them are still covered with forests. The soil in the valleys is a gravelly loam and very productive; upon the hills it is a moderately fertile, gravelly and clayey loam, underlaid by red sandstone. **Nichols,** p. o., **Hoopers Valley,** (p. o.,) and **Canfields Corners** (p. o.) are hamlets upon the Susquehanna. The first settlement was made by Ebenezer Ellis, Pelatiah Pierce, Stephen Mills, and James Cole, in 1787. There are 2 churches in town; M. E. and Union.[5]

OWEGO[6]—was organized Feb. 16, 1791. Spencer was taken off in 1806. It is a large town, occupying the S. E. corner of the co. Its surface is mostly upland, separated into two distinct parts by Susquehanna River and broken by the narrow valleys of small creeks. The summits of the ridges are broad and rolling, and 300 to 500 ft. above the river. The intervale along the river in some places is an unbroken flat more than a mile in width. Owego Creek, flowing through a broad and beautiful valley, forms the W. boundary of the town N. of the Susquehanna. The other streams are Nanticoke Creek, from the N., and Apalachin Creek, from the S., and a great number of smaller brooks and creeks. The declivities bordering upon these streams are generally very steep. The soil is a deep, rich, gravelly loam in the valleys, and a less productive, gravelly loam,

underlaid by hardpan, on the hills. A considerable portion of the hilly regions is yet covered with forests. Manufactures, and commerce to a limited extent, engage the attention of the people. **Owego,** (p. v.,) the co. seat, was incorp. April 4, 1827. It is finely situated upon the Susquehanna, near the mouth of Owego Creek.[1] It is the commercial center of a large agricultural and lumbering district; and since its first settlement it has been one of the most important villages in the southern tier of counties.[2] It contains a the Owego Academy, a female seminary, 7 churches, 2 banks, 2 newspaper offices, and several manufacturing establishments.[3] A bridge 80 rods in length here crosses the Susquehanna. Pop. 3,041. **Apalachin,** (p. v.,) on the s. bank of the Susquehanna, 8 mi. above Owego, contains 1 church and 200 inhabitants. **Campville,** (p. v.,) on the N. bank of the river, 7 mi. above Owego, contains 1 church and 20 dwellings. It is a station on the Erie R. R. **Flemingville** (p. o.) is a hamlet in the N. W. part of the town, on Owego Creek; **Willsboro,** a p. o. on Nanticoke Creek; and **South Owego,** a p. o. near the Penn. line. Amos Draper, an Indian agent and trader, from the Wyoming Valley, erected the first house in town, at Owego Village, in 1786, and moved in his family in 1787.[4] The first religious services were conducted by Rev. Seth Williston. The first religious association (Presb.) was formed in 1810, and a church was organized in 1817; Rev. Horatio I. Lombard was the first settled minister, in 1818. There are 13 churches in town.[5]

RICHFORD—was formed from Berkshire, as "*Arlington*," April 18, 1831. Its name was changed April 9, 1832. It is the N. E. corner town in the co. Its surface is mostly upland, broken by a few narrow valleys. It contains the highest land in the co., estimated to be 1,400 to 1,600 ft. above tide. Its streams are the head branches of Owego Creek. Its soil is a moderately fertile, gravelly loam. About one third of the surface is yet covered with forests. Leather and lumber are manufactured to some extent. **Richford,** (p. v.,) S. of the center of the town, contains a church and about 60 dwellings. **West Richford** is a p. o. The first settlements, made at a later period than those in Berkshire, from which the town was taken, were since the commencement of the present century;[6] but the exact date could not be ascertained. There is a Presb. church in town.

SPENCER—was formed from Owego, Feb. 28, 1806. Candor, Caroline, Danby, and Newfield (the last three now in Tompkins co.) were taken off Feb. 22, 1811, and Cayuta, March 20, 1824. It is the N. W. corner town of the co. Its surface is an upland, broken by the valleys of small streams. The N. W. portion forms the watershed between Susquehanna River and Cayuga Lake. The ridges have a general N. and S. direction. Their declivities are generally steep and their summits broad and broken. Catatunk Creek, flowing E., breaks through these ridges at nearly right angles, forming a deep and narrow valley. The soil in the valleys is a gravelly loam, and upon the hills it is a hard, shaly loam. **Spencer,**[7] (p. v.,) on Catatunk Creek, W. of the center of the town, contains 3 churches, 2 tanneries, a flouring mill, sawmill, and 75 dwellings. The first settlement was commenced in 1795, by Benj. Drake and Joseph and John Barker.[8] The first religious meeting was held by P. Spaulding, at his own house; and the first religious association (Bap.) was formed by Elder David Jayne.[9]

TIOGA—was formed from Union, (Broome co.,) March 14, 1800. Berkshire was taken off in 1808, a part of Union in 1810, and Barton and Nichols in 1824. It lies on the Susquehanna, S. W. of the center of the co. Its surface is principally upland, terminating in bluffs along the river intervale. The streams are Catatunk and Pipe Creeks and numerous smaller creeks and brooks.

1 Glen Mary, for several years the residence of N. P. Willis, is situated on Owego Creek, near the W. bounds of the village. It was here that his exquisite Rural Letters were written.

2 For many years the p. o. here was one of the four distributing offices of the State. From this place letters were shipped with plaster, lumber, and wheat for the Penn. and Md. markets. Sept. 7, 1840, a destructive fire occurred, burning 75 buildings.

3 The principal of these are manufactories of steam engines and boilers, mill-gearing, castings, sash and blinds, silverware, lumber, leather, flour, and plaster.

4 John Morgan and James McMaster, from New England, the former a pioneer of the Baptist worship on which the village of Owego stands, settled there in 1788. A clearing was made and grain sowed on an Indian improvement at Owego, in the season of 1787, by Wm. McMaster, Wm. Taylor, Robert McMaster, John Neely, and Wm. Wood, who entered the valley from the S. by way of Otsego Lake and the Susquehanna. The first birth in town was that of Selecta, daughter of Amos Draper, June 19, 1788. The first school was taught by —— Kelly, in 1792; the first store and hotel were kept at Owego, by Wm. Bates.

5 5 M. E., 2 Presb., Prot. E., Bap., Cong., Wes. Meth., R. C. and Union.

6 Among the early settlers were Evan Harris, Samuel Smith, Samuel Gleason, Nathaniel Johnson, —— Stevens, Jeremiah Campbell, Beriah Wells, Caleb and Jesse Gleason, Ezekiel Rich, and William Dunham,—many of them from the adjoining town of Berkshire.

7 This village was the co. seat of Tioga co., then including Chemung, from 1812 to 1821.

8 Among the early settlers at Spencer Village were Joshua Ferris, Henry Miller, Edmund and Rodney Hobart, from Conn., Andrew Purdy, Thos. Mosher, from Westchester co., and George Fisher. The first birth was that of Deborah, daughter of Benjamin Drake, the first marriage that of John R. Underwood and Polly Spaulding; and the first death, that of Prescott Hobart. The first school was taught by Joseph Barker, in his own house, at Spencer Village; the first inn was kept by Andrew Purdy; the first store by Samuel Doolittle; and the first gristmill was built by Benj. Drake.

9 The census reports 3 churches in town; Cong., Bap., and M. E.

The soil is a fine, dark loam in the valleys and a gravelly loam upon the hills. [illegible] mits are still covered with forests. **Tioga Center,** p.v., at the junction of Pipe Creek [illegible] tains a church, several mills, and 60 dwellings. It is a station on the N. Y. & E. R. R. **Smithsboro,** (p.v.,) on the N. Y. & E. R. R., contains 200 inhabitants. **Halsey Valley** (p.o.) is a hamlet, in the S.W. corner of the town, on the line of [illegible]. **Straights Corners** is a p.o. on the N. border. **Jenksville** (p.o.) is a hamlet, [illegible] the mouth of Pipe Creek. The first settlement was made on Pipe Creek, in 1785, by Samuel and Wm. Ransom, —— Primer, and Andrew Alden, from Wyoming, Penn. Col. David Pixley, from Mass., and Abner Turner, from N. H., made the first settlement on the river, in 1791.[1] There are two churches in town; M. E. and Union.

TOMPKINS COUNTY.

This county was formed from Cayuga and Seneca, April 17, 1817. Three towns were annexed from Tioga, March 22, 1822, and a part of Schuyler co. was taken off in 1854. It lies around the head of Cayuga Lake, S. W. of the center of the State, is centrally distant 141 mi. from Albany, and contains 506 sq. mi. Its surface consists principally of an upland, broken by a series of ridges extending N. and S. The watershed between Cayuga Lake and Tioughnioga River occupies the E. border of the co., and that between the same lake and Susquehanna River the S. border. The deep valley of Cayuga Lake, 700 ft. below the summits of the ridges, separates the N. portions of the co. into two distinct parts. The E. portion, declining toward the N., gradually loses its hilly character and spreads out into the beautifully rolling lands so common in Central N. Y. West of the lake the land does not lessen in height within the limits of the co.; but the rough, broken hills change into smooth ridges, with long, gradual slopes.

The deep valley of Cayuga Lake affords a fine opportunity to examine the geological structure of this region. Upon the shore in the extreme N. part are found the Hamilton shales, the lowest rock in the co. Next above them on the shore appear the Tully limestone, Genesee slate, and Portage or Ithaca shales and sandstones.[1] The summits of all the hills are formed of the rocks belonging to the Chemung group, usually covered deep with drift deposits. The streams, in their course from the table lands to the lake, have worn deep channels into the rocks, and waterfalls which once were, probably, at the face of the bluffs, have receded one to two miles, forming below deep, rocky chasms bordered by perpendicular walls. As the rocks are composed of strata of different degrees of hardness, the water has worn them irregularly,—the soft and yielding shales generally forming a declining surface, while the hard and compact limestone retains its perpendicular forms.[2]

The streams are Salmon, Fall, Cascadilla, Six Mile, and Taughannick Creeks and Cayuga Inlet and their branches, flowing into the lake, and several branches of Owego Creek and other small streams, flowing S. The cascades upon these streams form one of the most peculiar and interesting features of the landscape.

The soil in the N. part is generally a gravelly or clayey loam, formed by the drift deposits; and that in the S. is a gravelly or slaty loam, derived from disintegration. It is all best adapted to grazing. In the N. part the people are generally engaged in grain raising, wheat forming the staple production. In the S. towns the principal branches of agriculture pursued are stock raising and dairying. Considerable manufacturing is carried on at Ithaca and other places.

The co. seat is located at the village of Ithaca. The courthouse is a brick edifice, built upon a fine lot near the center of the village.[3] The jail, contiguous to the courthouse, is a well built stone edifice, with ample accommodations for the health of the prisoners. The cells are clean and well ventilated. The co. clerk's office is a fireproof building, fronting upon Tioga St. The poorhouse is situated upon a farm of 100 acres in Ulysses, 6 mi. N. W. of Ithaca. The average number of inmates is 53, and the revenue derived from the farm is about $1,500. No school is provided for the children, and they are not admitted to the public schools. The house is in bad repair, destitute of ventilation, and entirely unfit for the residence of so many human beings.

The Cayuga & Susquehanna R. R. extends from Ithaca to Owego, connecting with the Erie R. R. at the latter place. Cayuga Lake is navigable and connects with the Erie Canal at Monte-

[2] The Taughannick Falls, below Trumansburgh, have receded [illegible] more than a mile from the lake. "In its progress, the stream must have passed a series of falls and rapids, but rapidly [illegible] to form but a single fall. This is caused by the [illegible] being so much harder than those below that a firm table is formed of these, while those below are undermined." About 1 mi. S. of these falls is a cascade, where, from the absence of a resisting stratum of the surface, the rock has been worn down in a continuous slope.—*Geol. N. Y. Rep't*, p. 378, 379.

[illegible] was conveyed to the Supervisors and $7,000 secured to be paid; the co. was to be reconveyed to the [illegible] when it was taken. Luther Gere, Wm. R. Four weekly newspapers are now published in the co.[1]

The three s. towns of this co. were included in the Watkins and Frost Patent, and the remainder in the Military Tract. A public road was built from Owego, on the Chenango River, through to Ithaca, by Joseph Chaplin, in 1791-92-93, and this [illegible] gration in the s. part of the State for many years. The opening of the rich lands of the Genesee country to settlers diverted immigration from this region, and the co. for many years did not increase in population with the same rapidity as the regions further w. The growth of the co., however, has been gradual and continuous; and now in every element of real prosperity it is fully on an average with the older cos. in the State.

CAROLINE—was formed from Spencer, (Tioga co.,) Feb. 22, 1811, and [illegible] co., March 22, 1822. A part was annexed to Danby in 1839. David Rich, who came from Vt. in 1795 and located near Willow Bridge; Widow Earsley, with four sons and four daughters, from N. J., came in the next year; and for several years these were the only families in town.[1] The first church (Ref. Prot. D.) was formed at an early period; the first pastor was Rev. Garritt Mandeville. The census reports 10 churches in town.[2]

DANBY—was formed from Spencer, (Tioga co.,) Feb. 22, 1811, and was transferred to this co. March 22, 1822. Part of Caroline was annexed April 29, 1839, and a part was annexed to Dryden in 1856. It lies near the center of the s. border of the co. Its surface is broken by ranges of hills extending N. and S. 300 to 400 ft. above the valleys. Their summits are rounded and their declivities generally steep. The valleys are mere ravines. The principal streams are Cayuga Inlet, flowing N., and numerous small streams, the latter being tributaries either to this or to Owego Creek. The soil is a mixed gravelly and shaly loam, with occasional patches of clay, and is well adapted to grazing. **Danby,** (p. v.,) in the N. part, contains 3 churches and 50 houses; **Beers Settlement,** (South Danby p. o.,) near the center, about a dozen houses. **West Danby** is a p. o., near the W. border. The first settlers were Jacob Yaple, Dr. Lewis Beers, Jabez Beers, and Joseph Judson, who located at Beers Settlement in 1797.[3] The first church (Cong.) was formed in 1807; Rev. Daniel Loring was the first pastor. There are 8 churches in town.[4]

DRYDEN[5]—was formed from Ulysses, Feb. 22, 1803. A part of Danby was annexed in 1856. It is a large town, occupying the central portion of the E. border of the co. The surface of the N. half is rolling or moderately hilly, and that of the S. half hilly and broken. The E. border forms the watershed between Tioughnioga River and Cayuga Lake. The highest ridge, in the S. E. part, is 1,700 to 1,800 ft. above tide. The principal stream is Fall Creek, flowing S. W. through near the center of the town, on its course affording several millsites. Several small streams, tributaries to Owego Creek, take their rise in the S. part. Dryden Lake is a small sheet of water 1 mi. long and about ½ mi. wide, lying in an elevated valley near the E. border and 1,500 ft. above tide. A mineral spring, strongly impregnated with sulphur, magnesia, and iron, is situated one mi. W. of Dryden Village, and has a local notoriety for medicinal virtues. In the S. E. part are two swamps, each covering an area of several hundred acres. **Dryden,** (p. v.,) on the S. branch of Fall Creek, in the E. part of the town, is a flourishing inland village. It contains 2 churches, a large gristmill, and several manufacturing establishments. Pop. 522. **Etna,** (p. v.,) on Fall Creek, near the center, contains 2 churches, a grist and saw mill, an iron foundery, and machine shop. Pop. 230. **West Dryden,** (p. v.,) in the N. W. part, contains 93 inhabitants; **Varna,** (p. v.,) on Fall Creek, near the W. border, 170 inhabitants; **Malloryville, Freeville,** and **California** are hamlets. The first settlement was commenced in 1797, by Amos Sweet, on the present site of Dryden Village.[6] Joseph Chaplin built a road from Oxford, Chenango co., to Ithaca, passing through this town, in 1792–93–94. There are 9 churches in town.[7]

ENFIELD[8]—was formed from Ulysses, March 16, 1821. It lies upon the center of the W. border of the co. Its surface is rolling, and it has a mean elevation of 500 to 700 ft. above Cayuga Lake. The principal streams are Ten Mile Creek and the S. branch of Taughanick Creek. Upon the former, in the S. E. tract of the town, is one of the finest of the beautiful cascades so common in this co. It is in a deep gorge, and has a total fall of 230 ft. The soil is principally a gravelly loam. **Enfield Center** (p. v.) contains 2 churches and about 40 dwellings; **Enfield** (p. v.) 25 dwellings. **Enfield Falls** is a hamlet. Among the first settlers were ——- Geltner, John Whitlock, Jas. Rumsey, Lewis Owen, and Isaac and John Beech.[9] There are 5 churches in town.[10]

[1] Among the other early settlers were Eli[illegible] Peter and Samuel Yates, from Mass.; Joseph Chambers, Richard Bush, and Hart Jones, Jr., from Easton, Pa., in 1798. Levi Stokes, formerly of Shaftsville, Charles and John Mullks, John Cantine, first settler at Mattewan, and Joseph Bishop, all from Ulster, and John Beardsley, from Mass., in 1801. The first child born was Hepzibah Chamberlain. The first school was taught by John Robinson in [illegible]. Daniel Hoyt built the first store, and Cantine built the first gristmill, in 1800.

[2] 4 M. E., Prot. E., Cong., Bap., Ref. Prot. D., F. W. Bap., and Luth.

[3] The first settlers of West Danby were Wm. Hogg and Moses Beers. The first death was an infant son of Lewis Beers, by Jos. Judson, Jr., in 1798. The first school, Dr. Beers kept the first [illegible], and the first store and Peter Yaple built the first gristmill.

[4] 4 M. E., 2 Bap., Cong., Prot. E., and Sweedenborgian.

[5] Named in honor of John Dryden, the English poet.

[6] The next settlers were Ezekiel Sandford, David Fort, and Ebenezer Chamberlain, who located at Willow Grove in 1798. A small cedar swamp, at one time, brought the first three families, consisting of 14 persons, and all their household goods, from the Chemung River. Capt. Cole, Robertson, Sanderson, and the father of the town came in the same year, and settled on Lot 50. Among the other early settlers were Lyman Hall, from Vt., Dr. Sheldon, Dr. Wm. Dolley, Joel Hull, and Jos. Wood. The first child born was Robert Robertson, and the first death was that of the mother of Amos Sweet. Daniel Leary taught the first school, in 1804. Amos Sweet kept the first store, Joel Hull the first tavern, and Col. Hopkins, from Homer, built the first mill, in 1800.

[7] 5 M. E., 2 Presb., 2 Bap., and R. C.

[8] Named from Enfield, Ct.

[9] John Applegate kept the first inn, Samuel Ingersoll the first store, and Wm. Ferris built the first mill.

GROTON[1]—was formed from Locke, Cayuga co., as "Dresden," April 7, 1817, and its name was changed March 13, 1818. It is the N. E. corner town in the co. Its surface is moderately hilly. From the valleys the land rises by long and gradual slopes to a height of 200 to 300 ft. The highest point in town is about 1,500 ft. above tide. The principal streams are Owasco Inlet and Fall Creek. Bear Swamp, in the E. part, contains an area of several hundred acres. The soil is a fine quality of gravelly loam, underlaid by slate. **Groton,** (p. v.,) on Owasco Inlet, near the center of the town, contains 3 churches, the Groton Academy, and several manufacturing establishments.[2] Pop. 587. **McLean,** (p. v.,) on Fall Creek, in the S. E., contains 5 churches, several factories,[3] and 40 houses. **Peruville,** (p. v.,) near the S. border, contains 2 churches, a saw and grist mill, pail factory, and 30 houses. **Groton City,** (p. v.,) in the N. E. corner, and **West Groton,** (p. v.,) in the N. W., contain about 11 houses each. **Bensons Corners** is a hamlet, in the S. W. corner. Among the first settlers were Silas H[illegible] at West Groton; Ichabod Bowen, John Guthrie, and —— Perrin, at Groton; and J. Williams, J. Houghtaling, and W. S. Clark, at East Groton. The census reports 11 churches.[4]

ITHACA was formed from Ulysses, March 16, 1821. It is the central town on the [illegible] at the head of Cayuga Lake. A tract of land 2 mi. long and 1½ broad, low and nearly level, extends S. from the lake shore; and from this the valley of Cayuga Inlet opens to the S. W. and that of Six Mile Creek to the S. E. Ridges 400 to 700 ft. high, with steep declivities, separate these valleys and surround the low land and the head of the lake. From the summits the surface spreads out into a rolling upland. A marsh ½ mi. wide borders immediately on the lake. The streams are Fall, Cascadilla, Six Mile, Buttermilk, and Ten Mile Creeks, and Cayuga Inlet. In their course from the uplands each of these streams plunges down the wall-like precipices which surround the lake, forming series of cascades which for beauty and variety are scarcely equaled elsewhere.[6] The soil is a fertile, gravelly loam upon the uplands, and a deep, rich alluvium in the valleys. **Ithaca,** (p. v.,) 1½ mi. S. of the head of Cayuga Lake, is the co. seat, and the commercial center of the co. It is beautifully situated upon a fine alluvial plain, bordered on 3 sides by lofty hills, and on the fourth by the lake, with which it is connected by a navigable inlet. It contains the Ithaca Academy,[7] 9 churches,[8] 2 banks, 4 printing offices, and a large number of manufacturing establishments.[9] The commercial interests of the place are extensive and important. A daily line of steamboats on the lake running between this place and Cayuga Bridge, in connection with the C. & S. R. R., serves to connect the Erie R. R. on the S. with the N. Y. Central on the N.[10] The lake is also a link in the great chain of the internal water navigation of the State, and upon it a large amount of canal commerce, centering at Ithaca, is carried on. The transhipment of Scranton and Lackawanna coal brought by the C. & S. R. R. forms an important and constantly growing branch of business. A large proportion of the anthracite coal for the Northern and Western markets is supplied through this avenue.[11] The public schools of the village are graded, and are in a flourishing condition. The annual attendance is about 1,200.[12] The village was incorp. April 2, 1821. Pop. 4,908. The first settlement of the town was made by Jacob Yo[illegible] [illegible]

LANSING—was formed from Genoa, (Cayuga co.,) April 7, 1817. It lies upon the E. bank of Cayuga Lake, in the N. part of the co. The surface is principally a rolling upland, 500 ft. above the lake, bordered by steep declivities. Salmon Creek, the principal stream, flows S. through near the center of the town. Its valley is narrow and bordered by steep hillsides. Swartz, Townly, and Hedden Creeks are its principal tributaries. The soil is generally a fertile, gravelly loam. **Ludlowville,** (p. v.,) on Salmon Creek, about 1 mi. from its mouth, contains 3 churches, several factories,[2] and about 50 dwellings. **Lansingville,** (p. v.,) on the ridge W. of Salmon Creek, in the N. part of the town, contains 1 church and 25 dwellings. **North Lansing,** (p. o.,) in the N. E. corner, **Lake Ridge,** (p. o.,) on the bluff above the lake, in the N. W. corner, and **Libertyville** (South Lansing p. o.) are hamlets of about a dozen houses each. **East Lansing** and **Forest City** are p. offices. Forest City Water Cure is finely situated on the bluff overlooking the lake, in the S. part of the town. The first settlement was begun in 1792, by emigrants from N. J.[3] The census reports 7 churches in town.[4]

NEWFIELD—was formed from Spencer, (Tioga co.,) as "*Cayuta*," Feb. 22, 1811. Its name was changed March 29, 1822, and a part was annexed to Catharines (Schuyler co.) in 1853. It is the S. W. corner town in the co. The surface is high and hilly, the ridges being 400 to 600 ft. above the valleys and 1,500 to 1,700 ft. above tide. The streams are Cayuga Inlet and Ten Mile Creek and their branches. The valleys of these streams are usually narrow and bordered by steep hillsides. A portion of the W. part of the town is yet uncultivated. The soil is a shaly and clayey loam, best adapted to grazing. **Newfield,** (p. v.,) in the N. E. part of the town, contains 3 churches, 2 flouring mills, 2 carriage shops, a woolen factory, an oilcloth factory, and about 80 dwellings. **Trumbulls Corners,** (p. v.,) on the N. border, contains 1 church and 20 dwellings. **Poney Hollow** (p. o.) is a hamlet in the S. W. part. The first settler was —— Thomas, who located at Poney Hollow.[5] The census reports 3 churches in town.[6]

ULYSSES—was formed March 5, 1799. Dryden was taken off in 1803, and Ithaca and Enfield in 1821. It lies upon the W. bank of Cayuga Lake, on the N. border of the co. A range of bluffs 600 ft. high, with steep declivities, borders upon the lake; and from their summits the surface spreads out in an undulating upland. The only considerable stream is Taughanick (Ti-kaw-nik) Creek, which crosses the town from the W. In its descent from the plateau to the lake this stream forms a series of cascades, the principal of which is known as Taughanick Falls. These falls have receded about 1 mi. from the shore of the lake, and have worn a deep gorge in the yielding shales, with banks 380 ft. high. The stream now falls, in an unbroken sheet, over a limestone terrace 210 ft. in height. About 1 mi. farther up the gorge is another fall, of 80 ft. The soil is a fine quality of gravelly loam. **Trumansburgh,**[7] (p. v.,) near the N. border of the town, is the second village in the co. in amount of business and population. It contains 4 churches, the Trumansburgh Academy, and several manufacturing establishments.[8] Pop. 1,052. **Jacksonville,** (p. v.,) near the center of the town, contains 1 church and 50 houses. **Waterburgh,** near the W. border, contains 1 church, mills, and 40 dwellings. **Halseyville**[9] is a hamlet. The first settlements were commenced by Samuel Weyburn, at the mouth of Taughanick Creek, and by Abner and Philip Tremaine, on the site of Trumansburgh, in 1792.[10] The first church (Presb.) was formed by Jedediah Chapman, in 1803. There are now 6 churches in town.[11]

[1] Among the early settlers were Jacob Stroup, Daniel McDowell, David Dumond, Eli Bruin, King, Putnam, Starr, Carroll, Markle, Sayers, and Peter Ely. The first child born was a daughter of John Dumond, Sept. 1793. The first death was that of Enoch Albin, in 1796. A man named Lacklit at one time brought a boat load of goods up the lake, in 1792, and he continued a kind of an irregular trade for several years. David Quick opened the first regular store. —— Hendrickson kept the first inn, and Jedediah Hyde built the first mill in 1794. Dr. Foster was the first physician and —— Howe the first lawyer. The first families were a month in getting from Kingston, Ulster co., to Owego, and 19 days from there to their destination.

[2] Grist and saw mills at Lancaster Ludlowville factory.

[3] Among the early settlers were Wm. Goodwin, Silas Ludlow, Abner, Bloom and families named Bradsley, Denny, Mance, Allen, Stewart, and Baker, who came in 1791. Silas Ludlow and —— Holmes, in 1792, and Abram Van Wagoner, in 1795. The first marriage was that of Henry Bloom and Miss Goodwin, and the first death, that of the wife of Henry Bloom in 1798. Wm. Boyse kept the first inn, at Libertyville. The first night of his stay in the house a rattlesnake crept into the bed and slept with his children. —— Hooker kept the first store, Silas Ludlow, of Ludlowville, built the first mill, in 1798.

[4] M. E., 2 Bap. and Presb.

[5] Among the early settlers were S. Chambers, Hiram Moore, —— Carter, and Prof. R. Swartwood. J. Hannah Hall kept the first inn, George Dudley the first store, and John Greene built the first mill.

[7] Name derived and corrupted from Tremaine, the first family of settlers.

[8] 3 flouring mills and 2 furnaces and machine shops.

[9] Named from Nicoll Halsey, the first settler.

[10] John McLallen, a veteran man, accompanied the Tremaines in the capacity of teamster. The first child born was Calvin Tremaine in 1794, and the first marriage that of John McLallen and Mary King, Dec. 12, 1799. John McLallen kept the first inn, —— Hendrew the first store, Abner Tremaine built the first mill, and Stephen Woodworth taught the first school, all at Trumansburgh. [11] 3 M. ULSTER COUNTY.

THIS county was formed Nov. 1, 1683,[1] and included the country between the Hudson and the Delaware, bounded N. and S. by due E. and W. lines passing through the mouths of Sawyers and Murderers Creeks. A part of Delaware was taken off in 1797, a part of Greene in 1800, and Sullivan in 1809. A portion was annexed to Orange in 1798, and the town of Catskill was annexed from Albany co. the same year. It lies on the W. bank of the Hudson, centrally distant 68 mi. from Albany, and contains 1,204 sq. mi. Its surface is mostly a hilly and mountainous upland. The Catskill Mts. occupy the N. W. part; and the Shawangunk Mts. extend N. E. from the S. W. corner nearly through the co. The mountain region consists of irregular ridges and isolated peaks with rocky sides and summits too steep and rough for cultivation. The summits are 1,500 to 2,000 ft. above the Hudson. The remaining parts of the co. are generally broken and hilly. Esopus Creek flows in a tortuous course through the N. part and discharges its waters into the Hudson. It receives Platte Kil from the N. Rondout Creek enters the S. W. corner of the co. and flows N. E. along the W. declivity of the Shawangunk Mts. and enters the Hudson at Rondout. It receives as tributaries Sandburgh Creek in the S. W. part of the co., and Wall Kil near its mouth. The latter stream flows along the E. foot of the Shawangunk Mts. The remaining streams are small brooks and creeks.

The rocks of the co. are composed of the Portage and Chemung shales, in the E. part, and the Shawangunk grit or Oneida conglomerate, in the W. part. Drift deposits are found in nearly every part. Lead ore is found to some extent among the Shawangunk Mts.[2]

At an early period the Esopus grit was largely quarried and manufactured into millstones.[3] Water-limestone of an excellent quality is found and largely quarried.[4] The Ulster co. Cement has an excellent reputation throughout the United States, and is used in immense quantities on fortifications and other Government works requiring solidity. It was used on Croton, Brooklyn, Cochituate, Albany, Washington, and other water-works. It finds a ready market in every port on the seaboard from New Brunswick to Texas. It has been exported to California and South America, and is largely used in and around New York, Boston, and Philadelphia, upon public and private buildings. The cement rocks are quarried usually on the hillsides, and these openings often extend in galleries under the overlying rock. The rock outcrops in a belt running N. E. and S. W., first appearing on the Hudson a few miles N. of Kingston Point, and extending 20 to 25 mi. to the town of Rochester, but is lost from view at the surface in several places between these points. In the section occupied by the Portage group of rocks are found extensive outcrops of thin bedded sandstone, yielding a fine quality of flagging, which is largely quarried and exported.[5] The soil is generally a good quality of sandy and gravelly loam, in some places intermixed with clay. Most of the valleys are covered with a deep, rich alluvium.

Most of the land is best adapted to grazing. Dairying is extensively pursued, and spring grain

[1] In its charter it is said to "contain the towns of Kingston, Hurley, and Marbletown, Foxhall, and the New Paltz, and all villages, neighborhoods, and Christian habitations on the W. side of the Hudson's River from the Murderers Creek, near the High lands, to the Sawyers Creek." It was named from the Irish title of the Duke of York. The boundary of this and Albany co. were not fully settled at the Revolution. An act was passed in 1774, but nothing was done under it toward a settlement, and it was repealed in 1788. An act was also passed in 1774 to run and mark the boundary of this and Orange counties from E. of the Shawangunk Mts. to the Delaware.

[2] A mine was opened near Ellenville more than 40 years ago. It was never worked to profit, and is now abandoned. The Ulster Mine, near Sullivan co. line, was opened in 1867. It is 600 or 700 feet above the valley. The galena in these mines is associated with blende, iron and copper pyrites, calcite, and quartz. There are indications and vague traditions that these mines were worked at a much earlier period and yielded profits beyond computation.

[3] In Smith's History, written in 1752, this co. is said to be noted for fine flour, beef, and a good breed of draft horses. The millstones then quarried about 10 mi. from the river had acquired celebrity, and were said to far exceed those from Ogden, in Europe, formerly imported at £80 the pair, while Esopus stones did not cost a fourth part of that sum. Small millstones for family use are still made for the Southern market, but the business has lost much of its former importance. A finer quality of these grits, when calcined and crushed, furnishes the silex used in the glass manufacture at Ellenville.

[4] Water-limestone was accidentally discovered on the line of the Erie Canal, by Canvass White, an engineer, in 1818. In 1820 he obtained a patent, and subsequently obtained judgment against one or more of the contractors for using it. The first water-lime or cement made in Ulster co. was about the time the Delaware & Hudson Canal was commenced. Its manufacture has now become a leading and profitable pursuit, employing about $1,000,000 of capital and 1,000 men. In March, 1870, there were 15 establishments in the co., owned by individuals and companies.

[5] The stone is of a bluish gray color and slaty texture, and may be split into slabs of almost any length, and from 1 to 4 inches in thickness. The rock is traversed by joints or seams, that divide very smoothly and greatly facilitate the labor of quarrying. It is brought down to the river and shipped in immense quantities at every landing in the co. and transported to New York and other places along the coast. The business employs a large number of hands.

is raised to some extent. Fruit growing is becoming an important branch of business. Manufactures of sole leather and lumber, are located in the western towns,[1] and water lime at the co. seat. The commerce, carried on by means of the river and canal, is large, and is constantly increasing.

The co. seat is located at Kingston.[2] The courthouse is a fine stone edifice, situated upon Wall St.[3] The jail is a stone building in rear of the courthouse. It is well arranged and furnished, and is kept in good order.[4] The clerk's office is in a fireproof one story building on the corner of Fair and Main Sts.[5] The poorhouse is located upon a farm of 140 acres, on the road to New Paltz, 16 mi. s. w. of Kingston. It is poorly constructed, not ventilated at all, and is entirely unfit for the purposes for which it is used. The average number of inmates is 175, at a yearly and weekly cost of $1.25 each. A school is taught 6 months in the year.[6] The farm yields a revenue of $800. The Delaware & Hudson Canal is the only important work of internal improvement in the co. It extends from Rondout, on the Hudson, up Rondout and Sandburgh Creeks, through Kingston, Rosendale, Marbletown, Rochester, and Wawarsing. It opens a direct communication between the coal mines of Penn. and the Hudson. The Delaware & Hudson Canal Co. was incorp. April 23, 1823, and the canal was finished in 1828.[7]

One daily and 7 weekly newspapers are now published in the co.[8]

The Dutch established a trading post upon the present site of Rondout in 1614, and probably a few Dutch families settled in the immediate vicinity soon after. This early settlement was broken up by Indian hostilities, and a new one was commenced between 1630 and '40. This was again attacked by the Indians, and in 1655 was abandoned. Before 1660, settlers had again located at Kingston and vicinity. In 1660 a treaty had been concluded with the Indians; and the people were so unsuspicious of danger that they left open the gates to their fort both day and night. In June, 1663, the Indians came into the fort at Wiltwyck in great numbers, apparently to trade, while the greater part of the people were engaged in their usual avocations out of doors. At a given signal the Indians commenced the work of destruction. Recovering from their first panic, the whites rallied, under the leadership of Thomas Chambers, and finally drove the Indians out of the fort; 18 whites were killed, and 42 were carried away prisoners. The out settlements were all destroyed. A destructive war ensued, in which the Ulster Indians were nearly exterminated. During this war the valley of the Wall Kil was discovered, and soon after the peace of 1663 it was occupied by a colony of French Huguenots.[9] The settlements gradually extended along the valleys of the streams,

[2] A courthouse and jail were built soon after the organization of the co. and an appropriation was made by the Board July 21, 1771. This building proved inadequate, and an act entitled "An Act to pass [Oct. 14, 1783] was passed, and buildings and lots were sold and new buildings to be erected. Repairs were authorized in 1784, 1790, 1796, and 1797, and in 1799 a lottery was granted to complete them. The courthouse and jail were burned by the British on July 16, 1777, and in May was granted 6 months after to erect a £2000 to rebuild them. By act of March 19, 1778, the sheriff's office was ordered to be kept at the house of Mrs. Ann Dubois in the village of New Paltz.

[3] The building is called "State Government of Wm. Leet Pauling" (*Local Index*, 142) at Dubois, Sec. 9, and Joseph Gasbeer, Sec. 7.

[4] The Senate Committee in 1857 reported this jail to be one of the best in the State, but as late as 20 prisoners escaped from it in 1858, and at the same time the committee condemned it as unsafe, may well be questioned.

[5] But these and Ulster co. were among the same that were united for clerk's offices. The records at Kingston show that a part of the Ulster co. records are

Rondout, and Wall Kil Creeks and their tributaries. Besides the manorial grant of Fox Hall,[1] the English made township grants of Kingston, New Paltz, Marbletown, Rochester, Hurley, Shawangunk, and Marlborough. During the Revolution the frontier settlements were exposed to Indian hostilities, and before the close of the war were all destroyed or abandoned. The river towns were taken by the British in 1777, and most of them were pillaged and burned. The Provincial Congress and State Legislature held several sessions at Kingston during the war and soon after. The people were nearly all ardent patriots; and there were probably fewer tories in this co. than in any other section of the State. Since the Revolution the co. has steadily progressed in wealth and population. The completion of the Delaware & Hudson Canal was a marked era in the history of the industry of the co.; and the commencement of the cement manufacture and stone quarrying have greatly added to its permanent prosperity.

DENNING[2]—was formed from Shandaken, March 6, 1849. A part of Hardenburgh was taken off in 1859. It lies in the N. W. part of the co., upon the border of Sullivan. Its surface is a broken and mountainous upland. A spur of the Catskill Mts. extends through the town, with a mean elevation of 1,500 to 2,000 ft. Its streams are head branches of Rondout Creek and Neversink River. The valleys are narrow ravines bordered by steep and rocky hillsides. The soil upon the uplands is a gravelly loam, and in the valleys a sandy loam. The settlements are chiefly confined to the valleys. **Denning** is a p. o. near the center. **Dewittsville** is a hamlet near the s. line. This town, though large, has the least population of any town in the co. Its chief wealth consists in its heavy growth of hemlock and hard wood. Settlements were made at a comparatively recent period.[3]

ESOPUS—was formed from "*Kingston*," April 5, 1811. A part was set off to Kingston, and a part of Hurley was annexed, in 1818, and a part of New Paltz was annexed April 12, 1842. It lies upon the Hudson, and is the central town upon the E. border of the co. Its surface is rolling in the E. and moderately hilly in the W. A range of hills extends N. and S. through near the center of the town, the highest peak being 1,632 ft. above tide. Hussey Hill, S. of Rondout, is 1,000 ft. high. Wall Kil forms the W. and N. boundaries, and Swarte Kil and Black Creek flow through the S. part.[4] The soil is a light, clay loam. Fruit growing is becoming an important branch of business. Cement is largely manufactured, and an extensive commerce is carried on by means of the river and Delaware & Hudson Canal.[5] **Port Ewen,** (p. v.,) upon the Hudson, S. of the mouth of Rondout Creek, is a village built up by the Penn. Coal Co. A large part of the coal brought forward by the canal is here shipped upon barges for the Northern market. Pop. 1,300.[6] **Arnoldton,** (p. v.,) upon Rondout Creek, in the S. part of the town, contains a church, woolen factory, cotton factory, and 150 inhabitants. **South Rondout,** upon Rondout Creek, in the N. part, contains an extensive cement and lime factory, a lager beer brewery, a brickyard, several boatyards, and 568 inhabitants. **Dashville,** upon Rondout Creek, in the S. part, contains a cement factory and 20 houses. **Sleightsburg,** upon the Hudson, at the mouth of Rondout Creek, contains an extensive shipyard and 40 houses. **Elmores Cove,** (Esopus p. o.,) upon the Hudson, contains a church and 40 houses. **Amesville** (p. o.) and **Atkarton** are hamlets. **Freeville,** in the N. part, contains a gristmill and 20 houses. Settlements were made by the Dutch, soon after their first occupation of the co.[7] The first church (Ref. Prot. D.) of which there is any record was formed in 1751; Rev. G. W. Mancius was the first preacher.[8]

GARDINER[9]—was formed from Rochester, New Paltz, and Shawangunk, April 2, 1853. It is an interior town, lying S. of the center of the co. The surface is rolling in the E. and hilly in the

HARDENBERGH[1]—was formed from Denning and Shandaken, April 15, 18[illegible]. It lies in the extreme w. corner of the co. Its surface is a broken and [illegible] summits being 2,000 ft. above tide. It occupies a portion of the watershed between the Hudson and Delaware. Beaver Kil, Mill Brook, and Dry Brook take [illegible]. **Dry Brook** (West Shandaken p. o.) is a hamlet.

HURLEY[4]—was granted by patent Oct. 19, 1708.[5] A part of the Hardenburgh Patent was released by Margaret Livingston, and was annexed March 3, 1789; and a part of New Paltz was taken off in 1809, a part of Esopus in 1818, a part of Olive in 1823, a part of Rosendale in 1844, and a part of Woodstock in 1853. It is an interior town, lying N. E. of the center of the co. The surface is a rolling and moderately hilly upland, the highest summits being about 700 ft. above tide. Esopus Creek flows N. E. through the S. part. Along its course are extensive fertile flats. The soil is a sandy loam, a considerable portion lying N. of the creek being unfit for cultivation. Stone quarrying is extensively carried on.[6] **Hurley,** (p. v.,) on Esopus Creek, contains a church and 160 inhabitants;[7] and **West Hurley,** (p. v.,) in the N. part, 2 churches and 25 dwellings. The first settlements were made by the Dutch, about 1680.[8] This town became the refuge of the inhabitants of Kingston when the latter place was taken by the British in 1777. The first church (Ref. Prot. D.) was formed in 1800; Rev. Thos. G. Smith was the first pastor.[9]

KINGSTON—was incorp. by patent May 19, 1667, and was recognized as a town May 1, 1702.[10] Fox Hall Patent was annexed March 12, 1787.[11] Esopus and Saugerties were taken off in 1811; a part of Esopus was annexed in 1818, and a part was annexed to Saugerties in 1832. It lies upon the Hudson, N. of the center of the co. Its surface is broken and hilly, the highest summit being Kuykuyt or Lookout Mt., about 600 ft. above tide. Esopus Creek flows N. E. through near the center, receiving Saw Kil from the W. as tributary. Rondout Creek forms the S. boundary. The soil is principally a clayey loam. A large business in coal, ice, and stone is carried on by the canal and river. **Kingston,** (p. v.,) upon Rondout Creek, 2 mi. W. of the Hudson, was incorp. April 6, 1805. Besides the co. buildings, it contains 8 churches, the Kingston Academy, several private seminaries,[12] 3 banks, 1 savings bank, 4 newspaper offices, and several small manufactories.[13] It is the center of an extensive trade upon the river and canal.[14] Pop. 3,971. **Rondout,**[15] (p. v.,) upon the Hudson, at the mouth of Rondout Creek, was incorp. April 4, 1849.

It contains 8 churches, a bank, and newspaper office. The people are principally engaged in the coal trade; and a large number of steamers, barges, and sailing vessels are constantly engaged in freighting coal, stone, and cement from this place.[1] The Newark Lime and Cement Manufacturing Co. manufacture a larger amount of waterlime and cement annually than is produced at any similar establishment in the country. Pop. 5,978. **Eddyville,** upon Rondout Creek, 2¾ mi. from its mouth, contains a cement factory[2] and about 50 dwellings. It is the N. terminus of the D. & H. Canal. **Wilbur,** (p. v.,) on the Rondout, below Eddyville, contains about 100 houses. It is the center of an immense trade in flagging stones.[3] **Fly Mountain** is a p. o. **Dutch Settlement** is a hamlet in the N. part. **Flatbush** contains a cement factory.[4] The Dutch built a trading and military post here as early as 1614; but every thing was swept away in the wars of 1644–45. Another settlement was commenced in 1652, and abandoned in 1655. The first permanent settlers came in soon after, but suffered much from Indian hostilities for several years.[5] Feb. 19, 1777, the first State Convention adjourned from Fishkill to Kingston. On the 9th of September following, the State Legislature convened here, but dispersed upon the approach of a British force under Sir Henry Clinton on the 7th of Oct. At that time the public records were hastily removed to the back settlements, and the place was burned.[6] The first church (Ref. Prot. D.) was formed May 30, 1658. There are 18 churches in town.[7]

LLOYD—was formed from New Paltz, April 15, 1845. It lies upon the Hudson, S. of the center of the co. Its surface is mostly a rolling and hilly upland, terminating in a bluff upon the river; and the average height of the surface above tide is about 200 ft. Swarte Kil flows N. along its W. boundary and Black Brook N. through the center. The soil is generally a clay and gravelly loam. The bluffs along the river are principally occupied by fine country seats. **New Paltz Landing,** (p. v.,) upon the river, contains 2 churches and 50 houses;[8] **Centerville** (Lloyd p. o.) a church and 17 houses. **Lewisburgh** is a hamlet on the river, S. of New Paltz Landing. **Riverside** is a p. o. in the N. E. part. The date of first settlement in this town is quite ancient; but most of the details of the first years are lost. It was originally named "Paltz." The first church (M. E.) was formed in 1787. There are 3 churches in town; 2 M. E. and Presb.

MARBLETOWN—was formed by patent June 25, 1703.[9] It was first recognized as a town March 7, 1788. A part of Olive was taken off in 1823, and a part of Rosendale in 1844. It is near the geographical center of the co. The surface is a hilly upland, broken by the valleys of the streams. Stone Ridge, near the center, the highest summit, is about 400 ft. above tide. Esopus Creek flows through the N. part, and Rondout Creek through the S. E. corner. The soil is chiefly a clay and sandy loam. A quarry of Shawangunk grit has been opened, and a sulphur spring has been found near the line of Rosendale. **Stone Ridge,** (p. v.,) S. E. of the center, contains 2 churches and 80 houses; **Kripplebush,** (p. v.,) in the S. part, a church and 12 houses. **High Falls**[10] is a hamlet upon the canal. **Marbletown** is a p. o. **Bruceville** (High Falls p. o.) is a small canal village on the line of Rosendale, in the S. E. corner. The first church (Ref. Prot. D.) was formed in 1738.[11]

MARLBOROUGH—was formed as a precinct, from Newburgh Precinct, March 12, 1772,

at an early period of its growth, a maze of crooked lines, bordered by rude shanties and inhabited by a floating population of Irish laborers. The village still contains a large proportion of Irish, and has a large and increasing number of Germans in habitants. Its appearance has much improved within a few years.

[1] About 20 steamers are engaged in the freighting business of this place. Lines of steamers also run regularly to Albany, New York, and intermediate places. A steam ferry connects the place with Rhinebeck, on the E. bank of the Hudson.

[2] The Lawrence Cement Co. manufactures 60,000 barrels of cement annually.

[3] The aggregate amount of this trade is more than $250,000 per annum.

[4] The Kingston and Rosendale Cement Co. manufacture 70,000 barrels of cement annually.

[5] The site of the first Dutch fort is said to be upon a plateau in the W. bounds of Lot about. The locality is still called by its Indian name, Pookhaw, and is usually called "Old Hachet." On the 7th of June, 1663, as most of the people were at work in the fields, the Indians made a sudden attack upon the fort, which was carelessly left open. Killed 18 and carried away 42 prisoners. Capt. Chambers raised the siege, drove off the Indians, and commenced a war in which the captives were mostly recovered, and the Indians nearly exterminated. The first marriage in the church recorded was that of Jan Jansse Timmermans and Catharine Mattysen, Oct. 4, 1660.

[6] The British force under Gen. Vaughan, consisting of 1,600 men, was sent up the river to cooperate with Burgoyne. Ten days after passing the barriers at the Highlands they amused themselves by burning and plundering the places along the river. They took possession of Kingston Oct. 17, and, after plundering it several hours, they burned every house but one. The houses were mostly of stone, and the woodwork was easily replaced after the retreat of the British. Several of the early meetings of the Legislature were held at this place, and the first State Constitution was formed here.

[8] A ferry connects this place with Poughkeepsie.

[9] This patent was granted to Col. Henry Beekman, Capt. Thos. Gaston, and Capt. Chris. Bridbeack, in trust for the inhabitants. Trustees continued to be annually elected until 1808. The records of 1703 contain the names of the following petitioners for grants of land:—Moses Du Puy, Thomas Vandemarke, Loondart Kool, Richard Wilson, Jeremy Kettell, jr., Gysbert Roosa, Wm. Nottingham, John Cock, sen., and Capt. Richard Bridbeack.

[10] The cement works of Delafield & Baxter, at High Falls, employ about 20 men, and produce about 10,000 barrels annually. The falls on the Rondout are here about 50 feet high, affording a great amount of water power.

[11] The census reports 5 churches in town, 3 Ref. Prot. D. and 2 M. E. Rev. Derick Romeyn and Lev. J. R. Hondenburgh are named Prot. D. Rangers; these were both pastors of the Ref. Prot. D. church at Stone Ridge.

and as a town, March 7, 1788. Plattekill was taken off in 1800. It lies upon the Hudson, in the s. E. corner of the co. Its surface is broken and hilly. Marlborough Mt., on the w. border, is about 1,000 ft. above the river. The streams are [illegible] small brooks flowing directly into the Hudson. The soil is a slaty loam. **Milton,** (p. v.) on the Hudson, in the s. part, contains 3 churches and about 75 dwellings. **Marlborough,** (p. v.) in the s. part, contains 2 churches, several manufactories, and about 50 dwellings. **Lattingtown** is a hamlet. The date and statistics of the early settlement have not been ascertained. The first church (Presb.) was formed Jan. 1, 1764.[3]

NEW PALTZ[4]—was granted by patent by Gov. Andros, Sept. 29, 1677. Its bounds were enlarged April 1, 1775, and a part of Hurley was annexed Feb. 2, 1809. A part of Lloyd was taken off in 1842, a part of Rosendale in 1844, Lloyd in 1845, and a part of Gardiner in 1853. It is an interior town, lying s. E. of the center of the co. Its surface is mostly a hilly upland. The Shawangunk Mts. extend along the w. border. Paltz Point, the highest summit, is 700 ft. above tide. Wall Kil flows N. E. through near the center; it is bordered by wide, fertile flats. The soil is generally a fine quality of sandy loam. Hay is one of the principal products and exports. **New Paltz,** (p. v.) upon Wall Kil, near the center, contains the New Paltz Academy, 2 churches, and 45 dwellings. **Butterville, Ohioville,** and **Springtown** are hamlets. The first settlements were made by a colony of French Huguenots, a few years before the date of the patent.[6] The oldest church record is in French, and bears date of 1683. There are 3 churches in town; Ref. Prot. D., M. E., and Friends.

OLIVE—was formed from Shandaken, Marbletown, and Hurley, April 15, 1823. A part was annexed to Woodstock, and a part of Woodstock was annexed, in 1853. It is an interior town, lying a little N. W. of the center of the co. The surface is mountainous in the N. and W. and hilly in the S. and E.[7] A considerable portion of the mountainous region is too rough for profitable cultivation. Esopus Creek flows S. E. through the town, a little N. of the center. The soil is a sandy, gravelly, and clayey loam. Lumbering and tanning[8] are largely carried on. **Shokan,** (p. v.) upon the creek, N. of the center, contains 2 churches and 20 houses; **Samsonville,** on the S. line, a church, tannery, and 30 houses; **Olive,** (p. v.,) in the N. E. corner, a church and 25 houses; and **Olive City,** (Olive Bridge p. o.,) on the creek, near the center, a tannery and 20 houses. The first settlements were made in the Esopus Valley, in 1740.[11] The first church (Ref. Prot. D.) was formed at Shokan, in 1800.[12]

PLATTEKILL[13]—was formed from Marlborough, March 21, 1800. A part of Shawangunk was annexed April 3, 1846, but was restored March 28, 1848. It lies upon the S. border of the co., near the S. E. corner. Its surface is broken by a series of ridges of an average elevation of 300 ft. above the valleys. Its streams are small brooks and creeks. The soil is a fine quality of sandy and gravelly loam. **Plattekill,** (p. v.,) near the S. line, contains a church and 20 dwellings. **Clintondale,** (p. v.,) in the N. part, on the line of Lloyd, a church and 20 dwellings. **Flint,** (New Hurley p. o.,) in the S. W. corner, on the line of Shawangunk, a church and 15 dwellings, and **Modena,** (p. v.,) near the N. W. corner, 15 dwellings. The first settlements were made [illegible]

the commencement of the last century. The first church (Ref. Prot. D.) was formed in 1770; Rev. Stephen Goetschius was the first pastor.[1]

ROCHESTER[2]—was incorp. by patent June 25, 1703,[3] and organized as a town March 7, 1788. A part of Middletown (Delaware co.) was taken off in 1789, Neversink (Sullivan co.) in 1798, Wawarsing in 1806, and a part of Gardiner in 1853. A part of Wawarsing was annexed March 21, 1823. It is an interior town, lying a little s. w. of the center of the co. Ranges of mountains extend along the E. and W. borders, and a rolling upland occupies the central portions. Rondout Creek flows N. E. through the S. part, and receives as tributaries Sander Kil, Peters Kil, and several other streams. Vernooy Creek flows S. through the W. part. The soil upon the uplands is a gravelly loam, and in the valleys a sandy loam mixed with clay. The Delaware & Hudson Canal extends along the valley of Rondout Creek. Esopus millstones are largely quarried in this town. An extensive cave near Kyserike has been explored about half a mile. **Alligerville** and **Port Jackson** are small villages upon the canal. **Accord** and **Kyserike** are p. offices. The first settlements were made about 1700, by the Dutch.[4] The first church (Ref. Prot. D.) was formed soon after the first settlement. There are now 2 churches in town; Ref. Prot. D. and M. E.

ROSENDALE—was formed from Marbletown, New Paltz, and Hurley, April 26, 1844. It is an interior town, lying E. of the center of the co. Its surface is a rolling and broken upland, the highest summits being 200 to 500 ft. above the valleys. Rondout Creek flows N. E. through near the center, and receives Koxing Kil from the S. and Kottle Kil from the N. The Delaware & Hudson Canal extends along the valley of the Rondout. The soil is principally a sandy loam. The manufacture of cement has become one of the most important branches of business.[5] There is an extensive paper mill in town. **Rosendale,** (p. v.,) upon the creek and canal, contains 2 churches and 450 inhabitants; **Lawrenceville,** 1 mi. W., 40 houses; **Bruceville,** (High Falls p. o.,) upon the line of Marbletown, about 30 houses. **Green Locks,** a canal village, on the E. border, and **Whiteport,** in the N. part, each contain about 20 houses. The first settlements were made by the Dutch, about 1700.[6] The first church (Ref. Prot. D.) was formed in 1797; Rev. Thos. G. Smith was the first preacher.[7]

SAUGERTIES[8]—was formed from Kingston, April 5, 1811. An error in the boundary was corrected June 8, 1812, and a part of Kingston was annexed April 2, 1832. It lies upon the Hudson, in the N. E. corner of the co. The surface is rolling in the E. and hilly in the center and W. The hills upon the river and extending 2 mi. back are underlaid by limestone, from which quicklime and cement are manufactured. Farther W. are quarries of fine flagging stone. Platte Kil flows through the town in a tortuous course and forms the principal drainage. Kaaters Kil flows along the N. border. The soil along the river is a clayey loam, and upon the uplands a sandy and gravelly loam. Quarrying is extensively carried on.[9] **Saugerties,** (p. v.,) upon the Hudson, at the mouth of Esopus Kil, was incorp. April 26, 1831, as "*Ulster.*" Its name was changed April 10, 1855. It contains the Saugerties Academy, 7 churches, a newspaper office, and several extensive manufactories. Pop. 3,334. **Malden,** (p. v.,) upon the Hudson, 2 mi. N. of Saugerties, is the seat of an extensive stone trade. Pop. 350. **Glasco,** (p. v.,) upon the Hudson, 3 mi. S. of Saugerties, is the seat of an extensive brick manufactory and stone trade. Pop.

[2] Named in honor of the Earl of Rochester. The Indian name is said to be Mom hee cens.

[3] The first trustees under the patent were Col. Henry Beekman, Joachim Schoonmaker, and Moses Du Puy.

[4] In 1703 the following persons resided in town:—Van Gerritse Dockum, Lodewyck Hoornbeek, Lambert Kool, sr., Anthony Hoornbeek, Wm. De La Montagne, Tennis Oosterhout, Jan Cartwright, Gysbert Van Garde, Andries Davids, and David Du Bois. Tennis Oosterhout had a corn mill on Mombaccus Kil in 1744.

[5] More than one half of the cement made in the co. is manufactured in this town. The water-limestone quarries may be said to constitute the wealth of the town. The cement manufactories are as follows:—

	Barrels.
Newark and Rosendale Lime and Cement Co., at Whiteport, manufactures annually	125,000
Rosendale Cement Co., Rosendale, manufact's annually	100,000

[7] There are 5 churches in town; 2 Ref. Prot. D., Bap., Friends, and R. C.

[8] This name is said to be derived from the Dutch "Zagger," a sawyer, from a sawmill built by Robert Livingston on Saw Kil. Ebenezer Wooster first used the name in 1749, when surveying the bounds of the Hardenburgh Patent.

In 1826, Henry Barclay, of N. Y., purchased the present site of the village, and the water power. He built a dam and constructed a race which made a fall of 47 feet. He soon after built a rolling mill, paper mill, and cotton factory. The last named has since been changed to a white lead factory. The Ulster Iron Works employs 300 hands night and day, and manufactures 6 000 tons of bar and hoop iron annually. The paper mill employs 125 hands, and turns out 600 tons of paper annually. The White Lead Works employs 40 men, and manufactures 1,500 tons of paint annually. A steam mill for dressing stone turns out 1½ tons daily. The village is also largely engaged in commerce. About 30 sail-vessels are employed in exporting stone and brick. A steam ferry plies between this place and Tivoli station on the Hudson River R. R., and a daily steamer runs to New York.

[9] It is estimated that 2,000 persons are employed in quarrying, dressing, drawing, and shipping stone from this town. The varieties are chiefly flagging and curb stone; but cut stone for many uses is also sold. About a half million of dollars' worth of stone is shipped annually from Saugerties, Malden, and Glasco.

about 300. **West Camp,** (p.v.,) upon the Hudson, in the N. part, contains a church and 15 houses. **Quarryville,** (p.v.,) in the N. part, and **Unionville,** near the center, each contain about 300 inhabitants, who are mostly engaged in getting out stone at the neighboring quarries. **Glenearle,** upon the S. line, **Van Akens Mills,** near the center, and **Ashbury,** are small villages. The first settlements were made by the Dutch at an early period, but the largest immigration was that of the German Palatinates,[1] a colony of whom located at West Camp in 1710. The first church (Luth.) was organized at West Camp, in 1711. There are now 15 churches in town.[2]

SHANDAKEN[3]—was formed from Woodstock, April 9, 1804. A part was annexed from Neversink (Sullivan co.) in 1809. A part of Olive was taken off in 1823, Denning in 1849, and a part of Hardenburgh in 1859. It is the N. W. corner town of the co. Its surface is mostly a mountainous upland, broken by deep ravines. The declivities are steep and rocky, and a large share of the surface is too rough for profitable cultivation. The town is not inhabited except along the valleys, the mountain region being left to wild beasts and hunters. The soil in the valleys is a clay and sandy loam. The principal branches of business pursued are lumbering, shingle making, and tanning. **Shandaken,**[4] (p.v.,) in the N. part, contains a church, a large tannery, a sawmill, gristmill, and 20 houses; **Pine Hill,** (p.v.,) in the N. W. part, a sawmill, gristmill, tannery, and 15 houses. **Ladews Corners,** (The Corner p.o.,) in the extreme E. angle of the town; **Phœnicia,** (p.o.,) in the N. E. corner; and **Woodland,** (p.o.,) E. of the center, are hamlets. At each of these places, and at several other points in town, are extensive tanneries.[5] The first settlements were made before the Revolution.[6] There are 2 churches in town: Ref. Prot. D. and M. E.

SHAWANGUNK[7]—was formed as a precinct Dec. 17, 1743, and as a town March 7, 1788. A part of Gardiner was taken off in 1853, a part was annexed to Plattekill in 1846 and restored in 1848. It is the central town upon the S. border of the co. The surface is a hilly and broken upland. The Shawangunk Mts., extending along the W. border, are about 2,000 ft. above tide. The Shawangunk River forms about ½ of the S. boundary, and flows N. E. through near the center, receiving Dwaars Kil[8] from the W. Wall Kil flows N. E. through the E. part, receiving Muddy Kil from the E. and Dwaars Kil from the W. The soil is generally a gravelly loam. **Shawangunk,** (p.v.,) in the S. E. part, contains a gristmill, sawmill, spoke factory, and 20 houses; **Ulsterville,** (p.o.,) in the S. W. part, 10 houses; and **Galeville Mills,** (p.o.,) on Wall Kil, a church, sawmill, gristmill, and 10 houses. **Dwaars Kil,** near the center, is a p.o. **Bruynswick,** (p.o.,) on the N. line, contains a church and 10 houses; **Jamesburgh,** (p.v.,) near the extreme W. angle, a church and 12 houses. **New Harley** (p.o.) is a hamlet, on the line of Plattekill. The first settlements were made along the valley of Shawangunk River, by the Dutch, between 1680 and 1700.[9] New Fort is a locality where two Indian battles were fought in 1663. The first church (Ref. Prot. D.) was formed Oct. 10, 1753; Rev. V. Vrooman was the first pastor.[10]

WAWARSING[11]—was formed from Rochester, March 14, 1806. A part was reannexed to Rochester in 1823. It is the S. W. corner town in the co. Its surface is mostly a mountainous upland, broken by several deep valleys. The Shawangunk Mts. extend along the E. border, and spurs of the Catskills occupy the central and W. parts. The highest peaks are 2,000 to 3,000 ft. above tide. The mountainous portions in the E. and N. W. corners are rocky and precipitous and

too rough for cultivation. The s. w. portion is a hilly upland. Rondout Creek flows in a deep valley from the w. border s. E. to near the center; thence it turns at nearly right angles and flows N. E. to the E. border. It receives from the s. Sandburgh Creek, a stream which drains the w. declivities of the Shawangunk Mts., Beer Creek, and the outlet of Cape Pond, which flows through near the center and empties into Sandburgh Creek. The Delaware & Hudson Canal extends along the valleys of Rondout and Sandburgh Creeks, at the w. foot of the Shawangunk Mts. The soil in the valleys is principally a sandy loam. Lumber,[1] leather, glass, earthenware, iron, and axes are extensively manufactured in different parts of the town. **Ellenville,** (p. v.,) upon Sandburgh Creek, at the mouth of Beer Kil, was incorp. in Sept. 1858. It is an important canal village, and contains several churches, a high school,[2] newspaper office, and an extensive glass factory.[3] Pop. 1,700. **Napanock,** (p. v.,) upon the Rondout, above its junction with the Sandburgh, contains several churches and manufactories,[4] and a population of about 700. **Homowack,** (p. v.,) a canal village, upon the line of Sullivan co., contains a church, glass factory, woolen factory, and 20 houses. **Kerhonkson,** (p. v.,) a canal village, on the line of Rochester, contains a church and 30 houses. **Lackawack,** (p. v.,) upon the Rondout, in the w. part, contains a church, an extensive tannery, and about 20 houses. **Greenfield,** (p. v.,) in the s. w. part, contains 2 churches, a gristmill, sawmill, tannery, and about 25 houses. **Wawarsing,** (p. v.,) in the N. E., contains a gristmill, sawmill, tannery, and about 25 houses. **Port Benjamin,** a canal village, s. of the Wawarsing, contains about 25 houses. **Port Nixon,** a village upon Rondout Creek and the canal, in the N. E. part, contains a church and about 25 houses. The first settlements were made about the commencement of the last century, principally by the Dutch.[5] During the Revolution the inhabitants were killed, captured, or driven off by the tories and Indians.[6] The first church (Ref. Prot. D.) was formed in 1745; Rev. J. Fryenmoet was the first preacher.[7]

WOODSTOCK—was formed April 11, 1787, from the settlements of Great and Little Shandaken, which had been attached to Hurley. A part of Middletown (Delaware co.) was taken off in 1789, Windham (Greene co.) in 1798, and Shandaken in 1804. A part of Olive was taken off, and parts of Olive and Hurley were annexed, Nov. 25, 1853. It lies upon the N. border of the co., E. of the center. Its surface is mostly a mountainous upland, too rough for profitable cultivation. Several fine valleys extend through the town, separating the upland into several distinct ridges and peaks. Overlook Mt., in the N. E. corner, is 3,500 ft. above tide. Near its summit is Shues Lake, a beautiful sheet of clear water. The scenery in this vicinity is among the finest in Eastern N. Y. Saw Kil and Beaver Kil are the principal streams. The soil is a clay and slaty loam upon the uplands and a gravelly loam in the valleys. **Woodstock,** (p. v.,) in the s. E. part, contains 2 churches, a tannery, and 20 houses; **Bearsville,** (p. o.,) 2 mi. w. of Woodstock, is a hamlet; **Lake Hill** is a p. o., near the center. The first settlements were made just before the commencement of the Revolution.[8] The first church (Luth.) was formed in 1806.[9]

[3] The Ellenville Glass Co., incorp. in 1836, turns out more than $100,000 worth of demijohns, bottles, &c. annually. It employs 200 hands.

[4] The Napanock Ax Factory employs about 100 men, and manufactures 150,000 axes annually. The Napanock Iron Works employs 50 or 60 men, and manufactures pig and wrought iron and R. R. car axles.

[5] The first settlers were Abram Bevier, John Bevier, from New Paltz, in 1708, Egbert De Witt, Wm. Nottingham, and Andries De Witt. An inn was kept by Johannes Bevier before the Revolution. The first store at Wawarsing was kept by Abram Vernooy; the first gristmill was built by Cornelius Vernooy.

[6] On the 12th of Aug. 1781, a large party of tories and Indians, under one Caldwell, appeared in this town. They had formed the design of falling upon Napanock, but, being informed that that place was defended by a cannon, they came to Wawarsing before the inhabitants were up in the morning. At this place was a stone fort on the site of B. C. Hornbeck's house. Two men and a young woman discovered the enemy before they reached the fort, and the young woman succeeded in closing the door just in time to prevent it from being burst open by the savages. The latter, finding further attack dangerous, dispersed for burning and plundering the out settlements. Some 5 or 6 dwellings, 7 barns, and a gristmill were burned, and on the next day the enemy withdrew, laden with spoils. Several lives were lost on both sides, and much property was destroyed.—*The Indians; or Narratives of Massacre and Depredations on the Frontiers of Wawarsink and Vicinity*, p. 21.

[7] The census reports 11 churches in town; 4 M. E., 3 Ref. Prot. D., 2 R. C., Bap., and Friends.

[8] Philip Bonesteel, first innkeeper, settled in 1770; Edward Short, in 1776; Peter Short, in 1784; Jacobus Du Bois, Ephraim Van Keuren, Philip Shultis, and Henry Shultis, sen., in 1788; Jno. Hutchens, in 1790; Wm. Elling, in 1786; Mathew Keip, in 1787; and Jacob Montrose at an early day. Robert Livingston built the first sawmill, and J. Montrose the first gristmill. These settlements were much harassed by the Indians during the war.

[9] There are 6 churches in town; 3 M. E., Luth., Bap., and Friends.

WARREN COUNTY.

THIS county was formed from Washington, March 12, 1813, and was named in honor of Gen. Joseph Warren, of the Revolution. It lies S. and W. of Lake George, near the E. border of the State. It is centrally distant 65 miles from Albany, and contains 968 sq. mi. The surface is very broken and mountainous, less than one-half being susceptible of cultivation. The mountain ranges are continuations of the great mountain masses which culminate in Essex co. The characteristic features of Essex are somewhat softened and subdued in this co. The mountains are broader, less pointed, and generally less precipitous; the valleys are wider and more connected; and there are larger expanses of comparatively level land. With all these modifications, however, a great part of the surface is wild and rugged. High, serrated ridges traverse the entire extent of the co., often rising thousands of feet above the valleys. These mountains, being principally composed of primary rocks, which strongly resist the action of the elements, have a steepness of declivity and sharpness of outline in marked contrast with the gradual slopes and beautifully rounded summits of the highlands of the slate and limestone regions. The soil formed by the exceedingly slow process of disintegration is either washed directly into the valleys, or in the course of ages it collects in thin layers upon the hillsides, giving nutrition to a scanty vegetation. Three of the five mountain ranges N. of the Mohawk Valley extend through this co. The Palmertown Range enters the extreme E. part of Queensbury from Washington co. French Mt., a spur of this range, at the S. E. extremity of Lake George, rises almost precipitously from the lake and attains an elevation of 2,500 to 3,000 ft. above tide. Another spur of this range forms the Luzerne Mts., which extend through the S. part of Luzerne and the E. part of Caldwell,—a N. branch extending N. and forming the whole series of high bluffs which border the W. shore of Lake George. The second or Kayaderosseras Range extends N. E. through Stony Creek, Thurman, Chester, and Horicon, sending spurs both N. and S. Crane Mt., in the S. E. corner of Johnsburgh, the highest peak of this range, has an elevation of 3,000 ft. above the surrounding valleys. The third or Schroon Range occupies the central and northerly part of Johnsburgh and the N. W. angle of Chester. It consists of a great number of rocky peaks rising to a height of 2,500 to 3,000 ft. above tide; most of these have never yet been named. The rocks that compose these great mountain masses are principally gneiss. Granite, white crystaline, limestone, and serpentine are found in considerable quantities in the form of injected veins. A belt of this limestone extends along the course of the Kayaderosseras Mts., and from it a good quality of lime is manufactured. In the valleys and in the S. part of the co. are found layers of Potsdam sandstone, black marble of the Black River limestone strata, Trenton limestone, and Utica slate. Many of these rocks are useful for building materials; and the limestone furnishes an abundance of excellent lime. At the foot of a granite ledge upon Crane Mt. is found a bed of very pure porcelain clay, supposed to have been formed by the slow disintegration of the feldspathic rock. Graphite and magnetic iron ore have also been discovered, but not in sufficient quantities to be profitably worked.

The drainage of the co. is mostly through the Hudson River. This stream enters the co. from Essex, in two branches about 10 mi. apart, and these, after flowing through nearly parallel valleys for about 30 mi., unite in one stream. The E. branch is the outlet of Schroon Lake, and the W. forms the drainage of the Adirondack Mts.[1] This river has a very rapid course; and upon it are several rapids and falls, two of which are worthy of especial note.[2] Lake George[3] is

[1] The W. branch of the Hudson was called by the Indians Te-ahs-ho-ken; the E. branch, At-ste'-ka.

[2] The High Falls are situated just below the great easterly bend of the river in the S. W. corner of Luzerne. The water flows in a series of rapids for three fourths of a mi. over a declining rocky bottom, and is then compressed into a narrow gorge for 80 rods, at the bottom of which it shoots down a nearly perpendicular descent of 60 ft. The gneiss ledge over which it falls is convex in form, and the water is broken into perfect sheets of snow-white foam. A few rods above the last leap of the water, and where it is rushing with the greatest velocity, the river is spanned by a single plank 13 ft. in length. At Glens Falls the river flows over a shelving rock with a total descent of 50 ft. The fall is broken into three channels by natural piers of black limestone standing upon the brow of the precipice over which the water flows.

[3] Called by the Indians Can-i-a-de'ri-oit, the tail of the lake. The name "*Horicon*" has been applied by some modern writers to Lake George, and it is said to be an Indian word meaning "*The Lake of Silver Water.*" However poetic and appropriate this designation may appear, or however euphonious it may sound, it may be questioned whether a term suggested by fancy alone, and never used by the aborigines, will ever find place among the geographical names of the State as one of Indian origin.

situated upon the E. border, and receives the drainage of the E. part of the co. It is 36 mi. long and 1 to 3 mi. wide.[1]

The soil of this co. is mostly a thin, sandy loam. The level lands N. of Glens Falls are very sandy, and are known as "*pine plains*." The declivities of the mountains have a very thin soil, and usually a scanty vegetation. In the valleys is some clay mixed with the sand and disintegrated primitive rocks, forming a deep and excellent soil. Farming and the manufacture of lumber and leather form the leading pursuits of the people. Farming is mostly confined to stock raising and dairying. Immense quantities of logs are floated down the Hudson and manufactured into lumber, shingles, hoops, staves, and heading, at Glens Falls and other places. Black marble is quarried at Glens Falls, and feldspar and kaolin for the manufacture of porcelain, graphite and serpentine are also found in different places. Peat exists in abundance; but it has never been extensively used.

Caldwell, at the head of Lake George, is the county seat.[2] The courthouse was built in 1816–17, with the jail in the basement. The poorhouse is located on a farm of 200 acres in Warrensburgh.[3]

The works of internal improvement are the Glens Falls Navigable Feeder, 7 mi. in length, feeding the summit level of the Champlain Canal, and the improvement in the log navigation of the Hudson. There is no R. R. in the co.[4] Three newspapers are now published in the co.[5]

This co. was the scene of some of the sanguinary battles between the French and English long anterior to its settlement. In 1755, a provincial army of 5,000 men, under Sir. Wm. Johnson, designed to act against the French posts on Lake Champlain, assembled at Albany early in June, and were there joined by a large number of Mohawks under King Hendrick. Forts Lyman (afterward Fort Edward) and Miller were built, and a road was opened to Lake George. The news of Braddock's defeat was received before this army left Albany. The expedition set out on the 8th of Aug., by way of Lake George, for Ticonderoga, with the design of erecting a fort there. Learning that the French had anticipated them and had already fortified Ticonderoga, they encamped near the head of Lake George. About the 1st of Sept., Baron Dieskau, the French commander, with a force of 200 grenadiers, 800 Canadian militia, and 300 Indians, passed up South Bay and across the rocky peninsula, with a view of falling upon the rear of the English and of cutting off their supplies from Fort Lyman. On the 8th, a force of 1000 troops under Col. Ephraim Williams, and of 200 Indians under King Hendrick, were sent out to meet them; but, falling into an ambuscade, the greater part of the troops and the two commanders were killed. The survivors fled, and were immediately followed by the French. The firing alarmed the camp, and a breastwork of logs was immediately thrown up, and 300 men, under Col. Cole, were despatched to cover the retreat of the flying fugitives of the first party. Flushed with victory, the French assailed the English camp with great fury, and a sanguinary conflict ensued, which lasted

[1] This lake has long been celebrated for its wild and picturesque beauty. It is almost completely surrounded by precipitous and rocky mountains, and is studded with little, green islands. Its winding course is marked by a panorama of beautiful and distinct views. At some points high rocky bluffs rise precipitously from the very edge of the water, and at others a little basin seems scooped out among the hills. Most of the mountain declivities are covered with verdure; but a few of them are masses of naked rocks. This whole region is full of historic interest. Each mountain, promontory, and cape has its own tales and reminiscences of the olden time. Some of the fiercest conflicts of the last long wars between the French and English colonists took place upon its shores, and the pure and peaceful waters of this beautiful lake were often ensanguined with the blood of fierce combatants. Again during the Revolution war held high carnival here: but since that period its visitors have been principally the lovers of the wild and beautiful in nature. Sabbath-Day Point and Lord Howes Point are two low beaches upon the W. shore, near the foot of the lake; and Rogers Slide is a precipice upon the W. shore, 200 feet high, rising at an angle of about 25 degrees. Tongue Mt. forming a promontory upon the W. shore, Anthonys Nose, upon the E. shore, and French Mt., near the head of the lake, have each an elevation of more than 2,000 feet.

[2] The first courts were held at the "*Lake George Coffee House*." The clerk's office was located by law within 1 mi. of this place; and this was made the point from which the sheriff's mileage was reckoned. By an act passed March 31, 1815, three commissioners were to be appointed by the governor to locate the site of the courthouse and jail and to superintend its erection. The first co. officers were: Wm. Robards, *First Judge*; Henry Spencer, *Surrog.*; John Becker, *Clerk*; Robert Wilkinson, *Surrogate*, Archibald McMurphy, Wm. Stover, Richard Cameron, and Jonah Skinner, *Coroners*. Thomas Archibald, the present co. clerk, has held the office without interruption since Feb. 1821.

[3] The poorhouse is a two story wooden building. It is 30 years old and in a very dilapidated condition. The annual revenue from the farm is about $800. The average number of inmates is 54, who are supported at a weekly expense of $1.50 each.

from 12 M. to 4 P.M. and resulted in the total defeat of the French.[1] Col. Blanchard, who commanded at Fort Lyman, learning the result of the first engagement in the morning, sent a party of about 300 N. H. and N. Y. militia to the scene of the conflict. This party surprised the French camp, and, after dispersing the troops left to guard it, they hastened on to the English camp and arrived in season to assist materially in gaining the victory. This engagement was the only one fought during the campaign of 1755 that reflected the slightest credit upon the British army.

The remainder of the season was spent in erecting Fort Wm. Henry,[2] on the site of the English camp. A projected attack upon Ticonderoga during the winter was prevented by the uncommon severity of the season. In the summer of 1756 a provincial force of 6,000 men assembled here, but too late to effect their purpose.[3] On the 17th of March, (St. Patrick's day,) 1757, the French, under Longee, a famous partisan officer, attempted to surprise the fort, but were successful only in burning a few buildings and several vessels on the lake.[4] Soon after, a party of 400 English, under Col. Parker, marched to attack Ticonderoga; but, falling into an ambuscade, only 72 escaped. Early in the summer of 1757, Montcalm, the French commander, made extensive preparations to capture Fort Wm. Henry. On the last day of July, Maj. Putnam discovered a large body of the enemy encamped on an island about 18 mi. down the lake. Gen. Webb, who had immediate command, upon being apprized of the matter, enjoined Putnam to keep the intelligence secret and to prepare to escort him (Webb) back to Fort Edward, leaving Col. Munro in command at Fort Wm. Henry. The enemy soon landed in force and proceeded to invest the fort. The garrison consisted of 2,500 men, and the attacking force amounted to nearly 9,000. Gen. Webb had a force of 4,000 regulars at Fort Edward, only 9 mi. distant, and the militia were rapidly collecting to afford further aid. Col. Munro sent pressing and repeated messages for relief; but Gen. Webb paid no attention to the request, and appeared totally indifferent to every thing but his own personal safety. At length, upon the ninth day of the siege, he allowed Gen. Johnson to march with a body of volunteers to the relief of the garrison; but before the party had proceeded 3 mi. they were recalled, and Gen. Webb sent a letter to Col. Munro advising him to surrender on the best terms he could obtain. This letter was intercepted and given to Col. Munro by Montcalm in person. Thus cut off from hope, and assured by Montcalm that the garrison should march out with the honors of war, with their arms, and one of the four cannon of the fort, with their baggage and baggage wagons, and an escort of 500 men to Fort Edward, he surrendered. The Indians soon began to pillage the baggage, and, not being checked, fell upon the sick and wounded, whom they killed and scalped. Excited by carnage, they next surrounded and attacked the disarmed and defenseless troops; and, although Montcalm was implored to furnish a guard, as promised, the massacre was allowed to proceed until a large number were killed or hurried away prisoners for more deliberate torture.[5]

In the summer of 1758 an army of 7,000 regulars and 10,000 provincials, under Gen. Aber-

[1] Gen. Johnson was wounded early in the action, and the command devolved upon Gen. Lyman. The former in his official report, probably from jealousy, avoided mentioning the name or services of the latter, although they were efficient and valuable. Popular report stated the French loss at 700 to 800; but Johnson reported it from 300 to 400. Official accounts place the English loss at 120 killed, 80 wounded, and 62 missing. Dieskau died in England several years after, from wounds received in the engagement.

[2] Named in honor of the Duke of Cumberland, brother of the heir apparent, afterward George III.

[3] Several incidents worthy of note occurred during this expedition. At Halfway Brook a party of teamsters were surprised and captured by 600 of the enemy, who immediately retreated down South Bay. A hundred men, under Capts. Israel Putnam and Robert Rogers, set out from Fort Wm. Henry, crossed over to Lake Champlain, and from an ambuscade poured a destructive fire upon the enemy as they passed. A number were killed, and the English immediately retreated across to Lake George. The next morning they embarked on the lake, and at Sabbath-Day Point they were met by a force of French and Indians three times their own number. The English dashed forward to the attack; and, by reserving their fire until they came into close quarters, they threw the enemy into confusion, and succeeded in escaping, with the loss of one killed and two wounded. In the winter of 1756–57, Maj. Rogers, with 74 men, went down Lake George, and crossed over to Lake Champlain, where he captured a small party of French. On his return he was met on the summit of the hill by a party of 200 French; and a desperate conflict ensued. Maj Rogers was wounded, and the command devolved upon Capt Stark, (afterward Gen. Stark of the Revolution.) The conflict continued until nightfall, when the French retreated, leaving half of their number dead upon the field. Of the rangers, 48 remained unwounded; and the company pushed forward through deep snows and reached the lake in the morning. They were now quite exhausted; and Stark, with two others, pushed on to Fort Wm. Henry, arriving in the evening. He procured sleds and returned to his suffering comrades, whom he reached the next morning. The party finally reached the fort, after extreme suffering.—*Rogers's Jour.*, p 36.

[4] A part of the garrison were Irish, and could not be restrained from celebrating the day by getting drunk. The fort was defended by the vigilance of the rangers, who repulsed the French while the other troops were coming to their senses.—*Rogers's Jour.*, pp. 43, 109.

[5] Humanity sickens at the revolting scenes of this day, which have stained the memory of Montcalm with the blackest infamy. A few survivors of the massacre fled for their lives, and succeeded in reaching Fort Edward in safety. The next day Maj. Putnam was sent with his rangers to watch the motions of the enemy; but he arrived just after they embarked and were beyond reach of pursuit. As he came to the shore, the demolished fort, the burning buildings, and the ghastly and mangled corpses of the dead and the feeble groans of the dying, quickly told the dismal story of treachery and barbarism, scarcely less chargeable to the cowardice of Webb than to the perfidy of Montcalm. Writers differ as to the number murdered on this occasion, the estimates varying from 350 to 1,500. It is probably nearer the latter number. There was a tendency among the provincials to exaggerate, and among the regulars to palliate, the occurrences above related. The massacre occurred Aug. 9, 1757. Among the accounts given by eyewitnesses of the scene, that of Jonathan Carver, the well-known traveler, has perhaps been most frequently quoted. The feeble attempts that have been made to defend the reputation of Montcalm, under the plea that he exerted himself to restrain the Indian barbarities, find ample refutation in the fact that with five or six times more whites than savages the latter were allowed to proceed unmolested. If this relatively small number could not be restrained, there must have existed a degree of insubordination incompatible with military success and strangely at variance with the condition of other armies under Montcalm.

crombie, proceeded against Ticonderoga by way of Lake George. On the 5th of July the army embarked on board of 900 bateaux and 135 boats, and passed down the lake with all the pomp and pageantry of war; and four days after they returned, shattered and broken, with a loss of nearly 2,000 in killed and wounded. Such of the latter as admitted of removal were sent to Fort Edward; and the main army lay inactive in camp at the head of the lake during the remainder of the season. In June, 1759, Maj. Gen. Amherst, with an army of 12,000 men, advanced to Lake George, and, while waiting to complete his arrangements, he commenced building Fort George, about half a mile E. from Fort Wm. Henry.[1] As Gen. Amherst advanced to Ticonderoga, the French withdrew to Crown Point, and soon after to the Isle Aux-Noix. Quebec fell soon after, and the conquest of Canada was completed the following year, rendering the vast military works at Fort George, Ticonderoga, and Crown Point of no further utility, and allowing the hardy pioneers of civilization to advance and occupy the fertile valleys which as provincial soldiers they had previously traversed.

BOLTON —was formed from Thurman, March 25, 1799. Hague was taken off in 1807, a part of Caldwell in 1810, and a part of Horicon in 1838. It lies E. of the center of the co., between Schroon River and Lake George. The E. shore of the lake constitutes the E. line, so that more than one-half of the lake is within the limits of this town. The surface is principally occupied by the high mountainous ridges which lie between the lake and Hudson River. There are 3 principal peaks belonging to this range within the limits of the town,—Tongue Mt.,[2] on the peninsula between the lake and North West Bay, 2,000 ft. above tide; Pole Hill, in the N. part, 2,500 ft. high; and Cat Head, in the center, 1,500 to 1,800 ft. above tide. The mountains generally rise precipitously from the lake; but toward the W. the surface assumes the character of a high, rolling upland. High up among the hills are numerous little crystal lakes, the principal of which are Trout Lake, Marsh Pond, and Edgecomb Pond. Trout Lake is 1,000 ft. above Lake George. Not more than one-half of the town is susceptible of cultivation. The soil is a thin, sandy loam.[3] **Bolton,** (p. o.,) situated on Lake George, opposite Green Island,[4] is a small village. The settlement of the town was commenced in 1792, principally by New England people.[5] The improvements are confined mostly to the vicinity of Lake George. The first church (Presb.) was formed in 1804; the Rev. —— Armstrong was the first settled minister. There are 2 churches in town; Bap. and M. E.

CALDWELL[6]—(Cal'-well) was formed from Queensbury, Bolton, and Thurman, March 2, 1810. It lies around the S. extremity of Lake George. A range of mountains occupies the extreme W. part. The central portion is a high, hilly region, descending abruptly to the lake. Prospect Hill, W. of the S. extremity of the lake, has an elevation of 2,000 ft. above tide. South of this hill a low valley extends S. W., through Caldwell and Luzerne, to the valley of the Hudson near the mouth of Sacondaga River. This depression seems to be a continuation of the valley in which Lake George is situated, and shows that a change of a few feet in the elevation would cause the waters of the lake to flow into the Hudson. In this valley is a chain of small lakes. A narrow strip of low land lies immediately upon the border of the lake. The soil is a sandy loam among the hills, and a dark, rich, sandy and clayey loam on the lowlands. **Caldwell,** (p. o.,) the county seat, is situated near the head of Lake George. It contains 2 churches, several hotels, and about 50 dwellings. This place is the annual resort of great numbers of tourists and pleasure seekers, who are attracted hither by the beautiful scenery of the lake and the surrounding country. During the summer the steamer Minnehaha plies daily between Caldwell and the foot of the lake. Fort William Henry and Fort George were situated near Caldwell, at the head of Lake George, and Bloody Pond, in the S. part. Settlement commenced at the head of Lake George, soon after the conquest of Canada; but its progress was arrested by the Revolution. Soon after the close of the war, settlement was recommenced.[7] There are 2 churches in town; Presb. and Union.

[1] Scarcely a vestige of this fort remains, most of the stones of which it was built having been burned for lime.

[2] Indian names. Meaning probably a sightly place.

[3] Within the limits of this town is the most beautiful scenery of the lake. Its channel is studded with a multitude of small islands, some of them consisting of barren, desolate rocks, while others are clothed with the richest verdure. Diamond Island, near the S. extremity of the lake, derives its name from the beautiful quartz crystals that have been found upon it.

[4] During the Revolution this island was fortified, and Gen. Burgoyne, when he advanced to the Hudson, left upon it a large amount of the property, guarded by two companies of the 47th regiment, commanded by Capt. Aubrey. After the partial success which attended the attempt upon Ticonderoga in 1777, Cols. Warren and Brown, on the 24th of Sept., made an attack upon this place with the gunboats they had captured. They were repulsed by the [illegible]. The enemy being in pursuit, they burned their boats, crossed the mountains to Lake Champlain, [illegible] camp at Pawlet, Vt.

[5] Among the early settlers were Jesse Wood, Jesse Bent, Rufus Randall, Benj. Pratt, Daniel Mann, Wm. Goodman, Peter Lewis, [illegible] Wood, and Thomas Mann. [illegible] Wood, and the first death, that of Mrs. Jesse Bent, the first school.

[6] Named from Gen. John Caldwell, who became a patentee of [illegible] dated Sept. 18–20, 1787.

[7] Among the early settlers were Peter Shaw, Benj. Burch,

CHESTER—was formed from Thurman, March 25, 1799. It lies upon the N. border of the co., between Hudson and Schroon Rivers. The surface is broken. The Kayaderosseras Mts. extend through the S. part, and the Schroon Range occupies the N.W. portion. A continuation of the valley of Schroon Lake, extending in a S.W. direction to the W. branch of the Hudson and separating the mountain ranges, contains a chain of small lakes. Loon Lake is the principal one in this valley; and S. of it, among the hills, is another sheet of water, called Friends Lake. Schroon Lake is about 1,000 feet above tide, and the hills that surround it are 500 to 800 feet above its surface. The soil is generally light and sandy. A cave in Moxons Mt. is quite a curiosity, and has some local notoriety. Near the N. border of the town, upon Stone Bridge Creek, is a natural bridge.[1] Feldspar has been quarried to a considerable extent and exported for the manufacture of porcelain. **Chestertown** (p.v.) contains the Chester Academy and 246 inhabitants; and **Pottersville** (p.v.) 126. The settlement of this town commenced toward the close of the last century.[2] The first church (Bap.) was organized in 1796; and the Rev. Jehiel Fox was the first pastor. There are now 6 churches in town.[3]

HAGUE—was formed from Bolton, Feb. 28, 1807, as "*Rochester.*" Its name was changed April 6, 1808, and a part of Horicon was taken off in 1838. It lies upon the shore of Lake George, in the N.E. corner of the co. The surface is very mountainous, not above one-fourth being susceptible of cultivation. The mountains along the lake generally descend abruptly to the very edge of the water. The narrow valleys of Trout and North West Bay Brooks form the line of separation between the two mountain ranges. Ash Grove Hill, upon the W. border, is 2,000 to 2,500 feet above tide; and upon the shore of the lake, in the N.E. corner, is another mountain peak of nearly the same elevation. Rogers Rock is on the lake shore, in the N.E. corner. It rises from the water's edge at an angle of about 45° and attains an elevation of 300 feet.[4] Sabbath-Day Point is a headland projecting into the lake near the S. border.[5] The soil is a light, sandy loam. Iron ore has been found near Seventh Pond; and mines have been worked to some extent, but they are now abandoned. The beauty of the lake and the solitary grandeur of the mountain scenery of this town render it a favorite resort for hunting and fishing parties and the lovers of the beautiful in nature.[6] **Hague,** (p.o.,) on McDonalds Bay, and **Wardboro** (p.o.) are hamlets. The principal improvements are along the lake. The first settlement was made about 1796.[7] There is a union church in the town.

HORICON—was formed from Bolton and Hague, March 29, 1838. It lies upon the N. border of the co., E. of Schroon Lake. The greater part of its surface is occupied by the two branches of the Kayaderosseras Mts., which are here divided by the valley of Brant Lake. In the N. and E. these ranges rise, in numerous sharp, rocky peaks, 1,600 to 2,000 feet above tide; but in the S. and W. they sink into a hilly plateau region. About one-half of the surface is arable. Among the hills are great numbers of small lakes, laving with their crystal waters the base of the huge, rocky masses which tower above them. Brant Lake, the principal of them, is 10 mi. long and is everywhere surrounded by precipitous hills. The soil is a sandy loam. **Horicon,** (p.v.,) situated on Schroon River, in the S.W. part of the town, contains about 20 houses; and **Mill Brook,** (p.v.,) on Schroon Lake, 15 houses. Aaron Harris, Joseph Gregory, Bishop Carpenter, and Timothy Bennett were some of the earliest settlers.[8] The first church (Wes. Meth.) was formed in 1820; Nathaniel Streeter was the first minister. There are 4 churches in town; 2 Bap., M. E., and Wes. Meth.

JOHNSBURGH[9]—was formed from Thurman, April 6, 1805. It lies upon the bank of the

— Tierce, Andrew Edmonds, Reed Wilbur, Obadiah Hunt, Thaddeus Bradley, Elvis Prosser, Nathan Bullock, Geo. Van Dorsen, —— Butler, and Christopher Potter. The first inn and gristmill were erected by Gen. Caldwell.

[1] The stream, after falling into a basin, enters a passage in two horizontal arches under a natural arch 40 feet high and about 80 broad, and emerges in a single stream from under a precipice 54 feet high, 247 feet from its entrance. This bridge is described in Morse's Geography, 1796, as follows:—"In the county of Montgomery is a small, rapid stream emptying into Schroon Lake, west of Lake George. It runs under a hill, the base of which is about 70 yards in diameter, forming a most curious and beautiful arch in the rock, as white as snow. The fury of the water and the roughness of the bottom, added to the terrific noise within, have hitherto prevented any person from passing through the chasm."—*Am. Univ. Geog.*, 508.

[2] The first settlers were Titus, Jabez, Levi, Gideon, Enos, Jonathan, Daniel, and Caleb Mead. —— Benton, Isaac Bennett, John Haskins, Obadiah and Benj. Knapp, Noel Wightman, James Storbuck, —— Steward, and D. and J. Punderson. The first birth was that of a son of Caleb Mead; and the first death, that of Martin Wightman.

[4] This rock, sometimes called Rogers Slide, receives its name from an incident traditionally related of the escape of Maj. Robert Rogers at this place in the winter of 1758. He was surprised at the top of the rock by a band of Indians, and most of his party were cut off; but he escaped by sliding down the rock to the frozen surface of the lake.

[5] It is generally supposed that this name was derived from the fact that Gen. Amherst and his suite, while passing down the lake on their way to Ticonderoga in the summer of 1759, stopped here to refresh themselves upon the Sabbath; but this derivation of the name is doubtful, for it is mentioned in Rogers's Journal, June 28, 1758,—the season before.

[6] On the 29th of July, 1850, the steamer John Jay, while on her way up the lake, was burned near Garfields. Six persons jumped overboard and were drowned; but the rest were rescued by boats from the shore.

[7] Among the first settlers were Abel Rising, Abner Briggs, Elijah Bailey, Samuel Cook, Ellis Denton, Samuel Patchin, John Holbrun, Isaac and Uriel Balcom, and Uri Waste.

[8] Howard Waters, Nathan, Benj., and James Hayes, Benj. Hayes 2d, John Robbins, James Frazier, and Benj. Wright were also early settlers. Hannah Reynolds taught the first school.

[9] Named from John Thurman, an early settler.

Hudson, and is the S.W. corner town of the co. [illegible] The Schroon Range occupies the N. and central parts, and a spur of the [illegible] Range extends into the S. Crane Mt.,[1] the highest peak of the latter, [illegible] part of the town is too rough and broken for cultivation. The arable land is confined to the narrow valleys. The soil is a sandy and gravelly loam. Kaolin [illegible] are found. There are 2 large tanneries in town. **Johnsburgh.** [illegible] 20 houses: **Nobles Corners,** on the same stream, 25: **North Creek,** [illegible] at the mouth of North Creek, 15: and **The Glen,** [illegible] the town, 7. The first settlement was made soon after the close of the Revolutionary War, by John Thurman, the proprietor of extensive tracts in this part of the State. The [illegible] was organized in 1793. There are 4 churches in town.[2]

LUZERNE—was formed from Queensbury, April 10, 1792, as "Fairfield." Its name was changed April 6, 1808. A strip of territory 1 mi. wide was set off to Queensbury, March 30, 1802. It lies upon the E. bank of Hudson River, in the S. extremity of the co. Two branches of the Luzerne Mts. extend through the town, respectively occupying the N. and S. portions. They are separated by the valley which extends S.W. from the S. end of Lake George. A chain of small lakes lies along its course; and in them two streams take rise, one of which flows to Lake George and the other to the Hudson.[4] About one-half of the surface bordering upon the river is a high, hilly region, but arable. Kettle Bottom, in the S. part, and several peaks of the ridge which extends along the E. border, are 2,000 to 2,500 feet above tide. The soil is a light, sandy loam. **Luzerne** [illegible] is situated on the Hudson, about [illegible] Saratoga Lake. Pop. 280. The first settlements were made about 1770, along the Hudson. Most of the early settlers occupied lands leased from Ebenezer Jessup, the patentee. There are 3 churches in town.[5]

QUEENSBURY [illegible] was incorporated by patent as a township, May 2, 1772, and reorganized as a town, March 13, 1786. Luzerne was taken off in 1792, and a part of Caldwell in 1810. A strip of territory 1 mi. wide was taken from Luzerne and added to this town in 1802. It lies between Lake George and the Hudson, and is the S.E. corner town of the co. The W. part is occupied by the Luzerne Mts., and the extreme N. part by French Mt., a high [illegible] precipitously from the surface of Lake George to a height of 2,700 to 2,800 feet above tide. The central and S. parts are rolling, gradually declining toward the S. The soil is a light, sandy loam in the interior, and a deep, tough clay upon the river. The fall in the Hudson at Glens Falls is about 70 feet high, and affords valuable mill privileges. Below the fall is a small island, through which a race extending from one channel to the other. The manufacture of lumber is largely carried on.[7] **Glens Falls,** [illegible] in corp. April 12, 1839, is situated on the Hudson, in this part. It contains 9 churches, the Glens Falls Academy, 2 newspaper offices, 2 banks and several manufactories.[8] Pop. 1,420. **West Glens Falls,** on the Hudson, contains 2 churches. **Queensbury,** [illegible] in the E. part, 20. **French Mountain** [illegible] The [illegible] level of the Champlain Canal is fed through the Glens Falls race, [illegible] taken from the Hudson above the falls. The settlement was commenced in 1760, but its progress was very slow until after the close of the Revolution.[10] The first house of worship was erected by the Society of Friends, in 1786. There are now 11 churches in town.[11]

STONY CREEK—was formed from [illegible] Nov. 6, 1812. It lies upon the W. bank of Hudson River, and is the S.W. corner town of the co. Nearly the whole town is still a wilderness. Through the center of the town extend [illegible] ranges, several [illegible] of which [illegible] tion of more than 2,000 feet. The valleys of E. and W. Stony Creeks are narrow ravines, forming a natural pass between the valleys of the Hudson and Sacandaga. [illegible]

Creek Center (p. o.) and **Stony Creek,** (p. o.,) both upon Stony Creek, are hamlets. The first settlement was made about 1795.[1] The first preacher was Jonathan Paul, a Christian Indian. The first church (Presb.) was formed about 1800.[2]

THURMAN[3]—was formed April 10, 1792. Bolton and Chester were taken off in 1799, Johnsburgh in 1805, and a part of Caldwell in 1810. The town was divided into "*Athol*" and Warrensburgh Feb. 12, 1813; and "*Athol*" was divided into Thurman and Stony Creek, Nov. 13, 1852. It lies upon the w. bank of the Hudson, s. w. of the center of the co. The w. part is a high, broken upland, almost unknown except to hunters. The E. portion, along the Hudson, is a hilly plateau, with several peaks rising 1,000 feet above the valley. Among the hills are numerous small lakes. The soil is a light, sandy loam. **Athol** (p. o.) and **Thurman,** (p. o.,) both in the E. part, are hamlets. Settlement was commenced in the latter part of the last century.[4] A Bap. church was first formed; Elder Jehiel Fox was the first preacher. There are now 4 churches in town.[5]

WARRENSBURGH—was formed from Thurman, Feb. 12, 1813. It lies between the two branches of the Hudson, near the center of the co., and upon the ridges s. of the junction. The peninsular portion is a rolling plateau 600 to 1,000 feet above the river. The s. w. part is occupied by an immense mountain mass with several summits 2,400 to 3,000 feet above tide. Nearly two-thirds of the land in town is arable. The soil is a light, sandy loam among the hills, and upon the river it is nearly the same, mixed with some clay. **Warrensburgh** (p. v.) is on Schroon River, 3 mi. from its junction with the Hudson. Pop. 700. Across the Hudson, below the mouth of Schroon River, is a long bridge connecting this town with Thurman. The first settlement was made a few years after the close of the Revolution.[6] A M. E. church, the first in town, was organized in 1796; and the Rev. Henry Ryan was the first minister. There are 4 churches in town.[7]

WASHINGTON COUNTY.

This county[1] was formed from Albany as "Charlotte County," March 12, 1772. Its name was changed April 2, 1784; Clinton co. was taken off in 1788; the E. portion was ceded to Vermont in 1790;[2] a strip along its S. border was annexed from Albany Feb. 7, 1791; and Warren co. was taken off in 1813. It lies on the E. border of the State, is centrally distant from Albany 45 miles, and contains an area of 850 sq. mi. The surface consists principally of a series of ridges extending N. E. and S. W., and the valleys between them. The remarkable depression which extends southerly from the S. extremity of Lake Champlain divides these ridges into two distinct groups,—the N. belonging to the Palmertown Mt. Range, and the S. constituting one of the connecting links between the highlands of Southern New York and those of Western Vermont. The S. group is subdivided into three principal ranges, which are all related and of the same general character. The most southerly of these ranges is a northerly continuation of the Taghkanick Range of Rensselaer co., occupying the greater part of White Creek and the E. part of Jackson. The declivities are usually steep, and the summits broad, broken, and rocky. The second—sometimes described as a continuation of the Petersburgh Mts. of Rensselaer—constitutes the highlands of Cambridge, Jackson, Salem, and the E. part of Hebron and Granville. In Salem it spreads out like a fan between the streams. The third comprises the highlands of Easton, Greenwich, Argyle, Hartford, Granville, Hampton, and the E. part of Whitehall. It might with propriety be called Cossayuna Range, from the principal lake which it encloses. The declivities of these ranges are usually steep, and, except where broken by ledges, are arable to their summits. They gradually rise toward the E., reaching their culminating point near the E. border of the co. The highest summits are 1000 to 1200 feet above tide. These three ranges belong to one general group and are of the same geological formation. They are composed of slate rock, ledges of which crop out along their whole extent. Many of these ledges in Granville and Hebron are quarried, and furnish stone much valued for roofing, building, and ornamental purposes. Among the slate quarries are found numerous veins of injected quartz, intersecting the slate strata in every direction, varying from the thickness of paper to several inches. They often present cavities and surfaces beautifully studded with transparent crystals of quartz. The edges of the slate are sometimes bent and distorted by the quartz veins, showing the extreme heat and great force of the injected veins. The soil in this system of highlands consists chiefly of disintegrated slate, and is very fertile.

The second group of highlands, belonging to the Palmertown Mt. Range, occupy the towns of Fort Ann, Dresden, Putnam, and the E. part of Whitehall. They belong to the primary formation, their rocks consisting principally of gneiss, granite, sandstone, and impure limestone. Their sides are very precipitous and broken, and their summits are wild irregular masses of naked, barren rocks. The valleys between them are narrow and rocky, often bordered by precipices many hundred feet in height. The soil is cold and unproductive, like that of all regions of a similar geological formation. A narrow valley extending S. W. from the S. extremity of South Bay divides the group into two ranges. Saddle Mt., overlooking South Bay and 1000 ft. above tide, is the highest peak in the S. range: and Black Mt., 2878 ft. above tide, is the highest peak in the N. range. Diameter Rock, on the N. shore of South Bay, is 1300 ft. above tide.[4]

[1] The original bounds of this co. were as follows: "All that part of the State N. of the present co. of Dutchess, and of a line to run from the mouth of Stone Arabia Creek, Montgomery co., due S. to the Batten Kil, and along that stream to the S. line of Petersburgh, and thence to Connecticut River." Its W. line was the present E. line of Saratoga co. as far N. as Cambridge, and thence due W. to Lake Champlain. These limits embraced the W. half of Vermont, N. of the Batten Kil, and the present co. of Warren, less N. Clinton, and a part of Franklin.

[2] Named from Princess Charlotte, eldest daughter of Geo. III.

[3] The settlement of the question by commissioners appointed for the purpose, was dated Oct. 7, 1790, and the line was finally settled by commissioners from both States in 1814. The N. Y. commissioners were Simeon De Witt, Gideon Hawley, Robert Yates, Nicholas Hosack, and Thomas Ludlow Ogden.

The Hudson River forms the s. half of the w. border of the co. A rich intervale, from half a mi. to a mi. in width, bordered by a series of clay bluffs 20 to 60 ft. high, extends along its course. Most of the other streams of the co. are tributaries of the Hudson, and among them are the Hoosick, Batten Kil, Moses and Fort Edward Creeks, and many smaller streams. Wood Creek[1] is a deep, sluggish stream, flowing into Lake Champlain and draining the valley, which here extends from the lake to the Hudson. The soil along the valley is mostly a hard, stiff clay. The Mettowee, or Pawlet, and the Poultney Rivers, from Vt., are tributaries of Wood Creek. In the co. are several other streams important as mill streams.[2] Lake Champlain s. of Ticonderoga is scarcely more than a ship canal through a reedy marsh bordered by rocky cliffs. Lake George lies along the N. W. border of the co. Among the hills in the interior are several small lakes, the principal of which is Cossayuna Lake, in Argyle.[3]

The various branches of agriculture form the leading pursuits of the people. The principal grains raised are rye, spring wheat, oats, buckwheat, and corn. Peas, beans, flax, and potatoes are also extensively cultivated. Stock raising, dairying, and wool growing are also extensively pursued. The manufactures of the co. are principally along the Hudson and Batten Kil.

The county offices are divided among several towns. The courts are held alternately at Salem and Sandy Hill, and the clerk's office and co. poorhouse are located at Argyle.[4] The jail is connected with the courthouse at Salem, and all prisoners sentenced for more than two months are sent to the penitentiary at Albany.

The principal public works in the co. are the Champlain Canal,[5] extending in and along Wood Creek and the Hudson to Greenwich; the Saratoga & Whitehall R. R., extending through Fort Edward, Kingsbury, Fort Ann, and Whitehall, with a branch to Lake Station and another to Castleton, Vt.; and the Rutland & Washington R. R., extending from Eagle Bridge, through White Creek, Jackson, and Salem, to the State line.

The first newspaper in this co. was established at Salem, in 1788.[6]

Upon the advent of the whites, few Indians were found within the limits of this co.; but Indian

At Fort Edward a dam 27 ft. high and 900 feet long was built by the State in 1821, as a feeder to the canal, but, the Glens Falls feeder superseding it, it was sold to a company in 1849 and cut down to 16 ft. The Saratoga Dam (where the Champlain Canal crosses the Hudson into Saratoga co.) is 1390 feet long. Batten Kil is crossed by 9 dams. White Creek furnishes a large number of mill sites, now improved, but now mostly abandoned. Black Creek has several valuable and improved mill sites. Mettowee or Pawlet River has also several valuable mill sites.

trails and implements of Indian art frequently found show that it had been inhabited at a remote period. The N. portion of the co., lying in the natural channel of communication between Hudson River and Lake Champlain,[1] became the great highway of hostile parties passing between the Five Nations and the Canada Indians, and at a later day by the more formidable armies of disciplined troops in the struggles which ended in the conquest of Canada. The French made incursions upon the English and Five Nations in 1665, 1666, and 1667; and they were repeated by attacks upon the French and Indians in Canada in 1691 and 1692. For several years after, the passage of small hostile parties was of frequent occurrence. In 1709, Forts Ann and Nicholson were erected by the English and garrisoned for the protection of the northern frontier; but upon the return of peace they were abandoned.[2] Frequent incursions of small parties were made in the War of 1748, and many persons were murdered, though no regular [illegible] took place. Again, during the French War of 1755, forts were built at Ft. Ann, Ft. Edward, and the whole region around the head of Lakes George and Champlain became the theater of stirring military events. The armies that attacked Ticonderoga, and those that finally effected the conquest of all the French posts upon the lakes, marched through this region; and it formed a portion of the great battle-ground between the armies of two nations contending for the sovereignty of a continent. In the summer and fall of 1777, upon the advance of Burgoyne, war again, for a brief space, spread terror and desolation over the whole region. "*Skenesborough*" was burned and abandoned on the 7th of July, Fort Ann was taken on the 8th, Fort Edward on the 28th, and the country was overrun by the enemy soon after. On the 13th and 14th of Sept. the British army crossed the Hudson into Saratoga co.; and about the 10th of Oct. Fort Edward was re-taken by the Americans, thus effectually cutting off the retreat of the army, already disheartened by their defeat at Bemis Heights. The surrender of Burgoyne put an end to the war in this section; and the subsequent history of the co. is but the record of the continued and progressive triumphs of peaceful industry.

ARGYLE[3]—was granted by patent, May 21, 1764,[4] and formed as a town, March 23, 1789. Greenwich was taken off in 1803, and Fort Edward in 1818. It lies near the center of the co. Its surface is rolling in the N. and W. and broken and hilly in the S. and E. The highlands are divided into broad ridges with abrupt declivities. In the N. part Tamerack Swamp covers several hundred acres. The principal stream is the Moses Kil,[5] which flows in a S. W. direction through near the center of the town. The other streams are small brooks, which flow into the Hudson, Batten Kil, and Wood Creek. Cossayuna Lake[6] is a beautiful sheet of water, 3 mi. long, situated in a narrow valley in the S. E. part of the town. It is everywhere surrounded by steep hill slopes, and contains several beautiful green islands. To the N. E. of this lake, high up among the hills, is Argyle Lake,[7] a small sheet of water, half a mile in circumference. The soil of the town is generally a productive, slaty or gravelly loam. A mineral spring, 1 mi. N. W. from South Argyle, is said to resemble those at Saratoga. **Argyle** (p. v.) was incorp. March 27, 1838. It is the seat of the Argyle Academy. Argyle was conveyed to 83 [illegible], and in [illegible] the first settlement commenced.[8] The family of John Allen, a tory living on Lot 25, was murdered by Indians belonging to Burgoyne's army, July 26, 1777.[9] The first church (Asso. CAMBRIDGE—was incorp. by patent,[1] July 21, 1761. It was formed as a town[2] in Albany co. March 7, 1788, and annexed to Washington co. Feb. 7, 1791. White Creek and Jackson were taken off in 1815. The surface of the town is hilly in the N. and rolling in the S. The summits of the hills are 200 to 300 ft. above the valleys. The E. part embraces a portion of the valley of Owl Kil, which is celebrated for the beauty of its scenery. Upon the W. of this valley are high undulating hills, the broad sweeps of which show alternate patches of green woodland and cultivated farms; and upon the E. rise the Taghkanick Mts., rough and broken, while the valley itself is very smooth and level. The other streams are Wampecack Creek, Whiteside Brook, and several other small brooks. The soil is generally a gravelly and sandy loam. Flax is extensively cultivated. **Cambridge** (p. v.) contains 100 houses and the Cambridge Washington Academy; **Center Cambridge** (p. v.) 13 houses; **North Cambridge** (p. o.) 10; and **Buskirks Bridge**[3] (p. v.) 15. The first settlers consisted of 30 families, who located in 1761, '62, and '63 and who each received 100 acres of land as a gift from the proprietors.[4] Phineas Whiteside,[5] from Penn., settled 8 mi. W. of the Colerain Colony, in 1766. The expedition against Bennington, under Baum, passed through the town Aug. 13, 1777; and the remnant of the fugitives returned on the night of the 16th. The first church (Asso. Presb.) was organized in 1789; Rev. Thos. Beverly was the first pastor.[6]

DRESDEN—was formed from Putnam, as "*South Bay*," March 15, 1822; its present name was adopted April 17, 1822. It lies between Lake George and the S. extremity of Lake Champlain. Nearly its entire surface is covered by steep mountain ridges, several peaks of which are 1500 ft. above the lake. The declivities of the mountains are steep, sometimes forming perpendicular precipices several hundred feet high. Upon the side of Lake George the mountains rise abruptly from the very edge of the water; but upon the borders of Lake Champlain is a narrow strip of arable land. The principal mountain peaks are Black[7] and Sugar Loaf Mts. and Diameter Precipice. Pike Brook and the head branches of Mill Brook take their rise in these mountains. All of the surface in the interior is covered with forests or naked rocky peaks. The soil is hard and sterile, and is unfit for agricultural purposes. The town was principally conveyed to non-commissioned officers and privates of the Colonial British army; and settlement was begun about 1784, by Jos. Phippeny, at the foot of South Bay. Ebenezer Chapman, —— Boggs, and Daniel Ruff came soon after, and settled along the bay and lake. Lumbering has formed a prominent pursuit. In several localities iron and other ores have been noticed, but none worked to any extent. The town is without a P. O. A bridge was built, at the expense of the State, across South Bay, near its outlet, in 1856.

EASTON—was formed from Stillwater and Saratoga, March 3, 1789, while a part of Albany co., and so named from being the E. town in the Saratoga Patent. It was annexed to Washington co. Feb. 7, 1791. It lies upon the E. bank of the Hudson. A broad intervale extends along the course of the river, which is succeeded by a plateau region, embracing the central and S. portions of the town. The E. part is broken by several lofty hills. The principal highlands are Willards Mt.[8] and Harrington Hill. The streams are Hudson River and Batten Kil,[9] forming the W. and N. boundaries of the town, Kidney and Vly Creeks, and a few minor streams. Upon the E. borders of the town is an extensive swamp known as "*The Vly*."[10] The Di-on-on-dah-o-wa Falls,[11] upon

[1] This patent embraced 31,500 acres, and was nominally conveyed to 30 persons, most of whom resided in Hebron, Conn. The real owners were but 6 in number, and of these 3 only were mentioned in the charter, viz.: Isaac Sawyer and Edward Wells, of Conn., and Jacob Lansing, founder of Lansingburgh. The other three owners—Alex. Colden, Wm. Smith, and Geo. Banyar—were connected with the Colonial Government.

[2] The town is, in fact, a part of the Hoosick Patent.

[3] Named from Martin Van Buskirk, who built the first bridge.

[4] The patent was conditioned to these settlers that they should within 3 years; and to meet this requirement the new country portion was surveyed, and 100 acres offered as a right to each family that would remove thither. These lots lay in a double row, on both sides of Owl Kil, from below the "*Checkered House*" into the present town of Jackson. They embrace the several village precincts from Davis Corners to near Stephensons Corners. Among the settlers were Jas. and Robt., sons of Ephraim Cowan. Jas. and John Cowden, John McClung, Samuel Bell, Col. Elias Geo. Gilmore, Geo. Duncan, David Harrow, Wm. Clark, John Scott, and Thos. Morrison. A son of the last was the first child born of civilized parents in town. Hugh Kelso, a son of Col. Wm., was the first person who died in town. It is recorded that of these 30 families (who were for a time the most thrifty in town), all but two lost their property and died in poverty, mainly from intemperance. They were mostly from Colerain, Conn.

[5] William Whiteside acquired the title to 3 lots, of 100 acres each, of the finest land, and settled his sons (John, Peter, Thomas, William, and James) upon large farms near him. These estates are all owned by his descendants at the present day. The remaining lands were mostly leased by the six proprietors at an annual rent of one shilling per acre; but, they being generally willing to sell at a sum equal to the present worth of the perpetual rent, most of the settlers have gradually acquired the fee simple of their farms. The first inn was of logs, on the site of the "*Checkered House*," and kept by Jas. Cowden. Philip Van Ness built the first sawmill and gristmill on Gordons Brook, near Buskirks Bridge. This neighborhood was called by the Indians "*Iacochate*," and by them a field of 12 acres had been cleared there for corn. Other early settlers on the Hoosick Patent were Col. Lewis Van Wort and John Quackenbush.

[6] The census reports 4 churches; 3 M. E., 1 Asso. Presb.

[7] Black Mt., the highest, is 2,879 ft. above tide.

[8] Willards Mt. is said to have derived its name from a Mr. Willard, who from its summit, with a spyglass, reconnoitered the position of Burgoyne's army at Saratoga.

[9] Judge Benson, in his work upon the names of places, states that this stream was named from the Christian name of Bartholomew Van Hagelen, m., first settler above Stillwater Bar. is the abbreviation of Bartholomew, and hence *Bart's Kil*, or Batten Kil.

[10] A term used to denote a marsh overgrown with log moss and low bushes.

[11] Pronounced Di-on-on-dah'-o-wa. On a map of Saratoga Patent published in 1769 it is written Dion-on-de-ho-we.

Batten Kil, below Galesville, are 60 ft. high, and well worthy of notice. The soil is of excellent quality of sandy and gravelly loam. Limestone of an excellent quality abounds in the town. Machinery, agricultural implements, and woolen goods are manufactured at Galesville. **Easton Corners** (North Easton p. o.) contains 30 houses; **Easton** (p. v.) 17; **South Easton** (p. v.) 15; and **Crandalls Corners** 8. Parts of **Union Village** and **Galesville** are in this town. The date of the first settlement is unknown, but it was probably several years after the Saratoga Patent[2] was issued. In 1709 a fort[3] was built on the bank of Batten Kil, at Galesville, and a few families settled under its shelter; but the dread of Indian hostilities prevented the settlement from spreading. On the 30th of Nov. 1745, the enemy made a descent upon the place, killed 30 persons, and took 60 prisoners, including a portion of the garrison, who were surprised from the fort by the Indians feigning to be wounded. The remaining part of the garrison burned the fort and unfinished blockhouses and withdrew, leaving the frontier unprotected. Settlers did not return until 1760.[4] At Schuylerville is a bridge across the Hudson 800 ft. long. The first religious meeting (Quaker) was held in 1778. A Ref. Prot. D. church was formed in 1800; Rev. Philip Duryea was the first preacher.[5]

FORT ANN—was formed, as "*Westfield*," March 23, 1786. Hartford was taken off in 1793, and Putnam in 1806. It received its present name, April 6, 1808, from the old fort erected here in 1709. It lies s. of the southern extremity of Lake Champlain, and s. E. of Lake George. Its central and w. parts are occupied by the high and rocky peaks of the Palmertown Mts., here divided into three distinct ranges,—Palmertown Mt., in the w. part, Mt. Putnam, in the center, and Fort Ann Mts., in the E. The extreme E. edge of the town is occupied by uplands belonging to the Cossayuna Range. Diameter Rock and Buck Mt., on the line of Dresden, are the highest peaks, and are 1300 to 2500 ft. above tide. The valleys separating the ranges of the Palmertown Mts. are known as "*Furnace*" and "*Welchs Hollow*." The principal streams are Wood Creek, Halfway Creek, Furnace Hollow Creek, and Podunk Brook. The principal bodies of water are Orebed, Sly, Copeland, Hadlock, and Trout Ponds. The soil in the mountain region is hard and sterile, scarcely strong enough to support the natural growth of forest trees; but in the valleys it is a gravelly loam alternating with a stiff clay.[7] Iron[8] and woolen goods are manufactured to some extent. **Fort Ann**[9] (p. v.) has 608 inhabitants; **Griswolds Mills** (p. v.) about 14 houses. **West Fort Ann,** (p. o.) **South Bay, Canes Falls,** and **Comstocks Landing** are small villages. Fort Ann was one of a chain of military works erected in 1709, to facilitate the extensive operations then in progress against Canada.[10] It stood upon the w. side of Wood Creek, about half a mile from the present village of Fort Ann, the Champlain Canal passing partly across the spot which it enclosed. It was built at the joint expense of England and the Colonies. Artillery Patent, covering the E. part of this town, was granted Oct. 24, 1764, to Jos. Walton and 23 other Provincial officers, in equal shares, irrespective of grade. Settlement was not generally begun until after the Revolution. An engagement occurred here, July 8, 1777, between the rear guard of the retreating American army, under Col. Long, and the advanced guard of the British, under Col. Hill.[11] In Oct. 1780, a blockhouse in this town was burned by the enemy. The first church (Bap.) was formed in 1789;[12] Rev. Sherman Babcock was the first pastor.

FORT EDWARD—was formed from Argyle, April 10, 1818. It lies upon the E. bank of the Hudson, near the center of the w. border of the co. A wide intervale extends along the

1 Formerly called "*Johnstown*." The present name is derived from J. Ira Orlb, former pat. proprietor of the village. Sept. 1786.

3 This fort was built of logs, and consisted of a row of pickets, each about 12 ft. high, set in the ground close to each other in the manner of palisades, forming a square, the length of whose sides was within the reach of a musket shot." At each corner were houses for officers; and within the palisades were barracks of timbers. *Kenny's Hist.*

4 Among the first settlers of Fort Ann were Pet. Becker, Elijah Freeman, Thos. and Michael Beadle, William Thompson, Nathan Potter, John Sweet, and William Collin. A school was taught near Union Village as early as 1787. Gerrit Lansingh kept the first store, in 1794; and John Gale built the first mill, at Galesville, in 1810. The first woolen factory was built in the summer of 1846, by Gale, Rodgers & Reynolds.

5 There are 5 churches in town, 2 M. E., 2 Ref. Prot. D., and 1 Friends.

6 Said to be named from a small remnant of Indians, who were driven from Conn. and settled here.

7 Near Wood Creek, 50 feet above the present surface of the stream, are found pot holes worn by water, evidently by an ancient current flowing southward.

8 A blast furnace was built at Mt. Hope in 1826, which makes [illegible] tons of pig iron daily. A [illegible] was built in West Fort Ann in 1828, for making anchors and chain cables.

river, but toward the E. the surface rises to a height of 200 to 300 ft. and spreads out into a beautifully undulating upland. The Hudson, Moses Kil and Dead Creek are the principal streams. The soil upon the river is a mixture of heavy clay and alluvium, but farther E. it is a sandy or gravelly loam. In town are several extensive manufacturing establishments.[1] **Fort Edward**[2] (p. v.) is finely situated on the Hudson. Pop. in 1858, 1,565. The Washington Co. Seminary and Female Collegiate Institute,[3] one of the largest academic institutions in the State, is located at this village. **Fort Miller** (p. v.) is situated on the Hudson, about 7 mi. below Fort Edward. Pop. 225. **Fort Edward Center** is a p. o., and **Durkeetown** is a hamlet. The first family that located in the town or co. was that of Col. Lydius, son of Rev. John Lydius, who, having acquired the title to Dellius's discarded patent, built a house, and engaged in trade with the Indians at what is now Fort Edward Village.[4] His daughter, Catherine, was born here, and was the first white child born in the co. Fort Nicholson was built in 1709, but was soon after abandoned. As a part of the plan of military operations against Canada, about 600 men, under Gen. Lyman, were sent forward, in June, 1755, to build a fort where Fort Nicholson had formerly stood, at the great carrying place to Lake Champlain.[5] Fort Edward was a very important depôt for arms and rendezvous for armies in the great expeditions against Canada; and it served as a vast hospital for the sick and wounded until 1760, when it was allowed to go to decay. During the Revolution it was again occupied by both British and Americans. Fort Miller is named from the fort built, about 1755, in the bend of the river opposite the village.[6] After the peace this town settled rapidly. Wm. Duer,[7] son-in-law to Lord Sterling, was the pioneer of Ft. Miller, where he built a large house and sawmill. There are 6 churches in town.[8]

GRANVILLE—was formed March 23, 1786. It is situated upon the E. border of the co., N. of the center. Its surface is undulating and hilly. The ridges generally slope gradually to their summits, which are elevated 300 to 500 ft. above the valleys. Quarries of excellent roofing slate have been opened in different parts of the town.[9] Wide intervales of excellent land extend along the course of Mettowee, or Pawlet,[10] and Indian Rivers. The soil is a slaty and gravelly loam, and is particularly adapted to potatoes, large quantities of which are exported. A limited amount of manufactures[11] is carried on in town. **Granville**[12] (p. v.) contains an academy and 450 inhabitants; **North Granville** (p. v.) a female seminary and 220 inhabitants; **Middle Granville** (p. v.) 439 inhabitants; and **South Granville** (p. v.) 111. The land in this town is embraced in several grants made to about 30 captains and lieutenants who had served in the French War.[13] Barnaby Byrnes Patent, of 2000 acres, in the S. E. corner, was sold to Kennith McKennith, a merchant of New York, who again sold it to Donald Fisher, a tailor of that city. Fisher induced several relatives of his to remove from Scotland and settle upon his tract. In the Revolution he withdrew to Canada, and his lands were confiscated and sold; but, owing to some informality, the

[5] It was named Fort Lyman; but a few years after, the name was changed to Ft. Edward, in honor of Edward, Duke of York, grandson of Geo. II., and brother of Geo. III. It stood on the banks of the river, N. of the creek, and within the present village limits. It was 4 sided, with bastions on 3 angles, the 4th being protected by the river. Its ramparts of earth and timber, 16 ft. high and 22 thick, were mounted with 6 cannon, and enclosed several large buildings. Storehouses and barracks were built on Moreau's Island, opposite. A band of savages attempted to surprise it in Aug. 1756, but were repulsed by Maj. Israel Putnam and his rangers. In the winter following, Putnam saved the fort from destruction by a characteristic exploit of cool intrepidity and daring. The fort accidentally took fire, and the flames spread with great rapidity in the immediate vicinity of the powder magazine. Putnam placed himself in the path of the flames, and fought desperately until the fire was subdued; and when he retired from his post his arms, face, and hands were entirely blackened, and the frail covering of the magazine was completely charred.

The murder of Jane M'Crea took place July 27, 1777, near a spring, at the foot of a venerable pine tree a little S. of the village. The tragedy was at once reported throughout the country, and acted greatly to weaken the influence of the British, while it aroused the patriots to more desperate efforts in resisting the invaders. The old pine tree died in 1849; and in 1853 it was cut down and made into canes and boxes as mementos of the event. The remains of Miss M'C. are interred in the Union Cemetery.

[6] The flat upon which this fort was erected is protected on three sides by the river and a narrow bay; it was further defended by a strong parapet of timber covered with earth, and with a ditch in front. A blockhouse was built upon the bluff that overlooks the point; and within the flat storehouses were erected.

[7] He was the first State Senator from this co. Among the first settlers were Noah Payne, from Warren co., Conn., in 1766, Timothy Buel, and the Crocker families. Nath'l Gage was living at Ft. Miller when these families arrived. The Durkee, Saunders, and Bell families settled in the upper part of the town. The first one of these consisted of a father and 2 sons, from R. I. These settlers first took out titles under Lydius, but, finding them invalid, they bought of the Schuyler proprietors. There is no tradition of Lydius returning whatever he may have received. Hugh Monroe, owner of Monroe's Island, Patrick Smith, and Dr. Jas. Smith settled at Fort Edward about 1764. The house of Patrick Smith still standing. The site of Canal Aqueduct was the headquarters of Burgoyne and Gen. Schuyler at different times during the Revolution, and it was the co. courthouse.

Jan. 5, 1763, three of these emigrants—Duncan, George, and Jas. Campbell, sons of Laughlin Campbell—petitioned for 100,000 acres; and on the 11th of Nov. following a patent of 10,000 acres was issued to the 3 brothers, their 3 sisters, (Rose Graham, Margaret Eustace, and Lily Murray,) and 4 other persons. This grant embraced about one-third of the town of Greenwich. The first church (Bap.) was organized in 1774; Rev. Leonard Bowers was the first preacher.[7]

HAMPTON—was formed March 3, 1786. It lies upon the E. border [illegible] the co. S. of the center. A range of hills, about 500 ft. above the valleys and for the most part covered with forests, extends through the central and eastern parts of the town. Poultney River, separating the town from Vt., is the principal stream. Along its course is a wide intervale of fine land. The soil is a gravelly loam interspersed with clay. The intervale is alike fertilized and desolated by the frequent overflows of the stream. **Hampton Corners** Hamp[illegible] p. o. 5 houses, and **Low Hampton**[8] p. o. 5. The greater part of this town was granted to Provincial officers. The N. part embraces about 2000 acres of Skenes Little Patent.[10] The first settlement was made some little time before the Revolution,[11] by Capt. Brooks, Col. Gideon Warner, and —— Webster. The first church (Prot. E.) was built at a very early date;[12] Rev. Stephen Jeweth, from N. J., was the first preacher.

The summits of the highest hills are 500 to 700 ft. above the level of the Champlain Canal. The principal streams are East Creek and its branches. Slate and limestone of an excellent quality are found among the hills.[13] The soil in the S. E. is a rich, slaty loam, and that in the N. W. a heavy clay. There are several chalybeate springs, the principal of which is

Among the limestone ridges in the N. part are several small caves. **North Hartford** (Hartford p. o.) contains about 300 inhabitants; **South Hartford** (p. v.) 150; and **Log Village** 50. This town embraces the Provincial Patent, granted, May 2, 1764, to 26 commissioned officers of the N. Y. Infantry.[1] Settlement was not commenced until after the Revolution.[2] The first church (Bap.) was built in 1789.[3]

HEBRON[4]—was formed March 23, 1786, and named from Hebron, Conn. It lies near the center of the E. border of the co. A broad mountain range extends through the center, occupying nearly one-half of its entire surface, and a series of high hills extends through the E. and W. sections. The summits of the highlands are 300 to 500 ft. above the valleys and are mostly crowned with forests. The ranges of hills are separated by the valleys of Black Creek and its principal W. branch. The soil is a sandy and slaty loam, of a light, porous nature, easy of cultivation, and well adapted to resist the extremes of wet and drouth. In the hilly regions is considerable rocky waste land. In the N. and E. are extensive and valuable quarries of slate. **North Hebron**[5] (p. v.) contains the North Hebron Institute and 12 houses; **East Hebron** (Hebron p. o.) 12 houses; **West Hebron** (p. v.) the West Hebron Classical School and 25 houses; **Belcher**[6] (p. v.) 20 houses; and **Slateville** (p. o.) 8. This town was embraced in patents granted to officers and privates who had served in the French War,—mostly to Scotch Highlanders belonging to the 77th Regt. of Foot. These grants were made so long after the war that those who were entitled to them never appeared to claim them. The first settlements appear to have been made before the Revolution. There are two academic institutions in town. The first church (Asso. Ref. Presb.) was organized in 1780;[7] Rev. Dr. Gray was the first pastor.

JACKSON—was formed from Cambridge, April 17, 1815. It lies on the E. border of the co., S. of the center. The N. branch of the Taghkanick Range occupies the E. portion of the town, and several parallel ranges extend through the central and W. portions, rendering the entire surface very hilly. The summits of the hills are 300 to 800 ft. above the valleys and are generally crowned with forests. The declivities are often steep and rocky. The principal streams are Batten Kil and a branch of Owl Creek. In the valley between the hills that border immediately upon Batten Kil and those farther W. are several small lakes, known as Long, Big, Dead, and Little Ponds. These lakes are beautiful sheets of water, surrounded by hills, forests, and fine cultivated farms. The soil is a slaty loam and very productive. **Jackson Center** (Jackson p. o.) contains 16 houses; **Coila**, (p. v.,) on the line of Cambridge, about 30 houses; and **Anaquassacook** 12. Portions of this town and White Creek were embraced in the Anaquassacook Patent of 10,000 acres, granted May 11, 1762.[8] The first settlers were James Irvine, Peter Magill, and John Miller, all of whom located in the S. part of the town.[9] The only church (Ref. Prot. D.) in town was organized Dec. 31, 1833; Rev. Jas. W. Stewart was the first pastor. Geo. Law, one of the projectors and proprietors of the California line of steamships, was a native of this town.

KINGSBURY—was incorp. by patent May 11, 1762, and recognized as a town by the State Government March 23, 1786. It lies on the W. border of the co., N. of the center. Nearly all of its surface is level or gently undulating. A range of hills, rising about 150 ft. above the valleys, occupies the extreme E. edge of the town. The principal streams are the Hudson, in the S. W. corner; Wood Creek, upon the E. border; Halfway Brook, in the N. W. corner, and Moss Brook. At Bakers Falls,[10] upon the Hudson, the river shoots down a steep descent of ledges, in all 76 ft. in 60 rods, forming a scene of great beauty, and affording an extensive water-power. The soil along the valley of Wood Creek is a hard, stiff clay; in the other parts of the town, a sandy or gravelly loam. There are extensive quarries of limestone in town, furnishing an excellent building material; from these quarries was obtained the stone for the locks on the Champlain & Hudson

[1] This patent contained 26,000 acres, each officer receiving 1,000 acres.

[2] Col. John Buck, Manning Bull, Stephen and Asa Bump, Jeduthun Dwight Dimmick, and Nathan and Saml. Taylor were among the first settlers. Amon and Elkanah Bull in Bakers Mills, came in 1782, and Timothy Stewart, Ebenezer Smith, and John Peirce in 1784. A school was taught as early as 1790, at Nash Hartwell, by Dyer Paine, from Conn. A grist-mill was built at Bakers Falls at an early date.

[3] The second church was Presb., and was organized in 1795, by Rev. Wm. Miller, the pastor of the Rebel Church of 1777. Rev. Edward Dorr Griffin, who died in 1837, resided in this town.

[4] During the Rev. Jan. 1, and for some time after, the place was known as "*Black Creek*."

[5] Locally known as "*Moses Mountain*."

[6] Locally known as "*Belcher*."

[8] This patent was granted to Ryer, Jacob, Freeman, and W. M. Schermerhorn, Johannes N. Bleecker, and Peter Quackenbos, Thos. and John Smith, and Joseph Jansen, all of Schenectady.

[9] Among the settlers on the Anaquassacook were Hugh Thompson and Ebenezer Billings, and near the ponds John Mellen and Jonathan Cooper. A schoolhouse was built in 1785, a little W. of Peter Hall's residence. An inn was kept by Isaac Murray about 1790. John Metcalf built a stone mill here, in 1781, on the site of the present residence of Peter Hill.

Kingsbury Patent, containing 2,000 acres, was granted to Jas. Bradshaw and 22 others, from Conn., May 11, 1762. The first settlers were James Bradshaw, Albert Baker, and his sons Albert and Charles, from New York City. A sawmill was built at Bakers Falls before the Revolution, and a gristmill in 1807. The town was the scene of many an adventure during the French War,[4] and the settlement was entirely broken up during the Revolution. Traces of a road cut by Burgoyne's army are still visible near Moss Street. The first minister was Francis Bayley, a Moravian, about 1770. Meetings were held by the Prot. E. and the Bap. in 1795.[5] Several noted men have been residents of this town.[6]

PUTNAM—was formed from "*Westfield*," (now Fort Ann.) Feb. 28, 1808. Quebec was set off in 1822. This town lies in the extreme N. end of the co., upon the mountainous peninsula between Lakes George and Champlain. The mountains are divided into two separate ranges by the valleys of Mill and Charter Brooks. The w. range of mountains rises abruptly from the surface of Lake George, and in the s. part of the town attains an elevation of 900 to 1,000 ft. above the surface of the lake. The greater part of the surface is rocky, broken, and unfit for cultivation. Small tracts of arable land extend along the valleys of the small streams and the borders of Lake George. The soil is generally a hard, gravelly loam. Graphite of a fine quality is found in abundance. A small pond lies among the mountains, on the w. side of the town, 300 feet above Lake George. **Putnam Corners,** (Putnam p.o.,) containing about 10 houses, is the only village. The arable lands were mostly granted to privates of the N. Y. Provincial regiments, and feeble settlements had probably commenced before the Revolution.[7] The first church (Asso. Presb.) was built in 1801,[8] Rev. James Miller, from Scotland, was the first pastor. A private academy at Putnam Corners was established in 1854.

SALEM—was formed by patent Aug. 7, 1764, and was recognized by statute March 24, 1786. It lies on the E. border of the co., S. of the center. Its surface consists of moderately elevated ridges, separated by narrow valleys, all extending in a N. E. and S. W. direction. The hills are usually bordered by gradual slopes and their summits are crowned with forests. There is very little waste land in town. Batten Kil, forming the S. boundary, and Black, White, and Trout Creeks, are the principal streams. Lyttles Pond, in the N. part of the town, is a beautiful sheet of water lying in a basin among the hills and surrounded by forests. The soil is a rich, slaty or gravelly loam. **Salem,** (p.v.,) incorp. April 4, 1803, has 872 inhabitants; **Shushan** (p.v.) has 25 houses; and **Eagleville,** (East Salem p.o.,) **Clapps Mills,** and **Fitches Point** have each 40 to 50 inhabitants. James Turner and Joshua Conkey, from Pelham, Mass., were the first settlers, in 1761. They were joined, the next year, by Hamilton McCollister. In 1764 a patent of 25,000 acres was obtained,—one-half owned by a company of New England settlers and the other by Oliver De Lancey and Peter Du Bois, two Government officials.[9] These last sold their share to Rev. Thos. Clark and his company of Irish and Scotch immigrants at a price of about one shilling per acre.[10] The Camden Tract, on the E. part of the town, was granted to capitalists

[1] The dam at Sandy Hill, across the Hudson, 1,240 ft. long and 30 ft. high, furnishes water-power for several mills and works of every description. At Baker Falls there are a paper mill and 2 gristmills. The lumber business of the town is very extensive, and supported the sawmills long ago built with lumber floated down from the Upper Hudson. There is also an extensive manufactory for the manufacture of pianos, steam engines, portable sawmills, &c.

[2] The village has been a distributing town since 1807. It was incorp. March 9, 1810.

[3] Among the other first settlers were Michael Hoffnagle, Solomon Kingsley, Calvin Nichols, and Seely.

[4] At one time 17 soldiers were taken prisoners by the Indians and carried to the present site of Sandy Hill Village. They were seated in a log, in a row, with their legs stretched out. The Indians began to tomahawk them, taking them in order from one end of the log. When all were killed but one, (John Quackenboss, of Albany,) a squaw claimed him, and his life was spared. He returned to Albany, married, and lived to a good old age. His sons, in Cambridge. In Aug., 1756, Maj. Putnam and Ensign encountered a party of French and Indians in this town, during which engagement Putnam was made prisoner. The enemy were finally compelled to withdraw, with a loss of 90 men.

[5] The town reports 3 churches, 3 Bap., 3 M. E., Presb., Prot. E., and R. C.

WHITE CREEK[3]—was formed from Cambridge, April 17, 1815. It is the S. E. corner town of the co. The surface of the S. portion is gently rolling, and the central and N. portions are occupied by the Taghkanick Mts. The summits of these mountains are rocky and broken and covered with forests, and their sides are bounded by abrupt declivities and perpendicular ledges. The principal streams are Hoosick River, Owl Kil, Pumpkin Hook,[4] Center, White, and Little White Creeks. The upper course of Owl Kil is through a deep and narrow valley abounding with picturesque views. A small vein of lead has been discovered three-fourths of a mi. E. of Posts Corners. The soil is a fine quality of gravelly loam. More sheep are raised in this town than in any other in the co. Garden seeds and flax are largely cultivated. **North White Creek** (p. v.) adjoins Cambridge. **White Creek,** (p. o.,) **Posts Corners, Center White Creek,** (p. o.) **Ash Grove, Dorrs Corners, Pumpkin Hook,** and **Martindale Corners** are hamlets. The Walloomsac Patent, lying partly in this town, on the S., was settled by the Dutch. Among the other grants were the Bain, Embury, Grant and Campbell, and Lake and Van Cuyler, Patents. A colony of Irish Methodists settled near Ash Grove about 1770; and here was organized the second M. E. church in America,[5] by Thos. Ashton (from whom the locality was named) and Rev. Philip Embury. James and Thos. Morrison made the first settlement, near White Creek.[6]

WHITEHALL[7]—was incorp. by patent Nov. 12, 1763, as "*Skenesborough.*"[8] Its name was changed March 23, 1786. It lies at the S. extremity of Lake Champlain. Its surface is mountainous in the W. and level and undulating in the center and E. Saddle Mt., upon the W. border, is nearly 900 ft. above the surface of the lake. The principal streams are Wood Creek, Mettowee (or Pawlet) and Poultney Rivers. Upon Wood Creek, near its mouth, is a fall which furnishes a valuable water-power. The soil of the greater part of the town is a hard, stiff clay and is best adapted to grazing. Considerable manufacturing is carried on in town.[9] **Whitehall** (p. v.) is situated near the mouth of Wood Creek, on Lake Champlain. The R. R., canal, and lake trade give this place commercial importance. The Whitehall Academy is in the E. part of the village. Pop. 3,225. This town was the scene of stirring military events during the French War.[10] The first settler was Maj. Skene, who located here, with 30 families, in 1761. Nominally associating 24 others with himself, he obtained a patent of 25,000 acres, March 13, 1765; and a patent of 9,000 acres in the town of Hampton and Whitehall, July 6, 1771, known as Skene's Little Patent. About 1770 he built a massive stone house and barn, a forge, and one or two sawmills. He also built a sloop upon the lake, and a road, known as "*Skenes Road,*" 30 mi. through the wilderness toward Salem. He appears to have been a man of great energy of character, and he endeavored to secure solid and permanent advantages to the infant settlement.[11] Upon the approach of the Revolution, Maj. Skene espoused the royalist cause, and his house was taken by the Americans in May, 1775.[12] In 1776 an American garrison was stationed here, and a small fleet was fitted

[1] Rev. Thos. Clark (Asso. Presb.) was the first minister; and his church, formed in Ireland, was transplanted without reorganization. In 1769 a Presb. society was formed, Rev. John Hutcheson first pastor. Their church, then unfinished, was fortified by Capt. Jos. McCracken in 1777, and soon after was burned by the enemy. There are now 7 churches in town; 2 M. E., Asso. Presb., Asso. Ref. Presb., F. W. Bap., Presb., and Morav.

[2] For a great number of years this school was one of the most noted in Eastern New York. Among the distinguished persons who have received a portion of their education here were Hon. Samuel Nelson, of the U. S. Supreme Court, Hon. John Savage, formerly Chief Justice of N. Y., and Rev. Dr. Bethune, of Brooklyn.

[3] The creek from which the town was named received its name from the white quartz pebbles that form its bed.

[4] Said to be a corruption of the Indian Pempamuck, the name of a tribe of Indians who removed hither from Conn.

[5] Embury preached the first Meth. sermon in N. Y., 3 or 4 years before. The census reports 8 churches in town; 2 Bap., 2 M. E., Friends, Presb., R. C., and Asso. Ref. Presb.

[6] Among the other early settlers were Ruel Beebe, Maj. John Porter, Ephraim James, and Robt. Cowan, David Sharrow, Saml Clark, John McClaine, Geo. Duncan, Robt. and George Gilmore, Wm. Eager, Wm. Scribner, Saml Ball, and John Scott. The early settlers in the E. part of the town were Thomas Ashton, Edmund Wells, John and Ebenezer Allen, David Sprague, Seth Chase, John Benham, Thos. Metcalf, John Woods, Simeon Fowler, John Young, Joseph Dewey, and John Carey. John Rhodes built the first clothing works, at Lumpkin Hook.

[7] Called by the Indians "Kah-ho-quah-ne," *the place where dip nets*

[8] Named from Maj. Philip Skene, a British half-pay officer, its founder and patentee.

[9] The manufactures consist of lumber, machinery, vessels, boats, carpets, and sash and blinds. An extensive lumber trade is carried on with Canada and with ports on the Hudson, through Lake Champlain and the Champlain Canal.

[10] Maj. Israel Putnam was stationed here in the summer of 1758, with 35 rangers, to watch the motions of the enemy and prevent the passage of small parties. A point now known as Puts Rock—three-fourths of a mi. S. of the village, overlooking South Bay, and completely commanding the passage of Wood Creek, was chosen, and a stone breastwork was built and concealed by bushes. Soon after the work was finished, a party of 500 French, led by the partisan Melang, upon a secret expedition, attempted to pass up the creek in the night. They were received by a most destructive fire, and before they could recover from their surprise, one-half of their number were killed. Finding that the enemy had landed below and that he was in danger of being surrounded, Putnam quietly withdrew, with no loss, and but two men wounded.

[11] Maj. Skene became acquainted with this place while accompanying the expedition under Gen. Amherst, in 1755. Soon after he planted his first settlement, of 30 families, he was obliged to go to the West Indies; and upon his return in 1763 he found but 15 families remaining. He brought a number of slaves from the West Indies, and employed them and a large number of discharged soldiers upon his works. His house was 30 by 40 ft. on the ground, and 2½ stories high; and his barn was 130 ft. long, with massive stone walls pierced with portholes. The other buildings in his settlement were a few frail houses belonging to his tenants.

[12] He was very popular with the settlers, and hence he was an object of both fear and dislike to the patriots. His place was captured by a party of volunteers under Capt. Herrick, and

out in the harbor and put under the command of Benedict Arnold. Upon the approach of Burgoyne's army, in 1777, the fort was blown up and the barracks and stores burned. During the War of 1812 this place became an important depot of military stores. The first steamboat on the lake was launched here, in 1809. The Champlain Canal was completed to this point from Fort Edward in 1819, and finished to Troy in 1824.[2] In 1809 Gen. William [illegible] for building a church, but died before he could carry them into effect. His son (Col. John Williams) and his widow carried out the design, and presented the building to the Association. It was rebuilt in 1826.[3]

WAYNE COUNTY.

THIS county[1] was formed from Ontario and Seneca, April 11, 1823. It lies upon Lake Ontario, W. of the center of the State; is centrally distant 171 mi. from Albany, and contains 624 sq. mi. A series of bluffs 25 to 75 ft. high extends along the lake shore; and from their summits the surface rises in gradual slopes to the lake ridge, a distance of 4 to 5 mi. This ridge is 50 to 200 ft. wide on the top, and about 200 ft. above the lake. It declines toward the E., and upon the E. border of the co. it can scarcely be traced. The declivity of the ridge upon the S. is 8 to 20 ft.; and from its foot the surface gradually slopes upward to the surface of the limestone ridge, which extends E. and W. through the co. a little N. of the center and forms the watershed between Lake Ontario and Clyde River. The summit of this ridge is 140 feet above the lake ridge, 340 feet above the lake, and is about 3 mi. wide. It is highest upon the W. border of the co., and gradually declines toward the E.[2] From its southern edge the surface gradually declines to Clyde River and slopes upward from the river to the S. line of the co. South of the limestone ridge are numerous drift ridges extending N. and S. and from one-fourth to one and a half miles in length. The declivities are usually very steep, and the summits 40 to 100 ft. above the surrounding surface. They usually end in an abrupt declivity toward the N., but gradually decline toward the S. They are composed of clay, sand, and gravel, and seem to be deposits from great currents of water. Considerable marshy land extends along Clyde and Seneca Rivers, and also through the co. N. of the lake ridge.

Ganargwa, or Mud Creek, enters the S. W. corner of the co. from Ontario, flows in an irregular but generally easterly course to Lyons, where it unites with the Canandaigua Outlet and forms Clyde River,[3] which continues eastward to the E. bounds of the co., where it discharges its waters into Seneca River. These streams receive from the N. West Red Creek, East Red Creek, and Black Creek, and from the S. numerous small brooks. The streams flowing into Lake Ontario are Bear, Deer, Davis, Salmon, Thomas, Wolcott, and Big and Little Red Creeks; First, Second, and Third Creeks flow into Great Sodus Bay. The principal indentations upon Lake Ontario are Great Sodus, East, Port, and Blind Sodus Bays. Great Sodus Bay forms an excellent harbor. Crusoe Lake, in the S. E. corner, is the only considerable body of water. The streams, in their course through the drift deposits and lake ridge, have usually worn deep ravines.

The lowest rock in the co. is the Medina sandstone,[4] appearing upon the lake and in the ravines near it. It occupies a strip with an average width of 2 mi., widest at the W. Next above this is the Clinton group of limestone and shales, extending to the foot of the limestone ridge. Next above is the Niagara limestone, forming the summit ridge and occupying a strip about 3 mi. in width. South of this is the Onondaga salt group of red and green shales and gypsum, extending to the S. border and occupying nearly one-half of the co. The rocks are mostly covered by thick deposits of drift, and are only exposed in the ravines of the streams. Shells, marl, and muck are found in large quantities in the marshy regions. Weak brine and sulphur springs are found in various localities in the Medina sandstone and the red shales of the Onondaga salt group.

The soil derived from the drift deposits is generally a sandy or gravelly loam, with an occasional intermixture of clay. The soil along the lake shore, principally derived from the disintegration of Medina sandstone, is a reddish, sandy loam. At the foot of the mountain ridge, both N. and S., is a strip of very productive clay loam. In the valley of Clyde River the soil is principally a gravelly loam and alluvium. The marsh lands, when drained, are covered deep with a rich vegetable mold, which develops into the most fertile soil in the co.

Agriculture forms the leading pursuit. The branches, in the order of importance, are grain raising, stock growing, dairying, and wood growing. Fruit is extensively cultivated, and is rapidly

[1] Named in honor of Gen. Anthony Wayne.

[2] This peculiar formation is accounted for by the theory that the low land through the N. and central parts of the co. were once covered by the waters of the lake, and that the limestone ridge was a long bar or point extending into the lake from the W.

[3] Named by Wm. McNab, a Scotchman. At an early day it was navigable as far as Lyons, and was a link in the great chain of Western travel.

[4] This stone is extensively quarried for building stone. It is soft when first taken from the quarry, but hardens upon exposure to the atmosphere.

becoming one of the most important agricultural products. Few counties in the State surpass this in the quality or quantity of apples and peaches annually produced. A strip of land bordering upon Lake Ontario, and extending from Niagara River to the Oswego, seems peculiarly adapted to the cultivation of apples and peaches, and is rapidly becoming one of the most important fruit-growing regions in the State. In Wayne co. $25,000 worth of dried fruit is annually prepared. Peppermint and tobacco are raised along the valley of Mud Creek.

The county seat is located at the village of Lyons, near the center of the co. The courthouse is a fine cut stone building, fronting Church St. It has an Ionic portico, and is surmounted by a large dome.[1] The jail is a commodious stone building, in the w. part of the village. It contains rooms for the jailer's residence, and is one of the best arranged and conducted establishments of the kind in the State. The county clerk's office is a fireproof building, fronting Pearl St., a little s. of the courthouse. The poorhouse is situated upon a farm of 130 acres 1½ mi. w. of the courthouse. The average number of inmates is 67, supported at a weekly cost of $1.55 each. A school is taught throughout the year. The farm yields a revenue of $1,100. The buildings are insufficient for the accommodation of the inmates; but the institution seems to be well arranged and well kept.

Six weekly newspapers are now published in the co.[2]

The Erie Canal extends through the s. tier of towns; and along its course are the most populous and thriving villages of the co.[3] The direct branch of the N. Y. Central R. R. between Syracuse and Rochester extends, along the course of the canal, through Savannah, Galen, Lyons,

Arcadia, Palmyra, and Macedon. A ship canal[1] route and a R. R. route[2] have been surveyed, connecting the Erie Canal and Central R. R. with Lake Ontario.

The western 9 towns in this co. belonged to the Pulteney Estate; the E. part, including Savannah, Galen, and portions of Wolcott and Butler, constituted a portion of the Military Tract. The intermediate portion, except the S. 3 tiers of lots in Rose, were compensation lands granted to the Pulteney Estate for the gore between the old and new pre-emption lines. The earliest white inhabitants were hunters and trappers. The first permanent settlements were made in 1789, at Palmyra, under the auspices of General John Swift, agent of a company of settlers from Conn.; and at Lyons, under Charles Williamson, agent for the Pulteney Estate.[3] From 1790 to 1794, colonies came in from R. I., Long Island, and Maryland.[4] The settlements did not progress with great rapidity for several years, owing to the diseases which prevailed. The fear of Indian hostilities and of British invasion during the War of 1812 greatly retarded settlement. On the return of peace, settlers began to arrive in considerable numbers, principally from New England and Eastern N. Y. The completion of the Erie Canal gave a new impulse to immigration; and in a few years the flourishing villages of Lyons, Clyde, Palmyra, and Newark were built up along its course. The N. Y. Central R. R., built through the co. in 1852–53, greatly benefitted the co. and enhanced the value of the lands.

The most notable of the later incidents in the co. have been the rise of Mormonism in Palmyra,[5] and the commencement of spiritual rappings in Arcadia.[6]

ARCADIA—was formed from Lyons, Feb. 15, 1825. It lies on the S. border of the co., a little W. of the center. Its surface is a rolling region, broken by drift ridges. Mud Creek flows E. through the town, N. of the center, and receives several small streams as tributaries. The soil is a sandy, gravelly loam, mixed with clay on the hills. Gypsum is found in the S. W., and marl in the center. **Newark,** (p. v.,) including **Arcadia,** (p. v.,) in the S. part, on the canal, was incorp. July 21, 1853, as Newark. It contains 7 churches, a bank, flouring mill, tannery, 3 furnaces, and several manufactories. It is a flourishing canal village and a station upon the N. Y. C. R. R. Pop. 2,042. **Fairville,** (p. v.,) about 5 mi. N., contains 1 church, a tannery, a limited amount of manufactures, and 159 inhabitants. **Marbletown,** near the S. E. corner, contains a church and 10 houses. **Jessups Corners** and **Hydeville** are hamlets. Settlement was commenced in 1791, by Joseph Winters and B. Franklin.[7] The first church (M. E.) was organized in 1805. J. Wesley Benton was the first settled minister, in 1806.[8] A family named Fox, residing at Hydesville, in Arcadia, first heard the mysterious sounds known as the "rappings" on the night of March 31, 1849. Investigations were made in regard to the origin of the raps, but nothing definite was settled upon. The family soon after removed to Rochester, the "raps" accompanying them; and hence the name "Rochester Rappings." A series of investigations was instituted, and the matter became public, some claiming for it a spiritual origin, but the great majority pronouncing it a humbug or delusion. From this source modern spiritualism originated.

BUTLER—was formed from Wolcott, Feb. 26, 1826. It is the center town on the E. border of the co. Its surface is diversified, level in the S. E. and rising into ridges in the N. W. The highest point is Armstrong Hill. The principal stream is Wolcott Creek, which rises in the N. E. and, flowing in a circuitous course, leaves the town near the N. W. corner. The soil in the valleys is a gravelly loam, and on the hills it is generally clay, with a tenacious subsoil. Lime is manufactured in the N. part to a limited extent. **South Butler,** (p. v.,) on the S. line, contains 5 churches, a classical school, several manufactories, and about 400 inhabitants. **West Butler** (p. o.) contains 10 houses; **Westbury,** (p. v.,) in the N. E. corner, partly in the town of Victory,

[1] In 1827, a charter was obtained for building a ship canal from the Erie Canal, at Montezuma, to Great Sodus Bay. Surveys were made, but no work was ever done. A new charter was obtained by John Greig, of Canandaigua, in 1850; and another by Gen. Wm. H. Adams, in 1851. The route named in the last charter is from Sodus Bay to the Erie Canal, a little W. of Clyde. Some work has been done on parts of this route.

[2] The Sodus Point & Southern R. R. was incorp. in April, 1852. The road was to extend from Sodus Bay to Newark. The route has been surveyed, but no work has been done. A survey has also been made for a R. R. from Clyde to Sodus Bay.

[3] Mr. Williamson built roads from Palmyra and Lyons to Sodus Point, upon these the early settlers mostly located. He also laid out a city upon Sodus Bay, which has not yet been built.

[4] The Maryland settlers brought with them several slaves; but it was soon found that slave labor was unprofitable.

present village of Lyons. They were piloted up the Mohawk, (where they had previously settled,) and by the usual water route, by Wemple, an Indian trader. Charles Williamson, agent of the Pulteney Estate, commenced a settlement at Lyons Village in 1794, through Charles Cameron, his local agent. Jas. Otto came in 1796. In 1798, Judge Evert Van Winkle and and 40 others came in, from N. J. and Md.; and in 1801, Judge Daniel Dorsey and family, from Md. Judge Dorsey had previously purchased of Mr. Williamson nearly 1,000 acres in the immediate vicinity of the village. Rev. John Cole (Meth.) was the first local preacher.[1]

MACEDON—was formed from Palmyra, Jan. 29, 1823. It is the s. w. corner town of the co. Its surface is rolling and irregular. The valley of Mud Creek extends E. through the s. part. It is drained by Mud and Red Creeks and their tributaries. The soil is a clay and gravelly loam upon a limestone formation. **Macedon,** (p. v.,) a canal village, was incorp. Nov. 1856. It contains 2 churches, a saw and grist mill, furnace, and machine shop, and about 500 inhabitants. **Macedon Center** (p. v.) is incorp., and contains 3 churches, the Macedon Academy, and 20 houses. The first settlement was made as early as 1789, by Webb Harwood and Ebenezer Reed.[2] The first church (Bap.) was organized in 1800.[3]

MARION—was formed from Williamson, as "*Winchester,*" April 18, 1825. Its name was changed April 15, 1826. It is an interior town, lying w. of the center of the co. Its surface is broken by sandy hills and gravelly ridges; the Niagara limestone crops out in the N. part. It is drained by East Red Creek, which flows s. into Mud Creek. The soil is a gravelly, calcareous loam, and drift. Limestone is quarried in the N. part, for building purposes and public works. Near Marion Village is a sulphur spring. **Marion,** (p. v.,) in the s. part, contains 4 churches, the Marion Collegiate Institute, a furnace and machine shop, a fanning mill factory, and 390 inhabitants. The first settlement was commenced in 1796, by Daniel Lovell.[4] The first church (Presb.) was organized Nov. 1, 1808.[5]

ONTARIO—was formed from Williamson, as "*Freetown,*" March 27, 1807. Its name was changed Feb. 12, 1808. Walworth was taken off in 1829. It is the N. W. corner town of the co., Lake Ontario forming its N. boundary. Its surface is mostly level, with a general inclination toward the lake. It is drained by several streams running N. to the lake, the principal of which are Bear, Deer, and Davis Creeks. The soil is a sandy, gravelly loam, with drift and muck N. of the ridge. Between the lake shore and the ridge road are extensive marshes, heavily timbered. Iron ore, in the form of red oxid, is found in large quantities in the Clinton group, extending E. and W. through the center of the town. Salt was formerly manufactured to some extent. **Ontario,** (p. v.,) in the S. E. part, contains a church, steam sawmill, furnace, and 25 houses; **Ontario Center,** 2 mi. W., a church and 20 houses; **Furnace Village,** near the center, a furnace[6] and 16 houses. **New Boston,** on the lake shore, is a hamlet. The first settlement was commenced by Freeman Hopkins, from Mass., in 1806.[7] The first church (Bap.) was organized in 1811,[8] by Elder Lyon.

PALMYRA—was formed in Jan. 1789. Macedon was taken off in 1823. It lies on the s. border of the co., W. of the center. Its surface is undulating. Mud Creek flows E. through the town, S. of the center. Its tributaries are East and West Red Creeks and several small streams. The soil is a calcareous loam, with marl on the creek bottoms, and drift, sand, and gravel on the hills. **Palmyra,** (p. v.,) in the S. W. part, was incorp. April 9, 1819. It is an important canal village, and is a station on the N. Y. C. R. R. It contains 5 churches, the Palmyra Union School,[9]

a bank, 2 printing offices, and a number of manufactories. Pop. 2,410. **East Palmyra,** (p. v.,) a canal and R. R. station, in the E. part, contains 2 churches, a sawmill, and 20 houses. The first settlement was made by John Swift, in 1788 or '89. In 1789 or '90, John Swift and Col. John Jenkins purchased Tp. 12, R. 2, now Palmyra, and [illegible] the survey of Gen. Macomb. During the summer, John Swift moved into the town, and [illegible] a little N. of the lower end of Main St., Palmyra. Before the close of the year 1789, Webb Harwood and family, Noah Porter, Jonathan Warner, and Bennett Bates, from Mass., came in. Mr. Harwood settled a little W. of the village. David White and family came in in 17[illegible]. [illegible] church (Presb.) was formed in 1797; Rev. Eleazur Fairbanks was the first pastor.[3] Joseph Smith, the father of the prophet, settled a little S. of Palmyra Village in 1819. The plates of the Mormon Bible were said to have been dug up on a hillside in Manchester, Ontario co., a little S. of the Palmyra line. The Smiths were money diggers, and had previously been digging in this locality [illegible]. The book was printed at the office of the Wayne Sentinel, Martin Harris, a convert, mortgaging his farm to defray the expense.

ROSE[4]—was formed from Wolcott, Feb. 5, 1826. It lies in the interior of the [illegible]. Its surface is mostly undulating or level, with drift ridges in the S. E. Several small tracts of swamp land lie in different parts of the town. The streams are small; Mudge, Sherman, and Thurston [illegible] are the principal. The soil is a gravelly loam, intermixed with clay on the elevations and with muck on the lowlands. The highest point is 140 ft. above Lake Ontario. Limestone approaches the surface in the N. part, and has been quarried to some extent for lime and for building purposes. **Rose Valley,** (Rose p. o.,) near the center, contains 3 churches, a steam sawmill, and tannery. Pop. 218. **Wayne Center,** in the W. part, contains 20 houses; **Glenmark Falls,** in the N. part, contains 2 gristmills, 2 sawmills, and 10 dwellings. The first settlement was made in 1805, by Caleb Melvin and Alpheus Harman.[6] The first church (M. E.) was organized in 1824.[7]

SAVANNAH[8]—was formed from Galen, Nov. 24, 1824. It is the S. E. corner town of the co. Its surface is broken by drift ridges in the N., and is low and marshy in the S.; about one-third of the S. part is a woodland marsh, known as Crusoe Island. Seneca River forms the S. part of the E. boundary. Crusoe Lake is a small, shallow body of water near the center; its outlet, Crusoe Creek, flows into Seneca River. The soil in the N. is a sandy and gravelly loam, and in the S. it is principally composed of muck and shell marl.[9] A tract of about 1,900 acres in the S. E. part is an open marsh, producing coarse grass. **Savannah,** (p. v.,) near the center, is a station on the N. Y. C. R. R., and contains 20 houses. The first settlement was made by Elias Converse and Joseph Mozier, in 1812.[10] The first preacher was Rev. —— Wiers, (Bap.) There is no church in town.

SODUS[11]—was formed in Jan. 1789. Williamson was taken off in 1802, and Lyons in 1811. It is the central town on the N. border of the co., and is bounded N. by Lake Ontario. A part of Great Sodus Bay lies in the N. E. corner. Its surface in the N. part is mostly level, with a gentle inclination toward the lake. A ridge 100 to 200 ft. higher than the surface of the lake passes through near the center; and S. of this the surface is broken by several ridges extending N. and S. The lake shore varies in height from a low swamp to bluffs 70 ft. high. Second and Salmon Creeks are the principal streams. The soil in the N. part is a clay and sandy loam, and in the S. gravelly loam. The manufacture of lime is extensively carried on in the S. part; and red sandstone is quarried in the S. W. Red oxid of iron (argillaceous ore) is found 2 mi. W. of Sodus Point. Salt was manufactured in 1831

and 32. **Sodus** (p. v.) contains 3 churches, the Sodus Academy, and about 300 inhabitants. **Sodus Point,** (p. v.,) on the lake, w. of the entrance to the bay, is a U. S. port of entry in the Genesee District. It has a lighthouse, a church, a steam sawmill, and about 200 inhabitants. **Sodus Center** (p. v.) contains a church, foundery, carding mill, grist and saw mill, and 40 houses; **Alton** (p. v.) a church and 30 houses; **South Sodus** (p. v.) a church and 30 houses; and **Joy** (p. v.) a church, shingle factory, and 30 houses. The first settlement was made in 1794, under the auspices of Charles Williamson, agent of the Pulteney Estate.[1] Mr. Williamson caused a road to be cut through from Palmyra to Sodus Point in the spring of 1794. During the summer the town was surveyed, an extensive city plan laid out between Salmon Creek and the Point, and within two years mills were erected on Salmon Creek. A tavern was built at an expense of $5,000, a pleasure yacht was placed upon the bay; and in roads, surveys, buildings, &c., over $20,000 was expended. Thos. Little and —— Moffat were the local agents of Mr. Williamson. Of all those connected with these premature improvements, but few remained after they were completed. Elijah Brown was an early settler, 4 mi. w. of the Point, and Amos Richards, 7 mi. w. Ammi Ellsworth came from Conn. in 1801, and settled near the Point. Dr. Wm. Nixon Loomis settled at the Point. He built mills and a forge. A daughter of his is Mrs. Elizabeth Ellet, author of the "Women of the Revolution," and "Domestic History of the Revolution." Col. Peregrine Fitzhugh came from Md. in 1803, with his family and slaves, —over 40 persons in all. Dr. Thos. G. Lawson, an Englishman, settled 1 mi. from the Point, in 1803. After expending considerable money in attempting to form a settlement, he abandoned the enterprise in 1805. In 1799, besides those already mentioned, there were 25 families in town on roads leading to Palmyra and Lyons. The first church (Bap.) was organized in 1805; Elder Seba Norton was the first settled minister.[2]

WALWORTH[3]—was formed from Ontario, April 20, 1829. It is the central town on the w. border of the co. Its surface is a high, rolling upland, the ridges being the most elevated land in the co. The Niagara limestone crops out in the N. part, marking its course by a hard, stony surface some rods in width. It is drained N. by several small streams, and S. E. by tributaries of Red Creek. The soil is a rich, sandy loam. **Walworth,** (p. v.,) near the S. E. corner, contains 3 churches, the Walworth Academy, and 230 inhabitants. In the immediate vicinity is an extensive nursery.[4] **West Walworth,** (p. v.,) in the S. W. part, contains a church and 115 inhabitants. The first settlement was begun about 1800.[5] The first church (M. E.) was organized previous to 1809.[6]

WILLIAMSON[7]—was formed from Sodus, Feb. 20, 1802. Ontario was taken off in 1807, and Marion in 1825. It lies on the N. border of the co., W. of the center, Lake Ontario forming its N. boundary. Its surface is level in the N., with a gentle inclination toward the lake. In the S. it rises into low ridges. It is drained by a few small streams that flow N. into Lake Ontario. The soil is a sandy, gravelly loam, mixed with clay near the lake shore. **Pultneyville,**[8] (p. v.,) on the lake shore, a U. S. port of entry in the Genesee District, contains a church, gristmills, a steam sawmill, and about 450 inhabitants; **Williamson,** (p. v.,) S. of the center, contains 2 churches, a steam flouring mill, and about 300 inhabitants; **East Williamson** contains 2 churches and 20 houses. The first settlement was made in 1803, by Wm. Waters.[9] The census reports 8 churches in town.[10]

WOLCOTT[11]—was formed from Junius, (Seneca co.,) March 24, 1807. Butler, Huron, and Rose were taken off in 1826. It is the N. E. corner town of the co., Lake Ontario forming its N.

[1] Moses and James Sill kept the first inn, at Sodus Point, in the log building erected for that purpose by Mr. Williamson. On the evening of June 13, 1813, a party of about 150 English landed at Sodus Point, and its men from the boats at Sin Jas Yeo, for the purpose of securing provisions, which put the stores to the sword. They were opposed by about 40 Americans, under Capt. Hull of Lyons. After the first fire the Americans retreated. The enemy burned 5 houses and the old Williamson Hotel, owned by Capt. Wm. Wickham. The public flour had been secreted in a ravine, and [illegible] made several. The next day a gunboat proceeded up the lake to North-bay Point and burned a warehouse. The British had 2 killed, and the Americans 1 killed and 1 mortally wounded. The total amount of property destroyed amounted to about $2,000.

[2] The census reports 11 churches in town; 4 M. E., 2 Prot. E., 2 Presb., Bap., Christian, Cong.

[3] Named from Chancellor Walworth.

[4] This nursery, established in 1840—occupies 75 acres, and produces annually 500,000 trees, mostly sent to New England, N. J., Md., and Va.

[5] Among the other early settlers were George Millet, in 1802, Daniel Douglass and George Randolph, at West Walworth, Dr. Hurlbut Cobb, [illegible] in 1804, Isaac Green, Hassell, James and Jonathan Hill, Capt. Gilbert, —— Huckley, and John and Marshall Chamberlain. The first death was that of —— Green, killed by the fall of a tree, in 1806. The first store was kept by Thomas F. Kempshall.

[6] There are 5 churches in town; 2 Bap., M. E., Cong., and F. W. Bap.

[7] Named from Charles Williamson, the first agent of the Pulteney Estate.

[8] Named from Sir Wm. Pulteney. On the morning of June 13, 1813, Com. Sir James Yeo, with a British force, made a descent upon this place. Gen. J. Swift, who commanded the Americans, surrendered, with the stipulation that private property and persons should be respected. Most of the U. S. stores had been previously removed to a place of safety. The British had 2 killed and 3 wounded.

[9] Capt. Sam'l Throop, Jeremiah Selby, John Holmes, and Alpheus Curtis, came in 1806; Maj. Wm. Rogers in 1807, and Peter Peppins, Timothy Smith, —— Denning, Andrew Connell, Sam'l Ledyard, and Jacob W. Hallett, soon after. The first child born was H. N. Throop, in Nov. 1807. Major Rogers kept the first inn, in 1807; Jos. Colt, the first store. Capt. Sam'l Throop and Jeremiah Selby built the first saw and grist mill.

boundary. Its surface is undulating, with a general inclination toward the lake. In some parts of the ties are tracts of low marsh land. The streams are Wolcott and Blue and Little Red Creeks and several smaller streams, which flow N. into Lake Ontario. A part of Port Bay, in the N. W. Blind Sodus Bay,[1] in the N. E., and two smaller bays, extend inland from the lake. The soil is sandy and gravelly loam. Iron ore is found in the S. E. part. **Wolcott,** p. v., near the S. W. corner, was incorp. Feb. 24, 1852. It contains 4 churches, an academy, 2 flouring mills, 2 sawmills, a furnace and agricultural machine shop, carding machine, and carpet and coverlet factory. P. p. 600. **Red Creek,** (p. v.,) in the S. E. part, is incorp., and contains 3 churches, the Red Creek Union Academy, 2 grist mills, 3 sawmills, a woolen factory, furnace, and tannery. P. p. in 1859, 597. **Furnace Village,**[2] in the W. part, contains a furnace, sawmill, and 12 houses. The first settlement was made by Jonathan Melvin, sen., on Lot 59, in 1805.[3] The first settled minister was Daniel S. Buttrick.[4]

WESTCHESTER COUNTY.

THIS county, constituting one of the original divisions of the State under the English rule, soon after the first conquest, was organized Nov. 1, 1683, with its present limits. It lies upon the E. bank of the Hudson, in the S. E. part of the State, and is bounded on the E. by Conn. and on the S. by Long Island Sound. It is centrally distant 105 mi. from Albany, and contains 525 sq. mi. The surface consists of several ridges of hills parallel to the river and separated by wide valleys. The hills are in two general ranges, the first extending along the river and the second along the Conn. line. They are subdivided into a great number of minor ridges and hills, all extending N. and S. The highest summits are 600 to 1,000 ft. above tide. The valleys, extending N. and S., are continuous, affording ample opportunity for the construction of roads and railroads; and they are generally bordered by gradually sloping hillsides.[1] In some localities the hills are abrupt and rocky. The principal streams are Peekskill Creek, Furnace Brook, Croton, Pocantico, and Neperhan Rivers, and Tibbetts Brook, tributaries of the Hudson; Bronx River, Westchester and Hutchinsons Creeks, Mamaroneck and Byram Rivers, flowing into Long Island Sound; Maharness and Stamford Mill Rivers, flowing E. into Conn.; and Muscoot Creek, Plum Brook, and Titicus, Cross, and Kisko Rivers, tributaries of the Croton. The lakes are small bodies of water scattered through the hilly portions. The S. E. portion of the co., along the Sound, is deeply indented with bays and estuaries, which in some places are bordered by extensive marshes. Most of the streams which flow into the Sound afford, by the reflux of the tide, an intermitting hydraulic power, which is employed in several places.

The rocks of the co. consist principally of granite and gneiss, of many dissimilar varieties, and of white crystalline limestone. These rocks crop out upon the declivities and summits of most of the hills, affording an abundance of the best kind of building stone. The marble quarries at Sing Sing and other places are extensively wrought, their products affording one of the most valuable exports of the co. Traces of various kinds of ore have been discovered; but all search for profitable metallic veins has proved unsuccessful. Several mineral springs are found in different sections, the principal of which is the Chappaqua Spring, 3 mi. E. of Sing Sing. It emits sulphuretted hydrogen and is said to possess useful medicinal properties. The soil, derived principally from the disintegration of the primitive rocks, is light, sandy, and, naturally, only moderately productive; but, by a continued process of scientific culture, it has been rendered very fertile. Upon the Hudson and the Sound and in various other localities are drift deposits and alluvium, furnishing a much more productive soil. The people are principally engaged in gardening and fruit raising, fattening cattle, and supplying milk for the New York market. Bricks in immense quantities are manufactured along the Hudson for exportation. Other manufactures are largely carried on in the villages adjacent to New York.

This co. is distinguished for beautiful and picturesque scenery, noticeable in nearly every part. The highlands that border upon the Hudson afford an extended view of that river, the Palisades, and of the hilly country of Rockland and Orange. Along the S. E. border fine views are obtained of the Sound, the numerous green islands along the coast, and the adjacent shores of Long Island. In the interior the landscape is agreeably diversified by hills, dales, and clear, running streams. Many wealthy inhabitants of New York have erected beautiful villas and country residences upon the finest sites; and the hills of the co. are now studded with these splendid specimens of architectural art.

In the vicinity of New York are numerous small villages inhabited by mechanics and working men doing business in the city. These people go back and forth daily on the lines of railroad, or by steamboat, living in the country for the sake of economy. A considerable amount of manufactures is carried on at these suburban villages. A large transient population, mostly from New York, make this co. their residence during the summer months.

[1] The roads that cross the co. E. and W. are a constant succession of ascents and descents, while those extending N. and S. through the valleys are nearly level.

The co. is a half-shire, the co. buildings being located respectively at Bedford and White Plains.[1] The courthouse at Bedford is a wooden structure; and according to it is a jail for the temporary confinement of prisoners. The co. buildings at White Plains are of granite and are the most commodious and costly buildings of the kind in the State.

The poorhouse is located upon a farm of 175 acres in Mount Pleasant, 5 mi. s. of White Plains. The average number of inmates is 225, supported at a weekly cost of [illegible] cts. each. The farm yields a revenue of $2,500. A school is kept throughout the year. The buildings are [illegible]; and the whole establishment seems to be well arranged.

The Hudson River R. R. extends along the river banks through Yonkers, Greenburgh, Mount Pleasant, Ossining, and Cortlandt. The Harlem R. R. extends s. through the central part of the co., extending through Morrisania, West Farms, Yonkers, East Chester, Scarsdale, Greenburgh, White Plains, Mount Pleasant, New Castle, Bedford, Lewisboro, and North Salem. The New York & New Haven R. R. extends from the Harlem R. R. at East Chester through Pelham, New Rochelle, Mamaroneck, Harrison, and Rye. A branch road extends from the Hudson River R. R. at Morrisania s. e. about 2 mi. to Port Morris. The other principal public work in the co. is the Croton dam and the great aqueduct which supplies the city of New York with water. Numerous steamers ply between New York and the various ports along the Hudson and East Rivers, affording cheap and easy means of communication with the great city.

Five newspapers are now published in the co.[3]

When first known to the whites, this co. was occupied by the Mohegans, who were divided into several bands or clans with distinctive names.[4] They paid tribute to the Five Nations, and were known in early documents as "River Indians."

[1] At the organization of the co. in 1683, the courts were held at West Chester and were adjourned to Westchester in 1760. A court of sessions was held at Bedford in 1681, and a court of Oyer & Terminer was ordered to be held there in 1683. By act of Dec. 16, 1785, the assessors were required to select two suitable persons, one of whom should reside at White Plains and the other at Bedford, to erect and finish a court-house and jail at Bedford, and a court-house at White Plains. By act of May 1, 1788, $2,000 was to be appropriated for the erection of a court-house at White Plains, which was to be built under the superintendence of [illegible] Stephen Ward, Ebenezer Purdy, and Richard Hartshorne, and [illegible] Purdy, Ebenezer Purdy, and Richard Hartshorne, and [illegible] previously to be completed. By act of April 6, 1796, a tax of $1,000 was levied for the purpose of building a court-house and jail at Bedford. Both buildings thus erected are still standing, and owned by the co. A court-house was built at White Plains in 1808, and the courthouse in the old part of the village. The Constitutional Convention held its sessions in this house in 1821. The courthouse in White Plains was used in 1776 by the Congress of Independence was publicly read upon its steps by that body. The building, and what remained of the village, were wantonly burned by New England troops on the night of Nov. 5, 1776.

[2] An act passed March 30, 1786, authorized the county to [illegible] such laws as [illegible] for the [illegible] and clerk's office [illegible] White Plains to be selected by the supervisors [illegible] appointed by them. The present building was erected in 1856–57, under the superintendence of Messrs. Hartshorne, Stephen Barton, Wm. Mitchell, and David Hyatt, at a cost of $12,000. [illegible] village [illegible] part of the [illegible] plat throughout, and it's [illegible] iron cases for books and papers. The [illegible] cently bound, and put in complete order for preservation. The middle portion is devoted to [illegible] and [illegible] with the court room [illegible] brought into court without liability to rescue by a crowd. The cells, 36 in number, are built in 2 tiers in a central block.

By an act of April 16, 1846, the [illegible] Rye [illegible] created to be held by [illegible] Jan. 1, 1847.

Settlement began under the Dutch authority, in the southern part, and before the Revolution nearly every part of the co. had been occupied. A large part was embraced by the Cortlandt, Philipsburgh, Pelham, Scarsdale, and Fordham Manors.[1] Of these the first sent a representative to the General Assembly, and the second was forfeited by the attainder of its proprietor in the Revolution. The borough of Westchester, including the present towns of Westchester, West Farms, and Morrisania, was also represented by a member, and had a mayor's court. This co. was the scene of many events of great importance in the Revolution, and, from its occupying the middle ground between the opposing armies, was alternately overrun and pillaged by the refugees of both.[2] The southern part was taxed £2,000, May 6, 1784, to repay Revolutionary expenses.

BEDFORD[3]—was first formed under Connecticut, in May, 1697. Its rights were confirmed by New York in April, 1704; and it was fully organized as a town March 7, 1788. It is an interior town, lying N. E. of thee enter of the co. Its surface is elevated and broken by small hills and valleys, and is almost entirely available for agricultural purposes. Croton River forms part of the N. boundary; Maharness River flows through a small portion of the S. part; and Cross River flows through the N. E. corner. Byram Lake lies on the S. border. The soil is generally a good quality of sandy and gravelly loam, but stony on the hills. **Bedford,** (p. v.,) S. E. of the center, is surrounded by hills, one of which on the N. retains its Indian name of "*Aspetong.*" The village is a half-shire, and contains a courthouse,[4] 2 churches, the Bedford Academy, a Female Institute, and 30 houses. **Bedford Station,** (p. o.,) on the Harlem R. R., contains 10 houses. **Katonah,** (p. v.,) on Cross River, near its junction with the Croton, contains 30 houses. **Mount Kiska,** (p. v.,) a station on the Harlem R. R., on the W. border of the town, contains 200 inhabitants. **Whitlockville** is a station on the Harlem R. R. near the N. border. The town was mostly included in a purchase made July 1, 1640, by Nathan Turner, for New Haven, and sold the same year by the latter to Andrew Ward, Robert Coe, and 20 others, for £33. Other Indian purchases were made, the last of which was July 24, 1703.[5] There are 8 churches in town.[6]

CORTLANDT[7]—was formed March 7, 1788. It lies upon the Hudson, in the N. W. corner of the co. Its surface is broken and hilly. The ranges of hills generally extend N. and S. and are separated by narrow valleys. The declivities are often steep and nearly precipitous. Anthonys Nose,[8] on the N. line, 1,228 ft. above the river, is the highest land in the co. Although very broken, the surface generally is susceptible of cultivation. The principal streams are Croton River, flowing across the S. part, Furnace Brook, Peckskill Hollow Creek, and Gregorys Brook. The soil is generally a sandy and gravelly loam, with a strip of clay along the river. Among the mountains are found a variety of interesting minerals.[9] Brick is extensively manufactured.[10]

[1] These patents were granted as follows:—
Cortlandt Patent was granted June 17, 1697, to Stephanus Van Cortlandt, with an annual quitrent of 40 shillings. It included the present towns of Cortlandt, Yorktown, Somers, and North Salem.
Philipsburgh Patent was granted June 12, 1693, to Frederick Philipse, at an annual quitrent of £4 12s. It included the present towns of Greenburgh, Mount Pleasant, and Ossining.
Pelham Patent was granted Oct. 25, 1687, to John Pell, and included the present town of Pelham and a part of New Rochelle.
Fordham Patent was granted in 1671 to John Archer, and included 1,253 acres in the present town of West Farms.
Scarsdale Patent was granted March 21, 1701, to Caleb Heath Cole, subject to an annual quitrent of £5. It included the present towns of Scarsdale, New Castle, North Castle, and a part of White Plains.

[2] Two classes of brigands, equally destitute of principle but professing attachment to opposite interests, infested the co., committing atrocious crimes without punishment, and often preying upon their nominal friends with as little mercy as upon their avowed enemies. Of these, the "Cowboys" possessed tory sentiments, while the "Skinners" were ostensibly attached to the American cause. The two parties often, operated in concert, the Cowboys bringing contraband goods from New York to exchange for the property plundered by the Skinners; and, when a pretext was necessary, a skirmish would occur, and the goods from the enemy would be openly borne away, as if lawfully captured. *Bolton's Westchester, I.* p. 211

[3] Named from Bedfordshire, England, whence many of the early settlers came. It formed part of the territory known as Rippowams. Privilege of plantation was granted under the present name by a court of election held at Hartford, Conn., May 11, 1682. In 1697 a patent was granted by Conn. to the town. In 1700 the royal approval was obtained to the survey of 1683 and '84, by which Bedford and Rye were included in New York; and in April, 1704, a patent with town privileges was granted by that colony. In 1690 there were 31 proprietors residing in town.

[4] County courts are held alternately here and at White Plains. The village was burned in the Revolution by a party of British light horse, on their route to Fairfield, Conn. By an act passed April 11, 1788, courts were ordered to be held in the Presb. church until the courthouse should be rebuilt, or till the further order of the Legislature.

[5] The title to 9,11 acres of land in this town became invested in Jacobus Van Cortlandt at an early period. This estate was divided in 1743, Frederick Van Cortlandt receiving 1,424, Abram De Peyster 1,110, John Chambers 1,282, and Peter Jay 1,249 acres. Gov. John Jay, a son of Peter Jay, became invested with a large portion of the last mentioned allotment. The estate is still owned by his descendants. On a tract known as "the Hop-grounds" are still living many families of the same name as the first purchasers. Among these are families named Green, Miller, Holmes, Roberts, Anable, Clark, Ayers, Westcott, Simpkin, Mead, Webb, Clason, and Higgins. Tradition locates in this town the scene of a bloody engagement fought in Feb. 1644, between the Dutch and Indians, in which 500 of the latter perished.

[10] There were in Aug. 1858, 21 establishments worked as separate yards, 11 of which used steam power and 9 made pressed brick. This business began here about 1812-15, and was most thriving from 1847 to 1854. Large quantities of these brick were used in the Croton Aqueduct. The business gives employ-

It contains 10 churches, the Peekskill Academy, [illegible] office, and several manufactories.[2] It is connected by a steam ferry with Caldwells Landing, and by a daily steamer and line of sloops with New York. It is a [illegible] 35.58. **Verplancks Point,** Verplanck p. o.,) upon the Hud[illegible] border of the town, was laid out in 1836. It contains a church, steamboat landing, several important brick manufactories, and 1,456 inhabitants.[3] **Croton**[4] (Croton Landing p. o.) is a R. R. station, in the s. part of the town. It contains 4 churches, a rolling mill, wire mill, several brickyards, and 400 inhabitants. **Crugers**[5] (p. o.) is a landing and [illegible] **Annsville,** a small village on Peekskill Creek, contains a [illegible] **Oregon,** on the line of Putnam co., contains a rolling mill and a wire mill. **Mount Airy,** E. of Croton, is a hamlet. **Croton Point**[7] is a peninsula in the s. part of the town, devoted chiefly to vineyards. **Montroses Point** is a peninsula s. of Verplancks and [illegible] Creek. The first settlement was made at Peekskill, in 1764, by Daniel Birdsall, Nathaniel Brown, Joseph Travis, and Capt. Isaac Conklin.[8] There are 18 churches in town.[9]

EAST CHESTER[10] was recognized as a town March 7, 1788. It is [illegible] in the s. part of the co. Its surface is broken by ridges extending N. and S. and separated by narrow valleys. Bronx River,[11] forming the N. boundary, and Hutchinsons or East Chester Creek,[12] forming a portion of the E. boundary, are the principal streams. The soil is a sandy and gravelly loam, with some alluvium along the river intervales. Marble is extensively quarried along the W. border.[13] The Harlem R. R. extends along the valley of the Bronx, and the N. Y. & N. H. R. R. crosses the S. part of the town at nearly right angles to the hills, requiring heavy cuttings and embankments. A portion of the territory of the town is public land, under the management of 3 trustees. **East Chester,** (p.v.,) at the [illegible] tains 2 churches and 551 inhabitants. **Mount Vernon,** (p. v.,) a station at the junction of the Harlem and N. This locality was called by the Indians "Meanagh," and was sold to Stephanus Van Cortlandt in 1683, with the lands E. called "Appamaghpogh." A small creek N. was called "Tammoosis." The purchase was confirmed by patent, with a quitrent of 2 bushels of wheat. [illegible] in the text is much less in winter.

by building associations. This town appears to have been a favorite residence of the natives; and when first settled by the whites it contained traces of former occupation. The Indian title was acquired in 1654 and confirmed in 1654, 1666, and 1700. Thos. Pell, the purchaser, granted it to James Eustis and Philip Pinkney, of Fairfield, Conn., and their associates. In 1665, 26 persons signed a covenant for the security of their mutual rights.[1] The settlers were incorp. by patent, March 9, 1666,[2] and for many years were engaged in a controversy with Westchester concerning the bounds of their grant. A house was fortified in Oct. 1675, as a place of refuge from Indians. The first schoolhouse was agreed upon in 1683; and the site has ever since been occupied for this purpose. A townhouse was voted in 1685. East Chester was celebrated for the interest it took in behalf of Leisler.[3] The Cong. church of this town was formed in 1665; and a place of worship was built about 1700.[4] The town suffered greatly in the Revolution, from its being the middle ground between the opposing armies. A farm of 252½ acres was granted in this town to David Williams, one of the captors of André, June 16, 1783. He afterward removed to Schoharie co., where he died.

GREENBURGH[5]—was formed March 7, 1788. It lies on the w. border of the co., s. of the center. Its surface is much broken by hills parallel to the Hudson, and separated by narrow valleys, through which flow several streams, the principal of which is Neperhan or Sawmill Creek. Hudson River forms the w. boundary, and Bronx River the E. The soil is clay and sandy loam. Several marble quarries are worked near the Hudson. **Hastings,** (Hastings upon Hudson p. o.,) near the s. w. corner, a station on the H. R. R. R. and a steamboat landing, contains 2 churches, steam marble works, limekilns, and a limited number of manufactories. Pop. 1,135. **Dobbs Ferry,**[6] (p. v.,) a station on the H. R. R. R. and a landing on the river, contains 3 churches and 1,040 inhabitants. **Irvington,**[7] (p. v.,) a station on the H. R. R. R. and a landing on the river, contains 2 churches and 599 inhabitants. **Tarrytown,**[8] (p. v.,) on the N. border, a steamboat landing and a station on the H. R. R. R., contains 6 churches, the Irving Institute, the Tarrytown Institute, and about 3,000 inhabitants. **Harts Corners,** (Moringville p. o.,) a station on the Harlem R. R., is a hamlet; **Middletown** is a settlement below Tarrytown; **Halls Corners,**[9] a neighborhood in the N. part; **Ashford,** a settlement 3 mi. below; **Abbotsville,** a locality near Dobbs Ferry; and **Greenville,** a neighborhood in the s. part. The first Indian purchase was made in 1649. In 1662 Connecticut bought all the Indian lands w. to the North River, and in 1681–82–84 Frederick Philipse bought the lands now included in this and other towns which, by Patent of 1693, were formed into the Philipsburgh Manor. In 1779 they were forfeited by the attainder of Col. F. Philipse and sold for small sums to the former tenants,[10] under a pre-emption clause in the general act of May 12, 1784, for the sale of confiscated estates. The census reports 6 churches in town.[11]

HARRISON[12]—was formed March 7, 1788. It is an interior town, near the E. border, s. of the center of the co., its N. E. corner touching the line of Conn. Its surface is generally level. Blind

[5] In the Dutch "Greenburgh," literally "Grain town." In some early deeds it is called "Lawrence's Plantation;" and by the Indians, Weekquaskeek, Weekqueesqueesk, Wiequeeshook,—in pure Algonquin, Wekoqueesquck, the place of the bark kettle.—*Beach's Hist. Westchester Co., I. p.* 165. This town was inhabited by a powerful tribe of Indians known as the Weekqueesqueeks called by the English Wickers Creeks; and until the middle of the last century the natives were numerous. A cold blooded murder of an Indian was avenged 20 years afterward by his nephew, in Sept 1691. The Dutch attempted to retaliate, but without success. In Feb. 1641, the Mohawks made a descent upon these Indians, who fled to the Dutch for protection. The soldiers of the fort by night crossed to New Jersey, where the Indians had assembled, and wantonly butchered nearly 100; and 30 were murdered at Corlears Hook. This barbarity aroused 11 tribes to vindictive war, in which the Dutch settlements around Fort Amsterdam were laid waste. A peace was agreed upon April 22, 1643, but was not fully established for many years.

[6] Named from a family of this name who were early settlers and kept a ferry. The first interview between Arnold and André was to have taken place here; but, for some reason it did not. The British commissioners sent up to obtain André's release had their interview here with Gen. Greene. Gen. Washington and Gov. Clinton here met Gen. Tarleton, at the close of the war, in 1783.

[7] Named from Washington Irving, whose quaint Dutch homestead, "Sunny Side," is a short distance above. The village was formerly called "*Dearmans*," or "*Dearmans Landing*."

[8] From "Tarwe," wheat; and, by the natives, Alpeenick, or Place of Elms. By an act of May 1, 1786, a tract of 2 acres for a burial place, 100 acres for a glebe to the Ref. Prot. D. church, and 17 acres to the Prot. E. church, were confirmed. The village is pleasantly situated opposite the widest part of the Tappan Zee. The site of André's capture, marked by a handsome monument, dedicated Oct. 7, 1853, is about three-fourths of a mi. s. E. from the station.

[9] Near the Presb. church is the monument to Isaac Van Wart, one of the capturers of Major André,—erected by the citizens of the co., June, 1829.

[10] Among these were families named Van Tassel, Van Wart, Odell, Lawrence, Post, Archer, Hart, Acker, Dyckman, and Requa.

[12] Sometimes called "Harrisons Precinct," or "The Purchase." Prior to 1774 it formed one of the six precincts of Rye Parish.—*Bolton's Westchester, I.* 246. It was named from John Harrison, who purchased it from the Indians Feb. 1, 1695, and confirmed to Wm. Nicolls, John Harrison, and others, June 25, 1696. It was formed a separate precinct by act of March 9, 1774.

Brook[1] forms a part of the E. boundary, and Mamaroneck Creek a part of the W. Rye Pond lies on the N. border, and St. Mary's Pond on the W. The soil is a fertile, gravelly loam. **Purchase,** (Harrison p. o.,) in the N. part, is a hamlet, containing 2 Friends' meeting houses. The first settlement commenced at an early period. The census reports 2 Friends' meeting houses[2] in town.

LEWISBORO[3]—was formed March 7, 1788, as "*Salem*." Its name was changed to "*South Salem*" April 6, 1806, and to its present name Feb. 13, 1840. A part of North Salem was annexed April 26, 1844. It lies on the E. border, near the N. E. corner, and forms the eastern angle of the co. Its surface is much broken and in places mountainous. Croton River forms its W. boundary. Cross River flows through a small portion of the central southern part. Waccaback Lake[5] and North and South Ponds are in the N. part, and Cross Pond is on the line of Poundridge. The soil is a clayey and sandy loam. **South Salem,** (p. v.,) in the E. part, is a scattered village, containing a church and 15 houses. **Cross River,** (p. v.,) in the S. corner, contains 2 churches, several manufactories, and 20 houses. **Goldens Bridge** (p. v.,) is a station on the Harlem R. R. **Vista,** (p. o.,) in the S. E. corner, is a small settlement. **Lewisboro** (p. o.) is in the S. part. Settlement was commenced under the authority of Connecticut, at an early period. This region was the scene of several Revolutionary incidents.[6] There are 7 churches in town.[7]

MAMARONECK[8]—was recognized as a town March 7, 1788. It lies upon L. I. Sound, in the S. E. part of the co. Its surface is broken by low ridges of gneiss, generally extending N. and S. Mamaroneck Creek, forming the E. boundary, and its tributary, Sheldrake Creek, are the principal streams. The coast is deeply indented by several bays, which divide it into numerous peninsulas and headlands. **Mamaroneck,** (p. v.,) near the head of Mamaroneck Bay, is partly in Rye. It contains 2 churches, (Prot. E. and M. E.,) and several manufactories not at present in operation. **Orienta,**[9] **Washingtonville, Chatsworth,** and **Hickory Grove** are village plats and prospective villages. **Kelloggsville,** on the line of New Rochelle, has an extensive tide mill. The Indian title was obtained in 1640 and in 1662. John Richbell received a ground brief from the Dutch, and letters patent from Gov. Lovelace, Oct. 16, 1668, to three necks of land, at a quitrent of 8 bushels of winter wheat. In 1700 Caleb Heathcote acquired title to most of the eastern neck, with other lands, which was confirmed March 21, 1701. A portion descended in marriage to James De Lancey, afterward Governor of the colony, and ancestor of the present Episcopal Bishop of the Diocese of Western New York. Settlement began about 1661, and the village of Mamaroneck is one of the most ancient in the co. The town records date back to 1697; they were suspended from April, 1776, to April, 1785. During this period numerous events of historical interest occurred in this town. The day before the battle of White Plains, Col. Smallwood surprised and cut off a large body of the enemy under Major Rogers, stationed upon Nelson Hill. Col. White, of the Continental army, was overtaken near this place by Lieut. Hicks,[10] and some thirty stragglers, who had taken refuge upon the ice, were killed.

MORRISANIA[11]—was formed from West Farms, June 7, 1855. It is the S. W. corner town of the co., lying upon Harlem River, contiguous to New York. Its surface is broken by several low ridges which extend N. and S. Most of its surface is occupied by village plats laid out since the extension of railways, and is inhabited by persons doing business in New York. **Morrisania,** (p. v.,) a R. R. station, in the N. E. corner, contains the St. Joseph's Ursuline Convent, an academy and free school, and 2,587 inhabitants. **Mott Haven,** (p. v.,)[12] opposite Harlem, contains 2

R. 2¼ mi. long connects this place with Melrose. **Wilton, Old Morrisania, East Morrisania, West Morrisania, South Melrose, East Melrose, Eltona, Woodstock, Claremont,** and **High Bridgeville,** are suburban village plats. A tract known as Broncks Land,[2] granted by Gov. Nicoll to Jonas Broncks, was sold to Richard Morris about 1670; and May 8, 1697, Lewis Morris obtained a patent for the township or Manor of Morrisania, with a quitrent of 6 shillings. Prior to the Revolution it formed one of the precincts of Westchester parish. Early in the war a division of the American army was stationed here; but after the disasters of Long Island it retired northward, and British troops were posted there, but not without annoyance from partisan corps. The dwellings at Morrisania were burned the same day as was the courthouse at White Plains.

MOUNT PLEASANT—was formed March 7, 1788. Ossining was taken off in 1845. It lies upon the Hudson, near the center of the w. border of the co. Its surface is broken by high ridges, the principal of which are Buttermilk and Chappequa Hills. Bronx River forms the E. boundary; and Neperhan and Pocantico Rivers flow obliquely across the town. The soil is a clayey and sandy loam, well adapted to cultivation. There are several marble quarries in town. **Pleasantville,**[3] (p. v.,) near the N. line, contains 2 churches and 358 inhabitants. **Unionville,** (Neperhan p. o.,) a station upon the Harlem R. R., contains 97 inhabitants. **Tarrytown,** (p. v.,) upon the Hudson, in the s. w. corner, is mostly in Greenburgh. **Beekmantown,** on Pocantico River, is a suburb of Tarrytown. **Sleepy Hollow,**[4] **Upper Cross Roads, and Lower Cross Roads** are hamlets. This town was included in the Manor of Philipsburgh, granted to Frederick Philipse; and by his will, dated Dec. 9, 1702, he granted to his son Adolph the portion of the manor N. of Dobbs Ferry, including this town. The title descended to his son Frederick, and was forfeited by the attainder of a son of the latter of the same name in 1779. One of the principal grantees under the State was Gerard G. Beeckman. Many Revolutionary associations are connected with this town; and several encounters took place within its limits. The census reports 6 churches in town.[5]

NEW CASTLE[6]—was formed from North Castle, March 18, 1791. A part of Somers was annexed May 12, 1846. It is an interior town, lying N. of the center of the co. Its surface is much broken by hills having a general course a little E. of N., the principal of which are Mount Prospect and the Chappaqua Hills, terminating in Mount Kisko. The Neperhan, Bronx, and Pocantico Rivers rise in this town. Upon the borders are Chappaqua, Wampas,[7] and Kirby Ponds, and Croton Lake. Chappaqua Sulphur Springs, 4 mi. N. E. from Sing Sing, have acquired a local notoriety. The soil is a gravelly clay and sandy loam. **Mount Kisko** (p. ô.) is a small village and R. R. station, on the line of Bedford. **New Castle** (p. o.,) is a small scattered village, upon Kirby Pond, near the line of Bedford. **Chappaqua**[8] (p. o.) is a R. R. station, near the s. line. **Sariesville** is a hamlet, near the center of the town; and here the town business is generally transacted. This town was included within Richbell's purchase of 1660, and, with other lands, was sold to Caleb Heathcote, and was patented to him and 10 associates[9] Feb. 14, 1701. It was afterward known as the "West Patent of Northcastle," or simply "West Patent." Settlement began about 1720, or a little earlier. At the time of the Revolution it formed one of the precincts of Rye parish. It was greatly annoyed by sudden incursions of plundering parties; and St. George's church was for a long time occupied as a guardhouse and hospital by the Continental troops. The census reports 5 churches in town.[10]

NEW ROCHELLE—was recognized as a town March 7, 1788. It lies upon the Sound, in the s. part of the co., and extends northward in a long, narrow strip. The surface is moderately

Davenports Neck,[1] a peninsula [illegible] fine islands in the Sound, belong to this town.[2] Crystal Lake, E. of the village, is chiefly celebrated for its ice, large quantities of which are annually "harvested." The soil is fertile and peculiarly adapted to fruit raising.[3] **New Rochelle,** [illegible] in the E. part of the town, was incorp. Oct. 5, 1857. It contains 6 churches, several private schools, and about 2,000 inhabitants. A portion of the village and the lands surrounding it are occupied by elegant villas and country residences of persons doing business in New York. The steamboat landing is a half mile S. W. of the village, on a small island connected with the main land by a stone causeway. The village is a station on the N. Y. & N. H. R. R. [illegible], incorp. Jan. 30, 1854, lies a mile W. of the village. **West New Rochelle, Petersville,**[4] and **Upper New Rochelle** are scattered villages, mostly inhabited [illegible]. The town was embraced in the Manor of Pelham, and was sold by John Pell, Sept. 20, 1689, to Jacob Leisler, for the settlement of a company of French Huguenots. These people are said to have been brought over in one of the king's ships, and to have landed on the N. E. part of Davenports Neck, then called "*Bauffets*" or "*Bounfoys Point.*"[5] They mostly purchased under Leisler in 1690. There were 23 freeholders in town in 1708. The town records commence Nov. 1, 1699, and until 1735 were kept partly in French. They were suspended from April 2, 1776, to June 24, 1783. A French church was organized in 1689, and in 1709 most of the members conformed to the Episcopal faith; and this denomination are now owners of property given by Pell. The Presbyterians also claim succession from the first French church, a part of the members of which did not conform.[6]

NORTH CASTLE[7]—was formed March 7, 1788. New Castle was taken off in 17[illegible]. It occupies a long, narrow strip on the E. border of the co., adjoining Stamford and Greenwich, Conn. Its surface is much broken by hills,[8] particularly in the W. part. It is drained by Maharness, Byram, and Bronx Rivers and their branches. Rye Pond lies on the S. border; Byram Pond on the line of Bedford; and Wampus Pond on the line of New Castle. Cobamong Pond, a mile E. of Byram Pond, has no inlet and is very deep. The soil is clay and sandy loam. **North Castle** (p. v.) contains a church and a few houses. **Armonk,**[9] (p. v.,) near the center, contains 3 churches, a woolen factory, and 20 houses. **Kinsico,**[10] (p. v.,) in the S. part, contains several manufactories and 100 inhabitants. **Quarter Station** is on the H. R. R. R., in the [illegible] part. The first settlements commenced at a very early period.[11] The census reports 7 churches in town.[12]

NORTH SALEM[13]—was formed March 7, 1788. A part was annexed to Lewis[illegible] in 1844. It is the N. E. corner town of the co. Its surface is hilly, the summits rising 100 to 300 ft. above the valleys. Croton River forms the W. boundary. Titicus[14] River, a principal branch of the Croton, flows W. from Conn. through near the center. The valley of this stream varies in width from ½ mi. to 1½ mi., and is bordered by steep hills. Peach Pond, on the N. border, covers 400 acres.

Beaver Pond is a small sheet of water near the N. line. The soil is better adapted to grazing than to grain raising. Turkey Hill lies in the S. W. part. **North Salem,**[1] (p. v.,) in the E. part, contains 2 churches, a paper mill, and 30 houses. **Salem Center,**[2] (p. o.,) a hamlet, is the seat of the North Salem Academy.[3] **Purdys Station,** (p. o.,) on the Harlem R. R., on the W. border, contains 2 churches and a small woolen factory. **Croton Falls,** (p. o.,) in the N. W. corner, is a station on the Harlem R. R. The first settlement commenced at a very early period, mostly by immigrants from Conn. The census reports 7 churches in town.[4]

OSSINING[5]—was formed from Mount Pleasant, May 2, 1845. It lies upon the Hudson, N. of the center of the co. Its surface is mostly a hilly upland, the ridges extending parallel to the river. Prospect Hill is a commanding eminence on the S. line of the town. Pocantico River forms its E. boundary. Marble is extensively quarried, and traces of several metals have been found.[6] The soil is a productive, gravelly and clayey loam. **Sing Sing,** (p. v.,) upon the Hudson, near the center of the W. border of the town, was incorp. April 2, 1813. It is beautifully situated upon ground gradually rising from the river to the height of 180 ft., and at most points affording fine views of Tappan Bay and the opposite shore of the Hudson. It contains 4 churches, the Mount Pleasant Academy, a female seminary, and several other popular female schools. Pop. 1,440. This village is chiefly noted for being the seat of one of the N. Y. State prisons. The prison was erected at this place in 1825, with a view of employing the convict labor upon the marble quarries. It receives convicts from certain southern and eastern counties, as specified by statute.[7] **Prospect Hill** is a scattered settlement along the S. border. **Spring Valley,** E. of Sing Sing, and **Sparta,** S. of Sing Sing, are hamlets. This town was included in the Manor of Philipsburgh, and was settled by the Dutch previous to the commencement of the last century. The lands were forfeited by the attainder of Frederick Philipse during the Revolution.[9] The first church was organized at a very early period, but the exact date is lost.[10] The Dale Cemetery, containing 47 acres, ½ mi. N. of Sing Sing, was incorp. Jan. 14, 1851.

PELHAM[11]—was formed March 7, 1788. It lies on Long Island Sound, in the S. part of the co., on the E. border, and it embraces several islands in Long Island Sound.[12] Pelham Neck[13] is a peninsula extending into the Sound; upon it are several elegant country seats. Its surface is undulating, the valleys ranging N. and S. Hutchinsons Creek[14] forms the W. boundary. The soil is mostly of an excellent quality of sandy and gravelly loam. **Pelhamville,** near the N. angle

[1] A gracefol arbor, weighing 60 tons or over, lies in this village, supported about 3 ft from the ground upon the joints of 5 smaller but stone rocks. There is a chalybeate spring near the village.

[2] About a half mile W. of the village is a natural bridge.

[3] This academy was erected between 1770 and '75 by Stephen De Lancey for his residence, but was not used as such, and in 1788 it was purchased for its present use. It was incorp. Feb. 19, 1790. Among its students have been Dan'l D. Tompkins, Col. N. P. Tallmadge and brother, Hon. James Kent, and several other prominent citizens. Its patronage at present is small.

[5] Originally called "*Ossuwing.*" Its name was changed March 14, 1846. The proper Indian name is said to signify "stone upon stone," and has been written Sin Sing, and Sink Sink. A powerful clan of Mohegans of this name inhabited this region when it was first known to the whites.

[6] Several specimens of galena, with several ores of copper, have been obtained. Sulphuret of zinc and oxyd of manganese are occasionally found in the lime rock.

[7] This prison was erected by the convicts themselves, 100 of whom were sent from Auburn Prison for that purpose under the charge of Capt. Elam Lynds, who had chiefly directed the building of the Auburn Prison. The novel spectacle was exhibited on the 11th of May, 1825, of the arrival of this band on the open ground which was to be the theater of operations, without a place to receive or even a wall to inclose them. [9] The first day sufficed to erect a temporary barrack for shelter at night, and ever after they continued in unremitting labor, watched by a small number of guards, but held under perpetual government of their accustomed discipline and submission to the power whose vigilant eye and unrelaxing hand they felt to be perpetually upon them and around them.—*Introduction to N. Y. N. Y., p.* 186.

The Harlem River R. R. crosses the prison grounds under two high walls with an intervening walled space. The inside prison is 324 ft. and 5 stories high, and has 1,000 cells. The W. wall is inclosed by 2 buildings 40 ft. wide, 2 stories high, extending from the main prison to the river, and occupied by kitchens, hospitals, chapel, and shops. The yard thus formed is 162 by 432 ft., and has a range of sheds 40 ft. wide, parallel to the main prison. There are also workshops on the E. The female prison, upon the same premises, but under separate management, is built of rough marble taken from the State quarries. It stands on an elevated site, E. of the R. R., with a colonnade of the Ionic order across the end fronting the river. It was built in 1839–40, and receives female convicts sentenced to State prison from every co. in the State; it contains 80 cells. By an act of April 18, 1859, the Inspectors of State Prisons were directed to sell such of the premises at this place as are not required for prison purposes, at a price not less than $250 per acre, and to appropriate the moneys thus received to building and repairing such works at the prison as they may deem proper.

[8] Formerly known as "*Long Hill.*"

[9] Families named Ward, Orser, Crank, Bazdic, Acker, Purdy, Merritt, McCord, Bishop, Balyeas, Storm, Jones, Millet, and Ryder, purchased under the Commissioners of Forfeiture.

[10] There are 6 churches in town: 3 Prot. E., Bap., M. E., and Presb.

[11] Named from Thos. Pell, of Fairfield, Conn. A purchase was made of the Indians by Mr. Pell Nov. 14, 1654; and most of this was confirmed to him by Gov. Nicoll, Oct. 6, 1666. The quitrent reserved in this grant was a bull annually. Pelham Manor originally embraced 9,600 acres, and was confirmed by Gov. Dongan, Oct. 25, 1687, to John Pell, nephew of the first purchaser. This town is mostly owned by a few wealthy proprietors, and, except Scarsdale, is the best populous in the co. Several acres of berries are cultivated for the city market. Pelham Bridge connects the town with East Chester.

[12] The principal of these is "City Island,"—formerly "*Minnefords Island,* or "*Minnefords Gift.*" It received its present name from its having established shipyards previous to the Revolutionary period and remained such down to the Rebellion. It was supposed that the Indian tribe could be exterminated from this place with peculiar advantage. It is now principally occupied by oystermen.

Harts Island, or "*Spectacle Island,*" has an area of 86 acres. Hunters Island, belonging to the estate of Dr. Hosack, has an area of 200 acres, and was formerly connected with the mainland by a stone causeway and bridge. High Island lies near the S. point of Pelham Neck.

[13] Formerly "*Anne Hutchinson's Neck.*" It was an Indian name; and afterward "*Rowton's Neck.*" It was a favorite place for Indian sculpture, and traces of it are still seen. A ferry was established to Hempstead Harbor and to Matagarmus Bay in 1754, by Samuel Rodman.

[14] Named from Mrs. Anne Hutchinson, the first settler. Its Indian name was Aquehoonk, from a term descriptive of the red cedar tree.—*Bolton's Westchester, I. p.* 512.

of the town, is a newly surveyed village and station on the N. Y. & N. H. R. Robert Bolton, and conducted by his daughters. A settlement was made in this town in 1642, by Mrs. Anne Hutchinson, who was driven from Massachusetts on account of her religious belief. The [illegible] Pelt. L. [illegible] was.

POUNDRIDGE[1]—was formed March 7, 1788. It lies in the [illegible] bordering on Stamford and New Canaan, Conn. Its surface is hilly and much broken. The Stony Hills occupy the N. part and extend 3 or 4 mi. in a N. E. direction, with steep, craggy sides and rocky summits. Cross River flows through the extreme N. corner, Stamford Mill River flows S. through the E. part, and Maharness River forms a part of the S. W. boundary. Cross Pond is on the E. line. The soil is a gravelly loam. **Poundridge,** (p. o.,) near the center, is a small settlement with 2 churches. **Bedfordstown** is a hamlet, in the N. corner. The [illegible] commenced near the center of the town, in 1744, by Capt. Joseph Lockwood and associates, from Stamford, Conn. There are 3 churches in town; M. E., Prot. Meth., and Presb.

RYE[4]—was formed March 7, 1788. It lies on the E. border of the S. part of the co. It is a narrow, irregular strip, bordering on the Sound and Greenwich, Conn. Its surface is broken and rocky. Byram River[5] forms a small part of the E. boundary, and Blind Brook a part of the W. The soil is chiefly clay. There are quarries of hard, blue granite in town. Along the coast are several small islands.[6] The mirage is frequently seen upon the coast, bringing to view the shore of Long Island with great distinctness. **Rye,** (p. v.,) a station on the N. Y. & N. H. R. R., contains 3 churches, a private seminary, and 300 inhabitants. **Milton,** in the S. part, is a hamlet, with 1 church. **Ryeport** is a steamboat landing, with a daily line in summer to New York. **Rye Beach** is a place of resort during the hot season. **Port Chester,** [illegible] station on the N. Y. & N. H. R. R., contains 5 churches, several private seminaries, extensive manufactories,[7] and 1,695 inhabitants. It is connected with the Conn. shore by a toll bridge. **Kingsfield** is a fine agricultural district, extending nearly 7 miles N. of Port Chester. **Glenville** is a hamlet, on Byram River. The first settlement was commenced on Manursing Island.[8] The census reports 9 churches in town.[9]

SCARSDALE[10]—was formed March 7, 1788. It lies in the interior of the S. part of the co. Its surface is broken by ridges and hills. Bronx River forms the W. boundary, and the E. angle borders on the Mamaroneck. Hutchinson and Sheldrake Creeks rise in this town. The soil is a clayey and sandy loam. It has no villages, and is the least populous town in the co. **Scarsdale,** (p. o.,) in the W. part, contains a church and a few houses. **Scarsdale Station,** on the Harlem R. R., is on the W. border of the town. In the S. corner of the town is a Friends meeting house, on a site used for that purpose long before the Revolution. Gov. Tompkins was a native of this town; and Chief Justice Morris and Maj. Wm. Popham—for many years clerk of the Court of Exchequer—resided here. The census reports 2 churches in town; Prot. E. and Friends.

1808. A part was annexed to New Castle in 1846. It lies on the N. border of the co., near the center. Its surface is broken by ridges in the S.; in other parts it spreads out into level plains. Croton River forms the S. E. boundary. Muscoot River[1] and Plum Brook flow S. through the town into Croton River. Croton Lake, the fountain head of the Croton Water Works, lies in the N. W. corner, extending into Yorktown. The soil is a sandy and gravelly loam. **Somers,** (p. v.,) in the N. E. part, contains 2 churches, a bank, and 20 houses.[2] **Croton Falls,** (p. v.,) in the N. E. corner, on the line of North Salem, is a small village and station on the Harlem R. R. It has a good water-power. **West Somers** (p. o.) is a hamlet. This town, in the allotment of the manor in 1734, fell to the share of Mrs. Margaret Bayard, Philip and Stephen Van Cortlandt, Andrew Johnston, —— Miller, Stephen De Lancey, and Mrs. Susannah Warren. The census reports 5 churches in town.[3]

WESTCHESTER[4]—was organized as a town, Nov. 7, 1788. West Farms was taken off in 1846. It lies on the Sound, in the extreme S. part of the co. It is bounded on the W. by Bronx River, and on the S. and E. by the Sound. Its surface is generally low and flat along the coast and rolling further inland. Several bays and estuaries extend far inland and divide the land into several peninsulas and necks. The principal of the latter are Classons Point,[5] between Bronx and Westchester Rivers; Zeregors Point, next E.; and Throggs Neck,[6] a long and narrow promontory extending S. E. into the Sound. About 2,500 acres along Westchester River is a salt meadow, a portion of which is held as public property and managed by 3 trustees. The soil is a good quality of sandy and gravelly loam. The people are principally engaged in gardening and fruit growing. **Westchester,** (p. v.,) at the head of navigation on Westchester Creek, is a scattered village of about 1,000 inhabitants. **Bronxdale,** on the line of West Farms, has an extensive tape factory, a dye and bleach works, and about 400 inhabitants. **Schuylerville,** upon Throggs Neck, is a scattered village of 300 inhabitants. **Connersville, Wakefield, Centerville,** and **Unionport** are modern village plats. **Fort Schuyler,** upon the extremity of Throggs Neck, was begun in 1833; and in 1851 $848,013 had been expended upon it. The estimated cost of the construction and repairs was then $873,013.[7] The first settlement on Throggs Neck was made in 1642, by John Throckmorton and 35 associates, from New England, with the consent of the Dutch. The Indian title to the land was extinguished in 1643, by the Dutch, and a land brief was granted in that year, and another in 1652. The English began a settlement at Westchester[8] in 1642; but the Dutch, considering them intruders, arrested several of them, and in 1656 they surrendered themselves to the Dutch Government. The settlement was claimed by Conn. in 1663; but the next year it came under the government of the Duke of York. A patent was granted by Gov. Nicoll, Feb. 13, 1667, and by Gov. Dongan, Jan. 6, 1686. A market was established at Westchester, May 11, 1693, to be held weekly; and the same year an annual fair was established, to meet alternately at this place and Rye. It was made a borough town April 16, 1696, with mayor, aldermen, and common council, "according to the form of the best governed towns and corporations of the realm of England," and the right of holding a mayor's court, and a representation by one delegate in General Assembly. The De Lancey family, prominent officials under the Colonial Government, and loyalists of the Revolution, resided in this town. The first church (Cong.) was formed soon after the arrival of the first settlers.[9]

WEST FARMS—was formed from Westchester, May 13, 1846. Morrisania was taken off in 1855. It lies upon the Sound and along Harlem River, in the S. part of the co. The surface is rolling, the ridges extending N. and S. Bronx River forms its E. boundary, and Sawmill Brook flows through the center. Its soil is a gravelly and sandy loam, rendered very productive by scientific farming. **West Farms,** (p. v.,) a large village at the head of navigation on Bronx River,

[1] This river is said to discharge 3,628,800 gallons of water per day.

[2] Hachaliah Bailey, of Somers, about 1815 imported the first elephant brought into the United States. "Old Bet" with other animals soon after imported was termed the first traveling menagerie in the country, with which Van Amburgh, the Lion Tamer, was afterward associated. Thaddeus and Gerard Crane, Lewis Lyon, and John June, familiar to the public as enterprising showmen, were from this town and North Salem.

[4] The Dutch called this region "*Vreedlandt*," or the land of peace, and the village "*Oost Dorp*," or East Village.

[5] Formerly "*Cornhills Neck*," and granted to Thos. Cornhill, or Cornell, in 1640.

[6] Named from John Throckmorton, the pioneer settler. A lighthouse 45 feet high and 66 feet above the Sound, was built here in 1824, and rebuilt in 1855. It has a fog bell struck by machinery 7 times per minute.

[7] It was built to accommodate 1,250 men and to mount 318 cannon. With the projected work upon Wilkins Point, in Flushing, Queens co., these fortresses would effectually protect New York against the approach of a hostile fleet from the Sound. The fort is built of granite from Greenwich, Conn.

[8] The settlers at "*Vreedlandt*" at this time were Lieut. Thos. Wheeler, Thos. U. Newman, Robert Bassett, John Chas. Sherwood, Davies, Wm. H. Fendall, Richard C. Meares, Samuel Hazlit, Isaac Holbert, Robert Rose, Jas. Bill, John S. Gardiner, Richard Osbort, and Wm. Ward. The Dutch released Capt. R. Fenton, Wm. Llet Black, John Gray, and Roger Wheeler, who had been arrested for taking up arms at "*Vreedlandt*."—*Jocelyn's Westchester, II, p.* 100. In 1662 they were allowed to nominate their own magistrates and hold their own courts; "but in dark and dubious matters—especially in witchcraft—the party aggrieved might appeal to the Governor and Council."

The last named is a station upon the Harlem R. R. **Claremont** is a village plat on the line of Morrisania. The eastern part of the [illegible] known as "*The West Farms*," was patented April 25, 1666, to Edward Jessup and [illegible] purchasers.[4] Fordham was bought by the Dutch in 1639, and in [illegible] by Adrian Van der Donck. In 1671 John Archer, owner of 1,253 acres, obtained a patent under the title of the "Manor of Fordham." It passed to Cornelius Steenwyck, and was [illegible] in 1694 to the Dutch church in New York, in whose possession it remained 60 years.[5] The High Bridge of the Croton Aqueduct connects the S. W. corner of this town with N. Y. City and Morrisania. Fort No. 8 was built upon the eminence N. W. of the Archer homestead in the Revolution; and its guns assisted in the capture of Fort Washington in 1776. It was demolished by the enemy Oct. 20, 1782. Fort Independence, on Totan's Hill, was [illegible] in 1813. Prince Charles Redoubt and the Negro Fort of the Revolution were on the [illegible] of Valentines Hill. There are 8 churches in town.[6]

WHITE PLAINS—was formed March 7, 1788. It is an interior town, lying S. of the center of the co. The surface is rolling and hilly. Mamaroneck River forms its E. boundary, and Bronx River its W. St. Marys Lake lies along its [illegible]. The soil is a clayey and [illegible] loam. **White Plains**[7] (p. v.) is situated near the W. line of the town. It contains the [illegible] and two co. buildings, 3 churches, and several private seminaries. It is a station upon the Harlem R. R., and contains about 1,000 inhabitants. This town was purchased Nov. 22, 1683, by the inhabitants of Rye, and was settled soon after. In 1720 it was divided among 41 proprietors,[8] and a charter was granted March 13, 1721, with a quitrent of 2 shillings 6 pence to every 100 acres. It embraced 4,435 acres. Many important historical events occurred in this town during the Revolution. The village was wantonly burned Nov. 5, 1776, by a New England major. The battle of White Plains was fought on Chatterton Hill, in Greenburgh, opposite, and within view of the village. There are 6 churches in town.[9]

YONKERS[10]—was formed as a town March 7, 1788. It is the most southerly town in the co. upon the Hudson. The surface is rugged and broken by several ridges extending N. and S. Valentines Hill,[11] the highest point, is 400 ft. above tide. Tuckahoe Hill, in the E. part, and Huits Deer Ridge, extending into Greenburgh, are prominent points. The principal streams are Bronx River, forming the E. boundary, Spuyten Duyvil Creek, forming the S. boundary, Neperhan River, flowing through the center, and Sprain River and Tibbetts Brook.[12] The soil is a clayey and gravelly loam. The people are largely engaged in manufactures.[13] The heights along the river are studded with elegant country residences. Many of the inhabitants are [illegible]

It contains 9 churches, several private seminaries,[1] a bank, and newspaper office. Pop. about 8,000. It is a steamboat landing,[2] and a station on the Hudson River R. R. It has several manufactories and a great number of beautiful suburban villas.[3] **Spuyten Duyvil,** (p. v.,) on the creek separating the town from New York, is the seat of several large founderies, and is principally inhabited by operatives. **Tuckahoe,** (p. o.,) an old settlement in the E. part, is a station upon the Harlem R. Near this place are several marble quarries. **Kingsbridge** (p. o.) lies upon Harlem River, and is connected with New York City by a bridge. **Riversdale,** below Yonkers, is a group of villas and a R. R. station. **South Yonkers** is a p. o. The Croton Aqueduct passes through this town from N. to S. A castellated stone mansion, built by Edwin Forrest, the tragedian, on the banks of the Hudson, a mile below Yonkers, has lately been purchased for an educational institution by the Roman Catholics.[4] The country now included in Yonkers, West Farms, and Morrisania, and containing about 24,000 acres, was granted to Adrien Van der Donck in 1646, with the right and title of Patroon. He gave to his estate the title of "*Colen Donck*," perfected its title by purchase from the Indians, and took measures for its improvement.[5] There are 11 churches in town.[6]

YORKTOWN[7]—was formed March 7, 1788. It lies upon the N. border of the co., W. of the center. Its surface is broken and hilly. The Highlands lie along the N. border; and several points are elevated 600 to 1,000 ft. above tide. The principal stream is Croton River, flowing across the S. part. Keakatis Lake,[8] near the center, Mohegan Lake, in the N. part, and Magriganies Lake, in the N. E. corner, are small bodies of water. **Crompond,** (Yorktown p. o.,) near the center, **Pines Bridge,** (p. o.,) near the E. line, **Jefferson Valley,** (p. o.,) in the N. E. corner, and **Shrub Oak,** (p. o.,) near the N. line, are hamlets. A rolling mill, wire factory, gristmill, and sawmill have been erected 2 mi. W. of Croton dam. This town formed a part of Cortlandt Manor, and in the division of 1734 fell to the shares of Andrew Miller, Gertrude Beeckman, Cornelia and John Schuyler, Gertrude Verplanck, Elizabeth Skinner, John Watts, Philip Verplanck, and Susannah Warren. A Presb. church built at Crompond[9] about 1738 was burned July, 1779, and a committee in Congress in 1839 reported in favor of paying $3,500 for the loss, as the premises had been used as a storehouse by the Continental troops. Col. Green was surprised in this town May 13, 1781, by a party of refugees, in which affair Maj. Flag, 2 subalterns, and 27 men were killed, and many wounded. The census reports 7 churches in town.[10]

[1] The principal of these are the Yonkers Collegiate Institute and Gymnasium, conducted on the military system, a female seminary, and a public free school.

[2] The steamer Henry Clay was burned not far from this place, on her down trip, July 28, 1852. Of 500 persons on board, nearly 100 perished, among whom was A. J. Downing, the editor and author.

[3] The Manor Hall, a short distance above the village, built about 1745, was one of the seats of the Philipse family.

[4] An edifice of fine architectural proportions and great size was erected in 1858, in the rear of the mansion. The premises form a branch of the institution located on the Central Park in New York, and are under the charge of Sisters of Charity.

[5] Van der Donck subsequently took an active part in representing in Holland the interests of the colonists against the alleged tyranny of the West India Company and its servants, and finally succeeded in his efforts, notwithstanding the enmity of Gov. Stuyvesant and the influence he was able to bring to oppose him. He died in 1655, and his estate was afterward sold in detached portions by his widow. His settlement was laid waste by the Indians, Sept. 15, 1655, and probably remained unoccupied until after the English conquest. In 1672 Frederick Flypsen or Philipse, with Thos. Delavall and Thos. Lewis, bought 8,000 acres of Colen Donck, nearly all in the present town of Yonkers; and subsequently the former became sole owner to Kings Bridge. For one of these thirds he paid £50. These possessions were extended, by further purchase, to Croton and Bronx Rivers, and in June, 1693, the Lordship or Manor of Philipsburgh was erected, with all the rights, honors, or privileges enjoyed by the most favored, excepting that of representation in the General Assembly. He established a drawbridge at Spuyten Duyvil Creek, built a church, still standing, in Sleepy Hollow, and made other improvements. His descendants occupied a prominent position in the colonial government; but, siding with the royal cause, he lost every thing in the Revolution. Col. F. Philipse, the last proprietor of this estate, was paid £62,975 by the British Government, as an equivalent for this loss; and his estates were sold by the State to his tenants at very moderate rates.

[7] The country E. of Cortlandtown was called by the Mohegans Appamaghpogh; and the E. part of Yorktown is still called "Amawalk,"—probably an abbreviation.—*Bolton's Westchester, II. p. 377.*

[8] The Croton dam, at the head of the Croton Aqueduct, is in this town. At the top it is 166 ft. above tide and 40 ft. above the bed of the river; 61 feet wide at low water level, with openings of 90 and 180 feet for the passage of the surplus waters. Between these is a partition, forming the foundation of the gatehouse and sluiceway for relieving the structure from the pressure of the lake, and for the discharge of water during repairs. The water flows over an ogee-curved apron of cut stone laid upon hewn timber, and is received in a pond, formed by a second dam, 300 ft. below. The aqueduct is taken from the Lake through a tunnel on the E. side, 1836 ft. long in the solid rock; and the flow of water is regulated by a double set of iron gates. The dam was destroyed while building, in Jan. 1841; but the present structure promises to stand without injury, and almost without repair, to an indefinitely remote period. The surface over which the waste water flows is now built to a line more than was intended before the accident in 1841. The pond has a capacity of 400,000,000 gallons.

Croton River was named Kitchawan, signifying a large and swift current. The land west of Pines Bridge was named Keweghtegnack. The commissioners were obliged to purchase about 600 acres of land overflowed by the dam, at an average cost of $500 per acre.

"Green called "Green Pond," the Dutch term for Green Pond. It consisted of 2 parts united. Near this pond is Drum Hill, where the French drums and baggage were captured in 1781-82. Turkey Mountain is an extensive wood-land to the S."

WYOMING COUNTY.

THIS county was formed from Genesee, May 14, 1841. Eagle, Pike, and a part of Portage were annexed from Allegany co. in 1846. It is an interior county, in the s. w. part of the State, separated from Lake Erie by Erie co., and from the Penn. line by Cattaraugus and Allegany. It is centrally distant 228 miles from Albany, and contains 590 sq. mi. Its surface is a broad, rolling upland, divided into ridges and broken by ravines worn by the streams. It has a slight inclination toward the N. The summits of the highest ridges are 1,200 to 1,500 ft. above Lake Erie and 1,700 to 2,000 ft. above tide. Several of the ravines in the N. are 1,000 ft. below the summits of the adjacent ridges. In the interior the ridges are broken, and the country begins to assume the hilly character which is more fully developed further S. Genesee River, which forms a portion of the E. boundary, is bordered by steep bluffs 200 to 400 ft. high. Near Portageville the river descends from the plateau, in a series of three falls, to a depth of more than 300 ft. within a distance of 2½ mi. The water has worn a deep and irregular ravine in the shelving rocks, and the nearly perpendicular banks at the foot of the lower falls are 380 ft. high. The deep gorge, with the rapids and falls, form one of the wildest and most picturesque scenes in Western New York.[1]

The other principal streams are Cayuga, Tonawanda, Little Tonawanda, Oatka, East Coy, Wiscoy, Cattaraugus, and Buffalo Creeks. The valley of Oatka Creek, from near the S. border of Warsaw to the N. line of the co., is bordered by steep hills 400 to 1,000 ft. high. Silver Lake, in Castile, (the principal body of water,) is 3 mi. long and about ½ mi. wide. The rocks of this co. consist principally of the shales and sandstones of the Portage group. The summits of the southern hills are covered with the rocks belonging to the Chemung group. Thin layers of compact Portage sandstone are found in many parts of the co. and are extensively quarried for flagging. Upon the ridges little rounded eminences are frequently seen, appearing like drift hills; but upon examination they are found to be shale rock covered with a thin soil. Marl and muck are found in considerable quantities in the swamps. The waters of Silver Lake and of several of the streams are constantly depositing lime in the form of marl. The drift deposits in the co. are very extensive, and the soil in some parts is derived from disintegration. Upon the hills it is mostly a clay loam underlaid by hardpan, and in the valleys it is a fertile, gravelly loam and alluvium. The people are principally engaged in stock and wool growing and in dairying, for which the soil upon the hills is admirably adapted. Wheat, barley, corn, and fruits are largely cultivated in the valleys. Very little attention is paid to manufactures except such as are strictly necessary to an agricultural community.

The county seat is located at Warsaw.[2] The courthouse is a commodious brick edifice, situated in the N. part of the village. The co. clerk's office is a fireproof building, adjacent to the courthouse. The jail is a wood building, arranged so as to enable the keeper to classify the prisoners

[1] The Upper or Horse-Shoe Falls are about three fourths of a mi. below Portageville. The name is derived from the curve in the face of the cliff over which the water flows. For a short distance above the edge of the precipice the water is broken by a succession of steps in the rock, forming a series of rapids. The height of the fall, including the rapids, is about 70 ft. The Middle Falls are about one-half mi. further down the river. For 2 or 3 rods above the edge of the cliff the water is broken into rapids, and then in an unbroken sheet it pours down 110 ft. into a chasm below, bounded by perpendicular ledges. A cave, called the "*Devil's Oven*," has been worn in the rocks under the W. bank, near the bottom of the falls. In low water 100 persons can be seated within it; but when the river is high it is filled with water, and is only accessible by boats. The Lower Falls consist of a series of rapids one-half mi. in extent, with an aggregate fall of 150 ft. For about 2 mi. below the Middle Falls the river pursues a winding and rapid course between high, perpendicular walls; then descends in a succession of steps almost as regular as a staircase, dives under a shelving rock, sheets out in a narrow pass not more than 15 ft. wide, rushes down a nearly perpendicular descent of 20 ft., strikes against the base of high rocks standing directly in its course, whirls back, and, turning at nearly right angles, falls into a deep pool overhung with shelving rocks. An isolated mass of rocks, 15 ft. in diameter and 100 ft. high, known as "*Sugar Loaf*," rises from the river bed at the bend of the stream and receives nearly the whole force of the rushing water. It is bordered on one side by the present bed of the stream, and on the other by a deep chasm which separates it from the E. bank of the river. Within the memory of people now living, the river flowed over the precipice on the level of the rock which now forms its W. bank, and Sugar Loaf was an island. These falls are accessible only from the W. The perpendicular bank on the W. side of the river at one point is 380 ft. high.

[2] The commissioners named in the act to select the location were Peter R. Reed, of Onondaga, Davis Hurd, of Niagara, and John Thompson, of Steuben. The building commissioners were John A. McElwaine, Paul Richards, and Jonathan Petty. Trimble Cary, Esq., of Batavia, gave to the co. an ample public square upon which to erect the public buildings. The first courts were held at a public house at East Orangeville, in June, 1841, and the first meeting of the Board of Supervisors was at the same place. The first co. officers were Paul Richards, *First Judge*; James Sprague, Peter Patterson, Jos. Johnson, *Associate Judges*; W. Riley Smith, *District Attorney*; N. Wolcott, *Co. Clerk*; W. K. Gregor, *Sheriff*; and Harvey Putnam, *Surrogate*.

according to law.[1] The poorhouse is situated on a farm of 97 acres near the w. border of Orangeville, 9 mi. w. of Warsaw. The average number of inmates is 70, supported at a cost of 75 cts. per week each. The farm yields a revenue of about $500.[2]

The Buffalo, New York & Erie R. R. extends s. e. through Attica, Middlebury, Warsaw, Gainesville, Castile, and Genesee Falls, crossing the Portage Falls and connecting with the N. Y. & E. R. R. at Hornellsville. A R. R. route has been surveyed, and a road-bed graded, from Attica s. w. to the Allegany River.[3]

There are 5 weekly newspapers published in the co.[4]

The eastern tier of towns in this co., with the exception of a portion of Castile, belongs to the Ogden, Silver Lake, and Cotringer tracts of the Morris Reservation, and the remaining parts of the co. to the Holland Land Purchase. The Gardeau Tract, containing 17,927 acres on both sides of the Genesee, was reserved for Mary Jemison (the "*old white woman*" by the Seneca Nation in their treaty with Robert Morris in 1797.[5] About one-half of this tract lies in the present town of Castile. Upon this tract Mary Jemison and her descendants continued to reside until 1816, when she sold all but 2 sq. mi. on the w. side of the river to Micah Brooks and Jellis Clute. The remaining 2 mi. she sold in 1831 to Henry B. Gibson and Jellis Clute, and removed to the Cattaraugus Reservation. The first white man that lived within the limits of the co. was a tory, named Ebenezer Allen, who in consequence of his crimes fled from Penn. and joined the Indians about 1780. He located upon the Genesee, and for a time lived upon the lands of Mary Jemison. He afterward built a saw and grist mill on the present site of Rochester, removed thence to Oatka Creek,[6] and thence to Canada.[7] The first permanent white settlers were John Tolles, Jacob Wright, Nathaniel Sprout, and Stephen Crow, in 1802. The settlements increased rapidly, and in a few years most of the best lands of the co. were taken up. Most of the early settlers were from New England; but the later immigrants have principally been Germans.

ATTICA—was formed from Sheldon, April 4, 1811. Orangeville was taken off in 1816. It

lies upon the N. border of the co., W. of the center. Its surface is a rolling upland, broken by the ravines of the streams. In the E. part are several considerable hills with long gradual slopes. Tonawanda Creek, the principal stream, flows through the N. W. corner, and receives numerous branches from the E., the largest of which is Crow Creek. The soil is a clay and gravelly loam. **Attica,** (p. v.,) upon Tonawanda Creek, in the N. W. part of the town, was incorp. May 2, 1837. It contains a flourishing union school, a bank, a newspaper office, a flouring mill, and 5 churches. Pop. 1,184. **Attica Center** (p. o.) and **Vernal** are hamlets. The first settlement was made in 1802, by Zera Phelps.[1] The first religious services were held Sept. 21, 1809, by Rev. Royal Phelps, at which time the first church (Cong.) was formed, with 5 members.[2]

BENNINGTON—was formed from Sheldon, March 6, 1818. It is the N. W. corner town of the co. Its surface is a rolling upland, broken by the ravines of small streams. Cayuga Creek and its branches drain the central, and Murder Creek the N. part of the town. Tonawanda Creek flows through the S. E. corner. The soil is a clayey, gravelly and sandy loam. **Bennington Center** (Bennington p. o.) contains 3 churches and 30 dwellings; and **Cowlesville,** (p. v.,) in the N. W. part of the town, 2 churches and 206 inhabitants. **Folsomdale** (p. o.) is a hamlet, on Cayuga Creek, and has a valuable water-power. The first settlement was made near the center of the town, in 1802, by John Tolles, Jacob Wright, and William Barber, from Vt.[3] The first religious services were conducted by Rev. Peter B. Root, in 1805. The first church (M. E.) was formed in 1807.[4]

CASTILE (Cas-tīle)—was formed from Perry, Feb. 27, 1821. It is the central town upon the E. border of the co. Its surface is a rolling and terraced upland, broken by the deep valleys of the streams. Genesee River, forming a portion of the E. boundary, is bordered by steep banks 300 to 350 ft. above the water. In some places the faces of the bluffs are perpendicular ledges 200 ft. high. Numerous small tributaries of the river have worn deep lateral channels in these bluffs. The valley of Silver Lake occupies a wide and shallow basin in the N. part of the town.[5] Its outlet is toward the N. Wolf Creek rises in a swamp near the head of the lake and flows S. A wide, level valley, bordered by low terraces, extends from the E. shore of the lake and opens into the valley of Wolf Creek at Castile Village. The soil is a clay and gravelly loam. **Castile** (p. v.) lies on Wolf Creek, in the S. W. part of the town. It is a station on the B. & N. Y. City R. R. Pop. 682. **St. Helena,** (p. v.,) on Genesee River, in the S. E. corner of the town, contains 20 dwellings. The first settlement was made in 1808, by Robert Whalley, from R. I., 1 mi. E. of Castile Village.[6] The first religious services (Bap.) were held near the S. end of Silver Lake, in 1816, by Elder Benj. Luther.[7]

CHINA—was formed from Sheldon, March 6, 1818. Java was taken off in 1832. It is the S. W. corner town of the co. Its surface is a rolling or hilly upland, broken by valleys. Cattaraugus Creek flows S. W. through near the center of the town, and receives several tributaries, the principal of which is Clear Creek, from the S. From the valleys the town spreads out into a rolling region, with long gradual slopes arable to their summits. The highest point is the ridge in the N. E., which is 1,100 ft. above Lake Erie, as determined by actual survey. The soil of the upland is a clayey and in the valleys a gravelly loam. **Arcade** (China p. o.) is situated at the junction of Cattaraugus and Clear Creeks, in the S. W. part of the town. It has a fine

[3] Among the other early settlers were Chauncey, Justin, and George Loomis, Peleg Tuthill Case, Joseph Farnham, George Hoskins, David Tolles, Aaron Clapp, and Ezra Ludden. The first marriage was that of Aaron Whitney and Rachel Truesdale, in 1807; and the first death in town, that of a child of Wm. Barber, in 1803. The first school was taught by Rachel Truesdale, in 1807; the first inn was kept by Joseph Farnham, in 1817. Chauncey Loomis erected the first sawmill, in 1808; he also kept the first store. Quartus Clapp built the first gristmill, at Cowlesville. A son of David Tolles, 8 or 9 years old, was lost in the woods in 1806 and was never found.

[4] The census reports 5 churches; Bap., F. W. Bap., Presb., M. E., and Univ.

[5] Mary Jemison, the "*old white woman,*" with her family, hid in the alders at the foot of this lake while Gen. Sullivan was laying waste the Indian villages upon the Genesee. In the summer of 1850 it was reported that an immense serpent, 100 ft. long, had been seen in this lake. So well was the story apparently authenticated that thousands of visitors came from all parts of the country to obtain a sight of his snakeship. A burlesque account of the capture of the serpent, which appeared in the *Buffalo Republic,* raised the excitement to the highest pitch; and immediately afterward the whole humbug collapsed.

[6] Soon after, a settlement was made at the foot of the lake, in the W. part of the town, called the "*Tallman Settlement.*" Ziba Hurd and Jonathan Gilbert, from Vt., were the first settlers at Castile Village, in 1816. The first child born was Jane McKay, in 1813; and the first death was that of Laura Wilcox, in 1815. The first school was taught in 1816, by Anna Bennett, from Vt. Robert Whalley kept the first inn, and erected the first sawmill, on Wolf Creek, below Castile Village, in 1811. John Card and Sylvester Lathrop built the first gristmill, on Lot 40, in 1820; the first store was kept by Lemuel Eldridge and M. Frost, in 1815.

The first settlement was made in 1808, on Lot 28, by Silas Moody, from New England.[1] The first religious services were conducted by Rev. John Spencer at Arcade, in 1812. The first church (Cong.) was formed at Arcade, by Jno. Spencer, July 24, 1813.[2]

COVINGTON—named from Gen. Leonard Covington, was formed from Leicester (Ontario co.) and Perry, Jan. 31, 1817. A part was annexed to York (Livingston co.) in 1823. It is the N. E. corner town of the co. The surface is a moderately hilly upland, broken by the deep ravines of the streams. Oatka Creek flows through the N. W. corner, and receives as tributary Pearl Creek, which flows N. W. through near the center. Wide, fertile alluvial flats extend along Oatka Creek. The soil of the uplands is generally a gravelly loam. **Covington Center,** (Covington p. o.,) in the N. part, contains 20 dwellings; **Pearl Creek,** (p. v.,) in the N. W. corner, has 15 dwellings; **La Grange,** (p. v.,) near the S. line, a church and 20 dwellings; and **Peoria,** (p. v.,) near the E. line, 15 dwellings. The first settlement was made in 1807, in the W. part, by Jairus Cruttenden, William Miller, and John and William Sprague, all from New England.[3] The first religious services were held at the house of David Norris, in 1814, by Rev. Mark Norris, from Vt.[4]

EAGLE—was formed from Pike, Jan. 21, 1823. It occupies a central position on the S. border of the co. Its surface is a hilly upland, broken by the deep ravines of the streams. Nearly the whole drainage is through Wiscoy Creek and its branches. Cold Creek takes its rise in the S. E. part of the town. The hills bordering upon the streams are very steep, and their summits are 400 to 700 ft. above the valleys. Eagle Lake, a small body of water in the S. W. part, has no visible outlet. The soil is a clayey and gravelly loam. **Eagle Village,** (p. v.,) in the S. W. part of the town, contains a church and 20 dwellings. **Eagle,** (p. o.,) in the N. E. part, is a hamlet. The first settlement was made in town in 1808, on Lot 8, by Silas and Wm. Hodges, from Cayuga co.[5] There are 3 churches in town; M. E., F. W. Bap., and Christian.

GAINESVILLE—named from Gen. E. P. Gaines, was formed from Warsaw, as "Hume," Feb. 25, 1814. Its name was changed April 17, 1816. It is an interior town, lying S. E. of the center of the co. The surface is an upland, slightly undulating and broken by the valleys of the streams. Oatka Creek flows through the N. E. part, and East Coy Creek through the S. W. The soil on the hills is a thin, dark loam underlaid by hardpan, and in the valleys a fertile, gravelly loam. A good quality of building stone is quarried in the N. part of the town. **Gainesville Creek,** (Gainesville p. o.,) on East Coy Creek, near the center of the town, contains a female seminary, 3 churches, and about 300 inhabitants. **East Gainesville,** (p. v.,) on the B. & N. Y. City R. R., contains 20 houses. **Gainesville Center** and **Newburgh** are hamlets. The first settlements were made at Gainesville Creek in 1805, by Wm., Richard, and Chas. Bristol, from Columbia co., and Elnathan George, from Vt.[6] The first religious meeting was held in 1809. The first church (Presb.) was formed in 1815.[8]

GENESEE FALLS—was formed from Pike and Portage, (Livingston co.,) April 1, 1857. It lies on Genesee River, in the S. E. corner of the co. A nearly perpendicular rocky bluff, 100 to 300 ft. high, borders upon the river, and from its summit the country spreads out into an undulating upland. The celebrated Portage Falls, in the Genesee River, are opposite this place.[9] The soil is a sandy and clayey loam. **Portageville,** (p. v.,) on Genesee River, contains 2 churches and several mills. Pop. 561. The B. & N. Y. City R. R. crosses the Genesee, near the village, by a bridge 800 ft. long and 234 ft. above the bed of the river. This bridge was built at a cost of

$175,000, and is the largest wooden R. R. bridge in the world. The Genesee Valley Canal also crosses the river at this point by an aqueduct built upon stone abutments 40 ft. high; the structure cost $70,000. The first settlements were made on the river, above Portageville, in 1804, by John, Samuel, and Seth Fields.[1] The first religious meeting was held by Rev. John Griffith, (M. E.,) in 1809; and the first church (Bap.) was formed by Rev. Joseph Case, at "*Bigelows Corners*," in 1818.[2]

JAVA—was formed from China, April 20, 1832. It lies on the W. border of the co., S. of the center. Its surface is an elevated region, broken by hills and the deep valleys of the streams. The highest summits are 400 to 600 ft. above the valleys and 1,000 to 1,200 ft. above Lake Erie. Buffalo Creek flows through the W. part, and receives a large number of tributaries. Cattaraugus Creek takes its rise in the E. part. Cattaraugus Lake is a small sheet of water in the S. E. part, nearly surrounded by steep hills. It forms one of the sources of Cattaraugus Creek. The soil upon the hills is a thin, dark loam underlaid by hardpan; in the valleys it is principally a gravelly loam. About 1 mi. E. of Java Village is a quarry of fine building stone. **Java Village** (p. v.) lies upon Buffalo Creek, in the N. W. part of the town. Pop. about 200. **North Java,** (p. v.,) in the N. E. corner of the town, contains a church and about 100 inhabitants. **Java Center,** (p. o.,) **East Java,** (p. o.,) in the S. E. part of the town, **Curriers Corners,** (Java p. o.,) in the S. W., and **Williamsville,** near the E. border, are hamlets. The first settlement was made on Lot 32, in the N. W. part of the town, in 1810, by Wm. Richardson and Timothy Kirby, from Lowell, Mass.[3] The first church (R. C.) was formed in 1838.[4]

MIDDLEBURY—was formed from Warsaw, March 20, 1812. It lies on the N. border of the co., E. of the center. Its surface is a rolling upland, broken by the deep valleys of the streams. Oatka Creek flows through the S. E. corner, and Little Tonawanda Creek through the W. part. A deep ravine extends E. and W. through near the center of the town, forming a natural pass between the valleys of these two streams. The hills that border upon Oatka Creek are steep and 400 to 600 ft. high. The soil is a gravelly and clayey loam. **Wyoming,** (p. v.,) on Oatka Creek, near the E. border of the town, contains the Middlebury Academy,[5] 3 churches, and 378 inhabitants. **West Middlebury,** (Dale p. o.,) a station on the B. & N. Y. City R. R., contains 20 dwellings. The first settlement was made by Jonas Selliek, (from Rutland co., Vt.,) in 1802, near Wrights Corners.[6] There are 5 churches in town.[7]

ORANGEVILLE—was formed from Attica, Feb. 14, 1816. Wethersfield was taken off in 1823. It is an interior town, lying N. W. of the center of the co. Its surface is a rolling upland, broken by deep ravines. The streams are Tonawanda Creek and its branches, draining the W., and small branches of Oatka and East Coy Creeks, draining the E. parts of the town. The summits of the highest hills are 400 to 700 ft. above the valleys. The soil is a gravelly and clayey loam underlaid by hardpan. **Orangeville Center** (Orangeville p. o.) contains 15 houses; **Johnsonburg,** (p. v.,) on Tonawanda Creek, lies partly in Sheldon. Pop. about 100. **Halls Corners** (East Orangeville p. o.) is a hamlet. The first settlement was made in 1805, by John Duncan, on Lot 13, and Elisha Doty, from Cayuga co., on Lot 12.[8] The first church (Presb.) was organized by Rev. John Alexander, July 11, 1812.[9]

[1] Nathan and Joseph Dixon, Joseph and Justice Bailey, and Sebastah Ward settled previous to 1807. The first death was that of Sophia Smith, in 1817. The first school was taught by Maria Bellinger, in 1809. The first inn was kept by Lewis Wood, at Portageville, in 1824; and the first store, by Foot & Martin, the same year. The first sawmill was erected in 1812, and the first gristmill in 1820, on the river, by Mumford, Smith, & Mc Ivay.

[2] The census reports 5 churches; Bap., M. E., Presb., Univ., and R. C.

[3] In 1812 and '14, Chas. Richardson and David H. Worcester settled at Java Village, and Charles Fox at Curriers Corners. The first mill was erected by Daniel H. Worcester, at Java Village, in 1816; the first inn was kept by Chas. Fox, at Curriers Corners, in 1818; and the first store, by Mr. Comstock, at Java Village, in 1820.

[4] The census reports 4 churches; Cong., M. E., F. W. Bap., and R. C.

[5] This academy was founded mainly by the efforts and liberality of Silas Newell, one of the first settlers of the village. Its main building was erected by subscription, in 1817. It now has some endowments, and is under charge of the Baptist denomination. For many years it was considered the first institution W. of the Genesee River, and still maintains a high reputation.

[6] In 1803 a number of immigrants from Vt. settled in the town, among whom were Reuben Chamberlain, Jabez Warren, Frederick Gilbert, Sterling Sterns, and Israel M. Dewey. The first store was kept by Edwin Putnam, in 1810, near Wrights Corners; the first gristmill was built by Silas Newell, in 1813, near Wyoming Village; the first sawmill, by A. Worden, in 1809, at West Middlebury. Amzi Wright kept the first inn, at Wrights Corners, in 1806. In May, 1817, Artemus Shattuck, a citizen of this town, went into the woods, a distance from home, to chop. While cutting off a log that had been partially split open, his foot was caught in the crack, and he hung for a long time suspended by his foot and partially supported by one hand. Despairing of receiving aid, and entirely unable to extricate himself, he finally unjointed his ankle with his pocket knife, made a crutch of a crooked stick, and started for the house. He was found about dark, and carried to the house, where his leg was amputated by a surgeon. He recovered, became a Bap. minister, and lived many years.

[1] It was incorp. by the regents in 1855, and is under the management of a village board of education.

[2] Sash and blinds, horse rakes, carriages, and waterproof oil blankets.

[3] In the same year, Wm. Webster, Shubael Morris, Amos Kinney, Elijah Cutting, and Joseph Palmer settled in the S. part of the town, and Josiah Hovey in the N. part. The first settlers were mostly from New England. The first child born was Eliza Webster, in 1804; the first marriage was that of Silas C. Parce and Catharine Whiting, and the first death that of an infant son of Sterling Stevens, in 1804. The first death of an adult was that of Joseph Nash, in 1808. The first school was taught by Samuel M. Wheeler, in 1807. Elizur Webster kept the first inn, in 1809; and Absalom Green and Dan'l Shaw, the first store, in the same year. Solomon Morris built the first gristmill, in 1808.

[4] The census reports 6 churches; Presb., Cong., Bap., F. W. Bap., Prot. E., and M. E.

[5] John W. Parry, from Oneida co., settled at Wethersfield Springs in the fall of 1810, and built the first house at that place. The first school was taught by O. Martin. The first gristmill was erected by James Cravath, in 1812, on East Coy Creek, and the first sawmill, by Calvin Clifford, on the same creek, in 1810.

[6] The census reports 6 churches; 2 Bap., and 1 each Cong., Prot. E., M. E., and Christian.

YATES COUNTY.

This county was formed from [illegible] from Joseph C. Yates, then governor. Barrington and Starkey were added from Steuben, April [illegible], 1824. It is [illegible] 172 mi. from Albany, and [illegible]. The surface consists of a series of ridges extending from Steuben co. in a northerly direction, and gradually declining from a height of about 1,700 ft. above tide, upon the s. border, to a level of the undulating region near the foot of Seneca Lake. The first or most eastern of these ridges lies between Seneca and Crooked Lakes, and occupies the towns of Barrington, Starkey, Milo, Torrey, and a part of Benton. The highest summit is about 900 ft. above Crooked Lake and 1,200 above Seneca. The slopes are generally gradual and the inclination uniform. The second ridge occupies the high peninsula between the two branches of Crooked Lake, and extends N. through Jerusalem, [illegible] upland of Benton. The S. part of this ridge is known as "Bluff Point," from its abrupt termination. It is about 400 ft. above the lake. The third range lies between the W. branch of Crooked Lake and Flint Creek, and occupies the W. part of Jerusalem, the E. part of Italy, and the S. E. part of Potter. The highest summits in the S. are about 700 ft. above the lake. A fourth ridge lies between the valleys of Flint Creek and West River, and extends N. through the W. part of Potter. A fifth range occupies that portion of Middlesex lying between West River Hollow and Canandaigua Lake. The declivities of the last two ranges are mostly very steep; and their summits are 800 to 1,000 ft. above the valleys. The uplands, except in the extreme W. part, are smooth and arable to their summits. The valleys between them are wide and [illegible], and the N. part of the co. is a fine rolling region.

The lowest rocks in the co. are the upper series of the Hamilton shales, cropping out on the lower course of the Crooked Lake Outlet. Next above these, upon the same stream, appear the Tully limestone, Genesee slate, and Portage groups. The first of the three, furnishing [illegible], is the most valuable mineral in the co. The Portage group near Penn Yan furnishes a [illegible] quantity of flagging stone, and is extensively quarried for that purpose. The shales and sandstones of the Chemung group occupy the summits in the S. part of the co.; calcareous tufa is found upon Crooked Lake Outlet, and marl in the swamps near the foot of the lake. Iron pyrites have been found in considerable quantities at Bluff Point. The soil for the most part consists of a fine quality of gravelly loam, intermixed with clay and the disintegrated shales of the Portage group. It is well adapted to either tillage or pasturage.

The principal streams in the co. are Crooked Lake Outlet, Keuka Creek, Big Stream, Rock Stream, Flint Creek, and West River. Seneca Lake, forming the E. boundary of the co., is 447 ft. above tide, and Canandaigua Lake, forming a part of the W. boundary, 668 ft. Crooked Lake,[1] near the center, two-thirds of it lying within the co., is 718 ft. above tide and is 18 mi. in length. Its N. part is divided by Bluff Point into two branches, each of which is from one to two mi. wide. Owing to the depredations of the midge winter wheat is less grown than [illegible] grains, root crops, stock, wool, and fruit are much more extensively and profitably produced. The outlet of Crooked Lake affords large water power for [illegible] slightly improved.

The county seat is located at the village of Penn Yan,[2] on the line of Milo and Benton.[3] The first courthouse[4] and jail combined was erected in 1824; and in 1834 it was burned. In 1835 a new brick courthouse was built, on a public square, at a cost of $12,000. A jail, detached, was erected the same season. The latter was destroyed by fire in Feb. 1857, and was rebuilt the same year, at a cost of $10,000. A clerk's office was erected some years [illegible]

with the other public buildings, near the center of the village. The co. poorhouse is located on a farm of 123 acres in the town of Jerusalem, about 5 mi. s. w. of Penn Yan.[1] The average number of inmates is 86, and they are supported at a weekly cost of $1 40 each. A school is taught in the house during a portion of the year, and religious services are held occasionally. The Crooked Lake Canal extends along the outlet of Crooked Lake, and enters Seneca Lake at Dresden. It opens a direct water communication with Yates co. and the N. portion of Steuben, and affords an easy and cheap means of transportation. The Elmira, Jefferson & Canandaigua R. R. extends through the co., E. of the center, connecting with the N. Y. C. R. R. at the N. terminus and with the N. Y. & E. R. R. at the S. These two works of internal improvement furnish market facilities equal to those generally enjoyed by the interior cos. of the State.

Three newspapers are published in the co.[2]

The early history of this co. is intimately associated with the history of the "*Friends*," a religious sect founded by Jemima Wilkinson.[3] This singular woman took the name of the "*Universal Friend*," and was regarded as a prophet by her followers, among whom were persons of respectability, wealth, and influence. At a general meeting of the sect, in Conn., in 1786, it was resolved to emigrate to some unsettled region and found a colony where they might live in peace and in the undisturbed enjoyment of their religious opinions. Three of their number were delegated to seek out a proper location.[4] They proceeded to Penn., went up the Susquehanna River, and followed the route of Gen. Sullivan to Seneca Lake, where they finally determined to locate. In June, 1787, 25 "*Friends*" set out for the land of promise by the way of the Mohawk Valley. They settled about 1 mi. s. of the present village of Dresden, the location being fixed upon from its close proximity to the fine waterfalls upon Crooked Lake Outlet.[5] During the fall they prepared the land, and in the following season sowed it with winter wheat, which they harvested in 1789; and this was the first wheat crop raised in Western N. Y. In 1789, Wm. Potter and Thos. Hathaway, two of their number, purchased of the State 14,000 acres of land lying between Seneca Lake and the Pre-emption Line, and subsequently Thos. Hathaway and Benedict Robinson purchased the town Jerusalem of Phelps and Gorham.[6] In 1789, Jemima and a large number of her followers

[1] This building, erected 25 years ago, is 100 ft. by 50, and 3 stories high, including basement. The farm yields a revenue of $1,000.

[2] *The Penn Yan Herald* was established at Penn Yan in May, 1818, by Abraham H. Bennett. In 1820 it appeared as **The Penn Yan Democrat.** In 1835 it was pub. by Bennett & Reed, in 1842 by Reed & Bennett, and in 1847 by Alfred Reed. In 1850 Darius A. Ogden became proprietor, in 1853 Reuben Speer, and in 1857 Geo. D. A. Bridgman, its present publisher.

The Yates County Republican was started Dec. 16, 1824, by E. J. Bowle, and continued 10 years. He then sold it to John Remmick, who published it as

The Penn Yan Enquirer about 2 years, when it was discontinued.

The Western Star was pub. at Penn Yan in 1833 by H. Gilbert.

The Miscellany was pub. at Penn Yan in 1833 by Thos. H. Bassett.

The Democratic Whig was commenced in 1837 by Wm. Child. About 2 years after it passed into the hands of Nicholas D. Sandam, who changed its name to

The Yates County Whig. In 1845 it passed into the hands of Rodney L. Adams. In 1852 Mr. Adams sold it to Cleveland & Look. Mr. Look soon retired, and in 1856 its name was changed to

The Yates County Chronicle. It is now published by Stafford C. Cleveland.

The Democratic Organ was commenced in 1841 at Penn Yan by Harvey L. Winants, and published about 2 years.

The Penn Yan Telegraph, da., was issued from the office of The Whig, for 6 mos. in 1846.

The Dundee Record was commenced at Dundee, Jan. 25, 1844, by Gilford J. Booth. Edward Hoagland succeeded to its editorship in 1847, John J. Dieterdorf in 1853, and D. S. Brauer, its present publisher, in 1857.

[3] Jemima Wilkinson was the daughter of Jeremiah Wilkinson, a R. I. farmer. She was one of a family of 12 children and had little or no advantages of education. In her 20th year she had a severe attack of fever; and for some time her life was despaired of. Upon her recovery she claimed that she had been raised from the dead—that her carnal existence was ended and henceforth her life was to be spiritual and divine,—and that she was endowed with the power of prophecy. She soon commenced traveling and exhorting, and succeeded in converting many persons, among whom were several substantial New England farmers. The following description of her person is copied from "The New Haven Gazette and Connecticut Magazine," dated March, 1787. "She is about the middle sized woman, not genteel in her person, rather awkward in her carriage; her complexion good, her eyes remarkably black and brilliant, her hair black and waving with beautiful ringlets upon her neck and shoulders. Her features are regular, and the whole of her face is thought by many to be perfectly beautiful. As she is not to be supposed of either sex, so this neutrality is manifest in her personal appearance. She wears no cap, letting her hair hang down as has been described. She wears her neckcloth like a man; her chemise is buttoned around the neck and wrists. Her outside garment is a robe, under which it is said she wears an expensive dress, the fashion of which is made to correspond neither with that of man nor woman. Her understanding is not deficient, except touching her religious fanaticism. She is very illiterate, yet her memory is very great; artful in discovering many circumstances which fall out among her disciples. On all occasions she requires the most extraordinary attentions that can be bestowed upon her: once more of her disciples usually attend upon her and perform the most menial services. Her pronunciation is after the peculiar dialect of the most illiterate of the countrypeople of New England. Her preaching has very little connection, and is very lengthy,—at times cold and languid, but occasionally lively, zealous, and animated." When she first arose from her bed of sickness, she assumed that there was once such a person as Jemima Wilkinson, but that she died and went to heaven, after which the Divine Spirit reanimated that same body and it arose from the dead; now, this divine inhabitant is Christ Jesus our Lord, the Friend to all mankind, and gives his name to the body to which he is united, and therefore body and spirit conjointly is the "*Universal Friend*." She assumed to have two "*Witnesses*," corresponding in all respects to those prophesied in Rev. chap. xi. from 3d to 13th verses. These were James Parker and Sarah Richards. During her whole life she never yielded the pretensions which she at first made; and her whole career had the merit of consistency. Among the principal peculiar tenets of the sect was the strict enforcement of the Shaker doctrine of celibacy as indispensable to a pure life. The meetings were conducted after the manner of the Quakers, the whole congregation often sitting in perfect silence for an hour or more.—*See Turner's Hist. of The Phelps and Gorham Purchase.*

This extraordinary woman exercised a strong influence over her followers, who gratuitously planted and hoed her corn, sowed and reaped her wheat, and cut and gathered her hay, always having care to be of no trouble or expense to the Friend upon these occasions. On one occasion she addressed, through an interpreter, a band of Oneidas who had encamped near her settlement on their way to a treaty, endeavoring to convince them that she was Christ. They listened with apparent attention, and, when she had finished, one of the chiefs arose and delivered a short address to her,—when the savage contemptuously replied, in broken English, that if she were the character she assumed to be, she would have understood the poor Indian as well as any one. She died July 1, 1819, and her sect has long since been broken up.—*Hudson's Life of Jemima Wilkinson.*

[5] The first gristmill in Western N. Y. was built in 1789, by Richard Smith, James Parker, and Abraham Dayton, 2½ mi. from Dresden.

[6] "It was a rule at that early period with Messrs. Phelps &

came in. The first framed house in the co. was erected for her, on a farm of 1000 acres set apart for her especial use. For a time the colony flourished, but soon neighbors began to arise, and jealousies were engendered, and a series of persecutions commenced, which seriously retarded the progress of the colony and embittered the last days of the "*Friend*."[1]

BARRINGTON—was formed from Wayne, (Steuben co.,) April 6, 1822. It lies upon the w. bank of Crooked Lake, in the s. part of the co. Its surface consists principally of a table ridge, sloping gradually upward from Crooked Lake to a height of 600 ft. above it. Big Stream flows through the s. E. corner, in a deep ravine bordered by steep declivities. From Crooked Lake the ascent is nearly uniform for 2 miles; and the summit of the ridge is rolling. The soil is a slaty gravel mixed with clay, and is generally productive. **Barrington,** (p. v., near the center, contains 1 church and 25 houses. The first settlement was made in 1800, by Jacob Tompkins. The Rev. Jas. Osgood (Bap.) was the first preacher. There are two churches in town: Bap. and M. E.

BENTON[2]—was formed from Jerusalem, Feb. 12, 1863, as "*Vernon*." Its name was changed to "*Snell*" April 6, 1808, and to Benton April 2, 1810. Milo was taken off in 1815, and part of Torrey in 1851. It is the N. E. corner town of the co. Its surface is rolling and hilly, descending toward the N. and E. From Seneca Lake the land slopes upward to a height of about 300 ft., where it spreads out in a beautiful undulating region. The valley of Crooked Lake, 200 ft. below the summits of the table land, extends about 1 mi. into the S. part of the town. Keshong Creek passes through the N. E. corner. The soil is clay along the lake, but upon the hills it is a deep, rich, clayey and gravelly loam, well adapted to almost every branch of agriculture. **Bellona,** (Benton p. o.,) situated on Keshong Creek, in the N. E. part, contains 2 churches, (pop. 205;) and **Benton Center** (p. v.) 2 churches and 28 dwellings. **Fergusons Corners** (p. o.) is a hamlet. The village of Penn Yan lies partly within this town. The first settlement was made in the spring of 1789, by Levi Benton, from Catskill, Greene co. The first religious meetings were held in the barn of Levi Benton, in 1792, and were conducted by Ezra Cole. There are now 4 churches in town.[6]

ITALY—was formed from Naples, Feb. 15, 1815. It is the S. W. corner town of the co. Its surface consists of three distinct ridges, each attaining an elevation of about 1000 ft. above Canandaigua Lake. These ridges are divided by the valley of Flint Creek, known as Italy Hollow, and West River Hollow. The valleys are generally narrow and bordered by steep and often precipitous sides. The summits of the ridges are broken uplands. The soil is a slaty and gravelly loam and is best adapted to pasturage. **Italy Hill** (p. v.) is situated in the S. E. corner; and **Italy Hollow** (p. o.) on Flint Creek, S. of the center. The first settlement in the town was made by John Mower, at West Hollow, in 1793.[7] There are 4 churches in town.[8]

JERUSALEM—was organized Jan. 1789, and Benton was taken off in 1808. A small part of Steuben co., in the forks of the lake, was annexed Feb. 25, 1814. It lies on the W. bank of Crooked Lake and is the central town in the co. Its surface is divided into two distinct ridges by the W. branch of the lake and its inlet. The E. ridge terminates on the S. in Bluff Point, a promontory, 8 mi. in extent, lying between the two branches of Crooked Lake; and it extends on the N. into the town of Benton. It is about 400 ft. high and 1½ to 2 mi. wide, and is bordered by steep declivities. The continuity of this ridge is broken by a remarkable depression extending

[3] Its first settlers were Thomas Burtsell, from Orange co.; Wm. Cowenhoven, from N. J.; Jonathan, David, William Cavendaire, Oliver Porter, Andrew Knapp, Joseph Benton, Jacob Kinney, and Henry Spry. The first school was taught by A. C. West, in 1810. Jacob Tompkins published the first newspaper in 1824, on the Bath Road, and Elijah Townsend, the first store. John Carr erected the first gristmill, and Wm. Cowenhoven the first sawmill.

The ridge on the w. rises gradually for 3 or 4 mi. and attains a height of about 700 ft. above the lake, where the surface spreads out into a rolling upland. The soil is a gravelly and slaty loam, and is well adapted to both pasturage and tillage. **Branchport,** (p. v.,) situated at the head of the w. branch of Crooked Lake, contains 3 churches and about 55 houses. **Kinneys Corners** (Bluff Point p. o.) is situated in the E. part of the town; **Shermans Hollow** and **Yatesville** are p. offices. The first settlement was made by Jemima Wilkinson, in 1789.[1] In that year crops of wheat were harvested in the town, and a mill was erected that made flour the same season. The first, and for a long time the only, religious services in town were conducted by Jemima, at her own house. There are 4 churches in town.[2]

MIDDLESEX—was formed in 1789, as "*Augusta.*" Its name was changed April 6, 1808. Potter was taken off in 1832, and a part was annexed to Potter in 1856. It is the N. W. corner town, lying upon the E. bank of Canandaigua Lake. Its surface consists chiefly of high ridges separated by narrow valleys. The summits are 500 to 600 ft. above the lake. The valley of West River divides the ridges, and the valley of a small stream known as Boat Brook divides the w. ridge into two peaks, the N. of which is known as "Bare Hill." The soil is clayey on the summits of the hills, and gradually changes to a deep gravelly loam in the valleys. Near Federal Hollow, a mile from Rushville, is an inflammable spring.[3] **Middlesex Center** (Middlesex p. o.) contains 3 churches and 20 dwellings. **Overackers Corners** is a hamlet. The first settlement was made in 1789. Judge Potter, one of the surveyors of Phelps and Gorham's purchase, was the original purchaser of the town, and took an active part in its first settlement.[4] Many of the first settlers were adherents of Jemima Wilkinson; and for a considerable time there was no other religious association in the town. There are now 4 churches.[5]

MILO—was formed from Benton, March 6, 1818. A part of Torrey was taken off in 1851. It lies on the E. border of the co., between Seneca and Crooked Lakes. Its surface rises from Seneca Lake in a gentle and gradual slope for 2 mi., where it attains an elevation of about 400 to 500 ft. From this summit the land spreads out into an undulating region, gradually declining on the w. to the valley of Crooked Lake. The soil is principally a gravelly loam, with some clay in the vicinity of Penn Yan and on the shore of Seneca Lake. **Penn Yan,**[6] (p. v.,) the county seat, was incorp. April 27, 1833. It is situated at the foot of Crooked Lake, and is an important station on the Elmira, Jefferson & Canandaigua R. R. A daily steamer connects it with Hammondsport, at the head of Crooked Lake. It contains 6 churches, a high school,[7] 2 newspaper establishments, and a bank. Pop. 2,277,—2,114 in Milo, 163 in Benton. **Milo Center** (p. v.) contains 150 inhabitants; and **Himrods Corners** (Milo p. v.) 78. The first settlement was commenced in the N. part, by the followers of Jemima Wilkinson, from R. I., in 1788.[8] The first religious services were conducted by Jemima Wilkinson. There are now 10 churches in town.[9]

POTTER[10]—was formed from Middlesex, April 26, 1832, and part of Middlesex was annexed Dec. 18, 1856. It lies near the center of the N. border of the co. Its surface is hilly in the S. W., and rolling in the center and N. Flint Creek, the principal stream, flows northerly through near the center of the town. A swamp of 1 to 1½ mi. wide extends along its course for 8 mi. N. of Potter Center. The soil is a slaty loam in the S. W., and a gravelly and sandy loam, with an intermixture of clay, in the remaining parts. **Rushville** (p. v.) is partly in Gorham, Ontario co., but principally in the N. W. part of this town. Pop. 583,—408 in Potter, 175 in Gorham. **Potter Center** (Potter p. o.) contains 20 houses. **Voak** is a p. o. on the line of Benton. Settlement was begun in 1788, by the followers of Jemima Wilkinson. The most prominent among them were William

1 The first settlers were Thomas Hathaway and Daniel Brown. In 1789, Jemima, "*The Universal Friend,*" as she was called, entered the town with a large retinue, among whom were Sarah Richards and Rachael Malin her two "*Witnesses.*" Isaac Kinne, v. Solomon Bradshaw, Samuel Doolittle, and Wm. Sandford, a part of her friends all from Rhode Island. They all lived with Jemima in the house previously erected for her,—the first frame house built in Western N. Y. The first gristmill was built by Richard Smith, James Parker, and Abraham Dayton, 2 mi. from Penn Yan. David Wagener opened the first public house at the same place; Daniel Brown built the first sawmill, north of Branchport; and John Neves taught the first school, in 1794.

2 Bap., M. E., Presb., Univ. 3 *Beck's Mineralogy N. Y.*, p. 166.

4 Among the first settlers were Michael Pierce, John Walford, Jabez French, John Blair, James Lewis, and John McNear, all from R. I. William Bassett taught the first school, in 1796; Jesse Gilbert kept the first tavern, near Rushville, and Nelson Wilder the first store. John Walford, jr., built the first sawmill. The first death was that of Mrs. Lucy Walford, in 1791.

5 Two M. E., Bap., and Free Will Bap.

6 Among the early settlers of the village were a Pennsylvanian and a Yankee, each of whom wished to name the place. The matter was finally compromised by uniting the first syllable of their respective designations,—Penn and Yan.

7 The Penn Yan High School was incorporated as an academy in 1857. The building is now in process of erection.

8 The first settlers were Abraham Dayton, Richard Smith, Jas. Parker, John Lawrence, Stephen Card, Samuel Heartwell, Hezekiah Townsend, Dan'l and Ichabod Briggs, John Sapplee, Eli Beard, Micajah Brown, David Wagener, and Adam Hunt and his sons, Abel and Silas. The first death was that of Mrs. Jedediah Holmes, in 1788. As Jemima Wilkinson's creed was the dominant religion of the town at that period and for some time after, there were no marriages, and of course no known births. It was an era in which people died and none were legitimately born. Hezekiah Townsend kept the first inn, a little E. of Penn Yan, and James Hill the first store.

Settlement [illegible] Rev. Mr. Clark conducted the first religious services, in 1808. There are 8 churches in town.[6]

TORREY[7]—was formed from Benton and Milo, Nov. 14, 1851. It lies [illegible] the co., on the shore of Seneca Lake. Its surface consists of a slope rising from the lake to the w. borders, to an elevation of 400 to 500 ft. Crooked Lake Outlet flows through a deep, narrow, and rocky valley. Its whole fall from Crooked to Seneca Lake is 271 ft. The soil on the lake shore is clayey, and in the center and w. a sandy and gravelly loam. **West Dresden** (p. v.) [illegible] Seneca Lake, at the terminus of Crooked Lake Canal. It is a landing for the Seneca Lake steamers. Pop. 365. The town was settled by the followers of Jemima Wilkinson, mostly from New England, in 1788.[9] Jemima was the first preacher. There are now 2 churches in town; Presb. and M. E.

TROY FEMALE SEMINARY.

This Institution offers the accumulated advantages of nearly fifty years of successful operation. Every facility is provided for a thorough course of useful and ornamental education, under the direction of a corps of more than twenty professors and teachers. The members of the Institution have the benefit of Lectures of the highest order on

SCIENCE, HISTORY, LITERATURE, ART, &C. &C.,

And the use of a valuable Library, an extensive Philosophical Apparatus, a well selected Cabinet of Minerals, and Shells, Maps, Charts, and Models.

Superior Music Teachers are constantly employed in the Seminary. Great Attention is given to the French Language.

The teachers reside in the family, and adapt their instructions to its use in conversation.

THE CLASSES IN DRAWING AND PAINTING, IN OIL AND WATER COLORS,

Are under the direction of instructors of long experience and tried ability. A large and choice collection of Pictures is constantly before them for study and for patterns.

The pupils are received into the family of the principals, in which every arrangement is made for their physical education and the improvement of their manners and morals. They occupy private rooms, two in each, the rooms of the female teachers and that of an experienced nurse being among those of the young ladies.

Circulars containing more particular information may be obtained by application to the principals,

TESTIMONIALS OF EXAMINING COMMITTEES.

Rev Wm Scott, of Montreal, Secretary, 1855. The Committee found the buildings, in their construction and specific arrangements, better adapted to their purpose than any other ever visited by them.

Jas. S. Wadsworth, of Troy, Secretary, November, 1856. We were highly gratified with the good order and decorum apparent in every department of the Institute.

Rev. M. Bates, of Schenectady, Secretary, March, 1857. There is, we think, no Institution not wholly devoted to this object, where equal facilities are afforded for acquiring, at trifling expense, a thorough business education.

Prof. John Newman, A.M., of Union College, Secretary, Nov. 18, 1857. This institution, in its plan and arrangements, has regard to the physical as well as the moral and intellectual training of its members.

THE COURSE OF INSTRUCTION

Is liberal and thorough, such as experience has proved to be most effectual for this purpose. Pupils are prepared for any class in college, for the scientific schools, or for commercial life. The

ANCIENT LANGUAGES

are taught critically and with a view to sound scholarship and not to mere superficial acquaintance. The

MATHEMATICAL COURSE

is extensive. The preparation of pupils who have passed through it, and their success elsewhere, give the best evidence of faithfulness and skill in this very essential department of instruction. Very many are the unsolicited testimonials received on this point. Special attention is given to the

MODERN LANGUAGES:

French, Spanish, and German form an important part of the course of study, and are taught as spoken languages by well qualified masters. The

ENGLISH LANGUAGE,

also, in its elements, as well as in its higher departments, receives more than ordinary notice, and is not made subordinate to any other study.

MORAL AND RELIGIOUS TRAINING

is carefully regarded, as in every well ordered household; but no sectarian influence is attempted with the peculiar tenets of any faith. Seats are provided for the pupils in both the Episcopal and Presbyterian Churches.

PHYSICAL EDUCATION.

The complete arrangements made for this generally neglected object, and the success that has attended them, deserve to be specially noticed. Under their influence, we have seen the delicate and almost pros-

boy become the robust and enduring youth, able to sustain continued application and to perform in after life an amount of intellectual labor that only a sound and vigorous development could make possible. In connection with the

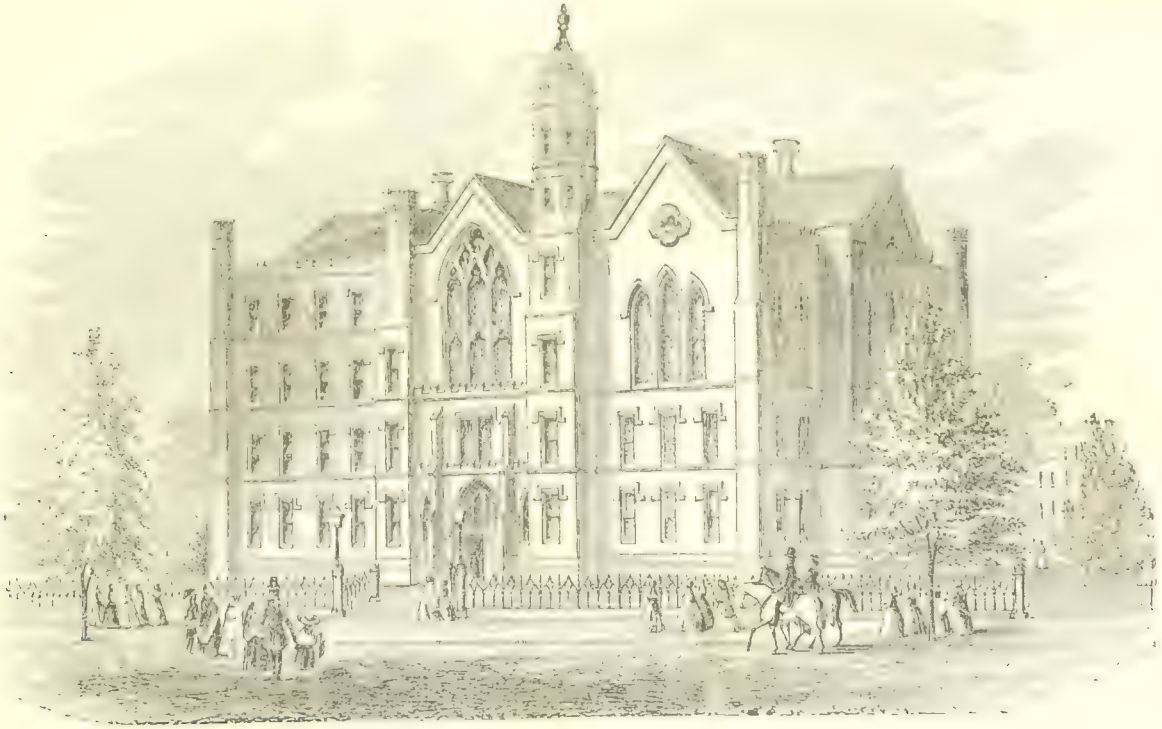
GYMNASIUM AND THE RIDING SCHOOL

ARE THE

MILITARY EXERCISES,

The infantry and artillery drills; and, while these receive a minuteness of attention not often given to them, and are so used as to produce physically a permanent effect, they have no tendency to create a desire, as experience has shown, for a military life. The system, as here arranged, has been chosen for the great benefits that result from it. But, although a military school, the institution, it must be distinctly understood, is not for the training of those who are vicious or unmanageable under any other system. Should any of this class, by accident or misrepresentation, ever be received, they will, on the manifestation of such character, be at once returned to their parents. The feelings of the principals, not less than their intimate relations with their pupils, look to other associations and other results. Confidence, patience, and kindness on their part, truthfulness, honor, and generous sentiment on the pupil's, are the basis and the bond of union between them. No boy who is insensible to considerations of this kind is desired in the school, nor can he long remain connected with it.

Pupils are received whenever a vacancy occurs; but, as the number is limited and places are usually filled in advance, applications, to prevent disappointment, should be made as early as possible.



Further information may be obtained from the gentlemen named as references, or by addressing the principals.

PACKER COLLEGIATE INSTITUTE, BROOKLYN.

A. CRTITENDEN., A.M., PRINCIPAL.

GARDEN FRONT, LIVINGSTON STREET.

PACKER COLLEGIATE INSTITUTE,

BROOKLYN HEIGHTS, L. I.

This Institution claims to give to females all the advantages for thorough and complete education that are enjoyed by the other sex in our best appointed Colleges.

It is liberally endowed, and is under the patronage of the State.

Its location, in the city of Brooklyn, opposite New York, enables it to command all the educational resources of the metropolis; while no country village is more quiet, beautiful, or healthy.

THE COURSE OF INSTRUCTION

Is under the direction of A. Crittenden, A.M., who has devoted his whole life to female education. He is assisted by twenty-four professors and teachers; and the course of instruction embraces the modern languages, with Latin, the various branches of Literature, History, Mathematics, Chemistry, Natural, Moral, and Intellectual Philosophy, Music, Drawing, Painting, &c. &c.

THE LABORATORY

Is a model of its kind, and furnished with every necessary article of apparatus.

THE OBSERVATORY

Has an excellent achromatic telescope of six inches object glass. It is equatorially mounted, moved by clockwork, &c.

THE CABINETS

Are amply provided with minerals, shells, &c. One or two articles of apparatus particularly arrest the attention of the observer,—one of Ross's Compound Microscopes, which magnifies 1800 diameters, also Barlow's large Planetarium, eleven feet in diameter.

The accommodations for pupils from abroad are intended to afford all the comforts of home, and to secure for them social, intellectual, and moral culture.
